PROMINENT CONTRIBUTORS AND REVISERS.

- Abbott, Lyman, D. D., LL. D.,**
Editor of "The Outlook"
- Adams, Charles Follen,**
Author.
- Adams, Charles Kendall, LL. D.,**
Author, President of Cornell University
- Alexander, Hon. E. P.**
R. R. President, Ex-Confederate General
- Alger, Rev. William Rounseville,**
Author.
- Andrews, Rev. E. Benj., D. D., LL. D.,**
Educator and Author.
- Avery, Col. Isaac W.,**
Author of "History of Georgia."
- Baird, Rev. Henry Martyn, D. D., LL. D.,**
Professor, University City of New York
- Ball, G. Washington,**
Genealogist and Author.
- Blake, Lillie Devereaux,**
Author.
- Bolton, Mrs. Sarah Knowles,**
Author.
- Bowker, R. R.,**
Writer and Economist.
- Brooks, Noah,**
Journalist and Author
- Brown, Col. John Mason,**
Author of "History of Kentucky."
- Browne, William Hand,**
Historian, Professor, Johns Hopkins University
- Burnett, Mrs. Frances Hodgson,**
Author.
- Burton, Rt. Rev. L. W., A. M., D. D.,**
P. E. Bishop, Lexington, Ky
- Capen, Elmer H., D. D.,**
President of Tufts College
- Carter, Franklin, Ph. D., LL. D.,**
President of Williams College.
- Cheney, John Vance,**
Librarian of Newberry Library, Chicago
- Christie, Charles J.,**
Managing Editor of the Cincinnati "Commercial Tribune."
- Clarke, Richard H., LL. D.,**
President of the New York Catholic Protectory
- Coan, Titus Munson, A. M., M. D.,**
Author.
- Cones, Elliott, M. D., Ph. D., LL. D.,**
Scientist and Author.
- Crawford, Edward F.,**
Of the New York "Tribune."
- Croes, J. James R.,**
Civil Engineer.
- Culbertson, J. C., M. D.,**
Editor of the Cincinnati "Lancet-Clinic"

Rector of Grace Church, Cleveland, O.
- Wright, Gen. Marcus J.,**
Historian and Custodian of Confederate Records in United States War Department.

THE NATIONAL CYCLOPEDIA OF AMERICAN BIOGRAPHY.

McKINLEY, William, twenty-fifth president of the United States (1897-1901), was born at Niles, Trumbull co., O., Jan. 29, 1843, seventh child of William and Nancy (Allison) McKinley. From the west of Scotland, and during the reign of Charles II, some of his paternal ancestors migrated to county Antrim, Ireland, and settled in the neighborhood of Belfast. Thence, about 1743, two brothers came over to Pennsylvania, one of whom, James, made his home at Chanceford, York co., and had a son, David, a soldier in the Continental army who participated in the capture of Paulus hook. James McKinley, grandson of the emigrant, was married to Mary Rose, of Doylestown, Pa., and removed to Ohio, where he established iron foundries: at New Lisbon, Columbiana co., and in Trumbull county, the one at Niles passing into the hands of his son, William, father of the president. William McKinley, Sr., continued the business successfully, both in Ohio and in Pennsylvania, and later had similar interests in Michigan, naturally being a strong advocate of a protective policy. His wife, the daughter of Abner and Ann (Campbell) Allison, and of English, Scotch and German descent, lived to see her son receive the highest honor his country has to bestow, dying in December, 1897. In 1852 the McKinleys removed to Poland, Mahoning co., for the better education of their children, and their son William entered Union Academy, where he stood high in his classes, especially in mathematics and languages, and was prominent in debates and literary exercises. At the age of sixteen he entered Allegheny College, Meadville, Pa., as a junior, but in less than a year's time was obliged to leave on account of ill-health. After teaching a district school for a term he became a clerk in the post-office at Poland, and was thus employed when the civil war began. On June 11, 1861, he enlisted in the 231 Ohio volunteer infantry, which was assigned to the army of the Potomac. As commissary sergeant at Antietam he performed a feat probably never before undertaken, of supplying the men of his regiment with hot coffee and meats during an active engagement, risking his life in so doing, but coming out unscathed and receiving as a result a promotion to the position of second lieutenant. He was promoted from sergeant to second lieutenant on Sept. 24, 1862. He served on the staff of Gen. Rutherford B. Hayes for nearly two years; was promoted to first lieutenant, Feb. 3, 1863, and for gallantry at Winchester, to captain, July 25, 1864. At Opequan and Fisher's hill, Capt. McKinley was an aid to Gen. Crook, and after the latter's capture was retained for several

months by Gen. Hancock. He was then assigned as assistant adjutant-general to the staff of Gen. Samuel S. Carroll, commanding the veteran reserve corps at Washington. On March 14, 1865, Pres. Lincoln brevetted him major for gallantry at Opequan, Fisher's hill and Cedar creek. He was mustered out on July 26th, and, yielding to his father's advice, returned to Ohio, though anxious to enter the regular army. Maj. McKinley began the study of law at Poland, and after a course at the Albany (N. Y.) Law School was admitted to the bar in March, 1867, and formed a law partnership at Canton with Judge Belden. He was prosecuting attorney for Stark county (1869-71); was active as a Republican campaign speaker in the Grant-Greeley campaign of 1872, and was equally active in behalf of Hayes in 1876. In 1876 he addressed a large audience at the Union League, Philadelphia, creating so profound an impression that demands for his services as a platform speaker came from all parts of the country. Major McKinley was elected to congress in that year by 3,300 majority, and was re-elected in 1878, but by 1,234 majority only, his district having been "gerrymandered." His first speech, April 15, 1878, was in opposition to a non-protective tariff introduced by Fernando Wood, and this marked him as one of the best equipped defenders of protection in congress. He was re-elected in 1880 and served on the judiciary committee; on the board of visitors to the West Point; and succeeded Garfield on the ways and means committee, becoming chairman in 1890. In 1880 he represented Ohio on the Republican national committee, accompanied Garfield on his tour through New York, and made speeches in other states. In 1882 the Democrats carried Ohio, but he was returned by the narrow plurality of eight votes, and in 1883 again the Democrats carried the state, and in 1884 they redistricted it. This caused McKinley's claim to his seat in congress to be contested, and on May 27th, though defended by such eminent Democrats as Frank H. Hurd, of Ohio, and Roger Q. Mills, of Texas, he lost it. He was returned to congress, however, in October. During this year he served as a delegate-at-large to the national Republican convention; accompanied James G. Blaine on his western tour, and made campaign speeches in Ohio, New York and West Virginia. The general assembly, chosen in 1885, restored his old district, and in 1886 he was re-elected. In the 50th congress (1887-89) he led the opposition to Pres. Cleveland's views and policy respecting the tariff, which were substantially embodied in what became known as the Mills bill (also called the dark bill), and from the secrecy attending its origin, and on May

18, 1888, he delivered what was considered by the Republican party to be one of the most eloquent and effective speeches in defence of American labor and the cause of protection on record. A delegate-at-large to the national Republican convention of 1888, he was chairman of the committee on resolutions, as he had been four years previous; and would have been put forward as a presidential candidate but he forbade the use of his name because he was pledged to vote for John Sherman. He was nominated for congress for the seventh time in 1888 and defeated George P. Ikert, Democrat, by 4,100 votes. He was a candidate for speaker in the 51st congress, but was defeated by Thomas B. Reed. Amendment of the old code of rules governing proceedings in the house having become desirable he was one of a committee of four, two being Democrats, which reported a code of rules based on those of previous congresses, but containing provisions expressly intended to enable the majority to legislate. He introduced, on Dec. 17, 1889, a bill "to simplify the laws in relation to the collection of revenue," and on April 16, 1890, the general tariff measure which bears his name. As amended the bill reduced internal revenue taxes on tobacco and tobacco licenses about \$6,000,000, and customs duties about \$60,000,000; placed fifty articles previously dutiable, including raw sugar, on the free list; slightly

lowered the duty on a number of articles, slightly raised it on others, and sufficiently on some to give protection to the American product; it authorized the president to suspend the free importation of several articles from countries which refused reciprocity and imposed unequal and unreasonable duties upon the products of the United States. This bill became a law, Oct. 1, 1890, and was signed by Pres. Harrison, Oct. 6th. It was superseded by the Wilson bill in 1894. In June, in a caucus of the Republican members of the house, McKinley offered a substitute for the Windom silver bill.

Among its provisions was one making the certificates issued on bullion purchased legal tender for private debts; another for free coinage upon the ratio of 16 to 1 where silver had risen in price sufficiently to make 371.25 grains of pure silver worth 23.22 grains of pure gold, and another for the discontinuance of the compulsory coinage of silver dollars. The bill, slightly amended, passed the house; but the senate eventually changed it so that it became an entirely new measure, an unlimited free coinage and an unlimited legal tender amendment being adopted. It passed the senate, but was changed by the house, the senate amendments being defeated; and having been passed a second time, was referred to a conference committee composed of sound-money and free-coinage Republicans, who matured a compromise bill, now called the "Sherman law." The passage of the tariff bill cost McKinley his seat in congress, Ohio going Democratic in 1890, but the majority of his opponent, John G. Watwick, was only 300. Besides serving on the committees of ways and means and rules while in congress, McKinley was a member of the committee on the revision of the laws and of that on expenditures in the post-office department. In 1891, after an exciting canvass, he was elected governor of the state of Ohio, his plurality over James E. Campbell, Democrat, being 21,511. In the opening speech

of the campaign at Niles he said: "I am in favor of the double standard, but I am not in favor of the free and unlimited coinage of silver in the United States until the nations of the world shall join us in guaranteeing to silver the status which their laws now accord to gold." He was re-nominated in 1893 and was elected, his plurality over Lawrence T. Neal, Democrat, being 80,995, the largest, with one exception, polled by any candidate in the history of the state; his majority was 43,026. Both administrations were highly satisfactory. The executive gave especial attention to the improvement of public institutions, the canal system and the roads, and on his initiative a state board of arbitration was established as a means of settling disputes between employers and employees. At the state Republican convention of 1892 McKinley was elected a delegate-at-large to the national convention at Minneapolis, of which body he became permanent chairman, also serving as chairman of the Ohio delegation. He was pledged to support Pres. Harrison for renomination, and when an effort was made to stampe the convention in his own behalf, 182 votes being cast for him, he checked the movement by taking the floor and moving that Harrison's nomination be made unanimous. At the national Republican convention which met in St. Louis in 1896 the names of William B. Allison, of Iowa; Thomas B. Reed, of Maine; Levi P. Morton, of New York; William McKinley, of Ohio, and Matthew S. Quay, of Pennsylvania, were presented. On the first ballot McKinley received 661½ votes; Reed, 814; Quay, 61½; Morton, 58, and Allison, 35½, and his nomination was at once made unanimous. Garret A. Hobart, of New Jersey, was nominated as vice-president. The platform declared for the maintenance of the gold standard and for a revision of the tariff. The regular Democratic nominees were William J. Bryan, of Nebraska, and Arthur Sewall, of Maine, with a platform that demanded the free and unlimited coinage of gold and silver at the ratio of 16 to 1. Bryan was also endorsed by the Populists, but they utterly refused to accept Sewall on account of his wealth, and nominated instead Thomas E. Watson, of Georgia. Unlike his Democratic opponent, McKinley took no active part in the campaign, other than receiving numerous delegations at his home in Canton, and making speeches, remarkable for their variety, comprehensiveness and good taste. "Sound money" was the chief issue of the campaign, one of the most interesting in the history of the nation, and thousands of Democrats abandoned the principles the party had stood for and supported the Republican candidate. The total popular vote was 13,925,380, of which the Republicans cast 7,106,779 votes; the "Bryan Democrats," including the Populists and Silver party, who also had made William J. Bryan their candidate, 6,502,925; the National or anti-Bryan Democrats, 133,424; the Prohibitionists, 132,009. McKinley's plurality was 603,854; his majority, 288,178; his majority in the electoral college, 95, he having polled 271 votes against Bryan's 176. So the security of the gold standard was established for at least four years and business began to revive at once. The new cabinet was composed as follows: Secretary of state, John Sherman (succeeded in April, 1898, by William R. Day and in September by John Hay), all of Ohio; secretary of the treasury, Lyman J. Gage, of Illinois; secretary of war, Russell A. Alger, of Michigan (succeeded in 1898 by Elihu Root, of New York); attorney-general, Joseph McKenna, of California; postmaster-general, James A. Gary, of Maryland (succeeded in April, 1898, by Charles E. Smith, of Pennsylvania); secretary of the navy, John D. Long, of Massachusetts; secretary of the

W. McKinley

interior, Cornelius N. Bliss, of New York; secretary of agriculture, James Wilson, of Iowa. The operation of the tariff bill of 1890 not having yielded sufficient revenue, an extra session of congress to correct the existing condition began on March 15, 1897, and a new tariff measure (the Dingley bill), with strongly protective features, was agreed upon. This was signed by the president, July 24th. Although it differed in many particulars from the McKinley bill of 1890 its general character was the same, its object being to give ample protection to American industries. On the same day an act was passed authorizing the president to suspend discriminating duties imposed on foreign vessels and commerce. The Republican platform had declared against the free coinage of silver except by international agreement with the leading commercial nations which it pledged the party to promote, and one of the first acts of Pres. McKinley was to appoint (April 14th) a commission headed by Sen Wolcott, of Colorado, to sound the principal governments of Europe with regard to this question. France alone gave assurances of co-operation. On May 5th the senate rejected the treaty of arbitration with Great Britain, signed at Washington, Jan. 11th, by Sec. Olney and Ambassador Paucetote. On June 6th the congress of Venezuela adopted the terms of a treaty of arbitration with Great Britain for the peaceful settlement of their ten-year dispute over the Guiana boundary, and on June 14th the treaty was ratified at Washington. On June 16th a treaty providing for the annexation of Hawaii was signed by the plenipotentiaries of that republic and was submitted to the senate by the president with a message recommending its ratification. This treaty was ratified unapprisingly by the Hawaiian senate, Sept. 17th; but action on it by the U. S. congress was deferred until July 7, 1898, when a joint resolution accepting the offered cession and incorporating the ceded territory into the Union was adopted by congress and approved, and on Aug. 12, 1898, the sovereignty of the islands was formally transferred. On Nov. 8, 1897, a treaty to protect the seals in Behring sea was signed at Washington by representatives of the United States, Russia and Japan. In his annual message, Dec. 5th, the president remarked: "We ought to enter upon a currency revision which will make our demand-obligations less onerous to the government and relieve our financial laws from ambiguity and doubt," and he recommended that as soon as the receipts of the government were sufficient to pay all its expenses, U. S. notes presented for redemption in gold should be kept and set apart and only paid in exchange in gold. Referring to this in his annual message a year later, he observed that in his judgment the condition of the treasury amply justified the enactment of legislation to that end. He also called attention to the need of revision of the existing tariff law. The most important event in Pres. McKinley's first administration was the war with Spain, a war which he had striven earnestly to avert, believing that the independence of Cuba could be brought about by diplomacy. A struggle for independence had been in progress in Cuba since February, 1895, resulting in serious injury to the trade with that island, and subjecting the U. S. government to great expense in its efforts to enforce the neutrality laws; while popular indignation had been greatly excited by the barbarous treatment of the reconcentrados (non-combatant Cubans pent in towns) by Weyler, captain-general of the Spanish forces. An offer of mediation, made by Pres. Cleveland in April, 1896, was rejected by Spain, and the insurrection continued with increased exasperation on the part of the United States. In his inaugural address Pres. McKinley had recommended that

the policy of non-intervention be continued, and when, on May 20, 1897, congress passed a joint resolution recognizing the Cubans as belligerents, he withheld his approval. But in January, 1898, Fitzhugh Lee, U. S. consul-general at Havana, Cuba, reported that American interests in that city were endangered, and, in consequence, the Atlantic squadron was ordered to the coast of Florida. Soon after a private letter written by Señor de Lome, Spanish minister to Washington, was published, which characterized Pres. McKinley as "a low politician," and there was an increase of indignation in the United States. De Lome resigned, the recall of Gen. Lee was demanded by Spain and was refused; congress discussed the question of intervention; and then came the tragedy of the blowing up of the battleship Maine, which had been sent to the harbor of Havana the month previous on "a visit of courtesy," with the loss of two officers and 264 men (Feb. 15th). On March 9th Pres. McKinley signed a bill appropriating \$50,000,000 for national defence, and on the 11th the war department began the mobilization of the army. The U. S. minister at Madrid, Stewart L. Woodford, was instructed to demand: first, an armistice until October 1st, looking to peace through the offices of Pres. McKinley; second, immediate revocation of the reconcentrado order; third, arbitration by Pres. McKinley if terms of peace were not satisfactorily settled by Oct. 1st. The second demand was complied with on March 31st, an offer to concede the first was made on April 5th, and a disposition to concede the third

was evident, but the president replied that he could not assume to influence the action of congress. On April 1st congress passed a naval appropriation bill and on the 5th the U. S. consuls in Cuba were recalled. In a special message on the subject, delivered on the 11th, Pres. McKinley advised against the recognition of the insurgent government, and asked congress to empower him to take measures to secure a final termination of hostilities and the establishment of a stable government in Cuba, stating that he had used every effort to relieve "the intolerable condition of affairs which is at our doors." Congress passed joint resolutions on the 19th declaring the people of Cuba to be free and independent, and a demand for the relinquishment of authority by Spain and the withdrawal of the Spanish forces to be the duty of our government; empowering the president to use the entire land and naval forces, and the militia if necessary, to carry the resolutions into effect, and disclaiming any intention on the part of the United States to exercise sovereignty or control over the island, except for the pacification thereof. It was signed by the president on April 20th, and its contents were cabled, with a formal demand that before noon on the 23d, Spain should relinquish authority and government in Cuba and withdraw her forces. Before Minister Woodford could present this ultimatum he received his passports, and as this meant that Spain preferred war rather than grant the demands of the United States, the war practically began on April 21st. A proclamation calling for 125,000 volunteers was signed by the president on April 23d. On April

25th a message recommending a declaration of war was sent by the president to congress, and was adopted by both houses unanimously. But Spain was in no condition to oppose so formidable a power as the United States. Her treasury was depleted, her credit gone, her navies ill-manned, her strategy inadequate. The war, consequently, was of short duration, though it was not ended until some bloody battles had been fought. The first capture—that of the Spanish ship Buena Ventura by the Nashville—was made on the 23d; the first bombardment—that of the town and batteries of Matanzas by the New York, Puritan and Cincinnati—occurred on the 27th. From that time until the cessation of hostilities, Aug. 12th, Pres. McKinley carried out the programme he had formulated as commander-in-chief of the army and navy with a sagacity which led the London "Times" to observe that he had manifested "the highest measure of statesmanship possible to a chief-magistrate acting within the lines of the American constitution." The appointment to important commands of Gen. Wheeler, Fitzhugh Lee and other ex-Confederate officers, increased the president's popularity and secured the unanimous support of the South; practically uniting the nation for the first time since the civil war. (Details of military movements, battles and sieges are to be found in the biographies in vol. IX., pp. 1-31). Briefly stated, the chief events after the formal dec-

laration of war were Dewey's victory at Manila, May 1st; the creation of the new military department of the Pacific, including the Philippines, May 16th; the president's second issue of a call for volunteers, 75,000 in number, May 25th; the sinking of the Merrimac by Lieut. Hobson in the entrance to Santiago harbor, June 3d; the signing by the president of the war revenue bill June 13th; the capture of the Spanish earthworks at El Caney and San Juan, July 1-2; the annihilation of Adm. Cervera's fleet, Santiago, July 3d; the surrender of Santiago, July 17th, and of Nipe, Guanica and Ponce, Porto Rico, July 21-28; the request of the Spanish government through the French ambassador, Cambon, for terms of peace, July 26; the formal acceptance by Spain of the president's terms, Aug. 9th; the signing of a peace protocol (Aug. 12th), stopping hostilities and providing for the appointment of commissioners to settle details with reference to Spanish Islands in the Pacific, for the withdrawal of the Spanish forces from the West Indies, and for the cession of Porto Rico; the surrender of Manila, Aug. 13th; the formal occupation of Porto Rico by U. S. forces, Oct. 18th; the demand of the United States, through its peace commissioners, for the Philippine islands, Oct. 21st; the signing of the treaty of peace at Paris (one of whose provisions was for the cession of the Philippine islands, for which an indemnity of \$20,000,000 was paid), Dec. 10th; the signing of the treaty by the president, Feb. 10, 1899, and by the queen-regent, March 17th; the

official exchange of ratifications, and the proclamation of peace by the president, April 11th. Later in his administration a treaty of amity, commerce and navigation with Spain was negotiated. The annexation of Hawaii and the changed relation of the United States to Cuba, Porto Rico and the Philippines led the president (in his annual message, Dec. 5, 1898) to advocate the prompt adoption of a maritime policy by the United States with the newly acquired islands; especially the establishment of regular and frequent steamship communication, encouraged by the United States under the American flag. A war revenue act, made necessary by the heavy expense of the war, was passed by congress, June 9, 1898, levying stamp duties and internal revenue taxes on certain articles. A loan, not to exceed \$400,000,000, was also authorized by congress, and three percent. bonds to the amount of \$200,000,000 were issued by the national treasury and immediately taken by the people. Soon after the close of the war with Spain a period of great prosperity began. So extensive was the demand for American cereals and manufactures that exports exceeded imports, and there was a steady flow of gold into the country. The stock of gold increased to over a quarter of a billion dollars, and all fears of a change in the standard of value were allayed. With this condition of affairs came a revival of business confidence, a buoyant stock market, and great commercial and industrial activity. The disposition of the new possessions was a subject of considerable argument. As the war had been undertaken for freedom and humanity, it was argued that the islands should be given over to the inhabitants for self-government; but this course was pronounced difficult and, indeed, impossible, by a majority in congress and large numbers of prominent civilians. Cuba and Porto Rico were put under military governors, temporarily, and Gen. Otis was ordered to extend military government to the whole of the ceded territory in the Philippine islands. Here, however, armed resistance was made to American authority. Aguinaldo had proclaimed himself dictator of the Philippines, and beginning on Feb. 4th, when the natives attacked the defences at Manila, there followed two years of desultory fighting. During the spring the southern islands were occupied by American forces; on April 4th the Philippine commission, consisting of Pres. Jacob G. Schurman, Prof. Dean C. Worcester, Hon. Charles Denby, Adm. George Dewey and Gen. Elwell S. Otis issued a proclamation that while enforcing the supremacy of the United States the purpose of the government was the welfare and advancement of the people. On July 7th the president called for ten regiments of volunteers to quell the insurrection, and in the following November, Gen. Otis reported that the whole of central Luzon was in the hands of the military authorities, and that Aguinaldo was a fugitive. The rebellion was prologued by opponents of the president's policy who encouraged the belief that with a change of administration the islands would be made independent. The re-election of McKinley, followed soon after by the capture of Aguinaldo, entirely disheartened the leaders, and practically ended opposition to American rule. Among bills not already mentioned, which became laws during the last session of the 55th congress (1898-99), were: an act for increasing the efficiency of the army of the United States; the provisional army act (March 2d), a compromise measure making the strength of the army to consist of 65,000 until July 1, 1901, and authorizing the recruiting of 35,000 volunteers during that period; also the re-enlistment of volunteers for six months; an act (March 2d) creating the office of admiral of the navy (Rear-Adm. George Dewey being immediately raised to that rank); the navy personnel act (March

3d) to reorganize and increase the efficiency of the navy and marine corps, and fixing the number of sailors at 17,500 and of marines at 6,000. On May 29, 1899, the president removed from the classified civil service list about 4,000 officers; an act which was condemned as inconsistent by civil service reformers. Under the reciprocity clause of the Dingley tariff act (July 24, 1897) the president signed a treaty with Portugal in June and one with Great Britain in July, for her colonies in the West Indies and Guiana; also with France, Nicaragua and Argentina. A similar treaty with Germany was signed in August. In May-July, a universal peace congress held sessions at the Hague, and the delegates from the United States had an important part in the proceedings. On Oct. 20th a *modus vivendi* was concluded with Great Britain, by which the United States retained possession of disputed passes in Alaska leading from tidewater to the Klondike region, and the boundary between Canada and Alaska was provisionally fixed. In November, as a result of an agreement between Great Britain and Germany, subject to approval by the United States, the former withdrew from all territorial interest in the Samoan group, and the islands became German property, Tutuila excepted, which passed into the possession of the United States. This treaty was signed by the respective plenipotentiaries at Washington, Dec. 2d, and was ratified by the senate, Jan. 16, 1900. In 1900 the United States was unexpectedly forced into concerted action with the great powers of Europe by disturbances in China. The difficulty with which foreign powers maintained their treaty rights in that empire was greatly increased by anti-foreign agitation in the northern provinces, accompanied by massacres and outrages of various kinds. By 1899 this movement had made great headway, being mainly conducted by a secret society known as "Boxers," encouraged by members of the Chinese government; and the protests of the diplomatic representatives in Peking against these excesses were of no avail. On Sept. 6th Sec. Hay addressed a letter to the powers occupying territory and maintaining spheres of influence in China, inviting declarations of their intentions and views as to the desirability of adopting measures to insure the benefits of equal treatment of foreign trade throughout China. This was, in effect, a formal statement of rights under treaty to the "open door"; the untrammelled development of trade and commerce in China. Thus taking the lead in suggesting the adoption of a common policy the United States came into prominence in the councils of the nations. On March 20, 1900, Pres. McKinley made formal announcement of the successful termination of these negotiations. As a proof of its friendliness and of its willingness to believe that China was anxious to check the Boxer movement and redress wrongs, the United States withdrew the marine guard which had been sent to Peking to protect the American legation. But soon it became evident that the imperial government was unable to make its word good. Anti-foreign influences gained the ascendancy under the leadership of Prince Tuan; the Boxers, aided by imperial forces, held the country between Peking and the coast; and, to attacks on foreigners and the destruction of their property, was added the slaughter of missionaries and Chinese converts. The remonstrances of the foreign diplomats being unheeded, a combined fleet representing the nations interested assembled in Chinese waters as a naval demonstration calculated to bring the Chinese government to terms. Several U. S. war ships were ordered to the coast of China, and a small force of marines under Capt. McCalla with troops of the other nations, started for Peking to protect the legation, whose situation had become

critical. The other powers, having taken similar steps to insure the safety of their legations, planned a large expedition to strengthen the legation guards and keep open railway communication with the coast, but the Chinese forts at Taku attempted to prevent the landing of troops and in turn were shelled and finally captured, June 17th. Rear-Adm. Kempf, of the U. S. navy, took no part in this attack, on the ground that the United States was not at war with China. On June 25th China requested an armistice, but our government replied that free communication with the legations must be allowed first; for by this time the relief expedition had been checked, communication with Peking was cut off, the Europeans in the capital, to the number of 400, had been besieged in the narrow compass of the British legation since June 20th, and massacres of missionaries continued to be reported in different parts of the empire. On July 3d, Sec. Hay addressed a note to the powers, declaring the aim of the United States to be, not war against the Chinese nation, but simply to rescue the United States legation, to obtain redress for wrongs suffered, to secure the safety of American life and property, and to prevent a spread or recurrence of the disorders, treating the situation in northern China as one of anarchy and stating that the policy of his government was to seek a solution which might bring about permanent safety and peace to China, preserve Chinese territorial and administrative entity, protect all rights guaranteed to friendly powers by treaty and international law, and safeguard for the world, the principle of equal and impartial trade with all parts of the Chinese empire. This policy was scrupulously adhered to. The Chinese government disowned responsibility for the outrages, and solicited Pres. McKinley's offices in bringing about peace. On July 14th a partial armistice was effected and through the Chinese minister at Washington, a test message

was sent to Mr. Conger, U. S. minister, whose reply, July 18th, giving assurance that the besieged were still alive, was the first information any government had received. A large relief expedition now started from the coast, including 5,000 American soldiers, and the allied forces entered Peking, Aug. 15th. Gen. Chaffee (who succeeded Col. Liscum, killed at Tien Tsin), condemned the acts of vandalism that followed the occupation of the city, and permitted no looting by the American troops. The United States refused to concur in Germany's proposal that all the guilty leaders be surrendered for punishment preliminary to peace negotiations; advising rather that their punishment be left to the Chinese government, which had expressed its willingness to suppress the Boxers, and had even designated certain high officials as especially guilty. It accepted the Russian proposition, looking to the restoration of the imperial power in Peking, as in full consonance with its own desires, and during the protracted discussion concerning the question of indemnity, the United States endeavored to modify the demands of the European powers, and to induce them to compromise on an aggregate sum of about \$200,000,000 to be apportioned among all the nations concerned, offering to cut down its own moderate claim one-half, if the powers would make proportionate reductions. Later in the year the Russian

William McKinley

suggestion, that, in case no definite agreement could be reached concerning the matter of indemnities, etc., these questions should be referred to the court of arbitration at the Hague. Thus the United States maintained throughout a high standard of fairness and honor, and gave the world an example of justice tempered with mercy and of Christian principles practically applied. In September, 1901, after nearly a year of negotiations, a protocol, or treaty, was signed by the Chinese plenipotentiaries and the representatives of the powers, including the United States, which provided for a change in the Chinese revenue system, and that henceforth foreign nations are to communicate with a new foreign office. In addition to the bills of the 56th congress already mentioned, on March 14, 1900, the president signed "an act to define and fix the standard of value to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt and for other purposes." This had passed the senate by a party vote of forty-four to twenty-six (one Democrat supporting the bill and one Republican voting against it), and the house by a vote of 166 to 120. It provided that the dollar, consisting of twenty-five and eight-tenths grains of gold, nine-tenths fine, should be the standard of value and that all forms of money issued or coined should be maintained at a parity of value with this gold standard. It also provided that U. S. notes and treasury notes should be redeemed in gold coin of the standard

fixed in this act, and that a reserve fund of \$150,000,000 of gold coin and bullion should be set apart and used for such redemption purposes only. On June 21, 1900, the Republican national convention in Philadelphia renominated McKinley, and nominated Theodore Roosevelt, of New York, for vice-president. In his letter of acceptance, Sept. 8th, McKinley invited the sound money forces to join in winning another, and, if possible, a permanent triumph for an honest financial system; urged the reduction of taxation very materially, the improve-

ment and enlargement of the merchant marine, the securing of legislation in their several states to restrain monopolies which militate against the public good by suppressing national and ordinary competition. He also defended the government's policy in the Philippine islands, declaring that no measures other than those taken were possible to be adopted. On July 5th the Democratic national convention at Kansas City renominated William J. Bryan, of Nebraska, for president, and nominated Adlai E. Stevenson, of Illinois, for vice-president. The national or gold Democrats adopted resolutions recommending that no presidential nomination be made by the party, and opposing the election of Bryan. The Democratic platform declared the paramount issue of the campaign to be "imperialism," growing out of the Spanish war and involving the very existence of the Republic, and reaffirmed the principles of the platform of 1896, with respect to the free and unlimited coinage of silver. Mr. Bryan, in his campaign speeches, gradually made free silver subsidiary to imperialism and militarism; while the Republicans insisted that imperialism was simply a fiction created by demagogues. The total popular vote was 13,969,770, of which McKinley received 7,206,677, Bryan, 6,374,396,

Woolley, 209,936. McKinley's plurality, which exceeded that in 1896, was 849,455; his majority, 446,748, and carried twenty-eight states, and received 292 electoral votes; Bryan, seventeen states, and received 155 votes. The result proved that the decisive influence, at least with the mass of doubtful voters, was the fear of business disturbance in case Bryan should be elected. On Nov. 12th the president ordered the discontinuance of military government in Porto Rico, and a reduction of the military force in that island. The last session of the 56th congress began Dec. 3, 1900. In his annual message, the most extended ever written by a president, he urged congress to provide whatever further legislation might be necessary to insure the continued parity under all conditions between the two forms of metallic money, silver and gold; he repeated the recommendation in his last annual message, of the necessity for early action to remedy such evils as might be found to exist in connection with combinations of capital organized into trusts, and he suggested that whatever legislation might be enacted in respect to the Philippine islands should be "in the interest of humanity, and with the aim of building up an enduring self-supporting and self-administering community in those far-off eastern seas." He also reported that the civil government of Porto Rico provided for by the act of congress approved April 12, 1900, was in successful operation, that the first legislature elected by the people was to meet on December 1st, then, passing to events in Cuba, he reported that in accordance with his instructions of July 25th, an election of delegates to a constitutional convention had been held, and that this convention had been in session since November 5th. In December the National Civil Service Reform League submitted a report declaring that under McKinley the standard of appointment at home had been lowered as to appointments within his gift, and that the requirements of the merit system had been persistently evaded. About this time much indignation was excited by the president's action with respect to Gen. Charles P. Egan, who was commissary-general during the war with Spain. He had been court-martialed in February, 1899, and dismissed from the service for aspersing the veracity of Gen. Miles before the war investigation commission. His sentence had been commuted to six years' suspension from duty on full pay, and now at Gen. Egan's request the president relieved him, with partial pay for life. On March 1st the army appropriation bill was passed, carrying with it several riders, one of which prescribed the relations which Cuba should bear to the United States, upon the acceptance of which the president was authorized to leave the island to administer its own affairs. Another amendment, the Spooner bill, provided that all military, civil and judicial powers necessary to govern the Philippine islands should be vested in the president and his appointees, until otherwise provided by congress. Its passage was regarded by the anti-imperialists as an act of unchecked despotism. The subject of a ship canal connecting the Atlantic and Pacific oceans, which had been much discussed in congress for several years, assumed new importance in 1900. In his annual message of 1898 Pres. McKinley urged definite action by congress during the coming session if a practicable waterway was to be accomplished. Two commissions had reported in favor of the Nicaragua route, and on June 2d the house, by a vote of 225 to 85, passed the Hepburn bill for the construction of a canal across Nicaragua by the United States only. Though formally reported in the senate, action on the bill was deferred until the following session, when that body voted for an canal across Nicaragua under the control, management and ownership of the United States. In December also, what is

W. McKinley

commonly known as the Hay-Pauncefote treaty came before the senate for final action. On Feb. 5, 1900, Pres. McKinley transmitted to the senate a convention signed on that day by Sec. Hay and Ambassador Pauncefote, the plenipotentiaries of the United States and Great Britain, "to facilitate the construction of a ship canal to connect the Atlantic and Pacific oceans and to remove any objections which might arise out of the convention of April 19, 1850, commonly called the Clayton-Bulwer treaty, to the construction of such canal under the auspices of the government of the United States." This was intended by the contracting parties as a substitute for the Clayton-Bulwer treaty. It was reported to the senate by the committee on foreign relations on March 9th, with amendment to the effect that none of the conditions and stipulations in the first five sections should "apply to measures which the United States might find it necessary to take for securing by its own forces the defence of the United States and the maintenance of public order." It having been evident before the close of the first session that the treaty could not be ratified by the senate during that session, postponement of action upon it was secured. On Dec. 20th the Hay-Pauncefote treaty, in amended form, was ratified by the senate by a vote of 55 to 18. The first (Foraker) amendment abrogated the Clayton-Bulwer convention; the second (Davis) amendment authorized the United States to defend its interest in the canal; the third struck out the article authorizing the high contracting parties to bring the convention to the notice of the other powers and invite them to adhere to it. March 4th was the limit of time for consideration of the treaty; and as no reply had been received from Great Britain by that date, and the senate had taken no further action, the treaty fell dead. The appropriations of the 56th congress amounted to \$1,440,062,545. On March 4, 1901, Pres. McKinley began his second term, being the first president since Gen. Grant to succeed himself. In his inaugural address he rebuked the "obstructionists who despair, and who would destroy confidence in the ability of our people to solve wisely and for civilization the mighty problems resting upon them. . . . Our institutions will not deteriorate by extension, and our sense of justice will not abate under tropic suns in distant seas." He presented to the country a comprehensive survey of the impending situation in regard to the newly acquired possessions, as well as to other national problems. Summarizing the casualties of the war, he said: "It will be observed that while our navy was engaged in two great battles and in numerous perilous undertakings in blockade and bombardment, and more than 50,000 of our troops were transported to different lands and were engaged in assault and siege and battle and many skirmishes in unfamiliar territory, we lost in both arms of the service 1,608 killed and wounded, and in the entire campaign by land and sea we did not lose a gun, or a flag or a transport or a ship, and, with the exception of the crew of the Merrimac, not a soldier or sailor was taken prisoner." He requested the members of his cabinet to retain their portfolios, and that body remained unchanged until April, when Philander C. Knox, of Pennsylvania, succeeded Atty.-Gen. Griggs. Important events occurred during the spring and summer of 1901. On March 23d, through the strategy of Gen. Funston, Aguinaldo was captured in the Philippines; and, following his oath of allegiance to the United States, was an address to his fellow countrymen, urging submission to the American government. In June the second Philippine commission, consisting of Judge William H. Taft, Prof. Dean C. Worcester, Luke E. Wright, Henry C. Ide and Prof. Bernard Moses, completed a new code of laws for the islands, arranged a judiciary system, and ap-

pointed a judge and law officers. These steps led up to the proclamation, July 4th, of the abolition of military rule, and Judge Taft assumed the duties of civil governor while retaining his place as head of the Philippine commission. In April the first U. S. coaling station to be established on foreign soil was completed by the navy department, in lower California. On May 13th the war department fixed the strength of the regular army on a peace basis at 77,287. A reapportionment act provided that, after March, 1903, the house of representatives should be composed of 386 members as a minimum, by which act the size of the electoral college was increased. During February, 1901, the Cuban constitutional convention finished the draft of a proposed constitution, in which nothing was said regarding the relations of that island to the United States. The Platt rider to the army appropriation bill, passed on March 1, 1900, provided that Cuba must lease or sell coaling stations to the United States, that Cuba was in no wise to contract army debts beyond her financial ability, nor to make any treaties with foreign powers that would subject her in any way to foreign control; that the United States reserved the right to intervene if Cuba failed to protect life and property, maintain its authority or fulfil the international obligations that the United States assumed in the treaty of Paris. These and some minor provisions were bitterly opposed by the Cubans, for the controlling political element in the convention desired complete independence, but on June 12th the

Platt amendment was accepted by a majority of 16 to 11, without alteration. In his annual message of 1899 Pres. McKinley said: "It is our plain duty to abolish all customs tariffs between the United States and Porto Rico, and give her products free access to our markets." Gradually he modified his views on that point, and the act "temporarily to provide revenues and a civil government" for that island, and signed by him April 12, 1900, authorized the collection of duties upon exports and imports between Porto Rico and the United States. The duties were to be equal to about one-seventh of the rates under the general Dingley act, but they and all taxes collected in Porto Rico, were to be used for the government and benefit of the island while it was creating a system of taxes that would supply ordinary needs and make it feasible to establish free trade. The Foraker act, as this measure was called, in so far as the tariff was concerned, placed the island upon a colonial, instead of the customary territorial basis, but its revenues began to increase at once, so that by July 25, 1901, the president was able to proclaim free trade with Porto Rico. Meanwhile, the legality of the act was submitted to the U. S. supreme court. On May 27th the court handed down opinions in several cases involving the relations of the United States to its insular possessions, deciding that congress has power under the Constitution, to prescribe the manner of collecting the revenues of the insular possessions, and has authority to levy duty on goods imported into these possessions from the United States, or vice versa, that the

cession of territory contained in the treaty of Paris, made Porto Rico and the Philippine islands domestic territory of the United States, and subject to full control of congress, which control could be exceeded without reference to that provision of the Constitution requiring "all duties, imports and exercises, to be uniform throughout the United States." The court was not unanimous in its decisions, however, and in one of the most important cases, that of *Downes vs. United States*, four of the judges dissented. Early in the summer the subject of the re-nomination of Pres. McKinley for a third term was

brought up, but he soon suppressed the discussion by issuing an address June 11th, in which he said: "There are now questions of the gravest importance before the administration and the country, and their just consideration should not be prejudiced in the public mind by even the suspicion of the thought of a third term." In view, therefore, of the reiteration of the suggestion, I will say now, once for all, expressing a long settled conviction, that I not only am not and will not be a candidate for a third term, but would not accept a nomination if it were tendered me. My only ambition is to serve through my second term to the acceptance of my countrymen, whose generous confidence I so deeply appreciate, and then with them to do my duty in the ranks of the private citizens." While chief executive, Pres. McKinley traveled more extensively than any of his predecessors. He wished to meet the people, and get their point of view. He took delight in seeing them, and it was his custom to test public opinion in regard to any new departure by thus expressing his views to his fellow-citizens before putting them into practice. During his political and other travels he made speeches in every state from Maine to North Dakota and from Minnesota to Florida. His most important trips made since his accession to the presidency were a visit to the Trans Mississippi exposition at Omaha in October, 1898, a tour of the southern states in December, 1898, and a western tour in the spring of 1901, accompanied by his wife and many members of the cabinet, which was planned to be the most extensive, embracing twenty-four states and territories. He was received everywhere with enthusiasm; but no sooner had the party arrived in California than Mrs. McKinley became very seriously ill, and in San Francisco her condition was such that her recovery was despaired of. All engagements were cancelled, and as soon as his wife's condition permitted, they returned to Canton, O., the president's home. In the early days of the growing prosperity which followed the election of McKinley, the citizens of Buffalo, N. Y., had projected an exclusively American exposition to promote commercial and social interests among the states and countries of the western hemisphere. In 1899 congress assisted the enterprise by appropriating \$500,000 and inviting

the Pan-American countries to participate, and the exposition took place in Buffalo from May 1 to Nov. 1, 1901. It having been arranged that the president should deliver an address to the visitors of the exposition, he took the opportunity to outline a new national programme in the line of reciprocity and free trade in a speech delivered Sept. 6th. It indicated that the nation's growth and prosperity had wrought a complete revolution in the policy of the former "apostle of protection," and so broad and generous was its scope that it disarmed even partisan opposition. After reviewing the advances made in intercommunication between states and nations and referring to the unprecedented prosperity at home, he said: "By sensible trade arrangements which will not interrupt our home production, we shall extend the outlets for our increasing surplus. A system which provides a mutual exchange of commodities is manifestly essential to the continued and healthful growth of our export trade. . . . The period of exclusiveness is past. The expansion of our trade and commerce is the pressing problem. Commercial wars are unprofitable. A policy of good will and friendly trade relations will prevent reprisals. Reciprocity treaties are in harmony with the spirit of the times; measures of retaliation are not. Gentlemen, let us ever remember that our interest is in concord, not conflict, and that our real endurance rests in the victories of peace, not those of war." The approbation of the nation which followed this gospel of commercial unity—this appeal for the universal brotherhood of man—had hardly died away when the whole world was stunned by an attack on the president's life the day following. While holding a public reception on the afternoon of Friday, Sept. 6th, in the Temple of Music, he was shot twice by one Leon Czolgosz, an anarchist, who was standing in line to shake the president's hand, and had concealed a revolver in his right hand under a handkerchief. One of the bullets was easily removed; the other, penetrating the stomach, was lodged in the muscles of the back. He was immediately removed to a hospital and after an unsuccessful effort on the part of the physicians in charge to remove the bullet, he was taken to the house of John G. Milburn, president of the exposition. His recovery was at first almost assured, but at the end of a week he grew rapidly worse and succumbed to the wound. His last words were "It is God's way; His will be done, not ours." Throughout the whole civilized world the news of the attack on the president was received with deepest concern and sorrow. His death brought forth unparalleled expressions of sympathy and good will from almost every foreign nation, and memorial services were held generally throughout Great Britain, France, Germany and other countries. The remains were removed to the capitol at Washington on Sept. 16th, and all along the way there was a pathetic demonstration of the sorrow of the people. Bells were tolled; hymns were sung by choral societies; flowers were strewn upon the railway track, and for 450 miles the train ran between two lines of citizens standing with bared heads. Impressive funeral services were held in the capitol, after which the body was removed to Canton, O., for burial, the interment taking place at West Lawn cemetery. The day of the funeral was observed generally throughout the United States as a day of mourning. The murderer, Czolgosz, was given a prompt trial and paid the death penalty for his crime. Pres. McKinley was a man of fine physique and strong constitution and was said

to resemble Daniel Webster in personal appearance, as well as in the simplicity, style and delivery of his addresses and their lofty and disinterested patriotism. He was quiet, dignified and considerate of others, the latter probably due to long years of tender and unremitting care for his invalid wife, from whom he was hardly ever absent, even for a day. He was true as steel to his friends, of whom he had more than any other man who had been in American public life. He was unwavering in his integrity, full of tact in overcoming opposition, with a heart full of sympathy for those who toil, and with a private life as spotless as self-sacrificing. "The World's Work" said of him: "The tragedy is the sadder because the president who was murdered was the most popular and highly respected ruler in the world, and by a malign coincidence he was cut off just when the rich results of our broadening national life were giving his administration a far more generous breadth than any recent administration had known. For Pres. McKinley stood for a distinctly new era. He was the head of the state at the happiest time in our history, when a completely reunited nation had forgotten its partisan wrangles in taking the industrial leadership of the world, and when our horizon and influence were widening as they had never widened before. He was peculiarly fitted for leadership at such a time, better fitted, we now see, than his opponents had ever confessed and even than his friends had foreseen. Mr. McKinley grew up into public life in the narrower era that followed the civil war, at a time when all our political activity was a bitter domestic wrangle. But, more sensitive to the broadening influences of later events perhaps than any other public man of his generation, he felt the nation grow, and he grew with it. Indeed, his capacity for growth after middle life has few parallels. . . . Pres. McKinley was more fortunate in the events of his administrations than any of his predecessors, except Washington, under whom the government came into being, and Jefferson, under whom it became continental, and Lincoln, under whom it was preserved. By virtue of the important chain of events, of which the Spanish war was the unexpected beginning, and by our swift rise to industrial supremacy, which occurred during his terms of office, he will stand as one of our historic presidents. He gave political direction to a great national movement, for the nation has grown more in thought and in character these five years than it grew in the preceding thirty. His character and his temperament fitted him admirably for the political guidance of a nation in expansion. How well he guided it we can hardly yet measure. But our increasing strength and more compact union at home and our growing influence abroad are parts of the eloquent testimony that may already be cited." In 1898 the degree of LL.D. was conferred upon Pres. McKinley by Yale University and by the University of Chicago. He was married, at Canton, O., Jan. 25, 1871, to Ida, daughter of James Saxton, a banker, and had two daughters, both of whom died in infancy. He died in Buffalo, N. Y., Sept. 14, 1901.

McKINLEY, Ida (Saxton), was born at Canton, O., June 8, 1847, daughter of James A. and Catherine (Demalt) Saxton. Her grandfather, John Saxton, a native of Huntington, Pa., removed to Canton when it was a village, in 1815, and there founded the "Stark County Repository," which he edited for fifty-six years. Ida Saxton was educated partly in Cleveland and partly at Brook Hall Seminary, Media, Pa. Her health being delicate, she left school at the age of seventeen, and as her father, a banker, believed that every woman should have a business education, she served as his cashier for a time. This experience was followed by a trip to Europe, after

which Miss Saxton entered society, though giving to it but little time, church and charitable work having stronger attractions for her. Engaging in her manners, with a gentility inherited from both parents, and attractive in person, she had not a few admirers with one of whom, Maj. McKinley, she had a friendship of long standing. They were married at Canton, Jan. 25, 1871, and began a domestic life whose happiness was clouded only by the loss of their two daughters, Kate and Ida. During her husband's administration as governor of Ohio Mrs. McKinley was debared by invalidism from appearing in public. When he entered congress she accompanied him to Washington, and during the administration of Pres. Hayes, whose wife was an intimate friend, was a frequent guest at the White House, sometimes presiding there when Mrs. Hayes was absent. During her long illness her husband was most devoted to her, and always planning for her comfort and pleasure. While a member of congress and as governor of Ohio he wrote the majority of his speeches and did his work as much as possible

Ida McKinley

at a desk which he had placed in her room in order that he might be near her, and when he was president he often took his work from the executive chamber in the White House to her private apartments in order to be near her. When the trip to the Pacific coast was planned she was advised to remain in Washington, but she did not wish to be separated from him for such a long period, and she was allowed to become one of the party. The excitement and exertion of the journey proved too much for her, and in California her condition was so serious that she was not expected to recover. She was a communicant in the Presbyterian church until her marriage, and then transferred her membership to the Methodist Episcopal church.

ROOSEVELT, Theodore, twenty-sixth president of the United States (1901-). For his ancestry, early life and Spanish war record see Vol. IX., p. 21.

When his name was first mentioned in connection with the re-election of Pres. McKinley, he refused to sanction it, but the popular demand for his nomination was so great that finally he was forced to yield, and he was nominated by acclamation at the Republican national convention in Philadelphia, Pa., June 21, 1900. He at once set out on a canvassing tour extending from New York to the far West. The Democrats believed that this speaking tour would help the cause of Bryan, but, as a matter of fact, it was one of the factors that brought about the re-election of McKinley. His speeches showed beyond a doubt that he stood for the policy that McKinley believed in and the thing that had won the confidence of the American people. He was the hearty, aggressive Americanist of the day, such a one as a sound basis of common sense and common sense.

Theodore Roosevelt

that conveyed the assurance that the country would be safe should any unforeseen event occur that would place him in the presidential chair. The assassination of Pres. McKinley while holding a public reception at the Pan-American exposition in Buffalo, N. Y., in 1901, was the unforeseen event. Vice-Pres. Roosevelt arrived in Buffalo September 14th, and at the residence of his friend, Ansley Wilcox, the oath of office was administered by U. S. District Judge John R. Hazel, of Buffalo. Theodore Roosevelt entered upon the presidency at an age (forty-three years) far below that of all his predecessors except two. Gen. Grant was forty-seven and Franklin Pierce was forty-nine at the time of taking the oath of office, and he was the first of the presidents to be born and brought up in a large city (New York). Throughout his entire career he had been an ardent advocate and unvarying upholder of civil service reform. As governor of New York state he applied his principles so thoroughly to its laws and service that that state had at the time he left the gubernatorial chair the most thoroughgoing civil service reform law in the United States. Upon his accession Pres. Roosevelt immediately announced that it would be his aim "to continue absolutely unbroken the policy of Pres. McKinley for the peace and prosperity and the honor of our beloved country," and he requested all the members of the existing cabinet to retain their portfolios. His first official act was to appoint Sept. 19th as a day of mourning and prayer throughout the United States. At the Bicentennial celebration of Yale University, New Haven, Conn., in 1901, the honorary degree of LL.D. was conferred upon him.

HOBART, Garret Augustus, vice-president of the United States (1897-99), was born at Long

Garret Augustus Hobart

Branch, Monmouth co., N. J., June 3, 1844, son of Addison Willard and Sophia (Vandever) Hobart. The Hobart family is an old one in New England, and has been one of the most representative of the colonial stocks of New Hampshire. His father, a native of New Hampshire, removed to New Jersey in early life, and, after teaching school for awhile, became a farmer. His mother belonged to the old Vandever family of Flatbush, Long Island, and the son was named after her brother, Garret A. Vandever. He was educated in the district schools of Keyport, N. J., where the family had settled soon after his birth, and having completed his preparation for college in a neighboring classical school, entered the sophomore class at Rutgers in 1860. After his graduation in 1863 he taught school for several months at Marlborough, N. J., and then began the study of law in the office of Socrates Tuttle, of Paterson, N. J. In 1866 he was admitted to the bar, and three years later was made a counsellor-at-law. In the latter year he was admitted to a partnership with his former preceptor under the firm style of Tuttle & Hobart. In 1871 he was elected city solicitor of Paterson, and in the following year became counsel to the board of chosen freeholders of Passaic county. Although personally popular, a master of his profession, and one of the largest practitioners in Paterson, he appeared in court very infrequently, and this fact is explained by his constant effort to secure a just and amicable settlement of disputes without recourse to public trial. This eminently judicial quality of mind, which distinguished the whole of his after career,

gave to Mr. Hobart an unusual political advantage. In 1872 he was elected to the state assembly from Paterson, and was continuously re-elected until 1875, when he declined renomination. He was chosen speaker of the house in his second term, and so continued until the end of his service. In 1877 he was a successful candidate for state senator from Passaic county, and was re-elected in 1879 and 1881, being president of the senate in his last term, after which he declined renomination. He was a member of important committees, including the judiciary, revision of the laws and elections. He was a Republican candidate for the U. S. senate in 1884, but failed of election on account of his party being in a minority in the legislature. During his legislative career he discovered the greatest parliamentary tact, and few of his decisions as presiding officer were ever successfully challenged. Although at that time his party was in a hopeless minority in both his state and city, he received the largest vote ever cast for the Republican legislature, and led his ticket at every election. During his legislative service he was five times offered a congressional nomination, but as often declined it. In 1879 he was elected to the Republican state committee, and served as its chairman for eleven years from 1880. During this period he attained prominence in New Jersey politics for his strenuous efforts to dislodge the Democratic party, which then controlled nearly every office in the state. This work, undertaken against the greatest discouragements, resulted in Republican victory in 1893. In 1884, 1893 and 1896 he was a delegate to the national Republican conventions, and on each occasion was unanimously elected a member of the national Republican committee, of which he was chairman during 1892-96. While engaged in these public services Mr. Hobart conducted a vast practice, not only in litigated causes, but in many fiduciary capacities. His first important assignment in the latter category was the receivership of the New Jersey Midland Railway Co., and his administration of its affairs resulted in the return of the property to the stockholders in a solvent condition. He then became receiver of the Montclair Railroad Co., the Jersey City and Albany steamboat line, and the First National Bank, Newark, N. J. In the case of the last named institution, which failed in 1880, he accomplished the payment of the bank depositors in less than six months. In the administration of all business trusts he used the most scrupulous care in attending to the minutest detail, and it has been said that such was the extraordinary tenacity of his memory that he was capable of perfectly remembering the most complicated situations as well as a multitude of simple related facts. His executive ability and judgment was of so high a quality that public confidence was invariably enlisted for any scheme with which he was associated. This fact was fully explained by his intimate friend, Atty.-Gen. Griggs (formerly governor) when he attributed to Mr. Hobart "the clearest intellect, the largest business capacity, and the keenest intuition of any man I ever knew." This same gentleman previously said: "It is a peculiarity of Mr. Hobart that he never makes a mistake. He seems intuitively to know what to do, no matter what the emergency may be, and had he hours and days to consider the subject he could not reach a better decision than he does at a jump, as it were." Among the various business enterprises, over forty in number, with which he was associated at various times were the Passaic Water Co.; the Paterson Railway Co.; the Morris County Railroad Co., of which he was president; the First National Bank of Paterson; the Paterson Savings Institution; the New York, Susquehanna and Western railroad; the Edison Electric Illuminating Co.; the Barbour Flax Spinning Co., and the American Cotton Seed

Oil Co., in all of which he was a director. In many of these he also held the place of legal adviser. From December, 1895, to March, 1897, Mr. Hobart was one of three arbitrators of the Joint Traffic Association. He received the degree of LL. D. from his alma mater in 1896. His notable activity in the business and public life of New Jersey had won for him a national reputation as the most popular man in his state, and even before his nomination for the vice-presidency in 1896 his name had been repeatedly coupled with that of Mr. McKinley to head the Republican national ticket. At the Republican national convention in 1896 Mr.

Hobart was presented by Judge John F. Fort, of New Jersey, and was nominated on the first ballot by a vote of 533 $\frac{1}{2}$ against 358 $\frac{1}{2}$ for all others. To his earnestness in behalf of his party at this time the ultimate breakdown of his unusually robust constitution is attributed. He gave himself without reserve to the cause, and by his valuable counsels contributed immensely to its success. As vice-president he defeated the senate resolution granting the Filipinos independence on the same terms as the Cubans. In addition to his regular official duties, he was a constant adviser of the president, and

particularly during the trying period of the Spanish war his wide experience and keen intuition were of the greatest service. It was also due to his tact and address that several difficult problems, which had embarrassed the administration, were effectually solved. On the day after his death Theodore Roosevelt, then governor of New York, said: "Mr. Hobart occupied the very trying position of one with great titular rank who nevertheless was not supposed to have any active share in formulating the policy of the government and helping carry it through. What he did was done not by force of position, but by force of character, his rare tact, his extraordinary common sense, and the impression of sincerity he created upon every man with whom he was brought in contact." Previous to his incumbency the British minister in Washington had always taken precedence over every one but the president, but Mr. Hobart asserted his own right to this distinction, and was supported by Pres. McKinley. After some diplomatic correspondence Sir Julian Pauncefote yielded. Early in 1899 Mr. Hobart's unceasing application to duty resulted in the complete undermining of his health, and after several months of severe illness he returned to his home in Paterson, having relinquished all public business. He was succeeded as presiding officer of the U. S. senate by Sen. William P. Frye, of Maine. According to the provisions of the law of 1886, the office of vice-president vacated by death shall remain vacant until the next presidential election. Mr. Hobart's death was the occasion of profound grief throughout the country, and sorrow and high appreciation were expressed by all public officials irrespective of political affiliations. He was married, July 21, 1869, to Jennie, daughter of Socrates Tuttle, of Paterson, N. J., by whom he had a daughter, Fannie, who died in 1895, and a son, Garret A. Hobart, Jr. He died at Paterson, N. J., Nov. 21, 1899.

SHERMAN, John, secretary of state (1897-98), and secretary of the treasury under Pres. Hayes. (See vol. III., p. 198).

DAY, William Rufus, secretary of state, was born at Ravenna, Portage co., O., April 17, 1849,

son of Luther and Emily (Spalding) Day. His father was a lawyer of wide repute, who had served two terms on the supreme bench of his state. On his mother's side, his grandfather was Rufus P. Spalding, a member of congress from Ohio, and his great-grandfather, Zephaniah Swift, was chief justice of the supreme court of Connecticut, and author of Swift's "Digest." Young Day began his education in the local public schools, and in 1864 entered the University of Michigan, at Ann Arbor, where he remained until 1872, studying chiefly law and literature. During a part of this time he acted a librarian of the law library of the university. He established himself at Canton, O., where he began practice with William A. Lynch. The time afterward included David B. Day and Austin Lynch and speedily acquired an extended reputation and large practice. Mr. Day being the chief dependence of the firm in the courts. He continued his practice until 1886, when he was elected to the bench of the court of common pleas, under the unusual circumstances of being the nominee of both parties. He remained in this position, however, but a short time, his private business making such demands upon him that he was forced to resign. In 1889 he was appointed by Pres. Harrison judge of the U. S. district court for the northern district of Ohio, but because of failing health declined the office. At Canton he formed a strong personal friendship with Mr. McKinley, and during the presidential campaign of 1896 gave up much of his time to politics, often sacrificing his own interests. In March, 1897, at Pres. McKinley's request, Mr. Day became assistant secretary to John Sherman, secretary of state, temporarily abandoning law practice, and on the resignation of Mr. Sherman, he became the latter's successor by appointment, April 25th, 1898. War had already been declared against Spain and the United States was menaced with interference by some of the European powers, while actual annoyance on the part of Germany and the most obnoxious conduct on that of the press and people of France had been manifested. To a great extent he was dependent upon the permanent staff of the department for guidance in matters of form in conducting the negotiations before and during the war, but he displayed personal skill in diplomacy, and through his efforts was brought about that *modus vivendi* with European governments which confined the conflict to the powers directly concerned. On July 26, 1898, Spain sued for peace, and on Aug. 12th the peace protocol was signed by Sec. Day on the part of the United States, and the French ambassador, Cambon, on the part of Spain. The protocol required on the part of both Spain and the United States the appointment of not more than five commissioners, to meet in Paris not later than Oct. 1st, then and there to negotiate a treaty of peace, which, when ratified according to the constitutional forms of the two countries, should be considered binding upon them both in accordance with its terms. The name of the members of the peace commission on the part of the United States were announced Sept. 26th as follows: William R. Day, secretary of state, ex officio; William P. Frye, senator, ex officio; John K. Davis, William P. Frye, and Gustav Franklin U. S. senators; and William V. Rehnold, a U. S. commissioner sailed from New York, Sept. 27th, for the sloop *Albatross* in Paris, Oct. 1st, to meet the commission of Mr. Day in regard to the peace negotiations. The conference opened Oct. 1st, and were concluded on Dec. 11th, 1898.

W. R. Day

son of Luther and Emily (Spalding) Day. His father was a lawyer of wide repute, who had served two terms on the supreme bench of his state. On his mother's side, his grandfather was Rufus P. Spalding, a member of congress from Ohio, and his great-grandfather, Zephaniah Swift, was chief justice of the supreme court of Connecticut, and author of Swift's "Digest." Young Day began his education in the local public schools, and in 1864 entered the University of Michigan, at Ann Arbor, where he remained until 1872, studying chiefly law and literature. During a part of this time he acted a librarian of the law library of the university. He established himself at Canton, O., where he began practice with William A. Lynch. The time afterward included David B. Day and Austin Lynch and speedily acquired an extended reputation and large practice. Mr. Day being the chief dependence of the firm in the courts. He continued his practice until 1886, when he was elected to the bench of the court of common pleas, under the unusual circumstances of being the nominee of both parties. He remained in this position, however, but a short time, his private business making such demands upon him that he was forced to resign. In 1889 he was appointed by Pres. Harrison judge of the U. S. district court for the northern district of Ohio, but because of failing health declined the office. At Canton he formed a strong personal friendship with Mr. McKinley, and during the presidential campaign of 1896 gave up much of his time to politics, often sacrificing his own interests. In March, 1897, at Pres. McKinley's request, Mr. Day became assistant secretary to John Sherman, secretary of state, temporarily abandoning law practice, and on the resignation of Mr. Sherman, he became the latter's successor by appointment, April 25th, 1898. War had already been declared against Spain and the United States was menaced with interference by some of the European powers, while actual annoyance on the part of Germany and the most obnoxious conduct on that of the press and people of France had been manifested. To a great extent he was dependent upon the permanent staff of the department for guidance in matters of form in conducting the negotiations before and during the war, but he displayed personal skill in diplomacy, and through his efforts was brought about that *modus vivendi* with European governments which confined the conflict to the powers directly concerned. On July 26, 1898, Spain sued for peace, and on Aug. 12th the peace protocol was signed by Sec. Day on the part of the United States, and the French ambassador, Cambon, on the part of Spain. The protocol required on the part of both Spain and the United States the appointment of not more than five commissioners, to meet in Paris not later than Oct. 1st, then and there to negotiate a treaty of peace, which, when ratified according to the constitutional forms of the two countries, should be considered binding upon them both in accordance with its terms. Frye, senator, ex officio; John K. Davis, William P. Frye, and Gustav Franklin U. S. senators; and William V. Rehnold, a U. S. commissioner sailed from New York, Sept. 27th, for the sloop *Albatross* in Paris, Oct. 1st, to meet the commission of Mr. Day in regard to the peace negotiations. The conference opened Oct. 1st, and were concluded on Dec. 11th, 1898.

of peace was signed. The members of the American commission returned immediately to the United States, and Mr. Day presented the signed treaty to the president, by whom it was laid before congress early in January, 1899. Mr. Day had been succeeded in his office of secretary of state by Col. John Hay, previously ambassador to England, and now declared his intention to retire from public life and return to the practice of law in Canton. He was appointed in February, 1899, U. S. circuit judge of the 6th judicial circuit, which position he now holds. Mr. Day's manners are reserved, though extremely courteous; he is a fluent speaker, whether in court or on the stump, and is at all times an effective orator. He was married, in 1875, to Mary E., daughter of Louis Schaefer, a prominent citizen of Canton; they have four children, William L., Luther, Stephen and Rufus.

HAY, John, secretary of state, was born at Salem, Washington co., Ind., Oct. 8, 1838, son of Charles and Helen (Leonard) Hay. The first of his ancestors to come to this country, John Hay, who was descended from a Scotch family which had emigrated to Germany, settled in Virginia in 1750. Adam, son of John, a soldier in the revolutionary army and a personal friend of Washington, migrated to Kentucky, whence John, grandson of the emigrant, re-

moved to Illinois, preferring to live in a free state. John, third to bear the name, grew up with a love for books and learning, his tastes being fostered by his father, a prosperous physician, and by his mother, who was the daughter of Rev. David A. Leonard, of Rhode Island. Young Hay was graduated at Brown University in 1858, after taking high rank as a scholar, especially in English composition, and immediately began the study of law at Springfield, Ill., in the office of his uncle, an intimate friend and associate of Abraham Lincoln. There, besides qualifying himself for the bar, he learned his first lessons in practical politics, and made

the acquaintance of the leaders of the Republican party. He took part also in the campaign of 1860 as a writer and speaker, and in 1861, after gaining admission to the supreme court of Illinois, he accompanied Mr. Lincoln to Washington as assistant secretary. He also acted later as his adjutant and aide-camp, and served in the field for a time under Gens. Hunter and Gillmore, with the rank of major and assistant adjutant general, chiefly to gain information for the president. He was brevetted lieutenant-colonel and colonel. The relations Hay sustained to Mr. Lincoln were almost filial. Soon after Pres. Lincoln's death he was appointed secretary of legation at Paris, and remained there for two years, several times being in charge; in 1867-68 was secretary of legation and charge d'affaires at Vienna; in 1869 was appointed secretary of legation to Spain. Returning to the United States in 1870, Col. Hay held an editorial position on the New York "Tribune" for five years, and was regarded by Horace Greeley as the most brilliant writer that had ever entered the office. Journalism had few attractions for him, however, and in 1875 he removed to Cleveland, O., and ten years later to Washington. During the administration of Pres. Hayes he was first assistant secretary of state under Mr. Everts, serving from Nov. 1, 1879, until May 3, 1881. In the latter year he acted as president of the international sanitary congress, held in Washington, and for

about seven months was editor-in-chief of the New York "Tribune" during the absence in Europe of Whitelaw Reid. From 1876 to 1900 inclusive Col. Hay took an active part in presidential canvasses, and though in later years he appeared less often as a platform speaker, his influence in national politics was considerable. When Pres. McKinley began his first term, in 1897, he was constrained to offer the office of secretary of state to John Sherman, and Hay, who was his personal choice, was appointed instead ambassador to Great Britain. By his familiarity with the chief modern languages of Europe, his intimate knowledge of foreign affairs and men, and his broad ideas on subjects of international interest, he more than any other public man was fitted for the position. His services during the eighteen months at the court of St. James were of the greatest importance in promoting a spirit of amity between the two countries, and the attitude of friendly neutrality which Great Britain assumed upon the outbreak of the Spanish war may be ascribed largely to his diplomacy. His public addresses, which were models of tact and good taste, contributed in no small degree to the popularity he acquired in England. When William R. Day resigned his position in McKinley's cabinet as secretary of state Col. Hay was recalled to succeed him, and entered upon the duties of his new office Sept. 30, 1898. The rumor that he was about to retire from the ambassadorship caused deep regret in England, the "Westminster Gazette" observing: "While an American before all, none could have worked more effectually to foster the growing Anglo-American sentiment. The recall of Mr. Hay, while a gain to his country, would be no slight loss to ours." In 1898-99 he secured a *modus vivendi* with Great Britain which provided a temporary boundary line through disputed territory on the Alaskan coast without surrendering to Canada any of the tide-water privileges for which she was really contending. The way for new negotiations to determine the permanent boundary line was thus opened. The history of what is popularly known as the Hay-Pauncefote treaty relative to an interoceanic canal, which was formulated by Sec. Hay and submitted to the senate Feb. 5, 1900, is given in the biography of Pres. McKinley on pages 6-7 of this volume. When, in December, 1900, the senate amended the treaty so as to virtually force England to reject it, Sec. Hay, unlike most men, did not resign in pique, for that would have been as foreign to his code as it would have been for him to retire because he was crushed by a great sorrow. In September, 1899, he secured from the great powers a formal declaration in favor of the "open door" policy in China, practically a formal recognition of the right of the United States to the "open door" under its commercial treaties with that empire. This feat of diplomacy was remarkable for the wisdom and originality of its conception, for the skill and rapidity with which it was executed, and it gave proof that the United States had become a world power. During Great Britain's war with the Boers in South Africa the United States stood neutral, and Sec. Hay succeeded in preventing any concerted attack upon Great Britain, thus preserving peace in Europe. Through his efforts a satisfactory settlement of the Samoan question was effected in 1899, and Great Britain withdrew from all territorial interest, leaving the islands divided between Germany and the United States, the latter gaining the most valuable harbor in the South seas, while retaining all its commercial rights in the whole group. He was concerned in the various treaties of reciprocity negotiated in 1899, and through the American delegates to the universal peace congress in the same year exerted an influence in that body, placing on record in its proceedings a strong assertion of the Monroe

John Hay

doctrine. The state of affairs in China became such that in 1900 the United States was forced into temporary alliance with foreign powers to preserve its treaty rights and the lives of its citizens throughout the empire, a detailed account of which and of the chief events is given in the sketch of Pres. McKinley. The forces sent to China on receipt of the news that the legations in Peking were in peril were instructed to meet any emergency that might occur, but to refrain from combinations with foreigners in any matters in which this country had no concern. In accordance with this pacific policy, which was scrupulously adhered to, Sec. Hay on July 31 addressed a note to the powers declaring that the aims of the United States involved no war against the Chinese nation, but instead the securing of permanent peace and safety to the empire, the preservation of its integrity, the protection of all rights guaranteed to friendly powers, and the safeguarding for the world of the principle of equal and impartial trade with all parts of the empire. In less than twelve days the Chinese government disavowed responsibility for the outrages that had been committed, and through Sec. Hay solicited Pres. McKinley's offices in bringing about peace. Assuming that the imperial government was sincere in its protestations, and that it was unable to put down the Boxer rebellion, our government called upon it to give assurance that the foreign ministers, besieged in Peking, were still alive, and to put them in communication with their respective governments. The first intelligence that the foreigners in Peking were alive was obtained, and the first demand that the members of the legations be released was made by Sec. Hay. When the European powers were crying for blood, clamoring for the heads of men who were suspected, but not convicted, of complicity in the Boxer outrages, Sec. Hay gave the world a lesson in moderation as well as humanity. The open manner in which the United States conducted negotiations from the beginning; its insistence that the Boxer movement was a local uprising, and not a general outbreak justifying a general war; its willingness to accede to any reasonable proposal made by China, and its attitude as a pacificator, and not an aggressor, made its influence with that country predominant, and the results are destined to be far reaching, not the least of them being the greater share in the commercial exploitation of China. The course of Sec. Hay—for the policy of our government was planned and executed by him—satisfied even the anti-administration journals, and in an article entitled, "American Leadership in China" (May 9, 1901), the New York "Evening Post" remarked: "In those haggard days last July and August it was the American secretary of state who maintained his faith, in the face of the jeering chancelleries of Europe, that the legations in Peking were holding out. It has since become easy for the powers to trust the educated Chinese ambassadors, to lean upon the great Chinese viceroys. Mr. Hay did it then. A very simple thing, but it occurred to no one else to do it. Genius might be defined as a knack of doing the easy and natural things which other people immediately curse themselves for not having thought of doing. Genius for statecraft, at any rate, lay that way in the Chinese difficulty, and it will be to the lasting honor of American diplomacy that it was an American diplomat who displayed it." At an earlier date the same journal said: "That the American claim for indemnity in China should be an example of moderation was to be expected, and the proposal to the other powers to reduce their joint claim to a sum within the power of China to pay, is but in keeping with our government's clear cut and honorable attitude throughout these negotiations. It has, perhaps, saved the whole situation that this country

and Japan have refused to reckon indemnities *à la Russe*, and have, through their own moderation, gained the right to appeal for a like wisdom on the part of the more grasping powers. Nothing could show better than the present instance that it is a genuine moral ascendancy that our government has gained in Chinese councils. Our small military contingent played its part well, but it was the steadfastness of our administration in opposing one or two simple principles of international morality to the suspicious and covert desires of the other powers that really gained us the primacy. And, curiously enough for such as deny that ordinary morals have ought to do with policy, this simple and honorable attitude is likely enough to pass in history for high diplomacy." In 1901 Mr. Hay succeeded in bringing to a satisfactory close the long standing controversy with Turkey over questions arising from the Armenian disturbances. The Porte in July granted an irade for the rebuilding of the wrecked missions and for the extension of Robert College at Constantinople, and paid the indemnity of \$95,000 for damages done to American missionaries and citizens. A man of profound convictions, Sec. Hay has carried his religion into his daily life—not that one ever hears him talking it or setting up a moral code which he would force upon his neighbor, but it governs all that he does and it rules his life. The foundation of all religion, it has been said, is charity and justice, and those two cardinal virtues find their full measure in Sec. Hay. His innate love of justice and his scrupulous regard for the rights of others follow as a natural corollary to his boundless charity, for the charitable man must necessarily be the just man. It is this characteristic which has enabled Sec. Hay to win so many diplomatic triumphs, and which has made his administration of the state department ever memorable in American history. At the time Sec. Hay became editor in chief of the New York "Tribune" (1881), he was, perhaps, better known as an author than as a journalist, having published "Castilian Days," studies of Spanish life and character (1871); "Pike County Ballads and Other Pieces" (1871), and a "Translation of Emilio Castelar's Treatise on the Republican Movement in Europe" (1875). The "Ballads," some of which were written in his college days, acquired great popularity, especially "Jim Bludso" and "Little Breeches," but they were over-praised at the time, and are held in slight esteem by their originator. For several years, beginning in 1881, his time was given chiefly to the preparation of a "Life of Abraham Lincoln," in collaboration with John G. Nicolay. After publication as a serial in the "Century Magazine" in 1887-89, it appeared in book form in ten volumes, and immediately took place with the masterpieces of biography, being regarded as the most comprehensive work on its subject. He published a volume of poems in 1890, and he has been credited with the authorship of a novel, the "Bread Winners." He received the degree of LL.D. from his alma mater in 1897, from Western Reserve University in 1891, and from Princeton in 1901. In 1874 he was married to Clara L., daughter of Amasa and Julia A. (Gleason) Stone, by whom he had two sons and two daughters. The elder son, Adelleb Stone (1874-1901), was graduated at Yale in 1895, was his father's secretary in London, and resided in the embassy in the same capacity after Mr. Hay returned to Washington. After a trip around the world as captain's clerk on an army transport, he took part in the Philippine campaign, exhibiting great courage in various battles. From December, 1899, until the spring of 1901 he was U. S. consul at Pretoria, South Africa, and, although the year 1901 of all the consuls was virtually the death of the consular corps. He gained the first class in the

esteem of the Boers and of the British, and displayed such marked diplomatic talents that no doubt he would have distinguished himself had his life been spared. Shortly before his death Pres. McKinley appointed him his private secretary. Mr. Hay, while attending a reunion of his class at Yale, was killed by an accidental fall, June 23, 1901. The elder of Sec. Hay's daughters, Helen, has published "Verses" (1898); "The Little Boy Book" (1899), and the "Rose of Dawn," a poem of the South Seas (1901).

GAGE, Lyman Judson, secretary of the treasury, was born at De Ruyter, Madison co., N. Y., June 28, 1836, son of Eli A., and Mary Cornelia (Judson) Gage. He is descended from Thomas Gage, who emigrated from England to Yarmouth, Cape Cod, about 1640. His son Benjamin had a son Thomas, who settled in Dutchess county, N. Y. About 1800 Ebenezer, son of the last named Thomas, became a resident of Madison county, N. Y. He had a family of several sons, one of whom, Justus, was the grandfather of Lyman Judson. All those named were farmers, except Eli A., who for a time lived at Rome, Oneida Co., N. Y., where he engaged in commercial business. The son received a common school education in his native county of Madison, and upon removal to Oneida county he had for a short time the advantages of Rome Academy.

Upon the removal of his father to Chicago in 1855, he entered, in a subordinate position, a banking institution in that city. He rose rapidly through the various grades until in 1868 he became cashier of the First National Bank and in 1882 its president, as in fact he had been its manager for many years. Under his guidance it not only survived several trying periods in the history of the rapidly growing city, but it came to be a leading and at times the most powerful bank in the United States. Its stock, in 1868, was worth not more than par, and notwithstanding dividends of ten per

cent, paid annually since that time, the value of principal invested therein has increased sixfold. It was one of the institutions to survive the crisis of the great fire of 1871, and the panic, no less destructive of value, of 1873. In those days of wrecks it stood as an example to other banks and by its moral influence sustained several which would have otherwise gone to the wall. Distinguished as have been Mr. Gage's achievements in building up a powerful banking house, they are, while better known, perhaps, not to be compared with successes involved in the municipal growth of Chicago. The increase in population from 60,000 to nearly 2,000,000 gave full employment to his energies, both in relation to the social and economic problems incidental to such a development and to the enormous expansion of business affairs of the bank to which he was related. Although actively participating in the solution of those municipal problems which always confront members of a free society he eschewed politics as the word is understood, and constantly declined invitations to public office. There is scarcely any stage of development in the city's growth where his influence has not been felt. In civic matters as well as in business affairs he took a prominent and useful part. He was the first president of the Civic Federation of Chicago, a

large organization composed of citizens representing all classes and creeds. This association has now had an honorable and useful history, having taken for years past an influential part in securing needed municipal reform. With the incipency of the World's fair project in 1893, he was appointed by the mayor of Chicago chairman of the finance committee, and through his aids and subordinates succeeded in raising by voluntary subscription towards that enterprise between five and six millions of dollars. Upon the organization of the board of forty-five directors he was unanimously chosen president, and by his energy, patience, skill and tact carried the undertaking through the most trying period of its history. He organized the Chicago Clearing House Association, was its president for a number of years, and always a member of the executive committee. He has three times been president of the American Bankers' Association and president of the Commercial Club of Chicago, a strong organization limited in number to sixty and composed only of representative business men. He was one of the first to discover that in the cosmopolitan and heterogeneous population of Chicago the elements of dissatisfaction and disorganization found good breeding ground. This was made apparent by such events as the Haymarket riot and other anarchistic disturbances. He therefore organized what became known as the Economic Conferences, bringing together all classes of citizens, rich and poor, ignorant and cultivated, that they might in friendly discussion learn one another's wrongs and together consider the remedy. He wrote the platform of the organization; one upon which citizens of all kinds could stand, and for three years during the winter himself led discussions in conjunction with representatives of socialism and other forms of revolutionary tendencies. The certain result was a better feeling among the classes, a better understanding among the masses, and benefit to the city's social and moral status. He has contributed much by his pen to the public causes in which he has been interested. When in the early seventies the growth of the greenback movement became pronounced he was active in organizing the Honest Money League which began a campaign of education against the rapidly spreading movement for a permanent paper currency. His writings at that time were widely circulated and doubtless contributed much towards arresting the spread of the movement. He is a clear writer and his style possesses much literary merit. He has the happy faculty of stating the truth attractively and convincingly. His public addresses and state papers are likely long to be referred to as authority on the subjects of which they treat. The national treasury is so closely identified with the business life of the country that it needs must have at its head a careful and experienced financier. When, at the close of the memorable campaign of 1896, during which questions relating to the currency of the country overwhelmed all other issues, resulting in the election of Pres. McKinley, Mr. Gage was called upon to preside over the treasury department, there was universal agreement that the selection was one which could not have been more fittingly made. His conduct of national finances during the war with Spain added greatly to his reputation. A loan of \$200,000,000 having been decided upon to meet the expenses of the conflict, the people were appealed to, congress on June 13, 1898, authorizing an issue of bonds to that amount at three per cent. interest. Much doubt was expressed whether bonds having so low a rate could be sold except at a discount, but the response was immediate and the entire loan was absorbed by individual offers for amounts less than \$4,500, the number of persons applying being 320,000. In his first

annual report (the first treasury report for thirty years which had to do with expenditures in war). Sec. Gage said: "The experiment may be considered a justifiable one and it worked out in a way to strengthen the national credit. The fact that it was covered by subscriptions many times over, exhibited to all countries the spirit of the people as nothing else could, and instantly impressed other powers with a sense of the resources at command of the United States should a larger struggle arise." In the same report he urged the reformation of the national banking system in order that it might be made effective to commercial and industrial needs, and to this end called for the elimination in a safe and proper way, of the injurious interference in our currency system by the legal tender paper money of the government. Mr. Gage has been twice married, and has one son, now engaged in business in Chicago.

ALGER, Russell A., secretary of war and governor of Michigan. (See Vol. V., p. 276.)

ROOT, Elihu, secretary of war, was born at Clinton, Oneida co., N. Y., Feb. 15, 1845, son of Oren and Nancy Whitney (Buttrick) Root, who were of English descent. His father was for many years professor of mathematics in Hamilton College. Elihu Root was graduated at Hamilton College in 1864. During the ensuing year he was an instructor in the academy at Rome, N. Y., and then studied law under John N. Pomeroy, at Rochester, completing the course at the law school of the University of New York. Immediately after graduation, in 1867, he entered the law office of Man & Parsons, New York city. In 1868 he formed his first partnership; with John N. Strahan, and this continued until 1876, when a new partnership was formed, with Willard Bartlett, now one of the judges of the supreme court of New York. A third partnership was formed in 1886 with Samuel B. Clarke. He became counsel for and director in several banks, attorney for several steam railroads, and the chief adviser of the syndicate controlling the Broadway railroad; also counsel for many private corporations. He was counsel for William M. Tweed and James H. Ingersoll in the matters arising out of the frauds perpetrated upon the county of New York by the Tweed ring; was one of the counsel for the sugar trust in its various litigations; was counsel for Judge Hilton in the Stewart will case, and in the suit of Branough *vs.* Smith growing out of the claims of the alleged Irish heirs against the Stewart estate. He represented Hamilton College in the Fayerweather will case; acted for the executors in the Hoyt and Hector C. Havemeyer will cases, and was one of the counsel for the contestants in the Hammersley will case. The defence of Police Commissioners French and Wheeler in the proceedings to remove them from office was conducted by him, as was that of Inspector Williams, of Fire Chief McCabe in the proceedings by the fire commissioners to remove him from office, and of Commissioner Post in the attempt of Mayor Grant to remove the dock commissioners. Mr. Root was counsel for Robert Ray Hamilton and for his executors after his death; represented Shipman, Laroque and Choate in their action against the Bank of the State of New York arising out of Bedell's forgeries, and was counsel in numerous electric light cases and in the Yale lock infringement suit. Mr. Root was connected with the reform movement in 1871, and was the Republican candidate for judge of the court of common pleas in 1879, but though running ahead of his ticket he was defeated. As chairman of the Republican county committee during 1880 and 1887 he accomplished an amount of work that was remarkable in one having so much to do as a professional man; for many years, also, he

was executive member of the 21st assembly district. Eloquence and a ready wit made him popular as a campaign speaker, and in the early years of his life in New York city he was often called upon to serve in that capacity. Of recent years he has appeared infrequently upon the platform, but his speech at Canton, O., during the presidential campaign of 1900, was considered to be the equal of any he had delivered. In March, 1883, Pres. Arthur appointed Mr. Root U. S. attorney for the southern district of New York, and he held that office until July, 1885. He was delegate-at-large to the state constitutional convention of 1894 and chairman of the judiciary committee. Gov. Roosevelt had the highest opinion of his ability, and any one of several offices at the governor's disposal was within reach if Mr. Root had been seeking for honors. In the opinion of Pres. McKinley, Mr. Root would have conferred honor on his native country by becoming ambassador to England, but the resignation, in July, 1898, of Russell A. Alger, secretary of war, afforded another opportunity of utilizing his services, and on Aug. 1st Mr. Root entered the cabinet. He quickly checked the demoralization that was spreading in the army, due to a quarrel between Adj.-Gen. Corbin and Maj.-Gen. Miles, and during a protracted illness of Sec. Hay performed the chief burdens of the department of state in addition to his own. A plan for the reorganization of the army, formulated by him, has among its features the establishment of a war college and a modification of the seniority rule, giving selection a part in promotion. Mr. Root is a member of the Union League, Century, Players' and Metropolitan clubs of New York city.

LONG, John D., secretary of the navy and governor of Massachusetts. (See Vol. II., p. 121.)

BLISS, Cornelius Newton, secretary of the interior, was born at Fall River, Mass., Jan. 26, 1833, son of Asahel Newton and Irene Jordan (Luther) Bliss. The family is of English origin, the earliest American ancestor being Thomas Bliss, a native of Belstone, Devonshire, who emigrated to New England in 1635. From him the line of descent runs through Jonathan and Miriam Harmon; Jonathan and Miriam Carpenter; Lieut. Ephraim and Rachel Carpenter; Capt. Jonathan and Lydia Wheeler, and Asahel and Deborah (Martin) Bliss, the grandparents of Sec. Bliss. His mother also was of English descent, and her ancestors, the Lutheis, were early settlers in New England, being identified with the founding of Taunton, Mass., in 1647. Asahel Newton Bliss, a farmer and merchant of Rehoboth, Mass., died when Cornelius was an infant, and his widow was married later to Edward S. Keep; they in 1840 removed to New Orleans, leaving the boy with relatives in Fall River. There he remained until he was fourteen years of age, when he rejoined his mother, completed his education at the New Orleans high school and then for a year was employed in his stepfather's counting room. At the end of that period he went to Boston, and in 1848 entered the service of James M. Beebe & Co., at that time the largest importing dry goods and jobbing house in the United States. Here he displayed a natural instinct for business, remarkable to observe, while energy in pushing the interests of his employers caused his advance until he became a partner. The firm dissolved partnership in 1850,

and Mr. Bliss connected himself with John S. and Eben Wright & Co., of Boston, but soon after visited New York city to establish a branch of the Boston house. This he organized under the firm name of Wright, Bliss & Fabyan, of Boston, New York and Philadelphia, selling agents for many of the best known New England manufacturers. The firm merged into Bliss, Fabyan & Co., became one of the most thoroughly accredited houses of the United States, and is known the world over. Besides transacting an enormous general business they represent the Peppercell Manufacturing Co., the Otis Co., the Androscoggin Co., the Bates Mill, American Printing Co., and many others. Thus,

Cornelius A. Bliss

Mr. Bliss necessarily attained great prominence and naturally his services are frequently sought by powerful corporate and vested interests. He is a director and president of the Fourth National Bank (once having served as its acting president); the Central Trust Co.; American Surety Co.; Equitable Life Assurance Co.; Home Insurance Co., and other institutions, the Union League Club, and a governor and treasurer of the New York Hospital. Mr. Bliss served as a delegate to city, county and state conventions, and in 1884 was chairman of a committee appointed to attend the Republican national convention at Chicago for the purpose of urging the nomination of Chester A. Arthur to the presidency. During Arthur's term he declined a cabinet position. In 1885 Mr. Bliss declined to have his name mentioned in the New York state convention at Saratoga as a candidate for the governorship; nevertheless he received a large complimentary vote on that occasion. He was chairman of the New York state Republican committee in 1887 and again in 1888, and was treasurer of the Republican national committee in 1892. In the presidential campaign of 1888 his great executive ability was displayed in the canvass which resulted in carrying the state for Harrison and Morton, thus securing the election of the Republican ticket, as New York was conceded to be the pivotal state in the contest. In 1889-90 he was a member of the international American conference, held in Washington. Appointed secretary of the interior by Pres. McKinley, he served from March 4, 1897, until Feb. 20, 1899, when, for private and personal reasons, he retired. Mr. Bliss is president of the American Protective Tariff League for the dissemination of protective doctrine, to combat the influence exerted by the Cobden Club and American Tariff Reform Club in this country. He is a member of the Union, Century, Union League, Riding, Players', Merchants' and Metropolitan clubs and New England Society. Mr. Bliss was married, in 1859, to Elizabeth, daughter of Hon. Avery Plummer, of Boston, by whom he has a daughter and a son living.

HITCHCOCK, Ethan Allen, secretary of the interior, was born in Mobile, Ala., June 12, 1835, son of Henry and Anne (Erwin) Hitchcock, and brother of Henry Hitchcock. (See page 196.) He was educated in New Haven, Conn., and in 1851 removed to St. Louis, where he was engaged in business until 1860, when he went to China, having relatives settled there, and entered the mercantile house of Oliphant & Co. He remained in China twelve years, and then returned to America, and to St. Louis, where he soon became prominent in business affairs. He was president of several im-

portant manufacturing concerns, and controlled large railroad interests. His business affairs, chiefly connected with the tariff, made him a frequent visitor to Washington, and he there made the acquaintance of William McKinley, which afterwards ripened into a warm personal friendship. This fact, and his recognized ability and knowledge of the world, and especially his familiarity with affairs in China, caused his nomination to the U. S. senate, in August, 1897, by Pres. McKinley, as ambassador to Russia. This important office he continued to hold until December, 1898, when the president called to Mr. Hitchcock the offer of a position in his cabinet; that of secretary of the interior, made vacant by the resignation of Cornelius N. Bliss. The offer was accepted, and the senate confirmed the appointment at once. "Ambassador Hitchcock"—said the New York "Tribune" at the time—"was selected by Pres. McKinley to represent the United States at this court by reason of the president's personal knowledge of his special fitness to strengthen the commercial relations between the United States and Russia, and to find a market for surplus American manufactured articles. Nothing succeeds like success, and the immense increase in the orders for American products from Russia during the last year is conclusive evidence of Mr. Hitchcock's success as the representative of a great manufacturing and exporting nation. It has elicited favorable comments from the correspondents of the leading newspapers in Europe, who commended his example to the representatives of other nations. The importance and character of the services rendered the United States by Ambassador Hitchcock during the Spanish-American war by keeping the Russian government and representatives of European governments represented at this court advised as to the causes that led to and issues involved in the war, as well as the facts relating to the transfer of the Philippine Islands, most probably never will be known, as they were necessarily secret in their nature, and consisted of private conferences with the foreign office and his colleagues

of the diplomatic corps, keeping them advised as to the progress of the war, and placing documents before them giving the American view of questions that might be raised concerning the policy of the United States. For this he was repeatedly thanked." He was held in high esteem at court and in society, and his departure elicited expressions of deep regret. His acceptance enabled Pres. McKinley to restore that balance in the cabinet between the East and West which had been lost through changes and retirements, the West having again four out of the eight portfolios. Sec. Hitchcock is a man of large wealth, having been for many years president of the Crystal Plate Glass Co., of Crystal City, Mo., one of the richest firms in that manufacture in the country.

Ethan A. Hitchcock

GARY, James Albert, postmaster-general of the United States, was born in Uncasville, New London co., Conn., Oct. 22, 1823, son of James Sullivan and Pamela (Forrest) Gary. The family is of English descent, the founder of the American line having been John Gary, a Lancashire farmer, who came to America in 1712 with his brother, James. The latter settled in Massachusetts, and John Gary

in New Hampshire, where he died in early manhood, leaving a large family. One of his sons, also named John Gary, was the father of James Sullivan Gary, and grandfather of James A. Gary. James S. Gary was born at Medway, Mass., Nov. 15, 1808, and at an early age entering a cotton mill in that town, became thoroughly equipped by practical experience in all the details of the business; in 1830 he was married to Pamela, daughter of Deacon Ebenezer Forrest, of Foxboro, Mass., who had seen service in the revolutionary war. Their two children were James Albert and Pamela A., now Mrs. Hart B. Holton, of Baltimore county, Md. In 1838 he engaged in cotton manufacturing in Maryland, ultimately becoming proprietor of the

plant now known as the Alberton mills, at Alberton, Howard co., Md., and after a most successful career died March 7, 1870. James A. Gary attended school at Rockhill Institute, Ellicott City, Md., and afterward Allegheny College, Meadville, Pa. In 1861 he was admitted to partnership by his father, under the style of James S. Gary & Son, and the energy which he brought into the affairs of the firm was quickly made apparent. An office and warehouse was established in Baltimore, and in 1862 a

branch house was opened in St. Louis, which continued for many years. In 1870 Mr. Gary succeeded his father as the head of the firm, and conducted its affairs with marked success, until he entered the cabinet of Pres. McKinley in March, 1897, since which time his son, E. Stanley Gary, has been manager of the business. He owns also valuable business properties in Baltimore and Howard counties; was president for several years of the Merchants and Manufacturers' Association; is now president of the Citizens' National Bank, and vice-president of the Consolidated Gas Co.; holds directorships in the Savings Bank of Baltimore; the Baltimore Warehouse Co.; the American Fire Insurance Co., of Baltimore, and the Baltimore Trust and Guarantee Co.; is also a member and trustee of the Brown Memorial Presbyterian Church, and president of the board of trustees of the Enoch Pratt free library. Mr. Gary was an ardent Unionist during the civil war, and has since been a Republican. He was one of three delegates to the Union convention in 1861 at the Maryland Institute, and exerted all his influence in behalf of the Union cause. In 1870, in obedience to what seemed a call of duty in promoting purer politics, he accepted the Republican nomination for congress in the 5th district, but owing to the large Democratic majority at that time, his defeat followed as a matter of course. In 1879 he was nominated by his party for governor of Maryland, but for the same reason failed of election, in spite of a very active canvass. He has been a delegate to every Republican national convention since 1872, and for sixteen years (1880-96), represented Maryland on the national committee. On his inauguration Pres. McKinley nominated him as postmaster-general, and he was confirmed March 5, 1897, entering immediately upon the arduous duties of the office. Known as a business man far more than a politician, his appointment was received as a guaranty that the high standard of our postal service would be thoroughly maintained, and subsequent experience proved the correctness of this estimate. His long

and varied business training enabled him to readily master the workings of the greatest business department of the government, and efficiently direct its general policy. With the conviction that the establishment of a postal savings system would prove of great benefit to the masses of the people, he set forth his views in his annual report for 1897, which is a most valuable contribution to the literature of the subject. He was enabled to institute numerous reforms and improved methods, greatly facilitating routine business, and at the same time considerably reducing the cost of the service. So strenuously and indefatigably did he apply himself to his duty that his health failed him, and on April 18, 1898, he was compelled to tender his resignation, which was accepted a few days later with great regret and reluctance. He was married in Baltimore, Nov. 26, 1856, to Lavinia W., daughter of James and Catherine (Ely) Corrie. He has seven daughters and one son, E. Stanley Gary, who became a partner in his firm in 1884.

SMITH, Charles Emory, postmaster general, was born at Mansfield, Tolland co., Conn., Feb. 18, 1842, son of Emory B. and Arvilla T. (Joyce) Smith. His father was a manufacturer of silk. In 1849 the family removed to Albany, N. Y., and the son obtained his rudimentary education in the public schools, after which he entered Albany Academy, and in his senior year contributed leading articles to the "Evening Transcript." He entered the junior class of Union College, Schenectady, in 1859, was made captain of the Wide Awakes, an undergraduate Republican club, and also represented his alma mater on the board of editors of the "University Review," published at New Haven, Conn., an inter-collegiate quarterly. Soon after his graduation, in 1861, he became military secretary to Gen. John F. Rathbone, then engaged in organizing and turning over to Federal authorities the state levies.

Later he was promoted to judge-advocate-general with rank of major, but after eighteen months' service, the method of raising troops having been changed, entered the office of the adjutant-general of the state, where he remained until the election to the governorship of Horatio Seymour. Then for a year and a half he taught in the Albany Academy, writing, meanwhile, for the "Express." In 1865 he purchased an interest in that paper and became its editor, raising it from a local journal into so strong a political force that on the re-election of Gov. Fenton, in 1866, it became a rival of the "Journal," the recognized Republican organ.

During the closing term of Gov. Fenton Mr. Smith was his secretary, without giving up editorial duties, and his intimate relations with the governor continued after the latter's election to the senate. In 1870 he became associate editor of the "Journal," with George Dawson, and in 1876, upon the retirement of Mr. Dawson, he was made editor in chief. This position made him powerful in the journalism and politics of New York state. Meanwhile, 1871, he was elected president of the State Press Association, and delivered the annual address. In 1875 he was a delegate to the state convention, and for nearly six successive years was chairman of the committee on resolutions, the exception occurring in 1877, when a

James A. Gary

Charles Emory Smith

the post was held by Roscoe Conkling, and Mr. Smith acted as secretary. Mr. Smith had an important part in framing the state Republican platforms, in that of 1877 inserting the first New York declaration in favor of civil service reform, and in that of 1878 reconciling the differences between the administration and Sen. Conkling after the sharp clash of the previous year. He was a delegate to the national convention of 1876, and as a member of the committee on resolutions drafted a large part of its platform. In opposition to the machine organization he supported Hon. George B. Selden for speaker of the assembly in 1876, and in 1880 declined to occupy his old position as chairman of the committee on resolutions on account of differences with the leaders of the majority. He was, however, chosen both temporary and permanent chairman of the convention. The same year Mr. Smith removed to Philadelphia to become editor and part proprietor of the "Press," a newspaper which after a long period of prosperity and influence under John W. Forney had passed under other control and lost its prestige. In the hands of the new proprietors the journal was transformed. Mr. Smith reorganized its news system and its staff, and infused such force into its editorials that during the presidential campaign of 1880 it exerted its old influence, and on the nomination of Blaine and Logan in 1884 it attained a thoroughly national position. In 1884 he opened the campaign in Pennsylvania for the state committee. In 1887, when the first mayor of Philadelphia under the new reform charter was to be elected, Mr. Smith was chairman of the Union League committee, which was mainly instrumental in the selection of a candidate. He was active in the Republican national convention of 1888, and made an address before it proposing Mayor Edwin H. Fitzer for president. In the succeeding campaign he took the stump in Maine, New Jersey, Pennsylvania and other states. On Feb. 10, 1890, he was appointed U. S. minister to Russia by Pres. Harrison, and four days later the nomination was confirmed by the senate. He performed the duties of this office for two years, during which period he distributed the money and provisions sent from the United States for the relief of sufferers from the famine in Russia, and made intellectual efforts to bring about a mitigation of the severity of the "May laws," which were aimed at the Hebrews in the empire. In April, 1892, Mr. Smith returned to this country, and two months later resigned, resuming his editorial position on the "Press" and taking an active part in the presidential campaign. In 1895 he stumped Ohio, speaking twice with Gov. McKinley; in 1896 he was prominent in the councils of the Republican party, and wrote, it is said, a large part of its platform of that year. On April 21, 1898, he was appointed postmaster-general of the United States, succeeding James A. Gary, and having served acceptably through the first term was confirmed in office by Pres. McKinley. The most important feature of his administration was the establishment of the rural free delivery. At the beginning of the fiscal year, 1899-1900, only 391 routes had been created; at the close of the fiscal year, 1900-1901, about 4,300 towns enjoyed its advantages. In 1871 Mr. Smith was elected a trustee of Union College for five years, and in 1879-80 he was a regent of the University of New York. In 1889 he delivered the honorary chancellor's address at the commencement exercises of Union College, his theme being, "Are We Worse than Our Fathers?" On that occasion he received the degree of LL. D. He was married in Albany to Ella Huntley. They have no children.

WILSON, James, secretary of agriculture, was born in Ayrshire, Scotland, Aug. 16, 1835, nephew of Rev. Dr. J. McCosh, ex-president of Princeton

College. In 1852 his parents emigrated to the United States, settling at Norwich, Conn., whence, in 1885, he removed to Truer, Tama co., Iowa. He attended the public schools and finished his education at Iowa College. As early as 1861 Mr. Wilson took up farming as an occupation, and in the same year was elected to the state assembly, of whose lower house he became speaker. In 1872 he was elected to the 43d congress (1873-75), also to the 44th (1875-77), and to the 48th (1883-85). In the interim between the 44th and 48th he served as a member of the railway commission; in 1870-74 he was a regent of the State University; and in 1890-97 was director of the Agricultural Experiment Association, and professor of agriculture at the Iowa Agricultural College at Ames. He was confirmed secretary of agriculture in Pres. McKinley's cabinet, March 5, 1897, and was retained in office when the president began his second term.

McKENNA, Joseph, attorney-general and associate justice of the U. S. supreme court, was born in Philadelphia, Pa., Aug. 10, 1843, son of John and Mary McKenna, natives respectively of Ireland and England. He attended St. Joseph's College, in that city, until 1855, when the family removed to Benicia, Cal., and there he entered St. Augustine College and took up the study of law. In the year of his graduation and admission to the bar (1865) he was elected district-attorney of Solano county, and two years later was re-elected. At the end of his second term he removed to Suisun, and there continued the practice of his profession. In 1875 he was elected to the legislature, in which body he delivered a notable speech on the proposal to create a state board of railroad commissioners; in 1876 the Republicans of the 3d congressional district nominated him for congress, but he was defeated, and a similar attempt in 1878 also failed. In 1884 his supporters were successful, and in 1885 he entered congress to represent the 3rd congressional district, and to remain, by re-election, until the first session of the 52nd congress (1891). As a member of the committee of ways and means, the only one from a state west of the Rocky mountains, he was concerned with important tariff legislation, and was closely associated with William McKinley. Pres. Harrison, in February, 1892, appointed him circuit judge for the 9th, or Pacific coast circuit, to succeed Lorenzo Sawyer. In March, 1897, he entered McKinley's cabinet as attorney-general, succeeding Judson Harmon, of Ohio, but in December was appointed a judge of the supreme court of the United States by Pres. McKinley to succeed Justice Field. On Jan. 21, 1898, the appointment was unanimously confirmed, and on Jan. 26th

Joseph McKenna

he entered McKinley's cabinet as attorney-general, succeeding Judson Harmon, of Ohio, but in December was appointed a judge of the supreme court of the United States by Pres. McKinley to succeed Justice Field. On Jan. 21, 1898, the appointment was unanimously confirmed, and on Jan. 26th

Judge McKenna took his seat on the supreme bench. His best known work as attorney-general was the opinion rendered on section 22 of the Dingley law, and his part in the settlement of the Union Pacific railroad controversy. He was married in San Francisco, June 10, 1869, to Amanda, daughter of F. G. Borneman. They have one son and three daughters.

GRIGGS, John William, attorney general, was born at Newton, Sussex co., N. J., July 10, 1849, son of Daniel and Emline (Johnson) Griggs. He was educated at the Collegiate Institute, Newton, and at Lafayette College, Easton, Pa., where he was graduated in 1868, and then took up the study of law in the office of Robert Hamilton at Newton. Later he studied in the office of Socrates Tuttle in Paterson, and in 1872, the year after his admission to the bar, formed a partnership with that gentleman which continued for eight years. His appointment to the office of city counsel soon followed; later he became president of the Paterson National Bank and the Paterson Safe Deposit Co. In 1875 Mr. Griggs was elected to the state assembly and had a prominent part in the debates and legislation of the lower house. In 1876 he was re-elected. In 1882 he became a state senator, representing Passaic county, and in 1886, as president of that body, presided at the Lavery impeachment trial. The law for the taxation of miscellaneous corporations was drawn by him, and he was prominently concerned in framing the railroad tax act. He led the Republicans in the joint meeting in 1887 in the contest for the senatorship which ended in Gov. Abbott's defeat. In 1888 he was a delegate to the national Republican convention and presented the name of William Walter Phelps as a candidate for the vice presidency. On the death of Justice Bradley, of the U. S. supreme court, in 1892, Pres. Harrison seriously considered the question of appointing Mr. Griggs as his successor, but the honor finally passed

to another. In 1895 Mr. Griggs was elected governor of New Jersey, being the first Republican for thirty years to hold that office. His plurality over Alexander T. McGill was 26,900. On the resignation of Joseph McKenna to become associate justice of the supreme court, he succeeded him as attorney-general of the United States, taking the oath of office Jan. 31, 1898. On March 31, 1901, he resigned and was succeeded by Philander C. Knox, of Pennsylvania. Mr. Griggs is a member of the Hamilton Club, of Paterson, and the Union League Club, of New York city. He is a lover of athletics and of hunting and has won several prizes in con-

tests at the state rifle range.

KNOX, Philander Chase, attorney-general, was born at Brownsville, Fayette co., Pa., May 6, 1853, son of David S. and Rebekah (Page) Knox. His father was a banker at Brownsville. He matriculated at the University of West Virginia; but was graduated at Mount Union College, Alliance, O., in 1872; then entered the law office of H. P. Swope, Pittsburgh, Pa., and was admitted to the bar in 1875. He was assistant U. S. district attorney for the western district of Pennsylvania in 1876, and in 1877 formed a law partnership with James H. Reel, as Knox & Reel, and became counsel for many large interests, including the Carnegie company. He was elected president of the Pennsylvania Bar Asso-

ciation in 1897. He is said to have been considered by Pres. McKinley for attorney-general in his cabinet in 1897, but would not encourage the ap-

pointment at that time on account of his unwillingness to relinquish the practice of law. In 1901, however, he accepted, becoming successor to John William Griggs, resigned, and was sworn into office April 9th. Mr. Knox was elected to membership in the Duquesne, Pittsburgh and Pittsburgh County clubs of his home city; the Castalia Angling Club, Sandusky, O.; the Union League and Lawyers' clubs, New York city, and the Lawyers' Club, Philadelphia, Pa. He was married, in 1880, to Lillie, daughter of Andrew D. Smith, of Pittsburgh.

HANNA, Marcus Alonzo, senator, was born at Lisbon, county seat of Columbiana co., O., Sept. 24, 1837, son of Leonard and Samantha Hanna. He is descended from Quaker emigrants to Virginia, and from Scotch Presbyterian settlers in Vermont. His father was a physician, and later a merchant of Cleveland, O., whither the family removed in 1852. The son was educated in the public schools of Cleveland, and at the age of twenty he entered the employ of Hanna, Garretson & Co. where his father was senior partner. Upon the death of the latter, in 1881, he assumed control of his father's interest. This firm dissolved in 1867, and he associated himself with the firm of Rhodes & Co., successors to Rhodes, Card & Co., the pioneer coal and iron firm of Cleveland. He retained this connection until 1877, when he became senior partner, the firm name changing to M. A. Hanna & Co., with which he is still (1901) identified. In 1872 he organized and equipped the Cleveland Transportation Co., one of the largest lines operating on the Great lakes. Following the organization of the Union National Bank of Cleveland, he was elected to its presidency in March, 1884, and still holds this office (1901). He was a delegate at large from the state of Ohio to the Republican national conventions of 1884 and 1896, and in 1888 was a district delegate. A warm friend of Sen. John Sherman, he was energetic in advocating his nomination for president in 1880, 1884 and 1888, and he still keenly feels that Sherman's eminent services to the country in securing the resumption of specie payment and the firm establishment of the nation's credit and honor have never been adequately recognized. Mr. Hanna took charge of Maj. McKinley's preliminary canvass for the presidency during the winter of 1895-96, and so well did he conduct it that he was chosen chairman of the national committee, and given the entire conduct of the campaign, which he carried to a successful issue. An indefatigable worker, and full of confidence himself, he inspired everybody about him with like faith and enthusiasm, in a business man than a politician, he carried his business methods into the management of the campaign, eliminating as far as possible the party spirit. In one state where the situation was very doubtful, three complete polls were made, and the result of the success was demonstrated by the fact that McKinley carried a majority in that state at election was 50,000. It was what the polling showed, and not the party spirit, that carried him to the presidency. Although he is a member of the Democratic state central committee,

J. W. Griggs

for Bryan, Mr. Hanna's last canvass showed over 16,000 plurality for McKinley, and as a matter of fact the vote at election gave 18,800 advantage. Mr. Hanna has always been active in the management of his personal affairs, having them organized and systematized under a force of men whose respect he holds because he treats them with respect, and is always fair with them. During the Cleveland street railway strike of 1899, his men resisted every effort to get them out, claiming that they had no grievance for which to strike; and in the coal miners' strike (1896-97) the Hanna properties were the only mines at which there was no disturbance. Mr. Hanna has always been a true friend of labor; during a prostration in the iron industries, when all the ore mines in the Michigan region were shut down and the miners' families were in distress, his mine was kept running, and over 150,000 tons of ore piled up on the docks, in order to give employment to the men and support to their families. At one time a superintendent was about to introduce two large steam hoists and shovels for unloading vessels; but as soon as Mr. Hanna heard of the matter he ordered the machines away, saying that the men were brought there to do the work, and their families needed the wages. Although continually the object of abuse by the opposition, when asked to answer some of the charges, Mr. Hanna invariably replied: "Oh, they are not true. They can't hurt me, I am not a candidate." Speaking of Mr. Hanna, Sen. Jones, chairman of the Democratic national committee, is credited with having said: "For Sen. Hanna, personally, I have the highest regard, but as a Democrat I am bound to abjure him as a scoundrel." Having carried to a successful issue the campaign of 1896, Mr. Hanna was appointed by Gov. Bushnell, of Ohio, March 2, 1897, U. S. senator to fill the vacancy caused by the

resignation of John Sherman; and to this seat he was re-elected, in 1898, for the term expiring in 1905. He is a director in the Globe Ship Manufacturing Co.; president of the Cleveland City Railway Co., and the Chapin Mining Co.; and was, by appointment of Pres. Cleveland, in 1885, director of the Union Pacific Railway Co.

TAFT, William Henry, jurist, was born in Cincinnati, O., Sept. 15, 1857, son of Alphonso and Louisa M. (Torrey) Taft. His father, a member of the Ohio bar, was secretary of war and attorney-general in the cabinet of Pres. Grant; he was afterward minister to Austria, and to Russia during Pres. Arthur's administration. The son attended the Cincinnati public schools, and was prepared for college at Woodward High School. He was graduated at Yale College in 1878, second in a class of 120, being salutatorian and class orator. He at once entered the Cincinnati Law School, where he was graduated in 1880, and in the same month he was admitted to the bar. In 1881 he was appointed assistant prosecuting attorney of Hamilton county, but resigned in 1882 on being appointed by Pres. Arthur collector of internal revenue for the 1st district of Ohio. He resigned this office a year later, and resumed the practice of law, with Maj. H. P. Lloyd as a partner. In 1885 he was made assistant county solicitor, soon afterward receiving the appointment as judge of the superior bench to fill the vacancy caused by Judge Harmon's resignation. In 1888 he was elected to the same office for a term of

five years, of which he served two; in 1890 Pres. Harrison appointed him solicitor-general of the United States, and in 1892 judge of the U. S. circuit court of appeals. In 1896 he became dean and professor in the law department of the University of Cincinnati. In March, 1900, he was appointed by Pres. McKinley chairman of a commission to the Philippines for the purpose of "organizing and establishing civil government already commenced by the military authorities." The commissioners reached Manila in April, 1900, and in August submitted a preliminary report. In June, 1901, the commission completed a code of laws for the islands, arranged a judiciary system, and appointed a judge and law officers. On July 4th military rule was abolished, and Judge Taft became civil governor, while retaining his place at the head of the commission. The condition of the islands, caused by Spanish misrule, made his task a most difficult one, but before long the Filipinos experienced a degree of peace, justice and prosperity, which they had never attained in their whole previous history. Under him they learned what it meant to keep faith, to have public officials of unbending rectitude, and what the benefits are of good roads, good schools, upright judges and honest public servants. Judge Taft received the degree of LL. D. from Yale University in 1893. He has been mentioned as a candidate for governor of Ohio and also as the administration candidate for president in 1904. He was married, in June, 1886, to Helen L., daughter of John W. Herron, formerly U. S. district attorney.

SMITH, William, jurist, was born at Newport-Pagnell, Buckinghamshire, England, Oct. 8, 1697 (old style), son of Thomas and Elizabeth (Hartley) Smith. His father was a soldier of the commonwealth and a Calvinist. In 1715, with his father and two brothers, he emigrated to America. Having been prepared for college in England, he immediately entered Yale, and was graduated in 1719. He spent five years at Yale as a tutor, and at the end of that time returned to New York city, where he was admitted to the bar on May 20, 1724. His eloquence as an advocate soon gained him recognition, and he was retained on the Whig side in nearly all cases of importance. In 1733 he was disbarred on account of his participation in a lawsuit against Gov. William Cosby, where the principle that was involved was the right of the provincial council to provide a salary for one of their own number as acting governor during the interim between the death of one royal appointee and the arrival of another. He was restored in 1736. On Sep. 29, 1736, he accepted the office of recorder under Van Dam. With this exception, until 1751, he kept aloof from official employment, confining himself strictly to his profession. In 1748 Gov. Belcher's charter named him one of the incorporators of the College of New Jersey, at Princeton. He was also one of the founders of King's College (Columbia). In 1751 Gov. Clinton appointed him attorney-general and advocate-general, and he served one year but was not confirmed by the royal authorities. He was also recorder, and in 1753 he was made a member of the governor's council, and held office until 1767, when his son, William, succeeded him. In 1754 he was appointed one of the four representatives from the province of New York to the general congress which met at Albany, to propose and receive plans for the union of the colonies under one government. In 1760, Lieut.-Gov. Colclen offered him the appointment as chief-justice of the supreme court, but he declined, on account of a technicality involving a principle. In 1763 he was appointed associate judge of the supreme court of the province, and held that office until his death. Judge Smith was remarkable for his eloquence, his

learning, and his adherence to the cause of political and religious liberty. He was married twice, the historian, William Smith, being his son by his first marriage. He died in New York city, Nov. 22, 1769.

STEVENS, John, inventor, was born in New York city in 1749, son of John and Elizabeth (Alexander) Stevens. His grandfather, John Stevens, emigrated from London, England, about 1665, and was married to Mary Campbell. His father, was born in New York city about 1708, settled in New Jersey, where he was one of the joint commissioners for defining the boundary line between New York and that province in November, 1774; served as vice-president of the council of New Jersey (1776-82); presided at the joint meetings of both branches of the legislature; and being elected to the Continental congress, served in that body from November, 1783, until Dec. 18, 1787, presiding over the state convention that ratified the U. S. Constitution. He died in May, 1792. John Stevens was graduated at King's College (now Columbia), in 1768. After pursuing the study of law, he was admitted to the bar of New York city in 1771, and began to practice in that city, though making his home at Hoboken, N. J. During the revolutionary period he held the office of treasurer of the state of New Jersey (1776-79), and served as a colonel in the army. In 1790 he petitioned congress for a bill that would protect American inventors, and through his efforts this bill became a law on April 10, 1790, thus introducing the present patent system of the country. Taking up the study of steam in 1789, he took out patents on marine engines three years later under the new patent law, and in 1798 completed his first boat, successfully operating it on the Hudson river. In this work he was associated with Nicholas I. Roosevelt, the elder Brunel, builder of the Thames tunnel, and a brother-in-law, Robert Livingston; the latter, however, was appointed minister to France in 1801, and there allied himself to Fulton in a similar purpose, finally securing the monopoly of the Hudson river. In 1804 a second boat was constructed by Stevens, equipped with two screws, and the style of propeller then designed by him was for many years preferred above later inventions. Though this was the first application of steam to the screw-propeller, yet his design was the identical short, four-threaded screw used to-day, constructed on the helix curve, as shown by a letter to Dr. Robert Hare, of Philadelphia, in 1804. Mr. Stevens upheld the efficiency of the screw, especially for ocean navigation; but it is remarkable that this form of propulsion was not practically introduced until 1837, when it was used in the form of an Archimedian screw of single thread, and a multi-threaded screw on the outer surface of a cylinder. However, both these forms reverted to the original Stevens design in the course of another decade. His original steamboat also contained the first condensing double-acting engine ever made in America and a multi-tubular boiler on which he secured U. S. patents in 1803, and English patents two years later. After the death of the inventor the machinery of his first boat, which is still preserved in the Stevens Institute, was placed in a different hull, and tried before a committee of the American Institute of New York, attaining a speed of about nine miles an hour. In 1807 he built, with the assistance of his son, Robert L. Stevens, the side-wheel steamboat Phoenix, which was a few days behind Fulton's vessel in attaining the legal speed, and was thus shut out from the Hudson river; but he boldly steamed her around to the Delaware by sea (1808), being the first to navigate the ocean with the new motive power. On Oct. 11, 1811, he established, between Hoboken and New York city, the first steam ferry in the world, and two years later operated the

first double-hull ferryboat carrying a paddle wheel driven by churning horses. In 1812, assisted by his son, Robert Livingston, he made steam navigation on the Delaware river a commercial success, and in 1815 obtained a charter for a steam railroad from the Delaware to the Raritan, this being the first charter granted in America. Eight years later he secured another charter for a road running from Philadelphia to Lancaster over the present Pennsylvania railroad route; obtaining a patent for the construction, Oct. 23, 1821, and finally, in 1826, to prove its possibilities, he built a steam locomotive with multi-tubular boiler, the first engine that actually pulled a train on a track in America. In a memorial addressed by him during February, 1812, to the Erie canal commission, he advocated the building of a double track freight and passenger railroad between Albany and Lake Erie in preference to the canal, with estimates of cost, and a definite plan, enumerating comprehensively the advantages of a railroad over a canal, naming many details afterward found necessary, and placing the future speed at from twenty to thirty miles per hour, with a possibility of from forty to fifty. This document (which was published at the time, as well as in 1852 by the president of Columbia University, and in 1882 by the "Railroad Gazette") received the adverse report of the commission, including such men as De Witt Clinton, Gouverneur Morris, and Chancellor Livingston; yet not only were its general claims substantiated by subsequent events, but its very figures were borne out by the results of the South Carolina railroad, built in 1830-32 on these plans. He also designed the first ironclad ship ever worked out for construction, which embodied the Monitor type, as early as 1813; but though contracted for by the U. S. government, its specifications were so frequently revised by the officials that completion was never reached. Among his patents not mentioned were two for improvement in bellows and on Thomas Savery's engine, both to facilitate pumping (1791); one for the generation of steam in the same year; for the use of slides (1816); for an improvement in rack railroads, and for an invention to render shallow waters more navigable (1824). Besides being an enthusiastic botanist, cultivating new plants which he had specially imported, he was an excellent classical scholar, a close student of philosophy, and fond of metaphysical speculations, leaving at his death several philosophical treatises never published. Col. Stevens was married to Rachel, daughter of John Cox, and had seven sons, among them John Cox, Robert Livingston, James Alexander and Edwin Augustus Stevens. He died at Hoboken, N. J., March 6, 1828.

STEVENS, Robert Livingston, shipbuilder, was born at Hoboken, N. J., Oct. 18, 1787, son of John and Rachel (Cox) Stevens. Inheriting the mechanical talent of his father, at the age of seventeen the son assisted him in the construction of the first screw steamboat, and in June, 1808, steered the side-wheel Phoenix on her trip from New York to Philadelphia by sea. At the time of the death of Robert Fulton (1815) his speed of steamboats did not exceed seven miles an hour. About that time Stevens built the Philadelphia with a speed of eight miles an hour, toward he was famous as a builder of steamers. His succeeding boat was faster than its predecessor, and the North America 1832 acquired a speed of 12 miles

John Stevens

miles by the use of forced draft. Between 1815 and 1840 he gave his chief attention to this line of work, standing at the head of the American naval engineering profession. A bare catalogue of his inventions would fill pages. In 1818 he invented the cam-board cut off, which was the first use of steam expansively for navigation, and in 1821 the universally prevalent forms of ferry-hoist and ferry-slip, constructing his boats with the overhanging girders as used to-day, and supplying the slips with the spring piling and spring tenders now familiar; the walking-beam, invented by Watt, was adapted by him to navigation purposes; in the latter year, he devised the gallows frame that is now used for its support, and constructed the beam of wrought iron with a cast centre instead of using cast iron throughout. This he still further improved in 1829. The invention of the split water-wheel and the lengthening of the piston stroke were accomplished in 1826. In 1831 he devised the balance valve for beam engines—a modification of the Cornish double beat valve—and constructed the first marine tubular boiler. He raised the strength of boilers to fifty pounds per square inch, at a time when the English engineers had not attained a fifth of that resistance; he increased the amount of iron used in the hulls of his vessels, adding strength, without proportionately increasing the weight and he introduced the overhead truss to reduce vibration. In the construction of yachts he also excelled, designing in 1844 the *Maria*, which was a faster vessel than the famous *America*, and remained the swiftest of her class until 1869, when she mysteriously disappeared. Com. John C. Stevens, a brother, who was sailing the *Maria* in 1860, overhauled and sailed around the fast revenue cutter, *Harriet Lane*, which carried the Prince of Wales. Robert became the first president and chief engineer of the Camden and Amboy railroad, which was incorporated in 1830, and being sent by his company to buy rails in England, designed the present "T" rail during the voyage over, this being known for many years as the Stevens or American rail. Concurrently he designed the present hook headed spike. After placing the contract for the manufacture of his

Robert L. Stevens

rails, he ordered a Stephenson locomotive on the model of the Planet, in active operation on the Liverpool line. This was the John Bull, which arrived in America during August, 1831, and which is still preserved in the Smithsonian Institution, Washington, D. C. The Camden and Amboy railroad was among the foremost of the pioneer railroads of America, and adopted many features now familiar, among them the locomotive pilot, devised by Robert L. Stevens in 1832; spiking the rail directly to the cross-tie, the bogie truck; forms of the vestibule car, and methods of wood preservation. During the latter part of the war of 1812 his attention was directed toward the perfection of a bomb to be fired from a cannon instead of a mortar, in order to make the use of that projectile feasible in naval warfare; and a successful percussion shell was finally invented by him, the secret being purchased by the U. S. government. In the tests held before an examining board appointed by Pres. Madison, an actual section of a ship of the line was demolished by this projectile. Upon the passage of the act of congress of April 14, 1842, authorizing

the construction by him of an iron clad steam vessel, impenetrable to shot or shell, he at once commenced the work with his younger brother, Edwin A. Stevens. A short time later, however, the terms of the contract were changed, to make the armor superior to newer penetrating powers; and this process of interruption and delay was kept up until his death, which left the Stevens battery, partly finished, in charge of his brother, Edwin. She was then 410 feet long, forty-five feet wide, showing only two feet of freeboard, with twin-screw engines, and with a square, immovable turret enclosing depressible guns, being similar to the Monitor in all respects except in the revolving turrets, which were suggested by Robert L. Stevens about 1840. In 1861 Edwin A. and John C. offered to complete the Stevens battery if the government would reimburse them after her utility had been proved; but no such agreement could be made. With a million dollars the vessel was bequeathed by Edwin to the state of New Jersey, which expended the sum during 1869 and 1870, without launching the ship, and in 1881 she was torn to pieces. Robert L. Stevens died at Hoboken, N. J., April 20, 1859.

STEVENS, Edwin Augustus, founder of Stevens Institute of Technology, was born at Hoboken, N. J., July 29, 1795, son of John and Rachel (Cox) Stevens. In 1812 he became the assistant of his father and his elder brother, Robert. Having inherited the financial acumen and business sagacity of his father, at the age of twenty-five he was made, by family agreement, the trustee of the bulk of the paternal estate. In 1826 he took charge of the stage-coach transportation system known as the Union line; in 1830, became treasurer of the Camden and Amboy railroad, which succeeded the former, and in 1854 was elected its president, conducting the affairs of the company successfully for thirty-five years. This railroad, which was opened for traffic Oct. 9, 1832, became the model in many respects for roads built later by other companies. In 1823 he invented the Stevens plow, which was long manufactured under his patent; and in April, 1842, was granted a patent on the air-tight fire-room, a feature of the forced draft system of every war ship now constructed. He gave considerable attention to armor tests, and in 1841 demonstrated that four and one-half inches of iron sheathing would withstand sixty-eight pound shot at thirty yards from the marine guns of the day, his conclusion being justified eighteen years later by the adoption of such armor in both French and English navies. Together with Robert L. Stevens, he prepared a document on coming principles in naval warfare which was submitted to the U. S. government; and after the armor tests had been repeated at Sandy Hook before the official authorities, in 1842 congress voted \$250,000 for construction of the Stevens battery. He altered and equipped the Naugatuck, which was one of the fleet that attacked the Merrimack, in the civil war. This was a small vessel, intended to demonstrate the practicability of the principles embodied in the Stevens battery; and was of the twin-screw type; could be turned completely around on her centre in the short time of one minute and a quarter; could be immersed three feet below her load water-line, making her nearly invisible at a distance, and by pumping, could be raised again in eight minutes. Mr. Stevens was appointed a Democratic presidential elector several times. He was a member of the

Union Club, and of the New York Yacht Club. He was married, in 1839, to Mary B., daughter of Rev. Thomas Pictou of West Point, N. Y. She died in 1841, leaving one daughter, and he was married, the second time, to Martha B., daughter of A. B. Dod,

of Princeton, N. J. Five sons and two daughters were born of this union. Mr. Stevens died in Paris, Aug. 8, 1898, bequeathing land and funds for the erection and endowment of an institute, his executors to decide on its nature. The funds consisted of \$150,000 for building and \$500,000 for endowment. The Stevens Institute of Technology was thus established at Hoboken, N. J., and its resources have been increased by many donations, the founder's widow adding \$30,000, and Dr. Henry Morton, president of the institute, \$60,000. Its productive funds amount to \$500,000; its library con-

tains 100,000 volumes; 886 students have been graduated, and 247 are now (1901) receiving instruction.

MORTON, Henry, first president of the Stevens Institute of Technology (1870-79), was born in New York city, Dec. 11, 1836, son of Rev. Henry Jackson and Helen (MacFarlan) Morton. His father (1807-89) was the rector of St. James' Episcopal Church, Philadelphia, Pa., from 1830 to 1886, and also was well known as a writer on church subjects. The son was prepared for college at the Protestant Episcopal Academy of Philadelphia, and entering the University of Pennsylvania, was graduated in 1857. During his senior year he became interested in the famous Rosetta stone, and with two other members of his class prepared a translation of its trilingual—hieroglyphic, demotic and Greek—in- scription, which in the form of a report to the Philo- mathean Literary Society was published in litho- graphic fac-simile in 1859, with numerous colored designs by him. After taking an advanced course in chemistry he studied law for two years in the office of George M. Wharton, of Philadelphia. His fondness for science, however, caused him to abandon this calling, and accept in 1860 an instructorship in physics and chemistry in the Episcopal Academy. In 1863 he delivered a course of lectures on chem- istry before the Franklin Institute, of which he was for six years (1864-70) resident secretary, and in the same years he assisted in the formation of the Philadelphia Dental College, becoming its pro- fessor of chemistry. His lectures for the Franklin Institute, many of which were delivered in the Academy of Music to audiences of several thousand, were accompanied by brilliant original experiments, among them the production of an artificial rainbow twenty feet in diameter and an accurate imitation of solar and lunar eclipses. In 1867 he was elected professor of chemistry and physics in the University of Pennsylvania, and upon the division of the chair two years later was assigned to the department of chemistry. In 1867 he became editor of the "Journal" of the Franklin Institute, and in the year 1869 he organized and conducted the photographic division of the U. S. eclipse expedition to Iowa, where he secured several successful photo- graphs of the sun's disc, and also obtained a com- plete demonstration of the fact that the bright line adjacent to the moon's edge, previously attributed to diffraction, was due entirely to chemical action during the development of the plate. In recognition

of his scientific achievements he was in 1870 chosen president of the newly founded Stevens Institute of Technology, then being established under the will of Edwin A. Stevens, at Hoboken, N. J. His original bequest a block of land in Hoboken was designated for the erection of "buildings suitable for the uses of an institution of learning," and a building fund of \$150,000 created. The executors being fur- ther empowered to endow the institution to the extent of \$500,000, appropriated the entire amount to that purpose, less \$45,000 deducted as an income tax, which has never since been recovered. Dr. Morton organized the faculty and arranged a course of instruction in mechanical engineering. The ses- sions began in 1871, and from the beginning then made, Stevens Institute has progressed, until at the present time it holds front rank among the techno- logical schools of the country. Pres. Morton is not the least among its benefactors, having given gener- ously both labor and money in its behalf. In 1881 he gave \$10,500 to fit up a machine workshop, in 1883 an additional \$2,500 for the purchase of apparatus for the department of applied electricity, also pay- ing its running expenses for two years, and in 1889 another \$10,000 toward the endowment of a chair of engineering practice, while in 1892 he increased the same fund by a further gift of \$20,000, in connection with the celebration of the twenty-fifth anniversary of the Stevens Institute of Technology in 1897, he gave the trustees stock which was sold for \$24,000 towards the further endowment of the same chair, and in 1901 he erected a boiler house and presented \$50,000 for an endowment fund. Soon after his settlement in Hoboken he became famous as an expert in lawsuits involving questions in chemistry and physics. His testimony in the suit of the Horsford patents, concerning the use of a dry phosphate of lime in baking powder, overthrew the opinion of several of the expert chemists in the country, and he was equally important in the suits over an artificial madder—alizarine—and over the patent for the man- ufacture of celluloid. In 1869 the degree of Ph. D. was conferred on him by Dickinson College, and in 1871 by Princeton; in 1897 D. Sc. by the University of Pennsylvania, and LL. D. by Princeton University. He was a member of the U. S. lighthouse board from 1878 to 1885, and in this capacity made many investigations in the subjects of fog signals, electric lighting, illuminating buoys, fire extinguishers, etc. Pres. Morton has been a member of the National Academy of Sciences since 1874, and was vice- president of the American Chem- ical Society in 1876-81. He has written numerous papers, which have appeared in both American and foreign journals, the most important being "The Fluorescent Relations of Anthracene and Chrysogen"; "The Fluorescent Relations of a New Hydrocarbon Found in Petroleum Distillates"; "The Fluorescent and Absorp- tion Spectra of the Uranium Salts"; "Apparatus and Method of Optical Projection"; "On Measurements of Incandescent Electric Lamps"; "Elimination of Antimony From the Human System"; "Recent Developments in Artificial Illumination"; and "Engineering Pallades." He has also contributed articles on electricity and illumination to encyclopedias. He was married, in 1863, to Mary Whiting, daughter of Samuel N. Dent, of New York city.

EDDY, Thomas Mears, chemist and pho- tographer, was born at Newtown, Hamilton Co., N. Y.,

Edwin A. Stevens

Henry Morton

7, 1823. He obtained his classical education at the Greensboro (Ind.) Academy. In 1842 he became a member of the Indiana Methodist conference and a circuit preacher of the Methodist Episcopal church, serving until 1853, when he was made presiding elder of the Indianapolis district. In 1856 he assumed editorial charge of the "Northwestern Christian Advocate," which he controlled until 1868. He held a pastorate at Baltimore, 1868-72, and was appointed minister of the Metropolitan Church, Washington, in 1872, and in the same year was elected corresponding secretary of the Methodist Missionary Society. He published a "History of Illinois During the Civil War" (1865). He died in New York city, Oct. 7, 1874.

WALKER, William, millmaster, was born in Nashville, Tenn., May 8, 1824, son of a banker who emigrated from Scotland in 1820 and was married to a Miss Norvell, of Kentucky. He was graduated at the University of Nashville in 1838, and after being admitted to the bar he went abroad, where he studied medicine in Edinburgh, Paris and Heidelberg, and traveled in Germany and Italy. Upon returning to the United States he went to New Orleans, where he was employed on the "Crescent" for several years. In 1850 he proceeded to California, and became an associate editor on the San Francisco "Herald." For the purpose of establishing on the frontier

of Sonora, Mexico, a military colony, not necessarily hostile to Mexico, which would protect that state against the raids of the Apache Indians, he fitted out, in July, 1853, an expedition consisting of 170 men and three field pieces, and eluding the port authorities of San Francisco, set sail on Oct. 17th. Landing at La Paz, Lower California, he proclaimed himself president and made a liberal distribution of high offices. He succeeded in occupying several small towns, and issued a proclamation annexing Sonora to his domains. Early in 1854 he was reinforced by Col. Henry P. Watkins, and set out for Nicaragua; but the supply of food was in-

sufficient, and the party, after enduring great privation, gradually diminished in numbers. They were near the frontier line of the United States, and on being pursued by Mexican forces Walker took refuge on the California side, and deeming it expedient to surrender, gave himself up to the authorities at San Diego, Cal. He was tried at San Francisco on May 15th for violating the neutrality laws, but was acquitted. Upon being released he began preparations for an expedition to Nicaragua (then in a state of civil war). He was encouraged in this project by receiving a grant of land from Francisco Castillon, dictator of the so-called liberal government, set up by the Democratic party of Nicaragua. One of Walker's companions, writing at the time, said that "no secrecy was used in organizing the colonists." Walker showed the grant to the U. S. district attorney for California, Hon. S. Inge, who declared that no law would be violated by their "emigration." Recruits joined him from his native state, where his career was being watched with interest; and Col. Henry L. Kinney, of Philadelphia, at the head of another band of "armed colonists," also made his way to Nicaragua. Sailing from San Francisco in the brig Vesta, Walker landed at Realcejo, with fifty-six followers, June 16, 1855, and was joined by 100 native insurgents. He was not sorry to find the affairs of the Castillon party in a desperate condition, and the provisional government confined to the western part of the state, for his own supremacy was the more assured. Walker's first advance was on Rivas, the Legitimist stronghold, where he was repulsed and lost eighteen men; however, he won the battle of Virgin bay, and after a short siege, on Oct. 13th captured Granada. By a treaty with Gen. Ponciano Corral, the opposing leader, Walker was made secretary of war and commander-in-chief. Soon after he charged Corral with treachery, and presided over a court-martial, at which the general was found guilty. He was shot on Nov. 7th. Walker's success had inspired confidence in his enterprise, and about 1,200 recruits arrived from the United States. Costa Rica declared war against him, Feb. 26, 1856, and he was defeated at Guanacaste, March 20, 1856, but routed the enemy at Rivas on April 11th. Cholera made its appearance in both armies and hostilities ceased. Engaging in a quarrel with the Vanderbilt Steamship Co., he revoked its charter and confiscated its property for non-payment of his demands for money. He procured his own election as president, and on Sept. 22d annulled the law prohibiting slavery, while great quantities of worthless currency were issued to pay the expenses of the new government. Walker's dominion was recognized by the American minister resident, and Pres. Pierce, notwithstanding his former proclamation, warning the people against encouraging armed expeditions to countries with whom the United States was at peace, received Father Vigil, a Catholic priest, as Walker's envoy. But the usurper's arbitrary acts soon provoked an insurrection, in which the people were aided by Costa Rica and Honduras, and by the agents of the Vanderbilt Steamship Co. After losing several desperate battles, and burning the city of Granada, which he was unable to hold, he surrendered with sixteen of his officers at the port of San Juan del Sur, May 1, 1857, to Com. Charles H. Davis, of the U. S. sloop of war St. Mary's. He was taken to Panama, and thence to New Orleans, where he was put under bonds to keep the peace. Escaping surveillance, his indomitable conviction of ultimate success again drew about him a band of followers and he set forth in the steamer Fashion, landing on Nov. 25th, at Punta Arenas, Nicaragua. Here he was attacked, and on Dec. 8th, with 132 men, was compelled to surrender to Com. Paulding, U. S. N. He was taken to New York, but Pres. Buchanan refused to recognize him as a prisoner, on the ground that his arrest on foreign soil was illegal. After his release in January, he went to his home in Nashville, Tenn., and was received with enthusiasm. But unable to give up his dream of conquest, by October he had organized a new force, with which he sailed from Mobile, Ala., for Honduras. This expedition terminated abruptly by shipwreck. The next few months he spent in writing "The War in Nicaragua," which he published in Mobile (1860). In August, 1860, he started from Mobile, with a small force, intending to create a revolution in Honduras. Landing at Rutan on Aug. 15th, he issued a proclamation against the government, captured Truxillo, which he held until Aug. 23d, when the commander of the British man-of-war Icarus, intervened, and Walker was forced to leave. With eighty men he marched southward, but was captured at Tinto river, Sept. 3d, and taken back to Truxillo, where he was tried by court-martial and shot, Sept. 12, 1860. Walker was known as the "gray-eyed man of destiny." A recent writer said of him: "He was as brave a man as ever lived and wasted his life in trying to achieve what was impossible."

COBB, David, physician, soldier and congressman, was born at Attleboro, Bristol co., Mass., Sept. 14, 1748. He was graduated at Harvard College in

Wm. Walker

sufficient, and the party, after enduring great privation, gradually diminished in numbers. They were near the frontier line of the United States, and on being pursued by Mexican forces Walker took refuge on the California side, and deeming it expedient to surrender, gave himself up to the authorities at San Diego, Cal. He was tried at San Francisco on May 15th for violating the neutrality laws, but was acquitted. Upon being released he began preparations for an expedition to Nicaragua (then in a state of civil war). He was encouraged in this project by receiving a grant of land from Francisco Castillon, dictator of the so-called liberal government, set up by the Democratic party of Nicaragua. One of Walker's companions, writing at the time, said that "no secrecy was used in organizing the colonists." Walker showed the grant to the U. S. district attorney for California, Hon. S. Inge, who declared that no law would be violated by their "emigration." Recruits joined him from his native state, where his career was being watched with interest; and Col. Henry L. Kinney, of Philadelphia, at the head of another band of "armed colonists," also made his way to Nicaragua. Sailing from San Francisco in the brig Vesta, Walker landed at Realcejo, with fifty-six followers, June 16, 1855, and was joined by 100 native insurgents. He was not sorry to find the affairs of the Castillon party in a desperate

1766, adopted the medical profession, and settled at Taunton, Mass., where he practiced for many years. In 1774 he was secretary of the Bristol county convention, and in the following year was a delegate to the provincial congress. He served in the revolution in 1777-78 as lieutenant colonel of Henry Jackson's regiment. For several years he was an aid to Gen. Washington, with the rank of colonel, and was promoted to the rank of brevet brigadier-general. He was an intimate friend of Gens. Nathaniel Greene and Henry Knox. After the war he was made judge of the Bristol county court; was elected to the legislature, and served as speaker in 1789-93, and was a representative in congress from Massachusetts from 1793 to 1795. He was president of the state senate in 1801-5; lieutenant-governor of the state in 1809, and a state councillor in 1808, and from 1812 to 1818. In 1812 he was a member of the board of military defenses and chief-justice of the Hancock county court of common pleas. Subsequently he was major-general of the state militia. In 1817 he returned to Taunton, and died there April 17, 1830.

WAGGAMANN, George Augustus, senator, was born in Somerset county, Md., in 1782. His education was received in his native state, but after pursuing the study of law he practiced that profession in New Orleans, La. At the latter place he became largely interested in sugar-planting. He held various local offices at different times. In 1839 he was appointed secretary of state for Louisiana, and filled the position for three years. His affiliations were with the Whig party. He was elected to the U. S. senate, filling the vacancy caused by the resignation of Edward Livingston, and served as a member of that body from Jan. 3, 1832, until March 3, 1835. Sen. Waggamann died in New Orleans, La., March 23, 1843, from a wound he received in a duel.

ATLEE, John Light, physician and surgeon, was born at Lancaster, Pa., Nov. 2, 1799, eldest son of Col. William Pitt and Sarah (Light) Atlee. He was a grandson of Hon. William Augustus Atlee, one of the early judges of the supreme court of Pennsylvania (1777-93), who was the eldest son of William Atlee, of Acton parish, county Middlesex, England, who came to America in 1734. His maternal grandfather, Maj. John Light, was an officer in the revolutionary army. After receiving an academic education he studied medicine with Dr. Samuel Himes, and in 1820 was graduated at the medical department of the University of Pennsylvania. He then took up the practice of his profession in Lancaster, Pa., which became his permanent home. He was active in the organization of the Lancaster City and County Medical Society, of which he was president. He was one of the originators of the State Medical Society in 1848, and served as its president in 1857. He was professor of anatomy in the Franklin and Marshall College from its foundation until 1869. Dr. Atlee revived the operation of ovariotomy in 1843, and was the first successfully to remove both ovaries at one operation (1843). He was also one of the organizers of the American Medical Association in Philadelphia, and was elected its vice-president in 1865, and president in 1882. He was honorary fellow of the American Gynecological Society. He was married, March 12, 1822, to Sarah Howell, eldest daughter of Hon. Walter Franklin, judge of the eastern district, and his wife, Anne Emlen, of Pennsylvania. They had three sons. He died at Lancaster, Pa., Oct. 1, 1885.

ATLEE, Washington Lemuel, physician and surgeon, was born at Lancaster, Lancaster co., Pa., Feb. 22, 1808, son of William Pitt and Sarah (Light) Atlee. When fourteen years of age he was placed in a dry-goods store, but finding a commercial life distasteful he entered the office of his brother, Dr. John Light Atlee, eighteen months later. After studying the classics, natural sciences and medicine,

he matriculated at the Jefferson Medical College, where he was graduated in 1829. Meantime he was also a private pupil in the office of Dr. George McClellan, professor of surgery. He began the practice of medicine at Mount Joy, Pa., and remained there until 1831, when he returned to Lancaster, where he devoted himself to his professional and to research. Here he performed the remarkable experiments on the body of an executed criminal, afterward published in the "American Journal of Medical Science" for 1840. In 1845 he became professor of medical chemistry in the medical department of Pennsylvania College at Philadelphia, and occupied this chair until 1853, when the increase of his private practice compelled his resignation. In 1874 he was president of the Philadelphia County Medical Association, and in 1875 of the state association. He was also at one time vice-president of the American Medical Association. Surgery owes much to Dr. Atlee's advocacy of the operation of ovariotomy, then held to be so dangerous that its use was almost universally condemned. Through the skillful performance of this operation more than 300 times, he placed ovariotomy among the legitimate feats of surgery. He also introduced a method of removing uterine fibroid tumors which has now become a well-established surgical procedure. His prize-essay, "The Surgical Treatment of Certain Fibrous Tumors of the Uterus, Heretofore Considered Beyond the Resources of Art," was published in 1853. He contributed numerous scientific papers to the "American Journal of Science and Arts," and to various medical journals, beside those published in the transactions of medical societies. Among his works are: "Diagnosis of Ovarian Tumors, with Special Reference to the Operation of Ovariotomy" (1873), and the following addresses and papers: "A Retrospect of the Struggles and Triumphs of Ovariotomy," delivered Feb. 1, 1875; "Old Physic and Young Physic," delivered in 1875, as president of the Pennsylvania Medical Society; "Treatment of Fibroid Tumors," read before the international medical congress, in 1876, and "Sarcoma of the Ovaries," read before the American Gynecological Society in 1877. Dr. Atlee was married, in 1829, to Ann Eliza Hoff, of Lancaster, Pa. He died in Philadelphia, Sept. 6, 1878.

ROWLAND, Henry Augustus, physicist, was born at Honesdale, Pa., Nov. 27, 1818, son of Rev. Henry Augustus and Harriette (Heyer) Rowland. His forefathers were among the earliest settlers of Fairfield, Conn.; and three generations of Congregational clergymen were his immediate paternal ancestors. His father, who was a Presbyterian minister and an author of several works on religious topics, had a great love for all scientific pursuits, though he gave them up for the ministry. His mother was a descendant of several old Knickerbocker families of Manhattan Island, and the daughter of a wealthy New York merchant. Between his eleventh and fifteenth years the son conducted experiments in electricity and magnetism in his father's cellar, and while studying at the Sheffield Scientific School he built the first dynamo ever run on a continuous circuit. He was graduated as a civil engineer at the Rensselaer Polytechnic Institute, Troy, N. Y., in 1839, engaged for a short time as a railroad surveyor; taught in the Wooster University, Ohio; and during 1872 returned to the Rensselaer Institute as an instructor in physics, only to find

Dr. Henry Augustus Atlee

years later to the rank of assistant professor in that department. During 1875 he pursued further physical studies under Helmholtz in Berlin, and examined several large laboratories throughout Europe. Returning to America, in 1876, he accepted the chair of physics at Johns Hopkins University, Baltimore, conducting the famous researches of that institution until his death. After four years of service he received from that university the honorary degree of Ph.D. In 1881 he was a member of the Paris electrical congress, served on the jury of the electrical exhibition, and was made chevalier of the French Legion of Honor. Two years later he attended a gathering of the American Association for the Advancement of Science, at Minneapolis, where he delivered an important address entitled "A Plea for Pure Science," and presided over the section on physics. In 1881 he was awarded the Rumford medal for researches in light and heat; in 1890 he secured the Draper medal for researches in spectroscopy, and in 1896, at the centennial of the Institute of France, of which he was a corresponding member, he was nominated an officer of the Legion of Honor. His original experiments in physical research cover an extensive field. At Berlin he proved that a moving charge of static electricity possessed the same magnetic effect as a current, and ten years later demonstrated the fact with special instruments.

He invented the Siemens drum-head armature; established the accurate value of an ohm, the unit of electrical resistance, and computed the accepted value of the mechanical equivalent of heat. The field of chemistry and of astronomy he greatly benefited by making it possible to procure superior photographs of the solar spectrum without the aid of lenses, and this he accomplished by the almost incredible feat of ruling 48,000 lines to the inch, on a concave mirror. An exhibition of these "concave gratings," together with a map of the spectrum, received a grand prize and gold medal at

the Paris exposition of 1890. A rapid system of telegraphy claimed his attention during the last eight years of his life, and his devices in this work were considered by experts as the most important feature of the United States electrical exhibit at the Paris exposition of 1900. He was retained as an expert by the Niagara Falls Co., for the purpose of making a comprehensive report on the utilization of the power of Niagara falls. Being compelled to bring suit for his fee, the trial brought out in strong relief some of the striking traits of his character. Asked to explain the difference between his status and that of an English engineer concerned in the case, he said that the Englishman was one of some thousands, while he was one of three in America. Again, asked to name the half-dozen greatest living scientists, he mentioned Helmholtz, Kelvin, Rayleigh, and himself, declaring that there were no others in that rank. This was egotism or vanity. He was under oath and he told the truth as he knew it. Dr. Rowland was identified with nearly all the scientific societies of the world, and the degree of LL.D. was conferred upon him by Yale in 1895 and by Princeton in 1896. He was the author of monographs on "Magnetic Permeability" (1873); "The Magnetic Permeability and Maximum Magnetization of Nickel and Cobalt" (1874); "Studies on Magnetic Distribution" (1875); "Magnetic Effect of Electric Conduction" (1876); "Research on the

Absolute Unit of Electrical Resistance" (1878); "The Mechanical Equivalent of Heat" (1880); "Concave Gratings for Optical Purposes" (1883); "The Relative Wave-lengths of the Lines of the Solar Spectrum" (1886), and an article on "Screws" in the "Encyclopaedia Britannica." Dr. Rowland was married, June 4, 1890, to Henrietta Harrison, and had three children, Harriette, Henry and Davidge Augustus. He died in Baltimore, Md., April 16, 1901.

CUSHING, Frank Hamilton, archaeologist and ethnologist, was born at Northeast, Erie Co., Pa., July 22, 1857, son of Thomas and Sarah (Crittenden) Cushing. In 1870 his father removed with the family to Medina, N. Y., where young Cushing spent his early life and developed the passion of his life, a love for archaeological and antiquarian pursuits, the localities in which his youth were passed being rich in Indian remains. At the age of fifteen he made a discovery that attracted to him the attention of the entire ethnological world. He revealed the process of making arrow-heads, which consisted in the pressure of bone upon the flake of stone in the rough. The manner of its discovery illustrates the method by which this youth became finally one of the most famous archaeologists of the day. It was to become, for the time being, an Indian, an aboriginal man, to work with primitive implements, to experiment with original materials." In 1875 he went to Cornell University, where he spent most of his time in assisting in the preparation of an aboriginal collection for the Centennial exhibition at Philadelphia, of which he was made the curator. His peculiar abilities had attracted the attention of Prof. Baird, of the Smithsonian Institution, who called him to the curatorship of the ethnological department of the National Museum in Washington. In 1879 he was selected by Maj. Powell to accompany him as assistant ethnologist in an exploring expedition to New Mexico, during which two months were spent at the Pueblo of Zuni. Discerning the unbounded wealth of material here available to a patient investigator, Mr. Cushing requested permission to remain. He adopted the costume of the Zunis, and for three years lived the life of an Indian, studying their habits, history, language and acquiring an intimate knowledge of these interesting people. During the second year he was formally adopted as one of the tribe and initiated into the sacred esoteric society, known as the "Priesthood of the Bow." In 1882 he conducted a party of Zuni head men to the Atlantic coast for the purpose of securing water from the "Ocean of Sunrise." It was a religious duty and ceremony with them, but this event, so strange and romantic, attracted universal attention and revived an interest in the Zunis which has never waned. The head-men were feted and entertained throughout the East, and when four of them returned to their Pueblo with the sacred water, two remained behind at Washington for the purpose of assisting their white chief in the task of writing his monograph on "Zuni Fetiches." Mr. Cushing returned to Zuni in September, 1882, and remained until the spring of 1884, when failing health compelled his return to the East. He brought with him, however, three of his friends, who aided in the preparation of a dictionary and grammar of their language and in the translation of myths and hero legends, songs and rituals. In 1886, while passing the autumn at Manchester-by-the-Sea, Mass., with three priestly members of the Zuni tribe, he finished the translation and recording of their myths and legends. He was then the guest of Mrs. Mary Hemenway, a wealthy and philanthropic lady. Her interest enlisted by his accounts of the Zuni traditions as to lost peoples and buried cities in the Southwest, she furnished the funds for the Hemenway Southwestern

archæological expedition, and for two years Mr. Cushing was engaged in exploration in southern Arizona. The results were far beyond the expectations of the promoters and even of the most sanguine scientists. Guided by the traditional accounts of his Zuni companions, Mr. Cushing identified and exhumed the long-buried cities of the ancient Pueblo people, known to their descendants as the "Lost Others," who had strayed away in the remote past and disappeared from view. He made maps and plans, wrote a thousand pages of notes and collected more than a carload of priceless relics. Notices of the work accomplished by the expedition were printed in con-temporary papers and a paper on the subject was contributed by the explorer to a volume of the "Proceedings" of the Congress des Americanistes (Berlin). An exploration was then undertaken in the Zuni country which resulted in the discovery of the remains of the "Seven Cities of Chobola," so often mentioned in the records and traditions of early Spanish discoveries. Here, too, a magnificent collection was gathered, but the explorer was unable to complete the work. His arduous labor and the continuous mental and physical strain of these long years of exploration, added to the terrible tests he was compelled to undergo when initiated into the secret Order of the Bow, had united to break him down completely, and for four years thereafter he was incapable for labor of any kind, but through his own efforts and those of Mrs. Heenway and Mrs. Hearst, a bill was introduced into the U. S. Senate by Sen. Hoar, making the region of the Casa Grande a national reservation and providing for the restoration of that extraordinary ruin. Mr. Cushing's first literary labor, after in a measure recovering from his illness, was the writing of that mystical monograph entitled the "Commentaries of a Zuni Familiar," published in connection with Mrs. Edna Dean Proctor's poem "The Song of the Ancient People." In 1893 he represented the bureau of ethnology, with which he has been for years connected, at the World's Columbian exposition, and as soon as his health permitted continued his explorations. In 1896 he visited Florida, where he discovered the remains of a lake dwelling and shell-using people among the Keys. This, his last contribution to American archeology, is one of the most important, as it has brought to light numerous objects of a hitherto uninvestigated, if not unknown, people. Mr. Cushing's literary contributions, mostly in the shape of pamphlets and reports of the bureau of ethnology, are: "Antiquities of Orleans County," (1874); "Zuni Fetiches" (1881); "Myths of Creation" (1882); "Relationship Between Zuni Sociologic and Mythic Systems" (1882); "The Nation of the Willows" (1882); "Adventures in Zuni" (1883); "Zuni Breadstuffs" (1884); "Studies of Ancient Pueblo Ceramic Art, as Illustrative of Zuni Culture-Growth" (1885); "Manual Concepts" (1892); "Primitive Copper Working" (1894); "The Germ of Shore-Land Pottery" (1894); "The Arrow" (1895); "Outlines of Zuni Creation Myths" (1896); "Scarred Skulls From Florida" (1897); "Need of Studying the Indian in Order to Teach Him" (1897); "Primitive Motherhood" (1897); "Pepper-Hearst Expedition" (preliminary report 1897), and "Zuni Folk-Tales" (1901). On July 10, 1882, he was married to Emily Tennison, daughter of John Whitehead Magill, of Washington, D. C. Mr. Cushing died April 10, 1900.

FISH, Nicholas, diplomat, was born in New York city, Feb. 19, 1846, son of Hamilton and Julia (Keane) Fish. His earliest ancestor in America, Jonathan Fish, was born in England in 1610, and early emigrated to America, settling in Lynn, Mass., and afterward removing to Sandwich, and finally to Newtown, Long Island, where he was a magistrate. From him the line of descent runs through his son,

Nathan; his son, Jonathan, his son, Samuel, who was married to Agnes Berden, their son Jonathan, who was married to Elizabeth Sackett, and their son, Nicholas, and his wife, Elizabeth Stuyvesant, who were Mr. Fish's grandparents. His father was secretary of state in Pres. Grant's cabinet. The son was graduated at Columbia College in 1867, and at Harvard Law School in 1869. He was admitted to the bar in the latter year, and engaged in the practice of law in his native city. In 1871 he was appointed assistant secretary of legation at Berlin, Germany, and in 1874 was promoted to the post of secretary of that embassy. He was chargé d'affaires to Switzerland, in 1877-81, when he resigned, and in 1882 he was appointed minister resident to Belgium, where he remained in that capacity until 1886. In the following year Mr. Fish engaged in banking, as a partner in the firm of Harriman & Co. He is a member of the Metropolitan, University, Tuwedo, Riding, Players', Lawyers', St. Anthony, University Glee, and University Athletic clubs, the Society of the Cincinnati; the St. Nicholas and New York Historical societies, and the Century Association. He was married at Newport, R. I., to Clarence S. Byce, and has a daughter living. His only son, Hamilton, was the first soldier killed in the campaign against Santiago, in the late war with Spain. Volunteering as a private, he was promoted to sergeant in the Rough Rider's regiment, under Col. Theodore Roosevelt; he fell in the first charge at Siboney.

SIMONS, Thomas Young, soldier and lawyer, was born in Charleston, S. C., Oct. 1, 1828. He

received his early education in his native city, and was graduated at Yale College in 1847. He studied law and began to practice in his native city in 1849. From 1851 to 1860 he was a member of the state legislature, and in 1860 was a presidential elector on the Democratic ticket. He advanced to a position of leadership in the pro-slavery party, and in 1860 was one of the members of the convention which passed the ordinance of secession. During the civil war he served as captain in the 27th South Carolina regiment, and later as judge-advocate. In 1865 he became editor of the "Courier," published at Charleston, and filled that position until 1873. He was a delegate to the national Democratic conventions of 1868 and 1872; member of the executive committee of the Democratic party from 1872 until 1876, and an active member of the taxpayers' conventions of 1871 and 1874. His later years were devoted to efforts to secure local self-government and the creation of a Union Reform party in his native state. He died in Charleston, S. C., April 30, 1878.

HALL, Asaph, astronomer, was born at Goshen, Litchfield co., Conn., Oct. 15, 1829, son of Asaph and Hannah C. (Palmer) Hall. His grandfather was a revolutionary officer, and one of the first settlers of that place. The family was originally wealthy, but through business failures had become poor. The father died when Asaph was only thirteen years old, and the oldest in a family of six. Their farm was mortgaged heavily, and Asaph and his mother attempted by three years of hard work to free it from debt, but failed to do so. Asaph then apprenticed himself to a local carpenter for three years, and at the end of that time worked for himself as a journeyman. He did not neglect to study mathematics at the New York State

Academy. After a year and a half (1854-55) at Central College, McGrawville, N. Y., he went to Wisconsin, where he remained for several years. He then studied at the University of Michigan for a single term, and after a year of teaching at Sader-ville, O., entered Harvard as assistant in the college observatory at a salary of three dollars a week. He occupied his spare time in study, and added to his income by outside work. In 1862 he was appointed assistant in the naval observatory at Washington, and in the following year was appointed professor of mathematics, with the relative rank of captain. He remained in the government service until Oct. 15, 1891. During his stay at the observatory he was sent out on several expeditions for the government. In 1869 he went to Behring straits, in 1870 to Sicily, and to Colorado in 1878, to observe eclipses of the sun. He was at Vladivostock, Siberia, in 1874, during the transit of Venus, and in 1882 he took a party to San Antonio, Tex., at the time of the later transit. In 1896 he was elected to the chair of astronomy at Harvard, and still (1901) occupies this position. He has made many astronomical discoveries, the chief of which was his discovery of the two moons of Mars on Aug. 11th and 17, 1877. In 1879 the Royal Astronomical Society awarded him its gold medal for his discoveries; in 1878 he received the Lalande prize from Paris; in 1895 the Arago medal from the French Academy of Sciences, and he was made an honorary member of the Royal Scientific societies of England and Russia, and of the French Academy. Since 1875 he has been a member of the National Academy of Sciences, and is its vice-president for the term ending 1903. Hamilton conferred the degree of Ph. D. upon him in 1878; Yale, that of LL. D. in 1879, and Harvard, of LL. D. in 1886. Dr. Hall was married, at Elkhorn, Wis., March 3, 1856, to Angeline, daughter of Theophilus Stickney, of Rodman, N. Y. Four sons were born to them, of whom Asaph is professor of astronomy in Michigan University.

DELAFIELD, John, banker, was born in New York city, Jan. 22, 1786, eldest son of John and Ann (Hallett) Delafield.

His maternal grandfather, Hon. Joseph Hallett, was one of the Sons of Liberty, a member of the revolutionary committee of safety, and of the first three New York provincial congresses. John Delafield, Sr., the founder of the well known New York family of that name, was born at Aylesbury, Bucks, England, March 16, 1748, hereditary count of the Holy Roman Empire and the oldest lineal representative of the Delafields, who for centuries had been large landed proprietors in the shires of Buckingham and Oxford. In 1783 he emigrated to this country, taking passage upon the *Vigilante*. This ship carried letters of marque, and captured a French vessel on the way over. Young Delafield volunteered in the fight, and received £100 as his share of the prize money. Upon reaching New York he was welcomed as the bearer of a manuscript copy of the treaty of peace, which had been entrusted to him by an officer in the British service at the moment of sailing. The official copy had been forwarded, but the vessel bearing it did not arrive for several days. Mr. Delafield became one of the merchant princes of that period, retiring in 1798 with a large fortune. He was a founder and director of the Mutual Insurance Co., established in 1787, the first company of the kind organized after the revolution. In 1792 he became

a director of the New York branch of the U. S. Bank, and in 1796 he was one of forty gentlemen who subscribed \$10,000 each and founded the United Insurance Co., of which he was president for many years. He was at the head of private underwriters, and during the period when American sea traffic suffered from British and French aggression, sacrificed his entire capital to make good the losses thus incurred, though not legally bound to do so. He also mortgaged his country mansion, "Sunswick," opposite Blackwell's island, where Ravenswood, Long Island, now stands. This was then one of the handsomest and most spacious private houses near New York city. Mr. Delafield died on July 3, 1824. His son, John, was graduated at Columbia College in 1802, and began his commercial life as a confidential clerk and supercargo. Subsequently he engaged in the shipping business. In 1808, while making a voyage on one of his own vessels, a tempest drove him into the harbor of Corunna, Spain, where he witnessed the storming of that city by the French. On the night of Jan. 17th the enemy opened fire on the shipping, and he was compelled to put to sea, taking with him a family of Spanish refugees, beside his crew. Though greatly overburdened, and not provisioned for so many persons, the ship was brought safely to London. There he established himself as a banker. During the war of 1812 he was held as a prisoner for a time, but the influence of his English relatives obtained for him the privilege of traveling within fifteen miles around Uxbridge, his country place of residence, and to the city of London, where he continued in business. A financial crisis suddenly swept away his fortune, and it was at this period that Washington Irving dedicated to him "The Wife," published in the "Sketchbook." In 1820 Mr. Delafield returned to New York city, where he was cashier and president of the Phoenix Banking Co., until 1828, when he resigned to become president of the New York Banking Co. The University of New York, for which he procured large subscriptions, was founded largely through his efforts, and he was also instrumental in reviving the New York Historical Society. He was one of the founders of the Musical Fund Society, and the first president of the New York Philharmonic Society. His leisure was devoted to the improvement of his country seat at Hellgate, which became a marvel of horticultural beauty. Western repudiations obliged the New York Banking Co. to suspend, and again Mr. Delafield found himself impoverished; he was enabled, however, to give the rest of his life to his favorite pursuit, agriculture. In 1842 he removed to his place, "Oaklands," near Geneva, N. Y., and soon made it known throughout the state as a model farm. The importance of making a chemical analysis of the soil and of scientific drainage were early advocated by him. For several years he was president of the New York State Agricultural Society, and he was the first presiding officer elected by the State Agricultural College. He was married, in 1821, to Harriet W., daughter of Benjamin Tallmadge. They had two sons and two daughters. He died at Oaklands, near Geneva, N. Y., Oct. 22, 1853.

DELAFIELD, Joseph, lawyer, soldier and scientist, was born in New York city, Aug. 22, 1790, second son of John and Ann (Hallett) Delafield. He was graduated at Yale in 1808, and after acquiring a legal education was admitted to practice in 1811. In 1810 he was appointed lieutenant in the 5th regiment of New York state militia, and in 1812 he became captain of drafted militia. In the latter year he received his commission in the U. S. army as captain in Hawkins' regiment, and on April 15, 1814, was promoted to the rank of major of the 46th infantry. At the close of the war he resigned from the army. When the northern boundary of the

United States was set off he was appointed U. S. agent, and had charge of the parties in the field from 1821 until 1828. The fidelity with which Maj. Delafield discharged this duty was formally acknowledged by the president and by congress. It was during his period of service in the North that he began to form the collection of minerals that was for many years considered one of the best in this country owned by a private individual. Maj. Delafield belonged to many scientific associations in Europe and in this country. For fifty-two years he was a member of the New York Lyceum of Natural History, and was its president from 1827 until 1866, when he declined a re-election. His country seat, "Fieldston," was situated on the Hudson at Youkers, and in 18 0 he built a lime-kiln there, which was so constructed that it would burn continuously. This was a novelty in this country, and the works, which yielded large profits for several years, served as a model for others. He was married, in 18 , to Julia, daughter of Judge Maturin Livingston, of Staatsburg, N. Y. Her maternal grandfather was Gen. Morgan Lewis, son of Francis Lewis, signer of the Declaration of Independence. Maj. Delafield died in New York city, Feb. 12, 1875. His son, Maturin Livingston Delafield, merchant, was born in New York city in 1836. He was graduated at Columbia College in 1856, and four years later received the degree of A.M. Mr. Delafield is prominent in social life, and is a member of the Metropolitan and Union clubs, Sons of the Revolution, the Scientific Alliance and other scientific and historical societies. He was married, in 1868, to Mary Coleman, daughter of Eugene Augustus Livingston. Their son, Maturin Livingston, Jr., is associated with his father in business.

DELAFIELD, Henry, merchant, was born at Sunswick, now a part of Ravenswood, Long Island, July 19, 1792, son of John and Ann (Hallett) Delafield. He was prepared to enter Yale College, but chose to begin his business career and gave up the collegiate course. After several years of experience in subordinate positions, he founded with his twin brother, William, the firm of H. & W. Delafield, and conducted an extensive foreign trade with England, India, China, South America and the West Indies. At one time they owned the largest merchantman sailing from the port of New York under the American flag. The great fire of 1835 so reduced their large fortune that they had practically to begin business life again. They were again successful, and regained their former wealth. Both brothers served with Capt. Swartout's "Iron Grays" in the war of 1812. When Faustin Soulouque was established as emperor of Hayti, Henry Delafield was appointed consul for that country in New York city, which office he retained during the emperor's administration, and through a part of Pres. Jefferson's. William Delafield died in 1853, and a few years after Henry admitted Tallmadge Delafield, a son of his brother John, to the firm, which was subsequently known as Henry Delafield & Co. In 1857 Mr. Delafield retired from shipping and foreign business, retaining only certain banking and trust interests, which were later transferred to Maturin Livingston Delafield, son of his brother Joseph. The nephews continued the business successfully. Henry Delafield was married, in 1865, to Mary Parish, daughter of Judge L. Monson, of Delaware county, N. Y., and they had one daughter, who died at the age of seventeen. Mr. Delafield's death occurred in New York city, Feb. 15, 1875. Two older brothers, Maj. Joseph and Dr. Edward Delafield had died respectively on Feb. 12 and 13, 1875, and the almost simultaneous death of the three brothers and their joint funeral from Trinity Church excited much interest.

DELAFIELD, Richard, soldier, was born in New York city, Sept. 1, 1798, son of John and Ann (Hallett) Delafield. He was graduated at the U. S. Military Academy in 1818, at the head of his class, and after being promoted second lieutenant in the corps of engineers, was attached as astronomical and topographical draughtsman to the American boundary commission under the treaty of Ghent. In 1820 he became first lieutenant, and in 1828, captain. In 1819-24 he served as assistant engineer in the construction of Forts Monroe and Calhoun, and was next assigned to the Mississippi river, where he took charge of the defenses of Plaquemine bend, the surveys of the Delta, and the general supervision of improvements. Subsequently he was superintending engineer successively in the construction of the Cumberland road; in building Fort Delaware; in repairing Fort Mifflin, and in the improvement of the Delaware river harbors and breakwater. In 1838 he was promoted to major, and was appointed superintendent of the U. S. Military Academy. His administrative West Point greatly advanced the reputation of the school, and ranks in value with that of Col. Thayer. It has been officially said that "a history of the superintendencies of Thayer and Delafield would leave nothing of moment to record concerning the origin, early struggles and often precarious existence of the academy, and finally its slow, steady and triumphant progress." In 1845-56 Maj. Delafield was superintending engineer of the New York harbor defenses; of Hudson river improvements, and of the New York light house district; chief engineer of the department of Texas, member of the boards for improvement of rivers and harbors; and for the armament of fortifications, and president of the board for revision of the curriculum of studies at the U. S. Military Academy. In 1855 he was senior member of a commission sent to the Crimea during the war there, to report on modern methods of warfare. Maj. Alfred Mordcau and Capt. George B. McClellan were his associates, and each member submitted a separate report, that of Maj. Delafield was a massive quarto volume, illustrated, containing a comprehensive treatise on the art of war in Europe in 1854-56. This work is considered a masterpiece of its kind. In 1856 he was again appointed superintendent of the U. S. Military Academy, and held this position until April, 1861, when, at his own request, he was relieved. He became lieutenant-colonel in 1861, and colonel in 1863. Upon his retirement from the academy he was placed on Gov. Morgan's staff, to assist in organizing and equipping the forces of New York state for the field and in supplying ordnance stores for the Atlantic and Lake defenses. During the same time he superintended the construction of New York harbor fortifications, and served on several important boards and commissions. In April, 1861, he was appointed chief of U. S. engineers, with the rank of brigadier-general, and to keep his residence in Washington, D. C. He was promoted major general in the U. S. army in May, 1865, for faithful, meritorious and distinguished services in the engineer department during the civil war, and Aug. 8, 1866, he was retired from active service. During the rest of his life the winters were spent in Washington and the summers at his country residence in New York city. He was married, in 1833, to Harriet Baldwin, daughter of Gen. H. A.

Moman Covington, Bowling Green, Ky. His wife survived him, with five daughters and one son. Gen. DeLafield died in Washington, D. C., Nov. 5, 1873.

MARKOE, Thomas Masters, surgeon, was born in Philadelphia, Pa., Sept. 15, 1819, son of Francis and Sarah (Caldwell) Markoe. His father, a graduate of Princeton College (1795), was a merchant. His mother was a daughter of Samuel and Martha (Rownd) Caldwell, of Philadelphia. He was educated at Pittsfield, Mass., and at Princeton College, where he was graduated in the class of 1836. Then studying medicine at the College of Physicians and Surgeons, New York, he received the degree of M.D. there in 1841. His success as a practitioner began at an early period of his professional career. He was associated with Dr. Edward DeLafield from 1849 to 1865, and when Dr. DeLafield retired, a partnership with his son, Dr. Francis DeLafield, followed. He was for some years professor of anatomy at the Castleton Medical College, Vermont, until called to the New York University, and at the latter institution he was for two years (1852-54) professor of pathological anatomy. When, in 1860, the College of Physicians and Surgeons assumed formal relations with the corporation of Columbia College as its medical department, Dr. Markoe accepted the adjunct professorship of surgery, which he held until 1871. During

the civil war he was appointed by Gov. Morgan a member of the special corps of volunteer surgeons, being stationed at Fortress Monroe. In 1862 he was one of the board of examiners of contract physicians and surgeons, and in 1863 was visiting surgeon to the New York soldiers' depot at 50 Howard street. In 1864 he was ordered to Fredericksburg, and subsequently to Belle plain. He became a trustee of the Astor Library in 1863, remaining as one of its directors until its absorption into the consolidated library plan. From 1891-95 he was president of the Astor Library. He was professor of

the principles and practice of surgery at the College of Physicians and Surgeons (1871-79); professor of the principles of surgery (1879-88); and emeritus professor from 1888 until his death. At different times he was attending surgeon at the New York, the Roosevelt, Bellevue, and Mt. Sinai hospitals and consulting surgeon to the Woman's Hospital of the State of New York, and to the Orthopedic, St. Mary's and Vassar hospitals, and consulting physician to the Nursery and Child's Hospital; a member of the consulting staff of the New York Dispensary, and physician to the Northern Dispensary. He was a member of the New York County Medical Society; New York Medical and Surgical Society; Society for the Relief of Widows and Orphans of Medical Men; of the New York Pathological Society; New York Academy of Medicine, and of the Medical Journal Association. His chief literary contribution was a "Treatise on Diseases of the Bones" (1872). He had for years one of the largest family practices in New York. Dr. Markoe was married, in 1850, to Charlotte A. How, of New York, and left four children, two daughters and two sons, Dr. Francis H. Markoe (surgeon), a graduate of Princeton (1876), and Dr. James W. Markoe (obstetrician). He died at East Hampton, Long Island, Aug. 26, 1901.

MARTIN, Thomas S., senator, was born in Scottsville, Albemarle co., Va., July 29, 1847, son of John Samuel and Martha (Staples) Martin, and

grandson of Reuben Martin, a native farmer of Virginia. His father was a merchant and manufacturer of Scottsville, where the son attended school until March 1, 1864, when he entered the Virginia Military Institute, and remained with the corps of cadets, whether pursuing their studies in barracks or serving their state in the field, until the downfall of the Confederacy in April, 1865. In October of that year he entered the University of Virginia, but after attending two sessions was called home by the death of his father. Thus becoming the head of a large family, he devoted himself faithfully to his responsibilities. He undertook the study of law without instruction, and such was his application and diligence that when he appeared at the bar his mind was well and accurately equipped in legal knowledge. Although of a quiet and retiring disposition he soon obtained a large and lucrative practice. In 1886 he was appointed visitor to the Miller Manual Labor School of Albemarle, and in 1891 was appointed visitor to the University of Virginia, becoming a member of its executive committee. In 1886 he was elected a member of the state central Democratic committee, and was appointed by its chairman a member of the executive committee. Being repeatedly urged to accept a nomination to the U. S. senate, he finally consented, and was elected in 1893 by a large majority over some of Virginia's most distinguished statesmen. His senatorial term commenced March 4, 1895, and terminated March 3, 1901. He rendered distinguished services as advisory counsel to the committee for the settlement of the state debt. Sen. Martin is a forcible speaker, a ready debater and a possessor of that power which convinces his hearers and holds their friendship. He is broad and progressive, affable and good-humored, liberal and charitable. On Oct. 10, 1894, he was married to Lucy Chambliss Day, of Smithfield, Va.

MAXCY, Jonathan, first president of South Carolina College (1804-20) was born at Attleboro Bristol co., Mass., Sept. 2, 1768. He was graduated in 1787 at Brown University, of which he was afterward president; entered the Baptist ministry; was president of Union College for two years when the state of his health made residence in a warmer climate necessary, and he accepted an election (April 28, 1804) to the presidency of South Carolina College. The details of his life previous to his acceptance of this last honor are given in Vol. VIII., p. 21. The institution to which he was last called practically owed its origin to an act of the legislature passed in 1785, establishing colleges at Winnsboro, Charleston and Ninety-six. None of these proving successful Gov. Drayton, in 1801, proposed the erection at the new capital, Columbia, of one college for the whole state, and the legislature made an appropriation of \$50,000 for a college building and \$6,000 yearly for the salaries of instructors. A site for the college was selected in 1802, the building now called DeSaussure College was erected, and on Jan. 10, 1805, Pres. Maxcy and one associate, Enoch Hanford, professor of languages, opened the institution. The first person to matriculate was William Harper, subsequently chancellor of Missouri and of South Carolina, and author of the ordinance of nullification; during the first year twenty-nine students were enrolled, and one was graduated, and at the first commencement, in December, 1807, four young men received degrees. In 1814 there were forty-five names on the register, and this number was not exceeded until 1841, when fifty students were enrolled. Established in the central part of the state, the college did much to remove the sectional jealousy between the seaboard and the inland sections that had long existed, and as a state institution committed to no religious body but drawing from all

Thomas M. Markoe

denominations it did much to weaken sectarian feeling which originally was very bitter. It also exerted a powerful influence on the politics of South Carolina, and, John C. Calhoun excepted, every politician of note in the state has been for a time connected with it. In his "History of Higher Education in South Carolina," Meriwether says: "Pres. Maxey was not a man of great scholarship, but had executive abilities of no mean order, and was successful in building up the young institution. He was in conflict at one time with the board of trustees, and subsequently a resolution of censure was passed on him. But he defended himself with so much skill that the whole matter was dropped. He was progressive and energetic, and enlarged the whole course of study of the college. He made recommendation for the study of chemistry, and asked for an appropriation to this effect. He advised the addition of a law course, but the plan was not executed until the close of the civil war." Dr. Maxey died at his post of duty, June 4, 1820, having presided at a faculty meeting four days previous. A monument to his memory was erected on the campus by the Clariosophic Society.

COOPER, Thomas, scientist and author, second president of South Carolina College (1820-33), was born in London, England, Oct. 22, 1759. He was educated at Oxford, became proficient in chemistry, and acquired a knowledge of law and of medicine. Admitted to the bar he traveled a circuit for a few years. He also took an active part in politics, and joined a Democratic club in Manchester, of which James Watt, the inventor, was a member. The publication of a pamphlet in reply to Burke's "Reflections on the Revolution in France" brought him under a threat of prosecution, and with Watt he took up his residence in Paris, where he was on intimate terms with the leaders of the revolution, and was a candidate for a seat in the convention, opposing the Duke of Orleans. In 1795 Dr. Cooper came to the United States and settled at Northumberland, Pa., where his father-in-law, Joseph Priestly, the philosopher and scientist, was living. Espousing the cause of Jeffersonian Democracy, he in October, 1799, made an attack upon the administration of John Adams in the columns of the Reading "Weekly Advertiser." For this he was tried under the alien and sedition acts, in 1800, was fined \$400, and was imprisoned for six months, but in 1825 he petitioned for a restitution of the fine, on the ground that the acts were unconstitutional, and a few years before his death he received the amount with interest. After his release Cooper was appointed land commissioner, and in 1806 one of the judges of the common pleas district, but in 1811 the senate impeached him for overbearing conduct, and Gov. Snyder removed him from office. After holding the professorship of chemistry in Dickinson College, and of chemistry and mineralogy in the University of Pennsylvania, he was elected first professor in the University of Virginia, Oct. 7, 1817, his chair being that of chemistry, to which was added provisionally the chair of law. On March 29, 1819, he was confirmed university professor of chemistry, mineralogy, natural philosophy, and also of law. The Presbyterians and others in Virginia opposed the appointment so strongly on the ground of his heterodoxy, as shown in his own writings and by his editing those of Priestly, that he offered his resignation, which was finally accepted in 1820, and he then removed to South Carolina. The trustees of South Carolina College had in December, 1819, elected him professor of chemistry for one year, and at the end of that period he was chosen president *pro tem*. On Dec. 1, 1821, by a majority of one, he was elected president. His opinions on all subjects were utilitarian and independent; on many points he was

in advance of his age. In 1823 he was asked to teach metaphysics, but underrating it, suggested political economy instead, the study of which had been proposed by the trustees as early as 1815. Oursory he considered to be "little else than the art of cheating the understanding of a gaping populace." In the chair of chemistry he was at his best as an instructor, teaching the science in a popular way, and arousing enthusiasm for it in those to whom he lectured. He urged the trustees to make tuition free, and becoming ardently interested in advancing education in the state at large, he outlined a liberal course in his "Manual of Political Economy" (1833), comprising free schools, a grammar school at every court-house and in every township, and at least two colleges, all leading up to a finely endowed university. Cooper was a vigorous defender of nullification, and was the academic representative and supporter of Calhoun in his advocacy of free trade. His attitude on these questions was obnoxious to many, and by his attitude on religious subjects he antagonized more. In his lectures on geology he attacked certain theories of the inspiration of the Scriptures, and in return was charged with advancing opinions injurious to the interests of the college and with interfering with the religious opinions of the students. In December, 1832, he was tried before a committee of the board of trustees, and after making an able defense was acquitted. The agitation increased, and a year later Cooper resigned the presidency, but held his professorship, and in 1834 was given the degree of LL. D. by the college. His opponents now redoubled their efforts, and on Dec. 3, 1834, he withdrew from the institution which he had brought to the brink of ruin. From that time until his death he was occupied in editing and publishing the statutes of the state by appointment of the legislature. Five volumes were published, and it has been said that his influence upon legislation in the state resembles that of Jefferson in Virginia. Much that he wrote appeared in the "Southern Quarterly" and other reviews, and in pamphlet form. His most important works are: "Letters on the Slave Trade" (London, 1787); "Tracts: Ethical, Theological and Political" (1799); "Information Respecting America" (London, 1791); political essays contributed in 1800 to the Northumberland, Pa., "Gazette," which he conducted for a short time; "Account of the Trial of Thomas Cooper, of Northumberland" (1800); "Bankrupt Law of America Compared With That of England" (1801); a translation of the "Institutes of Justinian" (1812); "Tracts on Medical Jurisprudence" (1819); "Elements of Political Economy" (1819); "Authenticity of the Pentateuch" and "Connection Between Geology and the Pentateuch." He also edited three out of five volumes constituting the "Emporium of Arts and Sciences" (Philadelphia, 1812-14), and Thomson's "System of Chemistry" (4 vols., 1818). Dr. Cooper died at Columbia, S. C., May 11, 1840.

NOTT, Henry Junius, chairman of the faculty of South Carolina College (1835) was born on Paquot river, Union district, S. C., Nov. 4, 1797, son of Abraham Nott, a native of S. C. His father and a relative of Elliptical Nott, who also graduated at Yale College, removed to South Carolina.

where he attained eminence as a jurist. The son was graduated at South Carolina College in 1811, and was admitted to the bar in 1818. Success attended him in the practice of his profession; but the law was not wholly to his taste, and in 1821 he sailed for Europe, and devoted himself to various studies, leaning on literature, spending most of the time in France and Holland. Upon his return, in 1824, he was elected professor of elements of criticism, logic and philosophy of languages in South Carolina College, and entered upon his duties in January, 1825. He was retained when the college was reformed, and in 1835-36 was chairman of the faculty. His resignation, in January, 1836, was received with profound regret by the trustees and in the regret his colleagues of the faculty shared. Dr. La Bourde, the historian of the college, says of him: "His mind was acute and his perceptions clear and discriminating. His natural genius and his training were precisely such as to fit him for the chair to which he had been appointed. He had a rich humor and a ready wit, and was a favorite in the class-room. As a writer, he is to be placed in the first rank, as his contributions to the 'Southern Review' will show." He published with David Mead "Law Reports" (2 vols., 1818-20); also a series of sketches in the "Southern Review," republished as "Novellettes of a Traveler" (1834), and left a novel in manuscript form. Accompanied by his wife he visited New York city in 1837. They returned by the steamer Home, which was wrecked off the coast of North Carolina on Oct. 13th. It is said that he might have saved himself, but preferred to perish with her. They left one child, a daughter.

BARNWELL, Robert Woodward, educator and U. S. senator; third and ninth president of South

Carolina College (1834-41; 1866-73), was born at Beaufort, S. C., Aug. 1, 1801, son of Robert Barnwell, a soldier in the revolutionary war, a member of congress (1791-95), and of the state legislature for many years. His great-grandfather, John Barnwell, an emigrant from Ireland to South Carolina about 1700, led a force against the Tuscarora Indians in North Carolina in 1712, defeating and subduing the tribe, and to this day is called by his descendants Tuscarora John. Robert W. Barnwell was graduated at Harvard with

high honors in 1824, studied law in the office of Pettigrew & Hamilton, in Beaufort, and entered upon practice about 1824. He served for a term in the state legislature (1826), representing Beaufort, and for two terms in congress (1829-33), declining a re-election. In 1835 he was elected to succeed Robert Henry as president of South Carolina College, which had so far lost its prestige that it had but ten students. Though he made no pretensions to scholarship, he was in all respects fitted for his new office, and he made his special department, that of political philosophy, particularly strong. The chair of evidences of Christianity and sacred literature was established at this time to counteract the effect of Dr. Cooper's teachings, Stephen Elliott, subsequently bishop, being the first incumbent. Appropriations were secured for the chemical, mathematical, and historical departments; a check to disorderly conduct was given by the expulsion of two students for duelling, and in two years' time the number of students rose to forty-two. Resigning on account of ill-health in 1841, he

retired to his plantation. In 1850 John C. Calhoun died, and Franklin H. Elmore was chosen to succeed him in the U. S. senate, but died in May, a month after his appointment. Gov. Means immediately chose Mr. Barnwell to fill the vacancy until the legislature could elect some one to take the chair permanently. In December, 1860, after the passage of the ordinance of secession by South Carolina, he was appointed one of the commissioners to negotiate with the Federal government for the transfer of U. S. property within the state. He was sent as a delegate to the convention of seceded states, at Montgomery, Ala., in February, 1861, and cast the deciding vote which made Jefferson Davis president of the Southern Confederacy. The office of secretary of state, tendered by Pres. Davis, was declined; but that of a seat in the Confederate senate was accepted, and in that way he served until the war ended. In 1866 the college was rehabilitated along the lines of the University of Virginia, with separate departments and elective courses, and Mr. Barnwell was chosen professor of political science and chairman of the faculty. A school of law and a school of medicine were now attached to the university. At this time the library and the chapel were occupied by a Republican legislature, and science hall and the athletic field were occupied by Federal troops; but Mr. Barnwell carried the institution safely through those critical years. Unfortunately, the closing of the auxiliary academies by the war necessitated the lowering of the requirements for entrance and for graduation. The admittance of a negro to the law school in the winter of 1873 was followed by the resignation of the old faculty and the withdrawal of all the white students, with the exception of a few of northern birth. The university was reorganized and opened without restrictions as to color, and a normal school was opened in Rutledge College. Meantime, Mr. Barnwell had opened a private school in Columbia. On July 1, 1877, the legislature, which was Democratic, closed the university, and Gov. Hampton placed the property and buildings in the charge of Mr. Barnwell. On the reopening of the college, in 1880, he was appointed librarian, and held that position by deputy until his death. The historian, La Bourde, eulogized Mr. Barnwell as a man whose eminent qualifications and conscientious discharge of duty were apparent to all. "If ever there was a public man who had an abiding popularity, it was he, and that popularity was based upon his well-known adherence to principle and unalterable love of justice." Mr. Barnwell died in Columbia, S. C., Nov. 25, 1882.

HENRY, Robert, president *pro temp.* of South Carolina College (1834-35) and fourth in order of election (1841-45), was born in Charleston, S. C., Dec. 6, 1792. His mother had charge of his education, his father having died when he was very young, and in 1803 took him to England, where he continued academic studies until 1811. In that year he entered the University of Edinburgh; in 1814 was graduated at that institution with the degree of A.M., and after traveling on the Continent of Europe returned to Charleston and took charge of the French Protestant Church in that city, preaching alternately in French and German. He was elected professor of logic and moral philosophy in South Carolina College in 1818 and assumed the professorship of metaphysics upon the death of Dr. Maxey in 1820. In 1834, soon after the removal of Dr. Cooper, he was made president *pro tempore*, and but for supposed sympathy with the religious beliefs of Dr. Cooper he would have become his actual successor. In 1834 the college was reorganized, chiefly through the efforts of Gov. McDuffie and the trustees desired to retain Henry as a professor, but in deference to public opinion, though that opinion was unjust,

he declined and retired to a farm in the vicinity of Columbia. In 1839 he returned to the institution as professor of metaphysics, logic and belles lettres, and three years later was elected president. He retired in 1845, but accepted the chair of Greek literature and retained it until his death. "Dr. Henry's scholarship was never doubted," wrote one connected with the college, "and his success as a teacher was most gratifying. He had considerable executive ability and did his whole duty nobly, but did not have the art of controlling and governing youth, though he was held in highest esteem by the students. . . . He was strongly attached to the college, and his whole heart was in his work. He was respected for his virtues and admired for his elevated character and was loved by students and professors alike." Dr. Henry was a consistent and warm defender of free trade and of constitutional rights, and was among the first to lecture in the United States upon those subjects. He was an accomplished linguist and a man of exceptional talent, being widely read and possessed of a retentive memory. He published some magazine articles, a number of sermons and some eulogies, including one on Dr. Maxcy and one on John C. Calhoun. He died at Columbia, S. C., Feb. 6, 1856.

PRESTON, William Campbell, fifth president of the University of South Carolina (1845-51), was born in Philadelphia, Pa., Dec. 27, 1794, son of Francis and Sarah (Campbell) Preston. His father at that time was attending a session of congress.

His mother was the only daughter of William Campbell, the hero of King's mountain. William Preston entered Washington College (now Washington and Lee University) at the age of fourteen, but on account of delicate health was sent South the following year, and reaching Columbia was induced to enter South Carolina College. He was graduated in 1812 and began the study of law in Richmond, Va., but the state of his health soon

forbade confinement to an office, and after an extended journey on horseback through states adjacent to Virginia on the west he went to Europe. After traveling through France and England he settled in Edinburgh to complete his law course and to attend lectures on other subjects, rooming with Hugh S. Legare. He formed a lifelong friendship with Washington Irving, who accompanied him on several pedestrian tours, and introduced him to Walter Scott. Returning to Virginia in 1820 Mr. Preston began practice there, but two years later

removed to Columbia, S. C., and in 1828 was elected to the legislature, where he served for four years. He was one of the foremost advocates in South Carolina of free trade, state rights and nullification. In 1839 he was elected to the U. S. senate, where he was a colleague of John C. Calhoun and sustained the reputation he had long enjoyed as an orator; a speech on the French spoliation claims receiving high praise from statesmen of both political parties. Opposition on the part of Sen. Preston to Pres. Van Buren's policy destroyed the harmony that had existed between Calhoun and himself and displaced a majority of his constituents, and in 1842 an attempt was made to instruct him as to his course. This failed, but from a sense of honor he resigned and returned to

his law practice. In 1845 he was called to the presidency of the College of South Carolina, which had somewhat declined, and this he made the most popular institution of learning in the South, "imparting to it the influence of his refined scholarship, elegant tastes and winning manners." While at its head, in 1846, he received the degree of LL. D. from Harvard. Dr. Preston voluntarily retired in 1851, and lived quietly until his death. The Lyceum in Columbia was established by him and he gave it a large and valuable library. Dr. Preston's attainments as a classical scholar were unusual, while his gifts as an orator were exceptional, placing him on a par with Patrick Henry, a great uncle on his mother's side. He was twice married, first, to a Miss Coalter; and, second, to a Miss Davis. Dr. Preston died in Columbia, S. C., May 29, 1860.

LIEBER, Francis, chairman of the faculty of South Carolina College (1851). (See Vol. V, p. 146.

THORNWELL, James Henley, clergyman, and sixth president of South Carolina College (1851-55), was born near Society hill, Marlborough district, S. C.,

Dec. 9, 1812. His parents being poor, he was aided by friends in obtaining an education, and after attending the Cheraw Academy entered the junior class of South Carolina College. He led in the classroom and the debating society; was regarded as one of the most promising young men who had ever been trained in the college, and since, as a rule, the ablest graduates engaged in politics, it was prophesied by John C. Calhoun that young Thornwell would be prominent in national councils. Being graduated, and with the highest honors, he, to use the language of another, "deliberately turned away from almost the only field for the proper exercise of great gifts at that time in the South and entered the ministry." In October, 1834, he was licensed to preach; in May, 1835, was ordained, and was installed pastor of the Presbyterian Church, Lancaster Court House, S. C., and soon after had the churches at Waxham and Six Mile creek added to his charge. This relation continued until December, 1837, when he was elected to the professorship of logic, belles lettres and criticism in South Carolina College, succeeding Prof. Nott, and later was given the professorship of metaphysics. In 1839 he resigned and was installed pastor of the Presbyterian Church at Columbia, but at the end of a year was called back to the college as professor of sacred literature and evidences of Christianity, succeeding Prof. Stephen Elliott, who had been elected bishop of Georgia. Not many years later he again resigned, having been invited to the pastorate of the Second Presbyterian Church of Baltimore, whereupon Pres. Preston invoked the interposition of the Presbyterian church, and the synod of South Carolina expressed its unwillingness that Dr. Thornwell should leave the state. In 1851 he accepted a call to the Glebe Street Presbyterian Church, but in November of that year Col. Preston resigned the presidency of South Carolina College and Dr. Thornwell was chosen to succeed him. Entering upon his office Jan. 7, 1852, he remained in office until the close of the year 1855, and then became professor of theology in the Presbyterian Theological Seminary and pastor of the Presbyterian Church, both at Columbia. While a professor he received the D. D. from Hampden-Sydney and from Jefferson College.

W. C. Preston

Centre colleges. In his monograph, the "History of Education in South Carolina," Colyer Meriwether says: "As a teacher Dr. Thornwell was very thorough and analytical, but safe and conservative. No new theories of philosophy or ethics drawn from the liberal German school ever found acceptance in his class room. His influence upon the students and his reputation throughout the state made him almost indispensable to the college. . . . His terms president ranks next to Preston's in attendance. He was progressive, and made important recommendations and increased the efficiency of the institution. He introduced the method of written examinations, and raised the entrance requirements in Greek from six books of the Iliad to ten books." The establishment of Furman University by the Baptists and of Wofford College by the Methodists was regarded with great anxiety by the friends of South Carolina College as likely to weaken it, and in 1835 Pres. Thornwell addressed a letter to Gov. Manning on "Public Instruction," in which he urged the superiority of state education over that given by sectarian schools. This letter, popularly called the "Bible" of South Carolina College, is said to be the strongest argument of its kind ever presented in the state, and in 1885, when the sectarian schools seemed about to cripple the usefulness of the college, it was reprinted in the Charleston "News and Courier." Pres. Thornwell was, it appears, "universally opposed to the elective system and to an extension of the college into a university with other departments." In 1847 he was elected moderator of the general assembly of the Presbyterian church, being the youngest man who had ever held that office. Dr. Thornwell was probably the greatest divine the Southern Presbyterian Church has produced; remarkable for his logical and metaphysical faculties, for the strength of his argument; for the quality of his literary style, and for the fervor of his eloquence. He was an uncompromising defender of Southern principles and old school theology; was a leader in the councils of his denomination, and was prominent in organizing the Southern assembly at the time of the division in 1861. His published writings, some of which were in pamphlet form, include: "Arguments of Romanists Discussed and Refuted" (1845); "Discourses on Truth" (1854); "Rights and Duties of Masters" (1861); "The State of the Country" (1861), and articles on "The Free School System of South Carolina" and on "Public Instruction." His collected works, edited by Rev. John B. Adger, were published in four volumes in 1871-74, and his "Life and Letters," by E. M. Palmer, in 1875. He edited the "Southern Quarterly Review" in 1855-57. Dr. Thornwell died at Charlotte, N. C., Aug. 1, 1862.

McCAY, Charles F., seventh president of South Carolina College (1855-57), was a native of Pennsylvania and a graduate of a northern college. After serving as a professor in the University of Georgia he took the chair of mathematics in South Carolina College, in 1813, and two years later, on the resignation of Dr. Thornwell, succeeded to the presidency. During his term the two LeCombes were elected professors, also William J. Rivers, subsequently president of Washington College, Maryland. He was not the choice of his colleagues, and he was bitterly opposed by the press of the state, for the institution declined steadily under him, riots and disorders by the students aiding to lower his reputation. His intentions were of the best, but in June, 1857, the trustees decided that the institution must be reorganized if it was to be saved and re-elected most of the professors. In September every officer of the faculty except Pres. McCay was reinstated and the faculty elected Dr. Maximilian LaBorde as chairman. Prof. McCay thereupon removed to Baltimore, Md., where he became well known as an actuary of insurance.

LA BORDE, Maximilian, physician, legislator and educator, president *pro tem.* of South Carolina College, was born at Edgefield, S. C., June 5, 1804, son of Pierre and Sarah (—) La Borde. His father, a native of Bordeaux, France, emigrated to San Domingo, and there became the owner of a large plantation, but during the insurrection of 1791 fled to Charleston, S. C., arriving penniless. Being a well trained violinist, he joined the orchestra of the theatre, of which he was made leader, but soon removed to Edgefield, where he married and engaged in merchandising. The son entered South Carolina College in 1818, and after being graduated there in 1820, studied law, but relinquished it to begin the study of medicine, and in 1826 he was graduated in the first class that took degrees at the Charleston Medical College. In addition to practicing in the Edgefield district, he carried on a drug store and edited the Edgefield "Advertiser," which he aided in establishing in 1836. Mr. La Borde became a member of the legislature in 1836 and secretary of state in 1839, when he removed to Columbia. He was appointed a trustee of South Carolina College in 1837, and was elected professor of belles-lettres in 1842, this department being one in which he had peculiar interest. In 1845 he was transferred to the chair of metaphysics, and occupied it until the college was changed into a university in 1865, when he was given the chair of rhetoric, criticism, elocution, English language and literature. This he held to the time of his resignation, serving the institution for thirty-one years, the longest term in the history of the college. He not only frequently served as president *pro tem.*, but in 1857 was chairman of the faculty. During the first year of the civil war, which emptied the college of its students, Dr. La Borde established wayside hospitals in Virginia. In October, 1862, he organized at Columbia the central association for the relief of South Carolina soldiers, and being appointed its chairman gave his time gratuitously to the work. Upon the reopening of the college, in 1865, he resumed his chair, but on Oct. 9, 1873, resigned, the trustees having insisted upon co-education of the races. He was at once tendered the position of secretary for South Carolina of the Southern Historical Society, and began his labors with the enthusiasm that had distinguished him as a teacher, but in a few weeks time his life ended. Dr. La Borde was for a time one of the regents of the state asylum for lunatics, and subsequently served as president of the board. Besides contributions to periodical literature, he published "Introduction to Physiology" (1855); "History of South Carolina College" (1859), and "Story of Letha and Verona" (1860); "A Suburban House and an Old Lady" (1861). He was the founder of the Columbia Athenaeum, and as vestryman and warden of Trinity Church (Episcopal), Columbia, S. C., for thirty-one years, he was a faithful worker in the cause of Christ and His church. He was married, at Edgefield, S. C., 1826, to Sophia, daughter of James and Mary (Carroll) Parsons. They had six sons and one daughter. This union was dissolved by death, and two years afterwards (1843), he was married to Elizabeth Carroll, a younger sister, who died in 1857. Four daughters and two sons were born to them. Dr. La Borde died in Columbia, S. C., Nov. 6, 1873.

LONGSTREET, Augustus B., eighth president of South Carolina College (1857-63). (See Vol. I., p. 517).

MILES, William Porcher, ninth president of South Carolina College (1880-82), was born at Walterboro, Colleton co., S. C., in 1822. His ancestors on his father's side were English, and some time before the revolution settled in South Carolina, where they had extensive plantations. On his mother's side, he was descended from the Porchers, a Huguenot family, who emigrated to South Carolina at the revocation of the edict of Nantes. He finished his education at the College of Charleston, the oldest institution of higher education in the state, being graduated with highest honors, and then

studied law, but was never admitted to the bar, having become tutor in mathematics at his alma mater. Afterward he was chosen assistant professor, and while thus engaged was elected mayor of Charleston; but before the expiration of his term of office was elected to the U. S. house of representatives, at the beginning of Buchanan's administration. In 1858 he was re-elected, and served until the secession of his native state in 1860, when he resigned. During his first term he was a member of the committee on commerce, and during his second

of the committee on foreign affairs. He was a member of the secession convention of South Carolina and of the provisional Confederate government that met at Montgomery, Ala., where his services were so efficient that he was elected to the Confederate congress, which convened later in Richmond, Va. Service as voluntary aid at Manassas, and later, on Gen. Beauregard's staff, gave him a knowledge of the conditions and requirements of the army that was put to use by Pres. Davis, who appointed him chairman of the committee on military affairs. For many years after the war he engaged in planting tobacco and wheat in Nelson county, Va.; then removed to Charleston, and took up the practice of law. In October, 1880, after a period of political strife and turmoil, during which B. B. Babbitt and A. W. Cummings served as chairmen of the faculty, and only twenty-three degrees were conferred, South Carolina College was reopened as the College of Agriculture and Mechanic Arts, and Mr. Miles was elected its president. The members of the intermediate class were allowed to take their diplomas after a year's study, forming the class of 1883. Two years later the higher institutions of the state were organized as a university, the branch at Columbia retaining its old name of the College of South Carolina, and at that time family exigencies obliged Pres. Miles to remove to Louisiana. There he took charge of the thirteen large sugar plantations of the Miles Planting and Manufacturing Co., in Ascension and St. James parishes, his wife's inheritance. He became the second largest sugar producer in the United States. An old-fashioned Jeffersonian Democrat in politics, Mr. Miles voted for Palmer and Buckner in 1896. He adorned every position he filled, and fully deserved the respect and admiration accorded him for his culture, for the nobility of his character, and for the single-mindedness with which he performed every duty entrusted to him. He died at his home in St. James parish, La., May 13, 1899.

McBRYDE, John McLaren, eleventh president of South Carolina College (1883-91), was born at Abbeville Court House, S. C., Jan. 1, 1831, son of John and Susan (McLaren) McBryde, natives of Scotland. He was prepared for college in the private schools of his native town, and in December, 1857, entered South Carolina College. In the fall of 1860 he matriculated at the University of Virginia, and the following year entered the Confederate army, but soon retired from active service on account of ill-health. In 1867 he removed to Albemarle county, near the University of Virginia, and gave much time to scientific studies, also taking an active part in organizing farmers' clubs. In 1879 he was elected professor of agriculture and botany in the University of Tennessee, and there conducted a series of agricultural experiments, the results of which, when published, made him known throughout the country. In 1882 he was called to the chair of agriculture in the College of South Carolina, and in July of the same year was elected chairman of the faculty to fill the vacancy caused by the resignation of Dr. Miles. The labor of preparing for the reorganization and reopening of the college, which had been closed as a literary institution since 1873, at once devolved upon him. The buildings were in a wretched condition and unfurnished. By laborious and untiring efforts Mr. McBryde succeeded in having everything ready for the opening in October, and acted as chairman until May, 1883, when he was unanimously elected president. In 1888, when the college was reorganized and raised to the dignity of a university, he was appointed president, and in the spring of the same year was made director of the experiment station of South Carolina, established under the Hatch act. Dr. McBryde has published numerous addresses, chiefly on agricultural subjects, and has issued three reports of experimental work in South Carolina. The reform legislature of 1890-91 re-established the South Carolina College, re-electing Prof. McBryde president, but he disapproved of the change, and accepted instead the presidency of the Virginia Agricultural and Mechanical College, now known as the Virginia Polytechnic Institute. In 1893 he declined the office of assistant secretary of agriculture tendered him by Pres. Cleveland. In 1881 he received the honorary degree of LL. D. from the Southwestern Presbyterian University, at Clarksville, Tenn., and in 1887 that of Ph. D. from the University of Tennessee. He was a life member of the Miller board of trustees of the University of Virginia, is a corresponding member of the Elisha Mitchell Scientific Society of North Carolina; fellow of the American Geographical Society, and of the American Statistical Association and several other scientific bodies.

WOODROW, James, clergyman and editor, twelfth president of South Carolina College (1891-97), was born in Carlisle, England, May 30, 1825, son of Rev. Thomas Woodrow, D. D., a native of Scotland. In 1836 the family emigrated to Canada and in 1837 to the United States, settling in Chillicothe, O., where Dr. Woodrow was installed pastor of the First Presbyterian Church. He received his preparatory education from his father and the academy in Chillicothe; then entered Jefferson College, Pennsylvania, under the presidency of Rev. Dr. Robert J. Breckinridge, and was a member

W. Porcher Miles

John McLaren McBryde

with first honor in the large class of 1849. After leaving college he spent several years in teaching. In 1852 he was elected professor of natural science in Oglethorpe University, Georgia, and retained the position until 1861. During that period he continued his studies. In 1853 he spent some time at the Lawrence Scientific School, Harvard University, under Profs. Horstford and Agassiz, and in 1855 went to Heidelberg, Germany, where he studied under the great chemist, Bunsen, and received the degree of Ph.D. Though only twenty-seven years of age he was offered a full professorship in the university, but preferred to return to the United States.

James Woodrow

After leaving Heidelberg he traveled on the Continent, studying geology in the field, and spending some time at Naples, Vienna, Berlin, Freiberg (at the Mining Academy), London and Paris. In 1857 he was elected professor of natural science in the University of Georgia. He did not accept this position until rejected twice in succession, and before entering upon his duties there he was released to accept the Perkins professorship of natural science in connection with revelation in the Presbyterian Theological Seminary at Columbia, S. C., entering upon his duties Jan. 1, 1861. He had been ordained to the ministry in 1860, after a private course of study. During the civil war, when the exercises of the seminary were interrupted, he was active in rendering services to the Southern Presbyterian Church. From 1865 until 1868 he was editor of the "Southern Presbyterian" and from 1861 until 1885 was publisher and chief editor of the "Southern Presbyterian Review." From 1869 until 1872 he was professor of chemistry and geology in South Carolina College. In 1872-74 he sojourned in Europe with his family, but revisited the United States several times. On May 7, 1884, at a meeting of the Alumni Association of the Theological Seminary at Columbia, Dr. Woodrow delivered, by request, an address on evolution, in which he argued that it might be considered as "God's plan of creation," without interfering with a theistic and Christian belief. A controversy in the Southern Presbyterian Church resulted and the directors of the seminary promptly removed him for holding unorthodox views, though their action was not sustained by the controlling synods. In 1886 he was again removed, this time, by order of the synods and his connection with the seminary ceased. In 1886 also he left the chair of natural science in which he had been temporarily reinstated. From 1880 until 1891 he was professor of geology and also from time to time held the chairs of mineralogy, botany, physiology, astronomy and natural philosophy. Upon the reorganization of the university, in 1891, Dr. Woodrow was elected president of South Carolina College, retaining the chair of geology, and served until June, 1897, when he retired to private life. In the summer of that year he attended by special invitation of the czar of Russia the International Geological Congress at St. Petersburg. Since his connection with the college was severed he has been president of the Central National Bank of Columbia, S. C.; of the South Carolina Home Insurance Co.; of the Carolina Loan and Investment Co., and of the People's Building and Loan Association; vice-president of the Mutual Beneficial Building and Loan Co.;

director of the Columbia, Newberry and Laurens Railroad Co., and of the Charlotte, Columbia and Augusta Railroad Co. Among the various scientific societies of which he is a member are the German Association of Naturalists, the Isis of Dresden, the Swiss Association of Naturalists, the Victoria Institute of London, and the American Association for the Advancement of Science. Dr. Woodrow has taken a prominent part in the councils of the Southern Presbyterian Church, has repeatedly been a delegate to its general assembly and for more than ten years was treasurer of its committee of home and foreign missions. He has published very little, chiefly articles in review form, which include: "Geology and Its Assaults" (1863); "Certain Recent Assaults on Physical Science" (1873-74); "Evolution" (1884); his defense before the synod of South Carolina (1884), and his argument before the general assembly at Baltimore (1888). The degree of M.D. was conferred upon him by the Medical College of Georgia; that of D.D. by Hampden-Sidney College, Virginia; and that of LL.D. by Davidson College, North Carolina. Dr. Woodrow was married, at Dalton, Ga., in 1857, to Follie S., daughter of Rev. John W. Baker. Of this marriage four children were born, three of whom, daughters, are still living.

WOODWARD, Franklin Cowles, thirteenth president of South Carolina College (1897-), was born in King George county, Va., May 27, 1849, son of Rev. B. F. and Elizabeth, (Franklin) Woodward. His ancestors came from England to Virginia about 1630. He was graduated at Randolph-Macon College, Virginia, in 1874, and the following year entered the ministry of the Methodist Episcopal church, South. After six years of pastoral work in his native state he was elected to the chair of Latin and French in Wofford College, Spartanburg, S. C., and in 1883 was called to the chair of English in the same institution. In the spring of 1888 he was elected to the chair of English language, literature and rhetoric in South Carolina University, and made his department the equal of that in any educational institution in the South. In June, 1897, he succeeded Dr. Woodrow as president of South Carolina College. The degree of Litt.D. was conferred upon him by the University of North Carolina. Pres. Woodward has published several pamphlets on educational matters, and contributed articles to various periodicals. His work as a leader in the new movement for the promotion of the study of English in the colleges and schools of the South has been almost as important as that performed in the classroom. He was married at Richmond, Va., Feb. 26, 1879, to Mary P. daughter of Thomas H. and Elizabeth K. Leary.

F. C. Woodward

GIBBES, Robert Wilson, scientist and historian, was born in Charleston, S. C., July 8, 1809, son of William Hascel Gibbes, of English descent. His grandfather, Robert, was chief-justice of South Carolina in 1708; his father, a lawyer of eminence, served as captain-lieutenant of artillery during the revolutionary war. He was graduated at South Carolina College in 1827, attended medical lectures in Philadelphia in 1827-28, and was graduated at the Medical College of South Carolina, Charleston,

in 1830. Appointed assistant professor of chemistry, geology and mineralogy in South Carolina College in 1827, he served for eight years. Dr. Gibbs was twice mayor of Columbia, and in 1852-60 he edited in that city the "Daily South Carolinian" and the "Weekly Banner." From the beginning of the civil war until its close he was surgeon-general of the state, and during that period made an examination of the hospitals in Virginia, for which he received the thanks of the Confederate congress. He gave much time to scientific research, paying particular attention to the organic remains found in South Carolina, and published "Monograph on Fossil Squalide" in the "Journal of the Philadelphia Academy of Sciences" and "Memoir on Monosures and the Three Allied New Genera" in "Smithsonian Contributions to Knowledge" (1849). His valuable collections of fossils and minerals were destroyed in 1865, when Columbia was burned. His medical articles include one on "Typhoid Pneumonia" in the "American Journal of the Medical Sciences" (1842), which opposed the use of the lancet in the treatment of the disease. Among miscellaneous articles was a memoir of the artist, James De Veaux. His most important work was a "Documentary History of the American Revolution; Consisting of Letters and Papers Relating to the Contest for Liberty, Chiefly in South Carolina" (3 vols., 1853). In the preparation of this work he was engaged for twenty-five years. His son, Robert Wilson, was born in Columbia, S. C., June 10, 1831. He was a graduate of South Carolina College in 1849, and of the Medical College of South Carolina in 1852; was professor of surgery in the University of South Carolina in 1872-73, and contributed frequently to medical journals. He died in Columbia, Oct. 23, 1875. Dr. Robert W. Gibbs, Sr., died in Columbia, S. C., Oct. 15, 1866.

JOYNES, Edward Southey, educator, was born in Accomac county, Va., March 2, 1834, son of Thomas R. and Anne (Bell) Joynes, and brother of Levin S. Joynes, dean of the Medical College of Virginia. He was educated at Delaware College, Concord Academy (Va.), and the University of Virginia, taking the degree B. A. in 1852, and M. A. in 1853. In the latter year he was appointed assistant professor of ancient languages under Prof. Gessner Harrison, but resigned in 1856 to continue his studies in the University of Berlin and in Paris. On his return to America, in 1858, he was appointed professor of Greek and German at William and Mary College, Virginia. During the civil war Mr. Joynes served as chief clerk in the Confederate bureau of war. In 1866 he became professor of modern languages in Washington College, Lexington, Va., of which Gen. Robert E. Lee was president. He was one of the earliest professors of modern languages in the South, and one of the first to include the English language as a distinct department of college study. In 1875 he became professor of modern languages and English in Vanderbilt University, Nashville, Tenn., and in 1878 in the University of Tennessee, at Knoxville. In 1882 he removed to South Carolina College, Columbia, S. C., and in 1887 was made professor of modern languages, the department being divided. Prof. Joynes is widely known as a skillful and successful teacher and lecturer, his pupils being numerous throughout the South. He was made LL. D. by Delaware College in 1875, and by William and Mary College in 1878. He is author or editor of many well-known text-books, among them being: "Joynes-Meissner German Grammar" (1887); "German Reader" (1889); "Minimum French Grammar" (1892), and "Classic French Plays" (1870-82), etc. He has been prominent in public-school work in Virginia, Tennessee and South Carolina, both as writer and lecturer, and is one of the founders and

trustees of the Winthrop Normal and Industrial College for Women, at Rock Hill, S. C. He was married at Williamsburg, in 1859, to Eliza W. Vest, of Williamsburg, Va., and has four children.

ELLETT, William Henry, chemist and educator, was born in New York city, Nov. 1, 1806. He received his education in the public schools of New York city, and at Columbia College, at which institution he was graduated in 1824. Later he engaged in the study of medicine, and during this period was awarded a gold medal for annexity on the compounds of cyanogen. In 1830, at the suggestion of Pres. Thomas Cooper, he was appointed lecturer on elementary chemistry in Columbia College, and two years later professor of elementary chemistry. The chair of chemistry, mineralogy and geology in South Carolina College was offered him in 1835, and this he accepted, serving until 1848, when he returned to New York city. While in South Carolina Prof. Ellett discovered a new and cheaper method of manufacturing gun cotton, and for this was presented with a service of silver plate by the legislature. From 1854 until his death he was consulting chemist to the Manhattan Gas Co. Prof. Ellett was married, in 1835, to Elizabeth Fries, daughter of Dr. William N. Lummis, of Sodus, N. Y. She became popular as an author, "Women of the American Revolution" and "Queens of American Society" being two of her best known works. Prof. Ellett died in New York city, Jan. 26, 1859.

ELLETT, Elizabeth Fries (Lummis), author, was born at Sodus, Wayne co., N. Y., in October,

1818, daughter of William Nixson Lummis and Sarah Maxwell, his second wife. Her father, a native of Woodbury, N. J., was one of the pioneers of that part of New York state which borders on Lake Ontario, and there practiced as a physician. His house on Sodus point was burned by the British during the war of 1812, and removing two miles to the west he established a new home. He was a man of remarkable ability and of cultivated literary taste. Sarah Maxwell, his wife, was the daughter of Capt. John and the grand-daughter of Gen. William Maxwell, patriots of the revolutionary period. Miss Lummis was educated at a seminary in Aurora, N. Y., and at the age of seventeen left the school-room to become the wife of Dr. William H. Ellett, professor of chemistry in Columbia College, New York city. In the same year (1835) he was called to a professorship in South Carolina College, and Columbia, S. C., was their place of residence until 1849, when they returned to New York city. Mrs. Ellett was a contributor to the "American Quarterly Review," the "North American," and the "New York" reviews, and to monthly magazines published in New York, Philadelphia and Charleston, her essays, short stories and sketches being several hundred in number. Before her marriage she had published a translation of Silvio Pellico's "Euphemia of Messina" and on her removal to New

York she published a tragedy, "Teresa Contarini," founded on an incident in Venetian history, which was produced on the stage. Her other published works include: "Poems, Original and Selected" (1835); "Scenes in the Life of Joanna of Sicily" (1840), partly fanciful and partly historical; "Characters of Schiller" (1842); "Family Pictures from the Bible" (1849); "Evenings at Woodlawn" (1850); "Pioneer Women of the West" (1852); "Novellettes of the Musicians" (1852), tales original and selected from the German; "Summer Rambles in the West" (1853); "Women Artists in All Ages and Countries" (1861); "Queens of American Society" (1867), and "Court Circles of the Republic" (1869), the last named being written in collaboration with Mrs. R. E. Mack. Her most important work, "Women of the American Revolution" (2 vols., 1848), was chiefly compiled from original materials, and was so well received that she was encouraged to bring out a companion volume, "Domestic History of the American Revolution" (1851). Much that Mrs. Ellet wrote was of ephemeral value; her style was graceful and pleasing, but it is difficult at the present day to account for her popularity. She died in New York city, June 3, 1874.

HOLLS, Frederick William, lawyer, was born at Zellenpole, Butler co., Pa., July 1, 1857, son of George Charles and Johanna Louise (Burr) Holls.

He was graduated at Columbia College in 1878; two years later he received the degree of LL. B. *cum laude* at the Columbia Law School, and after his admission to the bar began to practice in New York city, where he has gathered a large German-American clientele. For many years he was counsel of the German Society of the city of New York, and he has represented the German government in many important matters. In 1896 he became associated with Louis A. Wagner and Edward M. Burghard, under the firm name of Holls, Wagner & Burghard, counsel to the German Savings Bank, German

Hospital, and many prominent business interests of New York city. Since 1880 Mr. Holls has been prominent as a Republican campaign speaker, both in English and German, and as such has taken part in all important political contests, especially in the large cities of New York state and the West. In 1894 he was delegate-at-large to the New York state constitutional convention, being chosen chairman of the committee on education and a member of the committee on cities. He is the author of the amendments prohibiting sectarian appropriation of public money, making civil service reform compulsory, and separating state and municipal elections. In 1895 Gov. Morton appointed him member of a commission to frame a uniform charter for cities of the third class, and in this connection he prepared a bill providing for a municipal government board, which was adopted by both the commissioners on cities of the second and third class. Mr. Holls has traveled extensively in this country, Europe, Asia Minor and northern Africa, and in 1888 published a sketch of travel in the East and in Russia under the title, "Sancta Sophia and Troitza." He has also published a "Study of Francis Lieber" (in German); a lecture on "Compulsory Voting," and various dissertations on political and legal subjects. In 1898 the University of Leipzig conferred upon him the degree of D. C. L. During the Spanish war of 1898 he was actively engaged in Germany in refuting the

prevailing false impressions and counteracting the demonstrations hostile to America, especially in the press. He was appointed secretary and counsel of the American delegates to the peace conference at the Hague, Netherlands. In pursuance of a proposal of the Emperor of Russia, representatives of twenty-six nations assembled at the Hague, May 18, 1899, to consider terms of universal and permanent peace throughout the world. The sessions continued until July 29, 1899, and the United States delegates were Seth Low, Andrew D. White, Stanford Newell, William Crozier and Alfred T. Mahan. Mr. Holls was married, in 1889, to Caroline M., daughter of Hon. Frederic C. Sayles, of Rhode Island.

BROWN, Phœbe (Hinsdale), poet, was born at Canaan Columbia co., N. Y., in 1783, of New England parentage. She was married to Timothy H. Brown of Seantic parish, East Windsor, Conn., and after living there for some time became a resident of Monson, Mass. A woman of intense religious feeling, she devoted much time to meditation and prayer, a retired spot in her garden being her favorite place for that purpose. There she composed the lines beginning:

"I love to steal awhile away
From every cumbering care."

They were published in Nettleson's "Village Hymns" (1824), and have since been incorporated in the hymnals of various denominations, their sentiment rarer than their merit as verse having rendered them popular. Several hymns by her are given in Cleveland's "Lyra Sacra Americana." Her son, Samuel Robbins Brown (1810-80) was a missionary to China, where he founded the Morrisou school for boys; later he labored in Japan. Mrs. Brown died at Henry, Ill., Oct. 10, 1861.

DANA, Judah, senator, was born at Pomfret, Windham co., Conn., April 25, 1772, son of John Winchester Dana. His father was the grandson of Benjamin Dana and the brother of Rev. Joseph Dana, of Ipswich, and his mother was the eldest daughter of Gen. Israel Putnam. He was graduated at Dartmouth College in 1795, after which he studied law and began to practice three years later at Fryeburg, Me., which was then within the bounds of Massachusetts. From 1805 to 1811 he served as prosecuting attorney for Oxford county, and in the latter year became a judge of probate and of the common pleas court, holding the former office until 1822 and the latter until 1823. He was a delegate to the convention held in 1819 to frame the constitution of Maine, and in 1833 was elected a member of the executive council of that state. Upon the resignation of Sen. Ether Shepley he was appointed as a Democrat to the U. S. senate, serving from Dec. 21, 1836, to March 3, 1837. He was first married to Elizabeth, youngest daughter of Prof. Sylvania Ripley, of Dartmouth College, and a granddaughter of Eleazer Wheelock, founder and first president of that institution. Later in life he was again married, but his first wife was the mother of all his children. One son, John Winchester Dana, was elected governor of Maine; and a daughter, Abigail Ripley Dana, was the wife of Edward L. Osgood and the mother of James R. and Kate Putnam Osgood. Sen. Dana died at Fryeburg, Me., Dec. 27, 1845.

LUMBROZO, Jacob, physician and colonist, was of Hebrew descent; the exact date of his birth is unknown. The Maryland archives describe him as a native of Lisbon, in Portugal, whence he probably came by the way of Brazil. He was established in Maryland about Jan. 24, 1656, and acquired a plantation in Charles county, along Nantamy creek. He was one of the earliest physicians in Maryland, where he was familiarly known as "ye Jew doctor," and enjoyed a lucrative practice.

Frederick W. Holls

He apparently lived there comfortably, though on sufferance, owing to the toleration act, which excluded all persons "deuving that Christ is the Son of God." In 1658 he was committed for blasphemy, in consequence of his having been drawn into a discussion about the Messiah, whether he had come or was to come. Owing, however, to the general amnesty proclaimed at the accession of Richard Cromwell as protector, he was released, and his subsequent civil status seems not to have been in any way affected by the indictment. In 1663 Jacob Lumbrozio applied for and was granted letters of denization which vested him with all the privileges of a naturalized subject. He then acquired large tracts of land, and began steadily rising in importance. In August, 1664, he recorded his title to 200 additional acres of land that were entered under the name "Lumbrozio's Discovery." He amassed considerable wealth, both personal and real estate, and in 1665 secured a commission to trade with the Indians, for which privilege he paid a large sum of money. He died in Maryland between September, 1665, and May, 1666.

MORRIS, Thomas, senator, was born in Augusta county, Va., Jan. 3, 1776, son of a Baptist clergyman who was of Welsh descent. In 1795 he removed to Columbia, O., where he was engaged for some time in doing farm work for Rev. John Smith, first U. S. senator from Ohio. In 1800 he settled in Clermont county, and while still engaged in farming pursued the study of law without an instructor. He was admitted to the bar in 1804, became eminent as a lawyer, and served for a time as a judge of the supreme court of the state. In 1806 he was elected to the Ohio legislature, and served continuously for twenty-four years. In 1832 he was elected as a Democrat to the U. S. senate, where he distinguished himself as an opponent of slavery as well as a defender of the freedom of the press, free speech and the right of petition. In 1844, at the convention of the Liberty party held in Buffalo, he was nominated for vice-president on the ticket with James G. Birney. Sen. Morris was an energetic politician, and a fearless champion of the views he professed. His life, speeches and writings were published in 1855 by his son, Rev. Benjamin F. Morris; while two other sons, Jonathan D. (b. 1804), and Isaac M. (b. 1812), became eminent lawyers and members of congress. He died at Bethel, O., Dec. 7, 1844.

FOLSOM, Nathaniel, patriot, was born at Exeter, Rockingham co., N. H., in 1726. The name was written Foulshame by the first of the family in America. In the French and Indian war he commanded a company at Fort Edward in 1755, and distinguished himself in the action with Dieskau. He commanded a regiment of militia before the revolution, and served as brigadier-general of the New Hampshire forces during the siege of Boston, until relieved by Sullivan, July, 1775. He was a delegate to the Continental congress in 1774, 1775, 1777, 1778, 1779 and 1780; a councillor in 1778, and president of the convention which framed the constitution of New Hampshire in 1786. He died at Exeter, May 26, 1790.

VAN DER STUCKEN, Frank Valentine, musician, was born at Fredericksburg, Gillespie co., Tex., Oct. 15, 1858, son of Frank J. and Sophie (Schoenewolf) Van der Stucken, the former a Belgian and the latter a German by birth. In 1866 his parents returned to their native land, and gave their son in charge of Peter Benoit, at Antwerp, to begin his musical education. The boy progressed rapidly, and when little more than a child composed religious pieces which were played in the Antwerp churches and a ballet for the Royal Theatre. In 1877-79 he studied in Leipsic under the guidance of

Grieg and Carl Reinecke, and for the two years following traveled in central Europe, where he made the acquaintance of many leading musicians. In 1881-82 he was a musical director of the Stadt Theatre of Breslau, producing there a setting of his own of Shakespeare's "Tempest." A year later he was enabled through influence of Liszt to give an entire concert of his own works at the Grand Ducal Theatre at Weimar, in the presence of Grieg, Lassen, Liszt, and Muller-Hartung, as well as of the ducal court. After this performance he gave a series of concerts in several European cities, and then sailed for America. Settling in New York city, he at once received an appointment as director of the Arion Vocal Society, which he conducted for twelve years, and in 1892 toured with it in Germany and Austria, giving remarkably successful concerts in all the larger cities of those countries. Previous to this he had become celebrated in America as a musical director, and in 1889 had given a series of American concerts at the Trocadero, during the Paris exposition, in consideration of which he was created an officier d'academie. Mr. Van der Stucken was the founder and for years the director of the novelty concerts at Steinway Hall, and of the symphonic concerts at Chickering Hall, both in New York city. He was leader of chorus and orchestra at the National Conservatory of Music, New York; of the Arion Society of Newark; musical director of the Temple Emanuel, New York; of the Indianapolis festival of 1887, and of the saengerfests which the Northeast German Saenger Bund held in Newark in 1894 and in New York in 1894. In 1895 he removed to Cincinnati, O., to fill the positions of dean of the college of music and director of the symphony orchestra of that city. His compositions are numerous, comprising a ballet, church music, choruses, songs, orchestral pieces and some pianoforte music. More important among them are,

besides those mentioned above: "Festzug," written in Wagnerian style; "Pagina d'Amore"; a lyric drama, "Vlasch"; a symphonic prologue to Heine's tragedy, "William Ratcliffe"; a "Festival March"; a "Festival Hymn," etc. Mr. Van der Stucken was married, in 1880, to Mary, daughter of H. E. Vollmer.

Edward Hogue

FUNSTON, Edward Hogue, soldier and congressman, was born in Clark county, O., Sept. 16, 1836, son of Frederick and Julia (Stafford) Funston. His father, a native of Donegal, Ireland, came to this country at an early age and settled near Paris, Ky., subsequently removing to Ohio. He attended the New Carlisle (Ohio) Academy, where he was graduated, and later studied at Marietta (Ohio) College. After his school life closed he continued as a farmer until the outbreak of the civil war. He enlisted in the Union army in 1861 as senior second lieutenant of the 16th Ohio battery, and participated in all the important engagements along the Mississippi river, being honorably mustered out as senior first lieutenant in 1865. In 1867 he located on a prairie farm near Iola, Kan., which is still (1901) his home. He was elected to the Kansas house of representatives, 1873, 1874 and 1875, during the latter year serving as speaker. In 1880 he was elected to the state senate, of which he was president *pro tempore*. On March 1, 1881, he was elected a rep-

sentative from Kansas to the 48th congress, to fill a vacancy; was re-elected five times, and served continuously until 1894, when his seat was lost by a contest. He was chairman of the committee on agriculture in 1890. Mr. Funston was married at New Carlisle, Sept. 4, 1861, to Ann E., daughter of James and Elizabeth (Snigart) Mitchell. She was born in Miami county, O., but her father, of Scotch-Irish descent, was a native of Virginia. They have had five sons and one daughter.

FUNSTON, Frederick, soldier, was born at New Carlisle, Clark co., O., Nov. 9, 1845, son of Edward Hogue and Ann E. (Mitchell) Funston. He grew up on his father's farm, and by devouring books and newspapers when work was over, acquired an apparently inexhaustible stock of information and statistics which was of great assistance to his father when the latter had speeches to prepare. After attending a district school and the High School at Iola, he entered the Kansas State University at Lawrence, where he remained two years. He served as reporter on the staff of a newspaper at Fort Smith, Ark., and later on the Kansas City "Journal" (1888). One of his assignments was to report an Indian outbreak in the Southwest, and in order to do it he traveled with the troops and even took an active part in the campaign. When the war ended his father secured him a position in the

U. S. agricultural department, as assistant botanist to accompany the Death Valley Expedition in Southern California. Nine months were spent in that awful region (1891), his duties including the making of maps and the recording of temperatures, the highest being 165° Fahrenheit. His next appointment was to make a collection representing the flora of Alaska, and in this arduous work two years were spent (1893-94), his travels taking him from the southeastern part of the territory to the Arctic ocean, and from the head-waters of the Yukon to its mouth, his voyage

down that river being accomplished in a canoe, which once upset and nearly terminated his career. This collection, now in the National herbarium, was made the basis of a joint report by Mr. Funston and Frederick V. Coville (1896). In addition to these duties he made a study of the seal fisheries and the questions connected with them, and of the boundary line between the American and British possessions. On his return to Kansas he gave lectures on his experiences and with the proceeds bought lands in southern Mexico, selected by himself, intending to become a coffee planter. Considerable capital being needed, he attempted to raise it in Kansas and at the East, and while thus engaged he was elected deputy comptroller of the Atchison, Topeka and Santa Fe railroad, with headquarters in New York (1896). During the summer of 1896 he attended a mass meeting in favor of the struggling Cubans; his sympathies were so deeply aroused that he offered his services to the Cuban Junta, and after drilling recruits under its direction, joined a filibustering expedition and aided in delivering to Gen. Gomez the first Hotchkiss guns owned by the insurgent army in Cuba. Two weeks later Funston was placed in charge of these guns as captain of artillery and used them with good effect, serving them himself when his gunners fell. After the fight at La Machuca, when he fought up to the muzzles of the Spaniards' guns, he received a special testimonial from Gen. Gomez for his bravery. With one arm crippled by a shell and bandaged to his side, he

managed his guns at Lugonas and the second battle at Cascorras, and then was placed in command of the artillery east of Havana, with the rank of major. He now had five pieces under his control, including the Sims Dudley pneumatic dynamite gun, the first ever used in battle, and the execution was so terrible that a price was set upon his head. At the battle of Las Tunas he led a charge with such gallantry that Garcia promoted him lieutenant-colonel. During his eighteen months in Cuba he took part in twenty-two engagements. At the battle of Samaí, his lungs were pierced by a Mauser bullet, and had barely recovered when his hip was injured by the falling of his horse during a cavalry charge. An attack of fever followed, and while recovering from this he attempted to reach the coast in order to escape to the United States. Being arrested by the Spaniards, he represented himself as a deserter from the Cuban army, contrived to swallow the passport which would have betrayed his rank, and though condemned to death, was finally liberated (December, 1890), and sent to his native country. Col. Funston was lecturing when war was declared against Spain, and he organized the 20th Kansas volunteers, similar to the rough riders, of which he was made colonel. While his regiment was waiting for orders in San Francisco preparatory to going to the Philippine islands he met and married his wife. In November, 1898, he joined Gen. Merritt at Manila, which he aided in reducing. Leading the advance in pursuit of Aguinaldo, in April, 1899, he came to the Marilao river, on the other side of which a considerable force of the enemy was waiting. The bridge had been destroyed, but Funston determined to cross, and, selecting twenty out of those who volunteered to accompany him, he swam the river, drove the enemy back and took eighty prisoners. This example of bravery silenced whatever complaint there may have been against the rigid discipline of the colonel, and thereafter his men were eager to follow where he led, while the Filipinos were appalled at the reckless daring of the slender, undersized officer. A few days later, with only forty-five men, he crossed the Rio Grande at Calumpit on a raft, and after a desperate fight drove 2,500 of the enemy from an entrenched position. For this latter feat he was made a brigadier-general of volunteers, his commission dating from May 2d. At Santo Tomas, May 4, he was shot through the hand; but upon having it dressed, led a daring charge on the enemy's entrenchments. But his most important services in the Philippine campaign was his capture of Emilio Aguinaldo, in the spring of 1901. From his hiding place in the province of Isabela, in January, Aguinaldo had written letters denouncing the sub-chiefs who had taken the oath of allegiance to the United States and he had ordered certain insurgent forces in Southern Luzon to join him at the rendezvous in Isabela province. The messenger entrusted with this correspondence surrendered to Lieut. Taylor in February, and Gen. Funston, securing the information so long desired, determined upon a daring plan of capturing the insurgent leader. Taking with him Capts. H. W. Newton and Russel T. Hazzard, Lieuts. Oliver P. M. Hazzard and Burton J. Mitchell, and a company of eighty Macabebes who spoke the Tagalo language, he was landed on a remote beach, twenty-five miles south of Casiguran, Province of Principe, on March 13th. It was arranged that Aguinaldo's emissary and the Macabebe scouts should pass themselves off as a detachment of insurgent Tagalos, who had captured the five Americans, and were taking them as prisoners to Aguinaldo. Gen. Funston and his officers were thus exposed to the possibility of treachery, and, though every precaution was taken, there was still great danger. After a fatiguing and dangerous march of seven days and

nights, on March 22d the party had reached a point eight miles from Palaman, Aguinaldo's retreat, when a message was sent forward to the rebel commander. A prompt response being received, the journey was resumed, and on March 23, 1901, the day after Aguinaldo's twenty-ninth birthday, he was seized in his house before the duplicity was suspected. For this important capture, which opened the way to peace negotiations on a substantial basis, Gen. Funston was commissioned by Pres. McKinley a brigadier-general in the regular army, March 30, 1901, the promotion being considered an unusually long step upward. He is described as "a little man with a slight limp; a little man who weighs less than a hundred pounds, with a Vandyke beard and a sense of humor that bubbles in him like the effervescence of wine." Gen. Funston was married at Oakland, Cal., Oct. 25, 1898, to Ida, daughter of Otto and Theresa Blankart. She accompanied her husband to Manila, and while there spent much of her time in ministering to the wounded soldiers.

CONDIT, John, physician and U. S. senator, was born at West Orange, Essex co., N. J., July 8, 1755, eldest son of Samuel and Mary (Smith) Condit. His earliest American ancestor was John Condit, who emigrated from England or Wales in 1678, bringing with him his son, Peter. The latter was married to Mary Harrison, and their son, Samuel, was married to Mary Dodd, who became the mother of the second Samuel, our subject's father. John Condit was educated as a physician. Though there is no record of his preliminary training, he began to practice medicine at an early age, for when only twenty-one he was commissioned surgeon in the army, joining Col. Van Cortlandt's battalion, Heald's brigade, on June 29, 1776. It is known that he was present at the battle of Long Island, but soon afterward he resigned his commission and returned to the practice of his profession. As a physician he achieved great success, and as a citizen was highly regarded throughout his community, devoting both time and influence to the promotion of the general welfare. In 1785 he was one of the founders of the Orange Academy, of which he became a trustee, and to his exertions this institution owed much of its success in attaining its high standing in New Jersey. After serving for several years in the state legislature he was elected to the lower house of the national legislature, where he served in the 6th and 7th congresses (1799-1803) and again in the 16th congress (1819-20). In 1803 he was elected to the U. S. senate for the term ending in 1809; and at the end of that time he was appointed and regularly elected to fill the vacancy caused by the resignation of Sen. Aaron Kitchell. The latter term ended in 1811, and he was then re-elected, thus serving continuously in the upper house until 1817. He became assistant collector of customs at the port of New York, conducting the business in Jersey City. He was popularly called "colonel," having been elevated to that rank in the state militia subsequent to 1800. He was a man of generous impulses and of prompt and successful resources in the emergencies of his profession; possessed a sound and vigorous intellect, and combined integrity with unswerving patriotism. Sen. Condit was married to Abigail, daughter of Joseph Halsey, and had by this union four children, Caleb, Silas, Charlotte and a son, who died in infancy. He was married a second time, to Rhoda, a sister of his first wife, and by her had John S., Abigail (Smith) and Jacob A. Condit. His son, Silas (1777-1861), became a member of congress (1831-33) and was a member of the convention which framed the state constitution of 1844. Sen. Condit's death occurred at Orange, N. J., May 4, 1834.

BARKER, Jacob, financier, was born on Swan Island, Kennebec, Me., Dec. 17, 1779, son of Robert and Sarah (Folger) Barker, formerly of Nantucket, a descendant of Robert Barker, a Quaker, of the Plymouth colony (1628-91), and a cousin of Benjamin Franklin. He entered the counting house of Isaac Hicks, New York city, at the age of seventeen. While there he was sent by several prominent merchants to Nantucket to purchase ships for them, and successfully filled the commissions. By his economy and energy he became the owner of three ships and a brig, and controlled a large credit in the U. S. Branch Bank before he was twenty-one years old. In 1801 he engaged in business for himself as a commission merchant, to which occupation he subsequently added that of maritime trader. He opened a large oil trade with Russia, established a branch house in Liverpool, and soon became one of the largest ship-owners in the country. In 1806 he imported from London the first steam engine ever used in propelling vessels. When congress authorized the loan of \$16,000,000, in 1812, Mr. Barker undertook to raise the money by subscription, and obtained \$2,400,000, also making such arrangements as to enable him to procure in all about \$5,000,000. At the same time he proposed the establishment of a national bank, but it was not acted upon officially until 1815, after peace had been proclaimed. When the British army was advancing on the capital during the battle of Bladensburg Mr. Barker and Robert J. L. De Peyster took the only original full-length portrait of Washington, by Stuart, to a place of safety, at the request of Mrs. Madison. At the close of the war he resumed business, both in New York and Liverpool; established the Exchange Bank in Wall street; was elected to the state senate, and during that service advocated the construction of the Erie canal. As a member of the court of errors he was sustained in his contention against Chancellor Kent that maritime insurance was forfeited only upon the actual deviation of a vessel from its course, as stated in the policy, and not because the sailing-master intended to change the route. Since then this decision has been a law on that subject in England, France and America. In 1834 he removed to New Orleans, where he was admitted to the bar, and remained there until 1869, when he removed to Philadelphia. As a warm friend of Gov. DeWitt Clinton, he founded the "Union" newspaper for the purpose of supporting him in his candidacy for president, but his efforts were unsuccessful. Mr. Barker was one of the original members of the Society of Tammany Hall. On Aug. 27, 1801, he was married to Elizabeth, daughter of Thomas Hazard, of New Bedford, Mass. They had eight sons and four daughters. He died in Philadelphia, Pa., Dec. 26, 1871.

EPPE, John Wayles, senator, was born in Virginia in 1773. He received an academic education, studied law, and attained prominence in the practice of his profession in Richmond, Va. In 1803 he was elected as a Democrat to congress, and served continuously until March 3, 1811, and again from May 24, 1813, to March 2, 1815. Two years later he became a member of the U. S. senate, but resigned in 1819 on account of ill-health. He then retired to his estates in Chesterfield county, where the remaining years of his life were spent. He was married to Maria, daughter of Thomas Jefferson. She died at Monticello, in April, 1804, and his death occurred near Richmond, Va., Sept. 20, 1823.

Illinois State Capitol

EDWARDS, Ninian, first territorial governor of Illinois (1809-18) and third state governor (1826-30), was born in Montgomery county, Md., March, 1775, son of Benjamin and Margaret (Beal) Edwards. His father (1752-1826), a native of Virginia and a planter and merchant, had a mind of extraordinary force and a moral character of uncommon elevation. He represented Montgomery county in the state legislature for several years; was a member of the state convention which ratified the Federal constitution, and was a member of congress from the district in which he lived in 1794-95.

In early youth Ninian attended the classical school of Rev. James Hunt, and had as a fellow-pupil William Wirt, who, after the school disbanded, was employed by Benjamin Edwards as a tutor for his son and two nephews. Young Edwards completed his classical education at Dickinson College, Carlisle, Pa., and then studied law and medicine. About 1795 he went to Nelson, Ky., with his father's family, and before he attained his majority was elected to the legislature, being re-elected at the expiration of his term. In 1798 he was admitted to the bar of Kentucky and in 1799 to that of Tennessee. He was successively

clerk and judge of the general court; circuit judge (1803); judge of the court of appeals (1806), and chief-justice of Kentucky (1808). In 1806 he was a candidate for congress, his competitor being the celebrated Matthew Lyon, but on promotion to the court of appeals declined before election. In 1809 congress made provision for the organization of the territory of Illinois to take effect by the first of March. The new territory embraced the present state of Wisconsin and part of Minnesota, and the responsibilities

and duties connected with its administration appeared to be so great that John Boyle, of the Kentucky court of appeals, declined the office of governor, and Pres. Madison offered it to Edwards, who accepted it. He took the oath of office on June 11th and remained in office until Illinois was admitted, Dec. 3, 1818. Before congress had adopted any measures on the subject of volunteers he took precautionary measures for the defense of the states against Indian depredations, organized and equipped companies, and built a line of stockade forts from the Missonri to the Wabash river. These measures were highly appreciated during the war of 1812 and the frontier wars with the Indians, and he was especially commended by the government. In 1816 he was appointed one of three commissioners to treat with Indian tribes. He was one of the first two U. S. senators from Illinois, having been elected as a Democrat, and served from Dec. 4, 1818, until March 4, 1824, when he resigned to accept the appointment of minister to Mexico. In consequence of charges made against him by William H. Crawford, secretary of the treasury, and following the advice of friends, he voluntarily resigned this new office that he might collect testimony for a defense. That he lost none of his popularity at home, however, is shown by his election to the governorship in 1826 to succeed Edward Coles. The first institutions for higher education in Illinois were opened during his incumbency: McKendree College, Lebanon, by Methodists in 1828, and Illinois College, Jacksonville, by Congregationalists in 1829. The founders of the latter, graduates of the Theological Seminary at Yale, had formed an "Illinois band" for the express purpose of doing religious and educational work in the state, which became heavily indebted to them. When Gov. Edwards left the chair, Illinois had a population of 157,400, a gain of over 100,000 in two years. He was married, in 1802, to Elvira Lane, of Montgomery county, Md., and had five children, three sons and two

daughters. His sons, Ninian Wirt, Albert Gallatin and Benjamin Stevenson Edwards, were lawyers and educators; the first published in 1870 "History of Illinois;" and "Life and Times of Ninian Edwards." His daughters were Julia and Margaret Edwards. Gov. Edwards died at Belleville, St. Clair co., Ill., July 20, 1833.

BOND, Shadrach, first (state) governor of Illinois (1818-22), was born in Frederick county, Md., in 1773, son of Nicholas Bond. Members of his family had been citizens of Maryland for more than a century. He grew up on his father's plantation,

and his education was supplemented by home-training. He removed to the Northwest territory in 1794, residing with an uncle, Shadrach Bond, Sr., in the locality known as "the American bottom." About 1814 he removed to the old French town of Kaskaskia, three miles from the Mississippi river, which had become the capital of Illinois upon the organization of the territory in 1809. He became a member of the territorial legislature in early life, and was later chosen to represent Illinois in congress, where he served from Dec. 3, 1812, until April 18, 1814. By his exertions in the national house of representatives

he secured an act of congress in 1813 granting his constituents the right of pre-emption in order to secure their improvements. In 1814 Pres. Madison appointed him receiver of public moneys for Illinois territory, which, though a delicate trust to perform, he handled with such honesty and good sense as to give general satisfaction. The U. S. congress passed an enabling act April 18, 1818, in accordance with which a convention met in Kaskaskia, and, August 26, passed an ordinance accepting the terms of congress, and framed a state constitution. Its population at that time being about 3,500. The first election for state officers and members of the legislature was held in September, and Shadrach Bond and Pierre Menard, of Kaskaskia, were chosen governor and lieutenant-governor, respectively, without opposition. Vandalia became the capital in 1819, but it is supposed that the first state convention met at Kaskaskia, as the new state house was not completed until some time later. Gov. Bond strongly urged the construction of a canal from Lake Michigan to the Mississippi river. Toward the close of his term as governor he was appointed registrar of the land office at Kaskaskia, a position he held until old age. He died at Kaskaskia, April 11, 1830. A county in central Illinois was named in his honor.

COLES, Edward, second governor of Illinois, (1822-26) was born in Albemarle co., Va., Dec. 15, 1786, son of Col. John and Rebecca (Tucker) Coles. He was educated at Hampden-Sidney and William and Mary colleges, but on account of ill-health left the latter before taking his degree. In 1808 he inherited a plantation and a number of negroes, but having a hatred of slavery determined to remove to a free state. From 1809 until 1815 he was private secretary to Pres. Madison, who was a friend of the family. In 1814, in corresponding with Thomas Jefferson, another friend of his father, Coles entreated the latter to use his pen in favor of a general emancipation of the slaves in Virginia. Jefferson's letter, one of the most remarkable ones ever penned by him, contains the following sentence with regard to the slaves: "The love of justice and the love of country plead equally the cause of these people,

and it is a mortal reproach to us that they should have pleaded it so long in vain and should have produced not a single effort, nay, I treat not much serious willingness, to relieve them and ourselves from our present condition of moral and political reprobation." In 1815 Coles made a journey through Ohio, Illinois and Indiana territories to find a location for a new home. In 1816 he was sent to St. Petersburg, Russia, to adjust a difficulty with the czar, and upon his return, in 1818, he settled in Illinois. He attended the convention at Kaskaskia to form a state constitution, and used his influence to prevent any recognition of slavery by that instrument. He was appointed by Pres. Monroe registrar of the land office at Edwardsville, Madison co., in 1819. In 1822 he was elected governor of the state. In his inaugural address at Vandalia, in December, he deplored the fluctuating and denigrated state of the circulating medium of the state, and the mania for establishing banks, dwelt on the advantages which would result from the connection by navigable channels of the waters of the Mississippi with those of the great northern lakes, and recommended that provision be made for the abrogation of slavery in Illinois. The pro-slavery members of the legislature, contending that the ordinance of 1787, prohibiting slavery in the Northwest territory, was not binding on Illinois, which had been a part of Virginia, favored the calling of a convention to alter the constitution of 1818. The senate passed a resolution to the effect that if two-thirds of all the members of both houses should recommend to the people to vote for or against a convention, it would be in accordance with the requirements of the constitution. The bill was lost in the house by one vote, that of Nicholas Hansen, whereupon Hansen was unseated, and John Shaw, pro-convention, taking his place, a constitutional convention was called to meet in August, 1824. Both parties now issued appeals to the people, that of the anti-conventionists being signed by eighteen members of the legislature, ten of whom were from slave holding states. In his "History of My Own Times" Gov.

Reynolds says: "Then followed two years of the most furious and boisterous excitement that was ever witnessed in Illinois." Neighborhoods, and even families, were divided by the controversy. During this session of the legislature the senate passed resolutions requiring Gov. Coles to lay certain papers before it, an unwarranted action, with which he refused to comply. After the adjournment of the legislature his house was mobbed. Gov. Coles conducted a vigorous correspondence with anti-slavery men in and out of the state; secured control of the only newspaper in Vandalia, the Illinois

"Intelligencer"; circulated pamphlets on the general character and effects of slavery, and was instrumental in forming anti-slavery societies in fifteen counties of Illinois. Among his most able supporters were Rev. John M. Peck, a Baptist minister, and Morris Birkbeck, an English farmer who had settled in Illinois; the latter exerted great influence by newspaper articles signed "Jonathan Freeman." In August, 1824, the convention met, and the scheme for a revision of the constitution was defeated by a majority of 1,872, the Federalists being 11,772. In November an extra session of the

Shadrach Bond

Edward Coles

lature was convened to legalize and render effective the vote of the state in the election of a president and vice president, and to elect a congressman in place of Ninian Edwards. In that year Illinois cast her first electoral vote (for Adams) through Hon. Daniel P. Cook, her only representative in congress. Gov. Coles delivered his valedictory address on Dec. 5, 1826, and renewed his appeal to the legislature to eradicate slavery. He suffered much annoyance from the pro-slavery men in the state, and before he left the chair was brought to trial for having failed to give bonds that the negroes he had emancipated should not become county charges. He was committed and heavily fined, but obtained a new trial, in 1826, before the supreme court of the state, which overruled the decision of the lower court. On retiring from public life he cultivated his farm, and was active in promoting agriculture, having formed the first society for that purpose in the state. He also traveled extensively in the eastern states, and in 1833 settled in Philadelphia, where, in November of that year, he was married to Sally Logan, daughter of Hugh Roberts, and descendant of James Logan, secretary of the province of Pennsylvania with William Penn. His oldest son, Edward, and a daughter survived him. A county in Illinois, formed in 1830, perpetuates his name. Gov. Coles died in Philadelphia, July 7, 1868.

REYNOLDS, John, fourth governor of Illinois (1830-34), was born in Montgomery county, Pa.,

Feb. 26, 1788, son of Robert and Margaret (Moore) Reynolds, who had emigrated from Ireland in 1785. When he was six months old the family removed to Tennessee, settling at the base of Copper Ridge mountain, near Knoxville, but fear of the Indians caused them to remove again in 1800, this time to the vicinity of Kaskaskia, Ill., and finally to the vicinity of Collinsville, in the same county. The son had a little schooling of a primitive kind, after which he studied surveying. In 1809 he entered

the College of Tennessee at Knoxville, and in the following year began the study of law at Knoxville, being admitted to the bar in 1812. He was a scout for a short time in the war of 1812, and earned the nickname of "Old Ranger." Opening a law office at Cahokia in 1813, he soon had a press of business in law cases, especially in litigation over land titles. He also carried on a store at that place, and another at Illinois-town. The first state legislature made him an associate justice of the supreme court (1818), and he served until 1824. He was also a judge of the circuit court. The attempt in 1824 to revise the state constitution in the interest of slavery had his strong support. In 1826-30 he sat in the legislature, and in 1830 took the governor's chair, having defeated William Kinney in a close contest. The most important event during his administration was the Black Hawk war (1831-32), the culmination of troubles with the Sac, Fox and other Indians whose right to hunt and raise corn in the northwest part of the state had been violated by white settlers. In 1831 the Indian chief, Black Hawk, attempted to drive the whites from the Rock river region, but was driven from the state and induced to sign a treaty, by which he pledged himself never to return. In April, 1832, he reinvaded the Rock river region, massacred the inhabitants and burned their farms, and Gov. Reynolds, who was *ex-officio* commander-in-chief of the forces of the state, issued a call for volunteers. The company raised in Sangamon county

electd a young law student, Abraham Lincoln, as its captain. During May and June Gov. Reynolds was in the field himself. The last engagement was at Bad Axe river, Aug. 1st-2d, when Black Hawk was completely overwhelmed and most of his followers killed or captured. The final defeat of the Indians and their removal beyond the Mississippi was followed by a large immigration into the state, especially from New England and the South. In 1834-37 he was a member of congress, filling the vacancy caused by the death of Charles Slade, and in 1839-43 again sat in that body, while in 1846-48 and in 1852-54 he served in the Illinois legislature, failing of election to the state senate. In 1837 he was the chief constructor of the first railroad in the Mississippi valley, a line six miles in length, extending from the coal mines at Bluff to the Mississippi river, opposite St. Louis. It was operated by horse-power and was never profitable, a turnpike constructed soon after giving better facilities for delivering the coal. For a short time he was associated in practice with Lyman Trumbull, afterward U. S. senator. In the summer of 1839 he went to Europe by appointment of Gov. Carlin to negotiate a loan of \$4,000,000, and for that purpose visited London, Paris and other cities, but without much success, the financial credit of Illinois being low. Gov. Reynolds was strongly southern in his sympathies, though he approved Pres. Jackson's course in suppressing nullification in South Carolina in 1832. In 1860 he attended the Democratic national convention at Charleston, S. C., as an anti-Douglas delegate, but after the October elections, when it became apparent that Lincoln's popularity was increasing, he issued an address advising the support of Douglas. After Lincoln's election he sent a letter to Jefferson Davis advising a resort to arms by the South. He was a man of simple manners and genial disposition. In conversation he usually dropped into the vernacular of the "poor white" of Kentucky and Tennessee origin, a class numerously represented in southern Illinois, and introduced slang of his own coining. During the presidential campaign of 1856 Mr. Reynolds was one of the editors of the "Star of Egypt," a newspaper published at Belleville in the interest of James Buchanan. Besides numerous handbills, appeals and other ephemeral literature of a political character, printed from time to time on a press kept in his office, he published "Pioneer History of Illinois" (1848); "Glances at the Crystal Palace and Sketches of Travel" (1854), and "My Life and Times" (1855). He was married, at Cahokia, in 1817, to a Mrs. Lacroix, of French descent, who died without issue by him in 1834, and in the same year he was married to a resident of Washington, D. C., who survived him a few months. Gov. Reynolds died at Belleville, Ill., May 8, 1865, which had been his home since 1832.

EWING, William Lee Davidson, senator and acting governor of Illinois (1834), was born near Nashville, Tenn., in 1795, son of Rev. Finis Ewing, one of the founders of the Cumberland Presbyterian Church, and Peggy, daughter of Gen. William Davidson, of North Carolina, a revolutionary soldier. His ancestors were Scotch-Irish, and those on the paternal side settled in Virginia prior to the revolutionary war. He was a learned man and a fine Latin scholar. He took up law as a profession, and about the time Illinois was admitted to the Union (1818) removed from Tennessee to Shawneetown, then the most flourishing town in the new state. In 1825 he was appointed by Pres. Monroe receiver of public moneys at Vandalia, whither the seat of government was transferred from Kaskaskia in December of that year. During his incumbency of this office he suffered serious pecuniary losses in consequence of the robbery of his office and the destruction by fire

of the state house in which it was situated. During the Black Hawk war he served with some distinction in the "Spy battalion" of militia, and thereafter was commonly called "general." In 1832 Mr Ewing was elected by the Jacksonian Democrats as senator in the legislature from the district comprising Fayette, Marion and Clay counties. Two years later he was chosen speaker of the senate, and by virtue of his position he became governor of the state, Gov. Reynolds and Lieut. Gov. Casey having both resigned to take seats in congress. He filled the executive chair for fifteen days, until Gen. Duncan was inaugurated. No similar conjuncture of affairs has ever occurred in the annals of Illinois. On Dec. 29, 1835, he was elected by the legislature to the U. S. senate, to fill the vacancy occasioned by the death of Hon. Elias K. Kane. Upon the expiration of his senatorial term, March 4, 1837, he was a candidate for reelection, but was set aside to make room for Judge Young. In 1840 he was elected a representative in the legislature from Fayette county, and was chosen speaker of the house. In 1843, during the administration of Gov. Ford, he was elected by the legislature auditor of public accounts, to succeed Gen. Shields, and continued in office until his death. At the time of his decease his contemporary and friend, William Walters, wrote of him as follows: "In his position Gen. Ewing was most amiable, benevolent and kind in spirit, brave and manly, in deportment most courteous, gentlemanly and obliging. His mind was quick and ready, mastering the most difficult subject." Gen. Ewing was married at Vandalia to a daughter of Elijah E. Berry, the first state auditor. He died in Ohio, March 25, 1846.

DUNCAN, Joseph, fifth governor of Illinois (1834-38), was born in Paris, Ky. Feb. 22, 1794, son of Maj. Joseph and Ann (McLaughlin) Duncan, of Scotch descent. His father was a native of Virginia, but in revolutionary times joined the early pioneers in Kentucky, in which state he spent several years, returning with his family in 1790. In 1812 young Duncan enlisted in the 17th regiment U. S. infantry, in which he was ensign. He was with Col. Croghan, who was in command of Fort Stephenson, now Fremont, O., with a force of less than one hundred and fifty men, when news came of the approach of the English army under Gen. Proctor, in August, 1813. Gen. William Henry Harrison ordered Col. Croghan to abandon his exposed position, which the latter, by advice of his officers, refused to do, Duncan being the first to advocate disobedience. Proctor, with 500 regulars and about as many Indians, demanded the surrender of the fort, and being refused, cannonaded it for forty hours, and attempted an assault, which was repulsed by the Americans, though they had but little ammunition. Duncan, in command of the reserves, was always where the fighting was fiercest. The British retreated in confusion, and being unable to continue their advance toward Cleveland, the whole character of the campaign was changed. For gallantry in the defense of Fort Stephenson gold medals were presented to Duncan and the other officers by congress, in 1835. A monument now stands at Fremont to commemorate the battle. During the winter of 1814-15 Duncan, then a lieutenant, commanded a company of infantry and rangers sent into Canada to watch the movements of the British army and maintained his camp within twenty miles of the British headquarters. After peace was declared he retired from the army, but later became major general of the militia in Illinois, to which state he removed from Kentucky in 1818, and in 1821 he commanded the Illinois troops in what was known as the first Black Hawk war. He settled first at Fountain Bluff, on the Mississippi, and subsequently at Jacksonville, which remained his home until his death.

Duncan's political career began in 1823, when he was elected a state senator. In 1826 he was sent to congress as the sole representative from Illinois, and served during three terms, 1827-33. While in Washington he did everything he could to induce the government to build a canal from Lake Michigan to the Illinois river, the necessity for which he appreciated with unusual foresight. On Dec. 3, 1831, he was inaugurated governor of Illinois, making no personal canvass but carrying on his campaign from Washington by means of printed addresses. While governor he labored continuously for the interests of the Illinois and Michigan canal. As early as 1821, when a state senator, he had introduced a bill for the establishment of a state public school system. The bill became a law, but was too much in advance of the times and was repealed. As governor he repented his recommendation for public schools in every message, but to no use, and it was not until 1851 that another public school law was passed. He also urged the state to advance higher education by encouraging colleges. Two important institutions of learning were opened during his incumbency, Knox College, Galesburg (1837), and Monticello Seminary, Upper Alton, called at that time "the Mount Holyoke of the West." In November, 1837, Rev. Elijah P. Lovejoy, publisher of an anti-slavery newspaper at Alton, was killed in an attempt to defend his office against a mob, and Illinois was brought into prominence as a state where freedom of the press was unknown. Duncan retired from the governorship in 1838, but ran again in 1842, this time as a Whig. He was defeated, largely by the vote of the Mormons, who voted solidly with the Democrats in return for supposed favors in the legislature. This

defeat closed his political life. Though a southerner by birth he looked upon slavery as "a great moral and political evil." He contributed largely to the cause of temperance, to the Presbyterian church of which he was a member, and to the Illinois College, giving to the last named land valued at more than \$10,000 and a large amount in cash. He was married, in Washington, D. C., May 13, 1828, to Elizabeth Caldwell, daughter of James R. Smith, of New York city. Her mother was a daughter of James Caldwell, the "fighting parson" of New Jersey. Of his ten children only three grew to maturity—Mary Louisa, wife of Charles E. Putnam, of Davenport, Ia.; Joseph Duncan, of Chicago; and Julia Smith, wife of Edward P. Kirby, of Jacksonville. Gov. Duncan died at Jacksonville, Ill., Jan. 15, 1844.

CARLIN, Thomas, sixth governor of Illinois (1838-42), was born near Frankfort, Ky., July 18, 1789, son of Thomas Carlin, of Irish descent. It was not until he attained manhood that he was able to apply himself to study, and he was chiefly self-educated. In 1800 the family removed to Missouri, and in 1812, his father having died, young Carlin removed to Illinois. He served as a volunteer under Gen. Howard during the war of 1812, and as a ranger was engaged in several expeditions against the Indians. He was married to Rebecca Hewitt in 1814, and after living in Madison county, on the Mississippi, for four years, removed to Montico county, of which he was one of the pioneers. When

Carrollton was selected as the county seat it was laid out upon his lands; he made liberal donations of land for public buildings. He was the first sheriff of his county; served two terms as state senator, and was afterward a representative in the legislature. During the Black Hawk war (1832) he had command of a battalion, and again did effective work as a ranger. In 1834 Pres. Jackson appointed him receiver of public moneys at Quincy, and he was engaged in that capacity when he was elected governor of Illinois

by the Democrats in 1838. He advocated a vigorous prosecution of the system of internal improvements begun by his predecessor, and the legislature, seconding his recommendations, authorized additional works involving an outlay of nearly \$100,000 and the negotiation of a loan of \$4,000,000 in aid of the construction of the canal. During his

administration the Sangamon and Morgan railroad was opened to traffic (1839), and the first locomotive seen in the valley of the Mississippi was put on the track at Meredosia. The Mormons, under the leadership of Joseph Smith, emigrated into Illinois in the fall and winter of 1838. They founded the city of Nauvoo, to which the legislature granted a liberal charter, and within the next five years they numbered about twenty thousand in the state. The last year of his term was one of great depression. The State Bank at Shawneetown, with a circulation of \$3,000,000, and the Illinois Bank, at the same place, with a circulation of \$1,500,000, failed, rendering worthless the only money there was in the state, and bringing ruin to thousands of families. At the close of his administration he retired to his farm at Carrollton, but reappeared in public life in 1849, when he filled out the unexpired term of J. D. Fry in the legislature. He died at Carrollton, Ill., Feb. 14, 1852, survived by his widow and seven children.

FORD, Thomas, seventh governor of Illinois (1842-46), was born near Uniontown, Fayette co., Pa., Dec. 5, 1800, son of Robert and Elizabeth Logue (Forquer) Ford. His father, probably a native of Delaware, was of English descent; his mother was the daughter of Hugh and Isabella (De-lany) Logue, natives of Ireland. Elizabeth Logue was married to a revolutionary soldier named Forquer (Farquhar), by whom she had several children, one of whom, George, became attorney-general of Illinois. Her second husband, Robert Ford, died about 1802, leaving the family very poor, but she was a woman of extraordinary courage and enterprise, and when the governor of Louisiana territory offered lands free to actual settlers in what is now Missouri she started west, with her eight children and a few friends, in 1804, only to find on arriving at St. Louis that the United States had purchased Louisiana territory and that lands could only be had by paying for them. The Fords thereupon settled at New Design, then in Randolph (now Monroe) co., Ill., and rented a farm. Young Thomas studied at home, attended Transylvania University, Lexington, Ky., for one year, studied law, and in 1823 was admitted to the bar. For six months, in 1824, he aided Duff Green in editing a newspaper in St. Louis, which advocated the election of Andrew Jackson to the presidency. In 1825 he joined his step-brother, George Forquer, in practice, at Edwardsville. In the following year he removed to Galena, but in 1829 settled at Quincy. In the latter

year he was appointed state attorney by Gov. Edwards and was reappointed by Gov. Reynolds in 1831, his circuit, the 5th, comprising fifteen counties. A new circuit, the 6th, embracing Peoria and all north thereof, was created in 1835, and he was appointed its judge. When the municipal court of the city of Chicago, having the same jurisdiction as a circuit court, was created in 1837, he was elected judge, and in 1840 he was placed on the bench of the supreme court. Though not an active politician he received the Democratic nomination for governor in 1842 in the place of Adam W. Snyder, deceased, and was elected by a majority exceeding 8,000 over Joseph Duncan, the Whig candidate. His administration was characterized by vigor and independence, and he distinguished himself by his successful stand against the policy of repudiation of the state's indebtedness, which was advocated in the legislature as the only way to free the people from financial distress. So important were his services in this crisis that in a speech delivered years later by Judge Caton, of Chicago, he was spoken of as one of the three men (the others being Abraham Lincoln and Gov. Coles) to whom Illinois was especially indebted. Under his successor and in accordance with the constitution of 1848 an annual tax was levied, applicable especially to the payment of the state debt, which was finally liquidated. During Gov. Ford's administration the Mormon war, so called, took place; the prophet, Joseph Smith and his brother, Hyrum, lost their lives, and their adherents were removed from the state. The Mexican war also began, and largely through Gov. Ford's influence Illinois had a prominent part in that contest. He took an active interest in the measures for internal improvement, especially the completion of the Illinois and Michigan canal. Congressman John Wentworth said of him that he had more than any other man contributed to the allaying of sectional prejudices within the state. He left the governor's chair a bankrupt and resumed the practice of the law at Peoria, but his later years were chiefly spent in writing his "History of Illinois, From Its Commencement as a State in 1818 to 1847." This work, edited by Gen. James Shields, and published (1854) for the benefit of Gov. Ford's family, is still one of the best authorities on the history of that particular period. Gov. Ford was married at Edwardsville, Ill., in 1828, to Frances Hambaugh, by whom he had two sons and three daughters. She died at Peoria, Oct. 12, 1850; his own death occurred at that place, Nov. 3d of the same year. A handsome monument to his memory was erected by the state in 1895.

FRENCH, Augustus C., eighth governor of Illinois (1846-53), was born at Hill, Merrimack co., N. H., Aug. 2, 1808. His father died when he was a child, and his mother when he was nineteen years of age, the care of four younger brothers and a sister thereafter devolving upon him. After attending a district school irregularly he entered Dartmouth College, but had not sufficient means wherewith to finish the course, and returning to his home took up the study of law. He was admitted to practice in 1823, and during the following year emigrated to Albion, Edwards co., Ill. In 1825 he removed to Paris, Edgar co., a more advantageous place, and acquired a lucrative practice; in 1837 entered the legislature, and in 1839 was appointed receiver of public moneys at Palestine, Crawford co., which became his place of residence. He was a Polk and Dallas elector in 1844. Having made him-

self popular by his advocacy of a war with Mexico, he was elected governor of the state by a large majority. Gov. French pushed forward the work begun by his predecessors, recommending the registration and funding of the state's debt. During his first term, in February, 1846, the last of the Mormons left Illinois, the charter which allowed them to settle at Nauvoo having been revoked by the legislature in 1845. In April, 1848, the Illinois and Michigan canal was completed at a cost of \$6,409,509, and the second railroad in the state, the Galena and Chicago Union, was begun. A new state constitution was adopted in that year, and the first election under it was held in December, at which time Gov. French was re-elected. He served the state with equal faithfulness during his second term; cut down expenses and liquidated the debt, and when he left the chair it was with the proud consciousness that the credit of Illinois was fully restored. On the expiration of his term he became professor of law at McKendree College, and held the office for many years. Mr. French was elected to the constitutional convention of 1862, and his opinions regarding the remodeling of the fundamental laws of the state had great weight in that assembly. He died at Lebanon, Ill., in 1868.

MATTESON, Joel Aldrich, ninth governor of Illinois (1853-57), was born at Watertown, Jefferson co., N. Y., Aug. 2, 1808, son of Elnathan and Emice (Aldrich) Matteson. His father, a native of Canterbury, England, was in good circumstances, and on settling at Watertown engaged in farming on an extensive scale, in which he was aided by Joel, who was an only son. The latter acquired a fair education, and before he was of age opened a store in Prescott, Canada. After a year's experience of business life he returned to Watertown, attended the academy there, and taught school at Brownsville, N. Y., for two terms. He was employed for a time as foreman of the first railroad built in the state of South Carolina. He settled near Joliet, Kendall co., Ill., in 1833, and farmed until the speculation mania of 1836 set in, when he sold his lands and removed to Joliet to engage in business. In 1838 he took heavy contracts for the construction of the Illinois and Michigan canal, and prosecuted the work with great energy. In 1842 he was elected to the state senate as a Democrat, being chairman of the committee on finance, and he was re-elected for the two following terms. He was elected governor of Illinois in 1852, and while in office was an unsuccessful Democratic candidate for the U. S. senate. The period of his incumbency was one of great activity in railroad building. The Illinois Central, the Chicago and Rock Island, the Chicago, Burlington and Quincy, the Alton and St. Louis, and the Chicago and Galena Union were all completed. The first system of free schools was introduced and education in general received an impetus. Gov. Matteson was president of the Chicago and Alton railroad for several years, and had a controlling interest in banks in Joliet, Peoria, Quincy and Shawneetown. He was married, in October, 1831, to Mary, daughter of Nathaniel and Charissa (Sterling) Fish. They had three sons and four daughters. Gov. Matteson died in Chicago, Ill., Jan. 31, 1873.

BISSELL, William Henry, tenth governor of Illinois (1857-60), was born at Hartwick, near Cooperstown, N. Y., April 25, 1811, son of Luther and Hannah Bissell. After attending a district school and studying by himself he taught school and by this means earned enough to enable him to enter Cooperstown Academy. In 1835 he was graduated at the Jefferson Medical College, Philadelphia. After practicing for two years in Steuben county, N. Y., Dr. Bissell removed to Waterloo,

Monroe co., Ill., where he taught school. In 1840 he was elected to the state legislature, and after serving for one term was persuaded by his friends that he ought to remain in public life; with this end in view he entered Transylvania University, Lexington, Ky., to study law. Upon his admission to the bar, in 1843, he opened an office at Belleville, St. Clair co., and in 1844 was made prosecuting attorney for the 2d judicial district. He enlisted a company in the 2d Illinois volunteers for the Mexican war and was elected its colonel. In 1848 he was elected to congress as an independent Democrat and served from Dec. 2, 1849, until March 3, 1855. While there he opposed the Missouri compromise and made a speech of great eloquence on slavery, which was in effect a crystallization of Northern sentiment on the subject and which put him among the leaders of the anti-slavery party in congress. This speech involved him in a controversy with the Southern Democrats, as did another in reply to one by James A. Seddon, of Virginia, who had contrasted the bravery of the Northern and Southern soldiers to the disadvantage of the former, especially of the Illinois troops. This answer, which was scorching in its sarcasm, contained an allusion to the Mississippi regiment of which Jefferson Davis had been colonel, and the latter, then a member of the senate, challenged Col. Bissell to a duel. Col. Bissell accepted, and chose common army muskets, but Col. Davis' friends brought about an amicable arrangement. A Republican state convention met at Bloomington, May 29, 1856, and unanimously nominated Bissell for governor. He was elected by a plurality of 4,729 votes. The legislature, however, was politically opposed to him and there was no great achievement in legislation during his term. He was married, in October, 1840, to Emily S., daughter of Col. John James, of Waterloo, Monroe co., by whom he had two daughters. She died in 1846, and in 1852 he was married to Elizabeth Kintsing, daughter of Elias Kent Kane, of Kaskaskia, U. S. senator. He died in Springfield, Ill., before the expiration of his term, March 18, 1860.

WOOD, John, acting governor of Illinois (1860-61), was born at Moravia, Cayuga co., N. Y., Dec. 20, 1798, son of Daniel and Catherine (Crouse) Wood. His father was a surgeon and captain during the revolutionary war, and received a tract of land in Cayuga county, N. Y., as bounty for his services. He left home in November, 1818, intending to settle in Tennessee or northern Alabama, but after spending the winter in Cincinnati turned northward, and in the summer of 1819 arrived at Shawneetown, Ill. He spent two years on a farm in Pike county. In 1822 he bought land and built the first cabin at what is now Quincy, Ill., and for sixty years thereafter he was the foremost figure in all matters relating to the city that he founded and made his home. Strong opposition to slavery restrained him from removing to Missouri, and led him, though equally opposed to the measures of the abolitionists, to defeat the movement in 1824 for a new state constitution recognizing slavery. He canvassed the greater part of the military tract of bounty lands from Fulton and Hancock counties so that, between the Mississippi and Illinois rivers, with such success that out of 103 votes cast in that section 99 were against it. He originated the movement for the organization of Adams county of what is now Quincy, and was made the county seat. To complete the organization

John Wood.

of John Quincy Adams then the president, the public square in Quincy was called "John's square," but it was subsequently changed to Washington square. During the Black Hawk war (1832) Wood served as a private. He was a town trustee of Quincy in 1831-40, was many times alderman and seven times mayor. In 1830-51 he represented the Whigs in the state senate, and in 1856 was chosen lieutenant governor, succeeding to the executive chair upon the death of Gov. Bissell in 1860. His successor, Gov. Yates, appointed him one of the five delegates to the peace convention at Washington, in February, 1861. When war was declared he was appointed quartermaster of the state. Still retaining this position he was commissioned colonel of the 137th Illinois regiment in 1864, and after taking the field was placed in command of a brigade at Memphis, where he was stationed at the front in Gen. Forrest's raid on that city. Gov. Wood was married, in January, 1826, to Ann M., daughter of Joshua Streetor, of Salem, N. Y. They had eight children. Mrs. Wood died in 1863, and in June, 1865, he was married, at Quincy, to Mrs. Mary A. Holmes, widow of Rev. Joseph T. Holmes. She died Jan. 20, 1887. Gov. Wood's death occurred in Quincy, June 4, 1880. A monument to his memory was dedicated by his townsmen, July 4, 1883.

YATES, Richard, eleventh governor of Illinois (1861-65), was born at Warsaw, Gallatin co., Ky., Jan. 18, 1818, son of Henry and Millicent (Yates) Yates, his parents being cousins. The first of the family in this country, Dr. Michael Yates, emigrated from England to Virginia before the revolution, and was married to Martha Marshall, sister of Chief-Justice Marshall. Their son, Abner, removed to Kentucky, in 1788, and their grandson, Henry, with his family, from Kentucky to Illinois, in 1831. Richard Yates was educated at Miami University, O., Georgetown College, Ky., and Illinois College, Jacksonville, being one of the two members of the first graduating class at the last named institution, in 1839. On leaving college he studied law in the office of John J. Hardin at Jacksonville, but finished his course at Transylvania Law School, Lexington, Ky., and on admission to the bar, in 1837, began practice in Jacksonville. He quickly gained distinction as a lawyer, but by natural inclination was drawn into politics. He canvassed Illinois in 1840 for Harrison, his ready speech and personal magnetism giving him peculiar advantage, and in 1842 he was elected to the legislature by the Whigs. By re-election he served until 1850, and then entered the national legislature, of which he was the youngest member. In 1852 he was re-elected, and during this term opposed the repeal of the Missouri compromise, and took an advanced position among the opponents of slavery. Nominated for a third term in 1854, he was defeated, a Democratic legislature having redistricted the state, and from that time until 1860 he was chiefly engaged in law practice, and in promoting the interests of the Tonia and Petersburg (later the Chicago and Alton) Railroad Co. of which he was president. In the presidential canvass of 1856 he made some speeches in behalf of John C. Frémont; in 1858 he took the stump for Abraham Lincoln against Douglas, and two years later gave powerful aid in removing Illinois from the list of Democratic states. He was elected governor of Illinois in 1860, entering upon his duties Jan. 14, 1861. In his inaugural address, war being imminent, he declared that the "whole material of the government, moral, political and physical, if need be, must be employed to preserve, protect and defend the constitution of the United States." Immediately after Fort Sumter was fired upon he convened the legislature in extra session to adopt such measures as might be necessary, and also enri-

soned Cairo with troops. In a letter concerning the destruction of a flag that had been raised at a recruiting station Gov. Yates wrote: "If any one tries to prevent you from raising the flag of your country upon the soil of Illinois, shoot down your assailant, and if a jury can be found in the state that will commit any one of you for so doing, I will pardon him." Pres. Lincoln's first call for troops was gladly reiterated by him, and the quota was more than filled, while in response to the call of May 30th, 81,952 men, nearly double the quota, enlisted for three years. The aggregate for the entire war was 259,147. Ulysses S. Grant was appointed mustering officer for the state, and in June, 1861, was commissioned colonel of the 21st regiment. Gov. Yates was one of the first to favor emancipation, in letters and telegrams to Pres. Lincoln, and in June, 1862, recommended the enlistment of "loyal blacks." The legislature, which convened in January, 1863, was controlled by "Southern sympathizers," who tried to thwart his plans, and nearly passed a joint resolution favoring peace and compromise with the seceded states. To further embarrass him they took a recess in February, and did not reassemble until June, when he protracted the body and conducted the war operations of the state until the following year, when a Republican legislature came into power. By this body he was elected to the U. S. senate for

full term, and then took part in the reconstruction measures of the government, the question of state rights and national sovereignty, the homestead law and the bill for the construction of the Pacific railway. At the close of his term he returned to the practice of his profession, as one of the "war governors" on whom Lincoln leaned in his darkest hours, as well as a statesman of the highest type, Gov. Yates is one of the conspicuous figures in the history of Illinois. He was a dignified, graceful and forcible speaker, and when he had won the attention of his audience he kept it to the end. He was married, Sept. 1, 1838, to Catharine, daughter of William and Mary Geers. She survived him with a daughter, Catharine, and two sons, Henry and Richard, the former being assistant postmaster of Jacksonville, and U. S. internal revenue collector, the latter, governor of Illinois, in 1901-5. Gov. Yates died in St. Louis, Mo., Nov. 27, 1873, while returning from Arkansas, where he had been examining a railroad as U. S. commissioner. He was buried at Jacksonville.

OGLESBY, Richard, twelfth, fourteenth and eighteenth governor of Illinois (1865-69; 1873; 1885-89), was born in Oldham county, Ky., July 25, 1824, son of Jacob and Isabel (Walton) Oglesby, natives of Amherst county, Va. Left an orphan at the age of eight, he was taken care of by an uncle, and with him lived in several states, finally settling at Decatur, Ill., in 1835, where he attended school for a short time. In 1843 he began the study of law in the office of Judge Silas W. Robbins in Springfield, and was admitted to the bar in 1845. Upon the outbreak of war with Mexico he joined the 4th Illinois regiment, was commissioned first lieutenant of company C, and took part in the siege of Vera Cruz and the battle of Cerro Gordo, in which twelve of his men were killed and forty wounded. He resumed practice in Decatur, Ill., in 1847, but spent a year in a law school in Louisville, and in 1849 he went to California, returning in 1851 with several

thousand dollars' worth of ore, which he had coined in New Orleans. Again resuming practice at Decatur, he met with success. In 1856-57 he visited Europe, Egypt, Syria and Palestine, and on his return used the varied knowledge he had acquired in lecture and campaign speeches. He was nominated for congress in 1858 on the Republican ticket and was defeated by James C. Robinson. In 1859 he was elected to the senate, which, for the first time, became Republican. Resigning in 1861 on the call to arms, he became colonel of the 8th regiment, Illinois volunteer infantry. In February, 1862, he

was given command of the 1st brigade, 1st division, army of west Tennessee. His men were the first to enter Fort Henry, and for gallant conduct at the investment and capture of Fort Donelson he was made brigadier-general. At the second battle of Corinth, Gen. Oglesby was so severely wounded that when carried from the field he was supposed to be dying, and for eight months he lay at his home in Decatur in an almost hopeless condition. As soon as he was strong enough to bear excitement he was invited to speak before

the state senate, which, as well as the house, was largely Democratic, and had done all in its power to nullify the war measures of Gov. Yates. On that occasion Gen. Oglesby delivered one of the most thrilling speeches ever heard in the legislature, denouncing the proceedings of its members as treason, their professions of love for the Union as hypocrisy, and warning them of the wrath of the people and the indignation of the soldiers. That speech made him the candidate for governor in 1864. Meanwhile he had been made major-general of volunteers and had been assigned to the command of the 16th army corps, but his wounds prevented further action in the field, and he was placed on court-martial duty in Washington, where he assisted in the trial of Fitzjohn Porter and Surgeon-Gen. Hammond. In 1864 he was nominated for governor, his opponent being the same James C. Robinson who had defeated him for congress in 1858, and he was elected by a majority of 32,000, the largest ever given a candidate at that time. Among the laws enacted during his term of office were those creating the state board of equalization and founding the Industrial University at Champaign. In November, 1872, he was again elected governor of the commonwealth, but was soon after transferred to the U. S. senate, taking his seat March 4, 1873. Upon the expiration of his term in 1879 he declined a re-election. In November, 1884, he was again elected to the office of governor, and at the close of his term, Jan. 1, 1889, he withdrew from public life and lived most of the time on his farm near Elkhart, Ill. "Uncle Dick," as he was fondly called by men of all parties, was one of the best known men in the state and his name is associated with those of Lincoln, Grant, Logan, Yates and Crumhull, whose services gave Illinois renown during the period of the civil war. "In all his undertakings," said a contemporary, "he was an enthusiast, but his enthusiasm was supreme in his thinking and acting." He was married, in 1874, to Emma, daughter of John D. Gillett, of Elkhart park, and had seven children. He died at Ogleshurst, near Elkhart, Ill., April 24, 1899.

PALMER, John McAuley, thirteenth governor of Illinois (1869-73), was born at Eagle Creek, Scott co., Ky., Sept. 13, 1817, son of Louis D. and

Ann Hansford (Tutt) Palmer. His earliest American ancestor, Thomas Palmer, emigrated from England to Virginia in 1621. His grandfather, Isaac Palmer, served in the revolutionary war, and his father served in the war of 1812. In 1831, on account of strong anti-slavery principles, Louis Palmer with his family removed from Kentucky to Illinois, settling at Paddock's Prairie, near Upper Alton. The son entered Shurtleff College in 1834, but was obliged to discontinue his studies for lack of means. In 1838 he took charge of a district school and began the study of law. In 1839 he settled at Carlinville, and in December of that year was admitted to the bar. He was elected probate judge of Macoupin county in 1843, was a delegate to the state constitutional convention in 1847, and was a state senator in 1852-54, resigning his seat because he had displeased his constituents by opposing the Kansas Nebraska bill. He presided over the first Republican convention of the state in 1856; was a delegate to the national Republican convention at Philadelphia in 1859, was an elector on the Republican ticket in 1860, and was a delegate to the national peace convention in 1861. In the civil war he accompanied Fremont in his Springfield campaign as colonel of the 14th Illinois volunteer infantry. In November he was brevetted brigadier-general, and accompanied Pope on his New Madrid expedition. In August, 1862, Gen. Palmer, being on sick leave, organized the 122d Illinois regiment, and in September was given command of the 1st brigade of the 1st division, army of the Mississippi, being ordered to join Gen. Buell. For gallantry and skill at Stone river, where he led a division, he was made a major general of volunteers, and he commanded the 14th army corps at Chickamauga, but at his own request was relieved of his command before Atlanta. In February, 1865, Gen. Palmer was placed in command of the military department of Kentucky, and for a time had charge of the Freedmen's Bureau. Resigning in September, 1866, he returned to Carlinville and engaged in law practice, but in the following year removed to Springfield. In 1868 he was elected governor of Illinois, his plurality over John R. Eden, Democrat, being 50,000. During his administration the great fire in Chicago occurred (Oct. 7-9, 1871), and he called a special session of the legislature to adopt measures for relief. Gen. Palmer was one of the leaders of the liberal Republican movement in 1872, supporting Horace Greely for the presidency, and by the union of the Democrats and liberal Republicans was carried into the ranks of the party he had so strenuously opposed. From January, 1873, when his term as governor expired, he practiced his profession in Springfield. In 1891 he was elected to the U. S. senate, and served on committees on military affairs and pensions. In 1896 the national Democratic party (gold Democrats) nominated him for the presidency of the United States, and in company with Gen. Simon B. Buckner, the nominee for the vice-presidency, he traveled from Chicago to New Orleans and from Omaha to New York city, opposing the free coinage of silver at the ratio of 16 to 1. He polled 133,424 votes. At the expiration of his term in the senate he returned to Springfield and devoted himself to the preparation of his memoirs, which were published in 1901 as "Personal Recollections of John M. Palmer—The Story of an Eventful Life." He was a Freemason and a member of the G. A. R. Gen. Palmer was married, at Carlinville, Ill., Dec-

Richard J. Oglesby

John M. Palmer

1842, to Malinda Ann, daughter of James Neely, of Kentucky, and second, April 4, 1888, to Mrs. Hannah L. Kimball, widow of Lehi R. Kimball. He died in Springfield, Sept. 25, 1900.

BEVERIDGE, John Lourie, fifteenth governor of Illinois (1873-77), was born in Greenwich, Washington co., N. Y., July 6, 1824, son of George and Ann (Hoy) Beveridge, and grandson of Andrew Beveridge, of Perth, Scotland, who came to America about 1770, and settled in Ilhron, N. Y. His father was a farmer, and removed to Illinois in 1842 with his family, settling in Somonauk, DeKalb co. In 1845 the son removed to Tennessee and while teaching in Wilson and Overton counties studied law. He was admitted to the bar in the same state, but in 1851 returned to Illinois and located in Sycamore, DeKalb co., where he practiced until 1854, when he settled in Evanston. In the spring of 1855 he opened an office in Chicago, and was engaged until the civil war began, having as a partner Hon. John F. Farnsworth, member of congress for many years. In August, 1861, Sec. Cameron authorized Gen. Farnsworth to organize and equip a cavalry regiment, the 8th Illinois, and in this Mr. Beveridge enlisted, recruiting company F. In the organization he was elected major and served with his regiment in the army of the Potomac, taking part in the battles of Fair Oaks, Malvern hill, Fredericksburg and Gettysburg. He resigned Nov. 10, 1863, and during

that winter recruited and organized the 17th Illinois cavalry, of which he was commissioned colonel. He commanded a brigade during the Price raid and later had command of sub-districts, with headquarters at Kansas City, St. Genevieve, Warrenton and Rolla, Mo. For his services he was brevetted brigadier-general. Returning to civil life in 1866, he was elected sheriff of Cook county; in 1870, state senator, and in 1871, congressman-at-large to fill the vacancy caused by the election of Gen. John A. Logan to the U. S. senate, and served until Jan. 1, 1873. In November, 1872, he was elected lieutenant-governor on the ticket with Gen. Richard J. Oglesby, and presided over the state senate for six days, when Gov. Oglesby having been elected to the U. S. senate, he succeeded to the gubernatorial chair and filled out the term to January, 1877. Gov. Beveridge's administration was vigorous, just and impartial. The most important bills signed by him were those relating to state charities, the state guards and payment of the state indebtedness. In 1881 Pres. Arthur appointed him sub-treasurer at Chicago, which position he resigned in 1885. In 1895 he removed to Hollywood, Los Angeles co., Cal. He was married, in Chicago, Ill., Jan. 20, 1848, to Helen Mar, daughter of Rev. Philo Judson, and has two children, Alta May, wife of Samuel B. Raymond, and Philo J. Beveridge.

CULLOM, Shelby Moore, sixteenth governor of Illinois (1877-83), was born at Monticello, Wayne co., Ky., Nov. 23, 1829, son of Richard Northcraft and Elizabeth (Colley) Cullom. His father, a farmer by occupation, removed to Tazewell county, Ill., and frequently represented his district in the general assembly. The son began the study of law in the office of Stuart & Edwards, Springfield, Ill., in 1853, and was admitted to the bar in 1855. Soon after he was elected city attorney of Springfield, and

in 1856 was elected to the lower house of the state legislature. Identifying himself with the Republican party, he was re-elected, in 1860, though the majority of his constituents were Democrats. The Republicans now for the first time gained ascendancy in the legislature and he was elected speaker, being the youngest member upon whom this honor had ever been conferred in the state. Meantime, in 1855, he had supported his friend, Abraham Lincoln, as a candidate for the U. S. senate. In 1864 he was elected to congress from the Springfield district, defeating his old friend, Hon. John T. Stuart; he continued in that body through re-election in 1866 and 1868, until March 3, 1871. As chairman of the committee on territories he was the first to recognize the necessity of dealing severely with the practice of polygamy in Utah, and he introduced "An act in aid of the execution of the laws," providing stringent measures for its suppression, which was passed by the house. He also received an appropriation of \$320,000 for the construction of a Federal building at Springfield. He was a member of the Republican national convention in 1868, and as chairman of the Illinois delegation placed Gen. Grant in nomination at Philadelphia, in 1872, and Gen. Logan, in 1884. A factious opposition to him in 1870 resulted in the nomination of another congressional candidate and in the loss of his district to the Republicans. On his return to Springfield from congress he engaged in banking. In 1872 and 1874 he was elected to the state legislature, and was speaker during the first term. He was elected governor of Illinois in 1876, and at the end of his term he was renominated, defeating ex-Sen. Lyman Trumbull. He was the first governor in the history of the state to serve for six consecutive years. In March, 1883, the term of David Davis, U. S. senator from Illinois, expired, and Gov. Cullom was elected to succeed him. As chairman of the senate committee on interstate commerce he investigated the regulation of railroad corporations by national legislation. His report on this subject, submitted to the senate on Jan. 18, 1886, resulted in the passage of a bill bearing his name and establishing an interstate commerce commission. In spite of strong opposition, it was passed by the house also, and became a law Feb. 4, 1887. The commission consists of five members, and its object is regulation of railway traffic and transportation. Sen. Cullom was re-elected in 1889-95 and 1901. He is chairman of the committee on interstate commerce, and is a member of the committees on foreign relations, appropriations and government of Cuba. In 1898 he was appointed one of the commissioners to recommend a form of government in the Hawaiian islands. The other commissioners were Pres. Dole, Judge Frear, of Hawaii; Sen. Morgan and Congressman Hitt. His mental characteristics are solid and practical rather than brilliant, and as a speaker he is convincing rather than rhetorical.

HAMILTON, John Marshall, seventeenth governor of Illinois (1883-85), was born at Ridgewood, Union co., O., May 28, 1847, son of Samuel and Nancy (McMorris) Hamilton, who were Virginians. He went to Illinois with his parents in 1854, and was brought up on a farm near Wenona, Marshall co. In the spring of 1864 he enlisted in the 141st Illinois infantry, company I, and served with that regiment in Kentucky and Tennessee, chiefly in guerilla warfare, until his regiment was mustered

John Beveridge

Shelby Moore Cullom

out. He then taught school for six months, and in 1866 entered the Ohio Wesleyan University, where he was graduated with honors in 1868. From 1868 to 1869 he was tutor in an academy at Henry, Marshall co., Ill. In 1869 he settled at Bloomington, Ill., and commenced the study of law. While there he varied the tedium of his studies by filling the chair as professor of languages in the Wesleyan College at Bloomington. He was admitted to the bar in 1870, and soon after formed a partnership with Capt. J. H. Powell. They built up an extensive practice in the twelve years of their partnership (1870-82). In 1876 Mr. Hamilton was elected to the senate. He was an indomitable worker in that canvass and was elected by 2,000 majority. He introduced the bill which established the appellate court in Illinois and was the champion and author of the bill proposed by the State Medical Society establishing the state board of health. In fact, during his senatorial term scarcely a great measure was passed through the senate without bearing the impress of his directing and shaping hand. In the fight over the reorganization of the militia his genius as a tactician and parliamentarian was eminently displayed. From 1880 to 1882 he was lieutenant-governor of Illinois, and in 1883, upon the resignation of Gov. Cullom, he became governor. He was strictly impartial in all his rulings, and as a public speaker and efficient legislative manager few were more successful.

FIFER, Joseph Wilson, nineteenth governor of Illinois (1889-93), was born at Staunton, Va., Oct. 28, 1840, son of John and Mary (Wilson) Fifer. In 1875, when but a lad, he migrated with his father to McLean county, Ill., where the latter cleared a small farm in the forest, and built a rude log cabin. Joseph worked on the farm during the summer, and attended school at intervals in the winter, thus making the best of his meagre educational facilities. In 1861 he entered the Federal army, enlisting in the 33d Illinois infantry, a fine body of soldiers composed chiefly of young men from the sturdy middle class. He was severely wounded through the lungs in an engagement at Jackson, Miss., in 1863, but notwithstanding the severe nature of his wound did not ask to be discharged on account of disability, but continued to serve three months after the time had expired. After the war he desired a collegiate education, and in 1864 entered the Illinois Wesleyan University. By earning money as he went along and practicing the most rigid economy he not only completed his collegiate course without interruption, but at the same time paid for the education of a younger brother. He was graduated in 1868. He studied law in the office of Prince & Bloomfield, Bloomington, Ill., and was admitted to the bar in 1869. The lonely wait for business which every young lawyer so well knows was broken in Mr. Fifer's case in the spring of 1871 by his election as corporation counsel of the city of Bloomington. The city had then more important legislation than it has ever had since. The new constitution had made momentous changes in the law of special assessments, and inexperienced as he was he grappled manfully and successfully with those new questions. In 1872 he was, by almost unanimous consent of the McLean Republicans, chosen their candidate for state attorney, to which office he was elected, retaining the position for eight years, and until he took his seat in the state senate in 1880. It is a remarkable fact that Mr. Fifer received by acclamation every nomination he ever asked of the Republicans of McLean county. As state attorney Mr. Fifer made himself a terror to the criminal classes. Besides meeting the best lawyers of the McLean bar, he was pitted on several occasions against such men as W. W. O'Brien and Leonard Swett, of Chicago, and proved

himself their peer in legal learning and intellectual resources. As an advocate he has had few equals and no superiors in Illinois. He always speaks without other preparation than that of being full of his subject and bent on the enforcement of his views. He speaks entirely off hand. Even the meekest head notes made in advance hamper and confuse him, yet the adversary who thinks Fifer will forget any fact or inference of advantage in presenting his case is doomed to disappointment. As a senator it may be said that the part he took in the legislation of two sessions was most honorable to himself and beneficial to his constituents and the people of the state generally. Retiring voluntarily in 1881 from an office he might have filled by common consent for an indefinite period, he devoted himself to the practice of the law, in which he met with great success. Mr. Fifer was nominated for governor of Illinois in 1888, defeating John M. Palmer, his Democratic opponent, by 12,547 majority. As chief executive Mr. Fifer was a decided success, and became a leader and party councillor in the state and nation. At the expiration of his term he resumed the Practice of his profession at Bloomington. He was married at Bloomington, Ill., June 15, 1870, to Gertrude Lewis.

ALTGELD, John Peter, twentieth governor of Illinois (1893-97), was born at Nisdor-Selters, Nassau, Germany, Dec. 30, 1847. In 1848 his parents emigrated to a farm in Richland county, O., where he lived until 1864, when he enlisted in the Federal army. After the war he taught school, though he had acquired but a limited education himself. In 1869 he started for the West, traveling on foot to northwestern Missouri, where, after teaching for a while, he studied law and in 1872 was admitted to the bar. He was city attorney of Savannah and was elected state attorney in 1874. Removing to Chicago in the following year, he soon acquired a large practice, and in 1886 was elected to the bench of the superior court as a Democrat. For a time he was chief justice of this court. He resigned his position in 1891, and in 1892 he was nominated for the office of governor. For the first time in forty years Illinois cast her electoral vote for a Democratic candidate and gave the Democratic nominee for governor and other state officials a majority. He was the first governor of foreign birth and the first citizen of Chicago to hold that position. One of his earliest official acts was to pardon the anarchists Fielden, Ne-be and Schwab, imprisoned for alleged complicity with the leaders of the Haymarket riot of May 4, 1886. His chief reasons, as set forth in a widely circulated pamphlet, being that the judge was biased, the jury packed, the jurors therefore incompetent, making the trial illegal, and that the defendants were not proven guilty. During the first year of his administration the World's Columbian exposition was held in Chicago. In 1894 a railroad strike occurred in Chicago, and Pres. Cleveland sent Federal troops to help restore order. In his general message to the legislature, Jan. 9, 1895, Gov. Altgeld reported that new business methods had been introduced into every public institution in the state; an industrial home for the blind and a reformatory for girls had been established; important legislation regarding factory employees had been enacted; the leasing of the labor of convicts to outside parties had been stopped; and women for the first time had been appointed to important boards and to other positions. He was elected

Joseph W. Fifer

liberal policy towards the University of Illinois, and reported that for the first time in nearly twenty years the commissioners of the Illinois and Michigan canal had offered to turn money into the state treasury. In June, 1895, he convened the legislature in extraordinary session to take action on important measures neglected during the previous session, such as the taxation of corporations, the abolition of the state board of equalization, the securing of boards of conciliation or arbitration, and of fair and unbiased grand juries. In April, 1896, the "sound money" Democrats of Illinois

endorsed Gov. Altgeld's administration and advocated his re-election; but he declared that he was not a candidate for any position, and would not accept the support of advocates of the single gold standard. In spite of his protestations he was nominated, but was defeated by John R. Tanner. He was a delegate to the national Democratic convention at Chicago in 1896 and delivered many speeches during the presidential campaign of that year. Mr. Altgeld resumed the practice of law in Chicago, but from time to time appeared as a platform speaker, and has also contributed articles to newspapers

and periodicals. "Our Penal Machinery and Its Victims" (1884), a volume comprising his speeches, papers and interviews. He was married, at Washington, O., in November, 1877, to Emma, daughter of John Ford.

TANNER, John Riley, twenty-first governor of Illinois (1897-1901), was born near Booneville, Warwick co., Ind., April 4, 1844, son of John and Eliza (Downs) Tanner. His life, up to the time of his enlistment in the army in 1861, was that of the average farmer boy of that period, his father occupying a log house on a small farm three miles from Booneville, Ind. At the outbreak of the civil war all the male members of the Tanner family, five in number, enlisted in the Federal army. The father was captured and died in a Confederate prison-pen at Columbus, Miss.; a brother in the 26th Kentucky infantry was wounded in battle and died at Nashville, Tenn.; his youngest brother died in a hospital at Pine Bluff, Ark., in 1864, and his third brother, J. M. Tanner, served in the 13th Illinois cavalry, while John R. Tanner served with the 98th Illinois infantry until June, 1865, when he was transferred to the 61st Illinois infantry, being finally mustered out in September, 1865. Returning to Illinois after the war he purchased a farm of sixty acres in Clay county. In 1880 he was nominated state senator for the 4th district and for the first time won it for the Democracy. In 1884 he was U. S. marshal of the southern district by appointment of Pres. Arthur, and in 1886 he was elected state treasurer of Illinois. He served for a few months of Gov. Fifer's term as railroad and warehouse commissioner, but resigning this office in 1891 was made assistant U. S. treasurer at Chicago, which position he held until Cleveland's administration when he was removed for offensive and pernicious partisanship. In 1894 he became chairman of the Republican state central committee, and effected the most complete organization known in Illinois politics, the phenomenal majority of 1894 being no doubt due to his excellent management of that campaign. In 1896 he was elected governor by a majority of more than 113,000 over John P. Altgeld. As governor he had an unusual number of public duties to contend with. The coal strikes at Virden, Pana and

Cartersville offered serious problems for solution, but peace and harmony were re-established with slight loss of life and with general satisfaction to the conflicting interests. Perhaps no more serious problem confronted the governor than the financial embarrassment of the state when he entered office. There were deficiencies in nearly all the institutions and no money in the treasury with which to pay outstanding bills or current expenses. He made arrangements with business firms to furnish needed supplies at their wholesale rates, with the understanding that they were to wait until there were funds with which to pay the bills. He also secured a loan of \$250,000 at 2 1/2 per cent. interest rate, and by careful and judicious management brought the state out of this difficulty and restored its credit. In the war with Spain Gov. Tanner was the first to tender the material and moral support of the state to the nation, and he organized 10,000 troops within forty-eight hours from the call for volunteers. Through his efforts a regiment of Illinois soldiers was the first mustered into the volunteer service. His knowledge of men, his broad views of public questions, his close acquaintance with the public affairs of Illinois, with his vigilance and devotion to public duties made his administration a decided success. He was married first, in 1866, to Lauretta, daughter of Barton B. Ingraham, of Clay county, Ill., by whom he had two children, she died in 1887, and in 1896 he was married to Cora Edith, daughter of Turney English, of Springfield, Ill. He died at Springfield, Ill., May 23, 1901.

YATES, Richard, twenty-fourth governor of Illinois (1901-), was born at Jacksonville, Ill., Dec. 12, 1860, son of Richard and Catharine (Geers) Yates. He was graduated at Illinois College, Jacksonville, in 1880. In 1879 he represented his college in the oratorical contest between the picked men of ten institutions of learning, which occurred at Campaign, and won first honors, which entitled him to represent Illinois in the interstate oratorical contest, held at Oberlin College, Ohio, in 1880. On this occasion he won the second honor. He was graduated at the Law School of the University of Michigan in 1884, was admitted to the bar in the same year, was admitted to practice in the U. S. circuit court in 1892 and in the U. S. Supreme Court in 1897. In 1887-91 he was city attorney of Jacksonville, and in 1894 became county judge of Morgan county, Ill. He has been active in the politics of Illinois since 1881, having made speeches in all of the campaigns, and doing effective work for the Republican party. In 1892 he was nominated for congressman at large by the Republican state convention, but was defeated by the Democratic landslide of that year, though he ran ahead of the presidential ticket in the state. In 1897 he was appointed by Pres. McKinley U. S. collector of internal revenue for the central district of Illinois, which comprises forty counties. On May 9, 1900, the fortieth anniversary of the nomination of his father for the same office, he was nominated by the Republican state convention for governor of Illinois. He was elected by 61,233 plurality over his Democratic opponent, Samuel Alschuler, and was inaugurated Jan. 14, 1901. In 1888 he was married to Helen, the daughter of A. C. Wadsworth, of Jacksonville, Ill., and they have two daughters, Catharine and Dorothy

John P. Altgeld

THOMAS, Joseph, lexicographer, was born in Cayuga county, N. Y., Sept. 23, 1811, son of David Thomas, and brother of John J. Thomas. His general education was received at Yale College and at Rensselaer Polytechnic Institute, Troy, N. Y. He subsequently studied medicine in Philadelphia, where he settled as a practicing physician. For some time he was professor of Latin and Greek in Haverford College, and also gave private lessons. In 1857 he visited India, where he spent fourteen months in the study of Sanscrit, Persian and other Oriental languages, principally with a view to tracing their philological relations with the languages of Europe. In the following year he spent four months in Egypt, where he became acquainted with the rudiments of Arabic. With Thomas Baldwin he edited the "Pronouncing Gazetteer" (1845), subsequently revised and published as "Lippincott's Complete Pronouncing Gazetteer and Geographical Dictionary of the World" (1855). Dr. Thomas originated this system of pronouncing geographical names. His other works include: "Travels in Egypt and Palestine" (1853); "New and Complete Gazetteer of the United States" (1854), with Thomas Baldwin; "Comprehensive Medical Dictionary" (1864), of which a revised and enlarged edition was published in 1886, under the title "Complete Pronouncing Medical Dictionary; Embracing the Terminology of Medicine and the Kindred Sciences, with their Signification, Etymology and Pronunciation," and "Lippincott's Universal Pronouncing Dictionary of Biography and Mythology" (2 vols., 1870-71; rev. ed., 1886); he also published an edition of Oswald's "Etymological Dictionary," contributed geographical and biographical pronouncing vocabularies to Webster's dictionaries, and treatises on muscular action, the mechanism of locomotion, etc., to the "Special, General and Microscopic Anatomy," edited by Dr. S. G. Morton, in 1848-49. Joseph Thomas died in Philadelphia, Pa., Dec. 24, 1891.

ELLIS, Powhatan, senator and diplomat, was born in Virginia, about 1791. He was graduated at the College of William and Mary, in 1813, and adopted the profession of law. He settled in Mississippi prior to 1817, attaining high rank at the bar, and in 1818 was elevated to the supreme bench of the state, thus becoming one of the first judges of that court.

After serving on the judicial bench until 1825, he was appointed by the governor to represent the state temporarily in the U. S. senate, taking the place of David Holmes, who had resigned. At the following meeting of the state legislature, however, Thomas B. Reed was regularly elected for the place, and Sen. Ellis, after serving from Dec. 12, 1825, to March 11, 1826, retired to private life, but the next election placed him again in the senate, this time for the full term of six years. Resuming his seat, Dec. 3, 1827, he remained a member of the upper house of the national legislature for five years, resigning in 1832 in order to accept

the position as Federal judge of the Mississippi district. While serving on the bench he delivered more opinions than any other judge of his time, and in the senate he united with Thomas H. Benton and William Smith in refusing to ratify the Mexican treaty. This was the agreement of 1828, which placed the boundary line across the Red and Arkansas rivers, and left open for the extension of slavery only Florida and Arkansas. He was appointed chargé d'affaires in Mexico by Pres. Jackson, Jan. 5, 1836, and on Dec. 8th of that year he closed the American legation. He was ap-

pointed minister plenipotentiary to Mexico by Pres. Van Buren, Feb. 15, 1839, and held the post until April 21, 1842, when he was superseded by Waddy Thompson. Returning to the United States, he made his home in Richmond, Va., where his death occurred about 1844.

SELLERS, Colemann, engineer and inventor, was born in Philadelphia, Pa., Jan. 28, 1827, son of Coleman and Sophonisba (Pwale) Sellers. His education was received in private schools in Philadelphia, and at Bolmar's Academy, West Chester, Pa. In 1846 he was employed as a draughtsman in the Globe Rolling Mills, Cincinnati, O., and was soon advanced to the position of superintendent. Three years later he entered the service of Niles & Co., locomotive builders, and remained with them for five years as foreman of the works. In 1856, at the request of his kinsman, the senior partner of Wm. Sellers & Co., manufacturers of machinist tools, etc., he returned to Philadelphia and entered that establishment as chief engineer, being later admitted to partnership. In 1888 he retired

from active interest in the business, and has since devoted himself to private practice as consulting engineer. Mr. Sellers has received more than thirty patents for mechanical inventions, all of value. One of the first and most notable was the coupling device for connecting shafting, which is widely used, and is important in establishing the modern system of interchangeable parts in shafting. His arrangement of feed disks for lathes and other machine tools solved the problem of infinite gradation of feeds, and his other inventions, chiefly new forms of tools, and improvements of existing machines, have done much to advance the efficiency of mechanical appliances. Outside of his immediate field of labor he has made various interesting and valuable discoveries. The use of absorbent cotton, which has become indispensable, was first thought of and recommended for surgical purposes by him in 1861. In connection with his experiments in photography he proposed the employment of glycerine to keep photographic plates wet. He obtained a patent in 1861 for an apparatus which he termed a "kinematoscope," by which stereoscopic photographs of moving objects could be exhibited, and which both in name and purpose was the forerunner of the similar devices produced during recent years. In 1889 he was called upon by several capitalists to consider the possibility of developing the water power of Niagara Falls, and upon his advice the enterprise was undertaken. He represented America in the international Niagara commission of five members, with Lord Kelvin as chairman, which was established in London in 1890, and since that time he has been the acting engineering head of the work both as consulting engineer of the Cataract Construction Co. and chief engineer of the Niagara Falls Power Co. To this work he brought the advantage of his wide engineering experience in meeting the many problems presented by the novel character and magnitude of the undertaking. The important mechanical features of the great dynamo are of his design and invention, and it is chiefly due to his ripe judgment and foresight that the plant has been so remarkably successful from a commercial standpoint. In 1877 the King of Sardinia conferred upon him the Royal Norwegian Order of St. Olaf. In 1888 he received from Stevens Institute the honorary degree of Doc. Eng., and in 1891 a U. S. civi-

of Pennsylvania conferred upon him the degree of D.Sc. Mr. Sellers is one of the board of managers of the Franklin Institute, and was its president in 1870-75. He has been president of the American Society of Mechanical Engineers, of the Photographic Society, and of the Pennsylvania Museum and School of Industrial Art. He is vice-president of the American Philosophical Society; a member of the American Society of Civil Engineers; American Society of Naval Architects, and of the Institution of Civil Engineers and Institution of Mechanical Engineers of Great Britain. He was a member of the Seybert commission of the University of Pennsylvania to investigate the claims of spiritualism. He was married, Oct. 8, 1851, to Cornelia, daughter of Horace Wells, of Cincinnati, O. They have two sons and one daughter.

COOPER, Samuel, soldier, was born at Hackensack, N. J., June 12, 1798, son of Samuel and Mary (Horton) Cooper. His father served as a major in the revolutionary war and fought in the battles of Lexington, Bunker hill, Monmouth and Germantown. The son was admitted as a cadet to the U. S. Military Academy, May 25, 1813, where he was graduated, Dec. 11, 1815. Being appointed brevet second lieutenant of light artillery, he served at New England posts in 1815-18, in the adjutant-general's office until 1825, and for one year in garrison in Florida. In 1826 he was ordered to the artillery school at Fort Monroe for two years, and then became aid-de-camp to Gen. Alexander Macomb. In 1836 he was assigned to staff duty at the army headquarters as assistant adjutant-general (having previously become captain of the 4th artillery on June 11, 1836), and served for five years. During the Florida war he was chief of the staff of Col. William J. Worth, being engaged against the Seminole Indians in 1841-42. For the next ten years he was on special duty in the war department in Washington with the rank of lieutenant-colonel and assistant

adjutant-general from March 3, 1847. For meritorious conduct during the war with Mexico he was brevetted colonel, May 30, 1848, and became adjutant-general with the rank of colonel, July 15, 1852. On March 7, 1861, he resigned his commission and offered his services to the seceding states, being appointed adjutant-general of the Confederate army. Gen. Cooper published a book, entitled "A Concise System of Instruction and Regulations for the Militia and Volunteers of the United States" (1836). He was married, in 1827, to a granddaughter of George Mason, of Gunston Hall, Clermont, Va., and after the civil war resided at Cameron, near Alexandria, Va., where he died, Dec. 14, 1876.

ASHBURNER, Charles Albert, geologist, was born in Philadelphia, Pa., Feb. 9, 1854. He received his early training in the public schools of Philadelphia, and was graduated at the University of Pennsylvania in 1874, at the head of his class. He had been engaged during the summer of 1872 on a survey of the Delaware river, and after his graduation took a position on the lighthouse survey, but resigned it later in the year to become assistant upon the geological survey of Pennsylvania, after its reorganization under Prof. J. P. Lesley as state geologist. Toward the close of 1874 he was engaged in the surveys of Mifflin and Juniata counties. In 1875 he was made assistant geologist, and placed in charge of the surveys of McKean, Elk, Forest and Cameron

counties, distinguishing himself in the study of the occurrence of petroleum and natural gas, and becoming well known as an authority on both subjects. In 1880 he was placed in charge of the survey of the anthracite coal fields of Pennsylvania. He originated a method for surveying and illustrating the geology and topography of this vast coal field, which has met the merited approval of mining engineers and geologists both in the United States and Europe. The skill and mastery of the details of this great work displayed in its execution led to his appointment, in 1885, as geologist in charge of all the office and field work of the survey, which position he filled with great credit until his sudden and premature death. Mr. Ashburner received the degree of Ph.D. from the University of Pennsylvania in 1889. He was a member of the American Philosophical Society, the American Institute of Mining Engineers, and other learned societies, to whose proceedings he was a frequent and valued contributor. He also prepared more than twenty of the reports of the geological survey of Pennsylvania, including those on coal, petroleum and natural gas, all of which are of great technical and scientific value. He contributed to many technical and scientific journals. Mr. Ashburner died in Pittsburgh, Pa., Dec. 24, 1889.

POWELL, Samuel, statesman, was born in Philadelphia, Pa., in 1739, son of Samuel and Mary Powell. He was graduated in 1759 at the College of Philadelphia. In 1761 he went to London, remaining there until 1764, and becoming a member of the Established Church, though brought up in the Society of Friends. After his return he served for a number of years in the city council, and was subsequently elected a justice of the common pleas and quarter sessions courts. In 1775 he was chosen mayor of Philadelphia, and served until October, 1776, being the last mayor under the charter of 1701. He occupied this position until martial law was proclaimed and the municipal affairs were no longer in the hands of the civil authorities. When by the act of 1789 a new charter was established, he was in that year again chosen mayor. In 1780 he subscribed £5,000 for provisioning the Continental army. He was elected speaker of the Pennsylvania senate in 1792. On March 7, 1760, he became a member of the American Society for Promoting Useful Knowledge, which was united in 1769 with the American Philosophical Society, and which still survives under its original name. Mr. Powell was a trustee of the University of Pennsylvania from 1763 until his death; one of the founders of the Philadelphia Society for Promoting Agriculture and in 1785 its first president, and a manager of the Pennsylvania Hospital. He left a large estate, including Powelton, on the Schuylkill, in West Philadelphia. His wife was Elizabeth, daughter of Charles and Anne (Shippen) Willing. Her father was mayor of Philadelphia in 1748 and 1754, and her grandfather, Edward Shippen, was mayor in 1744. His son, Samuel, was a noted and public spirited man in Rhode Island. Mr. Powell died in Philadelphia, Pa., Sept. 29, 1793.

RICHARDS, Edgar, chemist and author, was born in New York city, Feb. 23, 1858, son of Edgar Henry and Mary (King) Richards. His earliest American ancestor was Johann Friedrich Reichert, who was born in 1679 at Augsburg, Wurtemberg, and came to this country about 1748, purchasing 150 acres of land at New Hanover, Pa., in 1750. Mr. Richards' grandfather, Marcus Bird Richards, was a merchant, owning large iron works near Philadelphia. His maternal great-grandfather, Rufus King, was first senator to congress from New York, a member of the constitutional congress, and the first U. S. minister to the court of St. James. His maternal grandfather, James Gore King, was a

prominent New York merchant. Mr. Richards was educated at St. Paul's School, Concord, N. H., 1870-75, and at the Columbia School of Mines, 1876-81. He was assistant chemist to the U. S. department of agriculture from July, 1882, to June, 1887, and chemist of the internal revenue bureau, U. S. treasury department, Washington, from June, 1887, to January, 1892. He is the author of "Principles and Methods of Soil Analysis"; "Some Food Substitutes and Adulterants," and various scientific papers and government reports. Experiments in photography, horticulture, ornithology, astronomy and physics occupy Mr. Richards' leisure time. He became president of the Washington Chemical Society in 1889, and he is a member of the American Institute of Mining Engineers; American, London and Paris chemical societies; Society of Chemical Industry; Society of Public Analysts, and other scientific societies.

BLAKE, Mary Elizabeth McGrath, poet, was born at Dungarven, county Waterford, Ireland, Sept. 1, 1840, daughter of Patrick and Mary (Murphy) McGrath. A few years after her birth her parents removed to the United States and settled at Quincy, Mass., and in the high school there, with three years in a private school in Boston and the Convent of the Sacred Heart at Manhattanville, her education was received. In June, 1865, she was married to John G. Blake, a prominent physician, and she became the mother of five sons. For many years she has contributed extensively in prose and verse to newspapers and periodicals, including the Boston "Journal"; "The Pilot"; the "Catholic World"; the "Independent"; the "Atlantic Monthly"; "Lippincott's Magazine"; "Scribner's" and "North American Review." In journalism she is favorably known as the author of an extremely suggestive series of papers on general topics, entitled "Rambling Talks," which have appeared at fortnightly intervals in the Boston "Journal" since 1877. While her work has always been of a pleasing character, the literary quality of its later developments is more marked than formerly, her prose acquiring an added grace of style and her verse a greater degree of finish. Her poetry, which has made her more widely known than her prose, is essentially that of a singer, the lyric quality being its strongest characteristic. Its range is not a restricted one and lighter fancies alternate with the deeper and graver chords. Among Roman Catholic writers in America she has a prominent place, and in the wider circle of American writers in general her rank is an honorable and an assured one. Much of her work for periodicals has been published over the signature of "M. E. B." Her published works are: "Poems" (1882); "On the Wing" (1883); "The Merry Months All" (1886); "Youth in Twelve Centuries" (1887); "Mexico," written in collaboration with Mrs. Margaret Sullivan (1888); "Verses Along the Way" (1890); "A Summer Holiday in Europe" (1890); "A Memoir" (1896), and "In the Harbor of Hope," verses (1901). She read an original poem on the occasion of the Wendell Phillips memorial service and also at the memorial service in honor of Adm. Porter.

GULDIN, John C., clergyman, was born in Bucks county, Pa., in August, 1759. He was descended from Rev. Samuel Guldin, the earliest ordained German minister of the Reformed church in Pennsylvania, who had been one of the pastors of the cathedral church at Berne, Switzerland, and was dismissed from his office on a charge of Pietism. He preached frequently, but refused to assume a pastoral charge. He settled at Oley, Berks co., where the family became numerous. John C. Guldin studied for the ministry under Rev. Dr. T. L. Herman, whose daughter he later married. In 1829 he was

ordained to the ministry, and had pastoral charge of three congregations in Chester and Montgomery counties, Pa. In 1831 he was called to Franklin county, Pa., but remained there only until 1842, when he assumed charge of the German Evangelical Mission Church in New York, succeeding Dr. Reedy, its first pastor, while in June, 1842, he became missionary to the entire German population, under the auspices of the newly developed City Tract Society. Succeeding to this work when it was in a necessarily feeble condition, he devoted his best energies to building up, enlarging and sustaining the work. He was called the "apostle to the Germans." He was a member of the American Tract Society and of the Domestic Board of Missions. He prepared several catechisms for the young, put into German the constitution of the German Reformed church, assisted in compiling a German hymn-book and in preparing the "Kinder Harfe," a German hymn book for Sunday schools. He issued for some years a German missionary periodical, entitled "The Sower," and published a volume of sermons. He was a member of the Classis of New York, where he died, Feb. 20, 1863.

LEE, Samuel Phillips, naval officer, was born in Fairfax county, Va., Feb. 13, 1812. He was appointed midshipman Nov. 22, 1825, and ordered to the sloop of war Hornet, of the West India station, Feb. 7, 1827. After six months he was sent to the Mediterranean, and at the expiration of three years of service was ordered to the Norfolk school, Oct. 16, 1830. He was promoted to passed midshipman, June 4, 1831; served in various capacities; was promoted lieutenant, Feb. 9, 1837, and ordered on an exploring expedition; then served in the West Indies and on the Atlantic coast. On his own application he received orders to take part in the Mexican war, and was present at the capture of Tobasco. In 1854 he commanded the brig Dolphin in making deep sea soundings, and was promoted commander Sept. 14, 1855. He was ordered to the East Indies, in command of the *Vandalia*, in 1860, and learning of the civil war at the Cape of Good Hope he assumed the risk of acting against orders, brought his ship back to the support of the Union, and was assigned to the blockade off Charleston, S. C. When Adm. Farragut organized his expedition against New Orleans Lee was given the command of the U. S. sloop-of-war Onيدا, and assigned to Bailey's division, which led the fleet before forts Jackson and St. Philip. In the action of passing the forts the Onيدا was one of the three vessels to first encounter the enemy's fleet, and during the engagement relieved the *Varuna* by driving off two gunboats which had badly rannomed her and stove her in, but Lee succeeded in capturing the rebel commander who had made the attack. Lee passed up the river with Bailey, and participated in the capture of the *Chalmette* batteries, below New Orleans. After the capitulation of New Orleans Farragut sent Lee forward to demand the surrender of Vicksburg, and he took part in passing the batteries. Having been promoted captain, July 16, 1862, Lee was transferred to the command of the north Atlantic blockading squadron and made acting rear-admiral, taking the place of G. B. Sloat. For two years he fulfilled the arduous duty of blockading the coasts of Virginia and North Carolina, and co-operating with the armies defending Newbern and Washington. The rivers at

were penetrated, watched and guarded, and securely held; guerillas dispersed, and out of a total of sixty-five blockade-running steamers captured or destroyed by the squadron, fifty-four of them were captured or destroyed by the fleet under Lee's command. Besides blockading, which was the main duty of the squadron, it was, independently or in co-operation with the army, engaged in ninety-one actions and expeditions during the period of his command. The efficiency of his services attracted the approving comment of foreign military observers, especially when the dangers of the coast and the fewness of wrecks in the fleet were considered. When Gen. Butler began his movement on Bermuda Hundred Lee co-operated with him, and afterwards with Gen. Grant. Lee was anxious to have the Confederate fleet come down the river and attack him, and although he tried every device to bring an attack about, no such opportunity was given him to distinguish himself. On Oct. 21, 1864, he was detached and ordered to the command of the Mississippi squadron. He moved up the Cumberland to support Gen. Thomas, but the flagship was stopped at Clarksville by low water. Nevertheless army communications were kept open, and the lower Mississippi vigilantly guarded against the intervention of the trans-Mississippi Confederate forces. Lee was promoted to commodore, July 25, 1866, and constituted president of the examining board, with the exercise of various duties aboard and ashore until April 22, 1870, when he was promoted rear-admiral, and ordered to special duty at the navy department.

At the close of the civil war Adm. Lee had the satisfaction of receiving the surrender of the last of the Confederate fleet on the western waters. He was retired from active service on Feb. 13, 1873, and he died at his home, Silver Spring, Sligo, Md., near Washington, June 7, 1897.

HAYES, Augustus Allen, chemist, was born at Windsor, Vt., Feb. 28, 1806. He was graduated in 1823 at Capt. Partridge's Military Academy, Norwich, Vt. He then studied chemistry under James F. Dana, and later became assistant professor of chemistry in the New Hampshire Medical College. In 1828 he settled in Boston, where he devoted himself to chemical investigations, and acted as director of an extensive color manufactory in Roxbury, and also as consulting chemist to many of the largest dyeing, bleaching, gas, iron and copper smelting establishments in New England. In 1825 he began a series of researches upon the proximate principles of various American medicinal plants, and discovered the vegetable alkaloid, sanguinarine, which is found in the bloodroot. Later he devoted himself to the economic generation of steam, and carried on an elaborate research upon the relative value of fuels, which led to important improvements in steam boilers in 1828. He was the first to suggest the application of the oxides of iron in the refining of pig-iron, and copper refining was by him rendered much quicker and more certain by the use of scales of oxide of copper. Other original investigations related to the chemical decomposition of ethyl alcohol by chlorine and the production of

chloroform; to the action of alcohol on the human system; to the formation, composition and specific differences of the several varieties of guano, and to the chemical constitution and action of sea-water at and below the surface, on soundings and at the entrance of rivers, this being part of an investigation executed under a commission from the navy department to examine and report on the subject of copper and copper sheathing in use in the construction of national vessels. In 1839-60, while investigating the water supply of Charlestown, Mass., he discovered that the deep water of Mystic pond was far less pure than the surface water, and proved that a strip or wire of copper passing vertically through two strata of water of slightly different degrees of purity would exhibit electrical action. This method of determining the limits of the impure water was applied under his direction, and many observations of different bodies of water have demonstrated the value of the test. After the beginning of the civil war he called public attention to the uncertainty of the foreign supply of saltpetre and the necessity of a domestic supply. His efforts resulted in the manufacture of a very pure product by the novel process of causing a solution of sodium nitrate to react with a solution of potassium hydroxide. Later he spent some time in Europe, and on his return published a paper "On the Cause of the Color of the Water of Lake Lemna," and another on "The Red Oxide of Zinc of New Jersey." In 1846 he received the honorary degree of M.D. from Dartmouth College. He was state-assayer for Massachusetts for many years. He was a member of a number of scientific and learned societies, and contributed numerous papers of great technical value to their proceedings, as well as more strictly scientific contributions to the "American Journal of Science." He died at Brookline, Mass., June 21, 1882.

DONALDSON, Henry Herbert, biologist, was born at Yonkers, N. Y., May 12, 1857, eldest son of John Joseph Donaldson, a merchant and banker, and Louisa Goddard (McGowan) Donaldson. A taste for natural history was early formed and the collections made in his school-boy days were the result of intelligent search and study, not of a haphazard gathering of odds and ends to be preserved as "curiosities." He was graduated at Phillips Academy, Andover, Mass., in 1875, and then entered Yale, where, besides gaining reputation as a scholar, he received the honor of an election to a senior secret society, that of Scroll and Key. One of his summer vacations was devoted to a trip to Labrador in company with two classmates, their object being the collection of birds and insects. He was graduated with the degree of A.B. (receiving in course the degree of A.M.) in 1879; then spent a year in study at the Sheffield Scientific School and another at the College of Physicians and Surgeons, New York city, and in 1881 became a fellow of Johns Hopkins University, Baltimore. Two years later he was appointed instructor in biology in the university and was thus engaged until the summer of 1884. In 1885 he received the degree of Ph.D. from that institution. Prof. Donaldson returned to Johns Hopkins as associate professor of psychology, but held the position for a year only. In 1889 he was called to the newly established Clark University, Worcester, Mass., as associate professor of neurology, and remained until 1892, when he resigned and accepted the professorship of neurology in the University of Chicago, which he still holds. From 1892 until 1898 he also served as dean of the Ogden (Graduate) School of Science. While Prof. Donaldson was at Clark University, the noted blind deaf-mute, Laura Bridgman, died, and her brain was submitted to him for examination, but was found to be in no respect abnormal, contrary to the

expectation of medical specialists. Prof. Donaldson has published "The Growth of the Brain" (1895) in the "Contemporary Science" series. He was married in New York city, June 11, 1884, to Julia Desborough, elder daughter of Calvert and Mary S. (McEntee) Vaux. They have two sons.

THOMSON, William McClure, clergyman and author, was born at Springdale, Hamilton co., O., Dec. 31, 1806, son of Rev. John Thomson, a clergyman, of Scotch-Irish descent. He received his education at Miami University, at which he was graduated in 1826. After a year of study at the Princeton Theological Seminary he entered the ministry, being ordained as an evangelist by the presbytery of Cincinnati on Oct. 12, 1831. Two years later the American board sent him as a missionary to Syria, where he arrived on Feb. 24, 1833. He first went to Beirut, and was later stationed in Jerusalem. During the Syrian revolt against Ibrahim Pasha, the son of the famous Mohammed Ali, Mr. Thomson was arrested as a spy and detained for forty days, being released only after the taking of Jerusalem. He was then appointed with another missionary to form a mission station in Lebanon. He settled in Aboeh, and during the wars between the Druses and Maronites (1843-45) was instrumental in bringing about a truce, enabling Sir Hugh Rose, the British consul-general, to prevent a general massacre of Maronite Christians by conveying them to Beirut. From 1850-57 he stayed in Sidon, with intervals for missionary travels to Hermon, Hjon, and to regions east of Tyre. Having returned to Beirut in 1860, he took part in the negotiations of the allied forces to adjust matters after the massacres of Damascus, Hasbeyeh and Deir el Quamar. About 1876 he returned to the United States, and first settled in New York city, but three years later went to Denver, Col., for the improvement of his health, and spent there the rest of his life. During his missionary career Dr. Thomson pursued archaeological investigations relating to Scripture, and became a recognized authority in this department of research. His studies are mainly embodied in two works, "The Land and the Book; or, Biblical Illustrations Drawn From the Manners and Customs, the Scenes and Scenery of the Holy Land," which had a greater sale in Great Britain than any other American publication except "Uncle Tom's Cabin" (2 vols., 1859; rev. ed., 3 vols., 1880-86), and "The Land of Promise; Travels in Modern Palestine, Illustrative of Biblical History, Manners and Customs" (1865). His other works include a number of fugitive papers on the East, journals of his travels published in the "Missionary Herald," and numerous contributions to the "American Biblical Repository" and to "Bibliotheca Sacra," among them a series of articles on "The Physical Basis of Our Spiritual Language." All these productions display profound scholarship and critical ability, and are distinguished not only for their thorough accuracy, but also for a fine literary style and artistic arrangement. He died in Denver, Col., April 8, 1894.

STETSON, John Batterson, manufacturer and philanthropist, was born at Orange, N. J., May 5, 1830. His father was a hatter, and it was in his establishment that he received his first instruction in the business. In 1865 he removed to Philadelphia, where, with no capital but an abundant fund of energy and self-reliance, he opened his first store in a small room at the corner of Seventh and Callow-hill streets. Here he did most of the work with his own hands, making a beginning in repairing, but soon having acquired a reputation for taste in trimming, he engaged in the manufacture of hats for the local trade. With this fair start he removed in the following year to Fourth and Chestnut streets, where the business prospered so well that in a short

time his hats were for sale in nearly all the retail stores in the city. Various improvements were made to accommodate his increasing trade, and in 1860 he started a "planking" shop for the manufacture of hat bodies. Later he employed traveling salesmen throughout the country and gradually built up a large trade in nearly every State. In 1872 he removed to the northern part of the city and there increased his facilities by erecting a series of five and six story brick buildings, covering a wide area. They are fire-proof and contain the best modern appliances for the manufacture of fur and felt hats on the most extensive scale in the United States. The present John B. Stetson Co., of which he is president, was organized in 1885 with a capital of \$3,000,000, and its factories are among the largest in the world. The capacity is 150 dozen hats daily, and the fur used is obtained from South America, Scotland, Germany and England. He is a man of benevolent instincts and has associated a number of institutions with the workshops for the welfare of the operators. Large rooms in one of the factories are used by various religious and social organizations, there is a library of 3,000 volumes and a public hall seating 2,000 persons. An organization called the John B. Stetson Union was formed in 1885 on the same basis as the Young Men's Christian Association, and there is a club of boys, called the Guard of Honor, held together by the following pledge: "Desiring to make the greatest success of human life, I pledge myself to abstain from the use of all intoxicating liquors and tobacco, and will strive to shun all vices." In 1887 he founded a free dispensary and an armory. His kindness and generosity have exerted a wide influence for good, and have resulted in forming the closest ties of friendship with all those in his employ. He was a trustee of DeLand Academy, DeLand, Fla., and contributed liberally to its support; in 1889 it was reorganized as John B. Stetson University, and he has contributed over \$300,000 to its support. He has rendered it invaluable service through his business tact and ability and his wise policy in its administration.

KEMPER, Jackson, first P. E. bishop of Wisconsin, and thirty-first in the succession of the American episcopate, was born at Pleasant Valley, N. Y., Dec. 24, 1789, son of Daniel and Elizabeth (Marius) Kemper. His grandfather, Jacob Kemper, emigrated from Mannheim, Germany, in 1739, and his father was one of the early members of the Society of the Cincinnati; he enlisted in the Continental army directly after the battle of Lexington, fought in several engagements, and finally became deputy clothier-general, with the rank of colonel, serving to the end of the war. He was rendered almost destitute by the sacrifices he had made in behalf of the colonial government, and was tendered an appointment in the New York custom house, which he accepted. His mother was the daughter of Sylvester and Famille (Bergen) Marius. Her paternal grandfather emigrated from Holland to New Amsterdam in 1655. Jackson Kemper was graduated at Columbia University in 1809. He then studied theology, and on March 11, 1811, was ordered deacon by Bishop White, becoming one of the assistants of the United Methodist Christ Church, St. Peter's and St. James, Philadelphia, Pa., of the former of which he was

John B. Stetson

ordained priest in 1811, remaining its pastor until 1831. During this period he was called to St. Paul's Church, of Baltimore, and to Trinity Church, of Pittsburgh, Pa.; he accepted the call of St. Paul's Church, Norwalk, Conn., in 1831, and labored there with an energy that brought many offers. In 1835 the general council appointed him the first missionary bishop of the Protestant Episcopal church, with jurisdiction over Missouri and Indiana, as well as the territory now known as Wisconsin, Iowa, Minnesota, Nebraska and Kansas. In 1838 he was elected to the bishopric of Maryland, but he refused to give up his missionary work. Up to this time he had made his home in St. Louis, but the centre of his work was constantly shifting toward the northwest, and in 1845 he removed to Wisconsin. Two years later that state was organized into a diocese, and Bishop Kemper was elected its diocesan, but he declined it until unanimously re-elected in 1854, when he accepted under the condition that he continue as missionary bishop. His pressing duties, however, compelled him to relinquish the latter office in 1859, and from that time his labors

were confined to Wisconsin. He was active in the founding of the theological seminary at Nashotah, Wis., and when it was finally established, took up his residence on a small farm which he purchased near that place, though his official duties, which he continued to within six weeks of his death, gave him but little time at home. The degree of S.T.D. was conferred upon him by Columbia University in 1829 and that of LL.D. by the University of Cambridge in 1868. Dr. Kemper was twice married: first, to Jerusha Lyman, in 1816; second,

to Ann Ref. of Philadelphia, 1821. He died at Delafield, Waushara co., Wis., May 24, 1870.

ARMITAGE, William Edmond, second P. E. bishop of Wisconsin, and eighty-second in the succession of the American episcopate, was born in New York city, Sept. 6, 1830, son of Enoch Armitage. He received a thorough education, and after his graduation at Columbia University in 1849, he pursued his studies at the General Theological Seminary, New York, where he was graduated in 1852, being ordered deacon in the Church of the Transfiguration in his native city on June 27th of the same year, the Rt. Rev. Carlton Chase, D.D., officiating. He first served as assistant minister of St. John's Church, Portsmouth, N. H., and later as rector of St. Mark's Church, Augusta, Me., where he was ordained a priest by the Rt. Rev. George Burgess, S.T.D., on Sept. 27, 1854. Here he continued his work until 1859, when he became rector of St. John's Church, Detroit, Mich., remaining at the head of that parish for seven years. During 1866 he made a voyage to Palestine, and while absent was elected assistant bishop of Wisconsin, to which office he was consecrated on Dec. 6th of that year, in his own church, at Detroit, by Bishop Kemper, assisted by Rev. Samuela McCoskry and others. He then made his home in Milwaukee, where he began the execution of plans for founding a cathedral chapter. Upon the death of the Rt. Rev. Jackson Kemper, he became the second bishop of Wisconsin (1870), and though he was permitted to perform the duties of that office for only three years, he discharged his work, which was mainly of a missionary character, with great zeal and ability, winning the high esteem of the citizens of Milwaukee, and making many friends among the members of all denominations. The degree of S.T.D. was conferred

upon him by Columbia University in 1866. Bishop Armitage was married and had one child. His death occurred in St. Luke's Hospital, New York city, Dec. 7, 1873.

WELLES, Edward Randolph, third P. E. bishop of Wisconsin, and 105th in the succession of the American episcopate, was born at Waterloo, Ontario co., N. Y., Jan. 10, 1830, son of Gardner and Paulina (Fuller) Welles. His first American ancestor, Thomas Welles, emigrated from Dudley, England, to this country in 1712, and settled at Hebron, Conn. Edward Randolph Welles was graduated at Geneva College (now Hobart) in 1850. He then began the study of law, but after a few months decided to enter the ministry, and pursued his theological studies under the bishop of western New York. He was ordered deacon, Dec. 20, 1857, by Rt. Rev. Wm. H. DeLancy, and while serving as a tutor in De Vaux College, Suspension Bridge, N. Y., officiated as an assistant minister in St. Paul's Church, Lewiston; Christ's Church, Lockport, and the Church of the Epiphany at Suspension Bridge. On Sept. 12, 1858, he was ordained priest by the same prelate, beginning the duties of that office on Oct. 3d of that year at Red Wing, Minn., where he organized the parish of Christ Church and was made its first rector. At this post he remained for sixteen years, served several times as deputy to the general convention and was for some years the secretary of the diocesan convention of Minnesota. On Oct. 24, 1874, he was consecrated bishop of Wisconsin, in St. Thomas' Church, New York city, by Rt. Rev. Benjamin B. Smith, assisted by Rt. Rev. John Williams. In the following year the northern part of Wisconsin was set apart as a separate diocese, called Fond du Lac, while the southern portion was still known as the diocese of Wisconsin until 1884, when the name was changed to the diocese of Milwaukee; and at this latter post Bishop Welles preferred to remain. Much of his time during his episcopate was devoted to developing and making practical a cathedral in Milwaukee which should be truly a bishop's church. In this work he was among the pioneers in America, and the cathedrals in Milwaukee and Chicago are the first of many in the church. In churchmanship he belonged to the advanced, or Catholic party; he maintained a daily celebration of the Holy Communion at his cathedral; he secured the sisters of the sisterhood of St. Mary for educational work in his diocese, and invited the members of other religious orders in the church to assist in various ways in his work. The degree of S.T.D. was conferred upon him by Racine College in 1874. He made several important contributions to the subject of the cathedral system in the American church; published a number of sermons and addresses, among them being: "A Few Occasional Sermons"; "Farewell Sermon," and his sermon preached at the consecration of the bishop of Illinois in 1875. He was married at Fredonia, N. Y., in 1860, to Mary, daughter of Philander Sprague. They had two sons and two daughters. He died at Waterloo, N. Y., Oct. 19, 1888. A life of Bishop Welles, edited by his eldest son, with sermons and addresses, was published shortly after his death.

KNIGHT, Cyrus Frederick, fourth P. E. bishop of Milwaukee diocese, and 149th in the succession of the American episcopate, was born at Marblehead, Mass., March 28, 1831, of English and Scotch ancestry. When he was quite young his parents removed to Brighton in the same state. His powers of observation were early developed, and when he was but nine years old he had acquired a large fund of general knowledge. His education was continued in private schools at Marblehead and at Brighton, where he received thorough

preliminary training. Entering Burlington College, New Jersey, he fell under the influence of Bishop G. W. Doane, from whom he received the ecclesiastical bent which directed his future life. At this institution he excelled in the study of the languages. In 1851 he passed to the General Theological Seminary in New York, at which he was graduated in 1854, being ordained deacon in July of the same year in Trinity Church, New York, by Bishop Wainwright. He was ordained to the priesthood in 1855 by Bishop Potter, of Pennsylvania, at Germantown. Soon afterward he went to England, attended a course of lectures at Oxford, and on his return became rector of St. Mark's Church, Boston, which parish he held for ten years, when he resigned and for a time was special preacher for the Church of the Advent in the same city, where he acquired remarkable success in extemporaneous preaching. In 1870 he accepted the rectorship of the Church of the Incarnation, Hartford, Conn., where he drew to himself the warm friendship not only of the members of his parish, but of all persons with whom he became acquainted. In 1877 Dr. Knight was chosen rector of St. James' Church, Lancaster, Pa. He remained in that parish until he was elected bishop of Milwaukee in 1889, and during that period possessed the love and confidence of his congregation and of the entire community. Bishops' College at Lenoxville, Canada East, conferred the honorary degree of M.A. upon him in 1870, and that of D.C.L. in 1885. The degree of S.T.D. was given him by Racine College in 1890. He had always obtained the highest respect and esteem of his episcopal superiors, and when he was chosen to the bishopric he was remarkably well equipped for the great office. During his ministry he was frequently chosen a deputy to the general convention of the Episcopal church, and was a prominent speaker and debater in that body. Bishop Knight was a man of strong and impressive personality, full of dignity and power. The most grave subject he was always able to approach on the cheerful side. In private life and in conversation, there was a great fascination in the magnetism of his tones and in the quality of his utterances. He shunned all the futilities of modern life and upheld the noble and the good, but there was never in him a tinge of bigotry or narrowness of spirit. He disapproved of the potential spirit, believing that in general men will see where they can see, and where they cannot, no amount of argument or vehemence will ever change the situation. After two years of most successful effort in the high office of bishop, he died in Milwaukee, Wis., in 1891.

NICHOLSON, Isaac Lea, fifth P. E. bishop of the diocese of Milwaukee, and the 159th in succession in the American episcopate, was born in Baltimore, Md., Jan. 18, 1844, the son of a prominent banker of that city. He obtained his early education at St. Timothy's Hall, Catonsville, Md., a large church boarding-school at that time. When his preparation for college was completed he found the condition of his health would not permit him to enter. This led him to turn his attention to business and he went into his father's bank, where he remained for seven years, during which time he became a member of the firm. While in this pursuit he fully recovered his health and then entered Dartmouth College, at which he was graduated in 1869. At college he came under the influence of Rev. James Houghton, afterwards rector of the Church of the Redeemer at Bryn Mawr, Pa., to whom he attributes his entrance into the ministry. He was in college at that time with the now missionary bishops, Leonard, of Utah, and Talbot, of Wyoming. His theological training was received in the Episcopal Seminary at Alexandria, Va. He was

ordered deacon by Rt. Rev. Bishop Whittlesham in 1871, at Grace Church, Baltimore, being presented by Rev. Dr. George Leeds. He was advanced to the priesthood by Rt. Rev. Bishop Pinckney in St. Paul's Church, Baltimore, in 1872. His diaconate was spent under Bishop Niles in doing missionary work under the special guidance of his friend, Rev. Mr. Houghton, at Hanover, N. H., after which he became assistant priest at St. Paul's Church, in Baltimore, under Rev. Dr. J. S. B. Hodges, remaining four years. He next spent four years at his first parish, the Church of the Ascension, at Westminster, Md. From that place he was called in 1879 to St. Mark's Church, Philadelphia, where he remained for twelve years, until his elevation to the episcopate. He has been a diligent student and hard worker, these together with his marked intellectual endowments have contributed to his strength and power and have given him large influence. His early business training has been of great benefit to him. In 1883 he was elected bishop of the diocese of Indiana, which office he declined. For many years he has taken a great interest in the welfare of Nashotah Theological Seminary, in the state of Wisconsin, being elected dean to succeed the late Rev. Dr. Cole. That institution conferred on him the honorary degree of D.S.T. in 1889. He was elected bishop of Milwaukee in June, 1891, and consecrated to his office in St. Mark's Church, Philadelphia, on Oct. 28, 1891; consecrator-in-chief, Rev. Dr. McLaren, bishop of Chicago; assistant consecrators, the bishops of Pennsylvania and Maryland; presenting bishops, the bishops of Wyoming and Utah; preacher, the bishop of Fond du lac.

FARLEY, Harriet, editor and author, was born at Claremont, Sullivan co., N. H., in 1815, daughter of Rev. Stephen and Lucy (Saunders) Farley, and granddaughter of Stephen and Mary (Shattuck) Farley, of old New Hampshire stock. Her father was graduated at Dartmouth in 1801, studied divinity, and was ordained pastor of the Claremont Congregational Church, where he remained for twelve years. He was subsequently for seven years principal of the Atkinson Academy, which was the first institution in the United States to establish co-education. For a time he served also as pastor at that place, but on becoming a Unitarian, left the ministry, though he preached occasionally in Unitarian or Universalist churches. He was a voluminous contributor to periodicals. Her mother was descended from the New England Woodys, one of whom was Father Moody, and another was Joseph, known as "Handkerchief Moody," who, after his wife's death, was a victim of melancholy, and for many years wore a handkerchief over his face, even when preaching. At fourteen years of age, Harriet began to earn her own living, and worked at straw-plaiting, binding shoes, tailoring and teaching school. After her father's removal to Atkinson she had opportunity for study, and was taught something of French, drawing and other accomplishments in order that she might teach. The thought of this occupation, however, was so repugnant to her that she went to Lowell, Mass., and found employment in the mills. She succeeded not only in supporting herself but in assisting her brothers and sisters, one of whom she helped to educate. Her leisure time was spent in reading and in writing, and after the publication of the "New England Offering," she

begun in January, 1841, she became a contributor to its columns. Its writers were all women operatives in the mills, one of them being Lucy Larcom. Later Miss Farley became the editor and eventually the proprietor of this paper. How much it owed to her may be gathered from the following extract from an autobiographic sketch, published in Mrs. Hale's "Woman's Record": "I do all the publishing, editing, canvassing, and, as it is bound in my office, I can, in a hurry, help fold, cut covers, stitch, etc. I have a little girl to assist me in the folding, stitching, etc.; the rest, after it comes from the printer's hands, is all my own work. My edition is 4,000." She published a volume of extracts from the "Offering," among which were many of her own contributions, entitled "Shells from the Strand of the Sea of Genius" (1848). In 1849, "Mind Among the Spindles," a second volume of collections with an introduction by Charles Knight, was issued in London. "Fancy's Frolics; or, Christmas Stories Told in a Happy Home in New England," written in her girlhood, was published in 1880.

ROGERS, Fairman, civil engineer, was born in Philadelphia, Pa., Nov. 15, 1833, son of Evans Rogers, a merchant in that city and a member of the Society of Friends. He was educated at the University of Pennsylvania, where he gave his attention mainly to mathematics and mechanics, and

Academy of Fine Arts
Philadelphia.

in 1853 was appointed lecturer on mechanics in Franklin Institute, Philadelphia. He held this position for twelve years. From 1855 until 1871 he also filled the chair of civil engineering in the University of Pennsylvania, which institution, on his retiring, elected him a member of its board of trustees. He resigned his trusteeship in 1888 owing to continued residence abroad. After he had presented a valuable library of works on engineering to the university he was asked to become its provost in 1880, but declined. He served in the civil war as a member of the 1st troop, Philadelphia city cavalry, being for a time its commander, and later became a volunteer officer of U. S. engineers on the staffs of Gen. John F. Reynolds and Gen. William F. Smith. In 1862 he completed the survey of the Potomac river northward from Blakiston island to the U. S. coast survey. He was one of the original members of the National Academy of Sciences, a member of the American Society of Civil Engineers and of the American Philosophical Society. For a long time he acted as manager of the Pennsylvania Academy of Fine Arts and was among those charged with the erection of the exhibition building at the Philadelphia centennial in 1876. A lover of outdoor sports he was one of the first to introduce polo into this country. Among his scientific works are: "Combinations of Mechanism Representing Mental Processes" (1874); "Notes on Grant's Difference Engine" (1874); "Terrestrial Magnetism and the Magnetism of Iron Ships" (1877); "Manual of Coching" (1900). He died in Vienna, Austria, Aug. 23, 1900.

GHOLSON, William Yates, jurist and author, was born in Brunswick county, Va., Dec. 25, 1807, son of Thomas and Ann (Yates) Gholson, and a cousin of Judge Samuel J. Gholson. He was graduated at the College of New Jersey in 1825 studied law, was admitted to the bar and practiced his profession in Mississippi. He removed to Cincinnati,

O., in 1845, and at once took a leading place at the bar. With Bellamy Storer, Sr., and Oliver M. Spencer he was appointed judge of the superior court, and the three probably were never surpassed. He was afterward supreme judge of the state for four years. He was married to Elvira Wright, of Missouri. He wrote a "Digest of the Laws of Ohio" and also published addresses on "Payment of Bonds of the United States"; "Reconstruction of the Southern States," and "Payment of the Principal of the Public Debt." He died in Cincinnati, O., Sept. 20, 1870.

DUDLEY, Benjamin Winslow, physician and surgeon, was born in Spotsylvania county, Va., April 12, 1785, son of Rev. Ambrose Dudley. His father removed to Lexington, Ky., in 1786, and there the son obtained his early education. He studied medicine with Dr. Frederick Ridgeley, of Lexington, and afterward attended lectures at the University of Pennsylvania, where he was graduated in 1806. He then opened an office in Lexington, but had little practice. Desiring to better qualify himself for his work, but lacking the means, he made a venture in trade by purchasing a flat-boat, which he loaded with produce, and floated to New Orleans, where he invested the proceeds in flour. This was taken to Gibraltar and Lisbon, where he disposed of it at a large advance. From Spain he went to Paris, and there studied under Paul A. Dubois. After spending nearly three years in Paris he went to London and studied surgery under Abernethy and Sir Astley Cooper. He returned home in 1814 and found Lexington in the midst of an epidemic of typhoid pneumonia, which was followed by a bilious fever. Abscesses formed among the muscles and in many cases amputation was necessary. Dr. Dudley applied bandages and his success in these cases led him to urge the general use of the bandage until this treatment was widely adopted. In 1817 a medical school was added to the Transylvania University, and he was elected to fill the chairs of anatomy and surgery. Dr. Dudley condemned blood-letting, taking advanced ground in the matter. His skill with the knife soon gained him a national reputation and his success in lithotomy was so great that in England he was declared to be "the lithotomist of the nineteenth century." He operated for stone in the bladder 225 times and lost only six patients. Believing that Asiatic cholera was a water-borne disease, during the first great epidemic in this country (1832), he and his family drank cistern instead of well-water, and were the only ones in Lexington to escape the disease. Though he wrote little, he contributed several valuable essays to the "Transylvania Journal of Medicine." He was married, in 1821, to a daughter of Maj. Peyton Short. He died in Lexington, Ky., June 20, 1870.

WITTHAUS, Rudolph August, chemist, toxicologist and educator, was born in New York city, Aug. 30, 1846, son of Rudolph August and Marie Antoinette (Dunbar) Witthaus. His maternal grandfather was Samuel Dunbar, a well-known New York architect, whose ancestors had settled in Pennsylvania. In 1833, his father, then a lad of eighteen, emigrated to this country from Osnaabruck, Hanover, Germany, and settled in New York city, where he became a successful merchant. The son, after completing the courses at the Redfield and Charlier private schools in his native city, entered Columbia College, where he was graduated in 1867, and in 1870 received the degree of A.M. in course. The following year he spent at the Columbia Law School, but preferring a scientific career, he took a one year's course in 1872-73 at the Bellevue Medical College. To equip himself for his work he went to Paris, in 1873, and attended lectures at the Sorbonne and the College

de France. On his voyage back, in 1873, he embarked in the Ville de Havre, and was one of the twenty-one passengers saved from the wreck of that ill-fated steamer. After returning to New York city he entered the University of New York, from which he received the degree of M.D. in 1875, with the offer of a lectureship in physiological chemistry. This he accepted, and from that time he has devoted himself exclusively to chemistry. From 1878 until 1890 he was professor of chemistry and toxicology at the University of Vermont, and in 1881-84 he occupied a like position at the University at Buffalo. He was also city chemist of Buffalo during his residence there, the office being created especially for him. In 1884 he accepted the chair of chemistry, physics and hygiene in the University of the City of New York, and remained in that institution until 1898. Since the latter year he has been professor of chemistry, physics and toxicology in the medical department of Cornell University. Dr. Witthaus is regarded as probably the best authority in America on toxicology, and has been called as an expert in the trials of many celebrated poisoning cases, notably the Carlyle Harris, Moliuex, Buchanan and Fleming cases. He is a fellow of the American Academy of Medicine; the American Association for the Advancement of Science, and the American Museum of Natural History, and a member of the American Chemical Society, the chemical societies of Paris and Berlin, and of many other learned bodies in this country and in Europe. He is also a member of the Delta Psi Fraternity and the Democratic University and Manliathan clubs. Beside numerous papers on chemical and toxicological subjects, he is the author of "Essentials of Chemistry" (1879); "Manual of Chemistry" (1879); "General Medical Chemistry" (1881); "Laboratory Guide in Urinalysis and Toxicology" (1886), and of the articles on poisoning by hydrocyanic acid, oxalic acid, opium and strychnine, and on ptomaines in Wood's "Handbook of Medical Sciences." Dr. Witthaus was also the editor of "Witthaus and Becker's Medical Jurisprudence" (4 vols. 1894), to which he contributed the introduction and Vol. IV., which treats of toxicology.

BLAKE, Lillie (Devereux), reformer and author, was born at Raleigh, N. C., Aug. 12, 1835, daughter of George Pollok and Sarah Elizabeth (Johnson) Devereux. Her grandfather was John Devereux, a lieutenant in the royal navy, and a descendant of Sir Humphrey Bohun Devereux, who settled in Ireland when the senior representative of the family, the Earl of Essex, was lord lieutenant of Ireland under Queen Elizabeth. Having been shipwrecked off the coast of North Carolina, during a cruise, Lieut. Devereux made his home there, and was married to Frances Pollok, a descendant of Sir Thomas Pollok, one of the early lord proprietors of North Carolina. After the premature death of her father she was taken by her mother to New Haven, Conn., and there she pursued the undergraduate course of Yale University under private tutors. On entering social life she was acknowledged a famous beauty and reigning belle. In 1855 she was married to Frank G. Q. Unsted, a young lawyer of Philadelphia, who died in 1859, leaving her with two children. She began to support herself by writing, publishing in that same year a novel entitled "Southwold," which proved the opening of a literary career that has brought her an honorable independence. In 1866 she was married to Grenfell Blake, of New York, and made that city her home. Mr. Blake died in 1896 after a prolonged illness. About 1869 she became deeply interested in the movement for the enfranchisement of women, and to this she has since largely devoted her life. For

eleven years she was president of the New York State Woman Suffrage Association, and for fourteen years president of the New York City Woman Suffrage League. She was the founder and is the honorary president of the Society for Political Study. She is now president of the New York City Woman Suffrage League; president of the National Legislative League and of the New York city branch; president of the Point of Woods Improvement Society and vice-president of the New York City Mothers' Club. In the interest of woman enfranchisement Mrs. Blake has lectured frequently in almost every state. She has addressed committees of both branches of congress, and of many state legislatures. In New York she has year after year conducted legislative campaigns for the benefit of women, and to her leadership has been owing the passage of many laws which have advanced their condition. She was also instrumental in procuring the appointment of women as census enumerators and making them eligible to civil service positions, and first started the agitation that gave pensions to war nurses. In 1880 the act empowering women to vote at school meetings was secured and this was soon followed by an act placing women physicians in care of insane women in public asylums, by the modification of property laws, the police matron act, the act giving seats to saleswomen; that making mother and father joint guardians of the children, instead of leaving all power in the hands of the father, and many other modifications of existing laws. When the act was pending calling for the constitutional convention of 1891, Mrs. Blake secured legislation by which women became eligible to seats in that body. She took an active part in the campaign that followed and addressed the convention on behalf of a proposed amendment to strike the word "male" from the qualifications for voters. In 1897 she conducted a campaign to secure better opportunities and salaries for women under the new city charter. Mrs. Blake's fugitive writings comprise articles and stories published in the "Atlantic Monthly," the "North American Review" and other leading periodicals, and addresses and public documents. Since her first novel she has published "Rockford" (1863); "Fettered for Life" (1874) and "A Daring Experiment" (1894). In 1883 she delivered a series of lectures in reply to the Lenten discourses on "Women," delivered by Rev. Morgan Dix, which were printed under the title, "Woman's Place To Day."

ROBERTS, George Washington, soldier, was born in Chester county, Pa., Oct. 2, 1833. He was graduated at Yale College in 1857, and took up the study of law, beginning to practice in his native place. About 1860 he went to Chicago, Ill., where he continued his professional work. When the civil war broke out he entered the army, being commissioned major of the 42d Illinois volunteers on July 22, 1861. He took part in Gen. John C. Fremont's march to Springfield, was promoted lieutenant-colonel and colonel, and in the campaign of 1862 commanded a brigade of the army of the Mississippi, distinguishing himself. During April and May of 1862, he participated in the siege of Corinth, and in October served at Farmington, Tenn. At the battle of Stone river, near Murfreesborough, Tenn., Dec. 31, 1862, having the advance of the 20th army corps, he drove the army to their breastworks, and was killed while charging with the 42d Illinois regiment.

LEWIS, Charlton Thomas, lawyer and author, was born at West Chester, Pa., Feb. 25, 1834, son of Joseph Jackson and Mary Sinton (Miner) Lewis and grandson of Enoch Lewis. His father (1801-83) was a lawyer, served as commissioner of internal revenue under Prests. Lincoln and Johnson (1863-66) and lectured on law in Swarthmore College. He received his preparatory education in the schools of his native county and was graduated at Yale College in 1853. He took a high stand throughout his course, particularly in languages and mathematics and was chosen class poet on graduation. During 1854-56 he studied for the ministry of the Methodist Episcopal church, but in 1857 accepted the professorship of languages in the State Normal University, Bloomington, Ill. In 1860 he became professor of mathematics in Troy University, Troy, N. Y., and was transferred to the chair of Greek in 1862. During 1863-64 he was, under his father, deputy commissioner of internal revenue, and in 1865 removed to New York city, where he began the practice of law. His success was immediate and during the next two years his clientele steadily increased. In 1867, however, he was obliged to discontinue work for awhile, and spent a year in Europe for the benefit of his health. On his return he became editorial writer and in 1869 managing editor of the New York "Evening Post," in association with William Cullen Bryant, but in 1871 resumed his legal practice. Since then he has been more especially occupied as counsel for a number of large corporations. He published a translation of Bengel's "Gnomon of the New Testament" (1861); "History of Germany" (1870); "Harper's Latin Dictionary" (1879); "Lewis' Latin Dictionary for Schools" (1886), and "Elementary Latin Dictionary" (1890). In 1896 he was elected a delegate to the national Democratic convention in Indianapolis, and was appointed a member of the committee on platform. During 1898-99 he was lecturer on insurance in Columbia, Cornell and Harvard universities. He has been for many

Charlton J. Lewis

years president of the Prison Association of New York, and of the State Charities Aid Association of New Jersey, and has written much on the reform of penal administration. He is a member of the Century Association, as well as of the Yale, Authors' and Lawyers' clubs, all of New York city, and of the American Mathematical Society and the American Society of Actuaries. The degree of Ph.D. was conferred on him by the University of the City of New York in 1878. Mr. Lewis has been twice married; first, in 1861, to Nancy D. McKeen, of Brunswick, Me., granddaughter of Joseph McKeen, first president of Bowdoin College; and second, in 1885, to Margaret P. Sherrard, of Michigan. He has had three sons and three daughters. His eldest son, Joseph McKeen Lewis, class poet at Yale in 1883, distinguished himself in antiquarian researches in connection with the American School at Athens; he died in 1887. His second son, Charlton M. Lewis, class poet at Yale in 1886, was admitted to the bar in 1889; was instructor of English at Yale, and since 1899 has held the Emily Sanford chair of English literature.

McVICKAR, William Neilson, P. E. bishop coadjutor of Rhode Island, was born in New York city, Oct. 19, 1843, son of John Augustus and Charlotte (Neilson) McVickar. His father (1813-92), a nephew of John McVickar, professor in Columbia College, was a prominent homeopathic physician of New York city. A remarkable feature of his career

was his conversion to homeopathy from the allopathic school, under which he had practiced for two or three years. He was a member of the Homeopathic and County Medical societies, at one time president of the Hahnemann Hospital, and was officially connected with various hospitals and asylums. The son received his collegiate education at Columbia College, where he was graduated with third honor in 1865. He was tendered a tutorship, but declined it to enter the Philadelphia Divinity School. After two years in Philadelphia he returned to New York and completed his course at the General Theological Seminary. He became a deacon in 1867, and was graduated in 1868, becoming assistant to Rev. Dr. Stephen H. Tyng at St. George's Church, New York. In 1868 he was priested and appointed to the rectorship of the Church of the Holy Trinity, Harlem. His ministry began with services in a hall with eight communicants; he left it with a large church and Sunday-school building at One Hundred and Twenty-fifth street and Fifth avenue. In 1873 he was elected to St. Paul's Church, Boston, but declined. In 1875 he was elected rector of the Church of the Holy Trinity, Philadelphia, and for twenty-two years he filled this charge. Besides his parish work he took a large and active part in the affairs of the diocese and the church at large. He has been a deputy to the general convention since 1883. He was a member of the commission on church work among the deaf; a trustee of the diocese; a member of the board of overseers of the Philadelphia Divinity School; a member of the board of managers of the Episcopal Hospital, and a member of the board of managers of the general board of missions. The degree of D.D. was conferred upon him by Kenyon College in 1885, and by the University of Pennsylvania in 1898, and he received the degree of S.T.D. from Columbia in 1898. At the convention of the diocese of Rhode Island on Oct. 19, 1897, he was elected bishop-coadjutor, and on Jan. 27, 1898, he was consecrated in the Church of the Holy Trinity, Philadelphia. He is unmarried.

RAUCH, Friedrich August, educator and author, was born at Kirchbracht, Hesse-Darmstadt, Germany, July 27, 1806. He was graduated at the University of Marburg, Germany, in 1827, and subsequently studied at the universities of Heidelberg and Giessen. In 1830 he was appointed professor extraordinary at the latter institution, but in 1831 an expression of radical opinions drew upon him the displeasure of the government and induced his resignation. Emigrating to the United States, he settled first in Easton, Pa., where he learned English and supported himself by giving lessons on the pianoforte. After serving for a short time as professor of German in Lafayette College he was made principal in June, 1832, of the classical high school of York, Pa., established by the authority of the German Reformed church. A few months later he was ordained to the ministry and appointed to the chair of Biblical literature in the theological seminary at York. He held both positions until 1835, when the high school was removed to Mercersburg, whither he accompanied it. Chiefly through his exertions it grew into Marshall College, which was established in 1836. Dr. Rauch becoming its first president and also occupying the chair of Biblical literature in the theological seminary. Dr. Rauch was a man of varied and profound acquisitions. Before leaving Germany he wrote "De Sophoclis Electra" and "De Resurrectione Mortuorum," which were published at the request of three of the universities of his native land; and two small works involving considerable knowledge of the Oriental languages, beside a commentary on "Faust," which received the praise of Goethe himself. His treatise

on "Psychology," issued in 1840, was meant to be the first of a series, but the companion volumes on ethics and aesthetics were left unfinished at his death, which occurred at Mercersburg, March 2, 1841. Some time after his decease a selection from his manuscripts was made by Pres. Gerhart and published under the title "The Inner Life" (1856). A eulogy on Dr. Ranch, by Dr. J. W. Nevin, was printed in the Mercersburg "Review," vol. XI., 1859.

MANROSS, Newton Spalding, mining engineer, was born at Bristol, Conn., June 20, 1825. After being graduated at Yale College, in 1849, he went abroad, and in 1852 took the degree of Ph.D. at the University of Göttingen. He then devoted several months to an examination of mines and metallurgical establishments in Europe, returning to the United States in the same year. He also published "Ueber die Künstlicher Darstellung von Krystallisirtem Wolframsauren Kalk," and his inaugural dissertation on the "Artificial Formation of Minerals," in 1852. Dr. Manross was chiefly known as an explorer and engineer of mines. In the autumn of 1853 he was sent with an exploring expedition to South America, and spent several months in examining the gold region of the Yuruarí river, between the Orinoco and the Amazon. He was the first to bring to notice the auriferous deposits of the Orinoco. On his way home, in 1854, he examined the Pitch Lake of Trinidad, and in 1855 published an interesting "Notice of the Pitch Lake of Trinidad," that has been widely quoted. In 1856 he was sent to the Isthmus of Panama to search for coal, iron ore and other minerals. During the same year he visited Mexico, and examined the country between the city of Mexico and the Pacific ocean for mineral deposits. While in Mexico he visited the noted silver districts and descended into the craters of Jorullo and Popocatepetl. Returning to Bristol, in 1857, he remained for several years engaged in perfecting various mechanical and chemical inventions. In 1861 he became acting professor of chemistry in Amherst College. In 1862 he raised a company of volunteers, and went to the front as a captain in the 16th Connecticut volunteers, infantry. He fell at the battle of Antietam, while gallantly leading a charge at the head of his company, Sept. 17, 1862.

ROCKEFELLER, William, capitalist, was born in Richford, Tioga co., N. Y., May 31, 1841, second son of William Avery and Eliza (Davison) Rockefeller and grandson of Godfrey and Lucy (Avery) Rockefeller. His grandmother was a descendant of Capt. James Avery, of New London, Conn., 1656, and many ancestors on both sides were revolutionary as well as colonial soldiers. Wm. A. Rockefeller was a physician and business man of great executive ability, who removed to Tioga county when it was sparsely settled. His son, William, received his education in the academy of Owego, N. Y., and public schools of Cleveland, O., where the family removed in 1853, and he began his mercantile career as book-keeper for A. Quinn, a miller, for whom he worked for two years. He then served in the same capacity for the firm of Hughes & Lester. In 1862 he became a member of the firm, the name of which was thereupon changed to Hughes & Rockefeller. Three years thereafter he withdrew and joined his brother, John D. Rockefeller, in the oil business, becoming senior member of the firm of William Rockefeller & Co. In 1865 a branch business was established in New York city under the name of Rockefeller & Co., and William Rockefeller removed to New York to take charge of it. In the same year the firm built the famous Standard Oil Works of Cleveland, O. In 1867 Henry M. Flagler became a partner, and the companies were united under the style of Rockefeller, Andrews & Flagler, with offices in Cleveland and New York city. Out of this, in 1870,

grew the Standard Oil Co., of Ohio, capitalized at \$1,000,000, with John D. Rockefeller as president and William Rockefeller as vice-president. In 1872 there was another consolidation by which the Standard Oil Co. became the owner of nearly all the refining business of Cleveland and of interests in the oil regions of New York and Pennsylvania, and the capital stock was increased to \$2,500,000. About 200 miles of oil pipes came under its control and several hundred thousand barrels of oil tankage. A cooperage factory producing 9,000 barrels daily, distilleries with a capacity of 20,000 barrels of crude oil per day, warehouses for the storage of petroleum, and works for the manufacture of paints and glues, were some of the outgrowths of the new combination. In 1881 the Standard Oil Trust was formed with a capital of \$70,000,000, which was subsequently increased to \$95,000,000. In 18 the Standard Oil Co., of New York, was incorporated, with Mr. Rockefeller as its president, which position he still occupies. In 1892 the supreme court of Ohio declared the trust illegal, and it was dissolved, and the business is now conducted by separate companies. The products of these allied companies are shipped to every country on the globe. From 40,000 to 50,000 men are employed, and the yearly valuation of the exports alone is about \$50,000,000. Besides these interests, Mr. Rockefeller is a member of the board of managers of the Delaware,

Lackawanna and Western railroad. He is also a trustee of the Mutual Life Insurance Co., the Consolidated Gas Co. and United States Trust Co. He is a director of the Second National Bank, National City Bank, Hanover National Bank, Leather Manufacturers' National Bank, and also director of the Brooklyn Union Gas Co., the National Transit Co., the New York Transit Co., New York Central and Hudson River Railroad Co., New York, New Haven and Hartford Railroad Co., and the Chicago, Milwaukee and St. Paul Railroad Co. Mr. Rockefeller is also a member of the Union League, Metropolitan and Riding clubs, and New England Society. On May 25, 1861, he was married to Abnera Geraldine, daughter of David Judson and Ellen Goodsell, of Fairfield, Conn. He has two sons and two daughters, William G., Percy A., Ethel G. and Emma, wife of Dr. David H. McAlpin, Jr.

ROCKEFELLER, John Davison, capitalist, was born at Richford, Tioga co., N. Y., July 9, 1839, eldest son of William Avery and Eliza (Davison) Rockefeller. In 1853 the family settled at Cleveland, O., and he entered the High School. About that time he joined the Erie Street (now the Euclid Avenue) Baptist Church, and he became so active in its affairs that before he was of age he was placed on its board of trustees and served for many years. In 1855 he took a summer course in the Commercial College at Cleveland and then found a position as assistant bookkeeper in the commission house of Hewitt & Tuttle, at a weekly salary of \$3, and in less than two years' time became cashier and bookkeeper. In 1858, with \$1,000 he had saved and \$1,000 borrowed from his father, he formed a partnership with Morris B. Clark in the produce commission business. In 1859 the first oil well was opened at Titusville, Pa., and in 1860 the firm of Andrews, Clark & Rockefeller was formed for the purpose of refining petroleum. Mr. Rockefeller contributed

\$4,000. Within a year the advances to the refinery amounted to \$120,000, and by 1865 the business had increased to so great an extent that he sold out his other interests, and, establishing the firm of Rockefeller & Andrews, gave his attention to oil refining. About the same time his brother, William, formed a partnership with Mr. Andrews, the style being William Rockefeller & Co., and constructed the famous Standard Oil Works, of Cleveland. Eventually the two firms were consolidated, and still another house was established, that of Rockefeller & Co., with a salesroom in New York city. In 1867 Henry M. Flagler became a partner, and the three concerns were united under the style of Rockefeller, Andrews & Flagler, with establishments in Cleveland and New York city. Out of this grew, in 1870, the Standard Oil Co., of Ohio, capitalized at \$1,000,000, with Mr. Rockefeller as president, and in the same year the National Refiners' Association was organized and he was made its president. In 1872 there was another consolidation, by which the Standard Oil Co. became the owner of nearly all the refining business of Cleveland and of interests in the oil regions of New York and Pennsylvania, and the capital stock was increased to \$2,500,000. About 200 miles of oil pipes came under its control and several hundred thousand barrels of oil tankage. A coeprage factory, producing 9,000 barrels daily, distilleries with a capacity of 29,000 barrels of crude oil per day, warehouses for the storage of petroleum and works for the manufacture of paints and glue, were some of the outgrowths of the new combination. In 1881 a Standard Oil Trust was formed with a capital of \$70,000,000, subsequently increased to \$95,000,000; about the same time the Standard Oil Co., of New York, was incorporated, and in a few years this gigantic corporation absorbed nearly all the oil refining companies of the United States. The officers, besides Mr. Rockefeller, were: William Rockefeller, vice-president; Henry

John D. Rockefeller

M. Flagler, secretary; Col. O. H. Payne, treasurer, and S. Andrews, superintendent. In 1892 the supreme court of Ohio declared the trust illegal, and it was dissolved, and the business is now conducted by separate companies, in each of which John D. Rockefeller is a shareholder. The products of these allied companies are shipped to every country on the globe and the markets of the world are virtually in their control. From 40,000 to 50,000 men are employed and the yearly value of exports alone is about \$50,000,000. In addition to his oil property Mr. Rockefeller owns extensive tracts of land in several states; iron mines; a number of vessels plying on the Great lakes, and is a director in steamship and railroad companies. At the first anniversary of the American Baptist Education Society at Chicago in May, 1889, he announced his intention to found a "well equipped college" in that city and subscribed \$600,000 toward an endowment fund, provided \$400,000 more was pledged by others within ninety days. The University of Chicago was incorporated in 1890 and in September of that year Mr. Rockefeller promised to give the additional sum of \$1,000,000, on condition that the Baptist Theological Seminary be removed from Morgan Park to become the Divinity School of the university, and dormitories be erected for its use; \$800,000 of this sum was designated as an endowment for non-professional graduate instruction. In Febru-

ary, 1892, he gave 1,000 five per cent. bonds of the par value of \$1,000,000 for the further endowment of the institution; in December repeated the gift; in June, 1893, \$150,000; in December, 1894, \$675,000; on Jan. 1, 1896, \$1,000,000 more, promising to give dollar for dollar up to \$2,000,000 for every contribution secured for the university prior to Jan. 1, 1900. The securing of this sum brought the total up to \$9,000,000. In 1896 the New York "Sun" paid the following tribute to Mr. Rockefeller: "The millions he has bestowed on the University of Chicago make him one of the very greatest of private contributors to the foundation of a school of learning in the whole history of the world. He has given the money, moreover, in his lifetime, and thus differs from nearly all others of the most notable founders and endowers of colleges. By so giving he has distinguished himself from the great mass of those who have made large benefactions for public uses. He has taken the millions from his rapidly accumulating fortune, and he has made the gifts quietly, modestly, and without the least seeking for popular applause or to win the conspicuous manifestations of honor their munificence could easily have obtained for him. The reason for this remarkable peculiarity of Mr. Rockefeller as a public benefactor is, that being a deeply religious man he has made his gifts as an obligation of religious duty, as it seems to him." Among other educational institutions benefited by his generosity are Vassar College, Columbia University, Rochester University and Theological Seminary, each of which received \$100,000; Barnard College, New York city; Shurtleff College, Alton, Ill.; Denison University, Granville, O.; Des Moines College, Des Moines, Ia.; Spelman Seminary, Atlanta, Ga.; Bucknell University, Lewisburg, Pa., and Brown University. In 1896 he presented the city of Cleveland, O., with 276 acres to complete her park system, the price paid being \$600,000. Churches, hospitals and religious and philanthropic societies in every part of the United States are indebted to him for generous aid, and not a few young men and women have been helped in their efforts to obtain an education. Mr. Rockefeller has a winter residence in New York city and a summer home near Tarrytown, N. Y., in addition to one at Cleveland. He is a member of the Union League Club and New England Society of New York city, and of the New York branch of the Sons of the American Revolution. He was married in Cleveland, Sept. 8, 1864, to Laura C., daughter of Harvey B. Spelman, a merchant, a representative in the legislature, and a leader in anti-slavery, temperance and church work in Cleveland, Brooklyn and New York city. Four daughters, one of whom died in infancy, and a son, John D., Jr., were born to them. Their eldest daughter, Elizabeth, is the wife of Charles A. Strong, professor of psychology in the University of Chicago; their daughter, Edith, is the wife of Harold F. McCormick, son of Cyrus H. McCormick, of Chicago.

EVERTS, William Wallace, theologian and author, was born at Granville, N. Y., March 13, 1814. He was graduated at Madison University in 1837, and at its theological school in 1839. He was ordained to the Baptist ministry and held pastorates in that denomination in New York, New Jersey, and finally for twenty years in Chicago, where he actively participated in the establishment of the Chicago University and the Chicago Baptist Theological Seminary. He was a voluminous writer, the following being among his published works: "The Bible Prayer Book" (New York, 1855); "The Pastor's Hand-book" (1856); "Bethel; or, The Claims of Public Worship" (1856); "Childhood: Its Promise and Training" (1857); "The Bible Manual, with

Scripture Text-book" (1860, 2 parts); "Book of Worship for Private Family and Public Use" (1865); "Compend of Christian Doctrines Held by Baptists" (1868); "Life and Thoughts of John Foster" (1868; 2d ed., 1883); "Manhood: Its Duties and Responsibilities" (1868); "Temptations of City Life" (1868); "The Theatre" (1868); "The House of God; Engravings of Thirteen Churches, with Plans and Descriptions" (1872); "The Sanctuary"; "Scripture Text-book and Treasury"; "William Colgate, a Christian Layman" (1881); "Through The Narrows" (1884); "The Sabbath: Its Permanence, Promise and Defense" (1885); "The Baptist Layman's Book, a Compend of Baptist History, Principles, Practice and Institutions" (1887); "The Voyage of Life"; "Words in Earnest," and "The Scriptural School Reader and Tracts for the Churches." He died in Chicago, Ill., Sept. 25, 1890.

BURROUGHS, John Curtis, educator, and first president of the University of Chicago (old)

(1854-73), was born at Stamford, Delaware co., N. Y., Dec. 7, 1818, descendant of Rev. Joseph Burroughs, who was one of the founders of Dartmouth College. After a preparatory course at Brockport Collegiate Institute and Middlebury (N. Y.) Academy, he entered Yale College in 1839 and was graduated in 1842. For eighteen months following he was principal of Hamilton Academy, and then studied for the ministry at Madison Theological Seminary, where he was graduated in 1846. After spending a year as pastor of the Waterford, N. Y., Baptist Church, he ac-

cepted a call to West Troy, N. Y., and remained there until 1852, when he went to Chicago, and became pastor of the First Baptist Church. He also assisted in establishing the "Christian Times," later the "Standard." In 1855 he was offered the presidency of Shurtleff College. This he declined, but the opportunity of founding a university in Chicago offering itself, Mr. Burroughs threw himself into the enterprise with great enthusiasm, resigning his pastorate in 1856. Stephen A. Douglas, who was president of the first board of trustees, gave a ten-acre field for the college campus, and other public-spirited men became interested in the new educational movement. Subscriptions were obtained for \$200,000, and on July 4, 1857, the corner stone was laid, but the work of building dragged, many being unable to redeem their pledges on account of the financial crisis of that year. In 1858 an imposing Gothic edifice was erected, though not finished, and Dr. Burroughs, as its first president, with two professors, Albert H. Miner and Le Roy Satterlee, began the work of instruction. In 1859 the number of students had increased to 178. He devoted himself to the interests of the university from the first, and in 1873 resigned the presidency to accept the position of chancellor, with a view of making an effort to raise funds to save the property, which had been encumbered with debt since the start. His efforts were futile and in 1878 he resigned the chancellorship. In 1881 he was appointed a member of the Chicago board of education, and he on of his term was elected assistant of public schools, in which position until his death. The degree of D. D. was conferred upon him in 1858 by the University of Vermont, and that of LL. D. in 1869 by Middlebury College. He died in Chicago, April 21, 1892.

Vol. XI.—5.

MOSS, Lemuel, educator and second president of the University of Chicago (1874-75), was born in Owen county, Ky., Dec. 27, 1829, son of Debra Moss. In 1833 his parents removed to Dearborn county, Ind., where the son was brought up. At the age of fourteen he entered the office of the law-rev. "Register," where he became a printer, spending nine years at the trade, part of the time as foreman of a stereotyping establishment. In 1837, deciding to enter the ministry, he began a course of study in the Rochester University, at which he was graduated in 1838, and at the Rochester Theological Seminary two years later. He began preaching during his sophomore year, exhibiting rare power as a public speaker, and upon his graduation at the seminary became pastor of the First Baptist Church of Worcester, Mass. In 1861 he was chosen home secretary of the U. S. Christian commission and in 1865 accepted the chair of systematic theology in Bucknell University at Lewisburg, Pa., where he served for three years, resigning to become editor of the "National Baptist" (Philadelphia), the organ of the American Baptist Publication Society. In 1872 he resigned the latter position to become professor of New Testament interpretation in Oberlin Theological Seminary and in 1874 was elected president of the University of Chicago, being the second to occupy that position. In the following year Alonzo Abernethy (b. in Sandusky, O., April 11, 1836), who had been superintendent of schools in Iowa, became president *pro tem.*, and Dr. Moss was placed at the head of the Indiana State University serving as president until November, 1884. In 1889 '93 he was editor of the "Ensign," at Minneapolis, Minn., in 1897 he was called to take the same post on the "Commonwealth," at Philadelphia, Pa., which he still (1901) holds. In 1879 he was made president of the Indiana State College Association, and since 1900 he has been vice-president of the American Baptist Historical Society. Dr. Moss is the author of "Annals of the United States Christian Commission" (1866); "What Baptists Stand For" (1893); "A Day With Paul" (1893); two articles contributed to the "Baptist Quarterly" on "Our Schools and Foreign Missions," and "The Final Condition of the Unregenerate," and he is the editor of "Baptists and the National Centenary" (1876). He is a clear thinker, a genial friend, an inspiring teacher and a public speaker of rare power. Rochester University conferred the degree of D. D. upon him in 1868 and that of LL. D. in 1888.

ANDERSON, Galusha, third president of the University of Chicago (1878-85) and eighth president of Denison University (see Vol. I., p. 393). In 1885 a crisis was reached in the affairs of the university and Dr. George C. Lorimer, then pastor of Immanuel Baptist Church, Chicago, acting as president *pro tem.* took upon himself the thankless task of keeping the institution above water, but to no avail. In 1886 the end came with the foreclosing of a mortgage.

Galusha Anderson.

HARPER, William Rainey, 18th and last first president of University of Chicago (1891-95), was born at New Concord, Muskingum co., O., July 26, 1836, son of Samuel and Ellen Elizabeth Rainey. Harper and great-great-grandson of Robert Harper, a native of Ireland, who came to this country in 1795. When he was eight years of age he entered the preparatory department of Muskingum College.

New Concord, and continuing his studies through the regular department was graduated in 1870, with the degree of A.B. As the college was primarily for young men who intended to enter the ministry of the United Presbyterian Church, the study of the Bible in the Hebrew language was an important feature of its curriculum, and young Harper's graduating oration was by choice delivered in the same ancient language. After studying privately for three years, in the fall of 1873 he entered the graduate department of Yale University, to take courses in philology and in the Indo-Iranian and Semitic languages under Whitney, Packard, Lounsbury and others. The degree of Ph.D. conferred upon him in 1875 was no perfunctory honor. A few months later, being then only nineteen, he became principal of Masonic College in Macon, Tenn., but at the close of the academic year was appointed to a tutorship in the preparatory department of Denison University, Granville, O. The president of the latter institution was Dr. E. Benjamin Andrews, subsequently president of Brown University, and still later, superintendent of the public schools of Chicago, and in association with him Dr. Andrews worked most harmoniously. An enthusiastic instructor, a remarkable disciplinarian, he more than satisfied the expectations of the trustees, and in 1879 the preparatory department was erected into Granville Academy, and he became its principal. In 1880 Dr. Harper was called to the chair of Hebrew and Old Testament exegesis in the Baptist Union Theological Seminary at Morgan Park, Ill., and in the following year opened there a summer school for the study of Hebrew, which was attended by twenty-two persons. He began to teach Hebrew by correspondence in 1881, the outcome of which was the American Institute of Sacred Literature to promote home study, and in 1884 he organized the American Institute of Hebrew, a society composed of the leading Hebrew scholars of the United States. In 1885 he became principal of the Chautauqua College of Liberal Arts, and retained this position for six years; meantime, having resigned his professorship in the Theological Seminary (1886), he accepted the professorship of Semitic languages in the

sophical faculty of Yale University. Three years later he was also appointed Woolsey professor of Biblical literature in the academic faculty at Yale, and instructor in the Semitic languages in the Divinity School, and the duties of these three offices were carried on simultaneously until the close of the academic year 1890-91. Dr. Harper's next position was that of principal of the Chautauqua system, and in this he remained until the summer of 1891, when he went to Europe to spend a year in travel and study, having previously accepted the presidency of the University of Chicago, with whose

rise and progress he had been closely identified. Upon the organization of the American Baptist Education Society by the Baptist denomination in Washington in 1888, the question of establishing a university in Chicago on a broad and firm basis was discussed. In the following year John D. Rockefeller made a contribution of \$500,000 as an endowment fund, provided \$400,000 more was pledged within ninety days. This sum was soon raised, and a site of twenty-five acres, valued at \$400,000, was purchased. In June, 1891, Dr. Harper assumed the

duties of his office, having as his aims the creation of the most comprehensive and liberal university the world has ever seen and the reformation of the present system of collegiate education. The boldness of his schemes, not the least of which was the securing of an endowment fund of several million dollars, gave those to whom he appealed confidence in him. Mr. Rockefeller added \$1,000,000 to his original contribution, of which \$800,000 was designated as an endowment for non-professional graduate instruction. A few months later \$500,000 was received from the executors of the Ogden estate,

for a scientific school in connection with the University, and before July 10, 1891, an additional fund of \$1,000,000 was raised, a part of this being used for the erection of buildings, including the Kent Chemical Laboratory; the Ryerson Physical Laboratory, and the Walker Museum. The work of practical instruction was begun in October, 1892, and by December there were 589 registered students in all departments, nearly one-half of them being graduates of other institutions of learning. He is head of the department of Semitic languages. Originality is said to be Dr. Harper's chief characteristic, and this is manifest in his

plans of work, his policies of government and his methods of teaching. As head of the university he makes his influence felt in every department. One familiar with his work in its various branches has written of him: "In nothing is Dr. Harper greater than as a teacher. In certain lines he is probably the greatest pedagogue of his generation. His skill in leading the thought of a class inductively is consummate. He never presents his own views upon a disputed point in a dogmatic way. His method is to present the facts impartially, and let one think out his own conclusion. Sometimes he will present an opponent's case so strongly the majority of the class will be won over to that position rather than to his own. Another striking element in his teaching is his power of getting work out of his students. He is a relentless worker himself. His assignments are sufficient to occupy almost all of a student's time if he did nothing else, and he inspires his pupils with an enthusiasm that impels them to strive to get through all the work laid out." Dr. Harper is constantly engaged in literary work. He was one of the committee of five to select and arrange for editing Appleton's series of "The World's Great Books"; he was associated with Prof. T. C. Burgess, C. F. Castle, F. J. Miller and R. F. Weidner in the publication of a series of Greek and Latin text-books based on inductive principles; he published "Elements of Hebrew" (1881), now used in nearly all the theological seminaries and colleges in the United States; "Hebrew Method and Manual"; "Elements of Hebrew Syntax by an Inductive Method" (1888), and he prepared the Hebrew text of the book of Zachariah which was published as one of "The Sacred Books of the Old Testament," in the series known as the Polychrome Bible. A series of papers from his pen appeared in "Hebraica" on "The Pentateuchal Question," and in the "Biblical World" on "Constructive Studies in the Priestly Element in the Old Testament." He founded and still edits the "Biblical World," formerly the "Old and New Testament Student," a journal which has

William DeWitt Harper

been the chief agent in popularizing Bible study in America and England, and "The American Journal of Semitics," formerly "Hebraica," the only scientific journal devoted to the interests of Semitic studies. He is also general editor of several series of translations and transliterations of ancient records published by the university, beginning with "Ancient Records of Babylonia and Assyria" (1901). The degree of D.D. was conferred upon him by Colby University in 1891, and that of LL.D. by the University of Nebraska in 1893, and Tulane and Yale universities in 1901. Dr. Harper is a member of the Union League; the Chicago, the University and the Quadrangle clubs; the Hamilton Club; the Civic Federation; the Midlothian Club; the Twentieth Century Club; the Art Institute; the National Education Association; the Society for Biblical Research; the Oriental Society; the Chicago Society for Egyptian Research, and the University Club of New York city, and for several years he was a member of the Chicago board of education. He was married at New Concord, O., in 1875, to Ellen, daughter of Dr. David Paul, then president of Muskingum College. They have three sons and a daughter.

JUDSON, Harry Pratt, educator, was born at Jamestown, N. Y., Dec. 20, 1849, son of Lyman Parsons and Abigail Cook (Pratt) Judson. After taking a preparatory course at Lansingburgh (N. Y.) Academy he entered Williams College, at which he was graduated in 1870. In the same year he accepted a position as teacher in the high school at Troy, N. Y., subsequently becoming principal, and remaining until 1885, when he was called to the chair of history in the University of Minnesota, also lecturing there on pedagogy in 1886-92. In 1892 he became head professor of political science and dean of the faculties of arts, literature and sciences at the University of Chicago, which position he still occupies. In 1870 he received the degree of A.M. and in 1893 that of D.D. from Williams College. Prof. Judson is co-editor of the "American Historical Review" and author of the following works: "Caesar's Army" (1885); "Caesar's Commentaries" (joint editor, 1885); "Europe in the Nineteenth Century" (1894); "Growth of the American Nation" (1895); "Higher Education as a Training for Business" (1896); "Latin-English" (1896); "The Young American" (1897); "Literature Readers" (editor, 1899), and "The Government of Illinois" (1900). He was married, Jan. 4, 1879, to Rebecca Anna, daughter of A. B. Gilbert. They have had two daughters, of whom one, Alice Cleveland Judson, survives.

HULBERT, Eri Baker, educator, was born in Chicago, Ill., July 16, 1841, son of Eri Baker and Mary Louisa (Walker) Hulbert and a descendant of William Hulbert, who was made a freeman in the Massachusetts bay colony in 1631. His great-grandfather, Ambrose Hulbert, was a soldier in the American revolution. In 1837 his parents removed from Burlington Flats, N. Y., to Chicago, where his father engaged in business and shipped the first cargo of wheat from that place to an eastern market. The son received his preparatory education at Hamilton Academy, New York; was graduated at Union College in 1863 and at the Theological Seminary of Madison (now Colgate University) in 1865, with the degree of A.M. Later he became a student in the university at Göttingen, Germany. In 1865 he was ordained as a minister in the Baptist church and subsequently held pastorates in Manchester, Vt.; St. Paul, Minn.; San Francisco, Cal., and Chicago, Ill. From 1881 until 1892 he was professor of church history in the Baptist Union Theological Seminary, and in 1884-85 its acting president. This institution was originally established and is still con-

trolled by the Baptist Theological Union, located at Chicago. The seminary was fully organized in 1867 and for twenty-five years enjoyed an uninterrupted prosperity. The number of students attracted from all parts of the country increased annually, able scholars were enrolled on the faculty of instruction, while men of eminent business ability and large liberality managed the finances, and provided the buildings, libraries and endowments. When Mr. Rockefeller made his first subscription of \$1,000,000 to the University of Chicago he made it a condition of the gift that the seminary should become its divinity school. To meet this condition he further stipulated that \$100,000 of his subscription should be used for the erection of a building for the seminary on the university campus, and that \$100,000 of it should be set apart for the further endowment of the seminary. In keeping with these requirements articles of agreement were entered into between the boards of the two institutions by which the Baptist Union Theological Seminary became the Divinity School of the University of Chicago, and Dr. Hulbert was made its dean and head professor of church history. The degree of D.D. was conferred upon him in 1880 by the Baptist Union Theological Seminary and in 1898 that of LL.D. by Bucknell University. Dr. Hulbert was married in 1869 to Etta Edlyn, daughter of Charles R. Spencer, of Troy, Pa. They have one son and two daughters.

JAMES, Edmund James, educator and economist, was born at Jacksonville, Ill., May 21, 1855, son of Rev. Colin D. and Amanda (Casady) James. His paternal ancestors were Welsh, and through his mother he is of Dutch Huguenot extraction. His father was one of the pioneer Methodist preachers in Indiana and Illinois, and prominent in educational activity. The son began his education in the public schools and entered the Illinois State Normal School, where he first became interested in the theoretical and practical educational measures which have engaged his attention in subsequent life. He also studied at the Northwestern University at Evanston and at Harvard

College. In 1871 he published at Cambridge a translation of the "Panaegyrics" of Isocrates. On leaving Harvard he went to Germany, pursued economic and social studies at the universities of Leipzig, Berlin and Halle, and obtained the degree of Ph.D. at the last of these in 1877. Shortly afterwards a lectureship in political economy at Halle was offered to him, but this distinguished honor he declined. Returning to America, he was for two years principal of the high school at Evanston, Ill., and then in September, 1879, became principal of the model high school in the Illinois State Normal University. During the early period of his career he wrote voluminously on economic and educational subjects for periodical publication. From 1881 to 1883 he edited the "Illinois School Journal," and in other important publications treated among various subjects the "Aims and Methods of Latin Teaching in our Public Schools," "Banks of Issue," "Custom Duties," "Compulsory Education," "Excise," and "Science of Finance." In 1883 a chair of public finance and administration, the first one of the kind in America, was created especially for him in the University of Pennsylvania, and he resigned his former position to accept it. At the same time he was put in charge of the Wharton School of Finance and Statistics.

only in the same university. Professor James returned three times to Europe to prosecute further his economic studies there. He was prominently instrumental in introducing kindergarten classes into the public schools, and his address on the "Relation of the Kindergarten to the Public Schools," first delivered in Philadelphia, has become widely known. He was one of the first college men to take an active interest in the manual training movement, advocated strenuously the elective system in colleges and universities, and was almost the first to advise college education for business men and the professional training of teachers at universities. His position in regard to the last educational reform met with ridicule at first, but the subject was afterwards introduced as a special study at Harvard, Pennsylvania, and other leading American universities. In 1892 he was sent by the Bankers' Association to Europe to make a report upon the education of business men in Europe. His address on this subject before the convention at San Francisco in September, 1892, marked an era in the subject of commercial education in the country. He has also contributed largely to the development of special schools for economic and social studies in the United States, and rendered such effective assistance to the cause of the extension of university teaching that he was made president of the American Society for the Extension of University Teaching. Professorships in political economy and political science were offered him at Harvard, at the University of Chicago and at Leland Stanford, Jr. University, and in 1896 he accepted the chair of public administration at the University of Chicago. He has published over one hundred monographs and papers on various economic, educational and administrative subjects. Of his essay on "The Relation of the Modern Municipality to the Gas Supply," the "Academy" said: "It is a study on the proper limit of state interference. . . . At every point *a priori* reasoning and historical verification are aptly put together so as to sustain each other and the conclusion." The above paper has had an important effect in the direction of municipal ownership and management of electric light and gas plants in American cities. The publications of the University of Pennsylvania in political economy and public law, in which have appeared some of the most valuable of the recent monographs on the subject, were for years under his editorship. He is the founder and president of the American Academy of Political and Social Science, and first president of the Municipal League in Philadelphia. Prof. James was married, Aug. 22, 1879, to Margaret, daughter of Rev. Roderick William Lange, of Halle, Germany.

BURTON, Ernest DeWitt, educator, was born at Granville, Licking co., O., Feb. 4, 1856, son of Nathan Smith and Sarah John (Fairfield) Burton. His earliest American ancestor, John Burton, settled at Salem, Mass., about 1637. From him the line runs through Isaac, Jacob, Isaac, Judah, Nathan and Smith, who was Prof. Burton's grandfather. Judah Burton was a major and commissary grand in the revolutionary army. Ernest, after attending Griswold College, Davenport, Ia., entered Denison University, Ohio, where he was graduated in 1876. In 1876-77 he was an instructor in the Academy of Kalamazoo College. He was graduated at the Rochester Theological Seminary in 1882, and held the position of instructor in New Testament Greek there, in the school year of 1882-83. In 1883 he was appointed associate professor, and in 1886 became professor of New Testament interpretation at Newton Theological Institution, occupying this chair until 1892, when he became professor and head of the department of New Testament literature and interpretation at the University of Chicago.

In 1887 he studied at the University of Leipzig, and in 1894 at the University of Berlin. He is the author of "Harmony of the Gospels" (with W. A. Stevens, 1894); "Moods and Tenses of New Testament Greek" (1893); "Records and Letters of the Apostolic Age" (1895), and "Constructive Studies in the Life of Christ," with Shailer Matthews (1900). He has been associate editor of the "Biblical World" since 1892, and of the "American Journal of Theology" since 1897. In 1898 the degree of D.D. was conferred upon him by his alma mater. Prof. Burton was married, Dec. 28, 1883, to Frances Mary, daughter of Joseph Jackson Townson. They have one daughter, Margaret Burton.

COULTER, John Merle, educator, was born in Ningpo, China, Nov. 20, 1851, son of Moses Stanley and Caroline (Crowe) Coulter. In 1853 his father, who was a Presbyterian missionary, died, and his mother returned to her home in Indiana, where her father, John Finley Crowe, was a professor in Hanover College. After studying at Wabash John entered Hanover College, and was graduated in 1870. For two years following he was a teacher in the Logansport (Ind.) Academy, and in 1872-74 was the botanist of the U. S. geological survey in the Rocky mountains. In 1874 he was appointed professor of natural sciences at Hanover, remaining there until 1879, when he accepted the chair of biology at Wabash College, and occupied it for two years. In 1891 he was elected president of the University of Indiana, which position he resigned in 1893 to become president of Lake Forest University, serving in this capacity for three years, and during the same period being president of the Bay View Summer University. In 1896 he became head professor of botany in the University of Chicago. In this department special attention is given to plant physiology, morphology and ecology. Beginning with the fundamentals of biology from a botanical point of view, the courses differentiate into special lines adapted to the needs of the individual investigator. The department occupies the Hull Botanical Laboratory. In 1875 Dr. Coulter founded and has since edited, the "Botanical Gazette," one of the leading scientific journals of the country. He is the author of the following works: "Synopsis of the Flora of Colorado" (1873); "Manual of Rocky Mountain Botany" (1885); "Handbook of Plant Dissection" (1886); "Revision of North American Umbellifera" (1888); "Gray's Manual of Botany" (6th ed., 1890); "Manual of the Flora of Western Texas" (1891); a series of text-books, "Plant Relations," "Plant Structures" and "Plants" (1899); "Plant Studies" (1900); a "Monograph of North American Umbellifera" (1900), and "Morphology of Spermatophytes" (1901). In 1897 he was corresponding member of the British Association for the Advancement of Science; he is a fellow of the American association, and was its vice-president in 1891. He is a member of the Philadelphia, St. Louis and Washington academies of science; of the American Botanical Society, of which he was president in 1897, and is an associate fellow of the American Academy of Arts and Sciences. Hanover College conferred the degree of A.M. upon him in 1873, and that of Ph.D. in 1882, in which year he received the same degree from the University of Indiana. Dr. Coulter was married, Jan. 1, 1874, to Georgie Margaret, daughter of George Gaylord, of Delphi, Ind.

John Merle Coulter

They have had four children: John Gaylord, instructor in botany at the Syracuse University; Grace Allen, Margaret Garritt and Merle Crowe Coulter.

MOODY, William Vaughan, educator and author, was born at Spencer, Ind., July 8, 1869, son of Francis Burdette and Henrietta Emily (Stay) Moody. His father was a native of western New York and engaged in steamboat traffic between Pittsburgh and New Orleans. His mother was a descendant of one of the pioneer settlers of Indiana. In 1871 the whole family, in which William Vaughan was the fifth of six children, removed to New Albany, Ind. There he spent the next fifteen years, until the death of his parents. He then entered the Riverview Academy at Poughkeepsie, N. Y., first as a student and afterwards as junior military officer and assistant in classics. In 1889 he entered Harvard College and soon became one of the editors of the "Harvard Monthly," to which magazine he contributed a number of articles and poems. During this time he also published several poems in "Scribner's Magazine." He completed the requirement for the degree in three years and spent his senior year in Europe, traveling as a private tutor. He then returned to Cambridge to be graduated with his class and delivered the class poem on that occasion (1893). The next year he spent in post-graduate study at Harvard, taking the degree of A.M. together with the Bowdoin prize for the thesis, "An Inquiry Into Origins of Sir Phillip Sidney's Arcadia" (1894). After another year at Harvard, as assistant in the department of English, and a brief sojourn in France, he accepted the position of instructor in English literature at the University of Chicago, which he still (1901) holds. He has edited since graduation several English texts, the most important of them being the complete poems of Milton (English and Latin), with a translation of the Latin poems into English prose (Cambridge edition), and has contributed various critical and poetical works to the magazines, especially to the "Atlantic Monthly" (1898-1901), in which appeared some of his best poems. In spite of the fact that he is still a young poet he has already succeeded in becoming a leading object of attention in the American literary world. His two recent publications, "The Masque of Judgment," and a collection of "Poems" have brought forth not a few critical notices of a highly appreciative nature. Of the "Masque of Judgment" Mr. William Morton Payne writes: "Like the epics of Dante and Milton, it is concerned with no less a theme than the cosmogony; like 'Faust,' it sets speech upon the lips of archangels; like the 'Prometheus Unbound,' it personifies the creation of mythology." Much in the same spirit are the comments of Prof. Royce and other prominent critics. Of the "Poems," Mr. Payne says: "With the possible exception of what has been done by Prof. Woodberry, no such note of high and serious song has been sounded in our recent American poetry." "Those among them that are considered the best are: 'Gloucester Moors'; 'An Ode in Time of Hesitation'; 'On a Soldier Fallen in the Philippines,' and 'The Daguerreotype.'" Mr. Moody is unmarried.

HALE, George Ellery, astronomer, was born in Chicago, Ill., June 29, 1868, son of William Ellery and Mary Scranton Hale. His father was president of the Hale Elevator Co., of that city. The son studied at the Harvard College Observatory and at the Massachusetts School of Technology, where he was graduated in 1890. In 1888 he established the Kenwood Observatory in Chicago, and carried on solar investigations there in 1890-96. In 1891-92 he lectured at the Northwestern University, and in 1892 he accepted the position of associate professor of astro-

physics at the University of Chicago, becoming professor there in 1897. During the winter semester of 1893-94 he studied at the University of Berlin. Prof. Hale was appointed director of the Yerkes Observatory at Lake Geneva, Wis., at the time of its inception, in 1892. This was the gift of Charles T. Yerkes, who contributed \$530,000 for its erection and for placing in it the largest telescope in the world. The main building was completed in 1897. The observatory is situated about a mile from the town of Williams Bay, near Lake Geneva, and its site includes about fifty acres of wooded land fronting on the lake. The facilities for the prosecution of special researches in astronomy and astrophysics are in some respects of an exceptional nature; accordingly, opportunity is given to men of science connected with other institutions to carry on investigations at this observatory. The researches of the observatory include Prof. Hale's spectroscopic studies of the sun and stars, Prof. Barnham's observations of double stars, Prof. Barnard's observations of planets, satellites, stars, nebulae, etc.; Prof. Frost's spectroscopic observations of stellar motions, Mr. Ritchey's work in photographing the moon, star clusters and nebulae, etc. Since 1895 Prof. Hale has been editor of "The Astrophysical Journal," one of its publications. In 1892-95 he was joint editor of "Astronomy and Astrophysics." His writings include papers on solar spectroscopy, photography of the solar prominences, stellar spectroscopy and similar subjects. The spec-

troheliograph, an instrument for photographing the solar prominences without an eclipse, is his invention, and he was awarded the Janssen medal by the Paris Academy of Sciences for work done with its aid. He is vice-president of the Astronomical and Astrophysical Society of America; foreign associate of the Royal Astronomical Society of London; foreign member of the Società degli Spettroscopisti Italiani, and a member of the Astronomische Gesellschaft, Société Française de Physique and other scientific bodies. The Western University of Pennsylvania conferred the honorary degree of Sc. D. upon him in 1897. Prof. Hale was married, June 5, 1890, to Evelina S., daughter of William Conklin, of Brooklyn, N. Y. They have two children, Margaret and William Ellery Hale.

HOLST, Hermann Edouard von, historian and educator, was born at Fellin, Livonia, Russia, June 19, 1841, son of Valentine and Marie (Leuz) von Holst, of German descent. His father was a Lutheran minister. The son received his early education at a gymnasium in his native town, and in the spring of 1860 entered the University of Heidelberg, leaving it in 1863 to continue his studies at Heidelberg, where he received the degree of Ph.D. in 1865. In the summer of 1866 he went to St. Petersburg as a teacher, having previously begun by travel in France, Italy and Algeria to develop the cosmopolitan spirit which gives his university instruction a peculiar value. During a sojourn in southern France in 1867, his publication of a political pamphlet on the significance of the revolution made in 1866 by a Russian revolutionist upon the

of the czar, prevented his return to St. Petersburg. In July of 1867 von Holst came to the United States, where he had to make his way in the face of extreme poverty. For a time he taught modern languages at a small private school for children, and later became assistant editor of Schenck's "Deutsch-Amerikanisches Conversations-LEXICON," acting at the same time as correspondent of the Cologne "Zeitung." With the encouragement of his friend, the eminent historian von Sybel, he began the study of our government and history, which resulted in

his great work upon the constitutional development of the United States. He took an active part in the presidential campaign of 1868 as a Republican speaker, and in the people's uprising against the Tareed ring. In 1872 he accepted a call to the University of Strassburg, as assistant (extraordinary) professor of American history and constitutional law. In 1874 he was called to the University of Freiburg in Baden, as professor of modern history, a position he occupied until 1878, when he was delegated by the Prussian Academy of Sciences to make further historical investigations in the

United States, having placed at his disposal a considerable sum of money for this purpose. On this occasion he was able to visit the southern states and the districts beyond the Mississippi for the first time. During the year he gave a course of lectures at the Johns Hopkins University and at Cornell. Soon after his return to Germany in 1879 he received a call to the former institution, which was repeated in 1880, but both were declined on account of impaired health. In 1883 he was one of the European guests at the opening of the Northern Pacific railroad, and during this visit to the United States lectured at Harvard University and in St. Paul and other cities. Prof. von Holst is not wanting in political experience. In Freiburg he was repeatedly entrusted by his colleagues with administrative and executive offices. He was pro-rector magnificus at the time of Emperor Wilhelm's death in 1888, and was delegated to represent the university at the funeral in Berlin. In 1881 he was appointed by the grand duke of Baden a member in the upper chamber of the Baden landtag, serving for two years, being then elected by the university as its representative for three consecutive terms of four years each. During the last two sessions he was appointed vice-president by the grand duke. In 1892 he resigned, on account of having accepted the call to the University of Chicago as head professor of history, which position he still holds (1901). In 1894 Prof. von Holst gave a course of twelve lectures on the French revolution at the Lowell Institute in Boston, which were later published with additional notes, under the title "The French Revolution Tested by Mirabeau's Career." In 1896-97 the university gave him one year's leave of absence in Europe on account of illness. He lectured in Freiburg upon the history of the French revolution, of Germany since the Reformation, of the Napoleonic period and of Europe since 1815, beside directing seminary work on various historical topics. His principal literary work for many years was his extended history, "Verfassung und Demokratie der Vereinigten Staaten von America," the first volume of which appeared in 1873, and which is now complete, comprising in the English translation seven volumes and covering the period from the adoption of the constitution to the outbreak

of the civil war. Its English title is "Constitutional and Political History of the United States." In addition to this he has published "Staatsrecht der Vereinigten Staaten von America" (translated in Marquardsen's "Handbuch der Oeffentlichen Rechte" (1885); the volume on "Calhoun" in the American statesmen series, and many addresses, essays and critical papers. He is corresponding member of the Royal Prussian Academy of Sciences and honorary member of a number of American learned societies. Prof. von Holst was married in New York city, April 23, 1872, to Annie Isabelle, daughter of Rev. Josiah and Mary (Thomas) Platt. They have one son and one daughter.

HALE, William Gardner, educator, was born at Savannah, Ga., Feb. 9, 1849, of English and Scotch-Irish ancestry. His boyhood was passed in Peterborough, N. H., until the age of fourteen, when he entered the Phillips Exeter Academy to prepare for college. He matriculated at Harvard College in 1866, and was graduated from that institution in 1870. During the year following he held a fellowship from his alma mater in philosophy. In 1874 he was made tutor in Latin, and in 1876 was appointed to a Harvard traveling fellowship in classics. He spent his time in study at the universities of Leipzig and Göttingen, and in travel in Italy. Prevented by temporary ill-health from continuing his studies in Europe he returned to America, and was reappointed tutor in Latin at Harvard. In 1880 he was called to the professorship of the Latin language and literature in Cornell University, Ithaca, N. Y., resigning it in 1892 to accept the head professorship of Latin in the University of Chicago, which position he still holds (1901). When the American School of Classical Studies in Rome was projected he was made chairman of the managing committee. He was elected to the directorship of the school in its first year (1895-96), and was given leave of absence by the University of Chicago for this purpose. While in Rome he discovered a manuscript of Catullus hidden under a false number in the Vatican library. Upon his return he was re-elected chairman of the managing committee of the school. He was president of the American Philological Association for the year 1892-93, chairman of the Latin conference 1892-93, and member of the committee of twelve appointed by the American Philological Association in 1895. His important published papers include: "The Sequence of Tenses in Latin" (American Journal of Philology, Vols. VII, 4; VIII, 1; and IX, 1); "The Cum-constructions: Their History and Functions" (Parts I and II, of Vol. I, of the Cornell "Studies in Classical Philology" (1888-89); "Die Cum-Konstruktionen: Ihre Geschichte und ihre Funktionen" (a translation of the last mentioned work by A. Neitzert, with an introduction by B. Delbrück, Leipzig (1891); "The Art of Reading Latin: How to Teach It" (1887); "L'Art de Lire le Latin: Comment il faut l'enseigner" (a translation of the last mentioned work by Keelhoff, 1890); "Aims and Methods of Classical Study" (1888); "Democracy and Education" (1893); "The Place of the University in American Life" (1893); "Should Greek be Required for the Degree of Bachelor of Arts?" (1893); "Extended and Remote Deliberations in Greek" (1893); "The Anticipatory Subjunctive in Greek and Latin" (1894); "Did Verse-Ictus Destroy Word-Accent in Latin Poetry" (1895); "Syllabification in Roman Speech" (1896); "A New Manuscript of Catullus" (1896); "The Codex Romanus of Catullus" (1898), and "The Roman Pronunciation of Latin" (1898). Mr. Hale's general attitude towards the place and significance of classical studies in modern life is set forth in his pamphlet on the

"Aims and Methods of Classical Studies." Apart from his recent work upon the text of Catullus, his field for special research has been the syntax of the Latin and Greek languages, and his contributions to this department of classical study have received most favorable consideration from scholars in Europe as well as in America, while the results which they embody have been widely accepted. They have for the most part a direct bearing on pedagogic practice, and their incorporation in recent German, French and English school grammars and editions gives to them a practical significance not always vouchsafed to purely scientific work. But while the studies thus considered make up the most important part of Mr. Hale's scholarly publications, it is probable that he has affected classical scholarship in the United States most widely through his paper on "The Art of Reading Latin," which has exercised the most potent influence in promoting a more rational attitude of mind toward the possibility of acquiring and teaching a reading knowledge of the classical languages. All of Mr. Hale's writings are characterized by a lucidity of presentation which has contributed in no small degree to the favorable attention which they have so generally received. In 1895 he received the degree of LL.D. from Union College, and in 1896 from Princeton University. Since 1871 he has been associate editor of the "Classical Review." He was married, in 1883, to Harriet Knowles Swinburne, of Newport, R. I.

BURNHAM, Sherburne Wesley, astronomer, was born at Thetford, Vt., in 1838. He received a good education in the English branches at the Thetford Academy, and then studied stenography, which he adopted as a profession. He was engaged as shorthand reporter in the city of New York in 1859, and for two years during the war was the official reporter of the military court at New Orleans. He reported officially the state reconstruction convention of Louisiana, Alabama and Mississippi. He removed to Chicago in 1867, and continued to follow his profession as a law reporter for more than twenty years. When in London, in 1860, he purchased a small telescope for £5 and brought it home with him. This inferior instrument leading him to desire something better, he purchased a 3½-inch refractor, and used it for a time in connection with Webb's "Celestial Objects for Common Telescopes." This led to his procuring the best works on physical and mathematical astronomy, which he studied until he had mastered the general principles of the science. In 1869 he procured from Messrs. Alvan Clark & Sons, of Cambridge, Mass., at the cost of \$800, a telescope with a six-inch object glass to further his investigations in a course of independent study which he had now marked out for himself. The telescope was set up in a cylindrical building in the rear of his residence on Vincennes avenue, and thus equipped he pursued his work with unremitting application, all the while continuing his daily duties as stenographer during the sessions of the court. Little had been done in the line of discovery of new doubles, and before he began he had no intention of adding to the catalogues already in existence, but his remarkable acuteness of vision making up for the deficiencies of his instrument enabled him to make some important discoveries of double stars. As he lacked instruments for measuring them, he sent a list to Baron Dembourski, of Italy, the eminent astronomer, with the request that he should do the work, and the latter complied, at the same time encouraging Mr. Burnham to continue his investigations. In 1873 he sent two lists, aggregating 101 new double stars, to England, and these, together with a criticism of the catalogue of Sir John Herschel, by him, were published in the "Monthly

Notices of the Royal Astronomical Society." During the following twenty months he forwarded to the same publication additional lists of 296 new double stars, a larger number than had been discovered by all living astronomers during the preceding forty years. Subsequently he discovered almost 700 more, a total of more than 1,000, and this he did with scarcely any of the usual astronomical appliances, with no sidereal clock, no transit instrument, nothing in brief but a six-inch telescope, mounted equatorially on a stout piece of timber imbedded in the ground. In 1876 Mr. Burnham was given the use of the 18½-inch telescope of the Dearborn Observatory, making many important discoveries and measures. He also prepared a catalogue of all the double stars yet discovered, the only work of the kind ever attempted. In 1879, when Mount Hamilton was chosen as the site for Lick Observatory, he was selected, on the recommendation of Prof. Newcomb, to report on the atmospheric and other conditions of the locality, and subsequently observed the transit of Mercury from the same spot in conjunction with Prof. Holden. In 1888 he was appointed one of the astronomers of Lick Observatory, and continued to use the 36-inch refractor, the largest telescope in the world, until June, 1892, when he resigned and returned to Chicago, where he had been offered the important position of clerk of the U. S. courts. In 1897 he became connected

with the Yerkes Observatory, having the use of the great 40-inch telescope. Out of the 1,274 new double stars discovered by Mr. Burnham 195 are naked eye stars, not previously known to be double. Of the total number no fewer than 120 have been proved to be physically connected by later measurements, moreover, he has found new components to 113 old pairs, and of all known pairs whose distance is under 1" Mr. Burnham has added more than one-half. Also, he computed the orbit of the companion of Sirius and found its period to be fifty-three years. In 1891 he was awarded the gold medal of the Royal Astronomical Society. Mr. Burnham is a contributor to many scientific periodicals, including the "Astronomische Nachrichten," "Knowledge," "The American Journal of Science," "The Sidereal Messenger," and "Monthly Notices and Memoirs of the Royal Astronomical Association." A general catalogue of all his double star discoveries will be published by the University of Chicago at an early day.

DEWEY, John, educator, was born in Burlington, Vt., Oct. 20, 1859, son of Archibald Sprague and Lucia Artemisia (Rich) Dewey. His father (1812-91), was a veteran of the civil war, a merchant, and was distinguished for his wit and generosity. The son received his early education at the Burlington public high school, was graduated at the University of Vermont in 1879 with the degree of A. B., and subsequently pursued a course at Johns Hopkins University, where he received the degree of Ph. D. in 1884. In the latter year he became interested in philosophy in the University of Michigan, where he

years later was advanced to the post of assistant professor there. In 1888, however, he resigned to become full professor in the University of Minnesota, but remained only one year, when the University of Michigan called him back to take the chair of philosophy there, and with that institution he remained until 1894. He was then offered a position at the head of the department of philosophy and education in the University of Chicago, and this office, combined with the professorship of philosophy, he still holds, lecturing especially upon ethics and logic. In connection with his educational work he founded and conducted an experimental school for children, widely known for its investigations upon the relation of the psychology of childhood to methods and subject matter of teaching. He is an associate editor of the "Psychological Review" and a regular contributor to that and other philosophical journals. Among his published works are: "Psychology" (1886); "Outlines of Ethics" (1890); "Study of Ethics" (1894); "School and Society" (1899), and "Psychology of Numbers" (1895). He is a member of the Quadrangle Club of Chicago and of the Psychological Association. Dr. Dewey was married at Fenton, Mich., July 27, 1886, to Alice, daughter of Gordon and Lucy (Riggs) Chipman, of that place, and has two sons and three daughters.

WILKINSON, William Cleaver, educator and author, was born at Westford, Vt., Oct. 19,

1833, son of Dr. Thomas and Sarah (Cleaver) Wilkinson. He was graduated at the University of Rochester, New York, in 1857, and at the Rochester Theological Seminary in 1859.

In the same year he was ordained to the ministry, and became pastor of the Second Baptist Church in New Haven, Conn. After a little less than two years, his health failing, he went abroad, spending a winter in Paris and attending lectures in the university. Then, having made the tour of Europe, he returned and became professor *ad interim* of modern languages in the University of Rochester.

While occupying this position he was married, in 1863, to Har-

riet Sergeant, daughter of Prof. John F. Richardson, head of the Latin department in that institution. His health continuing delicate, he, with his wife, made the journey across the plains to Denver and the Rocky mountains. This experience so far restored him that he accepted the pastorate of the Mount Auburn Baptist Church, Cincinnati, O., but his health breaking again he relinquished the hope of being a pastor, and undertook a private school at Tarrytown, N. Y. From this employment, in which he had been prosperous, he was called to the chair of homiletics and pastoral theology in Rochester Theological Seminary. This chair he filled from 1872 to 1881, declining an urgent invitation to take charge of the department of English in the University of Michigan, which came to him in 1873. He had some two years previously declined an invitation from the same institution to become professor of the German language and literature. In 1873 he received the degree of D. D. from the University of Rochester. In 1881 he retired from Rochester to Tarrytown, where he had previously established his residence, and there devoted himself to literary work. In 1882 he accepted a professorship and removed to the new University of Chicago, where he is still holding the chair of poetry and criticism. Prof. Wilkinson has repeatedly

traveled abroad. He has also made extensive tours on the American continent, visiting the chief cities of the United States, of Canada, and of the republic of Mexico. Besides contributing largely in both prose and verse to many of the leading periodicals, he has published the following books: "The Dance of Modern Society" (1868); "A Free Lance in the Field of Life and Letters" (1874); "The Baptist Principle" (1881, new and enlarged edition, 1897); "Webster: An Ode with Notes" (1882), a poem originally delivered before the Phi Beta Kappa Society of the University of Vermont, and afterwards in part at the Webster centennial at Marshfield, Mass.; "Poems" (1883); "Preparatory Greek Course in English" (1883); "Preparatory Latin Course in English" (1884); "College Greek Course in English" (1885); "Edwin Arnold as Poetizer and as Paganizer" (1885); "College Latin Course in English" (1886); "Classic French Course in English" (1887); "Classic German Course in English" (1888); "The Epic of Saul" (1891), and "The Epic of Paul" (1897). The series of books devoted to foreign literature in English were used for some ten years by the Chautauqua Literary and Scientific Circle, of which association Prof. Wilkinson was from the first, as he still is, a councillor. The sales of these books have aggregated nearly half a million copies. "The Dance of Modern Society" has had a large sale and is still in active demand. The two epics have each lately passed to a second edition. The author visited Palestine and the East in the course of their composition. Prof. Wilkinson was for some years an active member of the famous Greek Club, of New York city; the "Pundit" Club in Rochester; the Fortnightly Club, Tarrytown, N. Y., and the Quadrangle Club of Chicago.

LOEB, Jacques, physiologist, was born in Berlin, Germany, April 7, 1859, son of Benedict Loeb. He attended the Acanisches Gymnasium of his native city, and afterwards the universities of Berlin, Munich and Strassburg. Upon graduation at the Strassburg University he received the degree of M. D. (1884), and was later engaged as assistant in physiology at the University of Wuerzburg (1886-88), and at that of Strassburg (1888-90). Having spent a short time in Naples, Italy, as a student at the local biological station (until 1891), he emigrated to the United States, and first became associate professor in biology at the Bryn Mawr College, Bryn Mawr, Pa. (1891-92), and then assistant professor of experimental biology and physiology at the University of Chicago (1892-95). Consecutively he was made associate professor (1895-1900), and professor of physiology, which latter post he now holds. Dr. Loeb has won wide renown by his scientific experiments and publications. His recent work, "Comparative Physiology of the Brain and Comparative Psychology" (New York, 1900), has attracted especial attention, even outside of scientific circles. It is an exhaustive study of physiological psychology, made in accordance with the inductive method of scientific investigation. He shows in it by means of a mass of experiments that instinctive and involuntary actions, which were formerly supposed to be directed by half-conscious brain centres or ganglions, are due either to chemical or "tropic" reactions, or both. This is especially true of the "involuntary functions" of the higher animals. It is found, for instance, that a certain chemical solution, of which common salt is an element, causes muscular tissue to contract rhythmically. Testing this on portions of the heart tissue and on detached hearts of certain animals Loeb showed that it would inevitably cause such contractions, or heart beats, and on injecting it into the human blood vessels, he found it had the same effect.

W. C. Wilkinson

Thus a mass of activities throughout the animal world which have been formerly ascribed to intelligence or to ganglionic supervision are shown to be simple chemical, physical or galvanic reactions, such as are common to all protoplasmic matter. Besides this work and several articles contributed to scientific journals Dr. Loeb has published "Animal Heliotropism" (1890), and "Physiological Morphology" (1891). He was married at Easthampton, Mass., in 1890, to Anne L., daughter of G. H. Leonard, and has two sons, Leonard Benedict and Robert.

WHITMAN, Charles Otis, biologist and educator, was born at Woodstock, Me., Dec. 14, 1842, son of Joseph W. and Marcha (Leonard) Whitman. His earliest American ancestor, John Whitman, came to this country from England before 1838 and settled at Weymouth, Mass. Mr. Whitman was graduated at Bowdoin College in 1868 and in the following year accepted a position as principal of the Westford Academy, where he remained until 1872, when he became master in English at the High School, Boston. Going abroad in 1874, he entered the University of Leipzig, and received the degree of Ph.D. in 1878. In 1879 he was made a fellow of the Johns Hopkins University. In 1880-81 he was professor of zoology at the Imperial University of Japan and in 1882 at the Naples zoological station. He was an assistant in zoology at Harvard University in 1883-85; director of the Allis Lake Laboratory in 1886-89, and professor of zoology at Clark University in 1889-92. In 1892 he was appointed professor and head of the department of zoology at the University of Chicago and still occupies this chair (1901). Since 1888 he has been director of the marine biological laboratory, Wood's Hall, Mass. The aim of this laboratory, which was incorporated in 1888, at first was to provide a station for summer work in marine zoology, but the scope of its work has enlarged until it now includes the chief branches of both animal and plant morphology and physiology. While offering unrivaled facilities for instruction, its dominant purpose is original investigation. Its organization is national and co-operative in character, consisting of a corporation of about four hundred members, representing the leading colleges, universities and schools of the country, a board of trustees and a scientific staff. He is editor of the "Journal of Morphology," which he established in 1887; also of the "Biological Bulletin," and the "Biological Lectures," and is author of "Methods of Research in Microscopical Anatomy and Embryology" (1890). The University of Nebraska conferred the degree of LL.D. upon him in 1894. Prof. Whitman is a member of the National Academy of Sciences and foreign member of the Linnaean Society.

LAUGHLIN, James Laurence, educator, was born at Deerfield, O., April 2, 1850, son of Harvey and Mary Minerva (Mills) Laughlin, of Scotch Presbyterian descent. He was graduated at Harvard College in 1873, taking the highest honors in history. From 1873 to 1878 he spent as first assistant in Hopkinson's private classical school in Boston, preparing pupils for Harvard, and while here he published a work on Anglo-Saxon legal procedure. In 1878 he was called to Harvard as instructor in political economy, and in 1883 was made assistant professor. The Finance Club, projected by him, was the first organization of its kind in Harvard. He had a hand in the establishment of the "Quarterly Journal of Economics" and contributed to its pages. He also projected in 1883 the Political Economy Club, of which he was secretary and treasurer. In 1884 Prof. Laughlin brought out an edition of "Mills' Principles of Political Economy," reducing the two volumes of the original to one and

adding an equal amount of new material of his own in the form of bibliographical and biographical notes, a sketch of the history of political economy, and in particular a collection of materials for the economic history of the United States, to illustrate to American students the principles of the science. This book was used as a text-book at Harvard, Yale and other universities, and passed through many editions. In 1885 he published "The Study of Political Economy." The aim of this book was to analyze the qualities of mind brought into play by the study of political economy, and to suggest to students and teachers the best methods of work. In 1885 he produced a "History of Bimetallism in the United States." A writer in the "Contemporary Review" said of it: "It is much more than a chronicle of American monetary history; it penetrates to the causes of every successive phenomenon, and thus runs off into general investigations and discussions of almost every question of interest connected with the currency." He became president of the Manufacturers' Mutual Fire Insurance Co., of Philadelphia. During 1890-92 he was professor of political economy at Cornell University, where his work was stimulating and effective. Since 1892 he has held the chair of political economy at the University of Chicago. Of late years Prof. Laughlin has occupied himself especially with the study of money and the currency. In 1891-95 he prepared for the government of San Domingo a scheme of monetary reform, which was afterward adopted, and in 1898 he was a member of the monetary commission created by the Indianapolis Monetary Conference. Other published works are: "Gold and Prices Since 1873" (1887); "Elements of Political Economy" (1888); "Indian Silver Currency" (translated from the German of Ellsletter, 1895); "Facts About Money" (1895), and "Report of the Monetary Commission" (1898). He is the editor of the "Journal of Political Economy," and has been a contributor to the "Atlantic Monthly," the "International Review," the "North American Review," the "Popular Science Monthly," "Science," the "Quarterly Journal of Economics," and other journals. In 1873 Harvard University conferred upon him the degrees of A. M. and Ph. D. He is a member of the Institut International de Statistique and a corresponding member of the Société d'Etudes Sociales et Politiques.

J. Laurence Laughlin

SALISBURY, Rollin D., geologist and educator, was born at Spring Prairie, Walworth Co., Wis., Aug. 17, 1839, son of Daniel and Lucinda (Bryant) Salisbury. After attending the district school until he was sixteen years of age he spent two years at the state normal school, Whitewater, Wis., and in 1857-58 taught in the public schools at Port Washington. Entering Beloit College, he was graduated there Ph.B. in 1861; was an instructor in the academy of that institution until 1863; and from 1861 until 1891 occupied the chair of geology in the college, although he spent 1867-68 in Europe, chiefly in the University of Heidelberg. In 1891 he was professor of geology in the University of Wisconsin, and in 1892 he accepted the chair of general geology in the University of Chicago, which post he still (1901) holds, becoming dean of the Graham School of Science there in 1898. In 1883 he was an assistant to Prof. T. C. Chamberlain in the

of the U. S. geological survey; has retained his connection with this survey until the present time, and in 1890 assumed charge of the surface geology of New Jersey for the geological survey of that state. In 1895 Prof. Salisbury accompanied the Peary auxiliary expedition to North Greenland. In 1884 he received the degree of A. M. from Beloit College. He prepared the annual reports of the New Jersey geological survey for the years 1892 to 1899, and has published a "Physical Geography of New Jersey" (1896); "Geography of Chicago and Its Environs," with W. A. Allen (1899); "The Geography of the Region About Devil's Lake and the Dalles of Wisconsin," with W. W. Atwood (1900), and "The Driftless Area of Southwestern Wisconsin," with T. C. Chamberlin (sixteenth annual report of the U. S. geological survey), beside numerous articles in the "Journal of Geology" in 1892-1900, and occasional contributions to the "American Geologist," "American Journal of Science," and the bulletin of the Geological Society of America.

BUTTS, Annice E. Bradford, educator, was born at Rome, N. Y., Sept. 22, 1844, daughter of David Knight and Emily (Wilcox) Butts. Her first American ancestor was William Bradford, governor

of Connecticut. Josiah Butts, her great great-grandfather, had six sons and seven grandsons invariably ranks of the Continental army during the revolutionary war. Her father was a land owner. She attended the Rome and Vernon academies, and was subsequently graduated at Stanwix Seminary in 1867. She became principal of Joliet West Division High School, remaining in that position until 1871. From 1871 to 1877 she was a teacher in Dearborn Seminary, Chicago; from 1881 to 1886 principal

of the Fifty-fourth Street School, Chicago, in the latter year becoming principal and owner of Kenwood Institute, which position she now holds. The Kenwood Institute, in 1893, became an affiliated academy of the University of Chicago and in 1901 opened a branch school in Paris. In 1898 she was given the degree of M. A. at Washington College. Miss Butts is a member of the Woman's Club, Chicago; Travel Class, Chicago, of which she was director for nine years, and of the Archie Club. She is still engaged in teaching her favorite branch of study, the history of art, in which she has made a life research, enriched by foreign travel.

CHAMBERLIN, Thomas Crowder, geologist and educator, was born near Mattoon, Coles co., Ill., Sept. 25, 1843, son of Rev. John and Cecelia Chamberlin. He was graduated at Beloit College in 1866. He then passed two years as principal of the Delavan (Wis.) High School, and while there developed an interest in physical science, which determined his future profession. In 1868-69 he took a post-graduate course in science at the University of Michigan and at its close accepted the chair of natural sciences in the state normal school at Whitewater, Wis., where his ability as an instructor soon brought him into notice. In 1873 he was called to the chair of

geology, zoölogy and botany in Beloit College, and was as the same time made assistant geologist of the Wisconsin geological survey. In 1876 he became chief geologist of Wisconsin. After this appointment he suspended his active work at Beloit for three years and devoted his whole time to work upon the geological survey. The publication of the report of this survey, which was begun in 1877, was not completed until 1881, and then included four large volumes, illustrated with many plates. In 1878 he visited Switzerland and made a special study of glaciers in the Alps. In 1881 he was made chief of the glacial division of the U. S. geological survey and with this appointment his connection with Beloit College closed. Under his direction the study of glacial geology received a great impetus throughout the country. During this period he was elected to the chair of geology in the Columbian University, but never entered upon active work there. In 1887 he became president of the University of Wisconsin, retaining his position on the survey. During the five years of his administration the prosperity of the university was unexampled. It was reorganized on the modern university basis and doubled in numbers and in its facilities and efficiency. The instructors were increased by over a score; a splendid science hall was completed and equipped; three new buildings were in the process of construction, and the system of university extension lectures was adopted and put into successful operation. He resigned the presidency in 1892 to accept the head professorship of geology in the University of Chicago. His work as U. S. geologist has taken him over a large part of the country and has made him one of the recognized authorities on the geology of our country and especially upon the glacial period. In 1894 he visited north Greenland as geologist to the Peary auxiliary expedition and made a special study of its glacial phenomena, upon which he has published an extended series of articles. He is the author of "Geology of Wisconsin" and has written many papers on geology, some of which were read before the international congress of geologists; others before the American Association for the Advancement of Science, of which he has been vice-president; the Wisconsin Academy of Science and Arts, of which he was a charter member, and the Geological Society of America, of which he has been president, while many of them have appeared in periodicals and bulletins of the day. In 1882 Prof. Chamberlin received the degree of Ph. D. from both the University of Wisconsin and the University of Michigan. In 1887 Beloit College, the Columbian University and the University of Michigan gave him the degree of LL. D. He is director of the Walker Museum, president of the Chicago Academy of Sciences and editor of the "Journal of Geology." In 1867 he was married to Alma Isabel, daughter of James Wilson.

MATHEWS, Shailer, educator, was born in Portland, Me., May 26, 1863, son of Jonathan Bennett and Sophia Lucinda (Shailer) Mathews, and a descendant of James Mathews, who removed from Charlestown, Mass., to Yarmouth in 1639 and in 1664 was a member of the general court. From James the line of descent runs through his son, Thomas; his son, John, who was married to Hannah Sturgis; their son, David, and his wife, Sarah Hedge; their son, Elisha (who was a member of the "Boston tea party"), and his wife, Mercy Whelden; their son, Jonathan, and his wife, Abigail Ingraham, and their son, Elijah, and his wife, Anna Bennett, who were Prof. Mathews' grandparents. Among his maternal ancestors were Gov. Bradford and Stephen Hopkins. Jonathan Bennett Mathews is a merchant in Boston, Mass. The son was graduated at Colby University in 1884 and at Newton Theological Insti-

Annice Bradford Butts

tution in 1887. In the latter year he was appointed assistant professor of rhetoric and elocution in Colby University, where, in 1889, he became professor of history and political economy. In 1890-91 he studied at the University of Berlin. He was appointed associate professor of New Testament history and interpretation in the University of Chicago in 1891 and was promoted to a full professorship in 1897. He still (1901) occupies this chair, while he has been junior dean of the divinity school since 1899. Prof. Mathews is the author of "Select Mediaeval Documents" (1892); "The Social Teaching of Jesus" (1897); "History of New Testament Times in Palestine" (1899); "The French Revolution: a Sketch" (1900), and "Constructive Studies in the Life of Christ," with E. D. Burton (1901). He is a member of the American Historical Association and the Society of Biblical Literature and Exegesis. In 1887 he received the degree of A.M. and in 1901 that of D.D. from Colby University. He was married, July 16, 1890, to Mary Philbrick, daughter of Jones Raymond Elden, of Waterville, Me. They have two children, Robert Elden and Helen Mathews.

SHOREY, Paul, educator, was born at Davenport, Scott co., Ia., Aug. 3, 1857, son of Daniel Lewis and Maria Antoinette (Merriam) Shorey. He is descended from Francis Whitmore, his earliest American ancestor, and his wife, Isabel Parke, of Cambridge, Mass., through their son, John, and his wife, Rachel Poulter; their son, John, and his wife, Mary Lane; their daughter, Susannah, and her husband, Benjamin Webber; their daughter, Martha, and her husband, John Hosmer; their daughter, Martha, and her husband, Thompson Bacon; their son, Reuben, and his wife, Sarah Clarke, and their daughter, Nancy, and her husband, John A. Merriam, who were Paul Shorey's grandparents. Thompson Bacon was a soldier in the revolutionary army, and Nathan Reed, another ancestor, was one of Capt. Parker's minute men at Lexington. After finishing the course at the Chicago High School in 1874, Paul entered Harvard University, where he was graduated in 1878. In 1880 he was admitted to the bar in Chicago, Ill., and began the practice of law with his father in that city. In the following year he went abroad and studied at the University of Leipzig in 1881-82; the University of Bonn in 1882, and the American School of Classical Studies at Athens, 1882-83. In 1884 he received the degree of Ph.D. from the University of Munich. Returning to America he became professor of Greek at Bryn Mawr College in 1885, and held this position until 1892, when he was called to the chair of Greek language and literature at the University of Chicago, where he is still head of that department. During the year 1901-2 he was professor of the American School of Classical Studies at Athens. He is the author of "De Platonis Idearum Doctrina" (1884); "The Idea of Good in Plato's Republic" (1895); "The Odes and Epodes of Horace" (1898), and numerous articles in "The Dial," "The Forum," "Atlantic Monthly," "The Nation," and other periodicals. He is a member of the Literary and Quadrangle clubs of Chicago. Dr. Shorey was married in Philadelphia, Pa., June 20, 1895, to Emma Large Gilbert.

MacCLINTOCK, William Darnall, educator, was born at Elizaville, Ky., July 28, 1858, son of Alexander and Cornelia (Darnall) MacClintock. His early education was received at Millersburg, Ky., and at the Kentucky Wesleyan College, where he was graduated with the degree of A. B. in 1878. For two years he taught at Millersburg, and in 1880 began a post-graduate course in the English department of Johns Hopkins University, holding a graduate scholarship in that institution for two

years. He was appointed instructor in English in Chautauque College in 1881, continuing in the work until 1898. He was a student in Union Theological Seminary, New York, in 1884-85, and pastor of the Disciples' Church, Richmond, Ky., in 1886-88. In 1889 he became professor of English at Wells College, Aurora, N. Y. The latter position he resigned in June, 1891, and in the following year was elected assistant professor of English literature in the University of Chicago, with which institution he has since been connected. In 1891 he was advanced to the position of associate professor in his department, and dean of the Junior Colleges. He was advanced to a full professorship in 1899. Prof. MacClintock was married at Southside, Ky., on July 7, 1886, to Lucia Porter, daughter of J. Franklin and Sarah (Scott) Lander. They have four children.

HENDERSON, Charles Richmond, clergyman and educator, was born at Covington, Ind., Dec. 17, 1818, son of Albert Henderson and Lovaine (Richmond) Henderson. He was graduated A. B. at the University of Chicago in 1870 and he subsequently received the degree of A. M. from that college. He prepared for the ministry at the Baptist Union Theological Seminary and afterward received the degree of D. D. from that institution. From 1873 to 1882 he was pastor of the First Baptist Church at Terre Haute, Ind.; for the following ten years he had charge of the Woodward Avenue Baptist Church at Detroit, Mich., and since 1892 he has held appointments as professor of sociology in the University of Chicago. He was elected president of the National Conference for Charities and Correction in 1898, and holds membership in the American Economic Association and the American Academy of Political and Social Science. He has been or is trustee or director of several institutions and societies, including the Rose Orphan Home, Association of Charities, and the Home of Industry for Discharged Prisoners. He published works entitled "Introduction to the Study of Dependents, Defectives and Delinquents" in 1893; "Development of Doctrine in the Epistles" (1895); "The Social Spirit in America" (1897); "Social Settlements" and "Social Elements" (1897). He was married at Lafayette, Ind., in 1873, to Ella L. Levering.

TUFTS, James Hayden, educator, was born at Monson, Hampden co., Mass., about 1858, son of Rev. James and Mary Elizabeth (Warren) Tufts. His earliest American ancestors in any line were: Rev. Ralph Wheelock, who emigrated to this country about 1630 and settled at Melbury, Mass., and Deacon Samuel Chapin, of Springfield, Mass., who came over about the same time. The earliest paternal ancestor, John Tufts, emigrated probably from Londonderry, Ireland, about 1728 and settled at West Brookfield, Mass. From him and his wife, Agnes Foote, the line of descent runs through their son, William (who served as a private in the French and Indian war and as first lieutenant in the revolution), and his wife, Margaret Brown, and their son, James (who was graduated at Brown University in 1789 and was pastor of the Congregational Church at Wardsboro, Vt., in 1795-1811), and his wife, Submit Hayden, who were Paul Tufts' grandparents. His father was graduated at Yale in 1828 and was principal of the Monson Academy.

where the son received his early education. He was graduated at Amherst College in 1884, was instructor in mathematics there in 1885-87, and subsequently entered upon a course of study at Yale University, where he received the degree of Ph.D. in 1889. In the latter year he became instructor in philosophy in the University of Michigan and held this position until he went to Germany in 1891. He spent that and the following year at the universities of Freiburg and Berlin, and in 1892 the degree of Ph.D. was conferred upon him by the former institution. On his return to America he was appointed assistant professor of philosophy in the University of Chicago, and in 1894 he was advanced to associate professor, which post he still (1901) occupies. Since 1899 he has been dean of the senior colleges. He has published the following works: "Sources and Developments of Kant's Teleology" (1892); "History of Philosophy," translated from the German of Windelband and edited by Prof. Tufts (1893; rev. ed., 1901); "The Individual and His Relation to Society as Reflected in British Ethics" (Part I, 1898), and a "Text-book on Ethics," with Prof. John Dewey (in press). He contributed articles on aesthetics and the history of philosophy to the "Dictionary of Philosophy and Psychology" (1901), and is a contributor to the "Philosophical Review," "American Journal of Psychology," "Journal of Systematic Theology," and other similar publications. He is a member of the American Psychological Association. On Aug. 5, 1894, he was married to Cynthia Hobart, daughter of Augustus G. Whitaker, of Leverett, Mass. They have two children, Irene and James Warren Tufts.

STAGG, Amos Alonzo, educator, was born at West Orange, N. J., Aug. 16, 1862, son of Amos Linsley and Eunice (Pierson) Stagg. Though originally English, the ancestors on both sides have been citizens of the United States for several generations. He received his early education in the public schools, was graduated at the Orange High School and later attended the Phillips Exeter Academy. Entering Yale University in 1884, he was graduated there four years later, with the degree of A. B.; immediately renewing his studies, however, he completed a year's post-graduate course in 1889 and still later studied for a year in the Yale Divinity School. From 1890 until 1892 he was both a student and special lecturer at the Young Men's Christian Association Training School at Springfield, Mass., teaching the theoretical and practical sides of physical culture and training. This position he resigned to accept the post of associate professor and director of the department of physical culture at the University of Chicago, upon the opening of that institution in 1892, in 1900 becoming professor and still (1901) occupying the chair. He was married, Sept. 10, 1894, to Stella, daughter of Mary A. Robertson, and has one son, Amos Alonzo Stagg.

COQUILLARD, Alexis, pioneer, was born in Detroit, Mich., Sept. 28, 1735, of French descent. Detroit was at this time but a mere frontier settlement, having no schools of importance, and the early boyhood of young Coquillard was passed among scenes of fortress and garrison life. When about seventeen years of age he arrived at the camp of Gen. Harrison, whose army was in a state of defense at Fort Stephenson, and offered his services as mail carrier. He successfully passed through all the privations and dangers of the first formidable journey, bringing back to the beleaguered information of great importance and afterwards continued in the employ of the Americans during the war. About 1815 he became an Indian trader, dealing with the tribes on the peninsula and the country of St. Joseph

river, and soon won such reputation that in a short time after beginning business for himself he was appointed agent for the American Fur Co., established by John Jacob Astor. In 1822 he purchased in connection with Francis Compaet, of Fort Wayne, the extensive agency of the American Fur Co. for all the region of the upper lakes. In 1823 he established a post at the place now occupied by South Bend, Ind., which became known as the Big St. Joseph station, and was the principal centre of all Indian trade in Indiana and Michigan. In the following year he was married at Fort Wayne to Frances C. Compaet, daughter of his partner, and settled with her at this post, being the first permanent white settler and originator of the colony, which subsequently developed into the thriving and beautiful city of South Bend. Previously, in 1820, Pierre F. Navarre, a Frenchman in the employ of the American Fur Co., came here and in this vicinity was married to a squaw of the Pottawatomie tribe of Indians; when the latter were removed to their reservation in the West, he followed them, returning to South Bend afterwards. On March 28, 1831, South Bend was laid out by Alexis Coquillard and Lathrop M. Taylor, who also was an Indian trader, and had come to this place next to Coquillard, Sept. 25, 1827. He settled on the St. Joseph river, the whole vicinity being at that time a wilderness, and in November, 1830, purchased, in connection with Coquillard, the quarter section of land, on which the city of South Bend is situated. The first charter election was held Oct. 3, 1835, when the town government was organized. In 1835-36 a charter offering opportunities for the establishment of flouring mills was granted by the legislature, and three years later Coquillard, in connection with two other residents, built the first flouring mill in South Bend, known as the Kankakee mill. He had previously constructed a saw-mill. His superior abilities and activity became a powerful factor in the development of the city's prosperity, and his thorough knowledge of the Indian tribes, which procured him the appellation of Pottawatomie chief, combined with the confidence of the red men in his honor and good faith, frequently induced the government to employ him in adjusting difficulties, and carrying into effect the treaties made with them. He died in South Bend, Ind., Jan. 8, 1855.

DOWNES, John, naval officer, was born at Canton, Norfolk co., Mass., in 1786. He began his career in the navy as a midshipman when sixteen years of age. During the war with Tripoli he served on the frigate New York, distinguishing himself in a boat attack upon Tripolitan feluccas. He was promoted lieutenant in March, 1807, and in the war of 1812 was assigned to the frigate Essex, to serve as executive officer under Capt. Porter during her cruise in the Pacific. A large number of British whaling ships were captured, with about 400 prisoners, and the British loss was \$2,500,000. Downes was next placed in command of a sixteen-gun cruiser, Essex Junior, transformed into a cruiser from the captured whale ship Georgiana, and remained in this position until March 28, 1814, when the Essex was captured and Essex Junior converted into a cartel. In 1813 he was made master commandant, and in 1815 was placed in command of the brig Epervier, of the squadron that, under Decatur, operated against Algiers. In this campaign he captured the Algerine frigate *Nashouda* on June 17, 1815, and on June 19th captured off Cape Palos, in conjunction with three other vessels of the squadron, the Algerine brig-of-war *Estido*, carrying twenty-two guns and 180 men. After the war he was transferred to Decatur's ship *Guerrière*. In March, 1817, he was promoted to the rank of captain. He commanded the frigate *Macedonia* in the Pacific in 1819-21, the *Java* in the Mediterranean in

1828-29, and the squadron in the Pacific in 1832-34. On Feb. 6, 1832, he attacked and nearly destroyed Quallah Batoo, on the coast of Sumatra, for an outrage committed on an American vessel. Subsequently he was commandant of the navy yard at Boston, in 1837-42 and in 1850-52. He died in Charleston, S. C., Aug. 11, 1855.

BLAKE, Thatcher, pioneer, was born at Turner, Oxford co., Me., March 16, 1809, son of Thatcher Blake, of Taunton, Mass. On his mother's side he was a direct lineal descendant of Edward Winslow, who came to this country in the Mayflower. He removed with his parents to Foxcroft, Piscataquis co., where his father settled on a farm, the son assisting in the summer season and teaching district school in the winter, until June 1, 1834. He then left home and started for the great West, having no fixed place for location. After wandering from one place to another and trying his fortunes in several adventures he arrived in Galena, in the Rock river country, with a view of engaging in mining. Here he met Germanicus Kent, from Alabama, and they arranged to explore the Rock river valley together. Having stopped and explored the country at various times, they finally camped on the site of the present city of Rockford (August, 1834), of which they were the first white settlers. Here they started a colony, originally called by them Midway, evidently because it is about half way between Chicago and Galena, and took up claims. A month or two later Kent extended an invitation to a number of his Southern friends to join their colony at Midway, which name was abandoned late in 1835 for Rockford, originating from the rock-bottom ford on the river here. Blake selected a claim still known as Blake's Grove, two and one-half miles west of the present city, on the state road. On Nov. 6, 1838, he was married to Mary Jane Goodhue, and this was the first marriage ceremony performed in that country. He resided on his farm where he first settled until 1857, when he removed to the city proper, and has since then been engaged in real estate on his own account.

SALOMON, Haym, financier, was born in Lissa, Prussian Poland, about 1740, and descended from Portuguese-Hebrew stock. While a youth he visited many countries, acquiring various languages and at last came to America a few years before the revolution. He was in New York when the British took possession of the city and with other patriots was arrested and confined in the prison known as the "Provost." He escaped and went to Philadelphia, where he settled as a merchant and banker, and succeeded in accumulating a large fortune. During his residence there he was entrusted with the negotiation of all the war subsidies of France and Holland on his own personal integrity. He was for some time banker for the French government, acting as paymaster-general of the French forces in this country. When Continental money was withdrawn, thereby causing suffering among the poor of Philadelphia, Haym Salomon distributed \$2,000,000 in specie to relieve distress. During the whole struggle for independence he devoted his large means to the use of the American government and loaned to Robert Morris, as the financier of the revolution, about \$600,000 in specie. At his death \$400,000 of this amount had not been returned. Funds were also given, when necessity required, to Jefferson, Wilson, Ross, Duane, Reed, Mercer, Arthur Lee, Joseph Jones, Harrison, Randolph and others. He loaned money to the agents or ministers of several foreign states when their own sources of supply were cut off, among others to the minister from Spain to the United States and to the Chevalier de La Luzerne, the French ambassador, as well as to the two con-

suls general, Marbois and De La Fayette, both of whom were subsequently ministers of Napoleon I. Of these three distinguished statesmen he was a confidential friend. His descendants have rendered the government for reimbursement and their names have on several occasions been favorably reported upon by committees of congress, but so far without result. Haym Salomon was married to Rachel Frank, daughter of Moses B. Frank, of London. He died in Philadelphia, Pa., in 1785.

ANDREWS, Joseph, engraver, was born at Hingham, Mass., Aug. 17, 1806. He early showed an inclination for art, and at the age of fifteen went to Boston, where he was apprenticed to Abel Bowen, a wood engraver of that city, and was instructed in copper plate engraving by Houghland. Two years later he engaged in the engraving and printing business at Lancaster, Mass., together with his brother, a printer. In 1829 he executed his first engraving on steel from Alvan Fischer's painting, entitled "The Wicked Flee Where No Man Pursueth," and also small plates for book publishers. He went to London in 1835, and studied for about nine months with Joseph Goodyear, under whose guidance he executed the plate of "Annette de l'Arbre" after W. E. West, and then proceeded with his instructor to Paris, where he engraved the head of Benjamin Franklin after a painting by Duplessis. He made another journey through Europe in 1840-42, and during his stay in France executed six plates of portraits for the Galerie Historique de Versailles, published under the auspices of Louis Philippe. Thence he proceeded to Florence, Italy, where he commenced his plate of the Duke of Urbino, after Titian, which he finished upon returning to America. The most important of his productions is a historical engraving after Peter Frederick Rothermel's painting "Plymouth Rock, 1620," on which he worked during 1855-69. His other works include: George Washington, from the original painting by Stuart; Oliver Wolcott, after Trumbull; John Quincy Adams, Zachary Taylor, Jared Sparks, after Stuart; Amos Lawrence, after Harding, and Abbott Lawrence, after Healy, engraved in conjunction with Thomas Kelly; James Graham, after Healy; Charles Sprague; Thomas Dowse, after M. Wight; "Passing the Ford," after Alvan Fischer; "The Panther Scene," after G. L. Brown; "Swapping Horses," after W. S. Mount; "Parson Wells and His Wife," after Christiana and Her Children in the Valley of Death, after Daniel Huntington; "The Witch of Endor," after Alston, and "The Pilgrim's Progress," after Billings. He died in Boston, Mass., May 7, 1873.

WHITESIDE, Jenkin, senator, was born at Lancaster, Pa., in 1782. He removed to Tennessee, where he became prominent in the practice of realty law, which he made a specialty, and acquired an extensive property in the course of his career. He was elected to represent Tennessee in the U. S. senate, taking the place made vacant by the resignation of Sen. Daniel Smith, and he continued to hold his seat in the upper house of the national legislature from May 26, 1809, to Sept. 1, 1814, when he resigned to renew the practice of his profession. His uncounted exterior and rugged manner were emblematic of the vigorous workings of his mind. He died in Nashville, Tenn., Sept. 25, 1824.

EDGERTON, Sidney, first territorial governor of Montana (1864-66), was born at Cazenovia, Madison co., N. Y., Aug. 17, 1818, youngest son of Amos and Zerviah (Graham) Edgerton. Richard Edgerton, first of the family in this country, was a resident of Saybrook, Conn., as early as 1655, and was one of the founders of Norwich. Through his mother he was descended from both George and William Phelps, early proprietors of Dorchester, Mass., and Windsor, Conn., and was related to many revolutionary soldiers. His father, also a native of West Simsbury, was a teacher of exceptional ability, and died in the year of his son, Sidney's, birth. At the age of eight Sidney Edgerton began to earn his own living. He paid for tuition at a district school by the labor of his hands, and later attended the Genesee Wesleyan Seminary, Lima, N. Y. After teaching for a year at Lockport, N. Y., he returned to the seminary and was an instructor there until 1844, when he removed to Akron, O., and began the study of law. He was principal of an academy at Tallmadge, O., in the following winter, and then studied for a year in the Cincinnati Law School. Returning to Akron, he formed a partnership with Oliver C. Lewis, but soon became a member of the firm of Humphrey, Upson & Edgerton, and continued in active practice until 1859. In 1848 he was a delegate to the convention which formed the Free-soil party, and in 1852 was elected prosecuting attorney of Summit county, Idaho, formerly a part of Washington territory. He was a member of the convention which formed the Republican party in 1856. In 1858 and in 1860 he was elected to congress from the 18th Ohio district. In 1865 congress organized the Idaho territory, and Mr. Edgerton, having been appointed its chief-justice, settled in Bannack. In January, 1864, he went to Washington to secure a division of the territory, and on the formation of Montana territory, May 26th, was appointed governor. The first legislature convened at Bannack, Dec. 18th. In his message he recommended a memorial to congress protesting against the burdens imposed by the mining laws of Idaho, still in force, and against the proposed imposition of a seigniorage tax on the products of placer mining, practically the only ones worked in the territory at that time. The extinguishment of the Indian title to lands in the territory was advised, and the cause of education was commended. His position was a

difficult one to fill, for many in the territory had renounced allegiance to the United States. Political resentment in the legislature finally assumed such a form that in 1867 the name of Edgerton county was changed to that of Lewis and Clarke. During his administration many special franchises were granted and many corporations chartered. In the autumn of 1865 he returned to the East, partly to obtain money for the territory, to the running expenses of which he had contributed out of his own pocket. He resigned his position the following year, and during his absence Gen. Thomas F. Meagher, who was secretary of the territory, served as acting governor. Akron again became his place of residence. He was married at Tallmadge, Ohio, in May, 1849, to Mary, daughter of Alpha and Lucy (Foster) Wright, and had nine children. A son, Col. Wright Prescott Edgerton, was professor of mathematics at West Point. Gov. Edgerton died at Akron, O., July 19, 1900.

SMITH, Green Clay, soldier and second territorial governor of Montana (1866-69), was born at Richmond, Madison co., Ky., July 2, 1832, second son of John Speed and Eliza Lewis (Clay) Smith. His father (b. July 31, 1792; d. June 6, 1854), was a native of Jessamine county, Ky., and a lawyer and planter. He was a skilled Indian fighter; served under Gen. William Henry Harrison in the battle of Tippecanoe, and was his aid-de-camp at the battle of the Thames in 1813. In 1819 he was elected to the legislature of Kentucky; was elected to the national congress as a Democrat in 1821, serving one term, and he was again elected to the state legislature in 1827, becoming speaker of the house. He was appointed by Pres. Jackson U. S. district attorney for Kentucky, and was superintendent of public works for several years. His wife was a daughter of Gen. Green Clay, a distinguished soldier in the war of 1812, after whom the son was named. At the age of fifteen the son went as a volunteer to Mexico in the war of 1846, serving as second lieutenant in company II, 1st Kentucky cavalry volunteers. Returning home he attended Transylvania University, Lexington, Ky., and was graduated there in 1849 and in the law department of the same in 1852. He practiced his profession for a number of years in Covington, Ky., and also served in the Kentucky legislature. In the civil war he was mustered into service April 4, 1862, as colonel of the 4th Ken-

tucky cavalry volunteers, with which he served some time. He was promoted to the rank of brigadier-general, June, 1862, for services rendered. He was in many engagements, wounded at Lebanon, Tenn., May 5, 1862, and publicly complimented in orders from Gen. Rosecrans for his defeat of Gen. Forest at Rutherford creek, Tenn. He resigned his commission in the army to take a seat in congress in December, 1863, to which position he had been elected while in the field. He was elected for a second term, and served almost to its conclusion, but resigned to accept the office of governor of Montana offered him by Pres. Johnson.

Here he remained nearly three years, assisting largely in the organization of the territory and promoting its prosperity. In the spring of 1868 the Indians under Sitting Bull and Crazy Horse were subdued and scattered. He resigned, in 1869, to enter the ministry of the Baptist church in Washington city, D. C., where he remained until his death. He was promoted to brevet major-general for meritorious service, and in 1876 was the candidate of the prohibition party for president of the United States. He was married to Lena, daughter of James K. Duke, of Scott county,

Ky., nephew of Chief-Justice John Marshall. He died in Washington, June 30, 1895.

ASHLEY, James Mitchell, third territorial governor of Montana (1869-70), was born near Pittsburgh, Pa., Nov. 24, 1822, son of John Clinton and Mary Ann (Kirkpatrick) Ashley. His first American ancestor was Capt. John Ashley, of London, England, whose name appears in the Virginia charter of 1707. His grandfather, Benjamin Ashley, and his father (1869-70), were itinerant ministers, and followers of Alexander Campbell. At the age of fourteen James Ashley ran away from home and became cabin boy, and later clerk on an Ohio river steamer.

After wandering in various states he finally settled at Portsmouth, O., there learned the printer's trade and commenced the publication of the "Democrat," but in 1851 removed to Toledo, where he engaged in the wholesale drug business, studied law, and was admitted to the bar. In 1854 he participated in the first Republican convention of Wood county. In 1858 he was elected a representative to congress from the Toledo district, and served until 1868. He soon became a prominent figure in the Republican ranks, acting

with the most radical abolitionists, many of whom he had long known. During the first session of congress, after Mr. Lincoln became president, he introduced a bill for the abolition of slavery in the District of Columbia, which met with no support, and was finally replaced by another bill, the joint work of Mr. Ashley and Hon. Lot M. Morrill, which was finally passed, April 11, 1862. It appropriated \$1,000,000 with which to compensate the owners for their slaves, being supported by Ashley and his friends as the precursor of emancipation. He also introduced a bill for the organization of the terri-

tory of Arizona, and aided in securing laws prohibiting slavery in the territories. On Dec. 18, 1860, he introduced the first proposition to amend the constitution of the United States, abolishing slavery, but on June 15, 1861, this proposition was defeated in the house. On a reconsideration he succeeded in converting twenty-four border state and northern Democrats, and secured the passage of the measure. He began the movement to impeach Pres. Johnson, Jan. 7, 1867, by charging him with "an imputation of power and violation of law, by corruptly using the appointing and the pardoning and the veto power," and on March 7, 1867, he introduced the resolution for the impeachment of Pres. Johnson, and a constitutional amendment proposing the election of president by direct vote of the people, on May 29, 1868. In 1869 he was appointed territorial governor of Montana territory, which, with Arizona and Idaho he had organized and named while chairman of the committee on territories, but he remained only about a year on account of a difference with Pres. Grant. Mr. Ashley had consecrated his life to the cause of a race from whom he could not expect any reward save the gratitude and appreciation which he received. The colored people did everything in their power to honor him while living, and perpetuate his memory when dead, making a souvenir volume of his addresses. He retired from public life in 1870, with depleted finances, but, observing that a rail road extending north from Toledo across the peninsula of Michigan, would furnish an outlet for about 200 miles of country then wholly without such facilities, he purchased valuable tracts at Toledo entirely on credit and proceeded to build the road north to Lake Michigan; there, with his oldest son, J. M. Ashley, Jr., he constructed a fleet of train-carrying ferriboots, operating them to and from Gdolsone, Wis. This made the Toledo, Ann Arbor and North-ern Michigan one of the important lines between the northwest and the Ohio river. Gov. Ashley was married, in 1851, to Emma J. Smith, of Portsmouth, O., and had three sons, James M., Henry W. and Charles S., and one daughter, Mary, wife of Edward Ringold Hewitt, of New York city. He died Sept. 16, 1896.

POTTS, Benjamin F., fourth territorial governor of Montana (1870-83), was born in Carroll county, O., Jan. 29, 1836. He attended the public schools until he was seventeen, was employed as a dry-goods clerk for one year, and studied at Westminster College, Pennsylvania, in 1854-55. Lack of money obliging him to return to Ohio, he taught school, and, though but twenty years of age, took an active part in the stirring political campaign of 1856. In 1857 he entered the law office of Col. E. R. Eckley at Carrolton, O.; was admitted to the bar in 1859, and immediately began to practice his profession. Upon the fall of Fort Sumter he raised a company of volunteers for the 32d Ohio infantry, was made captain and entered active service in West Virginia, being present at the battles of Greenbrier and Cheat mountain. In 1862 his regiment fought under Gen. Milroy at McDowell and Franklin, and under Gen. Fremont at Cross Keys and Port Republic. He was commissioned lieutenant-colonel of the 32d regiment, Dec. 2, 1862, became major, Dec. 25th. He participated in the Virginia campaign, was in Gen. Sherman's Meridian cam-

tion and his march to the sea, fighting at Big Shanty, Kennesaw, Atlanta, Jonesboro and Lovejoy station. Gen. Blair and Smith in their official reports complimented him for his gallantry at Atlanta. During Sherman's march through the Carolinas he took part in the capture of Orangeburg and Columbia, and his brigade was the first to enter Fayetteville. Upon his retirement from service in 1866 he returned to the practice of law in Ohio, and was elected to the Ohio state senate in 1869. In 1870 Gen. Grant appointed him territorial governor of Montana, which office he held for thirteen years. During his incumbency the war with the Sioux Indians occurred, beginning in 1876, when they massacred Gen. Custer and his entire command on the Little Big Horn river (June 25th) and were finally overtaken and defeated by Gen. Miles in January, 1877. At the end of his term as governor he was elected a member of the Montana legislature. He died at his home in Helena, Mont., June 17, 1887.

CROSBY, John Schuyler, soldier, fifth territorial governor of Montana (1882-83), was born in Albany county, N. Y., Sept. 19, 1839, son of Clarkson Floyd and Angelica (Schuyler) Crosby, and grandson of William Bedloe Crosby, a philanthropist and millionaire of New York city, whose wife was Harriett Clarkson. Ebenezer Crosby, his great-grandfather, a native of Braintree, Mass., was surgeon to Washington's guards during the revolution, and an original member of the Society of the Cincinnati. Later he became professor of obstetrics at Columbia College. John Schuyler Crosby is a great-grandson of Col. Stephen J. Schuyler, of the Albany company, 6th regiment, New York militia, and a descendant of Philip Pietersen Schuyler, first mayor of Albany. In addition he is a great-grandson of Dr. Matthias Burnet Miller, surgeon of Col. David Sutherland's regiment, New York state militia, and member of the provincial congress of New York, and great-great-grandson on the paternal side of William Floyd, colonel of the 1st regiment Suffolk county (N. Y.), militia in 1775, and signer of the Declaration of Independence. John Schuyler Crosby was educated at the University of the City of New York, but was not graduated, leaving the institution to begin an extended tour, covering several years, during which he visited South America, China, the East Indies and Pacific islands; subsequently accompanying an exploring party from Santiago, Chili, to Buenos Ayres on the Atlantic coast. Having had some preliminary training with the New York state militia he entered the regular army when the civil war began, commissioned second lieutenant of the 1st artillery. After serving in the army of the Potomac under McClellan, he was in 1862 transferred to the department of the Gulf under Banks, and after the Teche campaign was brevetted captain for gallantry on the field. Later he was assistant adjutant-general on the staff of Banks and Canby, and was Sheridan's personal aid-de-camp for five years. For bravery at Sabine cross-roads and Pleasant hill, he was brevetted major and lieutenant colonel. During the occupation of Mexico by the French, he served under Sheridan on the Rio Grande, and for several years after the war was adjutant-general on Sheridan's staff, and with Custer during the Indian campaigns in 1867-69. He resigned from the army on Jan. 1, 1871. In 1876 he was appointed consul to Florence, Italy, by Pres. Grant, and while in office received a letter of thanks from the king and the decoration of the crown of Italy, for personally securing the arrest of a band of criminals in Tuscany. Pres. Arthur appointed him territorial governor of Montana in 1882, and he was influential in preventing Yellowstone park from passing into the control of a cattle syndicate. He occupied the gubernatorial chair until 1883. In November, 1883, he

became first assistant postmaster-general under Pres. Arthur, and continued in office until March, 1886, when he returned to New York city, where from 1889 to 1891 he served as school commissioner. His travels since that time have been extensive. He is a member of the Grand Army of the Republic, Loyal Legion, Sons of the Revolution, and of various clubs of New York city and Washington. The museum of the Naval Academy at Annapolis contains a number of valuable relics from the cruiser Kearsarge, presented by Col. Crosby. These were obtained while he was on a yachting trip in the West Indies, during which he visited the Caiman islands. They include the bell and the bronze tablet commemorative of the action between the Kearsarge and the Confederate ship Alabama. Col. Crosby was married at the Van Rensselaer Manor House, Albany, N. Y., June 16, 1863, to Harriett, daughter of Gen. Stephen and Harriett (Bayard) Van Rensselaer. They have one son and one daughter.

CARPENTER, Benjamin Platt, sixth territorial governor of Montana (1884-85), was born at Stanford, Dutchess co., N. Y., May 14, 1837, son of Morgan and Maria (Bockée) Carpenter. His mother was a daughter of Jacob Bockée and great-granddaughter of Maj. Epanatus Platt, of Huntington, Long Island. His ancestors on his father's side were natives of Connecticut. He was graduated at Union College, Schenectady, N. Y., in 1857, and having begun the study of law while an under-graduate was admitted to the bar in 1858, in that same year being elected district-attorney of Dutchess county. In 1864 he was appointed by Pres. Lincoln assessor of internal revenue for the 12th district of New York. He was a member of the New York state constitutional convention in 1867-68; was temporary chairman of the Republican state convention in 1872; was elected state senator for the 11th district in 1875; was a delegate to three Republican national conventions: at Chicago in 1868, Philadelphia in 1872, and at Chicago in 1884. From 1876 until 1883 he was judge of Dutchess county. Continuing active in politics, he was chairman of the Republican state committee of New York in 1881, and was nominated for lieutenant-governor in 1882, but was defeated by 195,000 Democratic majority. In December, 1883, he was appointed governor of Montana, and served as such until July 1885. In 1889 he was a member of the constitutional convention of Montana, and also was one of the commissioners to prepare political, civil and penal codes and a code of procedure for the new state. He has been engaged in the practice of law at Helena ever since he left the governor's chair. Ex Gov. Carpenter was married at Poughkeepsie, N. Y., in 1860, to Esther, daughter of Stephen Thorne; they have had two daughters and a son.

HAUSER, Samuel Thomas, seventh territorial governor of Montana (1885-87), was born at Falmouth, Pendleton co., Ky., Oct. 10, 1833, son of Samuel Thomas and Mary Ann (Kernett) Hauser. He was educated at schools in his native state. He removed to Missouri in 1854, and was engaged as a civil engineer on the Missouri Pacific railway and Northern Pacific railway. In 1862 he went up the Missouri river to Fort Benton, and prospected the upper Columbia waters, returning to Bannack mines in the fall. In the following year he explored the Lewis and Clarke route down the Yellowstone. In connection with N. P. Langford, in 1865, Mr. Hauser opened a bank in Virginia City, Mont., and also in that year erected the first furnaces that were operated in the territory. In 1866 he organized the first National Bank of Helena and the St. Louis Mining Co., now known as the Hope Mining Co., at Phil-

lipsburg. He built the first silver mill in Montana, and organized the first national banks of Missoula, Butte and Benton. He constructed the branches of the Northern Pacific in Montana, now known as the Northern Pacific and Montana railroads. He also organized the Helena and Livingston Smelting and Reduction Co., and is its president. He is actively interested in stocks and mining and various other enterprises. His name has been identified with the development of the state during the past twenty five years, and much of its present prosperity is due to Gov. Hauser's energy, push and enterprise. During the pioneer days of Montana he had many thrilling experiences and narrow escapes,

when the outlaw element terrorized the state. This condition of affairs led to the organization of a vigilance committee (1863-64), of which he was a prominent member, and he took an active part in seeing that justice was meted to the outlaws. He was Democrat, and has always been actively interested in politics. In 1885 Pres. Cleveland appointed him governor of Montana, in which capacity he served for two years. Since retiring from office he has devoted himself to the management of his extensive business, spending much

of his time in New York city. He was married, in 1871, to Ellen F., daughter of Dr. Bernard Parrar, of St. Louis, Mo., and has one son.

LESLIE, Preston Hopkins, eighth territorial governor of Montana (1887-89), was born in Wayne (now Clinton) county, Ky., March 2, 1819, second son of Vachel and Sally (Hopkins) Leslie, natives of Kentucky. He traces his lineage back on his father's side to Welsh settlers in North Carolina; on his mother's, to Scotch settlers of Georgia; and among his ancestors are several who fought in the war for independence. Until he was sixteen years of age Preston Hopkins remained at home helping his father in farm work and in driving a stage. Three years more of his life were spent in working for a farmer near Louisville, Ky. In 1838 Mr. Leslie began the study of law in the office of Judge Rice Maxey, and in October, 1840, he was admitted to the bar. He practiced in his native county until the spring of 1841, when he removed to Monroe county, and took at once so active a part in politics that in 1842 he was elected county attorney. After serving for two years he was elected to the legislature; in 1846 was a candidate for the state senate, but was defeated by one vote; in 1850 was again elected to the legislature and in the following year entered the state senate. From 1852 until 1859 Mr. Leslie was engaged in farming and practicing law. He was offered a nomination for congress, also for judge of the supreme court of Kentucky; but declined both positions. He was a Whig until the rise of Know-nothingism, in 1854, and then became a Democrat. In 1859 he removed to Glasgow, Barron co., Ky. Previous to the civil war he was a strong Union man, but when the conflict began, and until it ended, supported the Confederate cause. In 1867 he was again elected to the state senate, and during the second term was elected speaker. A vacancy occurring in the office of lieutenant-governor and governor, he by virtue of office became chief magistrate of the commonwealth, and was inaugurated Feb. 13, 1871. In May he was nominated for governor, and was elected by a majority of over 39,000 votes over four competitors. His chief opponent was Justice John

Vol. XI.—6.

M. Harlan, now associate justice of the supreme court of the United States. He was inaugurated Sept. 5, 1871, and served for four years, his administration being highly successful, though the difficult task of suppressing the Kuklux Klan and other lawless bands fell to him. Returning to Glasgow he practiced until July, 1881, when there occurred a vacancy in the office of circuit judge and he was appointed to fill it. In September of that year he was elected by the people to succeed himself, and in 1886 was a candidate for re-election, but was defeated by four votes. In September, 1886, Pres. Cleveland appointed him governor of Montana, on Feb. 8, 1887, he took the oath of office, and on April 13, 1889, left the executive chair. Having brought his family to Montana, on resigning the governorship he settled at Helena and resumed law practice. In March, 1894, Pres. Cleveland appointed him U. S. district attorney for Montana, and he served for four years, with the ability that had always characterized him as an official. He is still (1901) active in the affairs of life, retaining the full vigor of his physical and intellectual capacities.

Gov. Leslie united with the Baptist church in 1838, has ever been in active connection with it, and frequently has been honored by his brethren with high official positions. He was married, Nov. 31, 1841, to a native of Monroe county, Louisa, daughter of Jeremiah and Martha (Bedford) Black. Her father was a relative of the great jurist, Jeremiah Black, of Pennsylvania; her mother's ancestors were Virginians. They had a family of seven children, all of whom lived to maturity. Mrs. Leslie died Aug. 9, 1858, and on Nov. 17, 1859, he was married to Mrs. Mary Kuykendahl, a native of Boone county, Mo. Three children were the issue of this marriage.

WHITE, Benjamin Franklin, ninth territorial governor of Montana (1889), was born at New Bedford, Mass., Dec. 3, 1828, son of Benjamin and Caroline (Stockbridge) White. His father was a cotton manufacturer, and a descendant of William White, one of the Mayflower pilgrims in 1620. His mother was a member of another old Massachusetts family, founded by John Stockbridge, who, with his wife, Annie, and son, Charles, came from England in 1655, in the ship Blessing. Benjamin F. White attended Pierce Academy, Middleboro, Mass., and when but eighteen years of age went to sea, as most boys of his locality did in those days. He sailed from New York city for China in a merchant ship, and afterwards made the voyage by way of Cape Horn to California. Quitting sea life in 1862, he engaged in business there, but removed in 1866 to Idaho, then a new territory, and was identified with its interests for ten years. He served as clerk of the U. S. district court in 1868-69 and as county recorder of Oneida county for about a year, holding both offices at the same time, and also being vice president of the First National Bank of Caldwell. In 1876 Mr. White removed to Montana, where he at once took a prominent part in public affairs; was twice elected to the territorial legislature, as a member of Dillon for two terms, was appointed governor of Montana by Pres. Harrison in March, 1889, and served as such until the admission of the territory to the Union, Nov. 8, 1889. Since 1886 he has been

dent of the First National Bank of Dillon, one of the strong banking houses of the Northwest, and he is frequently called to serve on local boards. Mr. White was married, in 1880, to Elizabeth, daughter of Emrys Davis.

TOOLE, Joseph Kemp, first and fourth state governor of Montana (1889-93; 1901-), was born at Savannah, Mo., May 12, 1851, son of Edwin and Lucinda S. (Porter) Toole. His maternal grandfather, Benjamin Porter, served in the revolutionary army, and his father was a lawyer and district attorney of Andrew and Buchanan counties, Mo., for twenty-five years. He was educated in the public schools of St. Joseph, Mo., and at the Western Military Institute, New Castle, Ky. (1867-69). Removing to Helena, Mont., he was admitted to the bar in 1870, and practiced his profession for a number of years in partnership with his brother, Warren Toole. In 1878, with his brother and Thomas C. Bach, ex-justice of the supreme court, he formed the firm of Toole, Bach & Toole. His first public office was that of district attorney of Lewis and Clarke county (1872), to which he was re-elected without opposition in 1874. He served in the territorial legislature (1879), of which he was president, and he was a member of the constitutional convention of 1884. He was a delegate from his territory to the 49th and 50th congresses.

He was a strong advocate for the admission of Montana into the Union, and his speech on that subject during the closing hours of congress was of remarkable force and eloquence. He was a delegate to the second constitutional convention (1889), called to formulate and adopt a constitution for the state of Montana, which had been admitted to the Union during his last congressional term, and he took an active part in its deliberations, rendering great assistance by his practical legal knowledge. He was nominated and elected the first state governor as a Democrat; the first state legislature met Nov. 23, 1889. His first term was

one of great political antagonism, due to the veto of corporation measures. In 1900 he was again elected governor of his state, receiving a plurality of votes over both opponents and the highest vote cast for any candidate on the state ticket and was inaugurated on the first Monday of January, 1901. Gov. Toole has served as a member of the board of trustees of the Helena Public Library, president of the state board of arid land grant commissioners of Montana and president of the Children's Home Society. He was married in Washington, D. C., May 6, 1890, to Lilly, daughter of the late Gen. W. S. Rosecrans, and has two sons, Edwin Warren and Joseph Porter Toole. Gov. Toole is a man of the plain people and of kindly and gentle nature.

RICKARDS, John Ezra, second governor of Montana (1893-97), was born at Delaware City, Del., July 23, 1818, son of David Townsend and Mary (Wellington) Rickards, whose ancestors settled in Delaware in early colonial times. His great grandfathers, on both sides of the house, were officers in the revolutionary army. After attending a public school and the academy at Middletown, Del., he engaged in business and in 1870 removed to Colorado. In 1878 he went to San Francisco, Cal., and from there to Butte City, Mont., in 1882. His counsel was sought on public affairs; he was elected alderman of

the city in 1885, and was elected to the territorial legislature in 1887, representing Silver Bow county in the upper house. The constitutional convention of 1889 contained twelve members from Silver Bow county and none was more influential in the proceedings by which the great territory gained admission to the sisterhood of states. By this time Mr. Rickards' name was well known throughout Montana, and it appeared on the first state Republican ticket, the office to which he had been nominated being that of lieutenant-governor. The largest vote ever given to any candidate on the Republican ticket in Montana was cast for him. He had no sooner taken his seat than a dispute over the returns in precinct 34 of Silver Bow county was referred to the legislature for settlement and resulted in a contest, which dismembered that body. But for his firmness, final action in the senate might have been postponed indefinitely. Though violently opposed, he as presiding officer ruled that members present, but not voting, could not be regarded as absentees, and a similar ruling was made by Speaker Reed in congress a few weeks later. His ability as a legislator and his personal popularity made him the Republican candidate for governor in 1892 and he was elected, his plurality being 537. During his term of office the present state code was adopted, and the anti-gambling act was passed. The failure of the legislature to elect a U. S. senator in 1893 threw the responsibility of appointment upon Gov. Rickards, who selected Lee Mantle, and to the great satisfaction of the people. On leaving the chair, he returned to business life, but in 1900 received another public appointment, that of supervisor of the 12th census for Montana. Mr. Rickards was married at Newark, Del., July 5, 1876, to Lizzie M., daughter of Benjamin Wilson, and by her had three sons. Mrs. Rickards died in San Francisco in 1881, and he was married again, June 18, 1883, to Mrs. Eliza A. Boucher, daughter of Thomas B. Ellis, of Pembroke, Ontario.

SMITH, Robert Burns, third governor of Montana (1897-1901), was born in Hickman county, Ky., Dec. 29, 1854, son of DeWitt Clinton and Eliza Booker (Hughes) Smith. His paternal grandfather, Eli Smith, a native of Cutskill, N. Y., removed to Kentucky on attaining his majority, was married to Nancy Gregory, of Jefferson county, and subsequently settled in Graves county. His maternal grandfather, Louis Hughes, was one of the first Americans who joined the French settlers of Gallipolis, O., where he remained but a short time, removing thence to Kentucky. Robert B. Smith, after attending public schools and the academy at Milburne, Ky., taught in his native state for two years, and in Missouri for two years more, being principal of the classical academy during the last year (1876-77), at Charleston. In May, 1877, having already begun the study of law, he entered the office of Col. Edward Crossland, Mayfield, Ky.; in October was admitted to the bar, and during the spring of 1878 removed to Blandville, Ky. There he remained in practice until 1881, when he removed to Charleston, Mo., but a year later settled at Dillon, Mont., which was his place of residence for seven years. Mr. Smith was a delegate to the first constitutional convention of Montana, held in 1884. In October, 1885, he was appointed U. S. attorney for the territory by Pres. Cleveland, and held the office until March 4, 1889, when he resigned and removed to Helena, of which he was city attorney in 1890-91. He was an unsuccessful candidate of the People's party for congress in 1894, but was elected governor of Montana, on the Fusion ticket, in 1896, his majority being 21,685. As an administrator he was both conservative and progressive. He advised against the sale of any portion of the public land grant, but

recommended renting lands to settlers, said rental to be collected annually in lieu of property taxes. Deprecating the prevailing tendency to alter or amend laws, he advised leaving laws in the codes where they were not too conflicting or erroneous. As one step toward retrenchment in public expenses he suggested that the legislature provide for a capitol building to be erected at a cost not to exceed \$300,000, instead of one to cost \$1,000,000, as provided for by the previous legislative assembly. He urged the placing of the control and regulation of railroad traffic and passenger travel in the state in the hands of a commission of three state officials, that a graduated inheritance tax be imposed, and that taxes be imposed upon the gross receipts, less losses by fire or death, of insurance companies doing business in the state. In a message of Feb. 13, 1899, he suggested that in case certain measures recommended by him for the increase of the state's revenue could not be enacted into laws, a law be passed taxing incomes in excess of \$1,000 a certain per cent., say one-half of one per cent. His most important veto was that of house bill No. 132, which attempted to reverse a decision of the supreme court of Montana sustaining certain stockholders in a state corporation who had resisted an attempt to compel them to accept stock in a foreign corporation in lieu of that held by them originally. The bill, in Gov. Smith's opinion, violated the state constitution, which forbids the formation of trusts or pools, and the constitution of the United States, which forbids the taking of private property for public use without just compensation. During his incumbency an arid land commission was organized; the state university buildings (at Missoula) were erected, and the institution was opened; the Agricultural College, the Normal School, and the Deaf and Dumb School were completed and opened, and a new penitentiary (at Deer Lodge) was completed. While he was in the chair the Spanish-American war occurred, and through the efficient management of the adjutant-general Montana was the first state to respond to Pres. McKinley's call for troops, furnishing a regiment of infantry and a squadron of cavalry, 1,396 men in all, instead of 524 as called for by the quota. On the expiration of his term of office he settled at Butte. Mr. Smith has been engaged as an attorney in much prominent litigation, and in December, 1897, appeared before the U. S. supreme court in the important case of Fitzgerald vs. Clark. The first regiment to volunteer for the Spanish-American war was organized and mustered in by him. He was married at Mayfield, Ky., April 9, 1878, to Kate, daughter of Col. Edward Crossland. They have a daughter and a son.

STURGEON, Daniel, senator, was born in Adams county, Pa., Oct. 27, 1789. He attended Jefferson College, studied medicine in Fayette county, and began the practice of that profession in 1813. In 1818 he was elected to the Pennsylvania legislature, where he served three terms; in 1825 he was chosen a member of the state senate, acting as speaker of that body for three years prior to his retirement, and in 1830 was appointed auditor general for Pennsylvania, which office he held for six years. During 1838-39 he served as state treasurer, and by refusing Gov. Ritner's warrant for the payment of troops, put an effective stop to the "buckshot war" then raging. He was elected to the U. S. senate as a Democrat, serving in that body from March 4, 1829, to March 3, 1851. He was termed "the silent senator," having been known to make only one speech, and that merely a reiteration of a remark made in committee: "Any senator who says anything that would tend to the disruption of the Union is a black-hearted villain." Notwithstanding his obscurity in regard to debate, he was recognized as a hard work-

ing member of the senate, and served on a great many important committees. In 1853 he was appointed by Pres. Polk as treasurer of the U. S. mine at Philadelphia, and held this position with honor until 1858. He died at Uniontown, Fayette co., Pa., July 2, 1878.

ELLIS, Thomas Cargill Warner, jurist, was born at Covington, St. Tammany parish, La., Nov. 26, 1836, son of Ezekiel Parke and Tabitha Emily (Warner) Ellis, and brother of Ezekiel John Ellis. He began his education in his native place, and completed his preparation for college at the T. P. Jones Academy at Clinton, La., whither his father had removed in 1845. He was graduated at Centenary College, Louisiana, with class honors in 1853, and after reading law in his father's office and at the law department of the Louisiana University, was admitted to the bar in 1858. He began practice at Amite City, La., where, in November, 1859, he was also elected district attorney, holding the office until after the outbreak of the civil war. During the period of hostilities he served in the Confederate army, having attained the rank of captain at the final surrender. He then returned home to resume his profession, forming later a partnership with his brother, E. John Ellis, and speedily became a leader at the bar. He figured in many notable cases during the next few years. In November, 1865, he was elected to the state senate, and although the youngest member of that body, was appointed on several important committees. The passage of the reconstruction measures in 1867 placed the control of public affairs in the hands of negroes and adventurers, who outnumbered the intelligent voters of the state. In the ten years' struggle against these intolerable conditions, Mr. Ellis took an active part both as a member of important committees and as a writer in the public press. He was the author of a petition to congress and of an appeal to the people of the Union, which was adopted by the Louisiana state convention in 1876. Meantime he was director of the New Orleans "Democrat" and became its associate editor with Col. Robert Tyler. In 1874 he was tendered and declined the Democratic nomination for congress from the 6th district. In 1877 he removed to New Orleans, where he continued in active practice until his appointment to the bench of the civil district court in July, 1888, he is now (1901) serving on his second term in this position. During his first term he was active in the campaign against the Louisiana state lottery, and was a member of the state anti-lottery executive committee. In 1891 he was a member at large of the state constitutional commission. On the death of Prof. Henry E. Miller, Judge Ellis was elected, in March, 1899, to succeed him as professor of constitutional law, admiralty, and of jurisdiction and practice of the U. S. courts in the law department of Tulane University, New Orleans, La. In addition to numerous able articles on public questions, Judge Ellis is preparing a memoir of his brother, L. J. Ellis, to be published with his works and speeches. He was married, Oct. 15, 1857, to Mattie Virginia, daughter of Judge William R. Hooker, of Clarke county, Ala., who died in 1891, leaving three sons and three daughters. His sons were Dr. John H. Ellis, of Kentwood; Dr. T. C. W. Ellis, of Newellton; and R. S. Ellis, attorney of Amite City.

Thomas C. W. Ellis

HEMPHILL, Ashton Erastus, legislator and political leader, was born at Acworth, Sullivan co., N. H., Sept. 17, 1819, son of Freedland and Lydia (McKeen) Hemphill. His ancestors on both sides were Scotch Irish, and his mother's family was concerned in the settling of Londonderry, one of the strongest foundation stones of the commonwealth of New Hampshire. His early life was that of the average farmer's son; hard and healthful work, and attendance at a district school in the winter time, leaving but little time for recreation. Encouraged by his parents in his desire to obtain a thorough education, he attended the high school in Acworth, and later that in Walpole. In April, 1871, he removed to Holyoke, Mass., for the purpose of learning the drug business, and was in the employ of George L. Brown & Co. and Dr. Lyman M. Tuttle until the autumn of 1873, when he went to Boston. For two years he was connected with the drug houses of C. E. Tappan & Co. and F. M. Loring & Co., and during that period became a student in the Massachusetts College of Pharmacy, where he was graduated in 1876. Returning to Holyoke, he was employed in the drug stores of Dr. L. M. Tuttle, Preston & Gridley and E. W. Gridley until 1882, when he changed his occupation for that of the storage warehouse business, and is now owner and manager of a large building devoted to that purpose. He is also a stockholder in several important corporations. Mr. Hemphill was a member of the Massachusetts legislature from Holyoke in 1881, 1885 and 1898, serving the first year as a member of the committee on printing; in 1885 as chairman of that committee, and as a member of the committee on public health, from which came the pharmacy law of 1885, and in 1898 as a member of the committees on mercantile affairs and the liquor law. He was secretary or chairman of the Republican city committee of Holyoke much of the time from 1880 to 1892;

Ashton E. Hemphill.

was secretary of the Harrison and Morton Club in 1888, and a member of the Republican state committee in 1890, 1891 and 1892, serving in the latter year as chairman of the sub-committee on naturalization and as a member of the press committee. He was also chairman of the executive committee of the McKinley and Hobart Club of Holyoke in 1896. Mr. Hemphill was chairman of the board of registrars of voters in 1884-96; has been a member of the local board of civil service examiners since 1889, and its secretary since 1891, and is especially active in Young Men's Christian Association matters, having been chairman of the "star course" committee of the Holyoke Young Men's Christian Association since 1895. He was a charter member of the Republican Club of Massachusetts, and is a member of that body and of the Home Market Club of Boston. He is also a member of the Bay State Club of Holyoke, a social organization, of which he has been president and secretary. He is one of the most popular men in Holyoke.

FARNAM, Henry Walcott, educator, was born in New Haven, Conn., Nov. 6, 1853, youngest son of Henry and Ann Sophia (Whitman) Farnam. He was graduated at Yale in 1874, spent a year in graduate study in New Haven, and three years in German universities, among them Strassburg, where

he received the degree of R. P. D. in 1878. In 1878 he was appointed tutor, in 1880 university professor of political economy, and in 1881 professor of political economy in the Sheffield Scientific School and a member of its governing board, and still fills the chair. In 1892 Prof. Farnam became one of the editors of the "Yale Review" and chairman of its board, the duties of which have occupied some part of his time ever since. The first civil service board in the state of Connecticut was established in New Haven in January, 1898, and he was appointed a member and president of the board. Much of the labor of organizing the work devolved upon him, and in another line additional duties have been performed since 1887 as a member and clerk of the state commission of sculpture. His literary efforts have mainly related to economic subjects, published in various periodicals. Prof. Farnam was married in New Haven, June 26, 1890, to Elizabeth C., daughter of William L. and Louise (Upham) Kingsley, and granddaughter of Prof. James Luce Kingsley, of Yale.

HOFFMAN, (David) Murray, jurist, was born in New York city, Sept. 29, 1791, second son of Martin and Beulah (Murray) Hoffman. The first American ancestor was Herman Hoffman, who was born at Revel, on the gulf of Finland, and the line of descent runs through his son, Martinus; his son, Nicholas; his son, Martinus, and his son, Nicholas, who was the father of Martin Hoffman. His mother was a sister of the grammarian, Lindley Murray. He was named David Murray Hoffman, but dropped the David early in life. He was graduated at Columbia College in 1809; was admitted to the bar; practiced as a lawyer in New York city for some years, and was assistant vice-chancellor in 1829-43. He was also judge of the superior court in New York city, 1853-61, inclusive. He was an active and prominent member of the Episcopal church, and wrote several volumes on its laws and ritual. He published "Office and Duties of Masters in Chancery, N. Y." (1824), which was commended by Chancellor Kent in these terms: "I have looked them [the MSS.] over, and communicated to Mr. B. my high opinion of the accuracy, utility, credit and value of the work"; "Treatise on the Practice of the Court of Chancery" (1840, 3 vols.; 2d ed., 1843); "New York Vice-Chancery Reports, 1839-40" (1841); "Treatise on the Law of the Protestant Episcopal Church" (1850); "A Letter to the Clergy and Laity of the Protestant Episcopal Church of the Diocese of New York. By Pacifcator" (1850); "Provisional Remedies of the [New York] Code of Procedure" (1862); "Treatise Upon the Estate and Rights of the Corporation of the City of New York" (1863; 2 vols.); "Digest of the Statutes and Decisions Relating to the Board of Supervisors of the County of New York" (1866); "Digest of the Charters, Statutes and Ordinances of and Relating to the Corporation of the City of New York" (1866; 2 vols.); "Ecclesiastical Law of the State of New York" (1868); "Ritual Law of the Church: With Its Application to Communion and Baptismal Offices" (1872); "Law and Practice as to References and Powers and Duties of Referees" (1875). He was married to Frances, daughter of Jonathan Burial, cashier of the Bank of America, major in the revolutionary army and member of the Society of the Cincinnati. Mrs. Hoffman died in 1833, and he was then married to Mary Murray Ogden, April 18, 1837. His son, Col. Wickham Hoffman, was U. S. minister to Denmark in 1883-85. Judge Hoffman died at Flushing, Long Island, May 7, 1878.

HOFFMAN, Ogden, lawyer, was born in New York city, May 3, 1793, son of Josiah Ogden and Mary (Colden) Hoffman, cousin of Murray Hoffman, the jurist and legal writer, and a half-brother of Charles

Fenno Hoffman, the founder of the "Knickerbocker Magazine." Being designed for the law, he pursued a classical course at Columbia College, and was graduated in 1812; but he desired to enter the navy, and his father reluctantly gave his consent. On Dec. 31, 1814, he procured the appointment of midshipman, and serving on board the President, under Capt. Decatur, was taken prisoner with him in 1815. After his release he again served under this gallant commander in the war with the Barbary States. He resigned from the navy in 1816, Capt. Decatur commending the courage and presence of mind he had often displayed, but regretting that he should prefer to exchange "an honorable profession for that of a lawyer." He immediately took up the study of law with his father, completing it under a lawyer of Goshen, Orange co., N. Y., whose partner he became upon his admission to the bar of that place. In 1823 he was appointed district attorney of Orange county; was elected as a Democrat to the state assembly in 1825, and in 1826, upon the adjournment of the state legislature, removed to New York city to become the law partner of Hugh Maxwell, then district attorney. Taking exception to the bank measures of Pres. Jackson, Mr. Hoffman joined the Whig party, and in 1828 was the successful candidate of that party for the state legislature, where, as a member of the judiciary committee, he suggested various improvements of practice and procedure. He became the successor of Mr. Maxwell as district attorney in 1829, and held the office with credit for six years. He was elected to congress in 1836, and served through the 25th and 26th congresses on the committee on foreign affairs. In 1841, at the conclusion of his second term, he was appointed by Pres. Harrison U. S. district attorney for New York; served until 1845, when he resigned, and in 1853 was elected attorney-general of the state of New York, serving two years. In the "History of the Bench and Bar of New York" it is said of him: "He has been styled the Erskine of the American bar. He was probably the most consummate criminal lawyer that America has produced. He was polished, suave and courteous, and never resorted to bullying or browbeating witnesses, or to any other professional tricks.

Besides the criminal cases he was engaged in, he also had a large civil practice. He was among the lawyers employed in the Parish will contest, and made his last forensic effort in this suit." One of his sons was the U. S. district judge of California from the time of its admission to the Union until 1891. He died in New York city, May 1, 1856.

SPRINGER, William McKendree, statesman and jurist, was born in Sullivan county, Ind., May 30, 1836, son of Thomas B. and Katherine Springer. His parents removed to Jacksonville, Ill., in 1848, where he attended the district schools, and in 1854 entered Illinois College. While in the junior class the faculty insisted upon his expunging certain parts of his oration for an approaching exhibition, because he sustained the position of Sen. Douglas, in regard to the famous Kansas-Nebraska bill. His name being omitted from the programme, he published an exposé, giving precedents from previous orations, where sentiments on the other side of the question had been warmly encouraged, and circulated this article indiscriminately in the audience, which resulted in his dismissal. Thirty-two years later Illinois College completely vindicated Mr. Springer by conferring upon him the honorary degree of LL.D. He then entered the Indiana State University, Bloomington, Ind., and after his graduation, in 1858, became the publisher of a Democratic newspaper at Lincoln, Ill., during the famous Lincoln-Douglas campaign. He afterwards became associate editor of the "Illinois State Register" at Springfield, and was engaged upon newspaper work

there for five years. In the meantime he studied law, and having been admitted to the bar in 1861 began the practice of his profession in Springfield. In 1868 he went to Europe with his family, and during his two years' absence he devoted special attention to the study of political economy and the practical workings of tariff laws. In 1872 he was elected to the Illinois legislature, and became a member of the judiciary committee, and also took a prominent part in the affairs of the house. In 1871 Mr. Springer was elected to congress, and was re-elected to nine succeeding congresses, serving in all for twenty years. He made the tariff question a paramount issue, especially the tariff upon wool. He frequently occupied the speaker's chair. He was a member of the subcommittee of the committee on foreign affairs that investigated the Emma mine affair, resulting in the recall of Minister Schöneck from England, because his name was used to promote in England a speculative scheme concerning an American mine of that name. He was chairman of the subcommittee to investigate the Venezuelan claims, and his report upon this investigation in 1876 caused the name of Mr. Orth, the Republican candidate for governor of Indiana, to be withdrawn from the ticket. In recognition of Mr. Springer's services in exposing

these claims, the government of Venezuela conferred upon him the decoration of the Order of Liberty, the highest honor which that nation has ever conferred upon a foreigner. When Gen. Grant's friends were urging his re-nomination for a third term Mr. Springer introduced a resolution opposing the election of any person to the presidency for the third time, which was adopted by a vote of 232 to 18. In the 45th congress Mr. Springer was a member of the celebrated Potter committee, which investigated the frauds of the presidential election of 1876, and a member of the subcommittee that visited Florida in June, 1878. He also investigated the consular officers of the United States, and exposed the base practices in appropriating to us that should have been returned to the treasury. He reported articles of impeachment against George F. Seward, late consul general to Shanghai, and then minister plenipotentiary to China. Mr. Springer was chairman of the committee which investigated and exposed the star route frauds, and also the conduct of Republican managers in the Cincinnati election of October, 1880. He was also chairman of the committee on territories, and was the author of the Springer bill organizing the territory of Oklahoma, and creating a judicial system for Indian territory, and admitting Washington, Montana, and North and South Dakota as states into the Union. In the 52d and 53d he was chairman of the ways and means committee, and in the 54th congress, which expired March 1, 1895, Mr. Springer was chairman of the committee on banking and currency. A book containing his tariff speeches was published in 1892, and throughout his congressional life he was a frequent contributor to the leading magazines upon questions pertaining to the tariff. At the close of his illustrious career, in March, 1895, he was appointed justice of the U. S. court for the ninth circuit, covering the territories, and chief justice of the court for the territory. His term of office expired in 1900.

ber, 1899. He now resides in Washington, D. C. He was married, Dec. 15, 1859, to Rebecca, daughter of Calvin W. Ruter, a Methodist clergyman of Indiana. Mrs. Springer was born in Indianapolis, Nov. 8, 1822, and has contributed many verses to magazines and periodicals of the day. She has published four novels, "Beechwood" (1873); "Self" (1881); "Leon" and "Intra Muros" (1899), and a volume of poems, "Songs by the Sea" (1890). She is the mother of one son, Ruter W. Springer, who is a chaplain in the U. S. army, now in the Philippine islands.

WEITZEL, Godfrey, soldier, was born in Cincinnati, O., Nov. 1, 1835, son of Louis and Susan Weitzel, natives of Bavaria. He was graduated at the U. S. Military Academy in 1855, was promoted to the engineer corps, and assisted in the construction and repairs of the fortifications guarding the approaches to New Orleans, La. In 1859 he was assistant professor of engineering at the Military Academy. In the spring of 1861 he was attached to the engineer company then on duty at Washington, which was ordered to Fort Pickens, Fla., barely in time to prevent its seizure by the Confederates. In October, 1861, he became chief engineer on the staff of Brig.-Gen. Mitchell, fortifying Cincinnati, O., and in December he took command of a company of sappers and miners in the defenses of Washington city. He was subsequently appointed chief engineer in Gen. Butler's expedition to New Orleans, and after the cap-

ture of the city he was made its mayor and military commander. He was commissioned brigadier-general U. S. volunteers in August, 1862; commanded the forces in the Lafourche campaign of 1862, and was brevetted major for his gallantry in the battle of Thibodeaux. In command of a division, he was engaged in two assaults on Port Hudson, receiving the brevet of lieutenant-colonel for meritorious service. Joining in the operations before Richmond, he was chief engineer of the army of the James, being engaged at Swift's creek, the actions near Drury's bluff, and in constructing the defenses of Bermuda Hundred, James river and Deep bottom. In August, 1864, he was brevetted major-general U. S. volunteers; commanded the 18th army corps, and was brevetted colonel in the U. S. army for gallantry at Fort Harrison. At the head of the 25th army corps, he was second in command of the first expedition to Fort Fisher, N. C., taking charge upon his return of all the troops north of the Appomattox during the final operations against Richmond, of which city he took possession on April 3, 1865. On the termination of hostilities he was awarded two more brevets, those of brigadier and major-general in the regular army, and placed in command of the Rio Grande district, Texas. Being mustered out of the volunteer service, March 1, 1866, he resumed his proper corps duties, which were varied and important, requiring much engineering skill, particularly the construction of the ship canal around the falls of

the Ohio, and that around the Sault Sainte Marie. He became major of engineers in 1866, and lieutenant-colonel in 1882, being from that date in charge of improvements in and near Philadelphia, also chairman of the commission advisory to the board of harbor commissioners. Gen. Weitzel was married to a daughter of George Bogen, of Cincinnati. He died in Philadelphia, March 19, 1884.

VENABLE, Abraham B., congressman, was born in Prince Edward county, Va., in 1760. He was graduated at Princeton College in 1780; settled as a planter in his native county, and from 1791 to 1799 was a representative in congress from Virginia, and was a U. S. senator from 1803 to 1804. He was a friend of Thomas Jefferson, by whom he was appointed president of the Bank of Virginia. He perished in the conflagration of the theatre at Richmond, Va., Dec. 26, 1811.

VENABLE, Abraham Woodson, congressman, was born in Prince Edward county, Va., Oct. 17, 1799, nephew of Sen. A. B. Venable. His father and six uncles were revolutionary soldiers. He was graduated at Hampden-Sidney College in 1816; entered Princeton College, where he was graduated in 1819, studying medicine in the meantime. Subsequently he studied law and was admitted to the bar of North Carolina in 1821. He was a presidential elector in 1832, 1836 and 1860, and a representative in congress from North Carolina from 1847 to 1853. From 1861 to 1864 he was a member of the Confederate congress. He died at Oxford, N. C., Feb. 24, 1876.

WATMOUGH John Goddard, soldier and congressman, was born in Wilmington, Del., Dec. 6, 1793, son of James H. and Anna (Carmick) Watmough. His earliest American ancestor was Daniel Cox (1702-99). His grandfather, Edmund Watmough, was a captain in the American Rangers during the French wars of 1750 and 1760. John G. Watmough was educated at the University of Pennsylvania and at Princeton College. He enlisted in the army Sept. 22, 1812, as a third lieutenant in the 2d artillery, known as Townsend's; was promoted second lieutenant April 19, 1814; served in the Niagara campaign, and was under Capt. Alexander J. Williams at Fort Erie, where he was brevetted first lieutenant, Aug. 15, 1814, for action which incurred severe wounds. He received in his body three musket-balls, the last of which was not extracted until 1835. He was *ad-de-camp* to Gen. Gaines at New Orleans, and in the Creek nation, in 1814 and 1815, resigning his commission in 1816. He was elected a representative in congress from Pennsylvania in 1831, where he remained four years, during the whole of which period his wounds were open and constantly gave him pain. Retiring from congress, he became high sheriff of Philadelphia city and county in 1835, and held the office until 1838, in 1841 becoming surveyor of that port. He was married to Ellen, daughter of Judge John D. and Mary (Footman) Cox, of Philadelphia, Pa. During the latter part of his life he lived in retirement, and he died in Philadelphia, Nov. 27, 1861.

WATMOUGH, James Horatio, naval officer, was born at Whitemarsh, Montgomery co., Pa., July 30, 1822, son of John Goddard and Ellen (Coxe) Watmough. He entered the navy as acting midshipman, Nov. 24, 1843, and was formally appointed Dec. 12, 1844, and attached to the sloop Portsmouth, of the Pacific squadron, until 1848. He engaged in most of the California operations during the Mexican war, including the bombardment of Guaymas; was on board the brig Perry, cruising along the coast of Africa (1849-51), and the frigate Constitution, on the same duty (1852-55). During 1857-58 he was attached to the steamer Michigan, cruising on the Great lakes, and to the sloop Saratoga, in the Gulf of

Mexico, 1859-60, engaging in the capture of two Spanish steamers. He was stationed at the Philadelphia navy yard, 1861-63, and on board the Niagara, detached for special service, 1863-64. During 1864-65 he was fleet paymaster of the south Atlantic blockading squadron, participating in most of the operations of the fleet; in the seven days' operations on Stone river, and on James' and John's islands, before the evacuation of Charleston, S. C. After the war he served as general inspector, and later as paymaster-general, being honorably retired July 30, 1884. He is a member of the Aztec Club, Order of the Loyal Legion; Society of the War of 1812, and Union Club of New York city. He was married in Montgomery county, Pa., in 1848, to Emmeline, daughter of George Sheaff.

WATMOUGH, Pendleton Gaines, naval officer, was born at Whitmarsh, Pa., May 3, 1828, son of John Goddard and Ellen (Coxe) Watmough. He was educated at the Annapolis Naval Academy, and entered the navy in 1841. He was attached to the Brazil, the Mediterranean, and the Pacific stations, and took part in the occupation of California. Completing his naval course, he was graduated in 1848; later served in the Mediterranean sea, the Pacific ocean, and along the coast of China, receiving the praise of Capt. Andrew Foote, for his gallantry at the capture of the barrier forts near Canton, China, in 1856, and resigned in 1858. Volunteering for the civil war, he was reappointed in 1861; planted a battery at Perryville, Md., covering transportation; took command of a steamer on Chesapeake bay, preventing the cutting off of communications, and, under Adm. Dupont, commanded the Curlew in the capture of Port Royal. In the following year he had charge of the Potomack, participating in the taking of Fernandina and occupation of the Southern inland waters. He was on the Kansas in 1863, participating in both attacks on Fort Fisher, and cooperated on the James river with the movement against Richmond. In July, 1865, he resigned as lieutenant commander, and four years later became collector of customs in Cleveland, O., serving through Pres. Grant's administration, until 1877. In 1878 he was made vice-president and general manager of the Gardner Glue Co., London, England, retaining the connection until 1884, and is now (1901) in the Philadelphia prophylactic office. He was married in Cleveland, O., Sept. 8, 1861, to Minnie M., daughter of George B. Merwin.

GENIN, John Nicholas, merchant, was born in New York city, Oct. 19, 1819, a grandson of John Nicholas Genin, who came from France in 1780 as commissariat clerk under Gen. Rochambeau, and nephew of Thomas Hedges Genin, who early settled in Ohio and wrote the "Napoleon." The subject of this sketch was a hatter in New York city, commencing business there in 1841. His numerous and extravagant eccentricities attracted much attention and provided him with an immense amount of free advertising. At the time of Louis Kossuth's visit to this country Genin utilized some "dead stock" in the shape of felt hats, which he named after the Hungarian patriot and made fashionable. He bought for \$225 the first seat sold for Jemmy Lind's first concert in this country. He was the author of a volume entitled, "History of the Hat from the Earliest Ages to the Present Time" (1847). It contained one thousand drawings of different styles of headgear. He died in New York city, April 30, 1878.

BOYDEN, Seth, inventor, was born at Foxboro, Norfolk co., Mass., Nov. 17, 1788, son of Seth and Susan (Atherton) Boyden. His paternal grandfather, Seth Boyden, a "minute-man" of the revolution, and a captive on the prison ship Jersey, was descended in the fourth generation from Thomas Boyden, an En-

glishman, who emigrated to America in 1634. His grandfather, Uriah Atherton, Jr., made cartridges and ammunition for the Continental army in that part of Stoughton, now Sharon, Mass. The inventor was brought up on a farm, receiving scant education, and learned to trade, although he occasionally worked in an iron foundry. Yet his natural mechanical skill was such that he skillfully repaired watches, which only fifteen years of age. In 1815 he removed to Newark, N. J., and engaged in the manufacture of silver-plated articles for harnesses and carriages. In 1818 a piece of glazed leather was shown him, and he soon discovered an improved process of manufacturing this finish. In the same year, his factory being destroyed by fire, he built a shop for the manufacture of "patent" leather, which was the first in America. He began by drying the varnish in the air; but in 1820 he made an oven for this purpose, large enough to hold sixteen skins, which enabled him to finish about seven a week. At first he sold but little of his product, but in 1822 his sales amounted to \$1,500, and from that year when he enlarged his factory, the sales steadily increased, amounting in 1828 to about \$21,500. In 1831 he sold his entire business to a Brooklyn firm, making no provision to secure to himself the benefit of his discovery; and thirty years afterward, when his genius and generosity were recognized, he replied,

"I introduced patent leather; but it should be remembered that there was nothing generous or liberal in its introduction, as I served myself first, and when its novelty had ceased and I had other objects in view, it was the natural course to leave it." On July 4, 1826, he discovered a process for making malleable castings, which he patented March 9, 1831, and from 1831 to 1838 he was engaged in their manufacture, selling the business in the latter year to a large Boston corporation for \$25,000. Oct. 31, 1832, a patent was granted to him for "applying the power of steam to machinery," and in 1837 he built two locomotives called the "Orange" and the "Essex" for the Morris and Essex railroad, which were the first built in the state of New Jersey. He also built an engine called the "Cometa" for the Cadenas railroad in Cuba, where he went with it in 1841. His most important improvement in this line was the attachment of the driving rod directly to the wheel. He also invented the "link motion," which enables the engineer to reverse with greater facility, the "cut-off," regulating the amount of steam injected into the cylinder at full pressure, and the duplex valve gear. He continued to manufacture locomotives until 1848. He discovered a process of separating zinc from its ores in that year, and obtained a patent March 13, 1849, which subsequently was sold to a syndicate. Among his other inventions are a machine for making wrought iron nails (patent dated Dec. 28, 1810); machine for making brads and files and for cutting and heading tacks (1813); a machine for splitting leather (prior to 1815); peepers, rods and harness fittings (patent dated April 19, 1821); improvement in fuel for manufacturing cast iron (patent dated April 6, 1831); and an improvement in machinery for forming hat bodies in shoe Jersey.

was contested, but the validity of his patent was fully established by the courts. When he was incorporated him for the activities of the inventor, he turned his attention to the manufacture of machinery, the table a variety of steam engines, and

Seth Boyden

size and flavor, still bears his name. Though his bodily powers failed his mind never grew old, and he still carried on his experiments in an old forge near his house. Just before he died he remarked that he had enough undeveloped ideas under consideration to occupy two lifetimes. His natural skill was remarkable. He made with his own hands a telescope and microscope of great power, a rifle with a peculiar and ingenious lock, an air-gun, a watch case, several engravings on steel, and various electrical apparatus. Never seeking pecuniary aid, he was an exceptional example of sturdy, independent effort. He acquired a knowledge of optics, chemistry, metallurgy, astronomy, electricity, geology, botany, natural philosophy, and published discourses on electricity and the internal heat of the earth. He was married at Foxboro, Mass., Nov. 28, 1814, to Abigail, daughter of Obadiah and Matilda (Wetherell) Sherman. They had five children: Susan, Obadiah,

Matilda, George and Seth. He died near Newark, N. J., March 31, 1870, and on May 13, 1890, a bronze statue was erected to his memory in a public park of that city.

BOYDEN, Uriah Atherton, engineer and inventor, was born at Foxboro, Norfolk co., Mass., Feb. 17, 1804, son of Seth and Susan (Atherton) Boyden. After receiving his early education in the country schools, he assisted his father in farming and blacksmithing, until he joined his eldest brother, Seth, at Newark, N. J., in 1825. Returning to Massachusetts, he was engaged under James Hayward on the first survey for the Boston and Providence railroad, which was his first work in an engineering capacity. He was employed at the dry dock in the Charlestown navy yard, under Col. L. Baldwin, and subsequently at Lowell, in the construction of the Suffolk, Tremont and Lawrence mills, and the Boston and Lowell railroad. In 1833 he opened an office in Boston, where he continued in the engineering profession and in scientific investigations until his death. During 1836-38 the Nashua and Lowell railroad was built under his direction. His attention was directed toward the study of hydraulics, which he thoroughly mastered, and as the engineer of the Amoskeag Co. he established extensive hydraulic works at Manchester, N. H., an undertaking which occupied several years. In 1844 he designed an improved Fourneyron turbine water wheel for the mills of the Appleton Co. at Lowell, Mass., which utilized 95 per cent. of the power expended, and gained fully 20 per cent. over the style then existing. The original turbine was invented by Fourneyron, of France, in 1833; but the improved form, known as the Boyden turbine, is much used in the United States. Many years previous to his death Mr. Boyden had retired from the active practice of his profession, and devoted himself entirely to scientific investigations and experiments in light, electricity, magnetism, meteorology, chemistry and metallurgy. With apparatus of his own design, giving very exact results, he made an elaborate series of tests to determine the velocity of sounds traveling through the conduit pipes of the Charlestown and Chelsea water-works. He was a man of hard, common sense, discriminating judgment, sagacity and foresight, possessing the peculiar practical wisdom that molds the means

into results. Mr. Boyden gave considerable sums of money for the encouragement of study in the direction of mathematics and physics. In 1874 he deposited \$1,000 with the Franklin Institute, to be awarded to any resident of North America who should determine by experiment whether light and other physical rays are transmitted with the same velocity. He established the Soldiers' Memorial Building at Foxboro, and to the Boyden Library of that town (which was so named in his honor) he donated \$1,000 as a productive fund for the annual purchase of books. He died in Boston, Mass., Oct. 16, 1879.

McCALL, John Augustine, insurance president, was born in Albany, N. Y., March 2, 1849, son of John and Katherine (McCormick) McCall, of Scotch Irish ancestry. He was educated in the public schools of Albany, and later entered the Commercial College, where he was graduated in 1865. He at once took a position as book keeper in the Albany assorting house for state currency. In 1867 he became book-keeper in the Albany agency of the Connecticut Mutual Life Insurance Co., and continued in that capacity for three years, when he was appointed to a clerkship in the actuarial branch in the insurance department of the state, then under the supervision of George W. Miller. Two years later he was placed in charge of the statistical work of the department, and in the following November (1872) he was appointed examiner of companies. In 1876 he was made deputy superintendent, being reappointed in 1877, and again in 1880. During the next two or three years Mr. McCall laid the foundation for his great reputation and future career. He performed extraordinary service in his investigation of certain life and fire companies then doing business, exposing their false returns and dishonest management. As a direct result of his work, eighteen life insurance companies in New York state and fifteen in other states were declared insolvent, and were prohibited from continuing business. In some instances he developed startling frauds, and the officers of the American Popular, Security and Continental Life Insurance companies were indicted and found guilty of perjury. On April 16, 1883, Grover Cleveland, as governor of New York, appointed him superintendent of the insurance department. The appointment was made at the request of prominent business interests of the state, irrespective of party lines and entirely independent of any political influence. The appointment was universally approved, and was unanimously confirmed by the senate without reference to a committee. Mr. McCall continued to be superintendent of the department until Dec. 26, 1885, when he tendered his resignation to Gov. Hill, and immediately accepted the position of comptroller of the Equitable Life Insurance Society of New York City. Here he still further distinguished himself, and when, in February, 1892, Pres. William H. Beers, of the New York Life Insurance Co., resigned, the trustees unanimously elected Mr. McCall to fill his place. This position he still holds. His administration of the affairs of this company has sustained the reputation he gained in his service as clerk, examiner, deputy and superintendent of the insurance department of New York state. The New York Life Insurance Co. was organized in 1845, and after fifty-six years of business, during which it has paid to its members over \$320,000,000, it has assets exceeding \$262,000,000, and the insurance in force amounts to \$1,200,000,000. Besides the handsome white marble edifice for its home offices in New York city, it owns large fire-proof buildings in Paris, France; London, England; Kansas City, Omaha, Minneapolis and St. Paul. Under Mr. McCall's leadership, the company has become distinguished not only as one of the dozen greatest financial cor-

porations in the world, but as a leader in all matters of reform in life insurance, particularly in the simplification and perfection of the life insurance contract. Soon after his election the company issued a policy which contained no restrictions whatever as to occupation, residence, travel, habits of life or manner of death, and under his administration the business has steadily, year after year, exceeded that of any other life insurance company in the world. It can be truly said of Mr. McCall that, first, and last, he has done more than any one man since Eliza Wright to reform the methods and practice of American life insurance. He is, perhaps, to day the most prominent and distinguished figure in the life insurance world, and one of the most prominent figures in the financial world. He was married at Albany, N. Y., July 12, 1870, to Mary Ignatius, daughter of John Horan, of that city. He has seven children, five sons and two daughters, all of whom are living.

HOFFMAN, Michael, congressman, was born at Clifton Park, Saratoga co., N. Y., Oct. 11, 1787. His father was born in Germany; his mother, a native of this country, was of Protestant Irish descent. After receiving a preliminary education, he took up the study of medicine in 1807, and three years later obtained his degree; but in 1811 he decided to adopt the law as his profession, and was admitted to the bar after two years' study. He at once commenced his practice at Herkimer, and soon formed the law partnership of Hackley & Hoffman, achieving a high reputation by his earnest, zealous and confident advocacy of all the cases he conducted. About 1820 he removed to Waterloo, Seneca co., N. Y., where he formed a partnership with a former college mate, a Mr. Barton; but in a short time he returned to his practice at Herkimer, and in 1823 was appointed district attorney. Mr. Hoffman held this office until he took his seat in congress, 1825, and so ably that ten years later he was appointed to the same position. His election to congress was followed by three re-elections, the complete term of his service dating from Dec. 5, 1825, to March, 1833, and part of this time (1830-33) he was also first judge of Herkimer county. He devoted himself assiduously to the work assigned him; he favored the election of Pres. Jackson in 1828, and upheld his administration, even to the approval of the nullification message of 1833. During Mr. Hoffman's last term in congress he was chairman of the committee on naval affairs, and was known among his friends as "Admiral," a title which clung to him through life. Mr. Hoffman's positive utterance of opinions in debate brought upon him a challenge from Sen. Poindexter, of Mississippi; but he sensibly declined to meet it. On retirement from congress he was appointed a canal commissioner for the state of New York; served until 1835, and wrote several able reports. He was appointed by the president, in 1836, register of the land office for Saginaw, Mich., and remained there until 1837, when he returned to Herkimer. He represented this county in the state assembly in 1841, 1842 and 1844. In 1845 Pres. Polk, with whom Mr. Hoffman was personally acquainted, appointed him naval officer of the city of New York, an office he held until his death. In 1846 he served as delegate to the constitutional convention. He was a powerful and effective debater, originating and carrying through important financial reforms, and a man of high and unselfish character. He died in Brooklyn, N. Y., Sept. 27, 1848.

PEARSON, Richmond Mumford, jurist, was born in Rowan county, N. C., June 28, 1805, son of Richmond Pearson, a planter, and grandson of Richmond Pearson. His mother, the daughter of an ex-officer of the British navy, was married twice before she was nineteen, and Col. Pearson was her second

husband. His grandfather, Richmond Pearson, a native of Dinwiddie county, Va., removed in his youth to North Carolina, became a lieutenant in the revolutionary army, and was commander of a company at Cowan's ford when Gen. William Lee Davidson was killed. Richmond Mumford was graduated at the University of North Carolina in 1823 with the highest honors, read law in the office of Joseph Henderson, was admitted to the bar in 1826, and began practice at Salisbury. In 1829-32 he was a representative from Rowan county in the lower house of the assembly; in 1835 was a candidate for congress, but was defeated. In 1836 he was elected a judge of the superior court and in 1848 a judge of the supreme court, William H. Battle being one of his competitors. In 1841 Judge Gaston, of the supreme court, died, and before the vacancy was filled, the two associate judges sent a certificate of opinion to the superior court. Judge Pearson thereupon ruled that no action by the supreme court was judicial or valid unless three judges were on the bench. This action was finally reversed, Chief Justice Ruffin holding that upon the death of one of the judges of the supreme court the two survivors have full power and authority to hold the court and exercise all its functions. In 1858 he was appointed the successor of Chief Justice Nash, deceased. During the civil war many sought to be discharged from alleged illegal detention in the army by habeas corpus, and Judge Pearson held that the writ was not suspended by the emergency of the times. In 1865 he was an unsuccessful candidate for the office of representative to the state constitutional convention, but the same year under the new constitution was re-elected judge of the supreme court, and by his associates Battle and Reide was again appointed chief justice. In 1868 the supreme court was reorganized and he was elected chief justice by the people, both political parties having made him their candidate. In 1870, Gen. Holden having declared martial law in several counties, where the Kuklux

movement was rife, many leading men were imprisoned by military authority—the state militia, under George W. Kirk, Judge Pearson issued a writ of habeas corpus, but the military, supported by Gen. Holden, refused obedience, and after hearing argument *ex parte* Moore, 64 N. C., 802, he decided that he could not enforce the efficacy of the writ against the will of the governor without danger of civil war, and declared the "judiciary exhausted." His course, though approved by his associates on the bench, was generally condemned by the people as partizan and unworthy of one in his position. The feeling was kept down largely by the lawyers who had been his students at his home, Richmond hill, Yadkin co., which became his place of residence in 1847. For nearly forty years he had a law school at that place and about 1,000 young men were trained by him all of whom held him in the highest esteem. In December the legislature impeached Gen. Holden for high crimes and misdemeanors, and Judge Pearson presided at the trial. His opinions were marked by clearness and precision, backed frequently by homely but forcible terms of expression. After Chief Justice Ruffin he was probably the most able jurist who ever sat on the state bench. He was Ruffin's pad at the common law and his superior as an original thinker. He received the degree of LL. D. from the University of North Carolina in 1870. He died in

son was twice married: first, in 1822, to daughter of T. S. Sen. John Williams, of Tennessee, and niece of U. S. Sen. Hugh L. White, Whig candidate for the presidency in 1836. By her he had ten children. Their son, Richmond Pearson (b. Jan. 26, 1852), a graduate of Princeton, was U. S. consul at Verviers and Liege, Belgium (1874-77), and was a member of the 51th congress. He was married second, to Mrs. Mary Bynum, widow of Gen. John Gray Bynum and daughter of Charles McDowell, of Morganton. There was no issue by this marriage. Judge Pearson died at Winston, N. C., Jan. 5, 1878, while on his way to Raleigh to attend the January term of the supreme court.

CHEATHAM, Benjamin Franklin, soldier, was born in Nashville, Tenn., Oct. 20, 1820, eldest son of Leonard Pope and Elizabeth (Robertson) Cheatham. His great-grandfather was Gen. James Robertson, founder of Nashville, and known as the "Father of Tennessee." When the call was issued for volunteers for the Mexican war he raised company E, 1st Tennessee infantry (known as "the bloody 1st"), of which he was captain. He distinguished himself at Molino del Rey, Cerro Gordo, and at the storming of Monterey, where he was the first man over the fortifications. At the end of his twelve months' service he raised the 3d Tennessee infantry, was elected its colonel and served until the

close of the war, being for some time in command of his brigade. In 1849 he went to the gold fields of California, but in 1853 returned to Tennessee, and until the war was engaged in farming. He also served for several years as major-general of the state militia. He was at first bitterly opposed to secession, but followed his state and was among the first to volunteer in its defense. He was appointed brigadier-general of the state troops, May 9, 1861, and of the Confederate States army, July 9, and was promoted major-general March 12, 1862. Being assigned to the army of Tennessee, he took a prominent, often decisive, part in its every battle to the end of the war. He

distinguished himself at the battles of Shiloh, Perryville, Stone river, Chickamauga, Missionary ridge, Kenesaw mountain, Dalton and many others, and throughout the Atlanta campaign, surrendering with Gen. J. E. Johnston at Greenville, N. C. His division was known throughout the South as one that never failed when called upon for duty. It drove the stubborn Thomas at Chickamauga; checked the furious Federal onslaughts at Perryville and Stone river; held Grant's lines in check at Shiloh, and drove him from the field at Belmont. Gen. Cheatham was the idol of his men, who loved him as few commanders have been loved. His success was largely due to the confidence he inspired, and he never commanded a movement he was not willing to lead in person. Yet he brooked no familiarity or disobedience, and ever maintained a perfect discipline. His dash as a commander won him the name of the "Ney of the Confederacy." The war over, he returned to Nashville and did more towards reconciling his people to existing conditions and stopping of sectional feeling than any man in the state. In 1866 he was married to Anna Bell, daughter of A. B. Robertson, a prominent Nashville merchant. Retiring from public life, he removed to a farm fifty miles south of Nashville. In 1885 he was appointed postmaster of Nashville by Pres. Cleveland, and served until his death, Sept. 4, 1886.

B. F. Cheatham

ZANE, Ebenezer, pioneer, was born in Berkeley county, Va., Oct. 7, 1747, of German or Danish descent. He made the first permanent establishment on the Ohio river, in 1769, on the present site of Wheeling, and there he built a block house called Fort Finckle, afterwards Fort Henry, which was the object of many attacks by the British and Indians during the revolutionary war. A story has been told of the heroism displayed by Zane's sister, Elizabeth, during one of these attacks, in 1782, by a band of forty British soldiers and 186 Indians, under a Capt. Pratt. Accounts of the incident in the various histories are at variance, but according to a descendant of the family the facts are as follows: The fort at the time was under the command of Silas Zane, brother of Ebenezer. The latter, whose house had been destroyed at a previous raid, was stationed at the house of his brother, about forty yards distance from the fort, to help defend it. This house had been used for a magazine, and when the ammunition of the fort was nearly exhausted after repeated endeavors of the attacking party to storm it, it was proposed that one of the fleetest men in the fort should endeavor to reach Zane's house to obtain a new supply of powder. Many volunteered to encounter the hazard, but Elizabeth Zane insisted that she should go herself, saying, "You have not one man to spare; a woman will not be missed in the defense of the fort." She rushed out when opportunity afforded, and reached the house, where Col. Ebenezer Zane fastened a table-cloth around her waist, into which he emptied a keg of powder; then, with her precious burden, she succeeded in safely returning to the fort amid a shower of bullets, several of which passed through her clothes. Elizabeth Zane lived for many years near Martinsville, on the Ohio river. She was twice married; first to a Mr. McLaughlin, and secondly to a Mr. Clark. In May, 1796, congress passed a law authorizing Ebenezer Zane to open a road from Wheeling, Va., to Limestone, now Maysville, Ky., and the following year, accompanied by his brother, Jonathan, and his son-in-law, John McIntyre, he proceeded to mark out the new road. This was known as Zane's trace. As a compensation for this work congress granted to Zane the privilege of locating military warrants upon three sections of land, and he accordingly appropriated land where Zanesville, O., is now situated, and the town was laid out in 1799. In 1800 he laid out Lancaster, Fairfield co. He died in Wheeling, Va., in 1811.

SCHWAB, Gustav Henry, importer and steamship agent, was born in New York city, May 30, 1851, son of Gustav and Eliza Catharine (von Post) Schwab. His father, a native of Bremen, Germany, came to America in 1844, and became a member of the firm of Oelrichs & Co., of which his brother-in-law, Hermann C. von Post, was a partner. He was educated in New York, and studied four years (1864-68) in the gymnasium at Stuttgart. He became an apprentice in the office of the North German Lloyd Steamship Co., and five years later, upon his return to the United States, entered the employ of his father's firm. On July 1, 1876, he became a partner, and as such his responsibilities increased until, by the death of his father, in 1888, he obtained entire control of the American office of the North German Lloyd Steamship Co. He also succeeded his father as director of the Merchants' National Bank, of the Produce Exchange Safe Deposit Co., and other responsible corporation connections. In 1878 he became a member of the board of directors of the German Society of the City of New York, an institution founded in 1784, for the relief of destitute German immigrants and their descendants—Mr. Schwab's great-great-grandfather, Rev. John Christopher Kunze, was its chief originator. In 1879 he was chosen treasurer, and since has been president, and

has for several years been a member, is now chairman, of the committee on foreign commerce and revenue laws of the New York chamber of commerce. Politically, Mr. Schwab is an independent, of profound reform views, and has for many years been prominent in endeavors for revision of ballot and election laws and for securing improvement in the government of New York city. He was an active factor in organizing the People's Municipal League, in 1890, which, although defeated in that year by the all-engrossing tariff agitation, was successfully reorganized in 1894, and elected the entire city ticket. Mr. Schwab is a member of the Century Association, and the City, Reform, Metropolitan and German clubs. He was married, Oct. 25, 1876, to Caroline, daughter of Nelson Knox Wheeler, of New York. They have a son, Gustav, and daughter, Emily Elizabeth.

DICKINSON, Charles Monroe, author and journalist, was born near Lowville, Lewis co., N. Y., Nov. 15, 1842, son of Richard Dickinson, a native of Connecticut, who was descended from Capt. Richard Dickinson of the American revolution. He received an academic education at Fairfield Seminary and Lowville Academy, and engaged in teaching until 1864, when he went to Binghamton, N. Y., and studied law with Hon. Daniel S. Dickinson. While a law student he paid his expenses by doing literary work at night. He was admitted to the bar in 1865, and practiced law in Binghamton and New York city until 1878, when he became editor and manager of the Binghamton "Republican." In 1880 he became sole proprietor, and the paper, under his management, made rapid growth in value and influence, being regarded as one of the ablest and most prosperous newspapers in the state. At the age of nineteen, while teaching school at Haverstraw-on-the-Hudson, he wrote his famous poem, "The Children," which has since found its way into many school books and nearly every collection of verse. In 1889 he published a volume of poems entitled "The Children and Other Verses." In 1897 he was appointed U. S. consul-general to Turkey. In 1867 he was married to Bessie Virginia, only daughter of Hon. Giles W. Hotchkiss, of Binghamton. They have two sons, Charles H. and Giles H., and an adopted daughter, Mary A. Mason, who is a frequent contributor to leading newspapers and magazines, and whose volume of verse, "With the Seasons," has won flattering comments from literary critics.

ADAMS, John Coleman, clergyman, was born at Malden, Mass., Oct. 25, 1849, son of John G. and Mary Hall (Barrett) Adams. His father was a Universalist clergyman, who had charge of churches at Malden, Providence, Lowell and Cincinnati. He was educated in the public schools of New England and at Tufts College, Massachusetts, where he was graduated in the class of 1870. He took a post-graduate course of theology for two years, after which he was called to a pastorate at Newtonville, near Boston, where he remained for eight years. His next field of labor was the church at Lynn, Mass., the largest Universalist church in the country, and four years later he was called to St. Paul's Church, Chicago, where he achieved a wide reputation as one of the leading clergymen in the denomination. In 1888 he received the degree of D. D. from Tufts College. In Chicago he was the successor of the Rev. Dr. Henry Ryder, who bequeathed to the church over \$200,000. In 1890 Dr. Adams was called to Brooklyn and began a pastorate at All Souls' Church. Besides his pastoral duties Dr. Adams is a frequent and valuable contributor to leading magazines and religious reviews. He is very fond of the study of history and biography

and among his specialties are the archeology and topography of London. He is a trustee of Tufts College and of the Universalist annual convention. He is the author of "The Faithfulness of God" (1888); "Christian Type of Heroism" (1890); "The Leisure of God, and Other Studies in the Spiritual Evolution" (1895); and "Nature Studies in Berkshire" (1899). He has been an associate editor of the "Christian Leader" since 1891, and he is a member of the Authors' Club of New York. Dr. Adams has endeared himself to his congregation in the brief time that he has been there, and fully sustained his reputation as a man of wide experience, deep learning and courteous manners. In 1883 he was married to Miss Hovey, daughter of Charles H. Hovey, the founder of the great dry-goods house of Boston. They have had three children.

WYNKOOP, Henry, jurist, was born in Northampton county, Pa., March 2, 1737, son of Henry Wynkoop, a member of the assembly (1760-61), and a justice of the peace. His great-grandfather emigrated from Utrecht early in the seventeenth century and settled at Albany, N. Y., whence his son, Gerardus, removed to Moreland township, Philadelphia co., Pa., about 1717. After receiving a classical education, Henry Wynkoop became active in the politics of his region, was a member of the committee of observation of Bucks county in 1774, and in the following year served on the county committee of correspondence. He was a member of the provincial conference held July 15, 1774, and of that held at Carpenter's Hall, Philadelphia, on June 18th of the year following. Although he was appointed a major of one of the associated battalions about this time, he seems to have preferred to serve his country in a different field. On Dec. 4, 1778, he was chosen a member of the commission selected by the assembly to settle the accounts of the county lieutenants. He sat in the Continental congress from 1779 to 1783, and in the first U. S. congress (1789-91), being one of those who voted to locate the national capital on the Potomac. He became a judge of the high court of appeals for the state of Pennsylvania, served as a judge of the court of common pleas and of the orphans' court, in Bucks county, was a justice of the peace for that county, and was advanced to the office of president judge of the court of quarter sessions. Judge Wynkoop was a man of imposing personal appearance, standing six feet and four inches, and possessed a character which aided in giving him prominence in state and national affairs. He died in Bucks county, Oct. 24, 1812, while actively engaged in the discharge of his judicial duties.

KIMBALL, James Putnam, geologist and mining engineer, was born at Salem, Mass., April 26, 1836. He received his primary education in the schools of his native town. He next entered the Lawrence Scientific School of Harvard. In the year 1855, he matriculated at the University of Berlin. He afterwards was graduated at the University of Göttingen with the degrees of A. M. and Ph. D., and still later attended the Freiberg Mining Academy, also following at the latter place a practical course in engineering, mining and metallurgy. Returning to the United States, he became connected with the state geological surveys of Wisconsin and Illinois. Prior to the outbreak of the civil war he held the position of

chemistry and economic geology at the New York State Agricultural College, Ovid, which he resigned to become assistant adjutant-general of volunteers, with the rank of captain. Throughout his term of service he was chief of Gen. Marsena R. Patrick's staff, which was incorporated later on with the staffs of Gens. McClellan, Burnside, Hooker and Meade, successively, thus taking an active part in campaigns of the armies of the Potomac and of the Rappahannock. He resigned from the army in December, 1863, and resumed the practice of his profession in New York city. From 1874 to 1885 he resided in Bethlehem, Pa., having received the honorary appointment of professor of geology at Lehigh University. In June, 1885, he became director of the U. S. mint, at the head of the bureau in Washington, D. C., and having control of all the mint and assay offices in the United States. A member of many scientific societies, Dr. Kinball was in 1881-82, vice-president of the American Institute of Mining Engineers. He has published a number of memoirs upon geological and technical subjects, which have appeared in American and foreign journals.

MARTIN, John Mason, congressman, was born at Athens, Pa., Jan. 20, 1837, son of Joshua L. and Mary G. (Mason) Martin. His father was the tenth governor of Alabama; his mother was a sister

of Hon. William J. Martin, of Limestone, and a cousin of John Y. Mason, of Virginia. He was graduated at Centre College, Danville, Ky., in 1856, and later at the University of Alabama. He then studied law under Chief-Justice E. W. Peck; was admitted to the bar in 1853, and practiced his profession in Tuscaloosa until the breaking out of the civil war, when he enlisted in the Confederate army and served as a commissioned officer throughout the struggle. Returning to his home, he resumed practice. In 1871 he was elected to the general

J. M. Martin.

assembly, to fill a vacancy, and was re-elected in 1872, serving as president *pro tem* of the senate from 1873 to 1876. In 1875 he was elected to the chair of equity-jurisprudence in the University of Alabama, which he filled with ability for eleven years. A teacher by nature, he won the affection of his pupils by his enthusiasm and the thoroughness of his instruction. In 1884 he was elected to the 49th congress. His views and vote on the tariff prevented his obtaining a renomination, and he returned to professional life in Birmingham, Ala. Mr. Martin contributed much toward building up the system of public instruction in the state. Honorary degrees were conferred upon him by Centre College, of Kentucky; the University of Alabama; the Agricultural and Mechanical College, at Auburn, Ala.; Central University, of Kentucky, and Georgetown University, District of Columbia. He was married to a daughter of Chief-Justice Peck. He died in Tuscaloosa, Ala., in 1898.

TABOR, Horace Austin Warner, senator, was born at Holland, Orleans co., Vt., Nov. 30, 1830, son of Cornelius D. and Sarah (Terrin) Tabor. He came of a family of soldiers and school teachers. By trade he was a stonecutter. In 1855 Mr. Tabor removed to Kansas, where he became an active member of the Free-soil party and in 1856 was a member of the legislature for one term. Removing to

Colorado in 1859 with considerable wealth, acquired by land sales in Kansas, he settled in California gulch. In 1865, on being appointed postmaster, he opened a general store. In May, 1878, his partners, August Riche and George F. Hook, discovered a rich deposit of silver in what was afterward known as the "Little Pittsburg" mine. In September, 1879, Mr. Tabor sold his interest for \$1,000,000, which he invested in mines, banking stock and other remunerative property. In 1878-79 he was Leadville's first mayor, and he became the first lieutenant-governor of Colorado, in 1879, holding this office until 1883, when he was elected senator, to fill the unexpired term of Henry M. Teller, who had been appointed secretary of the interior. He served from Feb. 1 to March 3. At this time his fortune was estimated at \$9,000,000. He erected a fine opera house at Leadville and built the Tabor block and the Tabor Opera House in Denver, Col., the latter costing nearly \$1,000,000. Among other investments he owned 175,000 acres of mining land in Texas, and 4,600,000 acres of grazing land in southern Colorado. He also obtained a grant from Honduras of every alternate section of land for 400 miles on the Patook river, on which tracts were extensive groves of mahogany, ebony and other valuable woods, and plantations of tropical fruits, together with deposits of gold, silver and coal, besides owning 150 square miles of mineral lands in the interior of Honduras. At the height of his wealth he was one of the largest land owners in the world; but bad investments and the panic of 1893 swept away his fortune. At the time of his death he was on the point of regaining his fortune. In 1898 he was appointed postmaster of Denver. He died in Denver, April 10, 1899, survived by his wife and two sons.

CHALKLEY, Thomas, preacher, was born in London, England, March 3, 1675. His parents belonged to the Society of Friends, and he was brought up in that faith. He was apprenticed to his father, but became a trader, and after seven years an itinerant preacher. As master of a merchant vessel, he visited the West Indies, omitting no opportunity to labor for the highest interests of his fellow men. He went to America in 1698, and deciding to make that his home, he returned from England in 1701, settling in Philadelphia. His home, "Chalkley Hall," near Frankford, Pa., is the subject of a poem by John G. Whittier. He helped to found the Friends' Library in Philadelphia. He traveled throughout Maryland, North Carolina and Rhode Island, preaching the Gospel. Chalkley kept an interesting journal of his life and travels, which was first published in Philadelphia in 1749. An incident narrated in it is alluded to in Whittier's "Snow-Bound":

"When the dreary calms prevailed,
And water-but and bread-cask failed,
And cruel, hungry eyes pursued
His portly presence, mad for food."

To quiet the sailors, who, fearful of starvation, were murmuring of drawing lots to see who should die first, Chalkley told them that they need not draw lots, as he would freely offer up his life to do them good; but at that moment he saw a large dolphin alongside his vessel, and putting a hook in the water, the fish was caught. "This plainly showed us," he said in his journal, "that we ought not to distrust the providence of the Almighty. The people were quiet by this act of Providence, and murmured no more. We caught enough to eat plentifully of till we got into the capes of Delaware." While revisiting the West Indies, in 1741, he contracted a fever, and died on the island of Tortolo, on Sept. 4th.

SUTHERLAND, Jabez G., jurist, was born at Van Buren, Onondaga co., N. Y., Oct. 6, 1825. He attended schools at Detroit and Birmingham, Mich. In 1844 Mr. Sutherland entered the law office of Col. William M. Feuton, at Fentonville, Mich., to whose

business he succeeded, having been admitted to the bar in 1848. In 1849 he was made prosecuting attorney for Saginaw county, and went to Saginaw to reside; in 1850 was a member of the constitutional convention, and in 1853 was elected to the state legislature. In 1863 he was elected judge of the 10th circuit for six years, and was re-elected at the expiration of the term, without opposition. In 1867 he was a member of the constitutional convention whose work was rejected by the people, and in 1870 was elected to the 42d congress, serving on the committee on naval affairs. In 1873, having visited Utah to recover failing health, he entered into law partnership with Hon. George C. Bates, also of Michigan. One of his most celebrated cases was the defense of the notorious John D. Lea, leader of the Mountain Meadows massacre, in which he secured a disagreement of the jury, in the face of overwhelming evidence, by a powerful effort of oratory. In 1882 he published a treatise on the law of damages, in three volumes. In 1881, on the formation of the Salt Lake Bar Association, he was chosen its first president, and in 1889 was selected to deliver a series of law lectures at Deseret University. In 1847 he was married to Sarah D. Thurber, a native of New Hampshire, though a resident of Michigan.

HALL, Louisa Jane (Park), poet, was born at Newburyport, Mass., Feb. 7, 1802, daughter of Dr. John Park, a native of Windham, Conn. He was surgeon of the U. S. ship Warren (1797-1801). In 1803 he established the "New England Repository," a semi-weekly journal devoted to the interests of the Federal party, which he removed from Newburyport to Boston in 1804, continuing its publication until 1811, when he established a school for the higher education of young ladies. In this school his daughter, Louisa, was educated. Her first writings were published anonymously in the "Literary Gazette" and other periodicals in 1823, and by them she attained considerable reputation. In 1831 she accompanied her father to Worcester, Mass. During the first four years there she was threatened with total blindness, and her father read to her and assisted her in the preparation of her writings. Her published works are: "Miriam" (1830); "Joanna of Naples"; "Life of Elizabeth Carter" (1838), and a "Dramatic Fragment," illustrative of a scene in the sad life of the "Pale Rose of England," Lady Catherine, the wife of Perkin Warbeck. In 1840 Miss Park was married to Rev. Edward B. Hall, a Unitarian clergyman, of Providence, R. I. Domestic affairs and the duties of a clergyman's wife closed Mrs. Hall's promising literary career. Her son, Edward H. Hall, became the pastor of the Unitarian church at Cambridge, Mass., in which city she died, Sept. 8, 1892.

JESUP, Morris Ketchum, banker and philanthropist, was born at Westport, Conn., June 21, 1830, son of Charles and Abigail (Sherwood) Jesup. He is descended in the seventh generation from Edward Jessup, an Englishman, who settled in Fairfield, Conn., prior to 1649, and from there removed to Stamford, Conn., and afterwards to Middleborough, now called Newtown, Long Island. His father was a merchant of Westport, who afterwards removed to New York city, where he died at the age of forty-two. His mother was a daughter of Samuel Burr Sherwood, a native of Connecticut, and a graduate of Yale in 1786, who became an eminent lawyer and was a member of congress, 1817-19, he died in 1833. In 1843 the son obtained employment in the mercantile house of Rogers, Ketchum and Grosvenor, manufacturers of engines and machinery at Paterson, N. J., which afterwards became the Rogers Locomotive Works. He was advanced until he had entire charge of the New York office, and remained with the firm until 1852, when he started in

business on his own account, under the firm name of Clark & Jesup. Four years later the firm of M. K. Jesup & Co. was organized, which later became Jesup, Paton & Co. He also established the firm of Jesup, Kennedy & Co., dealers in railway supplies, in Chicago, Ill., which was known later as Cregar, Adams & Co. Mr. Jesup retired from active business in 1881, the firm name being changed to John Paton & Co., but continued to be a special partner in the firm. He thenceforth devoted more of his time and attention to the many charitable and philanthropic enterprises in which he had always taken an interest. He was one of the organizers of the U. S. Christian commission during the civil war. He was one of the original founders of the Young Men's Christian Association, of which he was elected president in 1872, and he was one of the prominent contributors to the fund for the building of the handsome quarters on East Twenty-third street, in 1872. Since 1860 he has been president of the Five Points House of Industry, and since 1881 has been president of the New York City Mission Society, for which he built the De Witt Memorial Church in honor of his father in law. He has been vice president of the Evangelical Alliance, the Society for the Prevention of Cruelty to Animals, the Society for the Suppression of Vice, and the Institute for the Instruction of the Deaf and Dumb, and he is also prominently identified

with the Half Orphan Asylum, the Hospital Saturday and Sunday Association, the Society for the Prevention of Cruelty to Children, and the Metropolitan Museum of Art. He has been president of the American Museum of Natural History in Central park, New York, since 1881, and he was instrumental in accomplishing a plan for the enlargement of its building, among the attractive features of which is a large hall, where lectures on popular and scientific subjects are delivered to teachers and pupils of the city public schools. He donated to the museum what is now known as the Jesup collection of woods of the United States, containing over 400 species of native trees, representing the forest wealth of the entire country, and valued at \$100,000. He is a trustee of the Union Theological Seminary, of New York city, to which he donated a building known as Jesup Hall. He is also a member of the Century Association, the City and Metropolitan clubs, the Rittenhouse Club, of Philadelphia, the Metropolitan Club, of Washington, and the Sons of the American Revolution. In 1854 he was married to Maria Van Antwerp, daughter of Rev. Thomas De Witt, of New York city. Mrs. Jesup is president of the woman's branch of the New York City Mission Society, and is an active cooperator in her husband's many beneficent activities.

TALBOT, Isham, lawyer and congressman, was born in Bedford county, Va., in 1773. He removed to Harrodsburg, Ky., where he received a good education, studied law with George Nicholas, and practiced with success at Versailles, Woodford co., later removing to Frankfort, where he received the first rank of his profession. He was a member of the Kentucky senate from 1812 to 1815, and from 1815 to 1819 was a member of the United States senate, being elected to a second term and re-elected from 1820 to 1825. He died near Frankfort, Ky., Sept. 27, 1837.

RICKLY, Samuel Strasser, banker and philanthropist, was born in Binzberg, canton Berne, Switzerland, Jan. 2, 1819, son of John and Anna (Strasser) Rickly. He came to America with his parents in 1834, settling in Fairfield county, O. His parents dying soon after, he was indentured to learn the carpenter's trade, and in 1838 was employed as clerk in a dry-goods store. He was graduated at Marshall College, Mercersburg, Pa., in 1843, after which he studied theology for a short time and taught in private families in Maryland and Virginia. In 1847 he began teaching in Columbus, O., and one year later became principal of the high school in that city. In 1849 he established an academy at Turlington, O., which the synod of the Reformed church adopted as a church institution in 1850, named Heidelberg College, and soon after removed to Tiffin, O. Mr. Rickly was elected its first president, and his successor was Rev. E. V. Gerhart, who held office until 1855. In 1851 Mr. Rickly became superintendent of the Tiffin schools, and professor of the theory and practice of teaching in the college, to which he afterwards contributed liberally in money. He also furnished and decorated Rickly Chapel. In 1853 he returned to Columbus; became secretary of the Ohio Manufacturing Co., and in 1857 with his brother, John Jacob, he began the banking business. He purchased his brother's interest in 1870, and continued the business until the panic of 1873, when he made an assignment; but later paid his creditors in full. In 1875 he organized the Capital City Bank, of which he was president. The bank was robbed of \$20,000 in 1879, and in 1880 he was shot through the eyes and blinded by a man who had demanded money. Mr. Rickly has taken an active part in the Columbus board of trade, of which he was president; was a member of the board of education and the city board of equalization; trustee of the city library; served as delegate to six national commercial conventions; was a stockholder in the first street railway built in Columbus; a member of the

syndicate which laid out the East Park place addition to the city, and was largely interested in several turpentine corporations. He was married, Sept. 16, 1845, to Maria M., daughter of Henry Reamer, of Chambersburg, Pa., and has one son, Ralph Reamer Rickly.

WILLIARD, George Washington, clergyman and educator, was born in Frederick county, Md., June 10, 1818, son of John and Marie (Shaffer) Williard, of Huguenot descent. He was graduated at Marshall College in 1838; studied theology at Mercersburg and was licensed to preach in 1840 and ordained shortly after. He held pastorates in Virginia, at Huntington, Pa. (where he also taught school), and at Winchester, Va., where he remained three years, when he became pastor of the Reformed Church in Columbus, O. This charge he resigned in 1855 to accept a call to the First Reformed Church of Dayton, O., where he remained until 1866, when he succeeded Rev. Geo. W. Aughtinbaugh, D.D., as president of Heidelberg College, Tiffin, O. The previous presidents were: S. S. Rickly (1850); E. V. Gerhart, D.D. (1850-55); Moses Kieffer, D.D. (1855-63), and George W. Aughtinbaugh, D.D. (1863-64). Dr. Williard found the college in a very discouraging condition, with a small teaching force and with scarcely any endowment. Gradually, however, he succeeded

in placing it on a solid financial basis and raising the educational standard to an equality with that of the other colleges of the land. During his presidency, which continued for twenty four years, there were erected on the campus a president's house, a boarding hall for young ladies, and a commodious college building at a total cost of \$72,000. A library fund of about \$6,000 was secured, as well as a beneficiary fund in aid of indigent young men. There were 346 students enrolled in 1890, the year he left. His successor was J. A. Peters, D.D., who became president in March, 1891, and still holds the office. In that year Dr. Williard accepted the chair of ethics and apologetics in Ursinus College and Theological Seminary, Collegeville, Pa., which he held for nearly three years. After a short residence in Lancaster, Pa., in 1895 he organized the Memorial Reformed Church in Dayton, O., in whose pastorate he continued until his death. In 1851 Dr. Williard published a translation of Dr. Ursinus' commentary on the Heidelberg Catechism; in 1871 he assisted in the preparation of the western liturgy of the Reformed Church of the United States, and he wrote a "History of Heidelberg College" (1879); "A Treasury of Family Reading" (1883); "Life, Work and Character of Henry Leonard" (1890), who for thirty years was the successful financial agent of Heidelberg College; and "The Comparative Study of the Dominant Religions of the World." He was also a frequent contributor to the different periodicals of his church. He received the degree of D.D. from Franklin and Marshall College in 1866, and that of LL.D. from Monmouth College, Illinois, in 1888. Dr. Williard was thrice married: first, April 21, 1841, to Louisa C., daughter of Dr. P. W. Little, of Mercersburg, Pa.; second, Jan. 3, 1866, to Emily J., daughter of Col. J. Hivling, of Xenia, O., and third, Oct. 27, 1892, to Mary, daughter of Joseph Gornly, of Lancaster, Pa. He died in Dayton, O., Sept. 18, 1900.

JOHNSON, Daniel Harris, jurist, was born at Kingston, Ontario, Canada, July 27, 1825, son of John and Mary (Crippen) Johnson. His father came to America as sergeant in a British company during the war of 1812, and at the close of the conflict settled near Prescott, removing thence to the vicinity of Kingston. The son's early years were spent with his uncle, Daniel Harris, near Kempsville. Removing to Illinois in 1844, he attended the Rock River Seminary at Mt. Morris. The summer of 1845 found him at Galena, Ill., a worker in a lead mine; he was next a school teacher at Prairie du Chien, Wis., where he settled in 1848, at the same time beginning the study of law. He was admitted to the bar in 1849, and practiced until 1854, when he bought the Prairie du Chien "Courier." Later he became its editor, and met with success; but in 1856 sold out, and formed a law partnership with Waller R. Bullock, a nephew of Vice-Pres Breckinridge. On the breaking out of the civil war the partnership was dissolved. Mr. Bullock having decided to enter the Confederate army. Meanwhile (1860), the senior member had been elected to the legislature on the Republican ticket, and, though without experience, had been placed on the committee of ways and means as chairman, and on the committee on education. In the autumn of 1861 he was appointed assistant to Atty.-Gen. Howe, and he held that position until May, 1862, when he

removed to St. Louis, to serve as clerk in the paymaster's department. In November, 1862, he returned to Wisconsin, making his home in Milwaukee. Subsequently he was a member of the following law firms: Wyman & Johnson; Austin, Peredes & Johnson; Rogers & Johnson; Markham & Johnson; Johnson & Riehbrock, and Johnson, Riehbrock & Halsey. In 1888 he was elected to the judgeship of the 2d Wisconsin circuit court over N. S. Murphy, the Labor candidate; in 1893 was unanimously re-elected, and in 1899 again, for the term expiring in 1905. The court disposes of between 400 and 500 cases annually, and Judge Johnson fully sustained the reputation of its presiding officers by the breadth of his decisions and the promptness with which business was transacted. He was very active in municipal affairs, and in 1867 was chairman of the committee on revision of the city charter. In 1868 and 1869 he was elected to the legislature, in which, during the first term, he was chairman of the committee on education, and during the second, chairman of the committee on the judiciary. In 1872 he was sent as a delegate to the national convention at Cincinnati which nominated Horace Greeley for the presidency. In 1878-80 he was attorney of the city of Milwaukee. For many years he was a Democrat, but party measures did not invariably command his support. He contributed to newspapers articles on topics of general interest, and to the "Atlantic Monthly" and other magazines. His short stories, "Our Paris Letters" and "Broke Jail," published in the "Atlantic," excited much interest, the treatment of the subjects being unbackneyed and the style being both clear and vigorous. Judge Johnson was married at Madison, Wis., Sept. 24, 1860, to Electa Amanda, daughter of Bezaleel and Catherine Wright. They had one daughter, Kate, who died Dec. 4, 1892. Judge Johnson died June 15, 1900.

MOORE, John Basset, lawyer and diplomat, was born at Smyrna, Del., Dec. 3, 1860, son of John A. and Martha Anne (Ferguson) Moore. He was educated in a private school at Felton, Del., and at the University of Virginia, where he studied for three years, devoting himself especially to the classics, general history, literature, moral philosophy and logic. He entered the law office of Edward G. Bradford, of Wilmington, Del., in 1880, and was admitted to the bar in the fall of 1883; after which he immediately began practicing in Wilmington. In July, 1885, he accepted a temporary commission as a clerk in the department of state, under the civil service law, which commission was made permanent in the following January. He was for a year associated with Mr. Adee, third assistant secretary, and with Dr. Wharton, the solicitor, in the distinctively legal branch of the work. In August, 1886, Mr. Moore was appointed third assistant. He resigned his post in the department of state in 1891, to fill the chair of international law and diplomacy in Columbia University, then newly created and the first full professorship in that subject in the United States. While in the department of state he was recognized as an authority on all questions of international law. He was secretary on the American side in the fisheries conference, which met at Washington in 1887, holding this office until the close of the conference in 1888. He also prepared all the protocols of the Samoan conference between the secretary of state and the British and German ministers in Washington, during the months of June and July, 1887. In 1891 he was elected an associate of the Institut de Droit International. Mr. Moore is the author of numerous valuable contributions to the literature of international law and other subjects. He published, in 1887, a "Report on Extraterritorial Crime." He also made a report to the international American conference on the subject of extradition, which passed through

a second edition. Mr. Moore is the author of a paper read before the American Historical Association, Dec. 31, 1891, entitled "The United States and International Arbitration," a paper on the subject of "The Right of Asylum in Legation," and Consulates and in Vessels," published in the March and June numbers (1882) of the "Political Science Quarterly," and of "A Treatise on Extradition and Interstate Rendition," published in two large volumes in 1891. From April, 1898, at the beginning of the war with Spain, until September, 1898, Mr. Moore was assistant secretary of state of the United States. In September, 1898, he went to Paris as secretary and counsel of the commission on the part of the United States for the negotiation of a treaty of peace between the United States and Spain. Towards the latter part of 1898 there was published by the U. S. government one of Mr. Moore's most important works, a "History and Digest of International Arbitrations," (six vols.). He is now engaged in the preparation of a new edition of the "International Law Digest," published by the United States. He had charge of the department of law in the "Standard Dictionary." He was married, in April, 1890, to Helen Frances, daughter of George W. and Angela L. Toland. They have three children.

OTIS, Alfred G., jurist, was born at Homer, Cortland co., N. Y., Dec. 13, 1827, son of Isaac and Caroline A. Otis. When he was a child his father removed to Barry county, Mich., and engaged extensively in farming. He worked on his father's farm until he was twenty, when he began to fit himself for a professional career, studying Latin and Greek evenings. By teaching school he acquired the means of pursuing his studies at the Kalamazoo branch of the State University, Ann Arbor, which he entered in 1849. He was graduated in 1852, and then went to Claiborn county, Miss., where he taught school, meantime studying law. In 1854 he was graduated at the Louisville Law School, and practiced in that city until 1855, when he went to Atchison, Kan., where he has since resided. For several years he was connected with the land litigation in that new territory, gaining reputation as an able attorney. In 1860 Judge Otis and the Hon. George W. Glick formed a partnership, which continued until 1873 and met with remarkable success, theirs being recognized as one of the leading firms in the state. They were the regularly employed attorneys of the Central branch, Union Pacific railroad, from 1865, and after the firm was dissolved Judge Otis retained the business until 1876, when he was elected district judge of the 2d judicial district, on the Democratic ticket, though the community was largely Republican. During his term of four years he gained the confidence and esteem of the legal fraternity throughout the state. He was prominently identified with the business and railroad interests of northern Kansas, and he retired from active business in 1891 with a broad-some competency. In 1862 he was married to Amelia J. Barnes, of Philadelphia, by whom he has five children now living, three sons and two daughters. For years Judge Otis and his wife have been influential members of the Episcopal church, but are liberal contributors to all churches, irrespective of creed or sect.

LANMAN, Charles Rockwell, orientalist, was born at Norwich, Conn., July 8, 1850, son of Peter and Catherine Cook Lanman, and is a great-great-grandson of Gov. Jonathan Trumbull ("Brother Jonathan") of Connecticut. He was graduated in 1871 at Yale College, remained there studying Sanskrit under William D. Whitney until 1873, when he received the degree of Ph D. and went to Germany to continue linguistic studies under Weber, of Berlin, Roth, of Tübingen, and Curtius and Leskien, of Leipzig. He was called to the Johns Hopkins University of Baltimore in 1876, the year of its opening; and to

Harvard University in 1880, as professor of Sanskrit. He published, in 1880, "Noun-inflection in the Veda" (vol. X, "Journal of the American Oriental Society"), an investigation of the grammar and exegesis of the Veda; and in 1888 "A Sanskrit Reader, with Vocabulary and Notes," which, in connection with Whitney's "Sanskrit Grammar," is intended to serve as a complete apparatus for the first year or two of Sanskrit study. He was secretary of the American Philological Association from 1879 to 1884, during which time he edited volumes X, to XIV, of its "Transactions," and was

its president in 1890. He was corresponding secretary of the American Oriental Society from 1884 to 1894. In 1889, while traveling in India, he acquired for the university a valuable collection of Sanskrit and Prakrit manuscripts (some 5000), and of other books. He is the editor of the "Harvard Oriental Series." The first volume is a collection of Buddhist Sanskrit stories, edited by Prof. Kern, of the University of Leiden, and called "Jataka Mala," an English translation of which formed the first volume of Max Müller's "Sacred Books of the Buddhists." The second is the "Sankhya Pravaçana Bhasya," one of the chief works on the Hindu Sankhya philosophy, edited by Prof. Garbe, of Königsberg. The third is "Buddhism in Translations," by H. C. Warren, a series of over a hundred translations from the original Pali texts, so selected and arranged as to give a systematic view of the Buddha legend and of the Buddhist order and philosophy. Volume four contains the only Prakrit drama extant, the Karpura Manjari (900 A. D.), edited by Sten Konow, of the University of Christiania, and translated and commented by Prof. Lanman. Volumes five and six contain a translation of the Atharvaveda by the late W. D. Whitney, of Yale, completed and brought out by the editor of the series. Some ten other volumes are in progress. In 1898 he followed Brunetiere as incumbent of the Percy Turnbull memorial lectureship of poetry at Johns Hopkins University. In the same year he gave a course of lectures on Sanskrit literature at the Lowell Institute, Boston. He is an honorary member of the Asiatic Society of Bengal (Calcutta); a member of the Royal Bohemian Society of Sciences (Prague); the Royal Asiatic Society of Great Britain and Ireland (London); the Société Asiatique (Paris); the German Oriental Society (Leipzig), and is vice-president of the American Oriental Society. Prof. Lanman was married, July 18, 1888, to Mary Billings Hinckley, a lineal descendant of Thomas Hinckley, the last governor of Plymouth colony. They have two sons and four daughters.

STRONG, James Hooker, naval officer, was born at Canandaigua, N. Y., April 26, 1814. While

studying at the Polytechnic School at Chittanooga, N. Y., he was appointed by the secretary of the navy to a midshipman's position, Feb. 2, 1829. Preferring to finish his course, however, he received permission of the secretary to do so, and upon graduation was at once appointed to the sloop of war Lexington, attached to the Brazil squadron. He was in command of a boat expedition which attacked and broke up piratical headquarters on the Falkland islands, and, though his party was greatly outnumbered, engaged in a hand-to-hand encounter with the pirates, who were nearly all killed or taken prisoners, many sailors being released and their vessels restored to them. In 1834 he was attached to the schooner Enterprise, of the same squadron, but the following year was on duty at the Naval School in New York city. On June 4, 1836, he was promoted to past-midshipman and attached to the frigate Constellation, where he remained until 1839, when he returned to the Brazil squadron on board the razeed Independence, of which he was commissioned lieutenant in September, 1841. He continued on board the Independence until 1844, when he was attached for two years to the frigate Columbus, of the East Indian squadron. The next ten years were divided between the New York receiving ship and the Mediterranean squadron. In 1857 and 1858 he was at the New York rendezvous; the next year he was in command of the storeship Relief, and in April, 1861, was commissioned as commander and assigned to command the steamer Mohawk, of the south Atlantic squadron. He commanded the Flag, of the south Atlantic squadron, in 1862, and in 1863 the steam sloop Monongahela, of the western Gulf blockading squadron. In November of the latter year he was in command of the convoy which accompanied Gen. Banks and his division from New Orleans to Brazos island, assisting in the capture of a battery of three heavy guns at Arkansas pass. In the battle of Mobile bay, Aug. 5, 1864, considered one of the severest naval battles of the civil war, Com. Strong greatly distinguished himself. He steamed out of line with the Monongahela, opened an effective fire on the Confederate ram Tennessee, and, after running her twice, was about to make a third rush, when she surrendered. He was commissioned captain Aug. 5, 1865. In 1866 and 1867 he was inspector of the navy yard in Brooklyn; in 1868 and 1869 he commanded the steam sloop Canandaigua, of the European squadron, and in 1870 was appointed executive officer of the navy yard, New York. He was commissioned commodore March 2, 1870, and a year

later was appointed inspector of the light-house department. In September, 1873, Com. Strong was promoted to the rank of rear-admiral and ordered to take command of the south Atlantic squadron. On April 25, 1876, he was retired, having reached the age limit. Adm. Strong was married, in 1844, to Maria Louisa Von Cowenhoven, of Long Island. He died at Columbia, S. C., Nov. 28, 1882, survived by a son and daughter.

HENRY, Caleb Sprague, clergyman, educator and author, was born at Rutland, Mass., Aug. 2, 1804. He was graduated at Dartmouth College in

1825, took a divinity course at Andover; was ordained to the Congregational ministry, and held pastorates at Greenfield, Mass., and Hartford, Conn., until 1835, when he was admitted to the Episcopal church, and shortly thereafter took holy orders. He held the chair of intellectual and moral philosophy at Bristol College, Pennsylvania, 1835-37, and in the latter year removed to New York, where he was associated with Dr. Francis L. Hawks in establishing the "New York Review," of which the first number appeared in March, 1837. The editorial management after a time passed from Dr. Hawks to Mr. Henry, and in 1840 to Dr. J. G. Coe, well, on his appointment as professor of philosophy, history and belles-lettres in the University of the City of New York. In addition to his duties there he was rector of St. Clement's Church, New York city, 1847-50; and was for a time editor of the "Churchman," and also political editor of the New York "Times," and was employed also with literary work of a high character. Dr. Henry was chiefly engaged in literary work at Poughkeepsie, N. Y., and at Newburgh, N. Y., in 1850-68; but at Newburgh also was rector of a church. He also resided in Hartford and in Stamford, Conn., and was rector of St. Michael's Church, Litchfield, Conn., in 1870-73. In 1880 he returned to Newburgh. He received the degree of D. D. from Hobart College in 1838, and that of LL. D. from the University of New York City in 1879. His works are: "Elements of Psychology; included in a Critical Examination of Locke's 'Essay on the Human Understanding,' by M. Victor Cousin," translated from the French (1834); "Compendium of Christian Antiquities" (1837); "Moral and Philosophical Essays" (1839); "Guizot's General History of Civilization," translated, with notes; "Household Liturgy," "A Manual of Ancient and Modern History," by W. C. Taylor, LL. D., revised, with a chapter on the United States and other additions (1845); Baintain's "Epitome of the History of Philosophy," which Dr. Henry continued to the date of publication (1845, 2 vols.); "Dr. Oldham at Graystones, and His Talk There" (1860; 3d ed., 1872); "Social Welfare and Human Progress" (1860); "About Men and Things" (1873); and "Satan as a Moral Philosopher" (1877), besides contributing freely to the "Church Review" and kindred periodicals, and publishing a large number of college and other addresses. He died at Newburgh, N. Y. March 9, 1884.

HAMMOND, Josiah Shaw, physician and surgeon, was born at North Abington, Plymouth co., Mass., Sept. 10, 1844, descendant of Elizabeth (Penn) Hammond, who was an aunt of the celebrated Quaker, William Penn. Losing her husband, William, she left London, and came to Sandwich, Mass., in 1634, with three daughters and one son, Benjamin, who was the earliest American ancestor. Dr. Hammond was educated in his native place until he was seventeen, when the family removed to California. He entered the State Normal School, and after graduation, in 1868, he became the first assistant at the Stockton High School. In 1870 he studied medicine with Dr. Asa Clarke, of Stockton, and continued

his studies at the Bellevue Hospital Medical College, New York city, later entering the Cooper Medical College in San Francisco, where he was graduated in 1873. Dr. Hammond practiced first at Lockeford, Cal.; afterward at Piche, Tybo and

Austin, Nev., and in 1885 settled in Bay, Mass. Dr. Hammond is a member of the Silver Bow Medical Society; ex president of the State Medical Association; past grand chancellor of the Knights of Pythias; Montana, and past grand master workman of the Ancient Order of United Workmen. He is a son of the 1st regiment of the National Guard of Montana, and is a member of the Association of Military Surgeons of the United States. Dr. Hammond has traveled extensively, visiting European hospitals and keeping informed with regard to the latest medical discoveries. On Dec. 25, 1867, he was married to Mrs. Eliza Simpson, of Lockeford, Cal., by whom he had had six children.

FISK, Franklin Woodbury, president of Chicago Theological Seminary, was born at Hopkinton, N. H., Feb. 16, 1820, son of Ebenezer and Hannah Cogswell (Proctor) Fisk. He attended Phillips Academy, Andover, Mass., and paid his expenses by teaching. He was graduated at Yale College in 1849, as valedictorian of his class; he was graduated at the Yale Divinity School in 1852, and was tutor in Yale during 1851-53. He became professor of rhetoric and English literature in Beloit College, Wisconsin, in 1854, and occupied this position until 1859, when he took the chair of sacred rhetoric in Chicago Theological Seminary. Olivet College conferred upon him the degree of D. D. in 1863, and Yale University the same degree in 1886. He received the degree of LL. D. from Beloit College in 1888. In the fall and winter of 1871-72 he attended lectures at the University of Berlin, and in 1872 traveled in Egypt, Arabia, Greece and Palestine. Since 1887 he has been president of the board of instruction of Chicago Theological Seminary, being the first president of the board. As professor and president he has been connected with this institution for forty-one years and has been conspicuous in raising large sums for the benefit of the seminary. He has published a work entitled, "Manual of Preaching," which has reached a third edition, and is used as a text book in several institutions. Chicago, though next to the youngest of the seven Congregational seminaries in the United States, now has the largest number of students. Dr. Fisk has been twice married; first, in 1851, to Mrs. Amelia Austin, daughter of the late George Bowen, of Woodstock, Conn., who died in 1881, leaving three children; second, to Mrs. Selinda Jeannette Hitechock, daughter of Elijah R. Gardner, of Lake Geneva, Wis.

HAYDEN, Ferdinand Vandiveer, geologist and author, was born at Westfield, Hampden co., Mass., Sept. 7, 1829, son of Asa Hayden. His father died when he was ten years of age, his mother married again. The boy went to live with an uncle near Rochester, O., where he worked on a farm until he was eighteen years of age, also for two months in a district school. He was graduated at Oberlin College in 1850, and at the Albany Medical College in 1853. He did not practise his profession, however, but instead turned his attention to geological study, and was commissioned by the state geologist to explore a remarkable deposit of extinct animals in the Bad Lands of Dakota, and was successful in returning to Albany with some valuable fossil vertebrates. He next spent two years (1854-56) in exploring the basin of the upper Missouri river, and brought back numerous fossils, part of which he donated to the St. Louis Academy of Science and part to the Academy of Natural

Franklin W. Fisk

J. S. Hammond

Sciences in Philadelphia. In May, 1856, he was appointed geologist on the expedition conducted by Lieut. Warren to explore that portion of the Northwest now known as Dakota, and he continued in this occupation until May, 1859, when he received the appointment of surgeon and naturalist to the expedition led by Capt. W. F. Raynolds, of the U. S. engineers, which explored the region of the Yellowstone and Missouri rivers. In May, 1862, he was assigned to duty at the Sutterlee Military Hospital in Philadelphia, and in February, 1863, he was sent to Beaufort, S. C., as chief medical officer. In 1864 he was assistant medical inspector in the department of Washington; in 1864-65 was chief medical officer of the army of the Shenandoah at Winchester, Va., and in 1865-71 was professor of mineralogy and geology in the University of Pennsylvania. During the summer of 1866 he revisited the Missouri valley, where he collected vertebrate fossils of much value for the Philadelphia Academy of Natural Sciences, and in 1867 made a geological survey of Nebraska and other territories for the government. In 1869 the work became known as The Geological Survey of the Territories of the United States. From this time until 1871 Dr. Hayden conducted a series of explorations extending over the territories of Dakota, Wyoming, Utah and Colorado, his observations including the geology, natural history, climatology, ethnology, and resources of those parts. In 1873 the scope of the work was enlarged by the addition of geography and became the "U. S. Geological and Geographical Survey of the Territories." His disclosures of the wonders and magnificence of this section of the country led to the passage of an act by congress, in 1872, by which the Yellowstone park was set apart as a public park or pleasure ground. On March 3, 1879, the four existing surveys were abolished by law and a new one was instituted under the title of The United States Geological Survey, and established as a bureau of the

J. V. Hayden

interior department. Clarence King was the first director, and Mr. Hayden took charge of the explorations at the source of the Mississippi, or the division of Montana; being actively employed until 1886, when failing health caused his resignation. The degree of LL.D. was conferred upon him by the University of Rochester in 1876, and by the University of Pennsylvania in 1886. He was a member of the National Academy of Sciences from 1873, a member of almost all the other scientific societies of the United States, and an honorary member of many foreign scientific bodies. Many of his principal publications were issued by the government and consist of special reports upon paleontology, natural history, and similar subjects; miscellaneous publications, and annual reports from 1869 to 1879, descriptive of the regions explored. He was also a contributor to and editor of a series of volumes entitled, "Reports of the United States Geological Survey of the Territories" (12 vols.). He also published "Sketch of the Origin and Progress of the United States Geological and Geographical Survey of the Territories" (1877), "The Yellowstone National Park, and the Mountain Regions of Idaho, Nevada, Colorado, and Utah" (1887); with A. R. C. Selwyn, "North America" ("Stanford's Compendium of Geography and Travel," 1883). Dr. Hayden was married, Nov. 9 1871, to Emma C., daughter of Edward D. Woodruff, a well-

known merchant of Philadelphia. The year following his death, she gave to the National Academy of Sciences the sum of \$2,500 as a trust fund to provide a Hayden memorial for annual bestowal, "as a reward for the best publication, explanation, discovery, or research in the science of geology and paleontology, or in such particular branches thereof as may be designated." Dr. Hayden died in Philadelphia, Pa., Dec. 23, 1887.

APPLESEED, Johnny, philanthropist, whose true name was John Chapman, was born in or near Springfield, Mass., in 1775. About the year 1808 he removed to the vicinity of Pittsburgh, Pa., and there began his life-work; primarily that of rearing apple trees for the benefit of others, and incidentally of disseminating the doctrines of Emanuel Swedenborg. Keeping in advance of civilization, he crossed into Ohio about 1806, and worked westward until the central and northern parts of that state were dotted with his nurseries. He was accustomed to clear a place in the forest, plant his seeds, fence in the patch, and when the locality was settled to dispose of the trees for a "fip-penny bit" apiece, or for food or old clothes, though he as frequently gave them away. From time to time he made long journeys, usually on foot, to trim the trees in his widely-scattered plantations, or to procure a fresh supply of seeds from the cider mills in western Pennsylvania. Though he went unarmed he was never molested by Indians or wild beasts, the former regarding him as a great "medicine man," probably because he scattered through the woods seeds of medicinal plants, such as catnip and pennyroyal. Johnny's chief article of clothing was an old coffee sack, with holes for his head and arms, and a tin pan, which formed a part of his slender outfit, sometimes served for a hat. Every house was welcome to Applesed John, as he was called at first, his goodness, unselfishness and child-like simplicity endearing him to all; but he preferred the shelter of the woods to that of a roof, even in winter time. He had a strong love for children, and an equally strong one for animals; he was even heard to regret having killed a rattlesnake that had bitten him. During the war of 1812 he often warned the settlers of approaching danger, and when Mansfield was believed to be threatened by the Indians voluntarily went through an unbroken wilderness to Mt. Vernon, thirty miles away, for troops, making the round trip between sunset and sunrise over a new-cut road. Johnny Applesed lived in Ashland county, O., until 1838, and then removed to the vicinity of Fort Wayne, Ind., to continue his beneficent work. In March, 1847, he heard that one of his nurseries, twenty miles away, had been broken into by cattle, and started to repair the damage; but fell ill at a friend's house, a few miles from Fort Wayne, and died on the following day, the 11th of the month. His name is engraved on a monument erected in Millfin township, Ashland co., O., to the memory of some of the pioneers.

BAXTER, John, jurist, was born in Rutherford county, N. C., March 5, 1819, son of Elisha Baxter, tenth governor of Arkansas. He was educated at Rutherfordton, the county seat, and was admitted to the bar in 1841. He was a member of the state legislature in 1842-46, and from 1852 until 1857, serving as speaker of that body in 1852. In 1857 he removed to Knoxville, Tenn., where he built up a large and lucrative practice. A man of pronounced political convictions, in the campaign of 1860 he supported the presidential ticket of Bell and Everett, and during the following years supported the Federal cause with the utmost vigor and earnestness. He was an active member of the two Tennessee conventions of Federalists held in 1861, and at one of them his name was proposed as general of a provisional army. At this time it was his custom to defend Union

men charged with crimes against the Confederacy, and during the reconstruction period he was equally ardent in championing the cause of Confederates unjustly charged. Early in 1861 he entered unexpectedly a meeting of citizens called to devise means for raising troops for the Confederate army, and accepted an invitation to address the body, but spoke in a vein not anticipated. He showed the advantages of the North in numbers, wealth and equipment, the certainty of Southern defeat, with the liberation of the slaves, and great loss of life and treasure. A garbled report of the speech appearing in a Confederate paper placed him in a very obnoxious light, and a few days later his enemies persuaded a Georgia regiment then passing through the town that Baxter deserved to be hanged. Although he had ample time and opportunity to avoid the soldiers, he awaited their arrival at the court-house, and then walked out, coolly inquiring if they were looking for him. Upon being shown the newspaper, he told in a deliberate, fearless manner the true character of the speech, the circumstances attending its delivery, and the motive prompting its publication in exaggerated form. His manner, his tact and his courage startled them; but he soon arrested their attention by his defense, and finally won their admiration, so that instead of harming him they applauded his pluck and approved his denunciation of his enemies. In 1877 he was appointed by Pres. Hayes U. S. circuit judge for the 6th judicial circuit, comprising the states of Michigan, Ohio, Kentucky and Tennessee. As a judge he was celebrated for his impartiality, fearlessness and the promptness with which he despatched legal business. Judge Baxter died at Hot Springs, Ark., April 7, 1886.

LEE, Benjamin, physician and author, was born in Norwich, Conn., Sept. 26, 1833, son of Alfred and Julia (White) Lee. He was graduated at the University of Pennsylvania in 1852, and received the degree of A. M. in 1855, and Ph. D. in 1858. He studied medicine in the Jefferson Medical College in Philadelphia in 1853-54, and in 1854-56 at the New York Medical College, in New York city, receiving his degree of M. D. from the latter in 1856. His graduating thesis, "The Mechanics of Medicine," won for him a prize. He was resident physician to the Colored Home Hospital, New York city, in 1855-56, and he was attached to Bellevue Hospital, New York city, in 1856-57. He visited the hospitals of Paris, France, in the winter of 1857-58, and in the following summer took a practical course in obstetrics in Vienna, Austria, under Dr. Carl R. Braun. Late in 1858 he began to practice medicine in New York city, and in 1859-60 he was attending physician at Demilt Dispensary. He was in the service of the United States, as surgeon of the 22d regiment, N. G., N. Y., for short terms during 1862 and 1863. He removed, in 1865, to Philadelphia, Pa., which has since been his home. Dr. Lee is a specialist in orthopedic surgery, nervous affections and mechanical therapeutics, and introduced, in 1866, the method of self-suspension in the treatment of spinal affections. He has been secretary of the Pennsylvania state board of health since 1885, and supervised the sanitary and medical service in and about Johnstown, Pa., after the great flood of 1889. Since 1893 he has been secretary of the state quarantine board, and in 1898-99 was health officer for the city and port of Philadelphia. In 1892-93, he was professor of orthopedics in the Philadelphia Polytechnic and College for Graduates in Medicine. He was president of the Mutual Aid Association of the Philadelphia County Medical Society in 1878-81 and 1884-89; of the American Academy of Medicine in 1884; of the American Orthopedic Association in 1892; of the Conference of State and Provincial Boards of Health of North America in 1898, and is now

(1901) president of the American Public Health Association, was treasurer of the Medical Society of the State of Pennsylvania in 1873-88, and vice-president of the Philadelphia County Medical Society in 1876. He was also a member of the American Medical Society in Paris, the Medical Society of the County of New York, the Medical Society of the State of New York, the Medical Society of the American Medical Association, the Congress of American Physicians and Surgeons, the Sanitary Council of the Mississippi Valley, the Philadelphia Society for Organized Charity, the State Association Health Authorities of Pennsylvania, the Association Internationales pour le Progrès de l'Hygiène, Bureaus, Belgium, and the Société de l'Hygiène, Paris, France. He was editor of the "American Medical Monthly" in 1867, and throughout his professional career he has been a frequent contributor to medical periodicals. He published in 1867 a work on the "Treatment of Angular Curvature of the Spine," and in 1885 translated Albert Reibmayr's treatise on massage, from the German, publishing the same under the title of "Tracts on Massage." He was married, April 5, 1859, to Emma Hale, daughter of Norman White, of New York city. They have living three daughters and one son.

LEE, Alfred, first P. E. bishop of Delaware, and 38th in the succession of the American episcopate, was born at Cambridge, Mass., Sept. 9, 1807, son of Benjamin Lee, a native of Farnham, England, who entered the British navy as a midshipman, and commanded a battery of guns in the naval battle between Adm. Rodney and Count de Gausse, off Gandeloupe, in April, 1782. It is related of him that being condemned to be shot by court martial, for challenging a superior officer, his sentence was commuted to dismissal from the service, through the intervention of the duke of Clarence, and when he was set ashore he sent a fresh challenge to the same officer, but the result of the meeting is not recorded. He then came

to the United States, and entered the United States marine as a captain. The house in which his son was born was one of the seven old Tenement-houses of Cambridge, immortalized by Longfellow in "The Old House by the Lindens." Alfred Lee entered Harvard College, where he was graduated in the class of 1827. He took up the legal profession, and was admitted to the bar in New London, Conn., but after practicing for two years in that city, he entered the General Theological Seminary in New York city, and was graduated in 1837. He became deacon in 1837, and the following year was admitted to priest's orders. His first charge was St. James's Church, Poponetown, Conn. Soon after he became rector of Calvary Church, Rockville, Pa., where he remained for three years. He was elected bishop of Delaware in 1841, and was consecrated in St. Paul's Chapel, New York city, Oct. 12, 1841. Removing at once to Wilmington, Del., in 1842 he became rector of St. Andrew's Church there, a position he occupied during the remainder of his life. On the death of Bishop Smith, in 1884, he was presiding bishop of the Protestant Episcopal Church in the United States. He received the degree of S. T. D. from Trinity College in 1841, and from Harvard in 1860, and in 1877 Delaware College conferred upon him the degree of LL. D. Bishop Lee was a member of the American Company of Revivers of the New Testament in 1881. He published "Life of St. Peter" (1852), "Life of St. John" (1854),

"Treatise on Baptism" (1854); "Memoir of Miss Susan Allibone" (1856); "Harbinger of Christ" (1857), and "Eventful Nights in Bible History" (1886), besides sermons, addresses and letters. On April 23, 1832, he was married to Julia, daughter of Elihu and Sarah (Trumbull) White, and grand daughter of Judge John Trumbull, of Connecticut. He died in Wilmington, Del., April 12, 1887.

COLEMAN, Leighton, second P. E. bishop of Delaware and 146th in the succession of the American episcopate, was born in Philadelphia, Pa., May 3, 1837, son of Rev. Dr. John and Louisa M. (Thomas) Coleman. His father (1804-72) was for many years rector of Trinity Church, in that city, and the editor of "The Banner of the Cross," a well-known and influential church weekly. His grandfather, John Coleman, emigrated from England in the latter part of the eighteenth century, and served in the war of 1812. At the battle of Bladensburg he won distinction by saving, at the risk of his life, the national colors from falling into the hands of the British. Leighton Coleman was educated in Philadelphia, and at the General Theological Seminary, New York, where he was graduated in 1861. He was ordained deacon July 1, 1860, by Bishop Potter, of Pennsylvania, and during his senior year at the seminary served as missionary to the public institutions on Blackwell's and Randall's islands, in New York harbor. After his graduation he became rector of St. Luke's Church, Bustleton, Pa., where he began a new parish, and was instrumental in building the memorial Church of St. Luke, in which he was ordained to the priesthood by Bishop Potter, May 15, 1862. He afterwards removed to Wilmington, Del., where he was rector of St. John's Church, and in 1866 he went to Mauch Chunk, Pa., to take charge of St. Mark's Church. While residing there he was the means of building several churches, including the

Leighton Coleman

beautiful one that is such a prominent object in the town. He remained there until 1874, when he removed to Toledo, O., and was rector of Trinity Church for three years, during which time he was chiefly instrumental in the erection of several church buildings. While rector of this parish he was unanimously elected the first bishop of the newly formed diocese of Fond du Lac, but declined the honor. He then resigned, on account of his wife's failing health, and spent eight years in England. While abroad he was constantly engaged in ministerial work, and for over two years was organizing secretary of the Church of England Temperance Society for the diocese of Oxford. On his return to America he became rector of the Church of the Redeemer, Sayre, Pa., building there a handsome new church edifice. While at Sayre he was elected bishop of Delaware, to succeed Bishop Alfred Lee, and was consecrated on Oct. 18, 1888. His active participation in the work of the Church of England Temperance Society gave him a practical knowledge of the nature of that work in England, and, with his long and active ministry in the United States, combined to give his opinions and counsel great weight in the American Church Temperance Society, of whose executive board he is vice-chairman. Bishop Coleman has published "History of the American

Church" (1895); "History of the Lehigh Valley" (1873), and many essays, reviews and sermons. He received the degree of A.M. from Trinity College, Hartford, in 1865; S.T.D. from Racine College, Wisconsin, in 1875, and LL.D. from Hobart College in 1888. He was grand chaplain of the Grand Lodge of Masons of Pennsylvania; grand prelate of the Knights Templar, and is at present chaplain general of the Society of the War of 1812, chaplain of the Delaware Society of the Cincinnati, and vice-president of the Delaware Historical Society. He was married, July 20, 1861, to Frances Elizabeth, daughter of Alexis Irence du Pont, and has one son.

BIRKBECK, Morris, reformer and author, was born at Wanborough, England, in 1763; received a classical education; made a practical study of agriculture, and acquired considerable reputation as a successful farmer. An interest in the United States was awakened through acquaintance with several Americans, one of whom was Edward Coles, subsequently governor of Illinois, and in 1817 Mr. Birkbeck emigrated to that state with his family. He bought a tract of 16,000 acres, which became known as "the English settlement," in Edwards county, and gave its name to the principal town, Albion, while his own place of residence, a few miles distant, he named Wanborough. Here he engaged in farming and in literary work, being, it is said, the first author, strictly speaking, to live in the state. He supported Gov. Coles in his efforts to prevent the formation of a new state constitution allowing slavery, and to that end, under the pseudonym of Jonathan Freeman, contributed articles of a popular and legal nature to the "Illinois Gazette"; also an "appeal" to the people, which was reprinted in pamphlet form. His style was agreeable, his arguments were sound, and he influenced public opinion to such an extent that he was especially obnoxious to the pro-slavery party. His son-in-law, Gilbert T. Pell, a member of the legislature, was another supporter of Gov. Coles. In September, 1824, Birkbeck was appointed secretary of state by the governor, and held office from Oct. 15th to Jan. 15, 1825, when he was obliged to resign, the senate, in which the advocates of slavery predominated, refusing to confirm his nomination. He published: "Notes on a Journey Through France" (1815); "Notes on a Journey to America" (1818), and "Letters from Illinois" (1818). In 1825 he visited Robert Owen, at New Harmony, Ind., and on his return was drowned while crossing the Fox river in Illinois, June 4th.

SMITH, Munroe, educator and author, was born in Brooklyn, N. Y., Dec. 8, 1854, son of Dr. Horatio S. and Susan Dwight (Munroe) Smith. His earliest known American ancestor was John Smith, of Plainfield and Voluntown, Conn., who served in King Philip's war and sat in the Connecticut legislature. He was educated in private schools in Brooklyn, and entering Anherst College was graduated in the class of 1874. He took a post-graduate course at Anherst for one year, continued his studies at the Columbia College Law School, and was graduated with the degree of LL.B. in 1877. He then went to Germany and studied at the universities of Berlin, Leipzig and Göttingen for three years, receiving the degree of J.U.D. (doctor of laws) from Göttingen University in 1880. Upon his return to the United States he became adjunct professor of history in Columbia College and lecturer on Roman law. Since 1890 he has been professor of Roman law and comparative jurisprudence. In 1886 Prof. Smith co-operated in establishing the "Political Science Quarterly," of which he was managing editor from 1886 to 1893, and again in 1898-99. He is the author of the introduction to the American edition of "Prince Bismarck," by Charles Lowe

(1885); "Bismarck and German Unity. An Historical Outline" (1898), and the introduction to "Cicero's Orations" in "The World's Great Books" (1899), has contributed to the "Century Magazine," "The Nation," "The Bookman," and other periodicals, and has written articles upon history and jurisprudence for "Johnson's Cyclopaedia," Harper's "Classical Dictionary," and Lator's "Cyclopaedia of Political Science." He is a member of the Authors' Club, the Century Club and the Bar Association of New York city. On April 17, 1890, he was married to Gertrude, daughter of Gen. H. S. Hildekoper, of Philadelphia, Pa., and has one child, a daughter.

RENWICK, James, scientist and author, was born in Liverpool, England, May 20, 1790, son of William and Jane (Jeffrey) Renwick, and grandson of James Renwick, a native of Roxburghshire, Scotland, and a manufacturer, who in the summer of 1783 emigrated to New York. He organized the mercantile firm of Renwick, Son & Hudswell, of which William Renwick was the English agent. The latter's wife was a daughter of Rev. Andrew Jeffrey, of Lochmaben, who was a famous beauty and the "blue-eyed Jeanie" mentioned in Burns' poem. Mr. Renwick brought his family to New York in 1794, and here the son, James, was educated. He was graduated at Columbia College in 1807, standing first in his class, and then traveled in Europe with his lifelong friend, Washington Irving. In November, 1812, he was appointed instructor in natural philosophy in Columbia College during the sickness of Prof. Kemp, and served without pay. In 1814 he entered the U. S. service as topographical engineer, with the rank of major, and in 1817 he was commissioned colonel of engineers in the militia of New York state, the same year being elected a trustee of Columbia College. He succeeded to his father's business; but the failure of the English correspondents brought the business to an end, and he accepted an appointment to the chair of natural experimental philosophy and chemistry in Columbia College in November, 1820, retiring as professor emeritus in 1853. During his term of thirty-three years at the college he was occasionally employed in outside work. In 1823 he examined into the practicability of a canal between Easton, on the Delaware river, and the Hudson river, reporting that such a canal was practicable with inclined planes in place of locks. The result was the Morris canal, for the use of which he patented, Nov. 7th, an economical form of inclined plane operated by a water counterpoise, the car at the upper end of the incline being filled with water until the weight was sufficient to lift the car carrying the boat at the lower end. The Franklin Institute awarded him the Franklin silver medal in 1826 for this invention. A modification of this system has lately been installed at Foxton, Leicestershire, England. In 1837 Prof. Renwick was employed by the U. S. government to survey and report upon a proposed site for a navy yard at Bergen point, and in the following year Pres. Van Buren appointed him one of the three commissioners "to test the usefulness of inventions to improve and render safe the boilers of steam engines against explosions," his associates being Prof. Silliman, of Yale, and Mr. Redfield. In 1839 he was employed by an association of the Rochester millers to examine into the excessive use of the water of the Genesee river for the Erie canal, and to report a remedy for it. In 1840, in association with Capt. A. Talcott and Maj. J. D. Graham, he was appointed a commissioner to survey the northeast boundary line between the United States and New Brunswick, commonly called the "disputed territory." The commissioners divided the survey into three sections, of which Prof. Renwick took the northern. During the progress of this work he en-

tered into a correspondence with his friend, Maj. Gen. Sir Edward Sabine, on the subject of a treaty which led to the sending of Lord Ashburton to the country and to the Webster-Ashburton treaty. In addition to his proficiency in the sciences, which he taught, Prof. Renwick was an astronomer, an excellent classical scholar and a good linguist, as well as a skillful water-color artist. He was a member of many learned societies. In 1829 the degree of LL. D. was conferred upon him by Columbia College. He was a vigorous writer and a frequent contributor to the first "New York Review," and on the establishment of the "Whig Review" he became one of its most valued writers, also contributing to the "American Quarterly Review." He translated from the French Lallemand's "Treatise on Artillery" (2 vols., 1820), and edited, with notes, American editions of Parkes' "Fundiments of Chemistry" (1824), Lardner's "Popular Lectures on the Steam-Engine" (1828), Daniell's "Chemical Philosophy" (2 vols., 1832), and Mosely's "Illustrations of Practical Mechanics" (1829). His own works include, besides official reports, lives of "David Rittenhouse" (1830); "Robert Fulton" (1845), and "Count Rumford" (1848), in Sparks' "Library of American Biography"; also "Outlines of Natural Philosophy," the earliest extended treatise on this subject published in the United States (2 vols., 1822-23), "Treatise on the Steam-Engine" (1829), which was translated into several languages; "Elements of Mechanics" (1832); "Applications of the Science of Mechanics to Practical Purposes" (1840); "Life of De Witt Clinton, with Selections of His Letters" (1810); "Life of John Jay (with Henry B. Renwick) and Alexander Hamilton" (1841); "First Principles of Chemistry" (1841), and "First Principles of Natural Philosophy" (1842). Prof. Renwick printed privately for the use of his classes "First Principles in Chemistry" (1838) and "Outlines of Geology" (1838), and a synopsis of his lectures on "Chemistry Applied to the Arts," taken down by one of his class, was printed. In 1816 he was married to Margaret Anne, daughter of Henry Brevoort, New York city. He had four children: Henry B., architect; James, architect; Edward S., engineer; and Laura K., who became the wife of John A. Munroe. He died in New York city, Jan. 12, 1862.

RENWICK, Henry Brevoort, engineer, was born in New York city, Sept. 1, 1817, eldest son of James and Margaret A. (Brevoort) Renwick. He was named after his mother's brother, a prominent member of a Knickerbocker family of New York, who was a lifelong friend of Washington Irving. He was graduated at Columbia College in 1833, and immediately afterwards was employed in a dry goods store. After the great fire in 1835, which destroyed the store, he began to practice civil and mechanical engineering. He was engaged upon the construction of breakwaters at Sandy Hook and Egg Harbor. He served as first assistant astronomer of the U. S. boundary commission, 1840-42, and in 1848 became examiner in the U. S. patent office at Washington. His knowledge of mechanics was then eagerly sought after by the best patent lawyers of the time, and he very soon gained prominence as an expert in patent cases. Among the most important litigations in which he testified were the cases of the sewing-machine suits, the McCormick reaper, and the Bell telephone cases. In 1853 he was appointed U. S. inspector of steam vessels in New York city.

his retirement from that office he devoted all his time to his profession. Mr. Renwick was a prominent member of St. Mark's Protestant Episcopal Church, of which he was senior warden. In 1852 he was married to Margaret, daughter of John Janney, of Alexandria, Va. They had one son and one daughter. He died in New York city, Jan. 27, 1895.

RENWICK, James, architect, was born at Bloomingdale, N. Y., Nov. 3, 1818, second son of James and Margaret A. (Brevoort) Renwick. His father, in addition to his other varied accomplishments, had mastered the study of architecture, and the son having inherited this taste was given every opportunity to develop and cultivate his genius. At the age of fourteen he entered Columbia College, where he was graduated in 1836. He accepted a position as assistant engineer on the Croton aqueduct, and superintended the building of a distributing reservoir between Fortieth and Forty-second streets, New York city. He volunteered to furnish a plan for the fountain in Union square which the property owners around the square agreed to erect, and superintended its construction. He was the successful one of the competing architects for the plan and erection of Grace Church, Broadway and Tenth street, which when completed was so satisfactory to all concerned, that his reputation was at once established, and he immediately acquired a large and a lucrative business. Mr. Renwick was architect of Calvary Church, Fourth avenue, the Church of the Puritans, Union square, and many business and private residences. He was chosen by the board of regents

architect of the building of the Smithsonian Institution, Washington, D. C., and was also appointed architect to the board of charities and correction of the city of New York, which position he retained until 1874. In 1853 he entered plans in competition for a Roman Catholic Cathedral (St. Patrick's). This, the most beautiful, chaste and imposing church edifice in this country, was projected by Archbishop Hughes in 1850, and Mr. Renwick's design having been accepted, the corner-stone was laid in 1858, and the cathedral was opened in 1879. It occupies the entire block bounded by Fifth and Madison avenues, Fifth and Fifty-first streets, and is the grandest monument to his genius. Among his other works are the

Corcoran Art Gallery, Washington, D. C.; Vassar College, Poughkeepsie; the City Hospital, Smallpox Hospital, Workhouse, Lunatic and Inebriate asylums on Ward's Island, the Archbishop's residence, Madison avenue, the Young Men's Christian Association, all of New York city, and a number of other fine buildings and churches of superior design and workmanship. Mr. Renwick was a discriminating lover of art, and collected a large number of paintings from all parts of Europe, embracing examples of the best known artists. He was known as one of the best art connoisseurs in New York, and many of his paintings are masterpieces. About 1852 he was married to Anna, daughter of William H. Aspinwall, of New York, but had no children. He died in New York city, June 23, 1895.

RENWICK, Edward Sabine, mechanical expert and inventor, was born in New York city, Jan. 3, 1823, third son of James and Margaret Anne (Brevoort) Renwick. He was graduated at Columbia in 1839. He was trained in civil and mechanical engineering by his father, and under him became an expert in chemical analysis. In 1840 he became an assistant to the superintendent of the New Jersey Iron Co., Boonton, N. J., and three years later was employed on the survey of the northeast boundary of the United States under his father, who was chairman of the commission appointed for that purpose. In 1845 he was made superintendent of the Wyoming Iron Works, at Wilkes-Barre, Pa., and in 1846, while still employed there, he joined his elder brother, Henry B. Renwick, in putting up a small blast furnace at Wilkes-Barre, for the manufacture of pig-iron. He also devised the first set of saws used in this country for sawing off the ends of rails, for the Montour Iron Co., at Danville, Pa. In 1848 work was stopped at the Wilkes-Barre blast furnace, and the following year he associated himself in Washington, D. C., with Peter H. Watson as solicitor of patents and expert in the trial of patent causes in the U. S. circuit courts. While thus engaged he made various inventions, the first being a wrought-iron railway chair for holding rails to the cross-ties; this in several modified forms is still in use. His most important invention, however, was the original self-binding reaping machine. The reaping machines invented and manufactured previously by McCormick, Hussey and others cut the grain and discharged it upon the ground in a loose condition. The self-binding reaping machine or harvester automatically cuts the grain, gathers it, compresses it into gavels and binds it with cord, discharging the grain in bound sheaves. He was assisted by his partner, Mr. Watson, and the latter's brother, their first patent being taken out in 1851 in their joint names. A second patent for improvements was taken out in 1853. These inventions were in advance of the age and did not come into use until after the patents had expired. Returning to New York city he continued the practice of his profession until 1892, when he retired. The most notable of his engineering achievements was the repairing of a fracture eighty feet long and seven feet wide in the Great Eastern in 1862. Fortunately her inner skin was intact. A wooden caisson was fitted on the vessel, the water pumped out, and the fracture repaired. Contrary to the opinion of prominent engineers the work was successfully carried through, and the Great Eastern returned to Liverpool with a full cargo and many pas-

James Renwick

sengers. In 1862 he presented to the government a plan of an ironclad vessel with twin propellers, and although the plan was approved by the board of naval commodores the secretary of the navy would take no action. In 1862 and 1868 he patented his improvements in propulsion in England, but it was not until the accident to the propeller shaft of the City of Paris (1897) that one of them came into use, viz., the introduction of external casings or tunnels around the tail shafts of twin propellers through the water to the after bearings, so that these shafts could be examined and gotten at for repairs. Another improvement, that of a balanced compound engine for the crank shaft of a propeller, did not come into use until more than twenty years after the date of his English patent of 1868. In 1868 he removed to his residence, Millburn, N. J., where in 1875 he invented an incubator which regulated the heat automatically, and also supplied the required ventilation and moisture. This was followed by a brooder, in which heat and ventilation were supplied to the floor on which the chickens were housed, the result being that the loss by death was reduced from 75 to from 5 to 10 per cent. In 1893 Mr. Renwick published a treatise on "Practical Invention," embodying a compendium of his expert experience of forty-four years in the courts. He was married, in 1862, to his second cousin, Alice, daughter of Henry and Bridget (Seeley) Breavor, and has two sons and one daughter.

ABBOT, Willis John, author, was born in New Haven, Ct., March 16, 1863, son of Waldo Abbot, who changed the spelling of the name back to the earlier methods of the family, the name being first changed from Abbot to Abbott by Jacob Abbott, the author and grand-uncle of Willis J. Abbot. His grandfather was John S. C. Abbott, the historian. He received his early education in New Orleans, where much of his early life was spent, and, entering the University of Michigan, was graduated in the class of 1884. He made journalism his profession, and was first connected with the New Orleans "Times Democrat" in 1884-85. He then was on the staff of the New York "Tribune," in 1885-87, and was editor in chief of the Kansas City "News" from 1887 to 1890. He subsequently went to Chicago as editorial writer on the "Times," of which paper he was afterwards managing editor, and was editor-in-chief until 1893. In 1896 he became the chief editorial writer of the New York "Journal," and in 1900 went to Battle Creek, Mich., where he is editor of "The Pilgrim," a monthly. He is the author of the popular "Blue Jacket" series of boys' books (1886-88), which in three volumes give a complete history of the U. S. navy; the "Battle Fields" series, which in three volumes give a complete history of the purely military operations of the civil war; "The Naval History of the United States" (1896), and "Life of Carter H. Harrison" (1895). He is a member of the Authors' Club. He was married, in 1887, to Marie A. Mack, of Ann Arbor, Mich.

STREET, Alfred Billings, author and poet, was born at Poughkeepsie, N. Y., Dec. 18, 1841, son of Randall S. and Mary (Billings) Street. His father (b. 1780-d.1841) was district attorney of New York state; served in the war of 1812 as major and lieutenant-colonel, later being promoted to the rank of general of the militia; and won distinction as a representative in the 16th congress (1819-21). The son received his early education at the Dutchess County Academy, and at the age of fourteen years removed with his father to Monticello, Sullivan co., N. Y. He had already written verses exhibiting some of that peculiar talent for description which characterized his works. The study of law was undertaken with the direction of his father, and after his admission to the bar he practiced for a few years at Monticello; but during the winter of 1839 he removed

to Albany, N. Y., and conducted a successful practice there. He became editor of the Albany "Northern Light" in 1843, succeeding Gen. John A. Dix, but his legal duties forced him to give up this claim in the following year. In 1848 the important office of state librarian was tendered Mr. Street. This he accepted, and retained until his death. Here he acted as librarian of the state law library at Albany from April 22, 1862, until June 8, 1868. His early occupations had been of a kind to promote the development of literary tastes, and the poems which he contributed to the magazines during his youth, gained him favorable notice. Of his later writings "The Settler" was translated into German, and "The Lost Hunter" and other poems were published in illustrated form in the United States and England. Many of his other poems were well received in England. The greatest merits of his style of writing are directness and condensation, the remarkable fidelity of his description and narrative may be best appreciated by those familiar with new settlements in our northern latitudes. Tuckerman, in an article in the "Democratic Review," said: "Street is a true Flemish painter, seizing upon objects in all their verisimilitude. As we read him, wild flowers peer up from among brown leaves, the drum of the partridge, the ripple of waters, the flicketing of autumn light, the sting of sleety snow, the cry of the plover, the roar of the winds, the melody of birds and the odor of crushed pine boughs are present to our senses. . . . He is no second hand limner, content to furnish insipid copies, but draws from reality. His pictures are graphic, detailed, never untrue, and often vigorous; he is essentially an American poet." Poe said that he was highly to be commended as a descriptive poet. A number of prose writings of the same character also appeared from his pen, such as "The Indian Pass," an account of an exploring trip through the mountainous region of northern New York. Among his publications are: "The Burning of Science, and other Poems" (1842), "Drawings and Tintings" (1844), "Fugitive Poems" (1846); "Frontenac; or, the Atotarho of the Iroquois" (1849); "The Council of Revision of the State of New York" (1850), which included a history of the courts with which the members of the council were connected, and biographical sketches; "Woods and Waters," an Avronthick descriptive piece (1860); "A Digest of Taxation in the United States" (1863); a Collection of Poems (1866), "Nature," read before Geneva (now Hobart) College in 1849, and others, read before Hamilton College in 1850 and Yale in 1851. Mr. Street was married to Elizabeth, daughter of Smith Wood, of Albany, N. Y. He died in that city, June 2, 1881.

TRACY, Charles Chapin, missionary and author, was born at East Smithfield, Pa., Oct. 31, 1838, son of Orramel and Cynthia (Kellogg) Tracy. He is a descendant of Thomas Tracy, who came to America from England and settled in Norwich, Conn., early in the seventeenth century. His mother was a daughter of Samuel Kellogg, of Poultney, Vt., the inventor of the cloth-shearing machine. He employed every moment that could be spared from hard farm work in study and fitted himself to enter a junior Williams College, where he was graduated in 1861. In 1867 he was graduated at the Theological Seminary, New York city. In 1857 he received the degree of M. A., and in 1894 that of Ph. D., from Williams. In 1867 he left America for Europe, and was stationed at Matswan, in China, 1867-70.

centre. He spent three years (1870-73) in Constantinople, where he started the first illustrated periodical for children, and published in two or three languages a series of letters addressed to parents, the object of which was to assist in correcting the many abuses and failures in Oriental family culture. He returned to Marsovan in 1873 and labored in educational work, in 1884 beginning a high school, which became Anatolia College. Of this institution he was chosen president in 1886, and is still the head. With his family and associates he was subjected to great danger during the revolutionary disturbances, and witnessed the horrible massacre of 1895. His principal book in English is entitled, "Talks on the Veranda" (1893), setting forth the principles and experiences of missionaries. Prof. Tracy was married, in 1867, to Myra A. Park, of Athens, Pa., and has four children.

MOORE, Horace Ladd, soldier, merchant and congressman, was born at Mantua, Portage co., O., Feb. 25, 1837, son of Samuel and Elizabeth (Keyes) Moore. His first American ancestor was Andrew Moore, of Windsor, Conn., and the descent runs through his son Benjamin, his son Joseph and Joseph's son, Samuel, who was the grandfather of the subject of this sketch. He was educated at Hiram College while Pres. Garfield was a teacher there, and he taught school at an early age. Removing to Kansas in 1858,

he studied law in the office of Christian & Lane, at Lawrence. Within a month of his admission to the bar he enlisted in the 2d Kansas infantry, in 1861, in the civil war. He took part in the battles of Old Fort Wayne, Cane hill, Prairie grove, Van Buren, Reed's hill and Devil's backbone; was promoted first lieutenant May 1, 1862; was commissioned lieutenant-colonel of the 4th Arkansas cavalry in February, 1864, and was mustered out of service

Salem, and then entered the employ of a Boston shipping firm, in whose interests he resided in the Philippine Islands eight years, and then, 1852, returned to the United States. He assisted in placing the Illinois Central railroad on a sound financial basis; he became a director in 1854, and was its president from Dec. 1, 1855, to July 11, 1865. In 1875-82 Mr. Osborn was a director of the Chicago, St. Louis and New Orleans railroad, a natural southern outlet for the Illinois Central, and made it one of the most valuable railroad properties in the United States. He visited Europe several times in the interests of his railroads, having many consultations with Richard Cobden, the English economist, who had invested nearly all of his money in the Illinois Central railroad in 1855. On his retirement from active business Mr. Osborn gave much of his time and means to charitable institutions, being particularly interested in the New York Society for the Relief of the Ruptured and Crippled and the Training School for Nurses at Bellevue Hospital, both in New York city. He was married, in 1854, to Virginia Reed, daughter of Jonathan and Mary (Cady) Sturges. Mr. Osborn's wife still survives him (1900), with two sons, Henry Fairfield Osborn, professor of zoölogy in Columbia University, and William Church Osborn, a lawyer in New York city. Mr. Osborn died in New York city, March 2, 1894.

OSBORN, Henry Fairfield, zoölogist and author, was born at Fairfield, Conn., Aug. 8, 1857, son of William H. and Virginia R. (Sturges) Osborn. He was educated at Lyons' Collegiate Institute, New York city, and at the College of New Jersey, where he was graduated in 1877. Immediately after graduation he accompanied the first Princeton exploring expedition to the West, and in 1878, after a year of post-graduate study in the natural sciences, was a member of the second successful expedition to Wyoming. During the following winter he studied anatomy and histology at the College of Physicians and Surgeons and at the Bellevue Hospital Medical School, New York city, and during 1879-80 resided in Europe, studying biology with Balfour, in Cambridge, and Huxley, in London. On his return to America, in 1880, he was awarded a special biological fellowship by his alma mater, and in the course of the year was appointed assistant professor. In 1881 he became professor of comparative anatomy, and held the chair for nine years, meantime, in 1886, again visiting Europe for another year of study. He accepted a call from Columbia University in 1890; to the Da Costa chair of biology, with control of the biological department to be planned by himself. At the same time he was chosen curator of vertebrate paleontology at the American Museum of Natural History, and still holds both positions. In 1891, on the organization of the faculty of pure science at Columbia, he was elected its first dean, and held the office until 1895, when he resigned to devote his time to original investigation and writing. Prof. Osborn has directed fossil exploration in the West on a large scale, and has been instrumental in the discovery and identification of numerous new species, particularly of pachyderms and reptiles, specimens of which have been placed in the American Museum of Natural History. Recently he has devoted much time to the restoration of fossil animals. In conjunction with this work, he has engaged the services of Chas. Knight, a young artist, who is well known as an animal painter. The restorations of the huge fossil animals in the shape of water-color paintings, representing as well the vegetation of the period when the animals and reptiles were living, now form an interesting series in the paleontological hall in the American Museum of Natural History. He has contributed extensively to scientific and general periodicals on subjects connected with paleontology, evolu-

H. L. Moore

June 30, 1865, at Little Rock, Ark. In 1867 he was commissioned major of the 18th Kansas cavalry, organized for service against the Indians, and participated in a four months' campaign against the Cheyennes and other hostile tribes. In the fall of 1868 he became lieutenant-colonel of the 19th Kansas cavalry, and in January, 1870, was promoted to the rank of colonel, taking the place of Col. Crawford, resigned. Later, Col. Moore turned his attention to business in Lawrence, Kan., and from 1876 until 1882 was engaged in the wholesale grocery business at Trinidad, Colo., and Albuquerque, N. M., under the firm name of Moore, Bennett & Co. Returning to Lawrence, Kan., he served as treasurer of Douglas county in 1886 and 1887. In 1892 he was elected to represent the 2d district of Kansas in the 53d congress, having been nominated by both the Democratic and People's parties. He is a Knight Templar, a member of the Washington Post, G. A. R., and of the Sons of the Revolution. He was married at Mantua, O., Sept. 16, 1864, to Esther Amelia, daughter of Capt. Samuel and Jane (Denning) Harmon, and has two sons living, Samuel A. and Frank H. Moore.

OSBORN, William Henry, merchant and railroad president, was born at Salem, Essex co., Mass., Dec. 4, 1825, son of William and Clarissa Osborn. He received a high school education at

tion and current questions of science, and has delivered many papers and addresses before learned bodies. In 1894 he published "From the Greeks to Darwin," a general history of the evolution theory, as the first volume of the "Columbia University Biological Series," edited by him, and for a number of years has been preparing, in collaboration with Prof. William B. Scott, of Princeton, a monumental work, "American Fossil Mammals." Prof. Osborn was president of the American Society of Naturalists (1891); vice-president of the American Association for the Advancement of Science, section of zoology (1892); second vice-president of the New York Academy of Sciences (1897); first vice-president (1897-98), and president (1898-1900); vice-president and chairman of the executive committee of the New York Zoological Society (1897); president of the American Morphological Society (1897), and president of the Marine Biological Association (1898-1900). He was active in founding the Zoological park in New York city, under the auspices of the New York Zoological Society. In April, 1900, he was appointed vertebrate paleontologist of the Canadian geological survey, as successor to Prof. Edward D. Cope, and in June of the same year he succeeded Prof. Othniel C. Marsh in the office of paleontologist of the U. S. geological survey. In 1880 he received the degree of Sc. D. from the College of New Jersey. He was married, Sept. 29, 1881, to Lucretia Thacher, daughter of Gen. Alexander J. Perry, U. S. A. Of their five children, two sons and two daughters survive.

WARDE, Frederick B., actor, was born in Warrington, Oxfordshire, England, Feb. 23, 1851. His father, a schoolmaster, apprenticed him to a firm of attorneys; but his tastes lay in the direction of the stage, and after frequent appearances as an amateur he made his debut as an actor as the second murderer in "Macbeth." Hard work and devotion to his calling secured advancement, and after a time he was engaged by J. L. Toole to play juvenile parts in that comedian's company, Mr. Henry Irving being at the time the leading man in that organization. Edwin Booth, while on a visit to London, was attracted by Mr. Warde's talent, and engaged him as his leading man. He came to America with Booth, appearing for the first time at Booth's Theatre, New York. He also supported Miss Charlotte Cushman during the last engagements of that favorite actress. In 1873, when Jarrett & Palmer made their splendid revival of "Julius Cæsar," Mr. Warde was selected to play Antony to the Brutus of the late E. L. Davenport. In 1875 Mr. Warde and Maurice Barrymore formed a company to play "Diplomacy." The venture proved unremunerative from the first, and ended in the shocking murder of John Porter, one of the members of the company, by a Texas desperado named Currie. After the disbandment of the "Diplomacy" company Mr. Warde was engaged as leading man by John McCullough, and remained with him for eighteen months. At the end of this period Edwin Booth offered him a similar position in his company, but Mr. Warde declined the offer and became a star on his own account. This was in 1881. Since that time Mr. Warde's advancement to a leading place among the foremost actors of his time has been gradual, but constant and uninterrupted. Since the death of John McCullough he has been acknowledged to be the best Virginius of the time, and his acting in "Richard III.," "Othello," "Macbeth" and other Shakespearean rôles is equally finished and impressive. In 1889 he was most favorably received in a revival of "Belshazzor, the Mountebank," and his creation of the chief rôle of Galba in "The Gladiator" also won him warm praise. In 1890 he was seen with Mrs. D. P. Bowens in a splen-

did revival of "Henry VIII.," and also in a comedy produced "The Lion's Mouth," a play written for him by Henry Guy Carlton. Mr. Warde's grand talents as an actor are of the first order, and his actions and impetuous, but careful and exacting, method, and never descends to rant or sentimentality, the genuineness of a character for momentary effect.

FRENCH, Pinckney, son of George and Ann Andrain county, Mo., May 10, 1852, died Feb. 10, 1900, and Melinda M. French. He received his education in the common schools of his native county, and there studied medicine with Drs. W. H. Lee and John S. Potts. He was graduated at Miami Medical College, Cincinnati, in 1873, and immediately settled in Mexico, Mo., where he rapidly built up a large practice and a reputation for high attainments. In a few years he was appointed surgeon of the Chicago and Alton railroad, and surgeon of the Wabash railroad, resigning the former position in July, 1891, to give more attention to other duties. He was elected president of the Medical Society of Andrain county in 1879 and for a number of years he was a member of the board of medical examiners of the Missouri State University. In 1882 he was elected first vice-president of the Missouri State Medical Society and was professor of surgical anatomy in the College of Physicians and Surgeons of Chicago, Ill., during 1882-83. During this time he was also associated editor of the surgical department of the "Western Medical and Surgical Reporter," of Chicago. In 1885 he visited hospitals in Europe, where he closely studied the branches of surgery. Upon his return he went to St. Louis, Mo., where he became connected with the College of Physicians and Surgeons in 1890, and was interested in the organization of the Marion-Sims College of Medicine, being elected secretary of its first board of directors, and also of its first faculty, continuing to hold the same until the spring of 1892. He is an interesting and popular teacher, plain, practical and fluent of speech, clear in expression, and is always in sympathy with his students. He was secretary of the board of directors of the Barnes Medical College, thus practically being placed at the head of the management of an institution which has grown with unparalleled success until it stands as a representative medical institution of the West. He is a member of the American Medical Association, the Missouri State Medical Association, and the St. Louis Medical Society. He is also consulting surgeon of the St. Louis City Hospital, and is professor of the principles and practice of surgery, Barnes Medical College. Dr. French was married in 1874, to Lucy P., daughter of W. B. Quasentery, of Boone county, Mo.

Pinckney French

LE CONTE, Lewis, naturalist, was born in Shrewsbury, Monmouth co., N. J., Aug. 1, 1824, second son of John Eaton and Julia S. Le Conte, uncle of John Lawrence Le Conte, naturalist, and descendant of the Huguenot, Guillaume Le Conte, who emigrated to New York in 1685. He was educated at Columbia College, and his student made a botanical exploration of the Comoro island. He was graduated in 1849, and studied medicine with Dr. David Hosack, of New York, and soon afterwards removed to

father and his brothers, William and John Eatton, were living. Mr. Le Conte was a man of unusual attainments in nearly every branch of natural science, botany, zoology, chemistry and physics being favorite studies. He also devoted considerable attention to mathematical subjects, including "magic squares." Aided by his brother, John Eatton, he introduced improvements in the culture of rice lands, and on one of his plantations established a botanical garden, which was especially rich in bulbous plants and in trees, his cannelias being famous for their size and beauty. He published nothing himself, but gave others the benefit of his observations, enriching the monographs of his brother, John Eatton, and aiding Stephen Elliott and other botanists. His manuscripts on mathematical subjects and on the animals and plants of Georgia perished during the civil war, in the burning of Columbia, S. C. He was married in Georgia, Jan. 30, 1812, to Ann Quarterman, who bore him four sons and several daughters. Their sons, John and Joseph, physicist and geologist, respectively, became professors in the University of California; Walter Le Conte Stevens, physicist, is a grandson. Lewis Le Conte died at Walthourville, Liberty co., Ga., Jan. 9, 1835.

LE CONTE, John Lawrence, naturalist, was born in New York city, May 13, 1825, son of Maj. John Eatton and Mary Ann Hampton (Lawrence) Le Conte. He is descended from Pierre

Le Conte, who lived in Monmouth county, N. J., in 1734, and whose son, John Eatton, was married to Jane Sloan, by whom he had three children, one of them being another John Eatton, the father of Dr. Le Conte. John E. Le Conte spent most of his life in New York, and entering the corps of topographical engineers of the U. S. army, with the rank of captain, remained in the government service until 1831, attaining the rank of brevet-major in 1828. "For ten years' faithful service." He was the author of many scientific works; before he entered the army published a catalogue of the plants of New York city, and during his connection with the army,

and afterwards, published special studies on various genera as well as on native grape vines, tobacco and pecan-nut. He also published a series of papers on the mammals, reptiles, batrachians and crustacea, which were mostly of a systematic character, and collected a vast amount of original material for a history of American insects. John Lawrence Le Conte, after completing a collegiate course at Mt. St. Mary's College, in Emmitsburg, Md., entered the College of Physicians and Surgeons in New York, where he was graduated in 1846. He never followed the practice of medicine to any extent, inheriting, as he did, means sufficient to make him independent. From 1848 to 1851 he made several journeys to Lake Superior and California to increase his knowledge of American fauna. In 1852 the family removed to Philadelphia, where he resided until his death. He made journeys at various times to Honduras, and Panama, the Rocky mountains, Europe, Egypt and Algiers. At the outbreak of the civil war he entered the army medical corps as surgeon of volunteers, and shortly after his enlistment was promoted to medical inspector, with the rank of lieutenant-colonel, holding his commission until the close of the war. In 1878 he entered the U. S. mint in Philadelphia, and this position he retained until his death. Dr. Le Conte's scientific taste, like that of his father, tended toward natural history, especially entomology, and while a medical student he published a

paper on twenty-odd species of Carabidæ from the eastern United States. He was a patient and original student, and published upwards of sixty monographic essays, his studies culminating in two remarkable works, in which he had the assistance of Dr. Horn: "Species of Rhyngophora" (1876) and "Classification of the Coleoptera of North America" (1883). The first was a thorough monographic revision of the rhyngophora or weevils of America, forming an entire volume of the "Proceedings" of the American Philosophical Society. This memoir not only supplied a great need in American coleopterology, but it completely revolutionized the accepted classification of the day, and its influence has been felt over a broader field than it purported to cover.

The other work was founded upon an incomplete work which the Smithsonian Institution published in 1861, and gives a general and systematic survey of all the genera and higher groups of North American coleoptera. On his work in this sphere of natural science Le Conte's claim to distinction must rest. He was a corresponding or honorary member of more than thirty societies, about equally distributed between America and Europe. He was also one of the founders of the American Entomological Society, and its president at the time of his death. He was elected, in 1874, to the presidency of the American Association for the Advancement of Science; at the time of his death had been several years vice-president of the American Philosophical Society, and was for many years a chartered member of the National Academy of Sciences. He was married, in Philadelphia, in 1861, to Helen, daughter of Judge Robert C. and Isabella (Rose) Grier, and had two sons. He died in Philadelphia, Pa., Nov. 15, 1883. John and Joseph Le Conte, of the University of California, were his cousins.

LEWIS, Loran Ludowick, jurist, was born in Cayuga county, N. Y., May 9, 1825, son of John C. and Delecta (Barbour) Lewis. His educational opportunities in early life were limited, but he fitted himself to teach in the district schools, and while engaged in teaching read law at night. He subsequently studied with Judge Hulbert, and finished his legal course in the office of Seward & Blatchford, Auburn, N. Y. He was admitted to the bar in 1848, and engaged in practice at Buffalo, N. Y., where he still (1901) resides. He has acted as counsel in many celebrated civil and criminal cases, among them the "grape sugar" case, in which he obtained a verdict of \$247,125 for his client. In 1869 he was elected to the state senate and in 1871 was re-elected, serving on the committees on canals, commerce and navigation, and internal affairs, and acting as chairman of the committee on canals in his second term. He was elected justice of the supreme court at the same time that Grover Cleveland, as candidate for governor, carried New York state by a majority of 200,000. Judge Lewis was the only Republican candidate elected. He remained on the bench from 1882 until 1896, when he reached the constitutional age limit of service in that body, and he has since been associated with his two sons as counsel. His brother, the late Dr. Dio Lewis, of Boston, was widely known as a journalist, author and lecturer on physiology and hygiene. Judge Lewis was married, June 1, 1852, to Charlotte R. Pierson. They have four children now living. His youngest son, Loran Ludowick, Jr., was born in Buffalo, N. Y., Oct. 30, 1864. He received a preliminary education in the grammar and high schools of Buffalo, and was graduated in 1887 at Williams College, and at the Buffalo Law School in 1889. He was admitted to the bar in 1889, and soon afterwards established, with George L. Lewis, his brother, and Adelbert Moot, the firm of Lewis, Moot & Lewis, which became Lewis & Lewis upon Mr. Moot's retirement in

John E. Le Conte

1895. From Jan. 1, 1894, to Feb. 1, 1895, Mr. Lewis was city attorney of Buffalo, but resigned that office to resume his private practice. He is a lecturer at the Buffalo Law School on liens and eminent domain. He was married, June 12, 1889, to Anna Maullin, daughter of Irving Brown, editor of the Albany "Law Journal." They have two children, Loran Ludowick and Loraine Lewis.

HENSHAW, John Prentiss Kewley, first P. E. bishop of Rhode Island, and forty-first in the succession of American bishops, was born at Middletown, Conn., June 13, 1792, son of Daniel and Sally (Prentiss) Henshaw. When he was about nine years of age the family removed to Middlebury, Vt., where he entered Middlebury College, and was graduated in 1808. The same year he was admitted *ad eundem gradum* at Harvard University, where he spent the following year as a resident graduate. During this time, while on a visit to his native place, he received his first deep and abiding religious impressions. Soon afterward he was baptized by the Rev. Mr. Kewley, rector of the Protestant Episcopal church at Middletown, Conn., in token of respect for whom he assumed his name as part of his own. He at once became a zealous worker in the church of his adoption, and in a short time Bishop Griswold, then recently consecrated to preside over the eastern diocese, embracing all of New England except Connecticut, went to Middlebury to extend the work begun there. He commissioned young Henshaw as a lay-reader, and by his labors in that capacity several congregations were established in different parts of the state. Feeling the need of better preparation for his work, he entered on a course of study under the direction of Bishop Griswold, at Bristol, R. I., where, still officiating as lay-reader, he was instrumental, in the absence of the bishop, in bringing about a great religious awakening in 1812. In 1814-15, though still a lay-reader, he was established for a time at Marblehead, Mass., where he labored with signal success in reviving an expiring church. He was ordained deacon by Bishop Griswold, June 13, 1813, and was called to St. Ann's Church, Brooklyn, N. Y., where he was ordained priest by Bishop Hobart, June 13, 1816. In the spring of 1817 he was called to St. Peter's Church, Baltimore, where he spent twenty-six years. His ministrations in Baltimore were attended with eminent success and happy results. He not only saved St. Peter's Church from impending ruin, but made it a centre of power. Two other places of worship were erected in Baltimore through his personal efforts, and in subsequent years the old St. Peter's was vacated, and a new St. Peter's, having a tablet to Bishop Henshaw's memory, and Grace Church, both elegant structures, were built in different parts of the old parish, while in another part of the city a Henshaw Memorial Church has been erected. In 1830 his alma mater conferred upon him the degree of D. D. Dr. Henshaw was noted for his zeal in missionary work. He was for a long time a member of the General Board of Missions, and one of the last labors of his life was to organize the Providence City Mission. At the time of his death he was one of the vice-presidents of the Theological Seminary at Alexandria, Va. He was the author of several voluminous works and many occasional pamphlets and papers, among which are "Confirmation"; "The Holy Communion"; "Didactic Theology"; "The Second Advent of Our Lord," and a "Memoir of Bishop Moore," of Virginia, who was his beloved friend. In 1843 he was chosen bishop of Rhode Island, which, after the death of Bishop Griswold, became a separate diocese, and at the same time he was elected to the rectorship of Grace Church, Providence. Both of these offices he accepted. His episcopal labors in Rhode

Island were characterized by rapid progress in all directions. He built the present spacious and stately edifice of Grace Church, and greatly extended the mission work of the state, besides occasionally laboring with great earnestness and success in various parts of the country. He was also for several years provisional bishop of the diocese of Maine. Bishop Henshaw was married, July 9, 1811, to Mary, daughter of Isaac and Sarah Gorham, of Bristol, R. I. They had eleven children. He died suddenly, near Frederick, Md., July 20, 1852.

HALE, Nathan, journalist, was born in Boston, Mass., Nov. 12, 1818, son of Nathan and Sarah P. (Everett) Hale. He was graduated at Harvard College in 1838, and pursuing his legal studies at the Harvard Law School was graduated in 1841. He was admitted to the bar in the same year, but, like his father, turned to journalistic pursuits. In 1842 he became co-editor with his father of the Boston "Advertiser," and in the same year assumed editorial charge of the Boston "Miscellany of Literature." He continued his connection with both periodicals until 1869, when he gave up editorial work to assume the professorship of mental and moral philosophy at Union College. He later became connected with his brother, Edward Everett Hale, in the publication of "Old and New." Mr. Hale died in Boston, Mass., Jan. 9, 1873.

HALE, Nathan, journalist and author was born at West Hampton, Mass., Aug. 16, 1781, son of Rev. Enoch and Octavia (Throop) Hale; grandson of Deacon Richard and Elizabeth (Strong) Hale, of Coventry, Conn.; great-grandson of Samuel and Apphia (Moody) Hale, of Newbury, Mass.; great-great-grandson of Rev. John and Sarah (Noyes) Hale, and great-great-great-grandson of Robert Hale, who came from England in 1632 and settled at Charlestown, where he was a blacksmith by trade; was deacon of the original church, and was surveyor of the new plantations until his death. Nathan Hale was named for his uncle, who was hanged by the British in New York as a spy. He was graduated at Williams College in 1804, and after serving as a tutor at Phillips Exeter Academy for two years, studied law and was admitted to the bar in Boston in 1810. He was editor of the Boston "Weekly Messenger," 1811-14, and in the latter year purchased the Boston "Advertiser," which had been established in 1813 by W. W. Clapp, and was the first daily newspaper in New England. Mr. Hale's ideas as to the scope and efficiency of a newspaper were very advanced for his day, and the "Advertiser" from the day of its first issue under his management was noted for its brief editorial comments upon the prominent men and measures of the day. These comments were the nuclei from which grew the regular "leaders" which later became a marked feature of journalism. Mr. Hale declared himself a Federalist, and the political complexion of the paper was marked from the outset. It passed through the various phases of Whig and Democratic principles, and finally became Republican; it was always influential. It loyally supported Webster, not only as the great Whig leader, but also after, when his adherents fell from him and he was left partially unsupported, to stem the growing tide of unpopularity in the North. It opposed the Missouri bill in 1820, and the Nebraska bill in 1850, and was the first newspaper to advocate the free colonization of Kansas. It was

essentially a business paper, and it paid no attention to literature or art, there being no book notices and no correspondence, either domestic or foreign. In addition to his editorial work, Mr. Hale contributed to its columns many valuable articles on political, social and economic subjects, and he was also a frequent contributor to the early numbers of the "North American Review," being one of the club which founded that journal in 1815, and the "Christian Examiner," in 1824, as a contributor to the "Review." In addition to his journalistic work he was interested in and was one of the earliest advocates of the establishment of a railroad system in New England, and, as the chairman of the board of directors of internal improvements established by the Massachusetts legislature in 1828, was the real moving spirit in causing surveys to be made and in writing reports to educate the public in railroading. Mr. Hale supplemented his work on the board by putting before the people in the columns of the "Advertiser" every detail of the trials of the Rocket, built by George Stephenson at Rainhill, and the opening of the Manchester and Liverpool railroad in 1825. The Boston and Worcester railroad was the first road in New England to use a locomotive, and of that road Mr. Hale was first president, from 1835 to 1854. He was an active member of both houses of the state legislature, rendering as such important services to his constituents, and was a delegate to two state conventions. He was a member of the American Academy of Arts and Sciences and of the Massachusetts Historical Society. In 1816 he was married to Sarah Preston, daughter of Judge Oliver Everett, of Dorchester, Mass., and sister to Edward Everett, the distinguished orator and statesman. He had four sons, Nathan, Edward Everett, Charles and Alexander Hale, and three daughters, Sarah, Lucretia Penbody and Susan Hale. Mr. Hale published a "Map of New England," considered an authority (1825); a series of maps stereotyped by a method of his own invention (1830), and numerous pamphlets on internal improvements and kindred subjects. He died at Brookline, Mass., Feb. 9, 1863.

TOMPKINS, Hamilton Bullock, lawyer, was born in Brooklyn, N. Y., July 30, 1843, son of Tillingham and Charlotte (Merrill) Tompkins. When six years of age he removed with his parents to Newport, R. I., and attended school there and at Northampton and Stockbridge, Mass., and was graduated at Hamilton College in 1865. He studied law at the University of the City of New York, and received the degree of LL. B. in 1868. He spent three years abroad, and in 1873 formed a law partnership with Charles H. Duell, in New York city. Mr. Tompkins has been identified with many business enterprises, being president of the New York and Rosen-

H. B. Tompkins

dale Cement Co. His interest in literary matters and book collecting is very strong, and he has been a director of the Redwood Library in Newport for the past twenty-five years, serving as its secretary for extended periods and also on its book, financial and other committees. He is a vice-president and director of the Newport Historical Society; a member of the New York Historical Society; the New York Biographical and Genealogical Society, and of the American Historical Society. In 1887 Mr. Tompkins published a "Bibliotheca Jeffersoniana," and in 1882 a "Burns Bibliography." His interest in his alma mater

has been continuous and active. He has established prizes and founded a library for the mathematical department, both of which have been called by his name, and in 1897 he donated fifty acres of land to the college, thus doubling its domain. Since 1892 he has been a trustee of the college, most of the time serving as chairman of the library committee. He is a member of the New York City and American Bar associations; of the University, Grotier, Reform and other clubs of New York, and of the New England Society of Mayflower Descendants; the Sons of the Revolution, and the Society of Colonial Wars. For several years he was secretary of the New York Free Trade Club, and served on the district committee of the Charity Organization Society. Mr. Tompkins was married, April 21, 1876, to Susan Livingston, daughter of Henry Ledyard, of Newport, R. I., and granddaughter of Lewis Cass. She died, childless, Oct. 11, 1877.

McCord, James, merchant, was born in Randolph county, Va., Jan. 7, 1826, son of William and Sally Moss (Field) McCord, of Irish descent. He began his life work by engaging in a country store in Calhoun, Henry co., Mo. In 1843 he entered a similar establishment at Warsaw, Mo., receiving his board and \$150, which sum was gradually increased until in 1844 he was paid \$250. While here he won the confidence of his employers to such a degree that he was sent on business trips to St. Louis and New Orleans. During this engagement he made a trip through northwest Missouri, visiting the Platte purchase, Weston, St. Joseph and Savannah in 1844. With recollections of all these places, and being now at liberty, he in 1846 formed a partnership with Abram Nave, who was then engaged in business in Savannah, Andrew co., Mo., and established a store in Oregon, Holt co., Mo. Mr. McCord left Oregon in 1849, intending to go to California by sea, but his plans were changed, and he devoted himself to buying produce and shipping it from St. Louis to New Orleans. In April, 1850, he finally set out and crossed the plains from the Missouri river to California, remaining there until 1851, when he returned home and re-engaged in business with Mr. Nave, at Savannah, Mo. In 1852, in company with Abram Nave, Charles L. Clark and D. M. Steele, he took a drove of cattle to California, and this business was continued and annual drives were made for several years. During this time Abram Nave and James McCord continued in their mercantile business in Savannah, Mo., and other places. In 1857 a wholesale grocery business was established at St. Joseph, Mo., under the name of Nave, McCord & Co.; in 1861 the firm of Nave, McCord & Co. was formed at Omaha, Neb., with Charles L. Clark, who died in 1865 as resident partner. In 1863 the firm of C. D. Smith & Co., St. Joseph, Mo., was established, the partners being Abram Nave, James McCord, D. M. Steele, and C. D. Smith as managing partner; in 1868 the firm of Leach, Nave & Co., later McCord, Nave & Co., Kansas City, Mo.; in 1871 the firm of Nave, Goddard & Co., later Nave & McCord, St. Louis, Mo. Mr. McCord is now connected with the following well-known houses: Nave-McCord Mercantile Co., St. Joseph, Mo.; McCord-Brady Co., Omaha, Neb.; McCord-Bragdon Grocery Co., Pueblo, Colo.; McCord-Collins Co., Fort Worth,

Tex.; Smith-McCord Dry Goods Co., Kansas City, Mo.; McCord Rubber Co., St. Joseph, Mo.; McCord Harlow Shoe Co., St. Joseph, Mo.; and the Nave McCord Cattle Co., with its 100,000-acre ranch in Garza county, Tex. He was married, October 5, 1854, to Mary E., daughter of Hamden and Susan M. (Steele) Hallack. They have five sons and three daughters.

STUDEBAKER, Henry, manufacturer, was born at East Berlin, Adams co., Pa., Oct. 5, 1826, sixth child of John and Rebecca (Mohler) Studabaker. On the removal of the family to Ashland county, O., in 1835, he was bound out to a black smith, and worked at the forge almost incessantly. About two years later he returned to Ashland, and worked under his father and his elder brothers, Clement and John M., until he was master of his trade; then, with the little money he had put by he bought a horse, and started for Indiana. Settling at Goshen, Elkhart co., he sold his horse, and hired himself to a blacksmith. In 1851 he joined his brother, Clement, at South Bend, Ind., and in 1852, under the name of H. & C. Studabaker, the two opened the blacksmith's shop, out of which grew the great establishment of the Studabaker Bros. Manufacturing Co. Their wagons became so popular that in six years' time the output had attained considerable magnitude; but close competition began to tell on Henry's health, and, having sold out his interest to his brother, John M., he bought a farm, and cultivated it with considerable profit to himself. Mr. Studabaker was married at South Bend, in May, 1852, to Susan, daughter of Samuel Studabaker, who died in June, 1871; he was married, second, in 1873, to Priscilla, daughter of William Kreighbaum. He died at South Bend, Ind., March 2, 1895.

STUDEBAKER, Clement, manufacturer, was born at East Berlin, Adams co., Pa., March 12, 1831, son of John and Rebecca (Mohler) Studabaker. His father, a blacksmith and wagon maker, manufactured the first Studabaker wagon, in 1818, in Adams county, Pa. He removed to Ohio when Clement was four years of age, and settled near the town of Ashland. Clement had a strong taste for study; but it was necessary for the children, of whom there were thirteen, to help in supporting the family, and until he was fourteen the only opportunities he had were those afforded by a district school, which he attended in the winter season, and by the books he could lay hands on to read at night. In 1850 he left home to seek his fortune, and reaching South Bend, Ind., took charge of a district school during the following winter. In the spring of 1851 he entered the blacksmith department of a threshing-machine factory, and, by careful saving, he was enabled to start the blacksmithing business, with his brother, Henry, as partner, in February, 1852. At odd times they worked on wagons of their own devising, and ten years later they were occupying a building especially constructed for their use, and were continuing themselves to the manufacture of wagons and carriages. In 1868 the Studabaker Bros. Manufacturing Co was incorporated, with \$75,000 capital, of which Clement Studabaker has always been president. In 1870, 140 men were employed; in 1874, 500 men, and in 1880, 900 men. Their factory at South Bend, the largest of its kind in the world, covers about ninety-five acres, and gives employment to over 2,000 hands. The yearly output is 75,000 vehicles. Branch houses and agencies have been established in all parts of the United States and other countries, fully 5,000 men being engaged in the distribution or sale of Studabaker vehicles. He was a delegate from his district to the national Republican convention in Chicago in 1880; was a delegate-at-large from Indiana to the national Republican convention in Chicago in 1888, and one of the ten delegates appointed by

Pres. Harrison to represent the United States at the Pan American congress, in Washington, 1889-90. The delegates were invited to stop at his room on their journey across the continent, but to do so before they were expected his house caught fire, and most of the interior was destroyed. Although quite seriously burned, his wife would not consent to a change of plans, and at the appointed time a bonfire was spread in the dining room of the almost ruined building. The foreign visitors were profuse in their compliments of this instance of Yankee pluck and cheerful stoicism. Mr. Studabaker was also a commissioner from Indiana to the Paris exposition, commissioner for his state for the expositions at New Orleans and at Cincinnati, and president of the board of World's fair managers for Indiana. He was president of the Carriage Builders' National Association, and has held other positions of trust and confidence; is a trustee of the Chautauque assembly, and of De Pury University, at Greencastle, Ind. To the experience gained in business-life Mr. Studabaker has added a great store of information acquired in travel in Europe.

and in his own country, for which he has a profound love, and from books, of which he is a discriminating reader. He was married to Ann M., daughter of George Millburn, of Toledo, O., who was the founder of the wagon works which still bear his name. They have two sons, George M., the secretary, and Clement Studabaker, Jr., the cashier of the company, and one daughter, Anna M., wife of C. A. Carlisle, the purchasing agent of the company.

STUDEBAKER, John Mohler, manufacturer, was born at East Berlin, Adams co., Pa., in 1831, son of John and Rebecca (Mohler) Studabaker. He grew up at home, naturally learning the trade in which his father and brothers were engaged, and when they removed to South Bend he accompanied them. In the same year, 1851, he found employment with a German, who was a maker of wheelbarrows, and having easily acquired skill in the business, went to California with a company of emigrants, in 1852, and established a factory of his own in San Francisco. Six years later he returned to South Bend, and joined his brother, Clement, in the wagon-manufacturing business, having bought out the interest of their brother, Henry. He still remains in the firm, his position being that of manager.

STUDEBAKER, Jacob F., manufacturer, was born at Ashland, Ashland co., O., May 26, 1844, youngest son of John and Rebecca (Mohler) Studabaker. His school days began in the "old seminary," which was situated where the high-school building now stands, and ended after a two-term course at the Notre-Dame University. His standing as a scholar was fair, his reputation as a shrewd butter-knife, pen-knives and marbles was so great that none dreamed of outbidding him in a transaction; and this desire to make the most of small opportunities stood him in good stead when he was old enough to purchase his brothers in business. To this natural shrewdness was added a gift of judging quickly the relative value of property and materials, and partly for this reason, partly because he had learned the carriage-trimming trade, he was placed at the head of the

carriage manufacturing department, and it was mainly through his practical knowledge and keen business foresight that this branch of the business reached such monumental proportions. For a number of years he was connected with their repository and manufactory on Wabash avenue, Chicago. Always a lover of horses, Mr. Studenaker was an authority on horse breeding, and had a large and valuable stock farm. In 1880 he organized the Percheron Horse Co., of Colorado, which imported some of the finest specimens of Percherons ever brought to America. As a business man he possessed excellent judgment; was most energetic and progressive, and was remarkably just and successful in his dealings with his employees. He was largely interested in the organization of the Agricultural Association of St. Joseph County, and was identified with a number of public enterprises. In 1864 he was married to Harriet, daughter of Samuel Chord, of South Bond, and had two daughters. He died in Chicago, Ill., Dec. 17, 1887.

APPLETON, Nathan, merchant and congressman, was born at New Ipswich, N. H., Oct. 6, 1779, son of Rev. Samuel Appleton. He was educated at Dartmouth College, but left before graduation to enter business with his brother, Samuel, in Boston, Mass., and upon reaching his majority was admitted to the firm, the name becoming S. & N. Appleton. With Francis C. Lowell, Patrick T. Jackson, Paul Moody, and others, he established, in 1813, the Waltham cotton factory, operating the first loom ever used in America. This venture proved so successful that the water-power of Pawtucket falls was soon afterward purchased. He was one of the founders of the Merrimac Manufacturing Co., as well as the projector and principal proprietor of the Hamilton Co.; and in 1821 he was one of the three founders of Lowell, Mass., the city resulting from this manufacturing settlement. In 1815 he was elected to the Massachusetts legislature, served several terms, and in 1830 represented his state in the 23d congress, being again elected, to the 28th congress, in 1842, from which he resigned. He was the author of "Remarks on Currency and Banking" (1858), as well as several speeches and essays on finance, commerce and the tariff; and he also wrote an account of the introduction of the power loom, and of the origin of Lowell, Mass. Mr. Appleton was a member of the Academy of Sciences and Arts, and of the Massachusetts Historical Society, and though he acquired great wealth, was a man of benevolence. His death occurred in Boston, July 14, 1861.

CARROLL, Charles, patriot, was the son of Charles Carroll, a native of Ireland, who came to Maryland in 1715, and accumulated an immense estate, including Carroll's island; Mount Clare, now Carroll park, near Baltimore; Claremont, The Plains, near Annapolis, and "The Caves," the present residence of his descendant, Gen. John Carroll. Dr. Carroll, as he was called, was prominent in the public affairs of Maryland. He was a member of the lower house in 1737, and a representative from Annapolis to the house of delegates in 1745. He was twice married; first, to Dorothy, daughter of Charles Blake; second, to Henrietta, daughter of Philemon Lloyd, and had two children. The daughter, Mary Clare, became the wife of Nicholas Maccubbin. His son (by his first wife), Charles, was born in Annapolis, Md., March 22, 1723, and was educated in England. He was one of the most trusted leaders of the people before

and during the revolution. He served on every important committee in the conventions of Maryland, and framed many important state documents and public papers, among them the "Declaration of Rights," adopted by the convention of Maryland, Nov. 3, 1776. In December, 1774, he was appointed by the convention of Maryland one of the committee on correspondence. At a meeting of the delegates in Annapolis, in August, 1775 he was made one of the council of safety. He presided at the conventions held in December, 1775, and January, 1776. He was president of the Maryland convention, held in Annapolis from May 8 to 25, 1776, and was again elected by it one of the council of safety. It was this convention that relieved Gov. Robert Eden of his office and requested him to leave the province. He was an active member of the convention of June 21, that voted to declare "the united colonies free and independent states," and on July 5th was re-elected one of the council of safety. On Aug. 17th he was one of the "seven most distinguished patriots of Maryland" chosen to prepare a declaration and charter of rights and a form of government for the state of Maryland. On Nov. 10, 1776, he was elected to congress, taking the place of his cousin, Charles Carroll, of Carrollton. In 1777, having declined the chief judgeship of the general court, he was elected representative to the first state senate, and held this office until his death. He was married, June 3, 1763, to Margaret, daughter of the Hon. Matthew Tilghman, and, leaving no children, willed his large estate to the two sons of his sister, Mary Clare (Carroll) Maccubbin, upon condition that they adopt his name of Carroll, and "use the coat of arms forever after." He died at his residence, Mount Clare, near Baltimore, March 23, 1783.

DRESSER, Horatio Willis, editor and author, was born at Yarmouth, Cumberland co., Me., Jan. 15, 1866, son of Julius A. and Annetta G. (Seabury) Dresser, of English descent. His father edited a newspaper in Webster, Mass., and later in Danville, N. Y., Denver, Col., and Oakland, Cal., where the son attended school. Financial necessities compelled him to leave school at the age of thirteen and to learn a trade, and having chosen telegraphy, he, at the age of sixteen, took charge of a railroad station at Pinole, Cal., on the Central Pacific. Removing to Boston, Mass., in 1882, he became a reporter, and later business manager of the "New England Farmer," meanwhile giving as much time as possible to general reading. He fitted himself for Harvard, though he had never attended a high school, and matriculated there in 1891; but owing to the death of his father he left college during his junior year, and took up the work of writing and lecturing. He has been a serious student of Emerson since the age of seventeen, and intensely fond of philosophy. In October, 1896, he founded the "Journal of Practical Metaphysics," and this periodical he edited until 1898, when it was consolidated with "The Arena," of which Mr. Dresser was for a time associate editor. In December, 1899, he founded "The Higher Law," a periodical of advanced ideals, which he still conducts. His published works include: "The Power of Silence: An Interpretation of Life in Its Relation to Health and Happiness" (1895; 10th ed., 1900); "The Perfect Whole: An Essay on the Conduct and Meaning of Life" (1896); "In Search of a Soul: Essays in Interpretation of the

Charles Carroll

N. Appleton

Higher Nature of Man" (1897). "Voices of Hope and Other Messages from the Hills: A Series of Essays on the Problem of Life, Optimism and the Christ" (1898). "Methods and Problems of Spiritual Healing" (1899). "Education and the Philosophical Ideal" (1900). "Voices of Freedom" (1900). "The Christ Ideal" (1901). Mr. Dresser's thought has been described as unifying the best teachings of all schools and sects. "It appeals to orthodox believers, as well as to free-thinkers, Quakers, Unitarians, scientific and philosophical students, and to those who recognize a truth in the theory of mental healing, but who are wholly repelled by Christian Science."

Horatio W. Dresser

Of his "Education and the Philosophical Ideal" a reviewer has said: "It views education as a process of soul development, rather than as formal instruction of the intellect. . . . While some of the philosophical tenets of the author may not stand the test of future experiment and research, yet his volume will vastly help all those who are toiling in educational work. It breathes hope and victory. It is full of helpful, practical considerations that give direction and power to its theories." His "Living by the Spirit" (1900), probably his most valuable work, is described as "A thoughtful little book addressed to devotional minds, urging considerations which make for quiet and peace and restfulness in the midst of external distractions, full of the sense of God's presence and power in human life, independent of theological forms and phrases." Mr. Dresser was married in Boston, Mass., March, 1898, to Alice Mae, daughter of Elliott and Betsey H. (Gregory) Reel.

EGAN, Maurice Francis, educator and author, was born in Philadelphia, Pa., May 24, 1852, son of Maurice F. and Margaret (MacMullen) Egan. He was carefully educated during his early youth at private schools and by tutors, and while still very young began to prepare himself for the career of a man of letters. He was graduated at La Salle College, Philadelphia (R. C.), and in 1878 was made professor of English literature at Georgetown College, District of Columbia. While there he made his first literary ventures, and his books won such immediate success that he abandoned the study of law, which he had just begun, and determined to devote himself entirely to literary pursuits. While writing his independent works he also engaged in journalism, and served in succession as assistant editor on the staffs of Henry Peterson's "Saturday Evening Post," "McGee's Weekly," "The Catholic Review," and the New York "Freeman's Journal," becoming editor in chief of this last in 1885. For a number of years he also traveled as a press correspondent in the western and southern states and Mexico. He was appointed professor of English literature at the University of Notre Dame, Indiana, in 1888, but for several years has held the same chair in the Catholic University, Washington, D. C. His sonnets, "Theocritus," "Maurice de Guérin," "Of Flowers," have been printed in nearly all the anthologies, and their author is regarded as a master of this delicate form of verse. His writings are: "That Girl of Mine" (1877); "That Lover of Mine" (1877); "Preludes," poems (1879). "A Garden of

Roses" (1885). "Stories of Duty" (1885). "Sonnets and Sonnets" (1885, enlarged ed., 1897). "Life in the Around Us" (1886). "The Theatre and the Children's Parents" (1887). "Modern Novels" (1888). "Lectures on English Literature" (1889). "The Disappearance of John Longworth" (1890). "A Pattern of English Literature" (1892). "Songs and Sermons and Other Poems" (1892). "A Gentleman's Song" (1893). "Marriage of Reason" (1895). "The Story of Patrick Desmond" (1891). "The Flower of the Park" (1894). "The Badgers of Belmont" (1894). "The Voyage of Edward Conway" (1896). "Jack Chindler, or A Story for Boys" (1897). "Jasper Thorn, A Story for Boys" (1897). "From the Land of St. Lawrence" (1898). "In a Brazilian Forest" (1898, introduction by Maxzon's "Bethrothal" in "The World's Great Books" (1898). "The Leopard of Lemuria and Other Tales" (1899). "Studies in Literature" (1901). "The Watson Girls" (1901). He is a member of the Cosmos Club of Washington and Association of New York. His wife was Katharine Mullen of Philadelphia.

CAMPBELL, John Lorne, son of Anne, was born at Dominionville, Ontario, Jan. 11, 1815, son of Peter and Flora Campbell. His grandfather, Matthew Campbell, emigrated to Canada from Scotland in 1818. His early education was received in the country schools, and after teaching for two years, attended Woodstock College, Ontario, being graduated in 1838. He was ordained to the Baptist ministry in A. T. 1840 that year, and became pastor of a church at Queen's, Ontario, organized the same day. In 1836 he returned to a lighter charge at Dundas, Ontario, and in 1878 went to the St. Catherine St. Baptist church at Montreal. He was also secretary of the Baptist Foreign Missionary Society of Ontario and Quebec in 1872-79, resigning in the latter year to pursue his studies at Toronto University, having obtained a pass degree in the neighborhood of that city. He was graduated at the university in 1883 with high honors, taking the degree of B. A. In the following spring he accepted a call to the Baptist church of Nyack, N. Y., which, during the four years of his pastorate, reached the highest point of prosperity in all its history. After being engaged for a short time in mission work in Brooklyn, N. Y., where he was very successful, in April, 1889, he entered upon his present pastorate of the Lexington Avenue Baptist Church, New York city (1901), then greatly reduced in numbers, and with finances much depleted. Under him the church has thrived. Nearly 1,300 new members have been received, and the organization has grown to be one of the largest and most aggressive in the city, its diversity of work keeping the building open almost every afternoon and evening, and the eloquence of the sermons crowding the edifice so that large numbers are often turned away. During a vacation, in 1898, Dr. Campbell conducted a large party through Egypt, Palestine, Asia Minor, Constantinople, Greece, Italy and other parts of Europe. In 1899 and in 1901 he preached by invitation, in London, England. He is a contributor to religious periodicals and the author of "Heavenly Recognition, and Other Sermons" (1895), and a treatise, "Sanctification" (1901). The degree of D. D. was conferred upon him by the Central University of Iowa in 1893. Dr. Campbell was married, Aug. 27, 1868, to Maggie C., daughter of Archibald and Janet (McCallum) McIntyre, of Dominionville, Ontario. They have one son and one daughter. Mr. g.

J. R. Campbell

WHITMAN, Marcus, missionary and pioneer, was born at Rutshville, Yates co., N. Y., Sept. 4, 1802, son of Beza and Alice (Green) Whitman, and a descendant of John Whitman, who came from Norfolk, England, to New England, in 1635, in the Confidence, and settled at Bridgewater, Mass. For some years Marcus Whitman lived with his grandfather, Deacon Samuel Whitman, at Plainfield, Mass., and studied under Rev. Moses Hallock, the noted teacher. Returning to his native place, he united with the Congregational church and began to prepare for the ministry, but was persuaded by his brother to take up medicine instead. After graduating at the Fairfield Medical Institute, he practiced in Canada for four years and in 1828 settled at Wheeler, N. Y., where he became a ruling elder in the Presbyterian church. In 1835 the American Board of Commissioners for Foreign Missions commissioned Rev. Samuel Parker, of Massachusetts, to explore the country beyond the Mississippi and the Rocky mountains for the purpose of ascertaining the condition and character of the Indian tribes and the facilities for introducing the Gospel and civilization among them. Dr. Parker received Mr. Whitman as an assistant, and proceeding to St. Louis, they joined a convoy of the American Fur Co. At the trading rendezvous at Green river, in the present state of Wyoming, they found some Indians of the

Flathead and Nez Percés tribes, who seemed so interested in their project and so ready to have a mission established among their people that Dr. Whitman proposed to return immediately to the states and organize a mission to come out the following summer. This would save a year. Dr. Parker consented and went on his way to select sites for stations, while Dr. Whitman went back to New York. In February, 1836, he was married at Prattsburg, N. Y., to Narcissa, daughter of Judge Stephen Prentiss, and in

March, of that year, with Rev. Henry H. Spalding and W. H. Gray, they set out for Oregon. After a circuitous journey they overtook at Loup fort, in what is now Nebraska, one of the Fur Co.'s trains, and reached Fort Walla Walla on the river of that name in September. Owing to the ill-health of Mrs. Spalding, Dr. Whitman persisted in retaining a wagon as long as possible, at Fort Hall transforming it into a two-wheeled cart, which he was able to take as far as Fort Boise. He established himself among the Cayuse Indians at Waiilatpu, not far from Walla Walla, where he built a grist mill, opened a school and induced many of the Indians to till the soil, while in addition to teaching he engaged in medical work. In 1842 the Board transferred him to the station near Fort Colville. The Oregon missionaries were most perplexed and distressed at this decision. The influx of immigrants and the activity of Roman Catholic missionaries convinced them that it would be unwise and perhaps a fatal blow to the interests of Protestantism in that region to abandon the southern station and at their fall meeting discussed the question carefully. Just as the meeting was closing, Dr. Whitman made the startling proposal that he should return to the United States to secure a reversal of the order, additional helpers and, if possible, a few families to form the nucleus around the mission of a Christian community and undertake the secular work that heavily burdened

the missionaries. His associates reluctantly consented and at the risk of his life he undertook a winter journey to the East and with two companions, an American, Amos L. Lovejoy, and an Indian guide crossed the mountains and, after tarrying at St. Louis for a few days, proceeded to Boston, which he reached March 30, 1843. He persuaded the Mission Board to continue the stations at Waiilatpu and Clearwater, but, owing to the shortness of the time at his disposal, was not able to recruit the families he needed. He had, however, by a pamphlet and by newspaper articles, called attention to the fertility and resources of Oregon, and on his return journey joined a large emigrant train, the first that ever crossed the continent, and served as its guide and medical attendant from Fort Hall to the Walla Walla valley. The work of a medical missionary was one of peculiar peril among the Indians, owing to their associating medicine with witchcraft. In 1847 an epidemic of measles was unusually fatal among the Cayuses. Their apprehensions had been aroused by the steadily increasing immigration, and when Dr. Whitman's medicines proved ineffectual they suspected him of poisoning them, and resolved to destroy the mission at Waiilatpu. On Nov. 29, 1847, Dr. and Mrs. Whitman and fourteen others were cruelly massacred, and forty-seven persons, mostly immigrants, were taken captive. These were ransomed later by the efforts of the Hudson Bay Co. officers. Dr. Whitman was a man of indefatigable energy and resolution and devoted to the interests of Oregon and of his mission. He looked back with especial satisfaction to the assistance he was able to render the immigration of 1843, and felt that in promoting its success he had done much to secure Oregon to the United States. The contemporary authorities for his missionary labors are the files of the "Missionary Herald" and the reports of the American Board from 1836 to 1838. The story of his journey east in 1842, as given by Gray in his "History of Oregon," by Barrows in his "Oregon," and by Nixon in "How Marcus Whitman Saved Oregon," and as detailed in many other books and magazine articles, is fictitious. It was invented about twenty years later, in every important element is without contemporary evidence, and in several is contrary to known facts. Briefly told, it is to the effect that having discovered a plot on the part of the Hudson Bay Co. to seize Oregon for England by colonizing it from Canada, Whitman went to the States to secure immigrants who would establish strong American colonies there, and to expose the plot to Pres. Tyler. He arrived in Washington, according to the story, to find the government about to barter Oregon for the Newfoundland fisheries, and he convinced the president of the fertility of Oregon and its importance as a national possession. The account given in Bancroft's "Oregon," written by Mrs. Frances A. Victor, may be relied on, and a critical examination of its fictitious character by Prof. Bourne, of Yale, may be found in the "American Historical Review" for January, 1901. Whitman College, at Walla Walla, and Whitman county perpetuate the name of this zealous man. The accompanying illustration represents the head of a statue of Whitman which adorns the Witherspoon building in Philadelphia.

O'BRIEN, Jeremiah, patriot, was born at Scarborough, Cumberland co., Me., in 1744, eldest son of Maurice and Mary (Kane) O'Brien. His father, a native of Cork, Ireland, removed with his family from Scarborough to Machias in 1765. On June 2, 1775, there arrived in the harbor an armed British schooner, the Margaretta, Capt. Moore, with about forty men, conveying two sloops from Boston, the Unity and the Polly, under Capt. Ichabod Jones. On learning that a liberty pole had been erected by the people of

Machias. Capt. Moore ordered it to be removed or he would fire upon the town. The citizens refused, whereupon Jones persuaded Moore to wait until June 14th, when he said, final action would be taken. Meanwhile it was decided to seize the vessels and likewise Capt. Moore and his men while they were attending church on the following Sunday, June 11th. They escaped, however, Jones taking to the woods and Moore and his associates proceeding down the river on the *Margaretta*. On the 12th O'Brien and about forty others started in pursuit in the sloop *Unity*, of which he was chosen commander; some being armed with pitch-forks and axes, a few having muskets, and the *Unity* carrying but a single gun. The *Margaretta* carried sixteen swivels and four four-pounders. The plan of the patriots was to board the schooner and have the battle on her deck; and refusing Moore's command to keep off or he would fire, Jeremiah O'Brien shouted back a demand to surrender. In stead of using his large guns Moore stood out to sea, but the *Unity* soon collided with her, and O'Brien's brother, John, sprang on her deck. A discharge from the *Unity*'s gun killed the helmsman of the *Margaretta*; the schooner came to and her mainsail was run through by the sloop's bowsprit. Capt. Moore was mortally wounded, and the American's ammunition having given out, about twenty boarded the *Margaretta* and overcame the crew in a hand-to-hand fight. Five of the latter were killed or mortally wounded; while one was killed, one mortally and one seriously wounded on the *Unity*. This engagement, although occurring before the provincial congress of Massachusetts authorized such proceedings, was the first naval battle of the war. The *Unity*, equipped with the armament of the *Margaretta* and fitted with bulwarks, was named the *Machias Liberty*, and under Jeremiah O'Brien made an unsuccessful search in the bay of Fundy for the *Diligence*, a British coast-survey vessel. On July 14th the *Diligence* and the *Tatnagouche*, an armed tender, came into Machias river, hoping to retake the *Margaretta*; but Capt. Knight and his crew having landed and been taken prisoners, the vessels surrendered to Capt. O'Brien of the *Liberty* and Capt. Foster of the *Falmouth Packet*. Meanwhile these brave men had received the thanks of the provincial congress. In the course of three weeks a flotilla with several hundred men was sent from Halifax against Machias; but an attack made on a breast-work at Scott's point, below the town, was repulsed by the Americans under O'Brien and Foster, and the British were driven to their ships and sailed away. Later in the year the *Liberty* and the *Diligence* were commissioned, and the former, having Jeremiah O'Brien as captain and his brother, William, as lieutenant, cruised for two years on the northern coast, capturing vessels bringing supplies to the British army and causing other losses to the enemy. In 1780 O'Brien, in the *Hannibal*, was captured by two frigates off New York, and was transferred to Mill prison, England, where he remained for a number of months. He escaped to France, and at the close of the war returned to his native country. After living at Brunswick, Me., he went back to Machias, and was the first collector of its port. The fame of the patriotic brothers is perpetuated by Fort O'Brien, at Machias, and by a government torpedo boat, launched in 1898. Congress in 1892 named a gun boat the *Machias* to commemorate the naval battle of 1775. Jeremiah O'Brien was married to Elizabeth Fitz Herbert, of Nova Scotia, who died without issue. He died at Machias in September, 1818.

O'BRIEN, John, privateersman, was born at Scarborough, Me., in 1750, third son of Maurice and Mary (Kane) O'Brien. He was one of the party commanded by his brother, Jeremiah, which in June, 1775, captured the British schooner *Margaretta*, off

Machias. The sloop *Unity*, in which they made their attack, no sooner collided with the *Margaretta* than John O'Brien was on board, the only one to reach the deck, and as if bearing a charmed life, he escaped the bullets from several muskets, eluded the crew who charged upon him with their bayonets, and jumping overboard reached the sloop in safety. He took part in the hand-to-hand fight that followed, and was put in command of the force which marched the prisoners overland to Cambridge, Mass., delivering them to Gen. Washington, and receiving the commendation of the provincial congress. Later in the year he became second lieutenant on the *Diligence*, which his brother, Jeremiah, had captured from the enemy. He was fortunate in capturing a store-ship, and its contents, clothing and provisions, went far toward relieving the needs of the army at Cambridge. Afterwards with others at Newburyport, Mass., he fitted out the *Hannibal*, which he commanded for one voyage, subsequently he was captain of the ship *Holdersess*, the brigantine *Adventure* and in 1779 of the fast sailing brig *Helbania*, sailing from Newburyport. He made many captures, including an armed vessel, the *Gen. Patton*, conveying a number of British officers from New York to England, and a West Indianman, part of whose cargo was an immense Christmas pie intended for the governor of one of the islands. On one occasion he was overmatched by a 74-gun ship and was chased through Long Island sound to the Thames, up which he ran at nightfall, the frigate remaining at the river's mouth, the wind having died away. During the night, which was very dark, Capt. O'Brien took a hoghead, broke out several staves, and inserting about ten feet of spar, to which he had fastened a light, set it afloat. The frigate fired upon the approaching craft, and soon after its captain, probably supposing he had sunk the Yankee vessel, sailed away,

giving O'Brien opportunity to escape. After the war John O'Brien settled in Newburyport and was a ship owner and captain; but early in the nineteenth century he removed to Brunswick, Me., where his daughter, Mary (Mrs. Robert Dunning) lived. He was a man of public affairs, was charitable, exercised a large hospitality, and by his contemporaries was said to have no idea of the meaning of fear. He was married to Hannah Tappan, and had six children. Their daughter, Maria, was married to Rev. Jeremiah Chaplin, president of Waterville College, Maine. Their son, John (1790-1866), was a captain of marines during the war of 1812, and being taken prisoner was confined in a prison at Chatham, England, for ten months. Later in life he left the sea and was superintendent of the dead letter office at Washington. His wife was Bath Page, daughter of Dr. Alpheus Bradbury, of Fryeburg, Me. Capt. John O'Brien, Sr., died at Brunswick, Me., Oct. 21 1826. Gideon, second son of Maurice O'Brien and brother of Capt. John O'Brien, Sr., born at Scarborough, Jan. 14 1746, received a captain's commission in the Continental army in 1782 and was detailed at Machias, his regiment being the third in Lincoln county. In 1822 he was elected a representative to the Maine legislature. By his wife, Abigail Tupper, of Lebanon, Me., he had ten children. William, fourth son of Maurice O'Brien, 2d, ways followed the sea, and died at Bilbao, Spain, in 1781. He was married at Newburyport in 1780 to Lydia Clarkson, widow of Amos Paine. Their

daughter, Lydia, became the mother of Hon. John P. Hale, of Maine. Dennis, fifth son of Maurice O'Brien, born at Kittery, was married to Isabella Andrews, and removed to Philadelphia, where he died, leaving one son.

ALBRIGHT, Jacob, clergyman, was born at Pottstown, Montgomery co., Pa., May 1, 1759. His parents, natives of Germany, were members of the Lutheran church, in which faith they educated their son. He removed to Lancaster county in his youth and for some time followed the business of a fileburner. In 1790 he was converted and united with the Methodist Episcopal church.

At that time no services in German had been provided by the Methodist church, and he, being deeply interested in the religious welfare of his German brethren, commenced holding meetings in the German language in 1796. He soon organized societies according to the system of the Methodist church, and in 1800 several of them existed. In a few years, as helpers were brought under his ministry, a district was formed and he became a

presiding elder. As the number of ministers and members increased a conference was organized in 1807 and he was elected bishop. A certificate of ordination issued by him in 1807 shows that his followers were known as "New Methodists." The denomination is now known as the Evangelical Association. About six months after the organization of this conference he died, in March, 1808.

FLANDERS, Henry, lawyer and author, was born at Plainfield, Sullivan co., N. H., Feb. 13, 1824, son of Charles and Lucretia (Kingsbury) Flanders. He is a direct descendant of Stephen and John Flanders, who came to America from England between 1640 and 1646, settling in Massachusetts. His father was graduated at Harvard in 1808, and was a prominent member of the New Hampshire bar. His mother's ancestors came to America during the Puritan emigration under Gov. Winthrop. Henry Flanders was educated at Kimball Academy and at the seminary at Newbury, Vt. In 1842 he commenced the study of law under his father and was admitted to the bar in 1845. In 1850 he settled in Philadelphia, Pa., where he has since practiced. In 1858 he published "Lives of the Chief Justices of the Supreme Court of the United States," which was followed in 1860 by "Exposition of the Constitution of the United States." He also is author of "Treatise on Maritime Law" (1852); "Treatise on the Law of Shipping" (1853); "Observations on Reconstruction" (1866); "A Treatise on the Law of Fire Insurance" (1871), and a romance, "The Adventures of a Virginian" (1881), published under the pseudonym Oliver Thurston.

DOWNING, Charles, horticulturist, was born at Newburgh, Orange co., N. Y., July 9, 1802, eldest son of Samuel and Eunice (Bridge) Downing. His father was a native of Lynn; his mother, daughter of Francis and Eunice (Brown) Bridge, of Lexington, Mass., was descended from John Bridge, the Puritan, one of the earliest settlers of Cambridge, Mass., whose statue in bronze stands on the common in that city. Samuel Downing, upon his marriage, removed from Lexington, Mass., to Newburgh, and thence to Montgomery, intending to pursue his trade of carriage making at that place; but owing to ill-health he returned to Newburgh and became a nurseryman. The early life of Charles Downing was passed under the careful training of his father and in attendance upon common schools. Before he had attained his majority his father died, and the responsibility of conducting the nurseries

and the support of the family to a large degree devolved upon him. In 1837, leaving the home place in charge of his brother, Andrew J. Downing, he removed to the out-kirts of the city, where he continued in the nursery business thirty years. Naturally of a penetrating and inquiring mind, he studied closely the forms, varieties and qualities of the different fruits that came under his observation, and by careful investigation, experimenting and proving he was enabled to improve many varieties of fruits and to originate others, some of which bear his name to this day. Charles had delighted more in the cultivation, study and growth of those things of which his brother wrote; but in the latter part of his life he became a regular contributor to periodicals, and twice he revised "The Fruits and Fruit Trees of America," originally written by his brother, and after the last revision added two appendices, making the volume twice the original size. This great work has passed through many editions, and became a classic, and is regarded as the highest authority on the subjects of which it treats. In his chosen field he became renowned; from all parts of the land his advice and judgment were sought, and fruits were sent to him to prove their nomenclature and characteristics. As a result of his labors Newburgh became the centre of a great fruit-growing district, which has produced men who have earned distinction in this field, all of whom looked to Downing as a master. As a pomologist he had no superior; in the department of nomenclature, no rival. Mr. Downing was a modest, unassuming man; an attentive listener at meetings of horticulturists; but rarely known to speak unless asked to, and then in the briefest and most direct manner. He was married, Sept. 20, 1830, to Mary, daughter of Samuel Wait, of Montgomery, N. Y., but had no children. He died at Newburgh, Jan. 18, 1885.

DOWNING, Andrew Jackson, landscape gardener, was born at Newburgh, N. Y., Oct. 30, 1815, youngest of five children of Samuel and Eunice (Bridge) Downing. He attended an academy at Montgomery, near Newburgh, until the age of sixteen, when he returned and joined his brother, Charles, in the management of the nursery founded by their father. He early became interested in the subjects of botany and mineralogy, and his spare time was spent in rambling over the country, alone or with congenial friends, preparing himself for his life's career.

In his excursions in the neighborhood he formed the acquaintance of Baron de Liden, the Austrian consul-general; Mr. Hark, an English artist, and other men, whose homes he visited, and thus spent several years in self-education. He began his career as a landscape gardener at his own home, on the Hudson. The house was an elegant mansion in the Elizabethan style, and the grounds were beautifully laid out according to his own ideas. George William Curtis, who knew him personally, wrote: "His home was his first work. It was materially beautiful and spiritually bright with the purest light of affection. Its hospitality was gracious and graceful." In 1850 Downing went to England, and visited the famous country seats which are described in his publications. In 1851 he was commissioned to lay out and plant the public grounds of the capitol, the White House and the Smithsonian Institution buildings in Washington. His first writings were a discussion of novel reading and some botanical papers, which were contributed to a Boston journal. In 1841 he published "Treatise and Practice of Land-

scape Gardening," which met with immediate success and brought him many orders for the construction of houses and arrangement of grounds. His other books are: "Cottage Residences" (1842); "Fruits and Fruit Trees of America" (1845); "Additional Notes and Hints to Persons About Building in the Country," which appeared in an American reprint of Wightwick's "Hints to Young Architects" (1849); "Architecture for County Houses, Including Designs for Cottages, Farm-Houses and Villas" (1850), and an edition of Mrs. London's "Landscape Gardening for Ladies" (1850). In 1846 Mr. Downing became editor of the "Horticulturist," published in Albany, N. Y., contributing an essay each month for the remainder of his life. These essays were collected and published separately in 1853, with a memoir by George William Curtis. Downing was the pioneer in the development of rural art in America, and to him is due the movement, reaching throughout the country, for the improvement of American homes. A contributor to the New York "Independent" wrote of him: "Whoever has a set of the old 'Horticulturist' will be likely to hold it merely as an illustration of what a single man can do in a neglected class of literature. This was the product of the genius of A. J. Downing, a man gifted, as few men are, to be at the same time thorough and not above the comprehension of the people. The result of his essays was a great public awakening for purer art in horticulture and home-culture. Among his best known pupils, or coadjutors and successors, were Meacham, Barry, Wilder, Warder, Campbell, Scott. In fact, go where you might in the United States, the influence of Downing was stirring the people to think of nature, and to become natural in planting gardens and lawns—in other words, in creating their homes." On June 7, 1838, he was married to Caroline, eldest daughter of John Peter De Wint. They had no children. He lost his life by the burning of the steamer Henry Clay, on the Hudson river, July 28, 1852. Downing park in Newburgh commemorates the names and work of his brother, Charles, and himself.

GILMER, John Alexander, jurist and senator, was born in Guilford county, N. C., Nov. 4, 1805.

He received a classical education at winter-schools, working on a farm during the summer months. He taught school and thus obtained the means to study at the academy at Greensboro for three years, becoming a good linguist and mathematician. He taught school again for three years, studied law and was admitted to the bar in 1832. In 1846 he was elected to the state senate, and was successively re-elected until 1856. He was elected a representative to the 35th congress, serving as a member of the committee on elections, and in 1856 was a Whig candidate for governor of North

Carolina, but was defeated. He was re-elected to the 36th congress and made chairman of the committee on elections, withdrawing in 1861. Mr. Gilmer was mentioned for a place in Mr. Lincoln's cabinet, but he embraced the cause of secession, and was elected a member of the Confederate congress. He was, however, a delegate to the National Union, or Loyalists', convention of 1860. He died at Greensboro, N. C., May 14, 1868.

WILGUS, William John, civil engineer, was born in Buffalo, Erie co., N. Y., Nov. 20, 1865.

eldest son of Frank Augustus and Margaret (Woodcock) Wilgus. He was graduated at the Central high school of Buffalo in 1883, receiving an academic diploma from the regents of the University of the State of New York. He then studied civil engineering, and in 1885 became a draughtsman and rodman for the Minnesota and Northwestern railroad (afterward the Chicago Great Western railway). He rose in the service of that company through various stages to the position of division engineer, in 1890, and had charge of the designing and construction of

extensive railroad terminals at Minneapolis and East Minneapolis, Minn., and at St. Joseph and Kansas City, Mo. He also constructed the railroad extension from St. Joseph to Leavenworth, Kan., in 1890. In 1890 Mr. Wilgus was appointed locating engineer for the Duluth and Winnipeg railroad, and in 1891-92 he was in charge of the construction of the Chicago Union Transfer railway in Chicago, Ill. In 1892 he surveyed the line for the extension of the Duluth and Iron Range railroad from Embarrass lake westerly over the Mesaba range. In 1893-97 he was assistant engineer of the Rome, Watertown and Ogdensburg railroad, having charge of the engineering on that division of the New York Central and Hudson river railroad system. At the same time he had charge of the designing and construction of the Terminal railway of Buffalo from Depew to West Seneca, N. Y. In 1897 he became resident engineer of the New York Central and Hudson River railroad, with headquarters in New York city, and in 1898 chief assistant engineer. In 1898-99 he was engineer of maintenance of way. He became chief engineer of the railroad in 1899, and still holds that position (1901). Mr. Wilgus, as chief engineer, has made improvements in the railroad company's piers and bulkheads and in the Grand Central station, New York city; built new bridges over the Harlem ship canal, New York city, and over the Hudson river at Albany, N. Y., and made many other station and bridge improvements along the main line and branches of the road. His department has jurisdiction over the track, bridge, buildings and other property of the company, comprising about 6,000 miles of road, and gives employment to about 10,000 men. He is a member of the Sons of the American Revolution; the American Society of Civil Engineers; the Civil Engineers' Society of St. Paul, Minn.; the Railway Engineering and Maintenance of Way Association, and the Transportation Club of New York city. He was married, March 1, 1892, to May, daughter of John Z. and Maria (Cox) Reed, of Avon, N. Y. They have one son and one daughter.

DAVIS, John Chandler Bancroft, lawyer and diplomat, was born at Worcester, Mass., Dec. 29, 1822, eldest son of John and Eliza (Bancroft) Davis. His father was four times elected governor of

Massachusetts; his mother was a sister of George Bancroft, the historian. His earliest American ancestor was Dolor Davis, of Kent, England, who came to this country in the early part of the eighteenth century. Young Davis was educated in the public schools of Worcester, and at Harvard, where he was graduated in 1810, after which he studied law, and was admitted to the bar of Worcester in 1814. Upon his appointment, in 1819, by Pres. Taylor as secretary of the U. S. legation in London, he gave up his practice, and repaired to that post. He served as charge d'affaires between the departure of Mr. Bancroft and the arrival of his successor, Abbott Lawrence, and then as secretary of the legation until 1852, when he resigned. Mr. Davis returned to the United States, and carried on his practice until 1862, when he retired, owing to ill-health, and spent two years on the Riviera; then resided at Newburgh, N. Y., until 1869. He was chosen a member of the New York legislature in 1869, but during his term of office was called by Pres. Grant to serve as assistant secretary of state, under Hamilton Fish. During his incumbency of that office he acted as arbitrator in the dispute between Portugal and Great Britain concerning their possessions in Africa, and as the American secretary of the joint high commission to settle the disputes between Great Britain and the United States. He prepared, by direction of the secretary of state, the "Case of the United States," for submission before the tribunal of arbitration at Geneva, to determine the Alabama claims, and served as the U. S. political agent for managing and conducting its business there, having resigned his assistant secretaryship for that purpose. Upon his return from this mission, in 1873, he was reappointed assistant secretary, and seven months later was appointed U. S. minister to Germany, which position he resigned in 1877. Returning to this country the same year, he was for four years judge of the U. S. court of claims, and, at the request of Pres. Arthur, resigned this

J. C. Bancroft Davis

post to serve six months as assistant secretary of state under Frederick T. Frelinghuysen. He was reappointed to the court of claims in 1882. The following year he became the reporter of the supreme court, a position which he still holds (1901). Mr. Davis was the New York correspondent of the London "Times" in 1854-62; has contributed to "Fraser's" and the "Edinburgh" reviews, and is the author of "Notes upon the Treaties of the United States" and the "Centennial Appendix to the Reports of the U. S. Supreme Court." His reports of that court begin with volume 108. The degree of A. B. was conferred on him by Harvard in 1847, as of the class of 1840, and that of LL. D. by Columbia College, New York, in 1887. Mr. Davis was married at Weehawken, N. J., Nov. 19, 1857, to Frederick Gore, daughter of James Gore King, and granddaughter of Rufus King, a framer of the Constitution and one of the first senators from New York. They have no children.

WESTINGHOUSE, George, inventor and manufacturer, was born at Central Bridge, Schoharie co., N. Y., Oct. 6, 1816, son of George and Eudine (Vedder) Westinghouse. His earliest American ancestors on the paternal side emigrated from Germany to Massachusetts. His father, an inventor, removed, in 1856, to Schenectady, N. Y., and there established

the agricultural works of George Westinghouse & Co., which are still in existence. He received his early education in public and high schools, and in his father's shops laid the foundation of his successful career. When he was fifteen years old he invented and built a rotary engine. He enlisted in the 15th New York regiment in June, 1863, but being able to render more valuable service in the navy, on Dec. 14, 1864, was appointed a third assistant engineer. In August, 1865, he resigned, and entered Union College, Schenectady, where he remained until the close of his sophomore year, when he withdrew. He invented, in 1865, a device for replacing railroad cars upon the tracks, and in the same year a collision between two freight trains near Troy, N. Y., suggested to him the idea of a brake which would be under the control of the engineer. He first experimented with steam; but a newspaper article upon the use of compressed air in boring the Mount Cenis tunnel directed his attention to that as an agent. He devised a brake apparatus, and submitted drawings to the superintendent of the New York Central and Hudson River railroad; but met with no encouragement. Later he filed a caveat in the U. S. patent office, and soon afterward unavailingly offered his invention for trial to the officers of the Erie railroad. He then gave his attention to his car-replacer and reversible frogs, erecting steel works for their manufacture at Schenectady, in 1867. Lack of capital was a hindrance to him, and having made a contract with the Pittsburgh Steel Works to manufacture these inventions, he traveled extensively in the United States to introduce the replacers and frogs, and seized every opportunity to interest railroad officials in his brake. In 1868 he offered Ralph Baggaley a one-fifth interest in the brake if he would pay the cost of providing the apparatus for one train of cars. The offer was accepted, and in the first trial, made late in 1868, on the Pittsburgh, Cincinnati and St. Louis railroad, an accommodation train running to Steubenville, O., was saved from collision with a wagon. Mr. Westinghouse received his first patent for his air-brake April 13, 1869, and on June 20, 1869, the Westinghouse Air Brake Co. was formed. The first orders came from the Michigan Central and the Chicago and Northwestern railways. Since then many improvements have been made in the brake, and it is in use throughout the world. The invention of what is called the triple valve was almost as important an invention as that of the air brake itself. This enables the brakes to be applied almost simultaneously on a train of as many as sixty cars, and if a car detaches itself from the train the brakes are instantly set. The air brake works at Wilmerding, Pa., are very extensive. It took Mr. Westinghouse eleven years, including nearly seven years of residence in Europe, to overcome the conservatism of the railroad men of the Old World. In 1883 he developed and patented the signal and switch system now manufactured by the Union Switch and Signal Co., of Pittsburgh. In these inventions compressed air is the power, and electricity is the agent. Mr. Westinghouse purchased some patents from William Stanley in 1883, and began the manufacture of lamps and other electric lighting apparatus at the works of the Union Switch and Signal Co. In 1885 he purchased the patents of Messrs. Gaulard and Gibbs, for the distribution of electricity by means of alternating currents, and in 1886 he organized the Westinghouse Electric Co. In 1891 the Westinghouse Electric and Manufacturing Co. was organized, and to it the founding and development of East Pittsburgh, Pa., are due. In the factory and other buildings there every attention has been given to the health and comfort of the employees, a rule Mr. Westinghouse has enforced in all establishments with which he is connected. In 1892 Mr. Westinghouse began the manufacture of incandescent lamps, under

the patents of Messrs. Sawyer and Man, establishing the Westinghouse Glass Factory for producing the needed glassware, having invented a new lamp, called the Stopper pattern, and machinery for perfecting it; also a special form of air pump to secure exhaustion. The lighting of the buildings and grounds at the Columbian exposition, Chicago, was his first great triumph. The electrical installation at Niagara was the next. Among the devices brought to perfection under him and made commercially useful is the Wernst lamp. He aided Tesla in the development of multiphase apparatus, and particularly what is known as the induction motor. When natural gas was introduced into Pittsburgh from the Murrysville district of Westmoreland county, Pa., Mr. Westinghouse drilled a well on his own grounds in that city, and obtained gas in enormous quantities. Later he purchased the charter of the Philadelphia Co., which now supplies gas through over 900 miles of pipes, explosions being guarded against by many devices of Mr. Westinghouse's own invention. The work of this company was instrumental in reviving the dying energies of the great iron and steel industries of Pittsburgh. He is interested in the following companies, being president of all except one: The Westinghouse Air Brake Co.; the Westinghouse Brake Co., of London, England; the Westinghouse Electric and Manufacturing Co.; the Westinghouse Electric Co., of London, England; the Westinghouse Machine Co.; the Westinghouse Co., of Schenectady, N. Y.; the Westinghouse Glass Factory; the Philadelphia Co.; the Allegheny Heating Co.; the Allegheny County Lighting Co.; the Union Switch and Signal Co.; the U. S. Light and Power Co., of New York; the Pittsburgh Meter Co.; the Brush Electric Light Co., of Baltimore; the East Pittsburgh Improvement Co.; the Turtle Creek Valley Water Co., and the Standard Underground Cable Co. The combined capital of these companies is \$41,000,000, and their business amounts to about \$20,000,000 annually. Mr. Westinghouse is a member of the Union League and Lawyers' clubs of New York city, and the Duquesne and Pittsburgh clubs of Pittsburgh. He received the decoration of the Order of Leopold from the King of Belgium in 1884, and that of the Royal Order of the Crown from the king of Italy in 1889. In 1890 he received the honorary degree of Ph. D. from Union College. He was married, Aug. 6, 1887, to Marguerite Erskine Walker, of Brooklyn, N. Y. They have one son, George Westinghouse, Jr.

GODWIN, Parke, journalist and author, was born in Paterson, N. J., Feb. 25, 1816, son of Abraham and Martha (Parke) Godwin. His ancestors emigrated from England prior to the revolutionary war, settling at Totowa, now included in Paterson. During the revolutionary war the family was distinguished for its patriotism, three of its members, including Abraham, grandfather of Parke, having served from White Plains to Yorktown. During the war of 1812 Abraham, father of Parke, served as an officer under Pike and Montgomery; in the civil war two of Parke's brothers were killed. Parke Godwin was educated at Kinderhook, N. Y., and at the College of New Jersey (Princeton), where he was graduated in 1834. Returning to Paterson he studied law, then removed to Kentucky, where he was admitted to the bar, but soon returned to New York city and found it difficult to make a living. In 1837 he made the acquaintance of William Cullen Bryant, editor of the "Evening Post," and was asked to serve as assistant editor of that journal temporarily. Though he had no experience in journalistic work he accepted, and after the regular incumbent's death remained on the staff, a single year excepted, until 1873. In February, 1843, Mr. God-

win began the publication of "The Pathfinder," a political and literary weekly journal, to which John Bigelow, later managing editor of the "Evening Post," and better known as an historian, contributed, but, though ably conducted, it was discontinued with the fifteenth issue. On the establishment of "Putnam's Monthly Magazine" (1853) he became one of the editors of that periodical; held the position until 1857 and again in 1867-70. Among articles revised by him was one, with which he did not agree; that by Delia Bacon asserting that Lord Bacon was the author of Shakespeare's plays. While connected with the "Evening Post" Mr. Godwin wrote frequently for the "Democratic Review" upon political and miscellaneous topics, and advocated many measures which were afterwards embodied in the constitution and code of New York. During the administration of Pres. Polk he was deputy collector of New York. Joining the Republican party on its organization, he supported it in articles for the press and on the platform until the nomination of his friend, Samuel J. Tilden, for the presidency. He is the author of "Pacific and Constructive Democracy" (1844); "Popular View of the Doctrines of Charles Fourier (1844); "Vala, a Mythological Tale," dedicated to Jenny Lind (1851), with illustrations by his friends, Hicks, Rossiter, Wolcott and Whitley; "Political Essays" (1856); "History of France" (Vol. I., Ancient Gaul, 1860); "Out of the Past," essays (1870), and "Life of William Cullen Bryant" (1883). He translated, in connection with Charles A. Dana and others, "Goethe's Autobiography" (1847); "Zschokke's Tales" (1848), and was the editor of "Handbook of Universal Biography" (1851, new ed.), "Cyclopedia of Biography," (1871), and "The Writings of William Cullen Bryant" (1883-84). Among notable addresses by him are, one delivered at the Century Club on the fiftieth anniversary of its foundation; a eulogy on George William Curtis at the same place (subsequently printed in pamphlet form); on the first settlers of Paterson, N. J., at its centennial celebration in 1892; at the service in memory of Edwin Booth, by the Players' Club in 1893 and at Cummington, Mass., at the celebration of the one hundredth anniversary of Bryant's birth, 1884. In 1884 he delivered lectures on art at Princeton College. A profound student of Shakespeare, he has made his contribution to the discussion concerning the meaning of the poet's sonnets, his belief being that they tell the history of their author's passionate and intellectual life (1900). Mr. Godwin is a member of the Century Association, the Players' and Authors' clubs, the Dunlap and American Fine Arts societies, the Metropolitan Museum of Art and the National Academy of Design. He was married in New York city, in 1837, to Fanny, the eldest daughter of William Cullen Bryant, and has three sons and three daughters. Clover Croft, Roslyn, L. L., his summer home for many years, is now owned by a married daughter. For the last twenty years Mr. Godwin has been a resident of Bar Harbor, Me.

Parke Godwin

BRAWLEY, William H., jurist, was born at Chester, S. C., in 1841. He was educated in the schools of his native town, and was graduated at South Carolina State College in 1860. The outbreak of the civil war found him ready for service, and enlisting in the 6th South Carolina volunteers, he

served through the campaigns in Virginia, receiving wounds in a battle before Richmond, resulting in the loss of an arm and disabling him for military service. He returned home, and until April, 1864, had charge of his father's plantation, and then went abroad to complete his studies. He was admitted to the bar in 1866, and two years later was elected solicitor of the 6th judicial circuit, the duties of which he discharged with conspicuous ability. In 1871 he resigned and removed to Charleston, where he obtained prominence and acquired a profitable practice at the bar. He was elected to the state legislature in Charleston county in 1881, and served continuously, by successive re-elections, until 1890. During this service he displayed eminent ability as a master of public questions and as possessor of a high power of clearly stating and analyzing current issues. In 1886 he made an appeal to the house in behalf of the Charleston earthquake sufferers, which was considered one of the ablest bursts of oratory ever heard there. His position as chairman of the judiciary committee made him leader of the legislature, and in 1890 he was elected to the 51st congress. In this new capacity

Mr. Brawley entered upon a larger field of usefulness, steadily winning wider reputation for sound judgment, accurate knowledge of public questions and exceptional oratorical gifts. He was one of the three members from the South who voted against the Bland silver bill, and the only one who spoke against it. In his speech he expressly stated that his judgment and conscience in the matter had determined his action against the expressed will of many of his constituents. He was re-elected to the 53d congress, in which he made an able speech on the repeal of the Sherman act, in December, 1893. He retired from congress in February, 1894, to accept appointment as U. S. judge for South Carolina. On the bench he has displayed the ability, steadfast purpose and high principles characteristic of all his previous public life. Judge Brawley was married, in 1868, to Marion E., daughter of Hon. William D. Porter, a distinguished lawyer of Charleston, S. C. They have two sons and two daughters.

MATHEWS, William, author, was born at Waterville, Kennebec co., Me., July 28, 1818, son of Simon and Clymenia (Esty) Mathews. After spending four years at various academies in Maine, he entered Waterville College (now Colby College), where he was graduated in 1835. He then studied law for four years, alternately in the office of Hon. Timothy Boutelle, of Waterville, and in the law school of Harvard University. In 1839 he was admitted to the bar. After a year spent in teaching, in May, 1841, he began publishing, at Waterville, a literary and family newspaper, "The Watervilleonian," which a year later was enlarged and called "The Yankee Blade." This paper, which soon engrossed all his time, was removed, in 1843, to Gardiner, Me., and in 1847 to Boston, Mass. After nearly nine years' publication in that city, during which it won great popularity and a wide circulation in all parts of the country, the paper was sold to the publishers of the Boston "Mercantile Journal," who merged it into their own weekly paper, "The Portfolio." In 1856 Mr. Mathews removed to Chicago, Ill., where during the next three years he lectured occasionally, edited a weekly financial journal and a de-

partment of the "Daily Tribune," and contributed to several other journals. From 1859 to 1862 he was librarian of the Young Men's Association, after which he held the chair of rhetoric and English literature in the University of Chicago. He resigned in 1875 to devote himself wholly to literature. In 1880 he returned to his former residence, Boston, Mass. In 1839 he received from Harvard University the degree of LL.B., and in 1868 from Colby College the degree of LL.D. His published works are: "Getting on in the World; or, Hints on Success in Life" (1873); "The Great Converters, and Other Essays" (1874); "Words: Their Use and Abuse" (1876); "Hours with Men and Books" (1877); "Monday Chats," a translation of selections from the "Causeries du Lundi" of C. A. Sainte-Beuve, with an elaborate introductory essay on his life and writings (1877); "Oratory and Orators" (1879); "Literary Style, and Other Essays" (1881); "Men, Places and Things" (1887); "Wit and Humor: Their Use and Abuse" (1888); "Nugæ Literariæ; or, Brief Essays on Literary, Social and Other Themes" (1896), and numerous articles in the "North American Review" and other periodicals. In 1895 he contributed for a subscription edition of Bulwer's complete novels and romances, a series of introductory notices, critical and bibliographical.

VIRGIN, Samuel Henderson, clergyman, was born at North Carver, Plymouth co., Mass., Aug. 25, 1842, son of Samuel and Melissa Cobb (Hammond) Virgin, and a descendant of an Englishman who settled at Plymouth, Mass., about the middle of the seventeenth century. Two of his ancestors, George Hammond and Nehemiah Cobb, were officers in the revolutionary army. His early education was obtained at the Phillips School, Boston; he entered Harvard University in 1862, but left there before the completion of his course to become principal of the Leominster high school, meanwhile continuing his college studies. Later he studied theology at the Andover Theological Seminary, and was ordained to preach Oct. 27, 1868. He became pastor of the Broadway Church, Somerville, Mass., but resigned, on account of illness, in 1871. He soon after became pastor of Pilgrim Church (Congregational), New York city, where he remained for nearly thirty years. Under his guidance, the confidence of the community was secured, a strong feeling of fellowship among the members of the congregation was established, and broader plans for Christian work were adopted. Slowly the church reached out into the community to help others, and stands to-day, with its industrial school, its Chinese school, as well as various other social, philanthropic and religious activities, as the best expression of the energy and thought of Dr. Virgin. His preaching is always extemporaneous, and his discourses are remarkable for their breadth of thought and the lucid and clear style in which they are presented. In November, 1899, Dr. Virgin resigned from his active pastorate of Pilgrim Church, and was made pastor emeritus from Jan. 1, 1900. He owns a farm at West Chelmsford, Mass, where much of his time is spent. He received the degree of D. D. from the University of New York in 1886, and LL.D. from Iowa College in 1890. He is a member and was one of the founders of the Congregational Club of New York; is a member of the Union

League Club, the New England Society, Sons of the American Revolution, and a member of other societies, has served on the committees in most of the national Congregational missionary societies, and has been for many years chairman of the publishing committee of the American Tract Society. Dr. Virgin was married, Dec. 21, 1868, to Isadora F., daughter of Luther and Almira (Glover) Holsgett, of Boston, and has one daughter, Edith Miriam, and a son, Frederic O., who is junior surgeon on the staff at St. Luke's Hospital, New York city.

WAUGH, Beverly, M. E. bishop, was born in Fairfax county, Va., Oct. 25, 1789, son of Capt. James Waugh, who commanded a company of militia men during the invasion of that state by Lord Cornwallis. He professed conversion in boyhood. At the age of seventeen his ability as a mathematician and skill in penmanship attracted the attention of a Mr. Robins, of Alexandria, Va., who gave him employment. At the age of twenty he was received into the Baltimore conference of the Methodist Episcopal church. During nineteen consecutive years, from 1809 until 1828, he was assigned to various charges within the boundaries of the Baltimore conference, including the city of Washington, where he was stationed three years. He was elected to the general conferences of 1816 and 1820. In 1828, together with Rev. John Emory, he was made assistant agent of the Methodist Episcopal Book Concern in New York city. In 1832, Dr. Emory being elevated to a bishopric, Dr. Waugh became the principal agent, and under his direction the business of the house greatly increased. At the general conference of 1836 Dr. Waugh was made bishop, and resided in Baltimore, Md., but traveled almost constantly until 1852. By the decease of Bishop Elijah Hedding, D.D., in that year, he became senior bishop of the church; but after that his health gradually failed until he died. From the time he was eighteen years old until shortly before his death Bishop Waugh kept a journal, which amounted to several manuscript volumes. It is stated that during his episcopate he never failed to preside at any conference to the presidency of which his colleagues had appointed him. He organized, in 1840, the Texas conference; he presided over 150 conferences; assigned to their pastoral charges 12,000 ministers; ordained 3,000 clerical candidates; preached over 2,000 sermons, and traveled more than 100,000 miles. He was married, in 1812, to Kate B. Bushby, of Washington, D. C. He died in Baltimore, Md., Feb. 9, 1858.

MACDERMOTT, William A. ("Walter Lecky"), author and R. C. clergyman, was born in Stranorlar, county Donegal, Ireland, about 1845, of Celtic and Norman French ancestry. When a mere child he was brought to America by his maternal uncle, Father Devir, who located in Lawrence, Mass., and provided for his education. He had inherited from his father's mother decided literary and artistic tastes, she being the possessor of a well selected library, which passed to his possession. His first studies were conducted in private schools of New England, and afterward under the tutorage of his reverend uncle, who prepared him for college, and he entered Villanova. At the age of seventeen he left college, and after a trial and failure as a book canvasser, entered the field of journalism in Chicago as reporter. He was afterward attached to the Louisville "Courier Journal," and subsequently to the New Orleans "Picayune." He tramped on foot through Mexico, and worked his way back to New York as cabin page on a steamer. He then became a college professor, and began his studies for the priesthood. Having fallen heir to a small sum of money bequeathed by a maiden aunt, he made a pil-

grimage to Europe. He met Parnell, Gladstone, Cardinal Newman, Renan and Leo XIII., and witnessed the sacred play at Oberammergau. On his return to America he settled at Chasin falls, in the Adirondack mountains, where he took charge of a parish with less than twenty families. His literary work first found a channel to the public through the Montreal "True Witness," and then to a larger audience through the "Catholic World" and Boston "Pilot." His Adirondack sketches won him fame not only in Catholic circles, but among the literary critics of the day. He published "Green Graves in Ireland" (1892); "Down at Caretons" (1893); "Studies in Literary Criticism" (1893); "Adirondack Sketches," and "Old English Dramatists," a series of papers for the "Catholic Summer School Review" (1894).

OTIS, Elisha Graves, inventor, was born at Halifax, Windham co., Vt., Aug. 3, 1811, son of Hon. Stephen J. and Phoebe (Glynn) Otis, and a descendant of John Otis, who came from Hingham, Norfolk, England, in June, 1635, and settled in Hingham, Mass., and who was also the ancestor of James Otis, the revolutionary statesman and patriot. Elisha Otis began life as a farmer; but his inventive genius led him to turn his attention to mechanical pursuits. At the age of nineteen he removed to Troy, N. Y., where for five years he was actively engaged in building operations. Mr. Otis returned to Vermont in 1838, and engaged in the manufacture of wagons and carriages until 1845. He then removed to Albany, N. Y., where he assumed charge of the construction of machinery in a large manufactory. He subsequently started a factory of his own, and finally removed to Bergen Heights, N. J., to take the superintendency of a bedstead factory. This was subsequently removed to Yonkers, N. Y. and while in charge of the erection of the buildings it became necessary to construct an elevator for use on the premises, and in connection with this Mr. Otis devised a plan to prevent the fall of the platform in case of the breaking of the lifting rope. This safety device was the means of introducing the elevator system into public buildings, and it has since proved to be one of the most useful and important inventions of the nineteenth century, adding millions of dollars to the value of real estate by the increased facilities for reaching any desired height. Mr. Otis demonstrated the safety and utility of his invention during the great International exposition in New York, in 1853, by placing one of his elevators in the main building, on which he made frequent ascensions to a considerable height, cutting the rope and letting the elevator fall. By degrees the building of elevators became the leading feature of the works, although up to the time of his death his establishment did not confine itself to elevators, but continued to do a somewhat promiscuous business. He was fertile in other lines of invention and improvement, among his products being a machine for making blind staples, an automatic wood turning machine, a railway bridge for carrying trains across a river without impeding navigation and at the same time doing away with the danger of a draw, a very ingenious steam plow, and a rotary oven for use in the manufacturing of bread. Shortly before his death he made a decided innovation in the methods of elevator operation by designing, patenting and

constructing an independent engine capable of high speed (consisting of two connected reversible oscillating cylinders, very compactly arranged) to raise or lower the platform or car. Up to that time the elevator had been regarded and treated only as one of the incidental objects for attention and service in the general distribution of steam motive power in a manufacturing establishment, being operated by hoisting from some conveniently located power shaft. With the direct gearing of it to an independent steam engine the era of the elevator as a separate institution of the age was ushered in. Further improvements were made by him and by his two sons, and in the course of a few years the new elevator was introduced into most of the public buildings throughout the United States and in nearly every part of the world. Mr. Otis invented numerous other machines of great practical value, some of which were brought into general use. He was a man of varied attainments and great mental power, and took a deep interest in the great moral issues of the day. He was active and outspoken in his opposition to slavery, and in 1859 predicted that it would cease to exist in this country within ten years, which prediction was literally fulfilled in less than half of that period, although he did not live to see it. In 1834 he was married to Susan A., daughter of Artemus Houghton, of Halifax, Vt., by whom he had two sons, Charles R. and Norton P., who became his successors in business. He died at Yonkers, N. Y. April 8, 1861.

OTIS, Charles Rollin, inventor, was born at Troy, N. Y., April 29, 1835, son of Elisha G. and Susan A. (Houghton) Otis. He was educated in the schools at Halifax, Vt., and Albany, N. Y. He inherited his father's inventive genius, and early developed a fondness for mechanics. At the age of thirteen he entered the factory where his father was employed, and learned the trade of machinist. He witnessed the gradual development of the elevator business and became impressed with the idea that there was a great future in this line. He, therefore, urged his father to concentrate their efforts on the manufacture of safety elevators, there being at that time no one in America, or in the world, so far as

known, exclusively engaged in this particular business. Accordingly the firm was reorganized under the name of N. P. Otis & Bro. in 1860. The hoisting engine invented by his father was somewhat defective in operation until Charles R. Otis, in 1860-61, invented and patented an improvement. As the business developed, many improvements were made, chiefly in the direction of securing greater safety in the use of elevator apparatus, and a large number of patents were taken out by the firm. At the beginning of this enterprise there were few buildings in our large cities over five or six stories high, the upper stories of which yielded but a small income to their owners. These inventions made it possible to construct buildings fifteen and twenty stories high, which could be ascended in perfect safety. Steam power was used originally, subsequently hydraulics where found practicable, and later electricity has been utilized as a motive power. The modern elevator is one of the important inventions of the nineteenth century, and has revolutionized the construction of large buildings. Mr. Otis has devoted his life to the growth and development of this

branch of manufacture, and has traveled extensively at home and abroad. On the organization of the business into a stock company, he was chosen president, and retained that position until his retirement from active work in 1890. He was married, in 1861, to Carrie F., daughter of Boyd.

OTIS, Norton Prentiss, manufacturer, was born at Halifax, Windham co., Vt., March 18, 1840, son of Elisha G. and Susan A. (Houghton) Otis. He was educated in the public schools at Halifax; Albany, N. Y.; Bergen Heights, N. J., and Yonkers, N. Y. At the age of eighteen he entered his father's employ, and on the death of the latter continued with his brother, Charles R. Otis, in the construction and improvement of elevators. He traveled extensively throughout the United States and Canada for the purpose of introducing the Otis elevators, until the incorporation of the Otis Elevator Co., in 1867, when he was elected treasurer, continuing until 1882. He became vice-president in 1887, and on the retirement of his brother from the presidency in 1890, was elected his successor. When the Otis Elevator Co. was organized in 1899, taking over the business of the Otis Brothers & Co. and other manufacturing concerns in the same line, Mr. Otis, wishing to retire from active business, was made chairman of the board of directors. Among the most important elevators the Otis Co. constructed are those in the Eiffel Tower, Paris, 1889; the Glasgow harbor tunnel, 1895; the great elevators at Weehawken, N. J.; the Otis Elevating Cable railway, in the Catskills, length 1,680 feet, shortening the time to the summit from two hours to ten minutes, and the Prospect Mountain Inclined railway at Lake George, 1883. The Otis Co. were the first to institute the system of regular inspection of elevators. Mr. Otis is also president of the Otis Electric Co., of Yonkers, N. Y. In 1880 he was elected mayor of Yonkers on the Republican ticket. During his term of office the fire department was reorganized, the charter for a new public dock was obtained, and the entire plan of public school management was changed, Mr. Otis having appointed the first school board under the consolidated system. Other public improvements were made, and the indebtedness of the city reduced upwards of \$75,000. He was elected a member of the legislature in 1880 in a district largely Democratic. He introduced several important measures, among which was one giving protection to the Hudson river towns against being overrun by Sunday excursionists, and another for the reduction of exorbitant rates of fare on state railroads; also an act which provided that only practicing physicians should be eligible for the office of coroner. The last mentioned was found to be un-constitutional, a defect of the state constitution, which the state convention, in 1884, remedied by an amendment to the constitution, afterwards ratified by the people. Gov. Black, in 1898, appointed him one of the commission of sixteen to represent the state of New York at the Paris exposition of 1900, and he was unanimously elected its president. He has been vice-president of St. John's Riverside Hospital, of Yonkers, since 1890. Mr. Otis is a member of the Engineers' and Fulton clubs, of New York city, and the Amackassin and Corinthian yacht clubs, of Yonkers. He was married, in 1877, to Lizzie A. Fabs, of York, Pa., and has eight children living, viz., Charles Edwin, Sidney, Arthur Houghton, Norton P., Katherine Lois, Ruth A., James R. and Carolyn M.

N. P. Otis

Charles R. Otis

BARTLETT, Josiah, signer of the Declaration of Independence, and first governor of New Hampshire (1793-94), was born at Amesbury, Essex co., Mass., Nov. 21, 1729, son of Stephen and Hannah (Webster) Bartlett. His father, fourth in descent from John Bartlett, or Bartlett, of Newbury (1635), and a shoemaker in early life, tilled a farm called the "Lion's mouth," in the northwestern part of Amesbury, and brought up a family, whose members were characterized by good sense, quick perceptions and moral deportment. Josiah acquired the rudiments of Greek and Latin from a relative, Rev. Dr. Webster, of Salisbury, and at the age of sixteen took up the study of medicine under Dr. Ordway, at Amesbury. On coming of age, although imperfectly educated, he began practice at Kins-ton, Rockingham co., N. H., living in the family of Rev. Joseph Secombe, whose library was of great use to him in his general studies. Two years later the young physician was stricken with fever, and saved his own life by dosing himself with cider, contrary to the maxims of the profession. In 1754 he gained great repute by his successful use of Peruvian bark in the treatment of children afflicted with malignant inflammation of the throat. In 1765 Dr. Bartlett was sent to the legislature, where he joined the patriot party, and in June, 1768, resolutely opposed a grant called for by Gov. Wentworth. To moderate his zeal and to win his support Wentworth made him a justice of the peace and a colonel of militia in 1767, and bore with his opposition until February, 1775, when the commission as justice was revoked, and an order of dismissal from the service issued. Meantime, July 21, 1774, delegates from the New Hampshire towns had met and had appointed Bartlett and John Pickering their representatives in the first Continental congress, but the former had been almost impoverished through the burning of his house and did not serve. On Aug. 23,

1775, Gov. Wentworth having left the province, the provincial congress placed Bartlett on the committee of safety, re-elected him to the Continental congress, and later in the year reinstated him as justice of the peace and as colonel of militia. He took his seat in congress in September, and on Jan. 23, 1776, was returned. On June 12th he was one of a committee to prepare and digest the form of confederation to be entered into between the colonies. On July 2, when the vote for the adoption of the Declaration of Independence was taken, his name was first called as representing the most easterly province, and he boldly answered in the affirmative. Soon after signing the document he resigned important matters at home requiring his attention, and, after organizing regiments for the impending attack from Montreal, he in 1777 accompanied Gen. Stark to Bennington to furnish the New Hampshire troops with medical and other supplies. In 1780 again he served as muster-master. Dr. Bartlett was re-elected to congress March 14, 1778, resumed his seat May 21, and was re-elected Aug. 19th, but withdrew to attend to private affairs, Oct. 31st. He was a judge of the court of common pleas from 1779 until 1782, when he succeeded Matthew Thornton as judge of the superior court, and became chief justice in 1788, being, it is said, the only physician who has held that office in New Hampshire. In 1788 he attended the constitutional convention at Philadelphia, and on his return exerted his influence in the state convention called to ratify the U. S. constitution. Depressed by the death of his wife, and burdened with the

weight of years, Dr. Bartlett declined an election to the national senate, but in June, 1790, he was chosen president of the state by the legislature, though John Pickering and Joshua Wentworth each received many more votes of the people. On his recommendation Pickering was appointed chief justice. In 1791 and 1792 he was re-elected, receiving in the latter year 8,692 out of 8,389 votes; and when in 1793 the amended constitution went into effect, and the title president gave way to governor, he was again elected. Timothy Walker, John Langdon and John Taylor Gilman being the opposing candidates. During his administration as president and governor important laws were passed, and the first bank in New Hampshire was incorporated, at Portsmouth. He was renominated in 1794, but wisely declined to serve, for he had lost popularity, and was considered too old to hold office. In June he retired to private life. Dr. Bartlett was one of the incorporators of the New Hampshire Medical Society in 1791, and was its first president. He was very tall, with dignified yet affable manners, and had a humane and compassionate disposition. His style of living was so simple that he incurred the charge of parsimony. Though brought up a Calvinist he early became liberal in his belief, and was connected with the

Universalist denomination. He was married to Mary Bartlett, of Newton, N. H., who bore him six daughters and three sons, Levi, Josiah and Ezra, all of whom became eminent physicians. Dr. Josiah Bartlett (1768-1838) was a representative in congress from New Hampshire from 1811 to 1813, and a presidential elector in 1792 and 1825. Gov. Bartlett died May 19, 1765, probably at Kingston, N. H., as he was buried there.

GILMAN, John Taylor, second and seventh governor of New Hampshire (1794-1805; 1813-16), was born at Exeter, Rockingham co., N. H., Dec. 19, 1753, son of Nicholas and Ann (Taylor) Gilman. He was fifth in descent from Edward Gilman, a native of Hingham, Norfolk, England, who became a resident of Hingham, Mass., in 1638, and of Exeter about 1648. Nicholas, grandson of Edward, was an officer in the Indian wars during Queen Anne's reign, and his son, Peter, royal councillor under Wentworth, was the first to hold the office of brigadier-general in New Hampshire. Daniel, another son of Nicholas, and direct ancestor of John Taylor Gilman, was stationed at Albany, in 1756, as commissary for the New Hampshire troops at Ticonderoga; later and for many years he was colonel of the 4th regiment of militia. Nicholas, eldest son of Daniel, served as a lieutenant under

his uncle, Peter, in the operations around Lake George in 1755; held many civil and military appointments under the Wentworths; in 1775-83 was treasurer of New Hampshire; was also Continental loan officer; in 1777-83 a member of the committee of safety, and of the governor's council; and in 1775 colonel of a regiment at Cambridge, and was receiver-general of the state and in that capacity issued the colonial currency. His wife, a daughter of Rev. John Taylor, of Milton, N. H., was a woman of great culture, strength of mind and beauty. John Taylor Gilman was educated in the common schools of Exeter and at an early age went into the ship-building business, but also engaged in trade, his father having a store, and in farming. When the news of the battle of Lexington reached Exeter he joined his father's regiment and marched to Cambridge, and while serving on his father's staff acted as commissary of the three New Hampshire regiments. A copy of the Declaration of Independence was brought by pony express to Exeter not long after the original was passed and was read by John Taylor Gilman to an assemblage of fellow-citizens. Young Gilman remained out of public office until 1779, when he was sent to the legislature; in 1780 he was placed on the committee of safety which continued in session during the revolution, and in the same year represented New Hampshire in the colonial convention at Hartford. In 1781 he was elected to the first Federal congress as successor to Gen. Sullivan, and the following year was re-elected. In 1782 he was the youngest but not the least useful member, and excited much admiration by a speech in which he declared that New Hampshire would conclude no peace. Mr. Gilman also took a strong stand in favor of maintaining our boundaries and fisheries to their utmost extent. In 1783 he succeeded his father in the loan office, and rivaled him in repute as a financier, holding office by successive re-elections until 1786, when a commission to settle the war accounts of the several states was formed, with Gilman, Gen. William Irvine and John Kean as members. Ill-health obliged him to resign in 1791, and he was again chosen state treasurer. The new constitution restored the office of governor, and Pres. Bartlett, who held office under the former system, was elected to the position. His health failed, and he joined in the general desire for Mr. Gilman, whose name was placed at the head of the Federalist ticket, Timothy Walker being the candidate of the recently formed Republican party. Gilman won, receiving four-fifths of the popular vote, and retained the office by re-election until 1805, when, after an exciting contest, the Republicans came into power, carrying every branch of the state government by a majority of nearly 4,000 votes. He represented Exeter in the legislature in 1810-11; in 1812 served as a presidential elector, the Federalist candidate being DeWitt Clinton. In 1813 and 1814 the Federalists carried the state election, though with decreasing majorities. Although opposed to the war, Gov. Gilman exerted himself to protect the state from invasion, both on the coast and on the western boundary, and in 1814, when Portsmouth was anticipating an attack, called out the militia. Through his influence a system for the defense of the seaboard of the United States was begun by the general government. After the legislature had adjourned in 1814 a letter was received from Gov. Strong, of Massachusetts, inviting New Hampshire to send delegates to the Hartford convention. Much as Gov. Gilman sympathized with the projectors of that convention, he nevertheless declined to act, for the legislature could not be reassembled without the advice of his council, and that being largely Republican would naturally withhold consent. During his administration a medical school was established

at Dartmouth, the first cotton factory in New Hampshire was erected (New Ipswich, 1804), and the northern part of the state was made a separate county. Gov. Gilman was the first of the governors to exercise the veto power. Declining a re-nomination in 1816, he returned to Exeter and thereafter held less important, if any, public offices. Dartmouth, of which he was a trustee, conferred upon him the degree of LL.D. in 1818; his name is also connected honorably with Phillips Exeter Academy, for he was president of its board of trustees and the beautiful site on which the buildings stand was his gift. He was three times married: in 1775, to Deborah, daughter of Gen. Nathaniel Folsom; next, to Mrs. Mary Adams; lastly, to Charlotte Hamilton. His brother, Col. Nathaniel Gilman, was state senator and treasurer; another brother, Col. Nicholas, was a member of congress for a long period, serving in the senate for nine years. He had five children, four being daughters, one of whom, Mary F., became the wife of Dr. Joseph G. Cogswell, first superintendent of the Astor Library. Gov. Gilman died at Exeter, N. H., Aug. 31, 1828.

LANGDON, John, statesman, and third and fifth governor of New Hampshire (1805-09, 1810-12), was born in Portsmouth, N. H., June 25, 1741, second son of John and Mary (Hall) Langdon, and great grandson of Capt. Tobias Langdon, an Englishman who died in Portsmouth, N. H., in 1664. Through his mother, granddaughter of Judge Hall, of Exeter, he was descended from Gov. Dudley, of Massachusetts. His father, a farmer, sent him to a grammar school, and next placed him in a counting-house; at the close of his apprenticeship he took up a sea-faring life as captain, supercargo, and finally as owner of vessels. As captain of militia he aided Maj. John Sullivan in capturing Fort William and Mary at Newcastle, in December, 1774. In 1775 Langdon was elected to the Continental congress for the session beginning in May, and there signed the petition to the king. Resigning in June, he accompanied Livingston and Paine to Ticonderoga to inquire into the safety of the fort and the state of Schuyler's army, and next, as naval agent in New Hampshire, he superintended at Portsmouth the building of several ships of war, including the *Ranger*, of which Paul Jones became commander. In 1776 he was appointed a judge of the court of Common Pleas, but resigned in April, 1777. At a most critical time (1777) he became speaker of the New Hampshire assembly. Troops were called for to check the progress of Burgoyne; the treasury was empty, and no way of replenishing it could be suggested. Suddenly Langdon arose, and said, "I have \$1,000 in hand money. I will pledge my plate for \$3,000 more. I have seventy hogs-heads of Tobago rum which I will sell for the most it will bring. They are at the service of the state." Following his suggestion, the assembly dissolved, in order that the members might volunteer, and Langdon, with others, joined a brigade equipped through his patriotic generosity, which, under Gen. Stark, won the battle of Bennington. He was present at the battle of Bennis' heights (Stillwater); was captain of a company, fought at Saratoga, and commanded a detachment of this same company at the siege of Newport. In September, 1779, he presided over the state convention called to appreciate and support the paper currency; in 1778-82 was a member of the general assembly and frequently speaker. On June 13, 1783, he was elected to congress, and in 1784 was offered a re-election, but declined. In 1785 he succeeded Meshech Weare as chief magistrate, and in 1787 was again a candidate, but was defeated by John Sullivan; in June, 1787, he was elected a delegate to the convention which framed the Federal constitution, and on Sept. 25th took his seat in con-

gress. Having zealously favored the adoption of that instrument, he signed it, and as a member of the state convention promoted its ratification. In March, 1788, Langdon re-entered the legislature, but in June was chosen president of New Hampshire by a majority of five, and served until Jan. 22, 1789. A new honor came to him in November, 1788; that of election, as a Whig, to the national senate, which he entered March 1, 1789, this being the first session of congress under the constitution. He was chosen president of the senate in order that the electoral votes for president might be counted, and by virtue of his office, was the one on whom devolved the duty of informing Washington of his election. Langdon was an unsuccessful candidate for the governorship of New Hampshire in 1783; but was returned to congress in 1784, and served until March 3, 1801. Meantime he changed his political party, and opposed violently the measures of Washington and Adams. Jefferson, on his accession, offered Langdon the post of secretary of the navy, which was declined. He was a member of the legislature in 1802-5, acting as speaker in 1803-5, thrice lost the governorship in 1802-4, but gained it in 1805, receiving 16,097 votes out of 28,143, and served by re-election until 1809. The seat of government had been at Portsmouth for nearly ninety-five years, but from the beginning of the revolution until 1807 the legislature had held sessions in Exeter, Concord, Hopkinton, Dover, Amherst and Hanover, and at the close of the first session of 1807 it adjourned to Concord, which has since been the capital. In 1810 he was again placed in the executive chair, and continued in office until June, 1812, when he refused a re-nomination. In 1808 he received nine electoral votes as a candidate for the vice-presidency, and in 1812 was nominated by the Republican congressional caucus, but declined on account of old age and infirmities. During the latter year, however, he was an elector and supported Madison and the war with England. He was one of the founders and the first president of the New Hampshire Bible Society. Gov. William Plumer, of New Hampshire, in a biography of Gov. Langdon extols him as a patriot, but characterizes his speeches and public papers as mediocre, and attributes much of his success to his partisan spirit, his gracious and insinuating manners and his social habits. The most detailed biography of him, by John Langdon Elwyn, is given in the "State Papers of New Hampshire, Vol. XX." Gov. Langdon was married in Portsmouth, Feb. 3, 1776, to Elizabeth, daughter of John Sherburne, by whom he had a daughter. He died in Portsmouth, Sept. 18, 1819. Woodbury Langdon, the jurist, was his brother.

SMITH, Jeremiah, jurist, and fourth governor of New Hampshire (1809-10), was born at Peterboro, Hillsboro co., N. H., Nov. 29, 1759, son of William and Elizabeth (Morrison) Smith, both of whom were Scotch-Irish. He early showed a love of learning, and would walk miles in order to read some book of which he had heard. Volunteering at the age of seventeen, under Stark, he was slightly wounded at the battle of Bennington. In 1777 he entered Harvard, but two years later removed to New Brunswick, N. J., and in 1780 was graduated at Queens (Rutgers) College. On being admitted to the bar, in 1786, he settled in his native town, represented it in the general assembly in 1788-90, and while there conducted the impeachment of Woodbury Langdon. He served as chairman of the com-

mittee to prepare a draft of revised statutes which were enacted in 1791, and he was a member of the constitutional convention of 1791-92. From October, 1791, until July, 1795, he served in congress, supporting the policy of Washington and Hamilton. Appointed U. S. district attorney for New Hampshire in 1797, he removed to Exeter. In 1800 he was made judge of probate for Rockingham county, and in February, 1801, judge of the newly established U. S. circuit court, which was abolished in 1802. He then was appointed chief justice of the superior court, and held the office for seven years, resigning to become a candidate for the governorship, because Daniel Webster and other personal friends persuaded him that he was the most available candidate of the Federal party. Failing of re-election in 1810, Judge Smith returned to the bar, but in 1813 left it to become chief justice of the supreme court. When, in 1816, this court was abolished he resumed private practice, and, with Daniel Webster and Jeremiah Mason, represented Dartmouth College in the famous suit in 1817. In 1797 he removed to Exeter, where he resided until 1842, and then removed to Dover. He was treasurer of the Phillips Exeter Academy, and in 1828-42 was a trustee, most of the time serving as president of the board. He was also president of the bank in Exeter. "On coming to the bench," says Belknap, "he introduced the custom of allowing a single judge to direct the course of trials at the trial terms, of reserving cases and questions for the consideration of the whole court and of preparing written opinions. He also prepared the written opinions in all cases heard *en banc*, making fourteen manuscript volumes, with a manuscript digest." A volume of selections from these decisions was published in 1879, with the title: "Smith's New Hampshire Reports." The only works by him that appeared during his lifetime were a sketch of "Judge Caleb Ellis" (1816), and a memorial address upon the death of Washington. He is said to have had few equals as a general scholar, while his tastes were cultivated and his manners urbane. Mr. Webster said of him: "Jeremiah Smith was, perhaps, the best talker I have been acquainted with." Harvard conferred upon him the degree of LL. D. in 1807, and Dartmouth the same in 1804. Judge Smith died at Dover, N. H., Sept. 21, 1842. His son, of the same name, has been an associate justice of the supreme court of New Hampshire.

PLUMER, William, sixth and eighth governor of New Hampshire (1812-13; 1816-19), was born at Newbury, Essex co., Mass., June 25, 1759, son of Samuel and Mary (Dole) Plumer, and fifth in descent from Francis

Plumer, an Englishman, who was grantee of Newbury in 1634.

Gifted with an active mind and a retentive memory, he devoted as much time as possible to reading and study after he left the district school. The family removed to Epping in 1768, and there ten years later young Plumer was converted and joined the Baptist church. From time to time he preached and met with remarkable success, but in less than two years experienced a change of belief and gave up the ministry, returning to his father's farm. Soon after, he began the study of law in the office of Joshua Atherton, at Amherst, N. H., but, being dissatisfied with his instructor, once more returned to Epping. In November, 1785, he entered the law office of John Prentice, at Londonderry, and in November, 1787, was admitted to the bar without previous examination. Opening an office in Epping, he continued practice until 1802, and served as solicitor for Rockingham county for many years. In 1786-91 he represented the town in the legislature, was speaker the last mentioned year,

and was the most influential member in the convention held to revise the state constitution. In 1797 he re-entered the legislature, and was speaker of the house; in 1798-1801 served again. The offer of a nomination to congress was declined, but in 1802 he was elected to the state senate without previous consultation. While in that body he acted in general with the Federalist party, at times showing an independence that was characteristic of the man. In 1810 Plumer sat in the U. S. senate, presiding over it in that and the following year, and was appointed chairman of a committee to report a new judiciary system, and of one for a revision of the laws, but declined both. On the retirement of Gov. Langdon, in 1812, Plumer, who had been a Democrat, was nominated in opposition to John Taylor Gilman, and was elected by the legislature, there being no choice by the people, receiving 104 out of 186 votes. "His inaugural address, delivered a few days before the declaration of war with England, was impressive and eloquent, and met with much favor in and out of the state." In July Gov. Plumer perfected the organization of the detached militia, and formed two brigades; sent a force to the northern frontier, and garrisoned Fort Constitution, at Portsmouth, and Fort McClary, protecting Kittery navy yard. In November he made a speech to the legislature in harmony with the measures of the administration, which was approved by both houses. During his first term the number of offences punishable by death was reduced from eight to two; murder and treason. He failed of re-election in 1813, and in 1814 was defeated again (though by less than forty votes), the Federalists securing all branches of the government except the council, in which were three Democrats. In 1816, though opposed by members of his own party, and by James Sheaffe, the Federalist candidate, he was elected, and, further, was urged to accept a seat in the national senate, but declined. His majority over Sheaffe and others in 1817 exceeded 3,000, and he secured a majority of 6,000 in 1818, Jeremiah Smith, subsequently governor, being one of his opponents. Again he was offered a seat in the senate and again declined, retiring to Epping at the end of his term. His last public appearance was in 1820, when he was a presidential elector, and cast the only vote in opposition to James Monroe, to whom he objected on account of his financial embarrassments.

The remainder of his life was spent in literary work and in correspondence with scientists and public men at home and abroad. Among the writings that were given to the public were: "Appeal to the Old Line Whigs" (Washington, 1805); "Address to the Clergy of New England on Their Opposition to the Rulers of the United States, by a Layman"; a series of articles, 186 in number, contributed to the press in 1821-29, by "Cincinnatus"; also a series signed "Veritas." His proclamations for fast and thanksgiving days "were of such a patriotic order that ministers in neighboring states who were Republicans read them in place of those from their own Federalist governors." He was a member of several learned organizations, including the Royal Society of Northern Antiquarians of Copenhagen; the New Hampshire Historical Society, which he aided in founding, and of which he was first president, and the Massachusetts Historical Society. He was married at Newmarket, N. H., Feb. 13, 1788, to Sally Fowler, who bore him five sons and a daughter, and died in 1852, aged ninety. Their eldest son, William (Harvard, 1809), represented his native town in the legislature and his state in the U. S. house of representatives in 1819-25. He opposed the Missouri compromise. A lawyer by profession, he cared little for it, but led the life of a student and scholar. He wrote a "Life" of his father. Gov. Plumer died at Epping, N. H., Dec. 22, 1850.

William Plumer

BELL, Samuel, ninth governor of New Hampshire (1819-23), was born at Londonderry, Rockingham co., N. H., Feb. 9, 1770, fifth son of John and Mary Ann (Gilmore) Bell. His grandfather, John Bell, of Ireland, was married to Elizabeth Todd, and in 1720 emigrated to New England, becoming, that same year, one of the proprietors of Londonderry, under the charter of Gov. Shute. His youngest son, John, father of Gov. Bell, was a man of marked individuality and importance in church and state. He was a member of the committee of safety in 1775, and of the provincial congress in 1775-81. In 1776 he was appointed muster-master of the New Hampshire troops and in 1780 colonel of the 8th regiment. Throughout the revolutionary struggle much confidence was reposed in him by the prominent men of the state for his sound judgment and steady support of the cause. He was state senator in 1786-91, and was special justice of the court of common pleas. Samuel Bell began his education in the common schools of Londonderry, and then at his urgent request was sent to Dartmouth, where he was graduated in 1793. The study of law was next pursued in the office of Judge Samuel Dana, of Amherst, N. H., and in 1796 he was admitted to the bar of Hillsboro county, and began practice at Franconia, which he represented in the legislature in 1804, 1805 and 1806. As speaker of that body, Bell made a most creditable record and as president of the state senate, of which he was a member in 1807 and 1808, he sustained the reputation so justly won. From Franconia he removed to Amherst in 1810, and thence to Chester in 1812. In 1809 he sat in the governor's council. The attorney-generalship of the state was offered him, but he declined it, accepting, however, an appointment to the bench of the superior court on the reorganization of the state judiciary, in 1816, and served until he was elected chief-magistrate. Bell was three times re-elected governor without practical opposition. He left the chair in 1823 to enter the U. S. senate, and there remained under two successive elections until 1835, when he retired from public life and to his farm at Chester. He was a trustee of Dartmouth in 1808-11, and while he was governor Bowdoin conferred upon him the degree of LL.D. in 1821. In every situation Gov. Bell was an honor to his office and to his state. He was endowed with strong native powers of intellect, and through his life exhibited a firm, consistent and well-balanced character. He was married at Amherst, N. H., Nov. 26, 1797, to Melitabel Bowen, daughter of his old preceptor, Judge Samuel Dana; second, at Amherst, July 4, 1828, to Lucy, daughter of Jonathan Smith, and niece of his first wife. By the first marriage he had four sons and two daughters. The eldest son, Samuel Dana, became chief-justice of the state; John, a physician; James, a U. S. senator, and Luther V. a physician. By the second marriage he had four sons, two of whom became physicians and two lawyers. One of the daughters, Mary Ann, was married to John Nesmith, afterwards lieutenant-governor of Massachusetts. Gov. Bell died at Chester, N. H., Dec. 23, 1850.

WOODBURY, Levi, jurist and tenth governor of New Hampshire (1823-24). (See vol. II., p. 471.)

MORRIL, David Lawrence, eleventh governor of New Hampshire (1824-27), was born at Epping, Rockingham co., N. H., June 10, 1772, son of Rev. Samuel and Anna (Lawrence) Morrill, and grandson of the Rev. Isaac Morrill, of Wilmington, Mass. Both his father and grandfather were graduates of Harvard, and with the latter he began his classical studies, continuing them at Phillips Exeter Academy. He next obtained a regular medical education: in 1793 began practice at Epsom, Merrimack co., and continued it until 1800, when he turned to another profession, that of theology. In

March, 1802, he was installed pastor of the Presbyterian and Congregational Church at Goffstown, and ministered to it until 1811, when he was dismissed on account of ill-health. In 1807 he resumed medical practice in order to have more exercise, and, with occasional interruptions, carried it on until 1830. He was justice of the peace under seven governors. Goffstown was represented by him in the general court in 1808-17, of that body he was speaker in June, 1816, and at the same session was elected to the U. S. senate as an Adams Democrat. He served from Dec. 1, 1817, until March 3, 1823; then was placed in the state senate, representing the 3d district, and in June was elected its president. In 1821 he was a candidate, but there being no choice by the people he was elected by the legislature. In 1825 out of 30,770 votes he received 130,167; in 1826, after a sharp contest with Benjamin Pierce, subsequently governor, as a competitor, he was again elected by the people. In 1831 he removed to Concord, and from that time on held no public office. He was connected with a company which published the Scriptures, and for two years was editor of the "New Hampshire Observer," a religious journal. Gov. Morrill was the author of sermons, orations and controversial pamphlets. He was vice president of the American Bible Society, American Sunday-school Union and American Home Missionary Society, and president of the Hillsboro County Agricultural Society, and the New Hampshire Missionary and Colonization societies. He received the honorary degrees of M. A. and M. D. (1821) from Dartmouth and that of LL. D. from the University of Vermont in 1825. He was a man of great versatility of talent and of popular manners. He was married, first, Sept. 25, 1794, to Jane Wallace, of Epsom, who died in 1823; second, to Lydia Poor, of Goffstown, who bore him four sons. Their son, David Lawrence Morrill, was graduated at Dartmouth in 1847, and took up the practice of law in Massachusetts. Gov. Morrill died in Concord, N. H., Jan. 28, 1849.

PIERCE, Benjamin, twelfth and fourteenth governor of New Hampshire (1827-28, 1829-30), was born at Chelmsford, Middlesex co., Mass., Dec. 25, 1757, son of Benjamin and descendant of Stephen Pierce, who emigrated from England to Massachusetts in 1651. The father died when he was a boy, and he was brought up by an uncle, Robert Pierce, a farmer in the same town. On April 19, 1775, he was at work in the field when a special messenger rode through Chelmsford, telling the news of the battle of Lexington, and young Pierce left the plow, took his uncle's gun, and with many others started on foot to meet the British. Before they reached Lexington the enemy had retreated toward Boston, but the party proceeded to Cambridge, to enlist in the army. Pierce was in the battle of Bunker hill, and in other engagements; served with bravery until the war ended, and rose to the command of a company, which he held at the disbanding of the troops in 1784, attaining the rank of captain and brevet-major. He then returned to Chelmsford and to farming, but two years later removed to Hillsboro county, N. H., and there cleared a farm in the forest, and built a cabin which, before long, gave place to a house of some architectural pretensions. In addition to his service in the regular army he was connected with the Massachusetts and New Hampshire militia for more than twenty years, and in 1805 was promoted to brigadier general. He was a member of the general court in 1789-1802, coun-

clilor in 1803-9, and 1814-18, and high sheriff of the county in 1809-11, and 1818-23. On assuming the duties of sheriff he found imprisoned for debt an old companion in arms, Capt. Moses Brewer, and, with a kindness that was characteristic of the man, he paid the sum necessary to procure his release and the release of two other men in the same jail. Gen. Pierce was an ardent admirer of Andrew Jackson, and became the head of the Democratic party in New Hampshire, which elected him governor in 1827 and 1829. He was twice married, first, in 1787, to Elizabeth, daughter of Isaac Andrews, by whom he had one daughter, who became the wife of Gen. John McNeil. His second wife was Ann Kendrick, of Amherst, N. H., by whom he had eight children, one of whom, Franklin, was the fourteenth president of the United States; another, Nancy, became the wife of Gen. Solomon McNeil. Gen. Pierce died at Hillsboro, N. H., April 1, 1839.

BELL, John, thirteenth governor of New Hampshire (1828-29), was born at Londonderry, Rockingham co., N. H., July 20, 1765, son of Hon. John and Mary Ann (Gillmore) Bell and brother of Samuel Bell, governor in 1819-23. He inherited those valuable qualities for which the Scotch-Irish settlers of New Hampshire were eminently distinguished. In early manhood he engaged in the Canadian trade, and by his ability, probity and sound judgment, rapidly acquired the confidence of his fellow-citizens of Londonderry, who sent him to the legislature (1799-1800). He soon after removed to Chester, N. H., where he resided until his death. He was elected senator from the 3d district of the state in 1803, and at the end of his term retired to private life until 1817, when he was chosen councillor, and filled the office for five years. In 1823-28 he was sheriff of Rockingham county, and in the latter year was elected governor as a supporter of Adams, and served one term. In the discharge of these various public duties he uniformly exhibited the same traits of sagacity, diligence, justice and conscientiousness which achieved success for him in his business enterprises. He was married to Persis, daughter of Dr. Isaac Thom, of Londonderry, a woman strong in mind and character, and had ten children, of whom the youngest, Charles Henry, was governor of New Hampshire in 1881-83. Gov. Bell died at Chester, N. H., March 22, 1836.

HARVEY, Matthew, fifteenth governor of New Hampshire (1830-31), was born at Sutton, Merrimack co., N. H., June 21, 1781, son of Matthew and Hannah (Sargeant) Harvey and descendant of William Harvey of Plymouth (1639) and Tamnton, Mass. He was fitted for college by Rev. Samuel Wood, of Boseawen, and entered Dartmouth, where he was graduated in 1806, then read law in the office of Hon. John Harris, at Hopkinton, and began practice in that town in 1809. Soon becoming a leader in the Democratic party, he represented Hopkinton in the legislature in 1814-20, and during the last three terms was speaker. Elected to congress, he served for four years, 1821-25; returning to New Hampshire, he was a member of its senate in 1825-28, was president of that body in 1826-28 and sat in the executive council in 1828-30. In 1830 he became governor, but in the same year was appointed judge of the U. S. district court for New Hampshire, and on Feb. 28, 1831, resigned the executive chair. Judge Harvey remained on the bench until his death, but during that time he declined to hold the humbler office of moderator of town meeting, to which he was frequently called. As governor he made himself acceptable to the people, and then, as at all times, his influence was widely felt. McClintock, the historian, says of him: "In social nature he was generous, kind and sympathetic, in moral character honest and truthful in religious

life, fervent and liberal. . . . His whole personal identity partook more of the ideal than the actual, though he was not so ideal as to be impractical." At one time he was president of the New Hampshire Historical Society. Dartmouth conferred upon him the degree of LL.D. in 1855. Judge Harvey was married, Sept. 21, 1811, to Margarette, daughter of Zebulon Rowe, of Newburyport, Mass., who bore him a son and a daughter. He died, April 7, 1866, at Concord, which had been his home since 1850.

HARPER, Joseph Morrill, physician, and acting governor of New Hampshire (1831), was born at Limerick, York co., Me., June 21, 1789, son of Samuel and Sarah (Godfrey) Harper, and descendant of a Scotch Irishman, who early in the eighteenth century emigrated to Massachusetts, settling at Newbury. His mother was of English descent, and of a family which had come to New England in the seventeenth century. From 1773 until 1783 Samuel Harper lived at Sanbornton, N. H.; later re-sided at Brentwood, his native place, removing thence to Limerick. He fought under Gen. Stark at Bennington, but for his services received Continental money, which proved worthless, and in consequence could afford his children only a limited education. In 1806 Joseph Harper became a student in the academy at Fryeburg, Me.; in 1807-08 had charge of district schools, and began the study of medicine, which he continued under Dr. William Swasey, of Limerick, and Dr. Jonathan Kittredge, of Canterbury. After attending lectures at Fryeburg, and Boston, Mass., he spent the winter of 1810-11 at Sanbornton; then removed to Canterbury. In January, 1813, he joined the regular army as second surgeon, 4th infantry, and continued in that capacity until the war closed in 1815. He then returned to Canterbury, and for several years devoted his talents to his profession. About that time he was elected a fellow of the New Hampshire Medical Society. In March, 1826, he was elected to the state legislature by the Democrats, and in 1827 was returned; in 1829 he was sent to the state senate, and in both houses entirely satisfied his constituents. In 1830 he was re-elected to the senate, and when that body was organized was chosen its president. On Feb. 28, 1831, Gov. Harvey resigned his office to become judge of the U. S. court for the district of New Hampshire, and Mr. Harper, by virtue of office, succeeded him, remaining in the executive chair until June. In March of the same year he was elected a representative to congress, and in December took his seat in that body; in 1833 was re-elected, and served for two years more, closing his political life in March, 1835. He supported Jackson's measures, and, though not a fluent speaker, by his steadfast adhesion to Democratic principles did much to help the cause he loved. During his last term he was on the committee on commerce, and during the last session acted as chairman the greater part of the time. Returning to Canterbury, Gov. Harper engaged in farming and in transacting business, as agent, trustee, attorney, also serving as justice of the peace and quorum. He frequently lectured on the subject of temperance. He was president of the Mechanics' Bank, Concord, also a director in a savings bank in that city, and president of an insurance company in Canterbury. Gov. Harper was married at Canterbury, June 6, 1816, to Elizabeth, daughter of Obadiah Clough. She

J. M. Harper

bore him two sons and a daughter. Their son, Charles Augustus, a graduate of Dartmouth, became a lawyer, settling at Clarksburg, Va., whence he removed to Texas and was colonel of the Texan rangers during the war with Mexico. Gov. Harper died at Canterbury, N. H., Jan. 15, 1865.

DINSMOOR, Samuel, sixteenth governor of New Hampshire (1831-34), was born at Windham, Rockingham co., N. H., July 1, 1766, fourth son of William and Elizabeth (Cochran) Dinsmoor, and descendant on both sides of the Scotch-Irish founders of the town. He was graduated at Dartmouth in 1789, read law, and settled at Keene in 1792. Having had an interest in military matters from his youth, he organized the Keene light infantry, and for many years was major-general of militia. In 1808 he was postmaster of the town; in 1811 was sent to congress, where he served for two years, and voted for the war grant bill. Upon his return to New Hampshire he was appointed collector of the direct tax; subsequently was judge of probate, and in 1821 became a state councillor. In June, 1822, he was regularly nominated for governor by the Democrats, but at the election in 1823 he was defeated by Levi Woodbury, at that time a justice of the supreme court, there being no election by the people. In 1831 he was made governor, and held the office for three successive terms. While he was in office Gen. Lafayette visited the state, on invitation of the legislature, and was received with great demonstrations. Gov. Dinsmoor was the first president of the Ashuelot Bank, and held that position at the time of his death. He was married at Londonderry to Mary, daughter of Gen. George Reid, of the revolutionary army, and Mary (Woodburn) Reid. Samuel Dinsmoor, governor in 1849-52, was their son. Gov. Dinsmoor died at Keene, N. H., March 15, 1835.

BADGER, William, seventeenth governor of New Hampshire (1834-36), was born at Gilbanton, Belknap co., N. H., Jan. 13, 1779, son of Joseph Badger, Jr., and Elizabeth (Parsons) Badger, and descendant of Giles Badger, who was the first that came to this country and settled at Newbury, Mass. His grandfather, Joseph Badger, a native of Haverhill, Mass., removed to New Hampshire (Gilbanton), in 1763, and became prominent in the affairs of the commonwealth, serving as member of the provincial congress, as colonel of militia, and as brigadier-general (in 1780), as judge of probate, as member of the convention that ratified the Federal constitution, and as member of the state council. The early part of William Badger's life was devoted to business. In 1810 his fellow townsmen sent him to the legislature, where he remained for two years; then, after an interval, he served in the senate, 1814-16, representing the 6th district, and during the last year presided over that body. As one of the associate justices of the court of common pleas in 1816-20, he gave great satisfaction, and as high sheriff of Stafford county in 1820-30, he honored his office. Popular manners, and a spirit of hospitality, combined, with native ability, and especially sound judgment, to advance him; in 1834 he was elected governor on the Democratic ticket by a large majority, and in 1835 was re-elected. McClintock, one of New Hampshire's historians, says of him: "During the 'Indian stream' territory troubles his duties were of great responsibility, but he performed them with promptness and at the same time judiciously. A man with less care and prudence might have greatly increased our border difficulties. His course received the hearty commendation of all parties, and doubtless saved us from a war with Great Britain." Subsequently, and at three different times, he was chosen a presidential elector. Gov. Badger was very tall, and at times exceedingly stout, but he was always active. He was twice married; first,

to Martha, daughter of Rev. Isaac Smith; there were two children by that marriage, a son, John, and a daughter, Martha; both died in early life. He was married, second, at Atkinson, N. H., to Hannah Pearson, daughter of Dr. William and Judith (Badger) Cogswell. They had sons, Joseph and William, graduates of Dartmouth, the latter an officer in the Federal army in the civil war. Gov. Badger died at Gilbanton, N. H., Sept. 21, 1852.

HILL, Isaac, journalist, and eighteenth governor of New Hampshire (1836-39), was born in Somerville, Mass., April 6, 1788, son of Isaac and Hannah (Russell) Hill, and a descendant of Abraham Hill, who emigrated from England to Massachusetts in 1636, settling at Charlestown. Of French war and revolutionary stock on both sides, he was imbued with patriotic ideas at an early age. In 1798 the family removed to Ashburnham, Mass., and there he went to school, gathering nuts to pay for his books, for his parents were poor, and for that reason also gaining a scant education. At the age of fourteen he was apprenticed to the publisher of the "Farmer's Cabinet," and made the journey to his new home, Amherst, N. H., on horseback. His hours after work were spent in study, and at the end of a seven years' apprenticeship he felt qualified in all respects to enter the field of journalism. For that purpose, in April, 1809, he removed to Concord, having as capital the nominal sum of \$1; but, full of hopefulness, assumed charge of the "American Patriot"; soon became the owner of that newspaper, and changed its name to the "New Hampshire Patriot." As an organ of the Democratic party it attained a large circulation; many of its contributors were prominent men, and through it the editor exerted a personal influence so great that he was said to "carry New Hampshire in his breeches pocket." He was a facile writer, and was unquestionably one of the best journalists of his day, turning off sheet after sheet of manuscript without emendation, often keeping up at

the same time a running conversation with an occasional caller or visitor. Many of his editorials were composed at the ease without copy. His political articles were marked by great vigor and power, and were trenchant and incisive. Soon after taking charge of the "Patriot" the fierce discussion preliminary to the war of 1812 began, in which Mr. Hill supported Madison most energetically. He stoutly advocated entire religious equality, labored assiduously to utilize the water-power of the state, and in the early history of cotton and woolen manufacturing in New England advocated the exemption of these corporate interests from taxation, thereby inviting the investment of foreign capital in their aid. Later he favored largely the building of railroads, taking issue with a portion of his party on questions arising from their extension, which ultimately were carried in his favor. He also published and sold books for many years, but about 1829 entrusted his business to others, being engrossed by political affairs. Mr. Hill was clerk of the state senate in 1819, and afterwards state senator—in 1820-22 and 1827, and was second comptroller of the national treasury, 1829-30, under Jackson, to whom he became confidential adviser and life-long friend, being, with Amos Kendall, a member of the famous "kitchen cabinet." He was renominated, but was rejected by the senate. Mr. Hill took a seat as U. S.

senator in 1831, and retained it until 1836, when he resigned to become governor of New Hampshire, being elected by an unprecedented majority. He was re-elected in 1837 and 1838. He was appointed sub-treasurer at Boston by Van Buren, upon the establishment of the independent treasury, but was removed by Harrison about a year later. On account of dissatisfaction with the management of the "New Hampshire Patriot," which was in other hands, he in 1840 established "Hill's Patriot," in connection with his sons, and continued it until 1847, when the two journals were united. A practical and experimental farmer, he did much to promote agriculture in the state, contributing to various journals on that subject, and publishing for several years the "Farmer's Monthly Visitor," in which his best descriptive articles are to be found. He was senior grand warden of the Grand Lodge, F. & A. M., in 1826. In religion he was an ardent Episcopalian. This physically feeble man assisted his mother, educated three brothers and five sisters, fought his way by sheer energy, made his name a watchword in the state, a power in New England and the country, and left his mark enduringly upon his party and the people. He was married at Concord, N. H., Feb. 2, 1814, to Susan, daughter of Richard and Susannah (McClary) Ayer, who bore him three sons and a daughter. Their son, George McClary, was the unsuccessful Democratic candidate for governor in 1884. Gov. Hill died in Washington, D. C., March 22, 1851.

PAGE, John, nineteenth governor of New Hampshire (1839-42), was born at Haverhill, Grafton co., N. H., May 21, 1787, son of John Page and Hannah, daughter of Rev. Samuel Rice, of Landaff, N. H. His father, a native of Lunenburg, Worcester co., Mass., removed with his parents to Rindge about 1761, and helped build a log house for their dwelling place. By doing sutler's work he was enabled to buy some land in the township; the following winter he spent at the Great Ox bow (Newbury), taking care of cattle, and with his earnings bought land in Haverhill, some of which is still owned by descendants. He was a man of great agility and strength, and it is related that he could lay his hand on the back of one of his yoke of oxen and vault over both. Mrs. Hannah (Rice) Green, who became his third wife, "was a woman of great superiority of mind and character and exerted a strong influence in moulding the moral and intellectual habits of their children." John Page, the son, attended school regularly until he was fifteen years of age, and then gave up study to help his father free the homestead from debt. As the years passed he became prominent in the town in various ways; was chosen selectman, assessor of taxes for his district in 1815, was a Democratic representative in 1818-20 and again in 1845; register of deeds for Grafton county in 1827, and again in 1829-35. During the war of 1812 he served as a lieutenant at Stewartstown, on the New Hampshire frontier. In June, 1835, he was elected to the U. S. senate to complete the unexpired term of Isaac Hill and served until March, 1837. In 1838 he was re-elected to the executive council; but in 1839 left it to occupy the governor's chair. While chief executive he took particular interest in promoting agriculture in the state and in forwarding Prof. Jackson's geological survey. On returning to private life Gov. Page spent his time in farming, though he retained an acquaintance with public affairs, and was influential in securing the building of the Boston, Concord and Montreal railroad. He was married to Hannah, daughter of Maj. Nathaniel and Sarah (Hazen) Merrill, who bore him eight sons and a daughter. Gov. Page died at Haverhill, N. H., Sept. 8, 1865.

HUBBARD, Henry, twentieth governor of New Hampshire (1842-44), was born at Charlestown, Sullivan co., N. H., May 3, 1784, son of John and Prudence (Stevens) Hubbard, grandson of Rev. John Hubbard of Northfield, Mass., and also a descendant of George Hubbard, of Wethersfield (1638), Guilford and Milford, Conn. He was graduated at Dartmouth in 1808; read law under Hon. Jeremiah Mason at Portsmouth, and began practice at Charlestown; was a supporter of the Unitarian church, was moderator of town meeting several times, and representative in the legislature eleven times, in 1812-27, being speaker in 1825-27. As solicitor for Cheshire county, 1823-28, he sustained so excellent a reputation that when Sullivan county was incorporated, 1827, he was made its judge of probate, and served for two years. Originally a Federalist, he became a Democrat, and as such was a member of congress 1831-35; was an active member of the committee on claims; gave untiring support to the pension act of 1832, and in 1831 was speaker *pro tempore*. In 1834 he entered the national senate, where for six years he had the implicit confidence of the administration and the Democratic party. After he left the governor's chair he continued to exert an influence in politics, and is credited with having brought forward Franklin Pierce at the right moment for his success in the Baltimore convention which nominated him for the presidency. In 1846 he removed to Boston, where he held the office of sub-treasurer during Polk's administration, returning to Charlestown in 1849. The people of the state had the greatest confidence in his faithfulness, as is shown by the many positions held by him. He was an energetic lawyer, and his rank was high in the profession. His voice was powerful, and it is said that his political speeches "were literally thundered." Gov. Hubbard was married at Charlestown, Nov. 30, 1813, to Sally Walker, daughter of Aaron and Phyla (Walker) Dean, who bore him four sons and a daughter, who became the wife of chief-justice John J. Gilchrist. Gov. Hubbard died at Charlestown, N. H., June 5, 1857.

STEELE, John Hardy, twenty-first governor of New Hampshire (1844-46), was born at Salisbury, Rowan co., N. C., Jan. 4, 1789. His father, a native of the north of Ireland, emigrated to North Carolina early in life, and established himself as a brick maker at Salisbury. The son was left an orphan at an early age, had very limited opportunities of gaining an education, and at the age of fourteen was apprenticed to a maker of Windsor chairs, gigs and sulkies. Capt. Nathaniel Morison, of Peterboro, N. H., a carriage maker by trade, happened to reside for a time at Fayetteville, N. C., and making the acquaintance of young Steele induced him to go North, which he did, arriving at Peterboro in May, 1811. He at first worked for Capt. Morison at carriage making, afterwards at machine-making, receiving \$13 per month, but developed mechanical skill so rapidly that he became a manufacturer himself, and in 1817 put in operation the first power loom used in New Hampshire. In 1824 he erected a cotton mill at West Peterboro, and this he superintended until 1845, also carrying on a farm there. He was a member of the state legislature in 1829, and represented the old Hillsboro district in the council in 1840 and 1841. In 1843, partly for his health, partly to examine new machinery and methods of manufacture, he visited England, and before his return made a tour of Ireland. Elected governor by the Democrats, he served for two terms (1844-46), and

then returned to his farm, which he tilled according to the most scientific methods of agriculture; but as this occupation was not remunerative, he abandoned it before his death and returned to Peterboro village. He was moderator of town meetings in 1830-38, and selectman in 1846, in addition to the more important offices held, and was held in high esteem by his fellow citizens for his efforts to advance their welfare and for his personal worth. Gov. Steele was married at Peterboro, N. H., Nov. 5, 1816, to Jane, daughter of John and Belinda (Bardwell) Moore, who bore him five sons. She died in 1831, and on Jan. 8, 1833, he was married to her sister, Nancy, who bore him a son. Gov. Steele died at Peterboro, N. H., July 3, 1865.

COLBY, Anthony, twenty-second governor of New Hampshire (1846-47), was born at New London, N. H., Nov. 13, 1795, son of Joseph Colby. The ancestral line has been followed back to three emigrants of Danish antecedents, whose home was Inge-worth manor, Colby, in the town of Cawston, near Norwich, England. Only one, Robert, returned from the Holy Land, and he is accounted the progenitor of the American branch of the family. In 1351 John De Colby was knighted for service in the wars with France and Scotland. Among Winthrop's company of Puritan emigrants to New England in 1630 was an Anthony Colby, of Roos Hall, Breeles, Suffolk, the second son of Thomas and Beatrice

(Felton) Colby, his mother being the daughter of Sir Thomas Felton, of Playford. He became a member of the First Church of Boston, built the first house in Cambridge, and afterwards was the founder of Amesbury, where still stands his house, built in 1647. Many of his descendants distinguished themselves in King Philip's war, in the French and Indian wars, and in the revolutionary struggle. Gov. Colby's mother was descended from one of the Scotch-Irish settlers of Londonderry, N. H. His father, bought a portion of the Masonian grant in New Hampshire,

and served for a long period in the general assembly, having as an associate and intimate friend Capt. Ebenezer Webster. After obtaining a common school education, Anthony Colby took up manufacturing, and in 1828 he was elected to the legislature. When elected to the executive chair he received the heartiest congratulations from Daniel Webster, between whom and himself as strong a friendship existed as between their fathers. He was the first Whig to become chief magistrate since Gov. Bell. To one who twitted him on the shortness of his administration, he made answer that it was the most remarkable administration the state had ever had, for he had satisfied the people in one term, and no other governor had ever done that. He established, at New London, Colby Academy, an institution under Baptist control, which was endowed by his family, and in 1850-70 was a trustee of Dartmouth College, of which two of his sons were graduates. He received from it in 1850 the honorary degree of A. M. He was major-general of the state militia for many years, and held other positions of trust, especially in religious and educational interests of the state. "Naturally intrepid, he originated and carried on a variety of business operations much in advance of his times, and fearlessly assumed the responsibilities of a leader." Like his father, he was a pillar in the Baptist denomination, and did much to promote its growth in the state. McClintock, the historian, wrote of him

"He seemed to illustrate in his noble, cheerful life the effects of the companionship of the granite hills. His great heart, sparkling wit, fine physical vigor and merry laugh made his presence a joy at all time, and welcome everywhere." Gov. Colby's first wife was Mary Everett, and their son, Daniel Everett, was adjutant-general of the state militia in 1863-64. His second wife was Mrs. Eliza Richardson, of Boston. Gov. Colby died at New London, N. H., July 13, 1873.

WILLIAMS, Jared Warner, twenty-third governor of New Hampshire (1847-49), was born at West Woodstock, Windham co., Conn., Dec. 22, 1796, son of Capt. Andrew and Sarah (Skinner) Williams, and descendant of Robert Williams, who settled at Roxbury, Mass., in 1637. He was graduated at Brown University in 1818, studied law at Litchfield, Conn., and settled at Lancaster, N. H., to practice his profession. He represented the town in the legislature in 1830-31; was register of probate in 1832-37; entered the state senate in 1833, and was its president in 1834-35. In 1835-36 he served again in the lower house. His next election was to congress from the 6th district, his term of service lasting from Sept. 4, 1837, to March 3, 1841. In 1852 he was made a judge of probate. As chief executive (1847-49), he merited the eulogy of one of his contemporaries: "He was a man of the highest type of character, winning social qualities, and rare abilities. His various honors sat easily upon him, and vanity did not manifest itself." The death of Hon. Charles G. Atherton, of New Hampshire, in November, 1853, left a vacancy in the U. S. senate, which was filled by the election of Judge Williams. The latter took his seat Dec. 12, 1853, and remained until March 3, 1855. In 1864 he was a delegate to the Chicago convention. Dartmouth conferred upon him the degree of A. M. in 1855, and Brown that of LL. D. in 1852. Gov. Williams was married at Woodstock, Conn., 1824, to Sarah, daughter of Alvin and Bethiah (Clapp) Bacon, who bore him two sons. Their son, George Canning, was graduated at Dartmouth (1844); Jared Irving, at Brown University (1854). Gov. Williams died at Lancaster, N. H., Sept. 29, 1864.

DINSMOOR, Samuel, twenty-fourth governor of New Hampshire (1849-52), was born at Keene, N. H., May 8, 1799, eldest son of Gov. Samuel and Mary (Reid) Dinsmoor. He was so precocious that at the age of ten he was fitted to enter college, but was held back for a year, and then was matriculated at Dartmouth, where in 1814 he was graduated. After reading law under his father he was admitted to the bar in 1818, and began practice in his native town, but in 1819 left it for a time, accompanying Gen. James Miller to Arkansas territory, of which the latter had been appointed governor. Later he was sent to Paris to obtain property left by his mother's brother, a wealthy banker, and while abroad attained great proficiency in the French language. On the visit to New Hampshire of Gen. Lafayette, Mr. Dinsmoor was one of two commissioners appointed to receive him at the state line and conduct him to Concord. He became cashier of the Ashuelot Bank, at Keene, on its organization, retained the position for many years, and was afterwards president. Elected governor on the Democrat ticket in 1849, he served for two terms, to the general satisfaction of the people at large, declining a subsequent re-election, which was, however, later forced upon him. His messages to the legislature were marked by a courtesy that was a distinguished characteristic of the man. He was married: first, at Weatherfield, Vt., Sept. 11, 1814, to Ann Eliza, daughter of Hon. William Jarvis, who bore him two sons. She died in 1849. Second, at Nashua, in May, 1853, to Mrs. Catharine Pickman (Abbott) Fox, daughter of Daniel Abbot, and widow of Charles James Fox. Gov. Dinsmoor died at Keene, N. H., Feb. 24, 1869.

MARTIN, Noah, twenty-fifth governor of New Hampshire (1852-54), was born at Epsom, N. H., July 26, 1801, son of Samuel Martin and Sally, daughter of Maj. James Cochrane, of Pembroke, and great-grandson of Nathaniel and Margaret (Mitchell) Martin. His ancestors on both sides were of Scotch-Irish extraction, and settled in Londonderry, N. H. His father served in the revolutionary war. He was educated at a district school, and later under the tuition of Rev. Jonathan Curtis, of Epsom, and completed his classical course at Pembroke Academy, of which the venerable Father Vose was then principal. Choosing medicine as his profession, he began his studies under Dr. G. Pillsbury, of Pembroke, continued them with Dr. Graves of Deerfield, and then entered the Medical School at Dartmouth, where he was graduated in 1824. He was in partnership with Dr. Graves, of Deerfield, for the ensuing year, and in 1825 located at Great Falls, where he spent nine years (1825-1834), building up for himself a lucrative and extensive practice. He removed to Dover in 1834, where he spent the remaining years of his life. As a physician he stood at the head of the profession in his own section, his counsel and advice being eagerly sought in difficult and complicated cases. In politics he was a Democrat of the Jeffersonian type. He was a representative to the state legislature from Somersworth in 1830, and from Dover in 1837, when he was chairman of the committee on the state prison. He sat in the senate, 1835-36, serving as chairman of the committee on banks, and a member of the committee on the judiciary, and on the committee on agriculture and manufactures in 1835; and in 1836 was chairman of the committee on the judiciary, and a member of that on schools and seminaries of learning. He was elected governor of the state, 1852, 1853, on the Democratic ticket, and served with satisfaction to his party. During his term he proposed the formation of an agricultural commission, and he urged the introduction of agriculture as a branch of education in the schools. He was a member of the following medical societies: Strafford District Medical Society, 1835, and its president in 1841-42; New Hampshire Medical Society 1836, its president in 1852; American Medical Association, 1849. He was one of the founders of the Dover Medical Association, and its first president in 1849, re-elected president 1850. In 1849 he was a delegate from the New Hampshire Medical Society to examine the medical students at Dartmouth College, and delivered an address to the graduating class. He was president of the Strafford County Savings Bank at Dover, 1841-52, when he resigned; a director of the Dover Bank, 1847-55; a director of the Strafford Bank, 1860-63. He was president of the Dover Library, 1851-53, and a trustee of the New Hampshire House of Reformation for Juvenile Offenders, 1855. He was a charter member of the New Hampshire State Agricultural Society, and its vice-president in 1851; member of the New Hampshire Historical Society in 1853; an honorary member of the New England Historic Genealogical Society in 1853, and a vice president in 1855; Freemason and Odd Fellow. Dr. Martin was married, in 1825, to Mary J., daughter of Dr. Robert and Abiah (Kingman) Woodbury, of Barrington. He died at Dover, N. H., May 28, 1863.

BAKER, Nathaniel Bradley, twenty-sixth governor of New Hampshire (1854-55), was born in that part of Hillsboro now Henniker, N. H., Sept. 29, 1818, eldest son of Abel and Nancy (Bradley) Baker. His mother was a daughter of Samuel Bradley, of Concord, a man of much local distinction. His grandfather, Abel Baker, a native of Berlin, Mass., removed to Concord, N. H., in 1789, and built the first grist mill and first saw

mill in the town. Nathaniel Baker was educated at Phillips Exeter Academy and at Harvard, being graduated in 1839 in the same class with Edward Everett Hale; studied law in the office of Franklin Pierce, at Concord, and began practice there in 1842. In 1841-45 he was joint proprietor and editor of the "New Hampshire Patriot," in 1845 was appointed clerk of the court of common pleas, and in 1846 clerk of the superior court of judicature of Merrimack county. He was a representative in the legislature in 1850-51, and speaker both years; was a presidential elector in 1852, on the Democratic ticket. He was one of the first trustees of the now famous St. Paul's School, Concord. In 1856, the year after he left the governor's chair, he removed to Clinton, Ia., where he continued his law practice. In 1859-61 he served in the legislature, and during the session of 1860, and the extra session of 1861, acted with the Republicans. In July, 1861, he was appointed adjutant-general of Iowa, and continued to hold that office until his death. Gov. Laker was married, May 10, 1843, to Lucretia M. Tenbroeck, who bore him four children. He died at Des Moines, Ia., Sept. 11, 1876. The grave of Gov. Baker is marked by a tall granite shaft, and the corners of the lot by four cannon which bear marks of service in the civil war.

METCALF, Ralph, twenty-seventh governor of New Hampshire (1855-57), was born at Charlestown, Sullivan co., N. H., Nov. 21, 1798, eldest son of Hon. John and Ruby (Converse) Metcalf. In 1635 Michael, son of Rev. Leonard Metcalf, of Norwich, England, became a dissenter and in 1637 emigrated to New England with his family, arriving at Boston. His descendants migrated to different parts of Massachusetts colony, some to Oakham, where John, father of Ralph, was born, and whence in early manhood he removed to Charlestown, N. H., to engage in lumbering and farming. Ralph worked on the farm until he was twenty-three years of age, and then, owing to lameness, was obliged to take up a less active kind of life and decided to be a professional man. His father, whose means were small, contrived to give him \$100 and the young man, after studying in the academy at Chester, Vt., entered Dartmouth in 1819; he left in 1821 to accept a professorship in the Literary Scientific and Military Academy at Norwich, Vt., but in 1822 rejoined his class and in 1823 was graduated. With the exception of three weeks which were spent at Concord in studying law and in editing the "New Hampshire Patriot" during the absence of its proprietor, he lived at Charlestown for two years, continuing his law studies in the office of Henry Hubbard, subsequently governor. Claremont became his place of residence in 1825, and there he read law under Hon. George B. Upham; in 1826 he was admitted to the bar and until 1828 practiced at Newport, Sullivan co.; then became a partner of Judge Waterman, at Binghamton, N. Y. Dissatisfied with his prospects, Metcalf returned to New Hampshire in 1830, and lived at Claremont until June, 1831, at which time he became secretary of state, and again removed to Concord. In 1835 George Thompson, the English anti-slavery lecturer, visited Concord and Metcalf was one of the citizens who formally met to denounce him as "a foreign emissary" who was assailing the institutions of the country. During his secretaryship, which was held for five years, Metcalf declined the attorney-generalship. In 1838-40 he was a clerk in the treasury department in Washington, then after a residence at Plymouth, N. H., he, in 1841, opened an office at Newport. He was register of probate for Sullivan county in 1845-51; chairman of the committee to compile the state laws in 1850; represented Newport in the legislature in 1852 and 1853. The Know-Nothing party nom-

inated him as its candidate for the governorship in 1855, and he received 32,769 votes out of a total of 64,690. In 1856 he was nominated but fell short of an election by the people and was placed in office by the legislature. He was a man of varied acquirements and sound judgment. He was married; first, in January, 1835, to Lucretia Ann, daughter of Nathan Bingham, of Claremont, who died in 1836; second, on Nov. 10, 1843, to Martha Ann, daughter of Capt. John Gilmore, of Newport, who bore him two sons and two daughters. Gov. Metcalf died at Claremont, N. H., Aug. 26, 1858.

HAILE, William, twenty-eighth governor of New Hampshire (1857-59), was born at Putney, Windham co., Vt. May, 1807, son of John and Eunice (Heury) Haile. When he was fourteen years of age the family removed to Chesterfield, N. H., and not long after that he became a member of the family of Ezekiel Pierce, Sr. After teaching for two years, he in 1823 entered Mr. Pierce's store as a clerk; but five years later borrowed a small sum and opened a store of his own at Centre village. His attention having been called to the abundant water power at Hinsdale, he became convinced that the place was destined to become an important one, and removing thither about 1835, continued merchandizing until 1846, when he engaged in the lumber business. In 1849 the firm of Haile & Todd, manufacturers of cashmerettes, was formed; later the style became Haile, Frost & Co. He represented Hinsdale in 1846-54 (two years excepted); sat in the state senate in 1854-55, and was president the latter year; in 1856 again entered the legislature, and in that year was elected governor. In 1857 Gov. Haile removed to Keene, and was occupied with business there until his death. He was married at Chesterfield, in 1828, to Sabrina Shaw, daughter of Arza and Lydia (Baker) Walker. She bore him three daughters and a son, William Henry, a graduate of Dartmouth in 1856, and a manufacturer at Hinsdale. Gov. Haile died at Keene, N. H., July 22, 1876.

GOODWIN, Ichabod, twenty-ninth governor of New Hampshire (1859-61), was born at North Berwick, York co., Me., Oct. 10, 1796, son of Samuel and Anna Tompson (Gerrish) Goodwin, and descendant of Daniel Goodwin, a large landed proprietor, who settled in Berwick, then a part of Kittery, in 1652. His great-grandfather, Capt. Ichabod Goodwin, distinguished himself at the battle of Ticonderoga, and was especially mentioned in Maj.-Gen. Abernombie's report to Sec. Pitt. Mr. Goodwin was educated at South Berwick Academy, and on leaving it went to Portsmouth, N. H., and entered the counting house of Samuel Lord. Mr. Lord was largely concerned in navigation, and in one of his ships, at twenty years of age, Mr. Goodwin commenced a seafaring life as supercargo. After two very prosperous voyages in this capacity he took charge in the same employ as master and supercargo. He was a successful shipmaster and part owner for twelve years. In 1832 he retired from the sea, but engaged extensively in navigation in Portsmouth, identifying himself with all the prominent enterprises of the place. He was devoted to the interests of the Whig party, and represented Portsmouth in the New Hampshire legislature in 1838, 1843, 1844, 1850, 1854 and 1856, and was a member of the constitutional convention in 1850. He was a delegate-at-large to the conventions which nominated Henry Clay and Gens. Taylor and Scott for the presidency, and was one of the vice-presidents at the two first mentioned conventions. He was for several years the nominee of the Whig party for congress, when the members were chosen at large, but as during that time the Democratic party was dominant in New Hampshire, these nominations were rather marks of esteem than given in the hope of accom-

plishing an election. After the state was divided into congressional districts he received the unanimous nomination of his party for congress at the first convention held in his district. This nomination, made with more than a fair prospect of success at the polls, he declined, owing to business engagements that needed his personal attention. He retained his connection with the Whig party, so long as that party continued to exist in New Hampshire, and was its last nominee for governor. At the rise of the Republican party Mr. Goodwin turned all the force of his will and character towards wheeling New Hampshire into the Republican ranks, and in 1859 was elected governor of the state. Re-elected in 1860, his term of office extended to June 5, 1861, covering the breaking out of the civil war, and the raising and putting into the field of the first two regiments of volunteer infantry from the state. Waite's "History of New Hampshire in the Rebellion" contains the following notice of Gov. Goodwin's course at that time: "This was a most trying period in the history of New Hampshire, and most nobly and patriotically did Gov. Goodwin meet the emergency. The people had confidence in his wisdom and financial skill, and when he issued a call for men and money for the war they responded promptly. There were no funds in the treas-

ury aside from what was required to meet the ordinary expenses of the state, and the crisis demanded the 'sineus of war' in such amount as then seemed very large, and that the quota of men called for by the president from New Hampshire should be raised and made ready for the field without delay. In this dilemma Gov. Goodwin appealed to the banking institutions and private individuals of the state, and they promptly and nobly came forward and placed at his disposal \$680,000. To call an extra session of the legislature would involve delay, and Gov. Goodwin assumed the responsibility to act without special legislative authority. With a portion of these funds (about fifteen percent. of the sum volunteered), the two regiments were put into the field. On the assembling of the legislature in June, in a valdictory address, he plainly and concisely stated the position he had assumed and the motives which actuated him. The legislature at once endorsed all his acts by unanimously passing the 'enabling act,' relieving the governor of his heavy responsibility." Mr. Goodwin's experience and connection with railroad enterprises was large and satisfactory. He became a director in the Eastern Railroad Co., now a part of the Boston and Maine system, a few years after its organization, and was the first president of the Eastern railroad in New Hampshire, which position he held for twenty-five years. He was also a director in the Portland, Saco and Portsmouth Railroad Co. from its beginning; was elected president of that corporation in 1847, remaining in that office for twenty-four years, during which time he successfully carried the road through many difficulties. He resigned this position in 1871, finding the cares too arduous for his advancing years. He was a director of the Piscataqua Exchange Bank (now the First National) from its incorporation, and its president for a number of years, and until his death, and was also a director in the Portsmouth

Savings Bank. An active member of the Unitarian Church at Portsmouth, he did much to promote the interests of the denomination. Gov. Goodwin was married at Portsmouth, N. H., Sept. 5, 1827, to Sarah Parker, daughter of William Rice, a merchant, of Portsmouth. Of seven children, one son, Prof. Frank Goodwin, of Boston, and two daughters survive. The youngest daughter, Susan Boardman, became the wife of Adm. DEXEY, Gov. Goodwin died at Portsmouth, N. H., July 4, 1882.

BERRY, Nathaniel Springer, thirtieth governor of New Hampshire (1861-63), was born at Bath, Sagadahoc co., Me., Sept. 1, 1796, son of Abner and Betsy (Springer) Berry. He was the grandson of John Berry, a captain of infantry in the revolutionary war and of Nathaniel Springer who commanded a company of artillery in the same war and was killed in action. His father, a ship-builder by trade, died in 1802, leaving the family penniless, and at the age of nine Nathaniel became a "chore-boy" in a tavern. In 1807 his mother was married to Benjamin Morse, and in 1809 the family removed to Lisbon, N. H., but in a few months' time Nathaniel apprenticed himself to a tanner and carrier at Bath, N. H., and there enjoyed the privileges of a public library. At the age of twenty-two he removed to Bristol to take charge of a tannery on a salary of \$200. In 1820 he began the manufacture of leather, and in 1826 introduced into New Hampshire the process of tanning with hot liquids. The business was removed to Hebron in 1840 and was conducted until 1857, when his tannery was burned. He made his home at Andover, Mass., from 1864 until 1878; in 1878-83 lived at Milwaukee, Wis., with a married daughter; then returned to New Hampshire to end his days at Bristol with his son. He was justice of the peace and quorum for New Hampshire for twenty-three years and for Massachusetts five years; was judge of the court of common pleas in 1841-50 and judge of probate in 1856-61; represented Bristol in the legislature in 1828, 1833, 1834 and 1837 and Hebron in 1854; was state senator from the eleventh district in 1835 and 1836. Mr. Berry acted with the Democratic party for twenty-two years and in 1840 was a delegate to the national convention at Baltimore.

The action of that convention regarding slavery caused him to leave the party and to aid in organizing the Free-soil party, whose first candidate for governor he became in 1851. In the same year his name headed the ticket of the Liberty party. At the election in 1846 there was no choice, but in June the Whig, Federal and Liberty representatives in the legislature united, electing John P. Hale speaker and Anthony Colby governor. Mr. Berry received the nomination at four succeeding conventions. As a Republican candidate in 1861 he carried the state by 3,000 majority over two candidates, and in 1862 was re-elected. In the first year of his administration he appointed ex-Governor Colby adjutant-general and ex-Gov. Currier one of his council. During his term of office he enlisted, armed and equipped fourteen regiments of infantry, three companies of sharpshooters, four companies of cavalry and one of heavy artillery; in all over 15,000 men, all but one regiment being sent to the front. He was well qualified for the work, for in his early manhood he had been connected with the 34th regiment New Hampshire militia, and had risen to the rank of colonel. Five times at his own expense he visited Washington on business concerning these troops. In 1862 he was one of the twenty-two governors of northern states who in convention at Altoona, Pa., prepared an address to Pres. Lincoln pledging their continued support, and was chosen to address the chief magistrate when it was presented. "He retired from the office with the respect and good

wishes of all in the state. . . . In all he did he was influenced by pure and patriotic motives. His official acts were characterized by care and prudence and his state papers were clear and wise." Gov. Berry was a man of strong piety; was an active supporter of the Methodist Episcopal Church at Bristol, a class leader for thirty years, and represented New Hampshire at the general conference of his denomination in 1872. While at Bristol he was a member of the board of trustees of the Conference Seminary at Northfield; was elected president of the Grafton County Bible Society at its organization; founded several Sunday-schools, and formed the first temperance society in the state, among the men in his tannery. He was married at Bath, N. H., in January, 1821, to Ruth, daughter of James and Ruth (Weeks) Smith, who bore him a son and daughter. She died in 1857, and in 1859 he was married to Mrs. Louisa Farley, of Andover, Mass., who died in 1878. Gov. Berry died at Bristol, N. H., April 27, 1894.

GILMORE, Joseph Albree, thirty-first governor of New Hampshire (1863-65), was born at Weston, Windsor co., Vt., June 10, 1811, son of Asa and Lucy (Dodge) Gilmore. His educational advantages were extremely meagre. While a mere youth he made his way to Boston, whither an elder brother (Addison Gilmore, afterwards distinguished as a railroad manager) had preceded him. Here he obtained employment in a store. At the age of twenty-one he was in business for himself, and was married to Ann Whipple, of Dunbarton, N. H. On

the completion of the Concord (N. H.) railroad (1842) he established a large wholesale grocery at Concord, which, so long as that town was the northern terminus of the New England railroad system, did an immense business. In 1848 Mr. Gilmore became construction agent, and subsequently was superintendent, of the Concord and Claremont railroads. Still later he became superintendent of the Manchester and Lawrence, the Concord and other connecting roads—a position which he filled with great shrewdness, tact and enterprise. In 1858 Mr. Gilmore was elected a member of the senate of New Hampshire on the Republican ticket. In 1859 he was re-elected and made president of that body. In 1863 he received the Republican nomination for governor of New Hampshire, but as there was an "Independent Republican" candidate in the field, there was no election by the people. Mr. Gilmore was, however, elected by the legislature. In the following year he was re-elected by the people, receiving 5,666 more votes than his Democratic opponent. Mr. Gilmore became governor at the gloomiest period in the civil war. New Hampshire had sent to the front 15,500 men, who had been prompted to enlist mainly by patriotic motives. To meet the subsequent demands of the general government, it was necessary to offer excessive bounties and even to resort to drafting. Meanwhile, there was in New Hampshire a large element bitterly opposed to the war, which could only be held in check by the sternest repressive measures. In these circumstances, Gov. Gilmore raised and equipped the 18th regiment of New

Hampshire infantry, the 1st regiment of New Hampshire cavalry, and the 1st regiment of New Hampshire heavy artillery, besides sending recruits to other regiments which swelled the state's contribution to the Federal army from 15,500 to 33,258—a number 1,814 in excess of New Hampshire's quota. Gov. Gilmore carried into the work thus imposed upon him the same enterprise, energy and enthusiasm which had characterized him as a merchant and a railroad man, and justly deserves to be remembered as one of the great war governors. Upon his retirement from office his active life practically ended, and he died at Concord, N. H., after a long and painful illness, April 17, 1867.

SMYTH, Frederick, thirty-second governor of New Hampshire (1865-67), was born at Candia, Rockingham co., March 9, 1819, third child of Stephen Smyth and Dolly, daughter of Isaiah Rowe, a veteran of the French and revolutionary wars. His great-grandfather, Chase Smyth, went from Brentwood to Candia about 1771. At the age of thirteen he went to Lowell, Mass., in search of employment, but soon returned to his native town, engaged in trade, and thus earned enough to pay the expenses of a term at Phillips Academy, Andover. In 1839 he removed to Manchester, and for nearly ten years was in business either as a clerk or as proprietor of a store. His next occupation was that of

city clerk; his next (1852-55), that of mayor, and in 1864 he was prevailed on to take the office again. He also aided in locating and building the house of reformation for juvenile offenders, now the State Industrial School. In 1857-58 Mr. Smyth sat in the state house of representatives. At the Republican convention in 1861 he was appointed one of the agents to obtain subscriptions to the national loan. In 1861, also, he was appointed one of the agents of the United States at the International exhibition in London. On his return he devoted himself to the care of the First National

Bank and of the Merrimack River Savings Bank, both of which had been established through his efforts. In 1865 Mr. Smyth was elected governor of his native state, and in 1866 was re-elected to the same position. His administration of affairs during this critical period was such as to elicit unqualified commendation from men of all parties. Financial matters were established on a firm basis, and the credit of the state, which felt the severe strain of war time, was made equal to that of the best. In 1866, by vote of congress, he was made one of the board of managers of the National Homes for Disabled Soldiers, and at the organization of the board Gov. Smyth was chosen one of the vice-presidents. This important place he held for nearly fourteen years, giving to it the most faithful and assiduous service. He delivered numerous agricultural addresses, and sought to stimulate and encourage home industry and enterprise by all legitimate means. In 1878 he was appointed by Pres. Hayes as one of the commissioners on the part of New Hampshire to the international exhibition at Paris. It was the good fortune of Gov. Smyth and his wife to be the recipients of many flattering attentions while in Paris. They were among the guests of the Stanley Club at the dinner to Gen. Grant, and were also present at the reception tendered Gen. and Mrs. Grant by the American lega-

tion. Gov. Smyth was president of the Concord and Montreal Railroad; trustee and treasurer of the New Hampshire College of Agriculture and Mechanic Arts; president of the Franklin Street Congregational Society; president of the First National Bank of Manchester; treasurer of the Merrimack River Savings Bank, and held many other minor offices of trust. In 1866 the faculty of Dartmouth College conferred upon him the degree of B.A. Gov. Smyth was married at Candia, N. H., in 1844, to Emily, daughter of John and Emily (Collin) Lane. She was a lady of many accomplishments, rare personal attractions and refined manners, who died greatly lamented in 1881. He was married a second time in Scotland, Feb. 22, 1885, to Marion Hamilton, daughter of James Cossar. Gov. Smyth died at his beautiful home, "The Willows," in Manchester, N. H., April 22, 1899.

HARRIMAN, Walter, thirty third governor of New Hampshire (1867-69), was born at Warner, Merrimack co., N. H., April 8, 1817, third son of Benjamin Evans and Hannah (Flanders) Harriman, and descendant of Leonard Harriman of Rowley, England, one of the founders of Rowley, Mass., in 1638. He received an academical education; taught for six years in several states; in 1841-51 was a Universalist minister, preaching at Harvard, Mass., and Warner, N. H., and then, with John S. Pillsbury, later governor of Minnesota, opened a general store at Sutton, N. H. In 1849-51 he represented Warner in the lower house of the legislature; in 1851 made stump speeches as a Democrat; in 1853-55 was state treasurer; in 1855-56 was the leading opposer in New Hampshire of Know-Nothingism, and for six months (1855-56) was examiner of claims to bounty lands in the pension office at Washington, soon after being appointed on a commission to appraise Indian lands in Kansas. In the fall of 1856, in company with Lewis Cass, he canvassed Michigan for Buchanan. Harriman again represented Warner in the lower house of the legislature in 1858-59, and in the senate in 1859-61, having defeated his own brother, candidate on the Republican ticket. In the presidential campaign of 1860 he supported Douglas, but Lincoln was his second choice, and the latter and his war policy were vigorously sustained when, in 1861-62, Harriman was editor of the Manchester "Weekly Union." In August, 1862, he recruited, and became colonel of the 11th New Hampshire regiment, which in 1863 was transferred to the department of the Ohio, and aided in protecting the rear of Grant's army at Vicksburg. Early in 1863 Col. Harriman was nominated for governor of New Hampshire by the Republicans and the war Democrats, but was defeated; his candidacy, however, wrought the overthrow of the anti-war party in the state. In February, 1864, through the union of the 9th army corps with the army of the Potomac, Col. Harriman took part in the movement on Richmond, but was taken prisoner at the battle of the Wilderness, and was confined at Charleston, S. C., until Aug. 31, when an exchange of prisoners took place. After a visit to New Hampshire to advocate the re-election of Lincoln he rejoined the army, and at the assault on the defenses of Petersburg, April 2, 1865, commanded a brigade whose leader had been wounded. On June 10th he was discharged from the service, having previously been promoted brigadier general by brevet. In 1865-68 Gen. Harriman was secretary of New Hampshire, and then was advanced to the governor's chair, his plurality over the Democratic candidate, Sinclair, being 3,010. Among the laws passed during his term of office was one creating a department of public instruction, the original bill having been drawn by him, and one adopting the "general statutes" of the state as amended and codified by a commission. Gov. Harriman was renomi-

nated unanimously in 1868, and polled a larger vote than any candidate in New Hampshire had ever received. In that year Dartmouth conferred upon him the degree of M.A. The most important act of his second term was his veto of a bill to abolish usury laws and to fix the highest rate of interest at six per cent. During the presidential campaign of 1868 Gov. Harriman made a tour of the middle and western states advocating the election of Gen. Grant, fully sustaining his reputation as one of the most eloquent and magnetic public speakers New England

ever produced. During Grant's administration (1869-77) he was naval officer at the port of Boston; then returned to New Hampshire, and in 1881 was again elected to the legislature. His principal writings other than editorial were: "History of Warner"; "Boundaries of New Hampshire," published as an appendix to the same, and "Travels and Observations in the Orient" (1883). He was married at Warner, in 1841, to Apphia K., daughter of Capt. Stephen Hoyt. She died without issue in 1843, and in 1844 he was married at Warner to Amira, daughter of

Noah T. and Sally (Bean) Andrews, who bore him a daughter and two sons. Gov. Harriman died July 25, 1884, at Concord, which had been his home since 1872. A "Life," by Amos Hadley, was published in 1888.

STEARNS, Onslow, thirty-fourth governor of New Hampshire (1869-71), was born at Billerica, Middlesex co., Mass., Aug. 30, 1810, son of John Stearns and grandson of Isaac Stearns, both prosperous farmers. His earliest ancestor in this country was Isaac, of Watertown, 1630. Onslow worked on the farm, and attended the district schools and academy until 1827, when he removed to Boston to become a clerk in the house of Howe & Holbrook. In 1830 he joined his brother, John O. Stearns, in Virginia, and was engaged in the engineering department of construction of the Chesapeake and Ohio canal. In 1833 he formed a partnership with his brother, John, and they took contracts for the construction of various railroads, among them the Baltimore and Ohio railroad, the Philadelphia and Columbia, the Germantown, the Philadelphia and Trenton, and a number of other important lines then being built or extended. In 1837 he returned to New England and became interested in the construction of various railroads in the New England states. He was appointed superintendent of the Nashua and Lowell railroad in 1838, resigning the position in 1845 to become agent of the Northern railroad of New Hampshire. In 1844 Mr. Stearns was instrumental in securing the passage of a bill in the New Hampshire legislature, whereby railroad corporations were allowed to secure a right of way by taking land for that purpose, the state paying damages caused thereby from the state treasury, they subsequently paying the damages that the state had paid for a lease of the right of way. Mr. Stearns was manager of the Northern railroad until 1852, when he became its president, and held that position up to the time of his death. The Northern railroad and the branch from Franklin to Bristol was located and built entirely under his superintendence. Mr. Stearns was connected with various other railroads, and was so successful in their management and construction that his services were constantly sought by large railroad corporations. He, however, uniformly declined such offers until

July, 1886, when he accepted the presidency of the Old Colony and Newport railroad in Massachusetts. This he resigned in 1887 on account of ill-health. During this period the Old Colony and Newport railroad and Cape Cod railroad were consolidated under the name of the Old Colony and Newport Co., the Duxbury and Cohasset and South Shore railroad being subsequently added to it. The Old Colony Steamboat Co. was also formed and purchased the stock of the Narragansett Steamship Co., thus establishing in connection with the Old Colony railroad the present Fall River line between Boston and New York. In politics Mr. Stearns was originally a Whig, but afterwards became a Republican; in 1862 was elected by this party to the state senate, and was re-elected in 1863 and chosen president of the senate. In 1864 he was a delegate to and vice-president of the Republican national convention at Baltimore. He was elected governor of New Hampshire in 1869, and on June 3 of that year delivered his first message to the legislature, declining a re-nomination in 1870 on account of ill-health and the pressing demands of his business. The convention refused to accept his withdrawal, and Mr. Stearns was re-elected by a large majority. During his gubernatorial terms he gave particular attention to the financial affairs of the state and reforms in the management of the state prison. The state debt was reduced nearly one-third during that time, while the state tax was reduced more than one-half. The entire management of the state prison was changed by him. The result justified his course, for the prison, which was before ill-disciplined, expensively managed and a constant charge to the state, soon became well managed and produced a satisfactory revenue above its expenses, while the care and condition of its inmates was much improved. Mr. Stearns discharged his duties with ability, impartiality and independence, and in his executive capacity knew no party in the administration of affairs. He was the first Republican gubernatorial governor of New Hampshire who had the hardihood to nominate a Democrat to a position on the bench. He was exact in the performance of his duties as a public official, as he was in his attention to his private affairs; nothing escaped his notice, and no department of the state but received his careful inspection and supervision. His recommendations to the legislature showed the most accurate knowledge of the affairs of the state. Mr. Stearns was one of the originators and officers of the Soldiers' Aid Society of New Hampshire, and was one of its most active and liberal supporters. He was married on June 26, 1845, to Mary A., daughter of Hon. Adin Holbrook, of Lowell, Mass. He died at Concord, N. H., Dec. 29, 1878.

WESTON, James Adams, thirty-fifth and thirty-seventh governor of New Hampshire (1871-72, 1874-75), was born in Manchester, Aug. 27, 1827, son of Amos and Betsey (Wilson) Weston, and a descendant in the seventh generation of John Weston, of Buckinghamshire, England, who participated in the establishment of the colony at Weymouth. John returned to England and died suddenly there, but his son, John, came over in 1644, settled in Reading, Mass., and was the progenitor of the American family. The father of James Adams was prominent in town affairs, was three times a representative of Manchester in the state legislature, and a member of the constitution committee in 1850. James Adams was educated at the district school and at the Man-

Noah T. Stearns

Onslow Stearns

chester and Piscataquog academies. He taught school during the winters, and applied himself to mastering the principles of civil engineering, and in 1846, being then nineteen years of age, was appointed assistant civil engineer of the Concord railroad, and superintended the laying of the second track of that road. In 1849 he was made chief engineer, and so continued during a long series of years. He was also road master and master of transportation of the Concord, Manchester and Lawrence railroad; chief engineer of the Portsmouth railway, constructing a considerable portion of that line, as he did later the Suncook Valley road. He was a Democrat from his youth, and always so continued, and was elected mayor of Manchester, after holding several minor offices, in 1861, and again in 1867, 1869, 1870, 1874. His able administration of the civic affairs of a great city like Manchester led to his nomination at the state convention of 1871 as Democratic candidate for the governorship. His opponent was the Rev. James Pike. Mr. Weston led the poll, but had not a large enough majority to ensure his election by the people. He was elected by the legislature, and the Republicans thus lost control of the state government for the first time since 1851. In 1872 and 1873 he was an unsuccessful candidate, but in 1874 he was again elected, his opponent being Luther M. Cutching. A scattering vote for a third party prevented a choice by the people, and he was again appointed by the legislature. His official integrity and devotion to the interests of the state during his terms of office were acknowledged by his political opponents, and he won and held the respect of both parties. He was deeply interested in all that concerned the prosperity and advancement of his native city, and was largely instrumental in securing for it a purer and more adequate water supply from Lake Massabesic. He was a member of the board of water commissioners; chairman of the board of trustees of the cemetery fund; a member of the committee on cemeteries, and its clerk and treasurer; chairman of the New Hampshire Centennial committee; chairman of the building committee of the soldiers' monument and of the state board of health. He was also appointed by congress a member of the centennial board of finance. In addition to his participation in state and city affairs he had prominent and various business interests. He was trustee of the Amoskeag Savings Bank; president of the City National Bank, which in 1880 was changed to the Merchants' National Bank, of which he continued president. He was one of the projectors and founders of the Guaranty Savings Bank of Manchester in 1879, and served it as trustee and also clerk and treasurer; was treasurer of the Suncook railroad, and director and clerk of the Manchester horse railroad, and was chairman of the finance committee of the New Hampshire Fire Insurance Co. from its inception. Gov. Weston stood high in the Masonic order, and belonged to the Trinity Commandery of the Knights Templars. He was a member of the Congregational church, and, with the exception of a short residence in Concord, always lived in Manchester. He was married, in 1854, to Anna S., daughter of Mitchell and Czrina (Currier) Gilmore, of Concord, who bore him four sons and two daughters. Gov. Weston was a man of great executive ability; cautious, methodical and sagacious; scrupulously exact in the performance of his public and private duties. He died in Manchester, N. H., May 8, 1895.

STRAW, Ezekiel Albert, thirty-sixth governor of New Hampshire (1872-74), was born at Salisbury, Merrimack co., N. H., Dec. 30, 1819, oldest son of James B. and Mehitable (Fisk) Straw. He acquired his education in the schools of Lowell, to which the family had removed, and in the English department of Phillips Academy, Andover, Mass.,

where he gave especial attention to practical mathematics. Upon graduation he was, in the spring of 1838, employed as assistant civil engineer upon the Nashua and Lowell railway, then in process of construction, and in the same year became regular engineer of the Amoskeag Manufacturing Co., of Manchester, N. H. In November, 1841, he was sent by the Amoskeag Co. to England and Scotland, to obtain the information and machinery necessary for making and printing muslin delaines, and the success of the Manchester Print Works, which first introduced this manufacture into the United States, was due to the knowledge and skill he then acquired. He continued in the employ of the Amoskeag Co., and in 1858 assumed entire control of its operations. Mr. Straw represented Manchester in the legislature in 1859-61 and during the last three years was chairman of the committee on finance. In 1861-66 he sat in the state senate, being its president in the latter year. He was also chosen, on the part of the senate, one of the commissioners to superintend the rebuilding of the state house. In 1869 he was appointed by Gov. Stearns a member of his staff. In 1872 he was elected by the Republicans governor of New Hampshire, and was re-elected in 1873. In 1870 he was appointed by Pres. Grant the member from New Hampshire of the commission to arrange for the centennial celebration of the independence of the United States at Philadelphia, and was a member of the executive board of that commission. Gov. Straw was the treasurer and principal owner of the Namasse Mills Co. from its organization in 1856 until its dissolution, and after 1864 its sole proprietor; he was chosen a director of the Langdon mills, the president and one of the directors of the Bldgett Edge Tool Manufacturing Co., and a director in the Amoskeag Axe Co., which succeeded it. He was one of the first directors of the Manchester Gas Light Co., and president from 1856 until his death. He also served as president of the New England Cotton Manufacturers' Association, and of the New Hampshire Fire Insurance Co. The honorary degree of M.A. was conferred upon him by Dartmouth College. Gov. Straw was married at Amesbury, Mass., April 6, 1842, to Charlotte Smith Webster, who died in Manchester, March 15, 1852. To them were born two sons and two daughters. Gov. Straw died in Manchester, N. H., Oct. 23, 1882.

CHENEY, Person Colby, thirty-eighth governor of New Hampshire (1875-77), was born at Holderness, Grafton co., N. H., Feb. 25, 1828, son of Moses and Abigail (Morrison) Cheney, and descendant of John Cheney, an Englishman, who settled at Roxbury, Mass., in 1635, but removed to Newbury the following year. His mother was of Scotch-Irish descent. Person Cheney was educated in the academies at Peterborough and Hancock, N. H., and Parsonsfield, Me., and then entered the employ of his father, a paper manufacturer. The family removed to Peterborough in 1835, where Moses Cheney continued paper manufacturing, and ten years later the son assumed the management of the mill, in 1843 becoming a member of the firm of Cheney, Hadley & Going. He represented Peterborough in the legislature in 1853 and 1854, and was a director of the bank of that town. In August, 1862, he was appointed quartermaster of the 13th New Hampshire volunteers, Col. A. F. Stevens, but in January, 1863, after three months' illness, was

forced to resign, sending, however, a substitute into the field. In 1861-67 he was a railroad commissioner, being elected by popular vote. Removing to Manchester in 1866, he dealt in paper stock and manufacturers' supplies, also engaging in paper manufacture at Gollstown, as a member of the firm of Cheney & Thorpe. As mayor of Manchester in 1873-75, he gave great satisfaction, and the introduction of the fire alarm telegraph system was one of the marked features of his administration. Declining a re-nomination in 1875, he accepted a nomination for the governorship on the Republican ticket, was elected, and in 1876 re-elected. At the close of his term Dartmouth conferred upon him the degree of A.M. In 1886 he was appointed U. S. senator to fill out the unexpired term of Austin F. Pike, and in 1888 was a delegate-at-large to the Republican national convention. He succeeded Hon. Edward H. Rollins on the Republican national committee, was re-elected in 1892, and held that position until his death. From December, 1892, until June 29, 1893, he was envoy extraordinary and minister plenipotentiary to Switzerland. He was president of the American Paper and Pulp Association; president and treasurer of the P. C. Cheney Co., dealers in paper stock, and president of the People's Savings Bank. He was a member of Altamont Lodge, F. & A. M., and similar organizations; of Louis Bell Post, G.A.R.; of the Massachusetts Loyal Legion, and of the Army of the Potomac; was a trustee of Bates College, in which, in 1872, he founded a scholarship, and was a member of the Unitarian Society. Gov. Cheney was married twice: (1) May 22, 1850, to S. Anna, daughter of Samuel Morrison Moore, of Bronson, Mich., who died in 1858; (2) June 29, 1859, to Mrs. Sarah Keith, daughter of Jonathan White, a paper manufacturer, of Lowell, and his wife, Sarah Goss. Mrs. Cheney has been president of the Woman's Aid

and Relief Society of Manchester for many years. Their only child, Agnes Annie, is the wife of Charles H. Fish, agent of the Cochecho Manufacturing Co., of Dover. Gov. Cheney died in Manchester, N. H., June 19, 1901.

PRESCOTT, Benjamin Franklin, thirty-ninth governor of New Hampshire (1877-79), was born at Epping, Rockingham co., N. H., Feb. 26, 1823, only child of Nathan Gove and Betsey Hills (Richards) Prescott. He was educated at Pembroke and Phillips Exeter academies, and at Dartmouth College, where he was graduated with honors in 1846. Teaching and the study of law engaged his attention for the next four years; in 1861 he became associate editor of the "Independent Democrat," the leading anti-slavery paper in the state, at Concord, but in January, 1865, relinquished this position, and from then until June, 1869, was a special agent of the U. S. treasury department for New England. He was secretary of the Republican state committee for fifteen years from 1859. In June, 1872, he was elected secretary of state, and served in this position until June, 1877, with the exception of the year 1874, when the office was held by a Democrat; was secretary of the New Hampshire college of electors of president and vice-president of the United States in 1860, 1864, 1868, 1872, 1876 and 1880. In 1877 he was elected governor of New Hampshire, and was re-elected in 1878. In 1874 Gov. Prescott was appointed a trustee of the New Hampshire College of Agriculture and the Mechanic Arts, and president

of the board the last two years of his life. He was elected a trustee of Dartmouth College by vote of the alumni in 1878, and was a trustee until his death. On May 6, 1880, he was elected a delegate at large to the national Republican convention at Chicago, and was chosen chairman of the New Hampshire delegation while there. For many years he was president of the Bennington (Vt.) Battle Monument Association; was present as governor, and took conspicuous part in the centennial celebration of the battle in 1877; was also president of the day at the laying of the corner-stone of the monument in 1887, and took part in its dedication in 1891. He was elected in 1876 a fellow of the Royal Historical Society of Great Britain, and an honorary member of the Marshfield Club, of Boston, in 1881, and was vice-president of the New Hampshire Historical Society. In November, 1887, he was appointed by Gov. C. H. Sawyer and council a railroad commissioner, which position he held for six years. Gov. Prescott did an unprecedented work in conceiving the idea and executing it so fully of collecting for the state, and for Phillips Academy, at Exeter, Dartmouth College and other institutions, portraits of her distinguished sons and alumni; it was a service of enthusiasm and love. His zeal and persistent labor in this self-imposed tax of strength and money makes him largely the creditor of the present and coming generations. The extent of this work is indicated by the large number secured through his efforts, nearly three hundred in all. Gov. Prescott was married at Concord, N. H., June 10, 1869, to Mary Little, daughter of Jefferson and Nancy (Pearl) Noyes. Their only son, Benjamin F., Jr., fitted for college at Phillips Exeter Academy, and entered the class of 1900, Dartmouth. Gov. Prescott died at Concord, N. H., Feb. 21, 1895.

HEAD, Natt, fortieth governor of New Hampshire (1879-81), was born at Hookset, Merrimack co., N. H., May 20, 1828, son of John and Anna (Brown) Head and descendant of Nathaniel Head, a Welshman, who emigrated to Massachusetts in early colonial days. His great grandfather and grandfather served in the revolutionary war, the former rising to the rank of lieutenant-colonel and losing his life at Bennington. Natt Head, after attending Pembroke Academy, aided his father in farm work, and in a lumbering business to which he succeeded, and then added the manufacture of bricks in association with a brother. Early interested in military affairs, he was one of the first members of the Hookset light infantry; served for four years as drum-major of the 11th regiment; for many years was commander of the Amoskeag veterans of Manchester, and was an honorary member of the Boston lanciers and an ex-sergeant of the Ancient and Honorable Artillery. He also was on the staff of Gov. Gilmore and in recognition of his many services in the department of arms, a military organization formed in Manchester at the close of the civil war was named the Head Guards. After holding various town offices and representing Hookset in the legislature (1861-62) he was appointed adjutant-inspector and served from 1864 until 1870. In this capacity he issued a series of reports giving the history of every officer and private who had ever entered the service from New Hampshire, beginning with 1623 and including the period of the civil war, thus making an invaluable contribution to the annals of the state and nation. Gen. Head's business interests were varied and important. He was a director of the Smeek Valley railroad and of the First National and Merrimack River savings banks of Manchester; was a leading member and president of the State Agricultural Society and originated the plan of holding farmers' conventions. In 1875 he was elected to the state senate but was unseated by a

technicality. In 1876 and 1877, however, he was re-elected and was chosen president of the senate. At the Republican state convention in 1878, which was the first to elect candidates for a biennial term, Gen. Head was nominated upon the first ballot by a decided majority, and at the election, in spite of the rise of the Third (Greenback) party, which drew off many Republicans, he received a majority of 488. His election being for a period of two years he was not a candidate for re-election. During his term many questions arose demanding good sense, wisdom and impartiality on the part of the executive

and it was conceded by men of all parties that Gov. Head met every requirement. The project of a new state prison inaugurated by his predecessor was carried forward to completion, and the case of the murderer, Buzzell, one of the most celebrated in the criminal records of this country, was finally disposed of, Gov. Head refusing to commute the sentence of death, previously passed. On leaving the chair Gen. Head returned to business life, but soon retired on account of ill health. He was a prominent member of several secret organizations and had received all the degrees in the Ancient and Accepted Scottish Rite and all in the Rite of Memphis. Gen. Head was married in Lowell, Mass., in 1863, to Alice M. Sayford, who, with a daughter, survived him. He died at Hookset, N. H., Nov. 12, 1883.

BELL, Charles Henry, forty-first governor of New Hampshire (1881-83), was born at Chester, Rockingham co., N. H., Nov. 18, 1823, son of Gov. John and Persis (Thom) Bell. He was fitted for college at Pembroke and Phillips Exeter academies, and entered Dartmouth in 1838, but in the same year his health obliged him to leave, and he did not return until 1840, when he re-entered the freshman class. Some months of the intervening period were devoted to the study of civil engineering in Boston. Upon leaving college he studied law in the offices of his cousin, Hon. James Bell, of Exeter, and the latter's brother, Hon. Samuel Dana Bell, and was admitted to the bar in 1847. Two years later he removed to Great Falls, N. H., where he practiced, in partnership with Nathaniel Wells. Exeter offered a more satisfactory field, however, and in 1854 Mr. Bell removed to that place. In 1856-66 he was solicitor of Rockingham county, at the same time conducting an important civil business both in his office and in the courts. Charles Doe, chief-justice of the supreme court of New Hampshire, said of him: "A mind more capable of grasping, mastering and presenting legal questions quickly, clearly and thoroughly I have never known." In 1868 he retired from active practice. In 1858, 1859, 1860, 1872 and 1873 he represented Exeter in the state legislature, and in 1863, 1864, in the state senate; was speaker of the house in 1860, and president of the senate in 1864. In his first year in the house he was made chairman of the judiciary committee, an unusual honor for one so young. By appointment of the governor, in 1873, he became a member of the U. S. senate, filling a vacancy until an election in the following June. Nominated for governor by the Republicans by acclamation, and elected by the largest number of votes ever cast for a governor in the

state, he met the expectations of his constituents, and received the approbation of those of the opposite party. His dignity, impartiality, clear judgment and freedom from ambition for personal ends made him a model executive. In 1889 he presided over a convention called to revise the state constitution. Gov. Bell took a warm interest in institutions of learning, especially Dartmouth College, Phillips Exeter Academy, and Robinson Academy, Exeter, serving on the boards of all these, and he wrote much on educational subjects. The main part of his life from 1868 was given to literary pursuits, for which he had ever had a strong predilection; indeed, his first book, a life of Chief Justice William M. Richardson, was published just after he had completed his fiftieth year. Works of his mature years were: "Men and Things of Exeter, New Hampshire" (1871); "Exeter in 1776," pamphlet (1876); "John Wheelwright," with memoir (1876); "Phillips Exeter Academy in New Hampshire" (1883); "History of the Town of Exeter, New Hampshire" (1888); "Bench and Bar of New Hampshire" (1894). All represent the labor of many years, especially the last, with its (nearly) nine hundred biographies.

Gov. Bell was a voluminous contributor to the journals of the day, and made a number of addresses on anniversary and other occasions. An oration on the "Worship of Success" was delivered before the Phi Beta Kappa Society of Dartmouth in 1881, which at that time gave him the degree of LL. D. Gov. Bell was a member of the New Hampshire Historical Association from 1853 until his death; its president in 1868-87. He was a vice-president of the Prince Society, and a member of its council for twenty-one years; member of the New England Historical Genealogical Society for twenty-three years, and contributor to it of valuable papers; of the Royal Antiquarian Society; the Royal Historical Society of Great Britain, and a corresponding member of the Massachusetts Historical Society and others. He was married, May 6, 1847, to Sarah Almitia, daughter of Nicholas Gilman, of Exeter, who died in 1850, leaving two daughters. He was married, second, June 3, 1867,

to Mary Elizabeth, daughter of Harrison Gray, of Boston, and widow of Joseph T. Gilman, of Exeter, who survived him. Gov. Bell died at Exeter, N. H., Nov. 11, 1893.

HALE, Samuel Whitney, forty-second governor of New Hampshire (1883-85), was born at Fitchburg, Worcester co., Mass., April 2, 1823, son of Samuel and Saloma (Whitney) Hale, and descendant of Thomas Hale, of Walton, Hertfordshire, England, and Newbury, Mass. His grandfather, Moses Hale, removed from Newbury to Fitchburg about 1786, and there filled a farm, as did his son after him. Saloma Whitney, born at Westminster, Mass., was seventh in descent from John Whitney, of Islworth, England, and Watertown, Mass. Samuel Hale had the advantage of the district school and the academy of his native town; but as his parents were in moderate circumstances could proceed no further in acquiring an education. He had no particular fondness for farm work, and had a restless disposition which inclined him to leave home and engage in trade. Accordingly, at the age of twenty-two, he joined his elder brother, John Moses, at

Dublin, N. H., and began a business life. Prospering in this, he extended his interest to manufacturing, and in 1859 removed to Keene, where in a small way he began to make chairs, his workmen being about twenty in number; twenty five years later 100 workmen were employed on the premises, the factory having been considerably enlarged, while some 500 women and children outside of the building, in Keene and adjoining towns, were also employed. Another branch of business in which Mr. Hale was largely concerned was the purchase and sale of shoes-peas, his sales in some years amounting to 1,000 bushels per day, most of these being exported to Germany. In 1882 he bought a woollen mill at Lebanon and conducted this in addition to his other interests. He aided in building the Manchester and Keene railroad, and was an owner of large amounts of stock of other roads. He was a director of the Citizens' Bank, of Keene, and of the Wachusett Bank, of Fitchburg, Mass. His home in Keene was a large mansion, built by ex-Gov. Dinsmore; besides this property he had a farm of 300 acres and one of equal extent in Newbury, Vt. He was a member of the Methodist church in early manhood, but at Dublin and Keene was connected with Congregational churches and was a founder of the Second Congregational Church, of Keene, of which he was a pillar of strength in every department of work, giving generously to its needs, and through it to the church of Christ at large. In 1862 he joined the Masonic fraternity and rose to the degree of master Mason. Mr. Hale's first vote was cast for a Free-soil candidate and naturally he joined the Republican party on its organization. In 1866 he was elected to the legislature and the next year was re-elected; in 1869-70 was a member of the governor's council. In 1880 Mr. Hale was selected as one of the delegates to the national Republican convention at Chicago, Blaine being his preferred candidate; then in September of the same year, after an exciting canvass, he became the Republican nominee for governor. He was inaugurated June 7, 1883, and discharged his duties in a most admirable manner. Several new and important measures adopted by the legislature received his sanction. "Great pressure was brought to bear upon him to exercise his power of veto.

He could have done so with reasons which would have seemed sufficient to many, and his action would have been of life-long benefit to himself in circumstances which conspired against him, but he did not hesitate for one moment to choose that course which he thought was for the welfare of the state. He made such appointments as the dignity of the office at his disposal demanded, even at the risk of experiencing the resentment of some who had been his personal friends." He was never heard to speak unkindly of his political opponents or in fact of any one, yet in no respect

was he a weak or time-serving man. His relations to his employees, to his fellow citizens, to the poor or unfortunate made manifest a large and generous nature. His kindly disposition was detected in his face; children were instinctively drawn to him, and strangers put trust in him at sight. Gov. Hale was married at Dublin, N. H., June 13, 1850, to Emelia Marinda, daughter of Joseph Fitch and Nancy (Saunders) Hay. Their children are: William Samuel, now a manufacturer of Keene, and Mary Louise. Gov. Hale died at the home of his elder brother, John M., Brooklyn, N. Y., Oct. 16, 1891, but was buried at Keene.

S. M. Hale

CURRIER, Moody, forty-third governor of New Hampshire (1885-87), was born at Boscawen, Merrimack co., N. H., April 22, 1806, son of Moody and Rhoda (Putney) Currier. His boyhood was passed on a farm, but a love of study and early aspirations led him to leave, that he might acquire a liberal education. After a few months spent at Hopkinton Academy, he entered Dartmouth College, in the class of 1834, his untiring energy soon giving him a prominent place and entitling him to the Greek oration at the graduating exercises. After leaving college he became preceptor of Hopkinton Academy, and inspired his pupils with an enthusiasm for learning; at the same time he began the study of law under Horace Chase. Five years were spent at Lowell, Mass., where he had little success as principal of the high school; then having resumed his law studies and gained admission to the bar, he opened an office in Manchester, N. H., in 1841, also engaging in journalism as one of the proprietors and editors of the Manchester "Democrat." He continued practice for several years with flattering results, appearing in the U. S. courts as well as those of New Hampshire, but soon became interested in manufacturing and other enterprises, and

Moody Currier

founded and was the head of several banking institutions which are among the most prosperous corporations in New Hampshire. He was cashier of the Amoskeag Bank, president and treasurer of the Amoskeag Savings Bank, president of the Amoskeag National Bank, and was the founder, director and chief manager of the People's Savings Bank. He was treasurer of the Concord railroad; director of the Concord and Portsmouth railroad, and president of the Eastern railroad in New Hampshire. In addition, he was a director of the Manchester Mills; treasurer of the Amoskeag Axe Co., and president of the Gas Light Co., also president of the Art Association and trustee of the City Library. In political life he was called to fill nearly every prominent office in the state. He was clerk of the senate in 1843, and a member of that body in 1856 and 1857, serving as president in the latter year. In 1860-61, a most important period, he sat in the governor's council; later, he was a presidential elector; finally he was elected governor on the Republican ticket in 1884, and was inaugurated in June of the following year. His administration is remembered as a model one, and his state papers and speeches are often referred to as examples of appropriateness and grace. The address delivered at the dedication of the statue of Gen. Stark and that in acceptance in behalf of New Hampshire of the statue of Daniel Webster are especially admirable. In his earlier days Gov. Currier contributed original poetry, metrical translations and other literary articles to the magazines and newspapers; many of the poems were distinguished for their classical style, for their polished language and liberality of sentiment, and were afterwards published in a volume entitled "State Papers, Addresses and Poems" (1899). His mind was a storehouse of varied knowledge; familiar with the lore of antiquity, he was also familiar with the literature and many of the languages of modern Europe. In his studies he kept fully up with the developments of modern scientific thought and with the theories and discoveries of the present day, especially in the field of theology. The degree of LL. D. was conferred upon him by Dartmouth and by Bates. Gov. Currier was thrice married, his first wife being Lucretia C. Dustin, of Bow; his second, Mary W. Kidder, of Manchester;

his third, Hannah A. Slade, of Thetford, Vt., who is still living. Gov. Currier died at Manchester, N. H., Aug. 23, 1898.

SAWYER, Charles Henry, manufacturer and forty-fourth governor of New Hampshire (1887-89), was born at Watertown, N. Y., March 30, 1810, eldest son of Jonathan and Martha (Perkins) Sawyer. His ancestors on both sides were among the early settlers of Massachusetts. When he was ten years of age the family removed to Dover, N. H., where he was educated in the public schools and Franklin Academy. At the age of seventeen he entered the

Sawyer Woolen Mills, of which his father and uncle, under the name of F. A. & J. Sawyer, were the proprietors, and at the age of twenty-six he was appointed superintendent of the mill. The concern was incorporated in 1872, and he acted as agent and manager until the death of F. A. Sawyer in 1881, when he became president of the company. He served in both branches of the city council of Dover; was representative to the legislature in 1860, 1870, 1876, 1877; a member of the staff of Gov. Charles H. Bell in 1881, and in 1884 was delegate to the national Republican convention in Chicago.

In 1886 he was elected governor of New Hampshire, and during his term of office he represented the state in many centennial celebrations. His most conspicuous act was his veto of the so-called Hazen bill, a measure designed to facilitate the leasing of certain railroads. This was promoted by one powerful railroad and opposed by another. It having been proved by testimony given before a legislative committee that attempts had been made by both the friends and opponents of the measure to buy the votes of members of the legislature, the governor vetoed the bill; acting in analogy to the principle which induces courts of justice to refuse to help either of the parties to an illegal transaction. His course, though much condemned in certain quarters, was that of a courageous, wise and patriotic man. He has been a director and trustee in a number of railroads, banks and other institutions; is a Mason, became a member of Strafford lodge in 1865; was master of the lodge, and eminent commander of St. Paul Commandery, Knights Templar. Mr. Sawyer was married, Feb. 8, 1865, to Susan Ellen, daughter of Dr. James W. and Elizabeth (Hodgdon) Cowan, of Dover, by whom he had four sons and a daughter.

GODELL, David Harvey, forty-fifth governor of New Hampshire (1889-91), was born at Hillsboro, N. H., May 6, 1834, son of Jesse R. and Olive A. (Wright) Goddell and grandson of David and Mary Raymond. His parents removed to Antrim when he was seven years of age, and there he attended the common schools, also the Hancock Academy. He continued his studies at New Hampshire and Framosetown academies, and began his collegiate course at Brown, where he took a high stand in mathematics and Latin; but the decline of his health in his sophomore year obliged him to refrain from study, and he spent the next two years on his father's farm. He then taught for two terms at Hubbardstown, Mass., one at New London Literary and Scientific Institution, and one at Leominster, Mass. In 1856 he became treasurer and bookkeeper of the Antrim Shovel Co., and in 1858 general agent of the company; he served in this capacity for six years, the three latter

years as agent of the Treadwell Co., of Boston, which had bought the business. They in turn sold to Oakes Ames, and Mr. Goodell, in partnership with one of the Treadwells, began the manufacture of an apple paper, which he had invented, and for which he obtained a patent in 1864. This venture formed the nucleus, after sundry reverses, of the eminently successful Goodell Manufacturing Co., which Mr. Goodell established in 1875 for the manufacture of table cutlery, seed sowers, fruit and vegetable purers and other labor-saving devices. Gov. Goodell was actively interested in the science of agriculture; cultivated the large farm he inherited from his father by the latest and most improved methods; was an active member of the New Hampshire board of agriculture, and a trustee of the New England Agricultural Society. He was also well known throughout his state as an active temperance advocate. In politics he was an ardent working Republican, and represented Antrim in the legislature in 1876, 1877, 1878. Among the important bills passed during his term of service as governor was the one for the erection of a new state prison. From April 23d until July 1, 1890, David A. Taggart was acting governor. He was married, Sept. 1, 1857, to Hannah J., daughter of Jesse T. Plumer, of Goffstown, N. H.

TUTTLE, Hiram Americus, forty-sixth governor of New Hampshire (1891-93), was born at Barnstead, Belknap co., N. H., Oct. 16, 1837, eldest son of George and Judith Mason (Davis) Tuttle. His great grandfather, John Tuttle, removed to Barnstead in 1776, from the Back river district, Dover, where a branch of the family had lived ever since the settlement at that place of John Tuttle, an Englishman, who emigrated prior to 1641. His grandfathers, Col. John Tuttle and Samuel Davis, were in service during the revolutionary war, and in four great conflicts in which this country has been engaged members of the Davis family have borne arms. When Hiram Tuttle was nine years of age the family removed to the adjoining town of Pittsfield, where an academy he attended. After having been engaged in several occupations, in all of which he showed industry and faithfulness, at the age of seventeen he became connected with the clothing establishment of Lincoln & Shaw, Concord, where he remained for several years. He won the confidence of his employers, who gave him the management of a branch store at Pittsfield, of which he soon became the proprietor. This is one of the largest clothing houses in the state. He has also become an extensive holder of real estate, and has erected many dwelling houses and buildings for business purposes. On attaining his majority, in 1859, Mr. Tuttle expressed his intention of voting the Republican ticket, though all his relatives were members of the Democratic party. That party had been dominant in Pittsfield since the days of Jackson, under such leaders as Sen. Moses Norris, Jr., Charles H. Butters and Lewis W. Clark, later judge of the state supreme court, all able lawyers

and impressive public speakers. Seeing in young Tuttle qualities that might make him troublesome if opposed to their party, eminently useful if in accord with it, the Democrats tried to retain him in their ranks, but without avail. In 1860 the election of town clerk was made the test of the strength of the two parties, and after an exciting contest Mr. Tuttle was placed in office, the Democrats being defeated for the first time in thirty-three years. Although Pittsfield has a Democratic majority under ordinary circumstances, Mr. Tuttle has received the

C. H. Sawyer

Hiram A. Tuttle

support of a large number of Democrats whenever his name has been presented. In 1873 and 1874 he was representative to the state legislature; in 1875 was appointed on the staff of Gov. Cheney, with the rank of colonel, and in that capacity visited the Centennial exhibition in Philadelphia. He was elected a member of the executive council from the 2d district in 1878, and was re-elected in 1879 under the new constitution for a term of two years. He was a delegate to the Republican national convention in Chicago in 1888, and was an original supporter of Harrison. In 1888 he was an unsuccessful candidate for the governorship; in 1890 was re-nominated, and, though running ahead of his party ticket, failed of a popular election, and was placed in the executive chair by the vote of the legislature. He was a trustee of the Pittsfield Savings Bank, and of Pittsfield Academy; a director of the Pittsfield National Bank and of the Suncook Valley Railroad Co., and was one of the organizers of the Pittsfield Apuduct Co. He was married at Pittsfield, Merrimack co., N. H., in 1859, to Mary C., only daughter, of John L. French. They have a son and a daughter, who is the wife of Frederic King Folsom, of Boston, Mass.

SMITH, John Butler, forty-seventh governor of New Hampshire (1893-95), was born at Saxton's river, Windham co., Vt., April 12, 1828, son of Anami and Lydia (Butler), and descendant of Lieut. Thomas

Smith, of the Scotch-Irish stock which settled Londonderry, N. H. His mother was the daughter of Elijah Butler, M. D., of Wrentham, N. H., and there and at Franconia, N. H., in the academy, he obtained his education. He was employed as a clerk at Honniker, Manchester and New Boston, N. H., until 1863, when he returned to Manchester and bought a drug store. The following year he established a factory for the production of knit goods at Washington, Sullivan co., N. H.; in 1865 leased the Sawyer Woollen Mills at North Wrentham, and in 1866 built a small mill at Hillsboro bridge for the manufacture of knit goods. From time to time the plant

was enlarged under the management of the Contoocook Mills Co., of which Gov. Smith is president and chief owner, and the village has become one of the most flourishing in the state. In 1880 Gov. Smith removed to Hillsboro from Manchester, N. H., where he had resided since 1863, and where he had a considerable interest in real estate. A Republican of the stalwart type, he, in 1884, was an elector on the Blaine ticket; in 1887-89 was a member of the executive council of the state, and in the early part of the campaign of 1890 was chairman of the Republican state committee. In September, 1892, he was nominated by acclamation as a candidate for the governorship, and after a vigorous campaign, conducted largely in person, he was elected, being the first governor for ten years not chosen by the legislature. The Democratic candidate was Luther F. McKinney, at that time member of congress from New Hampshire, and recently appointed minister to Colombia. He was inaugurated, Jan. 4, 1893. During his incumbency forestry and labor commissions were appointed, and statutes of Webster and Stark presented by the state were unveiled in the capitol in Washington. Gov. Smith is a member of the Congregational Church at Hillsboro and is a prominent Freemason. He was married in Boston, Mass., Nov. 1, 1883, to Emma E., daughter of Stephen Lavender. Three sons were born to them, one of whom died in infancy.

BUSIEL, Charles Albert, forty-eighth governor of New Hampshire (1895-97), was born at Meredith (village), Belknap co., N. H., Nov. 24, 1842, son of John W. and Julia (Tilton) Busiel, both residents of Meredith, though his father was a native of Moultonborough. His first ancestor in New England, on the paternal side, was Isaac Buswell, who emigrated from England to Massachusetts about 1637, settling at Salisbury. The Tiltons are prominently connected with the history of New Hampshire. John W. Busiel, whose occupation was that of carding rolls for hand-spinning, removed to Meredith Bridge (now Laconia) in 1846, and there took up in addition the dressing of cloth, hiring for the purpose a saw-mill. In 1853 he bought the water privilege at that place, and in 1854 erected a brick mill, in which he manufactured woollen yarns and satinetts. He was among the first to use knitting machinery, producing underwear and hosiery, and during the civil war hosiery exclusively, superintending the business until his death in 1872. Charles Busiel was educated at public schools, including Gilford Academy, and at the age of nineteen entered his father's mill; began with the minor details of the business and worked upward through the various departments until he was qualified to engage in manufacturing on his own account. This he did in 1863, when he bought the mill since operated by the Pitman Manufacturing Co. In 1869, having disposed of the property just mentioned, he formed a partnership with his brother, John, and they carried on the manufacture of hosiery until the death of their father, when another brother, Frank E., joined them, and the firm name was changed to J. W. Busiel & Co. His interest in the material advancement of New Hampshire in general, as well as of Laconia in particular, led to his connection with a number of railway corporations. He was president of the Lake Shore road, constructed chiefly in consequence of his persistent efforts, and an active director in the Concord and Montreal, the Meredith and Conway, the New Boston, Tilton and Franklin, and the Moosilauke, Profile and Franconia Notch, Whitefield and Jefferson roads. He was president of the Laconia National Bank, of the city of Laconia, and City Savings Bank, also president of the Laconia Press Association, and published the Laconia "Independent Democrat." In 1878 and 1879 he represented Laconia in the state legislature, and was called to serve on important committees, that of railroad, for instance. He was a delegate to the Democratic national convention in Cincinnati, in 1880, and cast his vote for Democratic candidates for the presidency up to 1888; then, preferring the Republican platform on account of its advocacy of protection to home industries, supported Benjamin Harrison, and became identified with the Republican party. In 1893 he was elected first mayor of Laconia, and in 1894 was re-elected. He was also *ex officio* a member of the standing committee on finance. In 1894 he was elected governor by a majority of 10,000, the Democratic candidate being Henry O. Kent. More than twenty measures were vetoed by him, and nearly \$1,000,000 saved. Among them was a bill appropriating \$100,000 to be expended by a commission to prevent the spread of tuberculosis in cattle, and one freeing the toll bridges at the expense of the state. He strenuously opposed what he called the railroad influence in New Hampshire. Later he was brought into national prominence by charges made by him before the civil service commission against the officers of the Republican state committee. Gov. Busiel was married at Concord, Nov. 22, 1864, to Eunice Elizabeth, daughter of Worcester and Nancy (Evans) Preston, and had one child, the wife of Wilson L. Smith, of Philadelphia, Pa. He died at Laconia, Aug. 29, 1901.

RAMSDELL, George Allen, forty-ninth governor of New Hampshire (1897-99), was born at Milford, Hillsboro co., N. H., March 11, 1831, son of Capt. William and Maria Antoinette (Moore) Ramsdell. His ancestors on the paternal side were of English stock, the first to come to this country being Abijah Ramsdell, born about 1695, who emigrated early in life and settled in Lynn, Mass. Another ancestor, Abnestego Ramsdell, was killed in the battle of Lexington. For two or three generations many of his ancestors were extensively engaged in the East Indian and Mediterranean trade. His mother was the eldest daughter of Rev. Humphrey Moore, pastor of the First Congregational Church of Milford for about forty years. On the maternal side, also, he is a lineal descendant of Lieut. Francis Peabody, who came from England to this country in 1637, and from whom the distinguished George Peabody, the philanthropist, was also descended. George A. Ramsdell was brought up on a farm, attending the public and high schools of his native town. He completed his preparation for college in McCollum Institute at Mt. Vernon, N. H., and entered Amherst College in 1853, where he remained but one year, having determined to begin immediately the study of law instead of completing the college course. After pursuing his legal studies with Hon. Bainbridge Wadleigh, of Milford, and with Hon. Daniel Clark and Hon. Isaac W. Smith, of Manchester, in the fall of 1857 he was admitted to the bar, and soon after commenced the practice of his profession in Peterboro, N. H. He was engaged in active practice there about six years, when he became clerk of the supreme court, to fill a vacancy caused by the resignation therefrom of Hon. E. S. Cutter. He then removed to Amherst, but in 1866 to Nashua, where he has since resided. For twenty-three years he occupied this office, and became noted as one of the best informed and accomplished clerks of the country at a time when many eminent and able lawyers were in full practice, and when the court had some of the most distinguished justices of this country on the bench. For ten years he was a member of the board of education, and for twenty years a trustee of the Public Library. Besides being a director in different banks and prominent manufacturing companies of New Hampshire, he was a member of the legislature during 1869-71; in 1876 a member of the constitutional convention, and during 1891-92 a member of the executive council. He was for five years president of the board of trustees of the State Industrial School at Manchester, and has for many years been trustee of the New Hampshire Orphans' Home at Franklin. He has been prominent in the Masonic fraternity. In November, 1896, he was elected governor of New Hampshire by a larger majority than ever before received by any candidate; and was inaugurated Jan. 6, 1897. Gov. Ramsdell was married, Nov. 29, 1860, to Eliza D., daughter of David Wilson, of Deering, N. H., a descendant of one of the Londonderry emigrants. Her mother was Margaret Dinsmore, also a descendant of one of the Londonderry settlers. They had three sons and one daughter. Gov. Ramsdell died at Nashua, N. H., Nov. 16, 1900.

ROLLINS, Frank West, fiftieth governor of New Hampshire (1899-1901), lawyer and banker, was born at Concord, N. H., Feb. 24, 1860, son of Edward H. and Ellen (West) Rollins, the former a native of Rollinford, the latter of Concord. He is descended from James Rollins or Rawlins, who emigrated to Massachusetts in 1632, settling in Ipswich, and became a resident of Dover, N. H., about 1642. One of the emigrant's sons, Thomas, was a member of the "dissolved assembly," which in 1683 had attempted an insurrection against the royal governor,

Cranfield. Another of the family, Ichabod, great-great-grandfather of the governor, was a member of the Exeter convention of 1775; served on the committee of ways and means of furnishing troops and supplies for the patriot troops; was a member of the convention which formed an independent state government in 1776; was judge of probate in 1776-84, and subsequently was a member of the executive council. The town of Rollinford, set off from Somersworth, was named for him. Edward Henry Rollins, father of the governor, represented his native state in the lower house of congress in 1861-67, and in the senate in 1877-83. The son was educated in the public schools of Concord, at the Massachusetts Institute of Technology, where he was graduated in 1881, and at the Harvard Law School, which he left before the course was completed, to study in the office of John Y. Mugridge, at Concord. In August, 1882, he was admitted to the bar, but in 1884 entered the banking house of E. H. Rollins & Sons, becoming vice-president after the incorporation of the company, and in 1893 taking charge of the Boston office, while retaining his residence in Concord. He was elected to the state senate by the Republicans in 1895, was chosen president of that body, and served for two years. In 1898 he was nominated as a candidate for the governorship, and polled 14,730 votes against 35,653 cast for Stone, the Democratic candidate, his plurality being 9,927. Soon after taking the chair Gov. Rollins advanced the idea of an "old home week," a period during which, every summer, those who had emigrated from New Hampshire might revisit their birthplaces, and those who had remained might join with them in various celebrations calculated to foster a spirit of loyalty to the state and pride in its welfare. Aided by the granges and the newspapers, Gov. Rollins made the movement popular. Nearly 100 towns and cities observed the week in 1899, and fully 10,000 people returned to New Hampshire, while in 1900 the numbers were still greater. Other states have adopted this custom,

which, aside from sentimental effects, has resulted in such material benefits as the formation of village improvement societies, good road societies, the buying back of old homesteads, and the increase in summer visitors. He was a member of the New England delegation which, in 1896, journeyed to Canton, O., to call on Mr. McKinley, and was selected to make the address on that occasion. Gov. Rollins was connected with the 1st brigade, New Hampshire national guards, for five years, rising from private to assistant adjutant-general, with the rank of colonel. He is a communicant of St. Paul's Episcopal Church, and a trustee of St. Mary's School for Girls, both at Concord. Besides magazine articles and short stories, he has published "The Ring in the Chime"; "Break or Day Tales"; "The Twin Hussars," and "The Lady of the Violets." In 1893 Dartmouth College conferred upon him the degree of M.A. Gov. Rollins was married at Concord, N. H., Dec. 6, 1882, to Katharine W., daughter of Francis H. Pecker. They have one son.

JORDAN, Chester Bradley, fifty-first governor of New Hampshire (1901-03), was born at Colebrook, Coos co., N. H., Oct. 15, 1829, son of Johnson and Minerva (Buel) Jordan. His earliest American ancestor, Rev. Robert Jordan, one of the

Frank West Rollins

pioneers of the Church of England in this country, settled on Richmond island, off the coast of Maine, in 1640. He performed the duties of judge as well as clergyman. Being suspected of hostility to the Puritan government, he was imprisoned in Boston jail in 1663, and additional misfortune befel him in the burning of his house by Indians. Benjamin Jordan, the governor's grandfather, volunteered twice in the Continental army as a substitute for his father, and then enlisted for two years, receiving his discharge in 1780. Gov. Jordan's mother was the daughter of Benjamin and Violetta (Sessions) Buel, of Hebron, Conn. Johnson Jordan, his father, was a farmer in modest circumstances, but rich in reputation as a man of high honor and unflinching industry. The son's education was obtained in district schools, in Colebrook Academy, and at Kimball Union Academy, Meriden, N. H. While a student he began teaching, and he continued in this employment for a number of years, Colebrook and the adjoining towns being the scene of his labors. He also held town offices; worked in a hotel, in starch mills and saw-mills and on farms, and finally in 1868 was appointed clerk of the supreme court for Coos county, and removed to Lancaster, the county seat. Here he took up the study of law in connection with his duties as clerk. In 1875 he was admitted to the state bar, and in 1881 to the U. S. court for the district of New Hampshire. In 1880 he was elected to the lower house of the state legislature, and in 1896 to the state senate, and served for two years in each, holding the office of speaker in 1881 and president of the senate in 1897. In 1900 he was nominated for governor on the Republican ticket, Frederick E. Potter, of Portsmouth, being the Democratic candidate. He received the largest vote (53,891) ever given a New Hampshire man, and a plurality of 18,935. Among important legislative bills signed by him are: To establish a home for the feeble minded; creating a dual court of five judges each; to fix the boundary line between New Hampshire and Massachusetts; for a constitutional convention; to fix representation in the lower house; to regulate state printing; indeterminate sentences; in behalf of Agricultural College, Dartmouth College, Normal School, Asylum for Insane, Pan-American exposition; for mountain roads; a new fish and game code. Gov. Jordan, by virtue of office, is commander-in-chief of the army and navy. He served on Gov. Straw's staff in 1872-73, and is an honorary member of most of the regimental organizations of the state. He is president of the Coos and Grafton Bar Association; a member of the Lancaster Club; the New Hampshire Historical Society; the Webster Historical Society, of Massachusetts, and has long been connected as a director with the banks of Lancaster. He is a Freemason. Gov. Jordan has had considerable experience in journalism, having always written for the press, and having at one time owned the "Coos Republican." The publications of the Bar Association and the Historical Society have been enriched by biographical sketches from his pen, and the "History of Coos County" also contains articles of a like nature by him. The degree of A. B. was conferred upon him by Dartmouth in 1881. He was married at Lancaster, N. H., July 19, 1879, to Ida R., daughter of Oliver and Roxannah (Wentworth) Nutt. They have two sons and a daughter living.

WAGENER, Johann Andreas, journalist and poet, was born at Sievern, near Bremerhafen, Germany, July 23, 1816. At the age of sixteen he came to New York city as a merchant, and after two years' stay went to Charleston, S. C., where he entered upon a journalistic career. He became editor of the "Tutor," the first German journal in the southern states, and was the founder of the first

German church congregation of that city. When the civil war broke out Wagener, with other Germans of Charleston, took an active part in it, and became commander of companies A and B, militia organizations of the German artillery of the Confederate army. These two companies served until the war ended, and Wagener attained the rank of general. In 1871 he was elected mayor of Charleston. He wrote a history of German settlements in the South that was published as a series of sketches in the "Pioneer," and a number of German poems. His death occurred in Charleston, Aug. 28, 1876.

TREMMAIN, Lyman, jurist and congressman, was born at Oakhill, Greene co., N. Y., June 14, 1819, son of Levi and Mindwell (Lyman) Tremmain, who had removed from Berkshire county, Mass., in 1812. His grandfather, Nathaniel Tremmain, was a revolutionary soldier. He was educated at the Kinderhook (N. Y.) Academy, and having read law with John O'Brien, of Durham village, and with Samuel Sherwood, of New York city, he was admitted to the bar in 1840, and formed a partnership with his first law instructor. He was elected supervisor in 1842, and was appointed district attorney in 1846. In the following year he was elected county judge, and was re-elected in 1851; but owing to some legal question pertaining to the returns, he himself doubted the election, and though the certificate was given him, his sense of honor would not permit him to accept it. In 1853 he removed to Albany and formed a partnership with Hon. Rufus W. Peckham. In 1857 he was elected attorney-general on the Democratic state ticket; but on the outbreak of the civil war he severed his connection with this party, thereafter identifying himself with the Republicans, by whom he was nominated in 1862 for lieutenant-governor. In 1865 he was elected to the state legislature, serving until 1868, and becoming speaker of the house. In 1872, though urged to accept the nomination for governor, he declined; but in the same year was elected congressman-at-large, over Samuel S. Cox, and served on the judiciary and other important committees until 1875. As a lawyer he stood in the very front rank, and to him probably more than to any other man was due the conviction of William M. Tweed, of New York city. His wife was Helen, daughter of David Cornwall, who was a captain of the revolutionary forces and the founder of Cornwallville, Greene co., N. Y. They had three sons and one daughter. One son, Frederick Lyman (b. June 13, 1843; d. Feb. 8, 1865) became lieutenant-colonel of the 10th New York cavalry, and while in command of his regiment was mortally wounded at the second battle of Hatcher's run, Feb. 6, 1865. Hon. Lyman Tremmain died in New York city, Nov. 30, 1878.

HARLAN, James, lawyer and congressman, was born at Frankfort, Mercer co., Ky., June 22, 1800, son of James and Mary Harlan. His father was a Virginian, who removed to Kentucky in 1774. James acquired a thorough English education, and was employed in a mercantile house in 1817-22. He then studied law, was admitted to the bar in 1823, and entered upon the practice of his profession at Harrodsburg, Ky., obtained an extensive business, and became prominent both as a lawyer and a politician. In 1829 he was appointed prosecuting attorney for his circuit, and held that office until 1834. On the Whig ticket he was elected a representative to congress in 1835, and re-elected in 1837. During his last session he was prominent as chairman of the committee for investigating defalcations. He was secretary of state for Kentucky, 1840-44, and in 1841 was a presidential elector. He was elected to the state house of representatives in 1845, and in 1850 was appointed attorney-general of Kentucky, holding the last mentioned office until 1854.

Later he was appointed by Pres. Lincoln U. S. attorney for the district of Kentucky, serving in the position until his death, which occurred at Frankfort, Ky., Feb. 18, 1863.

BOCOCK, Thomas Salem, speaker of the Confederate congress, was born in Buckingham county, Va., May 16, 1815, son of John Thomas and Mary (Flood) Boccock. His education was begun under the care of his eldest brother, Willis P. Boccock (1807-87), who was attorney-general of Virginia, and, entering Hampden-Sidney College, he was graduated in 1838. He then studied law with his brother, and was admitted to the bar, practicing at Appomattox Court House, Va. He served for several sessions as a member of the Virginia house of delegates, was elected commonwealth attorney of Appomattox county in 1845, and in the following year was elected a representative in the 30th congress, being re-elected continuously until 1861, and serving for many years as chairman of the committee on naval affairs. Several times he acted as the presiding officer. He had been a close candidate for speaker of the house before his resignation, and after the secession was elected to that office in the Confederate congress, Feb. 18, 1862. He served as chairman of a committee sent to Pres. Davis for the purpose of protesting against several features of his administration, but he was a loyal upholder of the Confederacy throughout the war. After the establishment of peace he was again a member of the Virginia house of delegates. He was one of the joint authors of the Boccock-Fowler bill, designed to relieve the financial troubles of Virginia after the reconstruction period, and was sent as a delegate to the national Democratic conventions of 1868, 1876 and 1880. He was the attorney for the Atlantic, Mississippi and Ohio Railroad Co., and later for the Richmond and Alleghany. A large law and miscellaneous library was collected by him throughout his career. He was of a genial and conciliatory disposition, and was often called on to act as peacemaker when in congress. Pres. Buchanan valued his advice highly. He was married, in 1846, to Sarah P. Flood, who died, leaving one daughter, and second, to Annie, daughter of Charles James Faulkner, minister to France under Pres. Buchanan. Mr. Boccock died near Appomattox Court House, Va., Aug. 20, 1891, survived by Mrs. Boccock, one son and four daughters.

GRIFFIN, Simon Goodell, soldier and legislator, was born at Nelson, Cheshire co., N. H., August 9, 1824, son of Nathan and Sally (Wright) Griffin. Both his grandfathers, Samuel Griffin and Nehemiah Wright, were revolutionary soldiers and both were in Reed's regiment and fought from behind the rail fence at Bunker hill. His first American ancestor was Humphrey Griffin, who died at Rowley, Mass., 1661. Simon Griffin attended only the district schools of Nelson, but began a successful career as a teacher at the age of eighteen. While teaching he studied law; next represented his native town for two years in the legislature, and was admitted to the bar at Concord, in 1860. The civil war breaking out, he volunteered as a private, and was chosen to the command of the company, and was mustered into the U. S. service as captain of company B, 2d New Hampshire volunteers. He commanded his company at the first battle of Bull run, and was promoted to lieutenant colonel, and soon afterward to colonel of the 6th New Hampshire volunteers. He commanded his regiment at the battles of Camden, N. C. — in Burnside's expedition — second Bull run, Chantilly, South mountain, Antietam, and Fredericksburg, handling it with skill and sound judgment. In 1863 he commanded a brigade under Burnside, in Kentucky, and under Grant and Sherman at Vicksburg and Jackson, Miss.; the 2d division of the 9th corps in

its march to East Tennessee; and the following winter was in command of Camp Nelson, Ky., with about 9,000 men, to protect that important depot of supplies from threatened raids. In the spring of 1864 the 9th corps reorganized at Annapolis, Md., and Col. Griffin was assigned to the command of the 2d brigade, 2d division. The corps joined the army of the Potomac, and was engaged in the battle of the Wilderness, May 6th. At Spotsylvania, for his prompt and vigorous support of Hancock, in his famous charge, and holding the enemy in check in his countercharge, he was promoted to brigadier-general of volunteers, made on the field of battle, upon the recommendation of Gens. Grant and Burnside. He commanded his brigade at the battles of North Anna river, Topopotomy creek, Bethesda church, and Cold Harbor. Arriving in front of Petersburg at daybreak on the 17th of June, with his own and Curtin's brigade, he forced the enemy's lines at the Shands house, capturing about 1,000 prisoners, four pieces of artillery, 1,500 stands of arms and one stand of colors. He led his brigade gallantly at the time of the mine explosion at Petersburg, and at Weldon railroad, Poplar Spring church and Hatcher's run. On the 2d of April, 1865, he led the assaulting column of the 2d division, 9th corps, in connection with Gen. Hartranft, of Pennsylvania, with his division, that broke through the enemy's main line,

at the Jerusalem plank road and won Petersburg and Richmond. For gallantry in that act he was brevetted a major general of volunteers. Gen. Potter having been severely wounded, Gen. Griffin succeeded to the command of the 2d division, 9th army corps, which he led at the surrender of Lee, at the grand review in Washington, and until it was mustered out of service. At the close of the war he resided at Keene, N. H., and represented that town in the legislature in 1866, 1867, 1868, serving the last two years as speaker of the house. Dartmouth College conferred upon him the honorary degree of M. A. In 1871, and again in 1873, he was nominated for congress by the Republicans, but the opposition party carried the state. In 1887 and 1888 he was commander of the Massachusetts Commandery of the Military Order of the Loyal Legion of the United States. In 1850 he was married to Ursula J., daughter of Jason Harris, of Nelson, who died in 1852. In January, 1863, he was married to Margaret R. Lamson, of Keene, N. H., by whom he has two sons.

ROBINSON, John Kelly, was born in Summit county, O., May 26, 1842, son of John Carter and Margaret M. (Kelly) Robinson. A maternal ancestor, Col. John Kelly, served in the revolutionary war. After attending the common and high schools of Akron, O., Mr. Robinson became a clerk in his

brother's book-store at Akron, and while there he studied telegraphy and served as an operator for about two years. In 1862 he began to sell matches for the firm of George and O. C. Barber, whose factories were the foundation of the great Diamond Match Co., and before long he established a trade that taxed to the utmost the productive capabilities of the factory. In the following year he was admitted to partnership in the Barber Match Co. He obtained a patent for the process of manufacturing a diamond shaped match in 1871, which, being a strong and a quick burner, became a great favorite with the public, and gave prestige to the firm that produced it, and finally a name to the greatest match manufacturing concern in the world. Mr. Robinson remained in control of the selling department of the Barber Co., and in 1880 the Barber factories produced more than one-fourth of all the matches sold in the United States. He became president of the Barber Co., and in 1881, when it was merged with the Diamond Match Co., he was elected a director. He took charge of sales in the Western states, and soon afterwards of all the sales in the United States and its territories. Since 1890 he has been treasurer of this great concern. Beginning with a capital of \$2,250,000, this company now (1901) has \$15,000,000 invested in its home and foreign factories, patent rights, pine forests, saw-mills and other requisites for the production of matches. One of

the largest of the company's factories is at Liverpool, England, which has a capacity of 15,000 gross boxes of matches daily, and so solicitous for the comfort and health of its employes has the company been that a law was passed in Great Britain compelling all match factories there to adopt its methods of sanitation and protection. Mr. Robinson is also vice-president of the Sterling Boiler Co., and the Diamond Rubber Co., and was an organizer of the Tropical Fibre Co., the Palmetto Brush Co., and the Carrara Paint Co. He is a member of the Washington

Park Club; the Calumet Club; the Essex (Mass.) Club, and several golf clubs. He was married, in 1868, to Henrietta E., daughter of George Barber, the founder of the Barber Match Co., and has four daughters: Margaret, Frances, Laura and Eleanor, and one son, John K. Robinson, Jr.

KIDDER, Daniel Parrish, clergyman and author, was born at Darien, Genesee co., N. Y., Oct. 18, 1815. After preparing for college at the Genesee Wesleyan Seminary, Lima, N. Y., he spent one year at Hamilton College, and was graduated at Wesleyan University, Middletown, Conn., in 1836. Though he began to teach languages in Amenia Seminary, New York, a short time later, he joined the Methodist Conference at Genesee and was given a pastorate at Rochester, N. Y. In 1837 he went as a missionary to South America, and afterwards gave the result of his observations and experience there in a valuable volume. In 1844 he was put in charge of the Sunday-school department of the Methodist Book Concern, in which he labored for twelve years. Here he revised, edited and compiled 800 books for Sunday school libraries, besides editing the "Sunday-school Advocate" and preparing the standard catechisms of the church. In 1856 he was called to the chair of practical theology in the Garrett Biblical Institute at Evanston, Ill., where he labored for fifteen years, resigning in 1871 to ac-

cept the same position in the Drew Theological Seminary at Madison, N. J. In 1880 he was elected secretary of the board of education, and by his efforts its annual income was increased from about \$3,000 to \$30,000. In 1887 he resigned on account of failing health and removed to Evanston, Ill. The degree of D. D. was conferred upon him in 1851 by McKendree College, and later by the Wesleyan University. His works hold high rank in theological literature, among them being "Mormonism and the Mormons" (1842); "Demonstration of the Necessity of Abolishing a Constrained Clerical Celibacy," translated from the Portuguese of D. A. Feijo (1844); "Sketches of a Residence and Travels in Brazil," a work in two volumes (1845); "Brazil and the Brazilians," jointly with Rev. J. C. Fletcher (1857); "Treatise on Homiletics" (1864); "The Christian Pastorate" (1871); and "Helps to Prayer" (1874). For seven years he prepared a weekly discussion of the International Sunday-school lesson for the "Golden Days," a periodical for young people. His death occurred at Evanston, Ill., July 29, 1891.

KRUELL, Gustav, wood engraver, was born in Düsseldorf, Germany, Oct. 31, 1843. His boyhood was passed on his father's farm until he was apprenticed at the age of fourteen to an engraver in his native place, with whom he remained for five years. After passing another year in study at Leipzig, in 1864 he opened an office in Stuttgart, the firm name being Kruell & Michael. They worked for many well-known houses in Germany, Switzerland and Austria, often finding it necessary to employ twenty or more engravers to fill the orders; but the Vienna panic of 1872 interrupted their prosperity, and with the intention of developing his own talent Mr. Kruell decided to come to America. In August, 1873, he arrived in New York city, and having been promised employment with Harper & Bros., he entered their office, remaining there for five years, and retaining his connection afterward while working for Scribner's, Houghton, Mifflin & Co., and other leading publishers. In 1883 he assisted Frederick Yuengeting and J. P. Davis in organizing the Society of American Wood Engravers, with the object of raising that branch of art to a higher level by giving the individual engraver more freedom. In 1886 they produced a portfolio of artists' proofs published by Harper's, which contained two of Mr. Kruell's engravings, a "Portrait of William M. Hunt," from the painting by himself, and a fragment of "Rent Day," from the painting by Alfred Kappes. At this time he began the series of national portraits, by which he is most widely known, and which are veritable masterpieces of the graver's art. Other characteristic portraits are those of Charles Darwin, Asa Gray, Charles Eliot Norton, Wendell Phillips, E. L. Godkin, and Wendell Phillips Garrison. Mr. Kruell's technique is based on the method of Bewick, but he employs all the means possible in pure engraving to get a painter-like effect of chiaroscuro, thereby securing richness of color suggestion and great variety in handling, no two examples being alike in manner. His work has received honors in Vienna, Berlin, Paris and Chicago.

CHETWOOD, William, lawyer and congressman, was born at Elizabeth, Union co., N. J., in 1769. He was graduated at Princeton College in 1792, and was admitted to the bar in 1798. During the whisky insurrection he attended Maj.-Gen. Lee as aid-de-camp. At one time he served in the state council of New Jersey, and was elected to congress from that state, to fill a vacancy during the administration of Pres. Jackson. He was an able lawyer, and practiced his profession until his seventieth year. His death occurred at Elizabeth, Dec. 18, 1857.

EARLE, Pliny, inventor, was born at Leicester, Worcester co., Mass., Dec. 17, 1762, son of Robert and Sarah (Hunt) Earle. His earliest American ancestor, Ralph Earle, from the vicinity of Exeter, England, landed in Boston about 1634; and removed to Newport, R. I., where his name is found in the records as one of the petitioners for a charter in 1638. The following year he removed to Portsmouth, R. I. Ralph, grandson of this emigrant, was one of the early settlers of Leicester. The creative talent so marked in this family appears to have been first displayed by Thomas Earle, uncle of the inventor, a farmer by occupation, who in his leisure moments made various articles showing great ingenuity. One of these was a gun of exquisite workmanship, the property of Col. Henshaw. Gen. Washington saw it, and ordered a duplicate, which Earle delivered in person at New York, traveling on foot both ways. Pliny Earle was brought up on a farm, and probably aided his father in his supplementary work, that of carrying wash leather. In 1786 he began the manufacture of cotton and wool hand-cards; an industry which Edmund Snow had started in Leicester the year before. In November, 1789, Amy & Brown, of Providence, R. I., pioneer manufacturers of cotton yarns, requested Earle to go to that city and put cards on their machine. He complied; but his cards were not satisfactory, as the wire-teeth, being inserted in the leather backing by hand, were apt to drop out. Earle thereupon invented a machine for pricking the holes for the wires, and was aided in perfecting it by Samuel Slater, who entered the employ of Amy & Brown about a month later. This machine enabled a man to do in fifteen minutes what had formerly required as many hours, and was in general use for many years, being superseded by one that pricked the leather and set the teeth automatically. In 1791 Earle formed a partnership with his brothers, Jonah and Silas, under the firm name of Pliny Earle & Bros., and this continued for at least twenty-five years. Earle was a member

Pliny Earle.

of the Society of Friends. Apart from his inventive skill, he made extensive attainments in science and literature. He was especially noted in the community in which he lived for his successful efforts in the line of improvements in the breeds of domestic animals and in fruit culture. At one time he raised silk worms, and samples of the silk he produced are still preserved. He was married, June 6, 1793, to Patience, daughter of William and Lydia (Arnold) Buffum, of Smithfield, R. I., and descendant of Robert Buffum, of Salem, Mass., 1638. They had five sons and four daughters. Their eldest son, John Milton, was editor of the Worcester "Spy" for many years, the second son, Thomas, became eminent as a lawyer and journalist; the fourth son, Pliny, as a physician and author. Their daughters, in 1827, established the Mulberry Grove Boarding-school, which became widely known. Pliny Earle, Sr., died at Leicester, Mass., Nov. 29, 1832.

EARLE, John Milton, journalist and legislator, was born at Leicester, Mass., April 13, 1794, son of Pliny and Patience (Buffum) Earle, and sixth in descent from Ralph, the emigrant. After attending the academy in his native town, he aided his father in mechanical work, and next became a clerk in a cotton mill at Whitinsville, in which Pliny Earle and son were part proprietors. In 1816 he removed to Worcester, forming the firm of Earle & Chase, his partner being Anthony Chase, afterward his

brother-in-law, and carrying on a retail store. In 1823 they gave up business and bought the Worcester "Spy," a newspaper established in that town in 1755, though founded in Boston, in 1770, as the "Massachusetts Spy." Up to 1858 Mr. Earle was its chief manager and editor, and for fifteen years was its sole proprietor. The sketch of him in "The Earle Family" gives him credit for being "on the right side of every moral issue before the public." His contributions of every kind were remarkable for their accuracy of statement and the grace and elegance of their style. He allied himself with the anti-slavery party at an early period, voted the Whig ticket; aided Judge Charles Allen in promoting the free-soil movement, and, through the medium of his journal, "made Worcester the banner county of the state in opposition to slavery." Mr. Earle served in the general court in 1841-46 and 1850-52, and in the upper house in 1858, and was a member of the convention to revise the state constitution in 1853.

In 1859 he was a commissioner to examine into the condition of the Indians of the state and their descendants. Pres. Lincoln, in 1862, appointed him postmaster of Worcester, and Andrew Johnson reappointed him in 1865; but having refused to sign a printed circular endorsing Johnson's policy, he was soon removed. Mr. Earle was a pomologist and botanist second only to his intimate friend, Marshall P. Wilder; was a founder of the Worcester County Horticultural Society and its president for many years, and was an enthusiastic conchologist, making a valuable collection, which is now the property of the Natural History Society of Worcester. He was a vice-president of the Worcester County Institution for Savings, a director of the State Mutual Life Assurance Co., and was connected with other institutions. He was married, June 6, 1821, to Sarah, daughter of Tri-straum and Sarah (Folger) Hussey, of Nantucket, who bore him seven daughters and two sons. Mr. Earle died in Worcester, Mass., Feb. 8, 1874.

EARLE, Thomas, lawyer and author, was born at Leicester, Mass., April 21, 1796, son of Pliny and Patience (Buffum) Earle.

He was educated at Leicester Academy, and at the age of twenty-one went to Philadelphia, where he entered into mercantile employment, but later was admitted to the bar. He pursued this avocation with marked ability and eminent success. He became also noted as a journalist, and was editor in succession of the "Columbian Observer," the "Standard," the "Pennsylvanian" and the "Mechanics' Free Press and Reformed Advocate." His attention was often called to the misconduct of the minor judges of the state, who, holding office for life, often committed great wrongs unchecked. He also found the law and the constitution of Pennsylvania very defective in other respects, and, though poor and unknown, resolved to initiate a reform. Though opposed by vested interests and powerful combinations, he labored year after year with a perseverance and pertinacity rarely if ever equaled, becoming an editor and a public lecturer, to accomplish his ends. His dis-

Thomas Earle

terested sacrifices were rewarded by the adoption in 1837 of a new constitution, and appropriately he was a member of the convention which formed it. In this convention he destroyed brilliant political prospects and lost his popularity with the Democratic party, to which he belonged, on account of his ultra-liberal ideas on the subject of the franchise, which he proposed to extend to the negroes. In 1840 he was the candidate of the Liberty party for the office of vice-president. His leisure was employed in literary work, and he produced several learned treatises of a legal character. Later, he turned his attention to work of a different

order, and began two considerable works, which he left uncompleted at his death, viz., a translation of Sismondi's "Italian Republics" and a compilation of a "Grammatical Dictionary of the French and English Languages." He published an "Essay on Penal Law"; an "Essay on the Rights of States to Alter and Annul Their Charter"; a "Treatise on Railroads and Internal Communications" (1830); and the "Life, Travels and Opinions of Benjamin Lundy" (1874). In 1820 he was married at Nantucket, Mass., to Mary Hussey, a woman distinguished for wit, beauty and a remarkable taste

and knowledge of literature, especially of belles-lettres. They had five children. Mr. Earle died in Philadelphia, Pa., July 14, 1849.

EARLE, Pliny, author and physician, was born at Leicester, Mass., Dec. 31, 1809, son of Pliny and Patience (Buffum) Earle. He was educated at the Leicester Academy and at the Friends' School, Providence, R. I., where he served as a teacher during the years 1828-35, when he was made principal. He resigned to enter the medical department of the University of Pennsylvania, having already pursued his preliminary course under the direction of Dr. Usher Parsons, of Providence. He was graduated in 1837, and spent the following year in the medical schools and hospitals in Paris, and 1839 in a tour of observation of lunatic asylums, from England to Turkey. On his return to America he was resident physician of the Friends' Asylum for the Insane, near Frankford, Pa., 1840-44; and medical superintendent of the Bloomingdale Asylum for the Insane, in New York, 1844-49. In 1849 he made a second journey to Europe, visiting many institutions for the care of the insane in England, Belgium, France and Germany. From material thus gathered he wrote his "Institutions for the Insane in Prussia, Austria and Germany." He was visiting physician of the New York City Lunatic Asylum on Blackwell's Island, 1853-55. Feeble health at this time induced him to retire from professional practice, and he spent some years at his old home in his native town. He assisted in the care of the soldiers and sailors at the Government Hospital for the Insane, Washington, D. C., 1862-64, and in 1864 was appointed superintendent of the State Lunatic Hospital, at Northampton, Mass., a position which he held until 1885, when he resigned. The trustees then asked him to continue to reside there, that they might have the benefit of his advice, and he so did for the remainder of his life. Meanwhile he had visited Europe for the third time, when he inspected the methods of a very large number of insane asylums. He was very advanced in his methods of treating the insane; as early as 1840, at the Friends' Hospital, he lectured to the patients on natural philosophy, illustrating his lectures by experiments with electricity,

etc., and in 1866-67 he delivered to audiences averaging 250 patients a series of six lectures on "Diseases of the Brain Accompanied by Mental Derangement," certainly the first time that mental invalids had been so instructed. His paper on "Inability to Distinguish Colors" was printed many years prior to the valuable work on that subject by Dr. B. Joy Jeffries. He was appointed professor of materia medica at the Berkshire Medical College in 1863, and delivered one course of lectures, resigning in consequence of his Northampton appointment. He was a member of the Philadelphia Medical Society (1837); corresponding member of the Medical Association of Athens, Greece (1839); New York Medical and Surgical Society (1845); New York College of Physicians and Surgeons (1846); American Philosophical Society (1866); Massachusetts State Medical Society (1868), and American Social Science Association. He was a councillor of the Massachusetts Medical Society (1876); was one of the founders of the New York Psychological Society and its first president; and one of the original members and founders of the "Association of Medical Superintendents of American Institutions for the Insane," and was its president in 1845. He was one of the medical experts at the Guiteau trial, but was obliged to retire at the end of a week, his health failing him. He published "Thirteen Asylums for the Insane in Europe" (1840); "Marathon; and Other Poems" (1841); "History, Description and State of the Bloomingdale Asylum" (1848); "Institutions for the Insane in Prussia, Germany and Austria" (1853); "An Examination of the Practice of Blood-Letting in Mental Disorders" (1854); "Psychologic Medicine; its Importance as a Part of the Medical Curriculum"; "The Psychological Hospital of the Future"; "Prospective Provision for the Insane, a Glance at Insanity, and the Management of the Insane in the American States"; "Curability of the Insane: A Series of Studies" (1887); "Genealogy of the Earle Family" (1888). Some of his contributions to the "Journal of Insanity," the "American Journal of the Medical Sciences" and other publications, are "Climate, Population, and Diseases of Malta"; "Medical Institutions and Diseases at Athens and Constantinople"; "The Pulse of the Insane"; "The Inability to Distinguish Colors"; "Experiments to Discover the Psychologic Effects of Conium Maculatum"; "Paralysis in the Insane." Dr. Earle died at Northampton, Mass., May 17, 1892. A life of him, by Frank B. Sanborn, was published in 1898.

EARLE, Ralph, artist, was born at Leicester, Mass., May 11, 1751, son of Ralph and Phoebe (Whittemore) Earle, the latter a native, probably, of the same town. William Earle, his grandfather, and Robert Earle, grandfather of Pliny, the inventor, were brothers. His father, fourth in descent from Ralph, the emigrant, was a farmer. At the time the war began he was an itinerant portrait painter, and that he visited Concord and Lexington soon after they became historic ground is indisputable. Amos Doolittle, of New Haven, Conn., a member of the 2d governor's foot-guard of Connecticut, and subsequently well known as an engraver, served at Cambridge, and may have accompanied Earle to those localities. In December, 1775, there appeared four prints, engraved on copper, by Doolittle, which

Thomas Earle

Pliny Earle

are said to be copies of large paintings executed by Earle, though his name does not appear on the plates as the designer. The subjects are "The Battle of Lexington," "View of the Town of Concord," "Engagement at the North Bridge in Concord" and "View of the South Part of Lexington." In the second a detachment is seen burning the provincial stores and in the last Col. Smith's brigade is represented retreating before the provincials. Crude in drawing and color but minutely faithful, these were, according to Dunlap, the first historical prints published in America, while Earle's paintings, including Trumbull's famous works, were the first of their kind produced by an American. How Earle obtained his instruction in art, if he had any, is unknown. He was engaged in painting small and life-size portraits as early as 1771. Timothy Dwight, subsequently president of Yale, and his wife, sat to him in 1777, and their portraits have been described as "much in Copley's manner." The biographer, Blake, is authority for the statement that Earle was employed in Rhode Island in making (painting?) fans before he went abroad. After peace was declared, probably in 1782, the artist sailed for England. Most of his time was spent in London as a pupil of Benjamin West, through whose influence he painted portraits of George III, and of some of the nobility, and was elected a member of the Royal Academy. Returning to this country in 1786, Earle continued his work, occasionally producing a landscape. A "Falls of Niagara," after exhibition in a number of cities, was sent to England, where it excited much admiration. Earle's income, fluctuating on account of his intemperate habits, was derived chiefly from portrait painting. Among his sitters were: Gov. Oliver Wolcott, Sr., and Mrs. Laura (Collins) Wolcott (1782); Roger Sherman; Col. George Wyllis, of Hartford; Chief Justice Ellsworth and wife (1792), and Caleb Strong, governor of Massachusetts, and family. While in New York city in 1787, Earle was imprisoned for debt, whereupon Alexander Hamilton induced Mrs. Hamilton and other ladies to sit to him in his cell, thus enabling the artist to obtain release. Dunlap says of Earle: "He had considerable merit; a breadth of light and shadow; facility of handling and truth in likeness." He was married, about 1773, to Sarah Gates, who bore him three children, the youngest of whom, Ralph, followed his father's profession, and painted a full length portrait of Pres. Jackson, to whose niece he was married. He died in New Orleans without issue, Ralph Earle, Sr., died at Bolton, Conn., Aug. 16, 1801.

EARLE, James, artist, was born at Leicester, Mass., May 1, 1761, son of Ralph and Phebe (Whittemore) Earle, and brother of Ralph, the artist. It is probable that he accompanied his brother to England; he is said to have had success as a portrait painter there, and about 1789 he was married, in London, to Mrs. Georgiana Caroline (Pilkington) Smyth. Her first husband, Joseph Brewer Palmer Smyth, of New Jersey, who claimed descent from Capt. John Smith, of Virginia, was a loyalist and emigrated to England during the revolution; her son, William Henry Smyth, was distinguished as an admiral in the British navy and as a scientist. In 1796, or possibly at an earlier date, Earle came to the United States, intending to return for his family, but was attacked by yellow fever in Charleston, S. C., and did not recover. An obituary notice in a Charleston newspaper ranked him with such painters as Copley and Trumbull, and instanced his power of giving "life to the eye and expression to every feature." He had two daughters, the younger of whom, Phebe, was married to D. Dighton, military painter to George IV., and a son, Augustus, born in 1793. Augustus inherited his father's talent, and

before he was fourteen years of age exhibited some paintings publicly. Having a passion for adventure and travel, he visited all parts of the world, spent considerable time in Brazil and New South Wales, and for six months lived a hermit life on the island of Tristan d'Acutna. He came to the United States in 1818, and remained about two years, making a stay of some duration in New York city. Many of his sketches in foreign countries were utilized for panoramas. In 1832 he published a "Narrative of experiences in New Zealand and on Tristan d'Acutna, and in the same year went on a voyage of discovery as draughtsman to her majesty's ship the *Bengle*, but died not long afterward, where is unknown.

EARLE, Stephen, Carpenter, architect, was born at Leicester, Mass., Jan. 4, 1839, son of Amos S. and Hannah (Carpenter) Earle. He is descended from Ralph Earle, Steward Southgate and Nathaniel Potter, all original settlers of the town, and through his mother from the Tafts, who, with the Carpenters, are identified with the history of the southern part of Worcester county. He pursued his higher education in the Friends' Board School, Providence, R. I., the High School, Worcester, and the Massachusetts Institute of Technology, Boston, where he took a short course in architectural design; for five years was a bookkeeper, and then took up architecture as a profession, studying in Worcester and New York city, but in 1862-63 serving for eleven months in the Federal army. After doing draughtsman's work on the Hoosac tunnel, Mr. Earle, in 1865-66, spent seven months in Europe, combining study with travel. In February, 1866, he opened an office in Worcester, and in March formed a partnership with James E. Fuller, which continued for ten years. In 1891 he formed another partnership with Ullman W. Fisher, which still continues. From 1872 until 1885 Mr. Earle had a branch office in Boston. Among the buildings erected by him, individually or in partnership, are the Free Public Library, Polytechnic Institute Buildings, Art Museum, All Saints and St. Matthew's (Episcopal), Pilgrim and Central (Congregational) and South Unitarian churches, all in Worcester; Slater Memorial building, Norwich, Conn.; Iowa College Library and Goodnow Hall. He is a member of the American Institute of Architects and of its Worcester chapter; has been a director of the Worcester Coöperative Bank from its foundation, and president since 1888. Mr. Earle was married in Worcester, Oct. 19, 1869, to Mary L., daughter of Albert and Mary (Eaton) Brown, and descendant of Adonijah Rice, the first white child born in Worcester. They have four sons and one daughter; one of the sons, Ralph, is an officer in the U. S. navy.

LINDSAY, James Menesse, banker, was born in Wilson county, Tenn., Dec. 31, 1835, son of Lewis and Jane (McFarland) Lindsay. His father was a Baptist preacher and school teacher, and from this source Mr. Lindsay's early education was received. In 1855 he entered the Law School of Lebanon, Tenn., at which he was graduated two years later. In October, 1857, he left Tennessee and started on horseback for Dallas, Tex., traveling entirely across the state of Arkansas, and arriving at his destination about a month later. He finally settled at Gainesville in the beginning of the following year, establishing himself in the practice of law. In 1861 he became a member of the Texas legislature, and early in the following year enlisted in the Confederate army, serving until the close of the war, when he returned to his practice at Gainesville. Mr. Lindsay was a member of the constitutional convention of 1865 and 1866, but since that time has not engaged in politics or office seeking. However, in 1874 he was induced to accept the position of district judge over a territory embracing the counties of Grayson,

Cooke, Montague, Clay, Wise and Denton; but at the expiration of his term of office in 1876 he devoted himself to private interests and the good of his town and state. In 1882 he organized the Gainesville National Bank and became its first president, and although he retired from this office in 1888 was induced to accept it again twelve years later, and (1901) still holds this position. He was married at Gainesville, Nov. 3, 1868, to Jennie, daughter of George Bonner. They have two children, Lewis, a teller in the Gainesville National Bank, and Jennima J., the wife of W. S. Embury.

BRADLEY, David, manufacturer, was born at Groton, Tompkins co., N. Y., Nov. 8, 1811, son of Daniel and Patience (Cooper) Bradley. The name of Bradley has been prominent in the history of America since its earliest settlement. William Bradley, the progenitor of the family in this country, emigrated from England to New Haven, Conn., in 1637, and the subject of this sketch was eighth in descent from that Puritan forefather. David received his early education in the district schools of his native town when not assisting on his father's farm, and upon attaining his majority went to Syracuse, N. Y., early in 1832, where he engaged with an elder brother in the manufacture of agricultural implements and stoves. Three years later he went West to assist in establishing the first foundry in Chicago, and was the first man to bring pig-iron to that city. A few years later, however, he turned his attention to other pursuits and for four years engaged in farming in Lake county, Ill. Later he removed to Racine, where, in 1842, he engaged in the manufacture of agricultural implements, and dealt in bricks, still later engaging in the lumber business on Lake Huron, and in 1854 he founded the David Bradley Manufacturing Co., embracing at first the manufacture of the Garden City clipper plows. In the same year he became associated with Conrad Furst, and under the firm name of Furst & Bradley began the improvement of the old plow, which, at that time, was an ill-shaped, cumbersome and unsatisfactory implement. Under his management, however, it took new shapes and qualities, and the sulky plow was soon evolved. Later stalk cutters, sulky rakes, cultivators, and other forms of farm machinery were taken up, remodeled and perfected. A great demand for these products arose, and the field of action grew as the wares became known, necessitating a continual increase in working space and force. In 1872 the firm was incorporated under the name of The Furst & Bradley Manufacturing Co., but in 1884 Mr. Furst retired and the name was changed to The David Bradley Mfg. Co., by which it is still (1901) known.

In 1895 the factory was moved to Bradley, Ill., a town named in his honor. His life was devoted to hard work and patient endeavor, for he was continually striving to grasp new ideas which would lighten labor and increase its value. He was not alone an inventor, but also a philanthropist and benefactor; and it has been said no needy person ever turned from his door without relief. Politically, Mr. Bradley was at first a Whig, but upon the organization of the Republican party, in 1856, joined that body, heartily supporting the Union cause throughout the civil war. He was married in Chicago, Feb. 25, 1838, to Cynthia Abbott, a native of Barre, Vt. Five sons and

a daughter were born to them, of whom two sons and a daughter were living at the time of his death, which occurred Feb. 19, 1899.

BRADLEY, Joseph Harley, merchant and manufacturer, was born at Racine, Racine co., Wis., Sept. 30, 1844, son of David and Cynthia (Abbott) Bradley. His parents removed in 1845 to Chicago, where he was educated. In 1865 he became a partner in the firm of Jones, Ellinwood & Bradley, which succeeded the firm of Hooker & Jones, engaged in the wholesale and retail trade in farm implements and seeds. He sold his interest in 1868 and associated himself with Harry Banks, under the firm name of Bradley & Banks, in a general jobbing business in farm implements. In 1872 Mr. Bradley sold his interest in this firm and became secretary of the Furst & Bradley Manufacturing Co.; the style of the firm was changed to the David Bradley Manufacturing Co. In 1884 he bought out Mr. Furst's interest and became vice-president and treasurer. These offices he held until his father's death in 1899, when he became president. Mr. Bradley is also interested in several firms engaged in a jobbing business in farm implements, among them being the following: Bradley, Clark & Co., Minneapolis, Minn.;

David Bradley & Co., Council Bluffs, Iowa; Bradley, Alderson & Co., Kansas City, and Bradley, Holton & Co., Indianapolis, Ind. He is also a director of the Northern Trust Co., of Chicago. He has been active in the affairs of the Relief Aid Society, of which he was director in 1883-84. He was a member in 1886-98 of the state board of agriculture, which had charge of the Illinois exhibit at the World's Columbian exposition in Chicago in 1893. He was one of the originators of the Chicago Freight Bureau in 1885, and in 1891 was president of the Citizens' Association. He is a member of the University, Commercial, Chicago, Union League and Illinois clubs, having been president of the last-named in 1883-85. Mr. Bradley was married, in 1871, to Margie P., daughter of Mr. and Mrs. Richards, of Brooklyn, N. Y., who died Nov. 7, 1896, leaving four daughters.

HEARNE, Frank James, capitalist and manufacturer, was born at Cambridge, Dorchester co., Md., Sept. 21, 1846, son of William Lowder and Maria Elizabeth (Ross) Hearne. He is descended from William Hearne, who emigrated to the Barbadoes (St. Thomas island) in 1680, and opened a large trade in general merchandise from London to the West Indies and the colonies on the coasts of Delaware and Maryland. In the spring of 1688 he settled in Maryland on what is still known as the Hearne homestead. Frank J. Hearne was educated in the schools of Sandwich, Mass.; Norristown, Pa., and Brooklyn, N. Y. In 1863 he entered the sophomore class of the University of the City of New York, but in February, 1865, went to the Rensselaer Polytechnic Institute, Troy, N. Y., where he was graduated C. E. in 1867. He at once returned to Hannibal to become chief engineer of the Hannibal and St. Joseph railroad, and held that position until May, 1872, when he removed to Wheeling W. Va., having acquired an interest in the firm of Dewey, Vance & Co. In 1874 the firm was incorporated as the Riversdale Iron Works, with a capital of \$1,000,000, and Mr. Hearne was made assistant general manager of the same, and in 1875 general manager of the entire plant. For a number of years the prin-

mari
Abbot

principal article of manufacture was nails of an unsurpassed quality, and the factories, with their 224 machines, had a capacity of 12,000 kegs per week. Wheeling at that time was the largest nail manufacturing centre in the world, but in 1884 a strike almost paralyzed the industry. Col. Hearne's ability was clearly demonstrated by the manner in which he met the discouraging situation confronting the nail manufacturers when there was no longer a profitable market for their product. The Steubenville furnace, bought in 1885, was the first of a series of additions to the property of the Riverside

Iron Works, which grew into a magnificent plant, furnishing employment to a small army of men and yielding immense profits. The steel plant commenced operations in 1884. The plate mills, adjoining the steel plant, were built in 1885. The company first engaged in the manufacture of steel pipe in August, 1887, since which time the increasing trade in this product has resulted in a number of additions to the mill, multiplying its original output several times. The facilities of the company for the manufacture of steel pipe were more than ordinarily favorable, owing to the fact that it owned blast furnaces, steel works and

rolling mills, and was, therefore, independent of outside supply for raw materials. The stockholders of the Riverside Iron Works having disposed of their property to the National Tube Co., July 1, 1899, he was elected first vice-president of the latter company, with headquarters in Pittsburgh, Pa., where he now resides, and in April, 1901, he became president of the company. Col. Hearne—he served on the staff of the governor of the state of West Virginia—was a vestryman of St. Matthew's Episcopal Church, of Wheeling, for twenty years; is an official and director of several banks, manufacturing and railroad companies, and a member of the American Institute of Mining Engineers and of the Duquesne Club, Pittsburgh. He has made contributions to technical and trade papers and magazines. He was married in Omaha, Neb., Dec. 21, 1869, to Lillie, daughter of Warren and Eliza (Maynard) Lee, and has one child, William L. Hearne.

JOYNES, Levin Smith, physician, was born in Accomac county, Va., May 13, 1819, son of Thomas R. and Anne (Bell) Joy nes, and brother of Edward Southey Joy nes, educator. His father was a distinguished lawyer, and was a member of the famous constitutional convention of Virginia (1829-30). His grandfather, Levin Joy nes, was a major in the Continental army during the revolution, and, being captured with the advance guard at the battle of Germantown, remained a prisoner until the close of the war. Levin Joy nes was graduated at Washington College, Pennsylvania, in 1835, and after spending two years in the collegiate department of the University of Virginia, entered the medical department of that institution, graduating with the degree of M.D. in 1839. He then pursued his medical studies at the University of Pennsylvania, and, going abroad, studied for two years and a half at Paris, Dublin and elsewhere. Returning to his native county, he commenced to practice there in 1843, but in the following year removed to Baltimore, Md. In 1847 he became professor of physiology and legal medicine at the Franklin Medical College, Philadelphia, Pa., remaining there for two

years. He returned to Accomac in 1849, and continued to practice there until 1855, when he was elected professor of the institutes of medicine and medical jurisprudence in the Medical College of Virginia, at Richmond. About a year later he was made dean of the faculty, and he held both these offices until his resignation in 1871, when he became professor emeritus. From April to June, 1861, he acted as assistant surgeon to the Virginia troops, and in 1872 was appointed the permanent secretary of the Virginia state board of health. He was a member of the judicial council of the American Medical Association; president of the Richmond Academy of Medicine, and of the Medical Society of Virginia, representing the latter at the international medical congress of 1876. To medical literature he was a frequent contributor. Dr. Joy nes was married, in December, 1854, to Rosa F. Bayly, of Richmond, Va. She died in 1855, and in June, 1858, he was married to Susan V., daughter of Dr. Robert Archer, of Richmond, a former U. S. army surgeon. Dr. Joy nes died in Richmond, Va., Jan. 18, 1881.

EICKEMEYER, Carl, inventor and author, was born at Yonkers, N. Y., Jan. 11, 1869, son of Rudolf and Mary T. (Lovejoy) Eickemeyer. His father was a well-known inventor, and among his ancestors are many noted military engineers of Germany, records of some of whom date back to the seventeenth century. His mother was a native of Dover, Me., a member of the prominent Lovejoy family of that state, which produced the brothers, Elijah Parish and Owen. The former, a clergyman, journalist and abolitionist, was killed by a proslavery mob at Alton, Ill., in 1837; the latter, also a clergyman and an anti-slavery politician, served as a member of congress from Illinois in 1857-61. When a boy, Carl Eickemeyer was of an inventive disposition. In 1887 he was graduated at the Yonkers High School, and the following year entered Cornell University, where he took a five years' course in mechanical and electrical engineering. In the fall of 1893 he entered the employ of the Eickemeyer & Osterheld Manufacturing Co., of Yonkers,

and during his connection with this firm devised many inventions in hat-making machinery, among which was the first successful machine which will stretch the tip of a hat body automatically in one operation. After his father's death, in 1895, Mr. Eickemeyer served for two years as president of the Eickemeyer & Osterheld Manufacturing Co., during which time he acted also as chief constructor, but finding the field too limited, he resigned and went into a field of more varied possibilities. Among his inventions other than hat machinery are, bicycles, differential gears, dynamos, electric motors and electric pumps, and he has done considerable work on alternating current machines, street car motors, disappearing gun carriages and motor propelled vehicles. Mr. Eickemeyer has traveled extensively through the West and Southwest, and has made a special study of cowboy, Indian and frontier life. His book, "Among the Pueblo Indians" (1895), gives an interesting account of journeys to the Pueblo villages along the Rio Grande, and a subsequent wagon trip through the Navajo country, New Mexico and Arizona, in 1896, furnished material for his book "Over the Great

Samuel Hearne

Carl Eickemeyer

Navajo Trail" (1900), which is a history of the Navajo Indians, their lives, manners and customs. Both works are illustrated with photographs taken by the author, and are of ethnological as well as of historical and literary value. A large collection of relics—Indian blankets, saddles, pottery, stone implements, old firearms, fossils and bird skins—collected by Mr. Eickemeyer during his western trips, was presented to the American Museum of Natural History, New York city, in recognition of which he was made a life member of that institution. He is a public spirited citizen, a staunch Republican and has served five years in the Yonkers volunteer fire department. He is also a Mason, a Noble of the Mystic Shrine, and a member of the American Folk-Lore Society. Mr. Eickemeyer was married, in 1894, to Lillian, daughter of the late Alexander Folger Westcott, of Yonkers, N. Y.

BUSH, John Curtis, mayor of Mobile, Ala., was born at Pickensville, Pickens co., Ala., June 17, 1845, son of Albert Peyton and Sarah (Williams) Bush. His father, a native of Georgia, was a cotton planter and merchant by occupation; his mother was a daughter of Curtis Williams, a prominent citizen of Pickens county, Ala. In 1852 his father began business in Mobile, Ala., as a cotton factor, and in 1860 John C. Bush entered Howard College, at Marion, attending one year, then being transferred to the State

University at Tuscaloosa. In the spring of 1862 he was appointed drill master in Col. Robert H. Smith's regiment, near Mobile, and a few weeks later, although but seventeen years of age, enlisted as a private in the 41st Alabama infantry. His active service began at the battle of Murfreesboro. Later promoted to quartermaster-sergeant, he served with his regiment until the close of the war. He was graduated at the University of Mississippi in 1867, and at once began business in Mobile, Ala., as a cotton factor in the firm of A. P. Bush & Sons. In 1877 he entered into partnership with James H.

Allen and Thomas H. West. His business developed into one of the largest of its line in the South. The years 1879 and 1880 he spent in New Orleans, La., in a branch house, which was conducted by James H. Allen, under the firm name of Allen, West & Bush; another branch, in St. Louis, Mo., was conducted by Thomas H. West, under the firm name of Allen, West & Co. This became one of the largest cotton concerns in the United States, handling for successive years as much as 120,000 bales of cotton annually. In 1887 the connection was dissolved, each partner taking his branch, the Mobile branch being known to the present time as J. C. Bush & Co. Mr. Bush was president of the cotton exchange, and a director of three insurance companies and of the chamber of commerce for many years. He is now president of the Mobile chamber of commerce, and also president of the quarantine board of Mobile bay. For two years he was lieutenant-colonel of the 1st regiment of Alabama state troops. In 1897, in response to a strong popular demand for better municipal government, he accepted nomination to the mayoralty of Mobile. Though active in politics as a good citizen, he was never an office seeker. Under the crying need of a business administration of the city's affairs, he was induced to become a candidate on a platform embodying municipal ownership of the water supply system, and demanding suitable sewers, paved streets, and limitation of expenditure within amount of in-

come. After a short but vigorous campaign for a three years' term, he was elected by an overwhelming majority of nearly four to one. Faithful adherence to platform characterized his administration. All his appointments were made on merit, to the exclusion of office-seekers and professional politicians. The expenditures were jealously regulated by daily reports from all departments, and all obligations of the city were paid in cash. In public improvements a similar business-like policy was pursued; even before the enabling legislation has been secured, conditional contracts were prepared and executed, to take effect when the legislative acts should pass. In the item of iron pipe alone, the city was saved over \$100,000, the difference between the price of iron before and after the enabling act had passed. The total expenditure on the water-works was \$500,000, and on sewers \$250,000, an amount entirely covered by the municipal bond issue, which sold at a premium. Mobile was given an economical business administration, which proved an impetus to its becoming a thoroughly equipped modern city. Though he had decided not to become a candidate for re-election, he was induced to reconsider the question, a petition signed by several thousand citizens having urged him to do so. Finally consenting, he was elected without opposition, March 1, 1900, and entered upon another term of three years. Mayor Bush is by nature a philanthropist. His name is among the subscribers to institutions of charity and of learning. He has ever been a pronounced Democrat, and in recent campaigns has adhered to the "sound money" wing of his party. In religious faith he is a Baptist, and is a trustee of the Southern Baptist Theological Seminary, at Louisville, Ky. He was married, Nov. 30, 1869, to Ruth Tarrant, of Marion, Ala., and has three daughters and two sons, the latter being his business partners.

HEADY, Morrison, poet and author, was born in Spencer county, Ky., July 19, 1829, son of James Jackson and Lois (Eastburne) Heady, of English descent. His father was a successful country physician, noted for his rare sense of humor. The son received the rudiments of an education in a country school, which he attended until he was sixteen, when a series of accidents, beginning in his fourth year, resulted in his total blindness. Subsequently he spent a year at the Kentucky Institute for the Blind and fourteen months at the Ohio Institute, leaving the latter when about twenty years of age. Meanwhile he had turned his attention earnestly to the study of music and of English literature. For two or three years thereafter he taught piano music at Louisville, Ky., but increasing deafness made this occupation impossible and began to sunder him from the world about him. His knowledge of books had been extended by friends, who read aloud to him, and by reading eagerly everything printed in raised type, his mental activity seeming to be stimulated by his deprivations. The desire to write grew upon him, but blindness made it difficult for him to correct his productions and Mr. Heady invented a machine that punctured the paper and made what he had written tangible. In 1863 his first book was published—a juvenile life of Washington, entitled "The Farmer Boy," afterward put in embossed print for the blind and called "Washington Before the Revolution." This was followed in 1869 by a book of poems, "Seen and Heard," which was favorably noticed by the press, but not widely sold. Many of the poems first appeared in the Louisville "Journal," to whose readers he was known as the "blind bard of Kentucky," and others in the "Episcopal Methodist," and the "New Eclectic Magazine" of Baltimore. In his fortieth year he became totally deaf and could be communicated with only by means of a glove

J. C. Bush

upon which were printed the letters of the alphabet. It was after this time that his most important work in verse was done. Apart from their genuine merit, a pathetic significance is attached to poems produced "in the gloom of a 'double night,'" and they are the more remarkable because little of the shadow has crept into them. To quote Mr. Flexner, who introduces Mr. Heady's volume, "The Double Night" and other poems (1901): "The spectacle of a strong man, shut out by tragic mischance from almost every path of usefulness, accepting his grim fate with buoyant good humor and triumphing over darkness and loneliness—such a spectacle is, I say, both rare and inspiring. There is no note of despair in his verse, no trace of disappointment in his bearing." Mr. Heady has also written a story, "Barl," (1884), the scenes of which are laid in pioneer Kentucky, and he has in manuscript a life of Columbus, designed for younger readers; also a story entitled "The Red Robe." Of his poems, a critic said in the New York "Times": "What marks them especially is their deep sincerity of thought—a feeling genuine and not mimicked; their rich record of experience; their occasional striking felicities, and their failure in particular passages to secure the force of brevity." Mr. Heady, despite his two-fold affliction, has led an active life, keeping in touch with a large circle of friends and maintaining the keenest interest in literature, science and affairs.

GARNSEY, Elmer Ellsworth, artist and mural painter, was born in Holmdel, Monmouth co., N. J., Jan. 24, 1862, fourth son of John Crosby and Louise (Fenton) Garnsey. His family is of English extraction; his ancestors settled in Connecticut about 1660, removing later to Amenia, Dutchess co., N. Y. His father was a carpenter by occupation; his mother was a daughter of John Fenton, a farmer, of Leedsville, N. J. Elmer E. Garnsey was educated in the schools of his native town and at Red Bank, N. J. He began his artistic studies at the Cooper Institute, New York, in 1881, and he later studied drawing and painting at the Art Students' League, where he made a specialty of mural painting and of color as applied to architecture. Successive journeys through Europe enlarged his artistic knowledge, while association with the decoration of the interiors of many important buildings increased his experience and practice. In 1892 the Columbian exposition at Chicago offered him, together with other American artists, favorable opportunities for mural painting on a large scale, and he there executed the color decorations of the Electricity building, the Music hall, the Galleries of Fine Arts, and portions of the New York state building. In 1893 he superintended the color scheme of the Boston Public Library; in 1894, the entire decoration of the Carnegie Institute at Pittsburgh, and in the following year was commissioned as chief decorator of the new building for the library of congress, Washington, D. C. Here he was employed for nearly two years in designing and superintending the general color decorations of the first building which the U. S. government had made a serious attempt to beautify by sculpture and painting. He has also decorated the library of Columbia University, New York city; the Carnegie Library at Homestead, Pa.; the loggia of the Walker Art Gallery at Bowdoin College, Maine, and many other buildings both public and private. His decorative work has a strongly architectural character, as befits an art which is based upon architecture, and his color schemes show the influence of the ancient wall-paintings of Pompeii, as well as that of the Italian masters of the Renaissance. The decoration of the lobby leading into the delivery room of the Boston Public Library is a concrete example of his work, and exhibits the influence of Pompeian color

in a marked degree. Mr. Garnsey has also achieved considerable success as a landscape painter, and has designed covers and decorations for books and periodicals. He has contributed to the magazines occasional travel sketches, by both pen and pencil, besides writing on artistic subjects for technical journals. He is a member of the National Society of Mural Painters, the Architectural League; the Artists' Aid Society; the Century Association of New York; the St. Godeph Club of Boston, and other associations, both artistic and social. In 1886 he was married to Laurada, daughter of Tenbroeck Davis, of Red Bank, N. J., and has four children, Julien, Helen, Laura and Arlo Garnsey.

PITCAIRN, Robert, railroad superintendent, was born at Johnstone, near Paisley, Scotland, June 6, 1836, son of John and Agnes Pitcairn. His parents came to America in 1846, and made their home in Pittsburgh, Pa., where he attended the public schools. In 1849, through the influence of Andrew Carnegie, he secured a position as messenger boy in the office of the Atlantic and Ohio Telegraph Co., where he soon became an expert operator, and was one of the first to read by sound. In 1853 he became connected with the Pennsylvania railroad as telegraph operator and assistant ticket agent at the Mountain house, near Hollidaysburg. He filled several positions, becoming division superintendent in 1861, and superintendent of transportation in 1863, and while discharging these duties he organized the car record, a system of car mileage, and other matters pertaining to that department as they are now conducted. During the civil war, in addition to the extra labor necessitated by the transportation of troops and supplies, particularly in 1862, he had charge, as superintendent, of the middle division between Harrisburg and Altoona, and the same office of the Pittsburgh division between Altoona and Pittsburgh. So ably did he fill this position that, in the spring of 1865, he was promoted to the superintendency of the Pittsburgh division, a position he has since filled. Although not an active politician, Mr. Pitcairn has always advocated the principles of the Republican party, and was secretary of the first Republican convention held in Blair county, Pa. He has been a director of the Masonic Bank since its organization, and is at present (1901) a director of the Citizens' National Bank of Pittsburgh, the First National Bank of Greensburg, Pa., and resident vice-president and director of the American Surety Co., Pittsburgh. In 1867, when George Westinghouse, Jr., started to manufacture his well-known air brake, Mr. Pitcairn assisted in the organization of the Westinghouse Co., of which he is vice-president and director. He is also a director of the Philadelphia Natural Gas Co. and other companies known as the Westinghouse plant. He was married, in 1856, to Elizabeth E., daughter of John Rigg, of Altoona, and has four children, three daughters and a son.

BRYAN, John Pendleton Kennedy, lawyer, was born in Charleston, S. C., Sept. 10, 1852, son of George S. and Rebecca L. (Dwight) Bryan, and great-grandson of George Bryan (1731-91), president of Pennsylvania. His father was U. S. district

judge for South Carolina in 1866-86; his mother is a daughter of Dr. Samuel Broughton and Emily Louisa (Kirk) Dwight, of St. John's Berkeley, S. C. He was educated in public and private schools in Charleston, and at Newton (N. J.) Collegiate Institute, and was graduated at Princeton College in 1873 with the first honor and was valedictorian. As mental science fellow of the college he studied at the University of Berlin, Germany, in 1873-74, and the University of Leipzig in 1874-75, and upon his return to the United States delivered a course of lectures at Princeton. In 1876 Mr. Bryan studied law in his father's office in Charleston, and in 1877 was admitted to practice in all the courts in South Carolina. Since 1877 he has been associated with his brother, George D. Bryan, the firm name being Bryan & Bryan. Mr. Bryan was counsel for the defense in the political trials in South Carolina in 1877-83; special counsel for the United States in "conspiracy cases" (1898-99), and in prize cases during the war with Spain (1898), and special counsel for Charleston in several important cases, including the fight (1898-1900) for the city's commerce against all the railroads of the South. He argued all the constitutional questions in inter-state commerce in the U. S. Supreme court against the South Carolina "dispensary law," under which the state sought to maintain a monopoly of inter-state commerce in the sale of liquor.

In 1895, as a delegate to the South Carolina constitutional convention and a member of its committee on suffrage, Mr. Bryan led in the debates resulting in the establishment of the suffrage in the state on a basis of property and educational qualifications. He is a trustee of the University of the South, Sewanee, Tenn., and of the college and high schools of Charleston and the William Enston Home. He has frequently delivered addresses on literary and educational topics, and written much and spoken often in behalf of educational and other reforms. He has served as a delegate

from St. Michael's Church, Charleston, to diocesan councils and the general convention of the Protestant Episcopal church. He is a member of the Olio Hall (Princeton), New England, Huguenot, St. Andrew's, Hibernian and South Carolina Art societies; the Charleston Club; Carolina Yacht Club, and the Historical Society of South Carolina. He was married, Aug. 12, 1880, to Henrietta C., daughter of Dr. Mitchell C. and Elizabeth (Middleton) King, of Charleston, and has three daughters.

MACK, John Martin, Moravian bishop, was born at Leysingen, in Württemberg, April 13, 1715. He joined the *Unitus Fratrum* at Herrnhut in December, 1734, went to Georgia with Bishop Nitschman in 1735; thence to Nazareth, Pa., after the southern colony was broken up, and in 1741 was one of the first settlers of Bethlehem, helping the elder Nitschman to cut down the first tree. The next year he became a missionary to the Mohicans in New York, and in 1743 was sent to Connecticut. His success aroused jealousies among the whites, and the Moravians fell under the absurd suspicion of being papists and in the interest of the French. Mack and his friends were twice arrested, excluded from New England, and in 1744 banished from New York. After abundant labors in his own province, during

which he founded Gnadenhütten, on the Lehigh, and Nain, near Bethlehem, he saw both these destroyed by the war. In 1762 Mack was sent to the Danish West Indies to direct the mission work among the slaves. There he labored for the rest of his life, returning to Bethlehem only to be consecrated bishop, Oct. 18, 1770. He died in St. Thomas, June 9, 1784, after a life of apostolic purity and zeal.

CASE, Leonard, lawyer and land agent, was born in Westmoreland county, Pa., July 29, 1786, son of Meshach and Magdaline (Eckstein) Case. His first American ancestor, a native of Holland, settled in Long Island, but removed to Morris county, N. J., whence, in 1778, Butler Case, father of Meshach, emigrated to Pennsylvania. His mother's father, Leonard Eckstein, was a native of Bavaria, and was born near the ancient city of Nuremberg. A quarrel with the Roman Catholic clergy in 1750 led to his imprisonment in a lofty tower, but, through the ingenuity of his sister, he obtained a rope, and letting himself down, escaped and fled to America. He landed in Philadelphia, a youth of nineteen, and from that place went to Virginia, where he was married, and then removed to Pennsylvania. Leonard Eckstein was a man of more than ordinary mind and strong convictions, was a superior Latin scholar, and spoke English so perfectly that it concealed his German origin. Leonard Case learned to read and acquired an elementary knowledge of arithmetic in a log school-house. His manual education, however, was not neglected, and it is recorded of him that at the age of seven he cut all the wood for the fires, at ten engaged in threshing grain, and at twelve took his place with the men in the harvest field. That he was equally strong in self-control is evident from the record of his having at twelve taken a vow never to again drink spirituous liquors, which pledge he kept through life. In 1799 his parents went on an exploring expedition into Ohio, on horseback, and bought land in Warren township, Trumbull co., whither in 1800 they removed. Here young Case, as the eldest child, took upon himself the task of clearing away the woods and ranging for game for food. Overwork and exposure brought on a severe illness, from which he never fully recovered, and which crippled him for life. He however schooled himself in reading and writing and earned money to buy books by repairing chairs, making baskets, etc., and especially practised penmanship. His handwriting attracted the attention of the county clerk, and he at once gave the youth work in his office. In 1807 young Case became private secretary of Gen. Simon Perkins, agent for the Connecticut Land Co., and in the same year was appointed clerk of the supreme court. His abstract of the drafts of the Land Co. became the basis of all searches of land titles and is still copied and used. In 1807 also he was appointed deputy-collector of non-resident taxes; in 1809 was elected justice of the peace and by re-election served for nine years. From 1812 until 1816 he was collector of the sixth district of Ohio; in 1814 was admitted to the bar and was also re-elected clerk of the supreme court, but two years later resigned. In 1816 Mr. Case took up his residence in Cleveland, having been elected cashier of the new Commercial Bank of Lake Erie, but in a few years' time it failed and he returned to law practice. This was carried on in the courts of Ohio and of the United States until 1833, when Mr. Case was obliged to retire, his physical infirmities making this step necessary. In 1821-25 he was auditor of Cuyahoga county and clerk of the county commissioners; in 1824-27 was in the legislature and persistently labored in behalf of the canals of the state. He originated and drafted the first bill providing for the assessment of taxes on land according to its value rather than by the acre, irrespective of improvements—a system ever

since maintained. In 1827 he was appointed agent of the state of Connecticut to take charge of the lands and debts belonging to the school fund, and retained the position until 1855, when the final settlements were made, during which period he sold land requiring 400 contracts and collected and paid over about \$500,000. The Commercial Bank of Lake Erie was resuscitated in 1832, and Mr. Case, who had settled the affairs of the old corporation, was elected president. From his earliest connection with Cleveland he took a lively interest in its affairs, its schools, its religious interests and the improvement of its streets. Under him as president of the village council in 1821-25 the work of planting the streets with trees was begun, and to him more than to any other man Cleveland owes its popular name, the Forest City. Many tracts of land within and in the suburbs of the city were acquired by him; but no obstacle was ever placed in the way of their settlement and improvement. Mr. Case was the first subscriber in the list of stockholders of the Cleveland, Columbus and Cincinnati Railroad Co., and his \$5,000 added to his influence in its organization and direction, made this first railroad project in the interest of the city a success. He left in manuscript a history of his life, which is largely the history of the Connecticut Western Reserve, and as such invaluable to the historian. Mr. Case was generally regarded as one of the best as well as one of the wisest of men. He was married on Sept. 28, 1817, to Elizabeth Gaylord, of Middletown, Conn., a descendant of Puritan emigrants to Connecticut. They had two sons, William and Leonard, the former a lawyer and railroad president; the latter a well-known philanthropist. Mr. Case died in Cleveland, O., Dec. 7, 1864.

CASE, Leonard, philanthropist, was born in Cleveland, O., June 27, 1820, youngest son of Leonard and Elizabeth (Gaylord) Case. He was educated at private schools in Cleveland, at Yale, where he was graduated in 1842, and at the Cincinnati Law School. While at college he excelled in mathematics and languages; his tastes were literary and scientific, and had circumstances compelled, he doubtless

would have acquired a reputation as a mathematician. On his admission to the bar, in 1843, he formed a partnership with James Fitch and opened an office in Cleveland, giving his attention chiefly to the affairs of his father. During a European tour, in company with Prof. St. John, of Western Reserve College, and Prof. Loomis, of Columbia College, he over-exerted himself in a foot race with a Swiss guide, winning at the cost of his health, which ever after was precarious. After 1866 he was relieved of much care and gave considerable time to his favorite studies. He was one of a small

circle which became interested in the study of Italian, and made a number of translations of poems written in that language. His rendering of Grossi's "The Swallow," rivals in beauty and fidelity the translations by Bryant, Howells and other well-known poets. His only work published in book form was "Treasure Trove," which had previously appeared in the "Atlantic Monthly," about 1860. His benefactions were unique, as illustrated on the occasion of the fires in the Saginaw bay counties of Michigan, when he sent the largest contribution made by an individual, but under the condition that his benefaction should not

be mentioned in the newspapers. He sent a poor and ambitious boy to college, paying all his expenses but making the amount a loan to be paid by the lad by loaning a like sum to some other boy for a similar purpose when he should attain such success in life as would allow him to do so. For a worn-out minister he paid the expenses of a trip to the White mountains. For a Bethel chaplain he paid for a vacation to the seaside. To Dr. Goodrich, pastor of the Old Stone Church, he gave liberty to draw on his account at any time for such sums as he thought Mr. Case ought to contribute to any case of distress

in his parish. He endowed the Case Library Association by having his secretary buy twenty U. S. bonds of \$1,000 each on the table of the society's treasurer without condition or receipt. In 1876 he conveyed the library building and Case Hall to the Library Association with no receipts except the rights of existing leases. He gave to the Cleveland Orphan Asylum the ground on which his elegant home is situated, and to the Home of the Industrial Aid Society he gave large additions to the acreage of its grounds. In the same year he perfected his plans for diverting a share of his estate to the founding of a scientific school. This purpose had been foreshadowed by his father's desire to do something for the education of indigent youth. He knew by experience that colleges required years of study in ancient languages and mathematics, and he hoped by founding a scientific school to offer every lad who passed through the grammar schools of Cleveland a training by which he could apply at once his knowledge to the problems that were confronting a daring and aggressive people. On Feb. 24, 1877, he delivered to Henry G. Abbey, his trusted business manager, the trust deeds which invested him with the title to lands and endowed the Case School of Applied Science in the city of Cleveland, O. In the trust deed he directed the trustees "To cause to be formed and to be regularly incorporated under the laws of Ohio, an institution of learning to be called 'Case School of Applied Science,' and located in said city of Cleveland, in which shall be taught by competent professors and teachers, mathematics, physics, engineering, mechanical and civil; chemistry, economics, geology, mining and metallurgy, natural history, drawing, and modern languages, and such other branches of learning as the trustees of said institution may deem advisable." He realized the unusual advantages afforded by Cleveland as the centre of extensive mining and manufacturing interests and as an important railroad centre and lake port, which offers excellent opportunities for studying the various engineering problems connected with transportation. Dr. John S. Newberry, of the School of Mines, Columbia College, and other educators, encouraged him in his determination, and in 1881, instruction was undertaken on a limited scale in the Case homestead, on Rockwell street. In September, 1885, the school was transferred to the new building on Euclid avenue, opposite Wade park. Mr. Case disliked nothing

Leonard Case

more than notoriety—especially such as is won by apparent ostentatious deeds of benevolence. The recipients of his bounty never knew until his death whom to thank for the benefactions, and a contemporary said: "Those who knew him well must say that no kinder-hearted, no truer friend had lived than Leonard Case, and nowhere could a man be found more worthy of the name of gentleman." Mr. Case's brother, William (1818-62), twice mayor of Cleveland, and a member of the sinking fund commission, was a man of fine literary and artistic tastes, and took great interest in natural history and agriculture. After an unremitting battle with disease all his life, Leonard Case died in Cleveland, O., Jan. 6, 1880.

STALEY, Cady, president of the Case School of Applied Science, Cleveland, O., was born at Scotch Bush, Florida township, Montgomery co., N. Y., Dec. 12, 1840, son of Harmanus R. and Evaline (Darrow) Staley. His father was a farmer, and he worked upon the farm and attended a district school and Jonesville Academy until he was sixteen years old, when he entered the Classical Institute in Schenectady. He passed from there to Union College, where he was graduated with honors in 1865. With a classmate, he spent part of the next year prospecting for gold in the foot-hills of the Rocky mountains, and went from there to California, and secured a position as civil engineer on the Central Pacific railroad. In 1867 he returned to Schenectady to accept the position of assistant to William Mitchell Gillespie, professor of civil engineering in Union College, and on his death, in 1868, young Staley was chosen his successor. In 1876 he was made dean of the faculty, which position he held until 1886, when he was elected president of the Case School of Applied Science, Cleveland, O. When he assumed his duties the school, while well endowed, had but one building, which was soon afterward burned; a small faculty and ten students in the freshman class. In 1901 there were 23 members of the faculty and 267 students, eight courses of instruction, and four large buildings used as laboratories. The main building, devoted to civil engineering, physics and natural history, was erected in 1888; the engineering laboratory in 1891; the chemical laboratory in 1891; the electrical laboratory in 1895; the metallurgical laboratory in 1897. The endowment fund amounts to \$2,000,000. Pres. Staley received the degree of Ph. D. from Union College in 1884, and that of LL. D. from both Union and Ohio Wesleyan University in 1887. He is the author of "Notes on Bridge Engineering" (1875); "Strength of Materials and Stability of Structures" (1876); "Elements of Truss Bridges" (1878); "Separate System of Sewage" (1882), and editor of Gillespie's "Roads and Railroads" (1875); and of a revision of Gillespie's "Land Surveying" (1887). In addition, he edited "The Teaching of Jesus." Prof. Staley was married at Watford, N. Y., Dec. 29, 1869, to Kate, daughter of Elvira and Philetia (Hall) Holcomb.

JOY, James Frederick, lawyer, was born at Durham, N. H., Dec. 2, 1810, son of James and Sarah (Pickering) Joy. His father was a man of large business abilities, a manufacturer and a staunch Puritan. His mother belonged to a well-known family of New Hampshire. The son received his early education in the district school of his native place. When he was fourteen years old he entered a store as a clerk,

where he remained for two years. He was graduated at Dartmouth College in 1833, and then took a course in law at the Harvard Law School. After one year's study he became principal of an academy at Pittsfield, N. H., and, while so engaged, was appointed tutor of Latin at Dartmouth, a position he held for one year. He then returned to Cambridge to complete his course in law, and was admitted to practice in the state and U. S. courts. In 1836 he removed to Detroit, Mich., and was admitted to the Michigan bar, and in 1837 formed a partnership with George F. Porter, which continued for twenty-five years. Mr. Joy then became interested in the matter of the relief of the state in the ownership of railroads which had become bankrupt, and he and John W. Brooks prepared the charter of the Michigan Central Railroad Co., which finally passed and became a law under which the company was successfully organized and the property sold to it by the state. He was its counsel, and managed all its legal business. This gradually demanded so much of his time that he was obliged to relinquish his regular practice, and from his duties as lawyer and counsel of railway companies he was gradually drawn into their management, first as director and then as president. He organized and for many years was at the head of the Chicago, Burlington and Quincy Railroad Co., and secured and constructed its extension to Quincy and Omaha, and from Kansas City to the Indian territory. He purchased a tract of 800,000 acres of neutral lands belonging to the Cherokee Indians, and secured a treaty between the U. S. senate, the Indian nation and himself, that gave him ownership and possession, and built the road through them. The right of possession required the aid of the government, and the president, Gen. Grant, stationed troops there with that view. He also built the first bridge across the Missouri river, at Kansas City, and he and Mr. Brooks organized the St. Mary's Falls Ship Canal Co., and constructed the canal around St. Mary's falls. In 1867 Mr. Joy returned to Michigan, and became president of the Michigan Central railroad, which, under his direction, was practically rebuilt. He secured to this corporation several branch roads, connecting it with all the business centres of the state. His long life was due mainly to regular habits and his practice of devoting one to two hours daily to physical exercise. In 1861 he served as a member of the state legislature, and was active in the preparations of the state to meet the exigencies of the civil war. He was a Whig in politics, and for a time a member of the Free-soil party, and afterwards an earnest Republican. Mr. Joy was married, first, to Martha Alger, daughter of Hon. John Reed, of Yarmouth, Mass.; and, second, to Mary Bourne, a resident of Hartford, Conn. He died in Detroit, Mich., in 1896.

COLE, Cornelius, U. S. senator; was born at Lodi, Seneca co., N. Y., Sept. 17, 1822, son of David and Rachel (Townsend) Cole, of English descent. His grandfather, Capt. David Cole, served in the revolutionary army, and his mother was the daughter of Elijah Townsend, who founded Townsendville, Seneca co., N. Y. He was graduated at Wesleyan University, at Middletown, Conn.; entered the law office of Seward, Blatchford & Morgan at Auburn, N. Y.; was admitted to the bar in 1848, and the year following emigrated to California, and practiced in San Francisco until 1852, when he removed to Sacramento. He was district attorney (1858-60), and in 1863 was elected to congress on the Republican ticket. Mr. Cole early became identified with the abolitionists, and was one of the founders of the Republican party in California. The Pittsburgh convention of 1856 made him national committeeman for his state. He was the Pacific

coast member of the special committee of thirteen on Pacific railways, was very active in promoting those enterprises, and was a member of the committee on post offices and post-roads. As a U. S. senator he served in the 40th, 41st and 42d congresses as chairman of the committee on appropriations and as a member of the committee on public buildings and grounds. In 1874 he began practice in San Francisco, and engaged in prosecuting cases before the Alabama Claims Commission. In 1888, with his son, Willoughby, he opened a law office at Los Angeles. Mr. Cole was married in San Francisco, in 1853, to Olive Colegrove, whose father was a native of New York state, and has four sons; Seward, Willoughby, Schuyler and George Renting, the last named an artist of great promise; and four daughters; Emma C. Brown; Lucretia C. Waring, widow of Lieut. Waring, U. S. N.; Cornelia C. McLoughlin, of New York city, and Grace C. Jones.

BURNET, William, physician and congressman, was born at Elizabethtown, N. J., Dec. 13, 1730, son of Dr. Ichabod Burnet. His father (b. 1693; d. 1773), was a native of Scotland, where he received his education, at the University of Edinburgh. After obtaining his degree Dr. Burnet emigrated to America, settling at Elizabethtown, and practicing there as a physician and surgeon with great success until his death. The son was educated at the College of New Jersey (Princeton), while that institution was located at Elizabethtown, and during the presidency of the Rev. Aaron Burr. He was graduated in 1749, and commenced the study of medicine under Dr. Staats, of New York city, later engaging in a successful private practice until the difficulties of the United States with Great Britain became serious. He then entered prominently into the colonial cause, becoming a member of the Newark committee of safety, which also included Judge J. Helden and Major S. Hays. With these men he took a leading part in resisting the encroachments of the British government until 1776, when he was elected a member of the Continental congress. During that year he was appointed surgeon-general of the eastern division of the American army, and discharged the duties of this position with distinction until the close of the revolution. During the war he lost much property at the hands of British marauders, including a large and valuable library. In 1780 and 1781 he was again a delegate from New Jersey to the Continental congress, and became a warm friend of Alexander Hamilton. His death occurred in 1791. Among his sons were: Dr. William Burnet, Jr., of New Jersey; Maj. Ichabod Burnet, of Georgia; Hon. Jacob Burnet, a distinguished Ohio pioneer, and David G. Burnet, provisional president of the republic of Texas.

BURNET, Jacob, jurist and U. S. senator, was born in Newark, N. J., Feb. 22, 1770, sixth son of Dr. William Burnet and grandson of Dr. Ichabod Burnet. He was graduated at Princeton in 1791, and then studied law under Judge Boudinot, of New Jersey, securing admission to the bar of the supreme court of that state in 1796. He immediately removed to Ohio, and settled in Cincinnati, at that time a mere village. Upon the establishment of the second grade of territorial government, in 1799, he was appointed by Pres. Adams a member of the legislative council, and held the office until Ohio became a state in November, 1802. In 1812 he was elected to the state legislature, and during the war with Great Britain took an active part in the support of measures designed to aid the general government in the contest. He was appointed a judge of the supreme court of Ohio in 1821, and upon his resignation in 1828 was elected to the U. S. senate, filling the vacancy caused by the voluntary withdrawal of his

friend, Gen. Harrison. Serving until 1831 in this capacity he was then appointed by the Kentucky legislature on a commission to settle the controversy with Virginia. In 1839 he was a delegate to the Harrisburg convention, where he was active in the support of Gen. Harrison's nomination for the U. S. presidency. He was an intimate friend of Daniel Webster, and when Hayne, of South Carolina, made his celebrated speech on nullification, took full notes, which he gave to Webster, who was thus prepared to reply, as if he had heard the speech himself. He was the first president of the Cincinnati Colonization Society, and made strenuous efforts to relieve purchasers of western lands who were unable to discharge their obligations to the government, finally succeeding in securing a congressional enactment which granted the necessary respite. The amount due was \$22,000,000, a sum greater than the money actually in circulation; and the stringency was so far reaching that both farmers and speculators were threatened with disaster, all the banks of the region having suspended payment. If the government had attempted to dispossess the settlers, physical resistance would undoubtedly have been met with; but Judge Burnet submitted to congress a memorial, generally approved throughout the Ohio and Mississippi river valleys, petitioning for the release from back interest and the privilege of returning a portion of the property if desired. This memorial proved effectual, and congress granted the requests in 1821. Judge Burnet was also active in the promotion of the Miami canal, and though congress had declared a forfeiture of a land grant for this purpose, in 1830 he secured the revocation of this forfeiture, together with the issuance of an additional grant, thus emboldening the Ohio legislature to complete the work of construction. He was one of the founders of the Cincinnati College, serving as its first president; was active in the reorganization of the Medical College of Ohio, and in the establishment of the Lanes-terian Academy (Cincinnati), serving as president of the board of trustees in both. He was the first president of the Astronomical Society of Cincinnati, and an active member of the organization until within a year of his death. Upon the recommendation of Gen. Lafayette, Judge Burnet was elected a member of the French Academy of Sciences. He was the author of "Notes on the Early Settlement of the North-western Territory" (1815), containing much interesting historical data. The degree of LL. D. was conferred upon him by the University of Lexington and his alma mater. Judge Burnet was married at Marietta, O., Jan. 2, 1800, to Rebecca, daughter of Rev. Matthew Wallace, who bore him eleven children, five of whom survived him. He died in Cincinnati, O., May 10, 1853.

ADAMS, Benjamin, lawyer and congressman, was born at Worcester, Mass., in 1765. He was graduated at Brown University in 1788, and adopted the profession of law. He was a member of the legislature, as representative, from 1809 to 1814, and as senator, in 1814 and 1815, and from 1822 to 1825; was a representative in congress from his native state, from 1816 to 1821, having first been elected to fill the vacancy caused by the death of E. Brigham, and was a member of the committee on revolutionary pensions and public expenditures. He died at Cambridge, Mass., March 28, 1837.

W. Burnet

HIACOMES, called the Christian Indian, was born about 1610. He resided at Great harbor, Martha's Vineyard, where a few English families first settled in 1642. Through the efforts of Rev. Thomas Mayhew, he was converted to Christianity, and is said to have been the first Indian in New England so converted. Having learned to read, in 1645 he began to teach the native Indians, and soon won many followers. After the death of Mr. Mayhew, in 1657, Hiacomés continued his missionary and church work alone. On Aug. 22, 1670, an Indian church was formed on Martha's Vineyard, and Hiacomés and another Indian, Tacknash, were ordained its pastor and teacher by Eliot and Cotton. Upon the death of his colleague, Hiacomés preached his funeral sermon. He was a faithful minister, slow in speech, grave in manners, and blameless in his life. He had a son, John Hiacomés, a preacher and schoolmaster at Assawampsit, or Middleborough, in 1698. Hiacomés died about 1690.

JEWELL, Marshall Henry, editor, was born at Hector, Schuyler co., N. Y., April 29, 1857, son of Oliver P. and Hannah (Dimick) Jewell. His father was editor of the "Sentinel," at Ovid, N. Y., for some years previous to 1858, when the family removed to Michigan, and settled about twenty miles north of Grand Rapids, being among the pioneers in that part of the state. The son obtained such instruction as was possible in a log school-house and later attended school at Cedar Springs, where, after study hours, he learned the printer's trade in the office of the "Clipper." After the removal of his parents to Wheaton, Ill., a suburb of Chicago, he attended Wheaton College for a short time. In 1876 he became foreman of the Chicago "Daily Courier"; in 1877 he removed to Wyoming, Ill., and was editor of the "Post," but soon returned to Chicago, where he was telegraph editor of the "Daily Telegraph." In 1878 he went to Bismarck, N. D., and with Stanley Huntley, author of the "Spoontyke Papers," secured control of

M. H. Jewell

the "Weekly Tribune," the first newspaper issued in North Dakota, being later associated in its publication with Col. Lounsbury, its founder. In 1883 he succeeded to their interests, and has been editor and proprietor since that time. The Bismarck "Tribune" is now one of the leading newspapers of the Northwest, and the publishing department is among the most complete in the country. It has handled the state printing since 1885, when the capital of Dakota was located at Bismarck. Mr. Jewell has always taken an active part in politics, and is prominent in the state Republican gatherings. He was chosen secretary of the Republican state committee in 1892, 1898, and again in the McKinley campaign of 1900. He was married, in 1882, to Kate, daughter of William Woods, of Indianapolis. They have one son.

TIBBITS, George, merchant and congressman, was born at Warwick, Kent co., R. I., Jan. 11, 1763, son of John and Waite (Brown) Tibbits, of English descent. When a child he was taken by his parents to Cheshire, Mass., whence they removed, in 1780, to Lausingsburg, N. Y. At the age of twenty-one he started in business, and was for some years a general merchant in that village; in 1797 he removed to Troy, and in 1804 retired from active commercial life. He was elected a member of the assembly in 1800, and in 1803-5 was a repre-

sentative from New York in the 8th congress; in 1815-18 he was state senator from the eastern district, and in 1820 a member of the assembly, while in 1816 he ran for the office of lieutenant-governor, Rufus King being nominated for governor, but the ticket was defeated. Mr. Tibbits was one of three commissioners appointed, in 1824, to visit the state prisons and to report on their condition. Their statement, dated Jan. 15, 1825, was not only regarded as of great value in New York and other states, but it attracted much attention in England, where William Roscoe, the historian, received it with the highest compliments. On the recommendation of this report the prison system was modelled. During the next five years he was one of the commissioners who had charge of the construction of Sing Sing prison, and who remedied many abuses in the management of penitentiaries. When Lafayette visited Troy, in 1824, Mr. Tibbits read the address of welcome made in behalf of the citizens, and in 1833 he welcomed Henry Clay on a like occasion. He was mayor of Troy in 1830-36. A Federalist in politics, he was one of the earliest advocates of a protective tariff, and while in congress wrote a number of essays on the latter subject, published in the Philadelphia "Inquirer," under the pen name of "Cato." He drew up a plan of finance, establishing a distinct and permanent fund for the completion of the Erie and Delaware and Hudson canals, and pointing out various sources of revenue, which was substantially the same with that afterward established by the legislature. Mr. Tibbits' book, "Finances of the Canal Fund of the State of New York Examined," appeared in 1828, following a "Memoir on Home Markets," published in 1827. He died in Troy, N. Y., July 19, 1849. Maj.-Gen. William B. Tibbits, prominent during the civil war, was his grandson.

HEATON, John Langdon, author and journalist, was born in Canton, St. Lawrence co., N. Y., Jan. 8, 1860. He was graduated at St. Lawrence University, in 1880. After a year in Rutgers College Grammar School, New Brunswick, N. J., he joined the staff of the Brooklyn "Times," soon becoming one of its editors, a position which he retained for ten years. During the presidential campaign of 1892 he established the Providence "News," a daily paper, which he sold two years later. Returning to New York, he engaged in editorial work upon the "Recorder" until it ceased publication; then upon the "Sunday World," with which he is still connected. In 1888 he visited Europe, and wrote a series of letters on tariff problems for a syndicate of Republican newspapers; in 1890 he again went abroad as a correspondent, writing of the split in the Irish parliamentary party, and in 1896-97 he spent some time in the East, studying the Cretan question, the Anglo-Egyptian advance in Egypt and the threat of war in Greece. Mr. Heaton has published: "The Story of Vermont" (1889); "Stories of Napoleon" (in collaboration with John Alden, 1895); "The Book of Lies" (1895), and the "Quilting Bee, and Other Poems" (1896). He has also contributed articles, stories and poems to the "Century," "North American Review," "Independent," "Cosmopolitan," "Harper's Young People," "Illustrated American," "Life," and other periodicals. He was married, in 1882, to Eliza Osborn, daughter of Rev. James H. Putnam, of Danvers, Mass. They have one son, James Putnam, born 1883.

IRWIN, John Scull, physician and educator, was born in Pittsburgh, Pa., April 4, 1825, son of John S. Irwin, M.D., of Scotch-Irish descent. He attended school at Pittsburgh, and was graduated at Western University in 1842. He matriculated at the University of Pennsylvania, 1845, received the degree

of M. D. in 1847, and engaged in the practice of medicine in Pittsburgh, Pa., for six years, when he relinquished his practice on account of impaired health. Dr. Irwin was an original member and one of the secretaries of the Allegheny County Medical Society; member of the Medical Society of Pennsylvania; the National Medical Association; of the Medical Society of Jefferson County, Ind.; of the Indiana State Medical Society. In 1853 he removed to Fort Wayne, Ind., and entered the banking house of the Allen Hamilton Co. as book keeper, remaining for eleven years. He was book-keeper and teller of the Branch Bank of the State of Indiana, and its successor, the Fort Wayne National Bank, for two years, and cashier of the Merchants' National Bank for seven years. His health failing, he resigned and spent a year traveling in the interests of the U. S. Life Insurance Co., acting as state manager. He was elected trustee, secretary and treasurer of the Fort Wayne public schools in 1863, and superintendent of public schools of that city in 1875, retiring from active work in 1896. He was a trustee of Indiana University (1849-75); trustee for the diocese of Indiana of Kenyon College, Gambier, O.; a member of the Indiana State Teachers' Association, and its president one year; a member of the National Education Council; a life member of the National Educational Association, and an *ex-officio* member of the state board of education. In 1875 the honorary degree of LL. D. was conferred on him by Indiana University. Dr. Irwin was married, in 1847, to Martha C. Mahon, of Pittsburgh, Pa. Since retiring from active life, he has resided in La Fayette, Ind.

LAPHAM, Elbridge Gerry, U. S. senator, was born at Farmington, Ontario co., N. Y., Oct. 18, 1814, son of Judge John Lapham, a Quaker. His education was obtained in the Canandaigua Academy, then the foremost institution of its kind in western New York. He then studied civil engineering, and followed the profession with success on the Michigan Southern railroad. This pursuit, however, was not congenial to him, and he soon abandoned it for the study of law in the office of Jared Wilson, of Canandaigua. He was admitted to the bar in 1844, and was soon conceded to be the leading practitioner of Ontario county, and as a trial lawyer to have few equals in the state. He affiliated with the Democratic party until 1848, when he supported the Wilmot proviso, and became a Free-soiler, being a member of the Van Buren convention at Buffalo. Joining the Republican party when it was first organized, he was an earnest party advocate, although he was never considered a politician in the common acceptation of the term. He was a delegate to the constitutional convention of 1867, and served in all the important campaigns as a stump orator, doing effective work. In 1874 he was elected as a representative to congress, and was serving his fourth term when the stirring political events of 1881 resulted in his promotion to the senate to succeed Hon. Roscoe Conkling. At the close of his senatorial term, in 1885, he retired to his home on the lake shore, not far from Canandaigua, and took no further active interest in political affairs. Senator Lapham was married, in 1844, to Jane F. McBride, of Utica, N. Y., and had eight children. He died at his home, after a short illness, Jan. 8, 1890.

ENGELMANN, George Julius, physician, was born in St. Louis, Mo., July 2, 1817, son of George and Dorothea (Horstmann) Engelmann. His parents visited Europe, in 1856, where he studied in the great cities, which his father sought in the interest of botanical research. In 1858, upon his return to St. Louis, George entered Washington University, where he was graduated in 1867. He then studied medicine at the University of Berlin, 1867-69, and at Tübingen, under von Niemeyer and von Bruns, 1869-

70. As volunteer surgeon under the Red Cross, he gained practical experience in the Franco-Prussian war, 1870-71, and at its close resumed his studies in Berlin, under von Langenbeck, Virchow, Traube, Ferriehs and Martin. After graduating in 1871 he spent the following year in Vienna, mainly in the gynecological wards of Spoth and Braun, and in the pathological laboratory of Rokitsanski. There he received the degree of master in obstetrics, and engaged in his first important investigation on the mucous membrane of the uterus with Dr. Kundrat. He spent a winter in the hospitals of Paris and London, and, returning to St. Louis in 1873, was appointed lecturer on pathological anatomy in the St. Louis Medical College. He organized the St. Louis School for Midwives and the Maternity Hospital in 1874. He was one of the founders of the American Gynecological Society; later president of the International Congress of Gynecology and Obstetrics, of which he was honorary president, 1892-99; of the St. Louis Obstetrical and Gynecological Society, and of the St. Louis Post-Graduate School of Medicine, in which he held the chair of diseases of women and operative midwifery. Dr. Engelmann gave up an extensive general practice in 1884, to devote his time to diseases of women. He was among the first to enter upon progressive abdominal work, to follow the lead of Batey and Tait; to urge ovariectomy in the early stage; to caution against chemical anti-sepsis; to draw attention to renal disturbance as a sequence to pelvic disease (renal disease following utero-ovarian lesion), and to the hysteroneuroses, the name under which he grouped the reflex symptoms which accompany pelvic disease. His efforts to replace the intra-uterine application, the pessary and the annoying moist tampon by more simple and efficient means, led to his treatises on "Dry Treatment"; "The Use of Electricity in Gynecological Practice"; the "Engelmann Family, with Series of Coils and Variable Interrupters," and the "Chapter on Faradism in American System of Electric Therapeutics." Other papers are: "Medical Education and Legislation"; "The Health of the American Girl"; "The Menstrual Function as Influenced by Modern Methods of Training, Mental and Physical," and "Labor Among Primitive Peoples." Many of his publications have appeared in German and French translations. He is an enthusiastic collector of archeological specimens, and possessed a very fine private exhibit, which was lately presented to the Peabody Museum, in Cambridge. Dr. Engelmann was president of the Southern Surgical and Gynecological Society; and the Boston Obstetrical Society; a fellow of the London Obstetrical Society; the British Gynecological Society; Washington Academy of Sciences; a member of the American Medical Association; St. Louis Academy of Science; honorary member of the Harvard Medical Alumni Association; Medical Society of the State of New York, and the Surgical Society of Bucharest. He is, also, a member of the St. Louis Club; the University Club, of St. Louis, and the St. Botolph, of Boston, where he removed from St. Louis in 1895. In 1879 he was married to Emily, daughter of Theodore Engelmann, of Illinois, who died in 1890. He was again married, in Boston, in 1893, to Mrs. Loula H. Clark, daughter of William Hensley.

NOURSE, Amos, senator, was born at Bolton, Worcester co., Mass., Dec. 17, 1794; was graduated at Harvard in 1812; studied medicine; was graduated M.D. in 1817, and settled in Wiscasset, Me., subsequently going to Hallowell. He removed to Bath in 1845, and was a medical lecturer at Bowdoin College from 1846 to 1854, and medical professor from 1855 to 1866. Mr. Nourse was also postmaster of Hallowell, Me., and collector of customs at Bath. He was a senator in congress from Maine from January to March, 1857, and became judge of probate of Sagadahoc county, Me., in 1860. He died at Bath, Me., April 17, 1877.

HAINER, Bayard Taylor, jurist and author, was born at Columbia, Mo., May 31, 1860, son of Ignace and Adelaide (Barthos) Hainer. His father was professor of modern languages at the University of Missouri from 1856 until the civil war began. His parents then removed to southern Iowa, where Bayard spent his boyhood working on a farm and attending common schools during the winter time. He earned enough money to pay his way through college by teaching, and he was graduated at the Iowa State College in 1884 and the Law School at Ann Arbor, Mich., in 1887. The same year he was admitted to the bar of the supreme court of Michigan, and entered upon the practice of his profession in Kansas, where he remained until the opening of Oklahoma

to settlement in 1889; then removed to Guthrie, the capital of the territory, and has resided there ever since. He took high rank as a lawyer; was elected, for three successive terms, city attorney of Guthrie, and served in that capacity for over five years, when he resigned to assume other duties as one of the Federal judges of the territory, to which position he was appointed by Pres. McKinley in February, 1898. He is regarded as an able, honest and upright judge, who commands the esteem and confidence of the bar as well as the people whom he

so fearlessly represents. Judge Hainer is conspicuous among the federal officers of Oklahoma for his broad yet conservative views and fidelity to every trust confided to him. He is the author of "The Modern Law of Municipal Securities" (1898), which is recognized as a valuable work upon a most important subject. In politics he is a Republican. In October, 1891, he was married to Florence, daughter of Mrs. Mary Weatherby, of Des Moines, Ia., and has one son, Bayard T., Jr.

KIMBALL, Harriet McEwen, poet, was born at Portsmouth, N. H., Nov. 2, 1834, daughter of David and Caroline R. Kimball. Her father was a chemist and a man of deep learning, under whose appreciation and culture her poetical taste was fostered and developed. Her early education was received almost wholly from her mother, a woman of unusual attainments. Her first volume, "Hymns," appeared in 1867; "Swallow-Flights of Song," in 1874; "The Blessed Company of all Faithful People," in 1879, and her complete works in 1889. Miss Kimball's life has been passed at Portsmouth. The Cottage Hospital, one of the noblest philanthropies of her native city, was founded chiefly through her. Miss Kimball's poetry largely is religious, although she has written much that is secular. She has been called by one writer "The Keble of the American church, although a woman," while Edmund Char-

once Stedman has said: "Her religious verse always displays, besides great purity and feeling, the artistic grace which marks her secular lyrics. The lack of such a grace has often made the poetry of faith seem rather barren, but Miss Kimball's song is the natural utterance of the poet, the woman, and the saint."

ALLEN, Heman, lawyer and congressman, was born at Poultney, Rutland co., Vt., in 1779, son of Heber and nephew of Ethan Allen. He was graduated at Dartmouth College in 1795, studied law, and began practice at Milton, Vt. He was sheriff of Chittenden county in 1808-9, and was chief justice of the Chittenden county court in 1811-15. From 1812 to 1817 he was an active member of the state legislature, during which time he was appointed quartermaster of militia, with the title of brigadier-general. He was elected a representative in congress from Vermont in 1817, but resigned in 1818 to accept, from Pres. Monroe, the appointment of U. S. marshal for the district of Vermont. In 1823 he received from the same president the appointment of minister to Chili, which post he resigned in 1828. In 1830 he was appointed president of the U. S. Brauch Bank, at Burlington, and held this office until the expiration of its charter, after which he settled in the town of Highgate, Vt. He was a trustee of the University of Vermont. Mr. Allen was twice married; first, in 1823, to Elizabeth Hart, of New Haven, Conn., sister-in-law of Com. Hull; second, in 1844, to Eliza Davis, daughter of Hon. Samuel P. P. Fay, of Cambridge, Mass. He died at Highgate, April 9, 1852. He was popularly known as "Chili" Allen, to distinguish him from his distant relative, Heman Allen, of Milton, also a congressman.

JORDAN, John Woolf, historian, was born in Philadelphia, Pa., Sept. 14, 1840, son of Francis and Emily (Woolf) Jordan. His uncle, John Jordan (1808-1880), was for twenty-eight years president of the Manufacturers' National Bank, of Philadelphia, and was a zealous antiquarian. His maternal grandfather was colonel of the 123d regiment of Pennsylvania infantry during the war of 1812. He received his preparatory education in the private schools of his birthplace, and in 1852 entered Nazareth Hall, graduating in 1856. His historical researches have been wide and profound, and in 1864 he was made a life member of the Historical Society of Pennsylvania. He was secretary of the council, corresponding secretary of the society, and since 1885 has been its assistant librarian. Since 1886 he has edited the "Pennsylvania Magazine of History and Biography," and done other literary work connected with the publication fund of the society. The following are a few of his historical contributions: "Proposition to Make Bethlehem, Pa. the Seat of Government in 1780" (1878); "Memoir of Bishop A. G. Spangenberg" (1884); "Notes of Travel of John Heekewelder and William Henry, Jr., to the Muskingum, O., in 1797" (1886); "Bishop Spangenberg's Notes of Travel to Onondaga in 1745" (1878); "Essay on an Onondaga Grammar; or, A Short Introduction to Learn the Maqua Tongue, by Rev. David Zeisburger," edited by John W. Jordan (1888); "Occupation of New York City by the British. Extracted from the Diaries of the Moravian Church for the years 1775, 1777, 1779, 1781, 1783, 1783" (1889); "Bethlehem During the Revolution, 1775-1783" (1888); "John Heekewelder's Journey to the Wabash, 1792" (1887); "The Military Hospitals at Bethlehem and Litzitz, During the Revolution" (1896); "Orderly Book of the Pennsylvania State Regiment of Foot, 1777" (1898); "Early Colonial Organ Builders of Pennsylvania" (1898); "Franklin as a Genealogist" (1899); "Continental Hospital Return, 1777-1778" (1899); "The State House in Philadelphia in 1774" (1900). Mr. Jordan has also

written many valuable works on the colonial history of the Moravian Church in Pennsylvania 1732-76; "Biography of John Henry Miller, printer, of Philadelphia" (1891); "History of Use of Trombone in Church Music" (1884); "The Lehigh Ferry at Bethlehem" (1897); "Moravian Immigration to Pennsylvania, 1734-1767, with Lists and Some Account of the Transport Vessels" (1896); "Erienshtal and Its Stockaded Mill" (1877); "A Red Rose from the Olden Time; or, A Ramble Through the Annals of the Red Rose Inn and the Barony of Nazareth in the Days of the Province, 1752-1772" (1883). Mr. Jordan founded the Pennsylvania Society Sons of the Revolution, and is its registrar. He has also served as general registrar of the societies of the United States. As founder of the Colonial Society of Pennsylvania he was its first president, and is now (1901) one of the vice presidents as well as a member of numerous historical and literary societies in America and Europe. He was married, in 1883, to Anne, daughter of Alfred Page, and has three children.

WILCOX, Leonard, jurist and congressman, was born at Hanover, N. H., Jan. 29, 1799, son of Jehuthan and Sarah (Fish) Wilcox. He was graduated at Dartmouth College in 1817; was admitted to the bar, and practiced at Orford, Grafton co., N. H., which was his home for the rest of his life. He became a member of the state legislature; was made a judge of the superior court, June 25, 1838, but resigned on account of ill health Sept. 20, 1840. He was a senator in congress from New Hampshire from March, 1842, to 1843; became a justice of the New Hampshire court of common pleas Dec. 7, 1847, and was again appointed to the superior court June 26, 1848. He was married, in 1809, to Almira Morey, and in 1833 to Mary Mann. A son by his first wife and two sons by his second were graduated at Dartmouth, and became lawyers. Judge Wilcox died at Orford, June 18, 1850.

TAYLOR, John W., lawyer and congressman, was born at Charlton, Saratoga co., N. Y., March 26, 1784, son of Judge John and Chloe (Cox) Taylor. He was graduated at Union College in 1803; studied law at Albany; was admitted to the bar in 1807, and began to practice at Ballston, N. Y., becoming a justice of the peace in 1808, and subsequently state commissioner of loans. He was elected to the state legislature in 1811, and while in that body was elected to congress, where he served from 1813 to 1833, being speaker of the house for the second session of the 16th congress during the passage of the Missouri Compromise, and also speaker of the 19th congress. Mr. Taylor was one of the organizers of the National Republican, and afterward of the Whig party. In 1841-42 he was a state senator. He accompanied Lafayette through New England on his last tour. In 1827 he delivered the annual address before the Phi Beta Kappa Society of Harvard. He was married at Albany, in 1806, to Jane Hodge who died in 1838. Removing to Cleveland, O., in 1843, Mr. Taylor died there, Sept. 8, 1854.

PRANG, Louis, lithographer and publisher, was born in Breslau, Silesia, March 12, 1824. Owing to ill health in his youth, he had a meagre school education. At the age of thirteen, he was apprenticed to his father in the calico printing business, where he rapidly acquired the practical details of designing, engraving on wood and metal, printing, dyeing, and color-mixing. In 1842 he left home in quest of larger experience, and in 1850 came to the United States, settling in Boston. Having failed to secure employment at his trade, he associated himself with a young architect, and later took up wood engraving for book illustration. Although he had never learned the trade, his early training in similar lines (blocks for calico printing) served him in good stead, and

for five years he worked successively, first on his own account, then for Frank Leslie (at that time art director of "Gleason's Pictorial"), and for John Andrew, the English engraver. In 1856 he formed a partnership in the lithographic business, under the name of Prang & Mayer, which he continued alone after 1860, under the style of L. Prang & Co. Within twenty-four hours after receiving the news of the attack on Fort Sumter, he had engraved and placed on sale a lithographic map of Charleston harbor. It was the first war map ever made in this country, and it opened the way for a long series of war publications. In 1866 he made and issued the first "chrome," a name coined by him for his lithographic reproductions of oil printings. They soon achieved such wide popularity that increased facilities for production were required, and in 1867 he removed his establishment from Boston to more commodious quarters within the old town limits of Roxbury, where his products were brought to the highest degree of perfection. In 1871 Mr. Prang began the issue of American Christmas cards for the English market, which became very popular, and in the following year he introduced them into the United States. Prize exhibitions of designs were held for several successive years, beginning in 1880, which brought out the talent of many young artists who have acquired since a national recognition, and Prang's American Christmas cards, like his chromes, became the standard of excellence for art color printing the world over. After producing a series of lithographic representations of rare Oriental ceramics in the collection of William T. Walters, of Baltimore, to illustrate "Oriental Art" (1897), Mr. Prang closed his career as a color printer and retired. The firm was consolidated in 1897 into the Taber Prang Art Co., with headquarters in Springfield, Mass. In 1871 he began publishing works for drawing and elementary art study for public schools, and this branch of his business became of such importance that in 1882 the

Prang Educational Co. was organized to conduct it, with Mr. Prang as president. This company, having offices in New York, Chicago and Boston, not only provides for the publication of educational text books and materials, used in the public schools, but for the training of teachers to direct and supervise elementary art instruction according to the principles and methods embodied in the Prang course of art instruction. Both the publications and the normal training provisions have received recognition throughout America and Europe, and have been translated into German, Italian, French, Spanish and Portuguese. Mr. Prang devoted much study to the problem of color classification and nomenclature, and published "The Prang Standard of Color" in 1898. He was married, Nov. 1, 1851, to Rosa Gerber, a native of Berne, Switzerland, who died June 2, 1898. He was again married, April 15, 1900, to Mrs. Mary Dana Hicks, a native of Syracuse, N. Y. Mrs. Rosa Prang Heinzen, of Boston, is his only child.

TAYLOR, Benjamin Franklin, journalist and lecturer, was born at Lowville, N. Y., July 18, 1819, son of Stephen William and Eunice (Scranton) Taylor. His earliest American ancestor, Stephen Taylor, emigrated from England in the latter part of the seventeenth century, and settled at Scituate, R. I.; while the maternal line descends from John Scranton, of England, who settled in Guilford, Conn., in

1689. William Taylor, eldest son of the emigrant, served in the old French war, and with his brother, John, in the revolutionary war. The family removed to Connecticut in 1776; to North Adams, Mass., in 1781, and thence to Burlington, Otsego co., N. Y. Stephen William Taylor was a principal of the Lowville Academy, Lewis county, N. Y.; later professor of mathematics in Madison (now Colgate) University, Hamilton, N. Y., and at the time of his death president of that institution. The son was graduated at Madison University in 1838, and became principal of the Norwich (N. Y.) Academy.

William Taylor

In 1845 Mr. Taylor removed to Chicago, and was soon on the staff of the "Evening Journal." This connection lasted for twenty years, and during the greater part of this period he was literary editor; but in 1863 he went to the front as field correspondent, and among his letters from the seat of war, "The Battle Above the Clouds" (Lookout mountain) and that on the storming of Mission ridge were widely quoted. After leaving daily journalism, in 1865, he traveled extensively, visiting California, Mexico, and the islands of the Pacific; later delivering courses of lectures on various topics. He occasionally contributed both prose and poetry to the "Atlantic," "Harper's," and other monthly magazines, and, being a staunch friend of Dr. Josiah G. Holland, contributed regularly to "Scribner's Magazine" while Dr. Holland was its editor. His poems were not pretentious, but they linger in the memory because they came from the heart. Whittier said: "I do not know of any one who so well reproduces the scenes of long ago." His style was vividly picturesque, his fancy exuberant, and his selection of metaphors appropriate. The London "Times" termed him "The Oliver Goldsmith of America," and pronounced some of his battle pictures to be the finest ever written in the English language. His published works include: "Attractions of Language" (1845); "January and June" (1853); "Pictures in Camp and Field" (1871); "The World on Wheels" (1873); "Old Time Pictures and Sheaves of Rhyme" (1874); "Songs of Yesterday" (1877); "Summer Savory Gleaned from Rural Nooks" (1879); "Between the Gates" and "Pictures of California Life" (1881); "Dulce Domum, the Burden of Song" (1884); "Theophilus Trent" (1887), his only novel, and a complete edition of his poems in the same year. Among his most popular poems are "The Isle of Long Ago," "Rhymes of the River," and "The Old Village Choir." In 1887 Mr. Taylor received the degree of LL.D. from the University of California. He was a brilliant conversationalist, and had a cordial, sympathetic nature that won him hosts of friends. His fine presence and cultured voice placed him among the popular lecturers of the period, such as Wendell Phillips and Bayard Taylor. Mr. Taylor was married, in 1839, to Mary Elizabeth, daughter of Deacon Isaac Bromley, of Norwich, Conn., and sister of Isaac Bromley, Jr., of the New York "Tribune." She died in 1848, leaving two sons, who are still (1901) living. He was married the second time, in 1852, to Lucy E., daughter of Daniel M. and Mary (Tucker) Leaming, of La Porte, Ind. Mrs. Taylor is an active, public spirited woman. In 1856 she was elected to membership on the Cleveland board of education, was re-elected in 1898, and again in 1900, being now in her third term, and has filled the position to the

present time with dignity and honor. She has herself written much that is admirable, in both prose and verse. Mr. Taylor died in Cleveland, O., Feb. 24, 1887, and was buried on the grounds of Madison University.

MORRIS, Felix William James, actor, was born at Birkenhead, England, April 25, 1845, son of William Morris, a Welshman and a sea captain, and Mary O'Grot, who was a native of Scotland. He was educated at a school in Switzerland and at Guy's Hospital, London; but he disappointed his parents by refusing to practice medicine, and, after some experience in private theatricals, he decided to go on the stage, and sailed for Boston, Mass. Failing to secure an engagement there, he went to Albany, N. Y., where he worked in a drug store and as a ticket seller in a theatre, having failed in his first appearance before the footlights. He next became head "super" at the Division Street Theatre, at \$5 per week. Success in low comedy led him to attempt more ambitious parts, including Shakespearian characters, and some words of encouragement from Joseph Jefferson spurred him on. Morris supported Lotta in "Musette," John T. Raymond in "Colonel Sellers," and other noted actors. Going to Canada with a stock company, he gained great popularity in such plays as "Rosendale" and "Saratoga," and, as Touchstone, supported Adelaide Neilson in "As You Like It." Returning to New York city, he played at the Fifth Avenue Theatre in the cast that supported Mary Anderson and Modjeska in their first engagements. During an engagement at the California Theatre, San Francisco, he made a decided hit as the Pasha in "Fatinitza" and as Paspartout in "Around the World in Eighty Days." Later he supported Lester Wallack through New England, and visited the West Indies, where his Sir Joseph Porter, in "Pinafore," was enthusiastically praised. On his return to New York city he played at different theatres, some of the parts in which he was particularly admired being those of the English correspondent in "Michael Strogoff," Sam Gerridge in "Caste," the Burgomaster in "Lieutenant Heleme," and Monsieur Bonnet in the "Pavements of Paris," the last named being subsequently revised by Mr. Morris and played before crowded houses in Chicago and elsewhere.

While visiting England, to oblige a friend, he took the part of Peckering Peck, in "On Change" (called in this country "The Big Bonanza"), and he created so great a sensation that he was persuaded to continue with the company for more than a year. Equal praise was accorded him for his impersonation of a costermonger in "Turn Him Out," and in the title-role in "Kerry." This engagement ended, he became a member of Rosina Vokes' company and returning to the United States, gave some of his most artistic performances, such as the Old Musician in the play by that title, the Frenchman in "A Pantomime Rehearsal," Chevalier in the "Game of Cards," and the Count in "The Rose." On Dec. 28, 1896, he joined one of Frohman's companies, his last appearance being in the character of the Professor in the "White Horse Tavern." He was a great character actor and a thorough artist, whose work, as delicate and clean-cut as a cameo, was considered to be a fine exposition of the dramatic art as has been presented on the modern stage. He, moreover, reflected in his acting all the sweetness and purity of a model private life. His friend, Rev. Minot J. Savage, said at his funeral:

Felix Morris

"If all actors were like him the supposed gulf between the stage and the church would be so narrow that the feeblest foot could step across. There never has been a time since I knew him that I would not have welcomed him to speak in my place. He was not only an actor, but also a noble, true gentleman." Mr. Morris was a member of the Players' and Salmagundi clubs of New York city, and of the Actors' Fund Society; an honorary member of the Albany Press Club and of the Forty Club of Chicago, and was a Freemason. He was married in San Francisco, Cal., May 19, 1879, to Mary, daughter of William and Mary (Pavey) Shoot, known on the stage as Florence Moore, who bore him two daughters. Felix Morris died in New York city, Jan. 13, 1900.

PLATT, Jonas, jurist, was born at Poughkeepsie, N. Y., June 30, 1769, son of Zephaniah Platt, who was a member of the Continental Congress (1784-86), one of the projectors of the Erie canal, a judge of the state circuit court for many years, and the founder of Plattsburg. The son was educated in the public schools, was admitted to the bar in 1790, and in 1791 settled at Whitesboro, where he began to practice law. He was a member of the assembly in 1796, a representative in congress from New York from 1799 to 1801, and a member of the state senate in 1810-13. In 1810 he ran for office as governor of New York state, but was defeated. He was a member of the council in 1813, and in 1814-23 a justice of the supreme court of New York. After leaving the bench he practiced his profession, first in Utica, and subsequently in New York city. He died at Peru, Clinton co., N. Y., Feb. 22, 1834.

ANDERSON, Rufus, clergyman and author, was born at North Yarmouth, Cumberland co., Me., Aug. 17, 1793, son of Rev. Rufus and Hannah (Parsons) Anderson. His father was graduated at Dartmouth College in 1791; settled as a Congregational minister at North Yarmouth in 1794, at Wenham, Mass., in 1805, and died in 1814. He was the author of two "Sermons on Fasting," and "Seven Letters Against Close Communion." The son was graduated at Bowdoin College in 1818, and at Andover Theological Seminary in 1822. He was ordained in 1820, and served from 1824 to 1832 as assistant secretary of the American Board of Commissioners for

Foreign Missions, and as secretary from 1832 to 1866, visiting in that capacity the mission stations on the Mediterranean in 1843, the Indian missions in 1854, and those of the Sandwich Islands in 1863. On leaving the board of foreign missions in 1866 he received a testimonial of \$20,000 from Boston and New York merchants. He turned the greater part of this sum over to the board. From 1867 to 1869 he lectured on foreign missions at Andover Seminary. He was the author of "Catherine Brown" (1825); "Observations on Peloponnesus and the Greek Islands" (1828); "Irish Missions in the Early Ages" (1839); "Bartimeus" (1851); "Missions in the Levant" (1860); "The Hawaiian Islands: Their Progress and Condition" (1864); "Foreign Missions: Their Reactions and Claims" (1869); "A Heathen Nation Civilized" (1870), and "A History of the Missions of the American Board to the Oriental Churches" (5 vols., 1872). Dr. Anderson died May 30, 1880.

PRESTON, John Smith, soldier and orator, was born near Abingdon, Washington co., Va., April 20, 1809, son of Francis and Sarah (Campbell) Preston, and brother of William Campbell Preston, U. S.

senator. He was graduated at Hampden Sidney College in 1824, attended law lectures at the University of Virginia in 1825-26 and at Harvard College, and after his admission to the bar settled in Abingdon, whence he removed to Columbia S. C. For several years he engaged in sugar-planting in Louisiana, whereby he acquired considerable wealth, much of which he spent in collecting paintings and sculptures. He was a generous patron of Hiram Powers, who, as a token of his appreciation, gave him the first replica of the "Greek Slave." He was an ardent advocate of secession, and in May, 1860, was chairman of the South Carolina delegation to the Democratic convention at Charleston. On the election of Abraham Lincoln, Mr. Preston was chosen a commissioner to Virginia, and in February, 1861, made an impassioned speech in favor of the withdrawal of that state from the Union. This was generally regarded as his most eloquent effort. Joining the staff of Gen. Beauregard in 1861, he took part in the first battle of Bull Run; subsequently he was transferred to the conscript department with the rank of brigadier-general. Soon after the war closed Gen. Preston went to England, and he did not return

to his native country for several years. As an orator he attained a popularity almost equal to that enjoyed by his brother, William. Among his notable addresses were: to the Palmetto regiment on its return from the Mexican war in 1818; before the Seventy-sixth Association of Charleston; at the seventy-fifth anniversary of the battle of King's mountain; at the laying of the corner-stone of the University of the South at Sewanee, Tenn., and at the unveiling of the Confederate soldiers' monument at Columbia. He gave considerable attention to literary pursuits, but apparently did not publish anything of importance. He was married, in 1830, to Caroline, daughter of Gen. Wade Hampton, the first. Gen. Preston died in Columbia, S. C., May 1, 1881.

BOND, Thomas Emerson, journalist, was born in Baltimore, Md., in February, 1782. His parents were residents of Buckingham county, Va., where they had settled in early life. The son took up the study of medicine at the University of Pennsylvania, and, after returning to his native state, completed his studies and obtained the degree of M. D. at the University of Maryland. Though offered a professorship in the university, his health would not permit him to accept it, and he commenced the practice of medicine. Early in life he had identified himself with the Methodist Episcopal church of Harford county, Md., pursuing the investigation of theological questions with remarkable acuteness of intellect, and while practicing medicine in Baltimore was licensed as a local preacher, taking a very active part in the discussions arising from the questions of church government reform during 1820-30, and culminating in the establishment of the Methodist Protestant church. Having been a student of English and classical writers for many years, he had developed considerable literary ability, writing with a chaste, strong and nervous style, and in 1827 he published "An Appeal to the Methodists," in opposition to the changes proposed by the reformers. He also published a "Narrative and Defense of the Methodist Episcopal Church" in the following year, and from 1830 to 1831 edited "The Tinerant," a Baltimore paper, in defense of the church. His greatest

R. Anderson

(1839); "Bartimeus" (1851); "Missions in the Levant" (1860); "The Hawaiian Islands: Their Progress and Condition" (1864); "Foreign Missions: Their Reactions and Claims" (1869); "A Heathen Nation Civilized" (1870), and "A History of the Missions of the American Board to the Oriental Churches" (5 vols., 1872). Dr. Anderson died May 30, 1880.

PRESTON, John Smith, soldier and orator, was born near Abingdon, Washington co., Va., April 20, 1809, son of Francis and Sarah (Campbell) Preston, and brother of William Campbell Preston, U. S.

success was achieved when, in 1840, he became editor of the leading Methodist organ, the "Christian Advocate and Journal," published in New York city. He retained the editorship until 1848, and was again elected to the position in 1852, serving until his death, and displaying a high order of editorial skill seldom surpassed. He also wrote important articles for the "Methodist Quarterly." Dr. Bond died in New York city, March 14, 1856. His son, Thomas Emerson, also a journalist, was born in Baltimore, Md., in 1813, and became his father's assistant on the "Christian Advocate and Journal," showing unusual power as a humorous and sarcastic writer. He united with the southern Methodist church in 1860, and during the civil war espoused the cause of the South, subsequently aiding in founding the "Episcopal Methodist," the official organ of the southern church, but relinquished his interest to establish another paper on the same lines. The latter he consolidated with the "Southern Christian Advocate," of which he became associate editor, his paper appearing simultaneously in Baltimore and St. Louis. He died in Harford county, Md., Aug. 18, 1872.

LYMAN, David Brainerd, lawyer, was born at Hilo, Hawaiian islands, March 27, 1840, son of David B. and Sarah (Joiner) Lyman. His father, a graduate of Williams College and Andover Theological Seminary, was a missionary to the Hawaiian islands for over fifty years. The son left Honolulu in 1859, was graduated at Yale College in 1864, and at the Harvard Law School two years later. He was at once admitted to the bar in Boston, but in the same year, 1866, went to Chicago, where he secured a clerkship in the law office of Waite & Clark, remaining in their employ two years. In July, 1869, he formed a partnership with Col. Huntington W. Jackson, under the firm name of

True Godliness" (1816); "The American Christian Expositor," in two volumes (1832-33), and other works. He died in New York city, Feb. 17, 1833.

McLEOD, John Niel, clergyman, was born in New York city, Oct. 11, 1806, son of Alexander McLeod. He was graduated at Columbia College in 1826, and at the Theological Seminary of the Reformed Presbyterian church, Philadelphia, Pa., in 1828. A year later he was ordained, and installed as pastor of the Reformed Presbyterian Church, at Galway, Saratoga co., N. Y., where he remained for about two years. In April, 1832, he assisted his father in New York; was made his colleague in January, 1833, and after his father's death, in February, became pastor of the church. In 1846 Dickinson College conferred upon Dr. McLeod the degree of D. D. In 1851 he was elected professor of doctrinal theology in the Theological Seminary of the Reformed Presbyterian church, Philadelphia. In August, 1855, he was a delegate to the Paris conference to form an Evangelical alliance for the world. He was also one of the committee of nine appointed by the American Bible Society to make a thorough grammatical and typographical revision of the Scriptures, and was chairman of the sub-committee of three by whom the burden of the work was accomplished. For about six months he was chaplain of the 84th regiment, New York troops, in the civil war. Dr. McLeod had a most dignified and courteous bearing. He was of the old-fashioned stamp, earnest and sincerely pious, keeping to the strict letter of his faith. He showed great profundity, both in his discourses and in his writings. He died in New York city, April 27, 1874.

McLEOD, Xavier Donald, author, was born in New York city, Nov. 17, 1821, son of Rev. Alexander McLeod, a Presbyterian clergyman, and was educated at Columbia College. Much to the regret of his family, he took orders in the Protestant Episcopal church in 1845, and was given charge of a parish in the country, where he spent five years as rector. In 1850 he decided to visit Europe and continue his studies, especially directing them to the establishment of his mind as to the historical claims of the church of his adoption. Two years in Europe resulted in his conversion to the Roman Catholic faith, and on his return to America he connected himself editorially with the St. Louis "Leader," a prominent and influential Roman Catholic journal. He was afterwards ordained a priest and appointed professor of rhetoric and belles-lettres in the Roman Catholic College of Mount St. Mary, Emmettsburg, Md. Among his writings are: "Pymshurst: His Wanderings and Ways of Thinking" (1852); "Life of Sir Walter Scott" (1852); "Life of Fernando Wood, Mayor of New York" (1856); "Life of Mary Queen of Scots" (1857); "The Elder's House; or, The Three Converts." "The Saga of Viking Torquil" is a poem from his pen. He died from the results of injuries received in a railroad accident near Cincinnati, O., July 20, 1865.

Lyman & Jackson, which continued until Oct. 1, 1865, when Mr. Lyman retired to become president of the Chicago Title and Trust Co., which he was largely instrumental in forming. For years he has been a member of the Chicago Bar Association, and from 1893 to 1895 was its president. He is also a member of the Chicago University, Union League and Church clubs, and was the first president of the last. He was married, Oct. 5, 1870, to Mary E., daughter of F. D. Cossitt, of Chicago, and has two children, David B., Jr., and Mary E. Lyman.

McLEOD, Alexander, clergyman, was born on the Island of Mull, Scotland, June 12, 1774; came to America at an early age; was graduated at Union College in 1798; in the following year was licensed to preach, and ordained and was settled over churches in New York and Walkkill, N. Y. The latter charge he soon resigned, but remained the pastor of the First Reformed Presbyterian Church of New York until his death, becoming prominent among the clergy of that city. He was also eminent as a writer; was one of the editors of the "Christian Magazine," and published "Negro Slavery Unjustifiable" (1802); "The Messiah" (1803); "Ecclesiastical Catechism" (1807); "On the Ministry" (1808); "Lectures on the Principal Prophecies of the Revelation" (1814); "View of the Late War" (1815); "The Life and Power of

SATTERLEE, Richard Smith, physician and surgeon, was born at Fairfield, Herkimer co., N. Y., Dec. 6, 1798, son of Maj. William Satterlee, who died a few months later of wounds received at the battle of Brandywine. He received a collegiate education; studied medicine, and after graduating in 1818, he commenced to practice in Seneca county, N. Y., but subsequently removed to Detroit, Mich. Detroit was at this time a favorite military post, and the association with army officers led him to accept the position of surgeon in a neighboring garrison. He accompanied Gen. Lewis Cass to Washington a few months later, and, through the latter's influence with the secretary of war, Mr. Calhoun, and the surgeon-general of the army, Dr. Lovell, obtained the appointment of assistant surgeon, U. S. army, in February, 1832. His first official duties were on the Niagara frontier, and he spent the

David B. Lyman

next fifteen years in the Indian country on the lakes. On the opening of the Florida war, in 1837, he went with the troops to Tampa Bay, and was assigned to duty on the staff of Gen. (then Col.) Zachary Taylor. He took an active part in the war against the Seminole Indians, and after the battle of Okechobee joined Gen. Winfield Scott in the Cherokee campaign of 1838. After two years' service on the Canada frontier and another Florida campaign, he was stationed on the seaboard until 1846, when he accompanied the troops to Mexico, joining Gen. Scott at Lotos island in 1847. Landing with him at Vera Cruz, Dr. Satterlee became chief surgeon of the 1st division of regular troops, under Gen. Worth. He served in this position during the siege and capture of Vera Cruz; the battles of Cerro Gordo, Churubusco, Molino del Rey; the storming of Chapultepec and the gates of the city of Mexico. On the occupation of the city he was assigned to duty as medical director of the army, on the staff of Gen. Scott, and, with the aid of his associate surgeons, established numerous hospitals for the sick and wounded. He remained here until the treaty of Gaudaloupe Hidalgo was signed, when he joined the staff of Gen. Butler, who had succeeded Gen. Scott. Being relieved from service in Mexico, he reported in Washington, and, after another brief service on the seaboard, sailed from New York with the 3d regiment of artillery, in the San Francisco, for California. The vessel was wrecked in the Gulf stream, and more than two hundred lives were lost. The survivors were returned to New York, and Surgeon Satterlee was assigned to duty as medical purveyor of the army, a position which he held until the close of the civil war. Having advanced to the head of the list of army surgeons, he was made brevet brigadier general in 1866. Under the operation of the law making the peace establishment, he became chief medical purveyor of the army, disbursing and accounting for more than \$20,000,000. He was retired by Pres. Johnson in the last days of his administration. Dr. Satterlee died in New York city, Nov. 10, 1880.

SOMERVILLE, William Clark, author, was born at Bloomsbury, St. Mary's co., Md., March 25, 1790, elder son of William and Anna (Hebb) Somerville. Taking a deep interest in the struggle for independence of the South American states, he joined the army of Venezuela, and for his services received the rank of major from the government of that country. He made the tour of Europe in 1817-18. On his return he bought Stratford house, Westmoreland co., Va., the former home of Col. Henry Lee, whose family and his own were intimate, and entertained most generously. He was a man of many accomplishments and of elegant manners and appearance. Mr. Somerville was the author of "Letters From Paris on the Causes and Consequences of the French Revolution" (1822); "Extracts from a Letter on the Mode of Choosing the President" (1825), and of some poetical pieces. He was active in politics as a Whig and a personal friend of John Quincy Adams, who, on becoming president, appointed him minister to Sweden. He sailed for Europe in September, 1825, on the same vessel with Gen. Lafayette, who was returning from his visit to this country, but died at Auxerre, France, Jan. 25, 1826, not long after landing. In his will he expressed his opinion that slavery was an evil, and arranged for the gradual emancipation of his slaves. At the time of his death he was betrothed to Cora, daughter of Hon. Edward Livingston, of New York. In accordance with his expressed wish, he was buried at La Grange, on the estate of Gen. Lafayette.

MORRIS, Henry Crittenden, lawyer, author and U. S. consul, was born in Chicago, Ill., April 18, 1868, son of John and Susan (Claude) Morris. On his father's side his ancestry is English, a near

relationship with the Morris families so prominent in revolutionary times being probable. His mother traces her line in this country back to the eminent Puritan divines, John Cotton and Cotton Mather, of Boston; others of her ancestors were French, Swiss and Dutch. His primary education was by private tutors and at the first Chicago University. In February, 1882, he went to Europe, remaining for sixteen months, mostly in Germany. In the autumn of 1883 he returned to the United States and entered Buchtel College, Akron, O.; in 1887 was graduated with the degree of A. B. in the classical department of Lombard University, Galesburg, Ill., and in 1890 received the degree of A. M. from the same institution. In 1881 he was a page in the Democratic national convention of Chicago. In 1888 he again visited Europe, spending eight months in Germany. In the fall of that year, upon his return, he entered the Chicago College of Law, at which he was graduated LL. B. in 1889 with its first class, and was thereupon immediately admitted to the bar. In 1890 he was elected secretary of the Young People's Universalist Union for the state of Illinois, and in 1891 became president of the State Association of Illinois. In February, 1892, Mr. Morris went to Paris, where he remained for a year, engaged in the study of modern languages and literature, including German, French, Italian and Spanish. From February to November, 1893, he was in southern Germany, Austria and Switzerland. On Nov. 1, 1893, he was appointed U. S. consul at Ghent, Belgium, which position he held until Dec. 16, 1898, when he voluntarily resigned. He has spent more than nine years abroad; two years in Germany, five years in Belgium, and sixteen months in France, and the remaining portion of the time in travel in almost all the countries of Europe. He speaks, reads and writes fluently French and German, and has considerable knowledge of Italian, Spanish, Portuguese, Dutch and Swedish. During his incumbency of the consulate he prepared numerous official reports on subjects chiefly relative to Belgium, and through their publication his name has become more or less widely known. He has also written "The History of Colonization from the Earliest Times to the Present Day" (2 vols., 1900), a work which has elicited much favorable comment. On his return to the United States he resumed the practice of law in Chicago, in association with his father.

HUDSON, Frederick, journalist, was born at Quincy, Norfolk co., Mass., in 1819. His parents removed to Concord, N. H., in his childhood, and he was there educated at the public schools. He went to New York city in 1836, and entered the office of the "Herald," which was then in its infancy. His diligence and aptitude were recognized by Mr. Bennett, under whom young Hudson rapidly developed his abilities, mounting step by step in his profession until he became managing editor of the "Herald," a position he held for thirty years. In 1866 the failure of his health under such strenuous duties compelled him to retire, and he afterwards lived at Concord, N. H., where his garden, his family, and the compilation of his "Record of Journalism in the United States From 1690 to 1872," agreeably employed his leisure. During his active career he had accumulated a great amount of material, and his work is an accurate and vivid portrayal of the growth of journalism in the United States. He died at Canton, Mass., Oct. 21, 1875.

MENENDEZ, Pedro, explorer, was born at Aviles, Spain, in 1519, of a noble Asturian family. He served in the Spanish navy, and was for many years a daring and successful cruiser on his own account, under royal commission, against Moorish and other pirates, but more especially against the French during the long wars of Charles V. with that nation. He attained the rank of captain-general, and commanded the fleet which carried Philip II. to England in 1554. He visited the West Indies several times, serving twice as general of the annual India fleet, where he amassed a large fortune. He was imprisoned and fined for misconduct upon his return to Spain in July, 1560, but his great abilities enabled him to regain the favor of the court. In 1562 the French undertook to claim Florida; Jean Ribault, with a colony of Huguenots, entered the St. John's river and set up a monument bearing the arms of France, and in 1564 René de Laudonnière, another Frenchman, located a settlement and built Fort Caroline, near the mouth of that river. Partly to oppose this action of the French and partly to substantiate the Spanish claim to the territory Philip made Menendez governor of Florida in 1565, and he sailed from Cadiz, June 29th, with perhaps the best appointed fleet sent to the West Indies in that century. On Aug. 28th (St. Augustine's Day), he discovered a bay and river in Florida, which

OLD GATE, ST. AUGUSTINE.

he called St. Augustine, and established on its banks, Sept. 8, 1565, the town of that name, which is the oldest existing in the United States. On Sept. 10th the French started from Fort Caroline to attack the Spaniards at St. Augustine, but they were driven back by a storm, and a week later, Menendez, taking advantage of their absence, assumed the offensive and marched overland with 500 men to make an attack on the remaining French at Fort Caroline, trusting to reach it before the fleet could return. On Sept. 20th he massacred the entire garrison, including women and children, and, in order to wipe out even the memory of the French, he changed the names of the river and the fort to San Mateo, and leaving a garrison in the fort returned to St. Augustine. On the 28th he massacred the remainder of the French, including Ribault, who, having been shipwrecked from the fleet, had surrendered to Menendez, through his treachery. In Bryant's "History of the United States," Menendez is described as "a bigot who could conceive of no better manifestation of love to God than cruelty to man when man was heretical; whose treacherous cunning in approaching and seizing his prey was the keenest animal instinct." The place of this cruel massacre is known to this day as the "bloody river of Matanzas." In the following year Menendez pushed his explorations northward as far as Chesapeake bay, and then returned to Spain. During his absence a company of French

adventurers captured Fort San Mateo and massacred its garrison. Menendez sent a colony of Jesuits in 1570 to begin a mission on the Rappahannock river, but they were soon destroyed by Indians. In 1572 he sailed up the Potomac, avenged the destruction of his colony, and proceeded to make a careful exploration of the coasts of the Chesapeake. Two years later he was summoned to Spain and appointed to the command of a squadron to be sent against the revolted Netherlands, but before setting sail he died at Santander, Sept. 17, 1574.

VONNOH, Bessie Onahotema (Potter), sculptor, was born in St. Louis, Mo., Aug. 17, 1872, daughter of Alexander C. and Mary Elizabeth (McKinney) Potter, who were natives of Ohio. Her father died when she was two years of age, and her mother removed to Chicago, where the daughter was educated in the public schools. Three years were spent in the Art Institute, and in 1892 she was given a commission to execute a work for the Columbian exposition. This, an eight-foot figure representing "Art," adorned the Illinois state building. In 1894 Miss Potter took a studio of her own. In 1895 she spent four months in Paris, and in 1897 four in Florence, where she attended to having a number of her works copied in marble. The first productions which attracted any particular attention were some portrait statues executed in 1894, and it is by these and similar figures that she is best known. In their general character they recall the Tanager figurines, and, like those objects of antiquity, reproduce with a charming realism the artist's contemporaries. Truthfulness to life and spirit being the first things aimed at, and details being sparingly introduced, these little groups and single figures are distinguished by dignity as well as grace. Their value will enhance with time, both because of their intrinsic beauty and their historical value as records of a certain period of American life. In 1898 she removed to New York city, and was married, Sept. 17, 1899, to Robert William Vonnoh, the painter. Mrs. Vonnoh is a member of the National Sculpture Society.

BLACK, John, U. S. senator, was a native of Virginia. He received a classical education, after which he taught school for a time. He then studied law, was admitted to the bar, and commenced the practice of his profession in Louisiana. Later in life he removed to Mississippi, where he was appointed a judge. As a Whig he was appointed a U. S. senator by the governor of Mississippi to fill the vacancy caused by the death of Powhatan Ellis; and to this office he was subsequently elected, serving from Dec. 12, 1832, until his resignation in 1838, when he resumed the practice of law. During his first term in the senate he was chairman of the committee on private land claims. His death occurred at Winchester, Va., Aug. 29, 1854.

MEEK, Alexander Beaufort, jurist and author, was born in Columbia, S. C., July 17, 1814, son of Samuel M. and Ann Arabella (McDowell) Meek. His father was a Methodist clergyman and a physician. Mr. Meek removed with his parents at an early age to Tuscaloosa, Ala., and gave evidence in boyhood of rare intellectual gifts. He is said to have committed to memory and recited in Sunday-school every verse of the Bible. He was one of the first to enter the University of Alabama, where he was graduated in 1833, and he was admitted to the bar in 1835. He volunteered as ensign in the trouble with the Creeks. In 1836 he was appointed by Gov. Clay attorney-general of the state, and held the position for a few months. In 1839 he became editor of the "Southern," a literary periodical published in Tuscaloosa. In 1842 he was appointed by Gov. Fitzpatrick judge of the probate court of Tuscaloosa, but at a meeting of the legislature was de-

feated. Pres. Polk appointed him assistant secretary of the U. S. treasury in 1845, and he was the legal adviser of that department. Two years later he resigned and was made Federal attorney for the southern district of Alabama, which position he retained during Mr. Polk's administration. About this time he went to reside in Mobile, and was for a time associate editor of the "Register." He was elected to the state legislature in 1853, and as chairman of the committee on education reported a bill to organize a state system of public schools. His successful efforts in behalf of education won for him the title of "father of the public schools of Alabama." In 1854 he was appointed by Gov. Winston judge of the probate court of Mobile. In 1856 he was an elector on the Buchanan ticket. In 1859 he was again elected to the legislature and became speaker of the house of representatives of that body. He was constantly engaged with his pen, though much of his work was in the form of fugitive poems and prose contributions to periodicals. His published works are: "A Supplement to Aiken's Digest of the Laws of Alabama, 1836-41" (1842); "Red Eagle" (1855); "Songs and Poems of the South" (1857); "Romantic Passages in Southern History" (1857). His writings attracted considerable attention, and were highly praised for beauty and originality. In person Judge Meek was tall, erect and graceful, with a fine voice and great natural eloquence. He was much esteemed for his amiable disposition and courteous manners. He was twice married: in 1836, to Mrs. Emma Donaldson (Clackner) Slatter, of Mobile, and, in 1864, to Mrs. Eliza Jane Cannon, of Columbus, Miss.; he left no children. Two of his brothers survived him, Col. Samuel Mills Meek, a lawyer of Columbus, Miss., and Prof. B. F. Meek, of the University of Alabama. Judge Meek died at his home in Columbus, Miss., Nov. 7, 1865.

PIKE, Frederick Augustus, lawyer and congressman, was born at Calais, Washington co., Me., Dec. 9, 1817. He spent two years at Bowdoin College, studied law, and was admitted to the bar in 1840. He began practice at Calais, where he always resided, and was for eight terms a member of the Maine legislature, serving, in 1860, as speaker of the house of representatives. He was for several years attorney for the county in which he lived. In 1860 he was elected a representative from Maine to the 37th congress, serving on the committee on naval affairs; was re-elected to the 38th congress, serving as chairman of the committee on expenditures in the state department, and a member of the committee on naval affairs, and was re-elected to the 39th congress, serving on his old committees, and as chairman of the committee on expenses in the state department and of the special committee on the murders in South Carolina. He was also a member of the national committee appointed to accompany the remains of Pres. Lincoln to Illinois. He was re-elected to the 40th congress, and served on the committee on reconstruction as well as on his old committees. While in congress he was an earnest worker for emancipation, and the closing sentence of a speech he made in 1861, "Tax, fight, emancipate," became a watchword of his party. He was a member of the legislature in 1870-71, and was defeated as a candidate of the liberal Republican party in 1872. In 1871 he was a member of the Maine constitutional convention. After serving in congress he retired from the practice of law, having been for many years an eminent member of the bar. He was married, in 1846, to Mary Hayden Green (b. 1825), who was a well-known novelist. Her first novel, "Ida May" (1854), dealt with the subject of slavery and southern life among the wealthy classes, and was published under the pen name of "Mary Langdon." Sixty thousand copies

of the book were sold in eighteen months. Her other books are: "Caste" (1856); "Bond and Free," and "Agnès" (1858). She also used the pen-name of "Sidney A. Story, Jr." Mr. Pike died at Calais, Me., Dec. 2, 1886. James Shepherd Pike, who was a journalist, and author of several books on political questions, was his brother.

PIKE, James Shepherd, journalist, was born at Calais, Washington co., Me., Sept. 8, 1811, brother of Frederick Augustus Pike, an eminent lawyer, of that place. He attended the district school in Calais until he was fifteen, when he was employed by a merchant; subsequently he became a journalist, and in 1856-60 he was the Washington correspondent and associate editor of the New York "Tribune." In 1861-66 he was U. S. minister to the Netherlands. He was several times a candidate for important offices in Maine, and was influential in strengthening the anti-slavery sentiment in that state. In 1872 he supported Horace Greeley for the presidency. Mr. Pike was an able writer, and was author of the following works: "The Restoration of the Currency" (1868); "The Financial Crisis" (1869); "Horace Greeley in 1872" (1873); "A Prostrate State" (1876); "The New Puritan" (1878); and "The First Blows of the Civil War" (1879). He died at Calais, Me., Nov. 24, 1882.

ROSE, William Gray, editor and legislator, was born in Mercer county, Pa., Sept. 23, 1829, son of James and Martha (McKinley) Rose. His father, of English descent, served in the war of 1812, and his maternal grandfather, David McKinley (great-grandfather of Pres. McKinley), was also a soldier in the revolutionary war. He was educated at Austburg Grand River Institute and at Beaver Academy, where he was made instructor in Latin and mathematics. In 1853 he studied law with Hon. William Stuart, of Mercer, and the same year, being interested in politics, bought out the "Independent Democrat," made it a Free soil paper, and turned the district into one strictly Republican, which it has since remained. He was elected to the state legislature in 1857, and in 1860 was appointed delegate to the Republican convention that nominated Abraham Lincoln for the presidency. He served in the civil war, and then engaged in the oil business, and later in the real estate business. Acquiring a competency in two years, he sought a home, first in St. Louis, then in Chicago, finally locating in Cleveland, of which he became mayor in 1879. He instituted many reforms and was a terror to city officials who conducted city business for personal profit. At the close of his term of office he went to Europe and closely inspected methods of economy in the government of cities there. One result upon his reelection, in 1891, was a material reduction in the cost of gas. He was a friend to the laboring classes, and took an active part in settling a street railroad strike. He liquidated the debt of a quarter of a million dollars on the viaduct, and more than a quarter of a million was spent on paving the streets, one-half by the property owners and one-half by the city. He was married, in 1858, to Martha E., daughter of Theodore Hudson and Harriet (Holcomb) Parmelee, of Talmadge, Summit co., O., and had four children, Evelyn, Hudson, Frederick and William Kent. Mr. Rose died in Cleveland, Sept. 15, 1899.

ROSE, Martha E. (Parmelee), author and philanthropist, was born at Norton, O., March 5, 1834, daughter of Theodore Hudson and Harriet (Holcombe) Parmelee. Her paternal grandfather, Capt. Theodore Parmelee, of Litchfield, Conn., was a revolutionary soldier, who received a grant of land for repeated enlistment and long continued patriotic service. In 1811 her father removed from New England to Ohio, with his uncle, David Hudson, who founded the Western Reserve College at Hudson, O., now Adelbert College, Cleveland, O. After his death his widow removed to Oberlin in 1817, where the daughter received her collegiate training, taking her diploma in 1855. After graduation she taught music in the seminary at Mercer, Pa., where she met William G. Rose, to whom she was married in 1858. She brought up her family of four children in Cleveland, O. She has taken great interest in the working women of that city, and has devised and put into operation many methods for the relief and improvement of their condition. Learning that the government annually gives out large quantities of clothing by contract to be made up for the Indian agencies, she induced the Society of Associated Charities to make application for a part of the work. By skillful management an allotment was secured for Cleveland, which, through committees, was distributed to sewing women. This movement led to the organization of the Women's Employment Society, which provides work for sewing women. She wrote up the trade schools of France, under the name of Charles C. Lee, for the daily papers, and aided in that way to establish the Manual Training School of Cleveland, a valued department of high schoolwork. Mrs. Rose was also the founder of Sorois, in Cleveland, in 1892, and became its first president. During the three years of her presidency the society grew from 16 to 269 members. She was a member of a delegation of thirty-one

Martha Parmelee Rose

to the General Federation of Women's Clubs in Philadelphia in 1894, and as a framer of the constitution of the Ohio Federation of Women's Clubs she was a delegate to its first meeting at Mansfield, O., and also its first regular meeting in Springfield, O. She is a chartered member of the Daughters of the American Revolution; treasurer of the National Health Protective League, and president of the Cleveland Health Protective Association. Mrs. Rose has traveled extensively in the old world, especially in Egypt and the British Isles, and many of her letters relating her experiences have appeared in the Cleveland newspapers. Mrs. Rose has the faculty for organization; she possesses tact, skill and foresight, and is one of the busiest and most philanthropic women of the middle West.

THOMPSON, John Reuben, poet and journalist, was born in Richmond, Va., Oct. 23, 1823. His education was begun in a school at East Haven, Conn., and he was graduated at the University of Virginia with high honors in 1844. He studied law there under the direction of Jos. A. Seldon, an eminent lawyer of Richmond, receiving the degree of LL.B. the following year. He practiced in Richmond for two years, and, although he had every prospect of success, did not find his work congenial, and gave it up to follow the bent of his genius—literature. Accordingly, in 1847, he accepted the editor-

ship of the "Southern Literary Messenger," a monthly magazine established in 1835, whose long and brilliant career has had no parallel in the South, and which was then unsurpassed in literary merit by any journal in the country. Poe had been its conductor years before, and had made it a vehicle for many of his extraordinary productions. Mr. Thompson brought a great deal of zeal and energy into the editorial chair, and its high character was fully maintained during the twelve years of his management. Much encouragement was offered to Southern writers, and among its contributors were Paul H. Hayne, Henry Timrod, Philip P. Cooke, John E. Cooke, and of the North, Donald Grant Mitchell (Ik Marvel), whose "Reveries of a Bachelor" and "Dream Life" first appeared there in 1849-50. In connection with his professional pursuits he frequently delivered poems and lectures at college commencements, before lyceums, and on other occasions. Among his poems thus read first in public are: "Patriotism" (1856); "Virginia" (1856); "The Greek Slave," delivered at the unveiling of the Washington statue in Richmond (1858), and "Poesy" (1859). In 1854 he went to Paris to live, where, on account of his attachment to the diplomatic family of Minister Mason, he had special opportunities for forming the acquaintance and friendship of men of culture. During this absence he contributed articles on his European observations to the "Messenger," which were afterwards put in book form; but the whole edition was lost by fire, one copy only being saved. Mr. Thompson remained in charge of the "Messenger" until 1859, when, on account of delicate health, he went to Augusta, Ga., and assumed the editorship of the "Southern Field and Fireside." Later he was connected with the Richmond "Record," a new weekly journal. In 1863 he went to London in poor health, but the voyage benefited him; he was engaged to write for the London "Index," and he contributed to "Blackwood's Magazine." Soon after the war he returned, still in poor health, and making New York city his home, was literary editor of the "Post" until his death. He was a diligent and careful worker, and an accomplished and graceful writer of both prose and verse. His fugitive pieces were never collected, but they are very popular in the South, especially in Virginia, his native state. In the winter of 1872 he went to Colorado in a vain effort to benefit his health. Returning to New York city the following spring, he died there, April 30, 1873.

TIERNAN, Luke, merchant, was born in county Meath, Ireland, in 1757, son of Paul Tiernan, and scion of an ancient family. About the year 1783 he emigrated to America, following the example of relatives, one of whom, C. Patrick Tiernan, was a colonel of engineers in the Continental army and supervised the construction of the fortifications before Yorktown. Luke settled at Hagerstown, Md., but about 1790 removed to Baltimore, and was the first person engaged in the shipping trade between that city and Liverpool. He imported extensively on commission from Great Britain and the continent of Europe in his own vessels. In 1797 he was one of a board commissioned to lay out the turpentine from Baltimore to Hagerstown and Williamsport; in 1802 Pres. Jefferson made him general commissioner of bankruptcy for Maryland; in 1812 he was one of a committee of citizens who pledged themselves to support the government during the war with Great Britain, and in 1813 and 1814 he was a member of the committee of supply and defense of Baltimore. He served on the committee appointed in February, 1826, to urge upon the legislature the incorporation of the Baltimore and Ohio railroad, and one of his vessels brought from England the first locomotive used on that road. As one of a

special committee, appointed at a mass-meeting of citizens, Dec. 29, 1832, he joined in protesting against the ordinance of nullification of South Carolina. Mr. Tiernan was a manager of the Hibernian Society of Baltimore in 1805, and its president in 1823-33; and one of the original board of trustees of the Cathedral of Baltimore. His intimate friend, Henry Clay, spoke of him as "the amiable and philanthropic friend of man." He was married, Jan. 6, 1793, to Ann, daughter of Robert and Rebecca (Van Sweringen) Owen. Her father was a captain of militia in Frederick county in 1776; through her mother she was descended from Garrett Van Sweringen, a Hollander, who was one of the founders of New Amstel, now Newcastle, and a member of the council and commissary general. Mrs. Tiernan was president of the Baltimore Orphan Asylum, the oldest institution of its kind in this country. She bore her husband a son, Charles, who became a quartermaster in the state militia, and four daughters. The second daughter, Rebecca, founder of the Roman Catholic Church of St. Agnes, near Catonsville, was married to Henry Vernon Somerville, honorably prominent in social and political life. To her Edward C. Pinkney addressed the well-known verses beginning:

"Fill this cup, to one made up
Of loveliness alone."

Luke Tiernan died in Baltimore, Md., Nov. 10, 1839.

WOOD, John Seymour, lawyer and author, was born in Utica, N. Y., Oct. 1, 1853, son of George Washington and Harriet Wells (Clark) Wood. The father (b. 1811; d. 1854) was a prominent merchant and iron manufacturer of Utica, and a direct descendant of William Wood (b. 1585; d. 1671), who emigrated from England to America in 1633, and was the author of "New England's Prospect" (1634), the first book on America's northeast colony ever published, reprinted by the Boston Prince Society in 1865. The ancestral line thence runs through David (d. about 1700), John (d. about 1760), and a second John, who served with credit through the revolutionary war as a lieutenant, and died at Leonminster, Mass., about 1811. His son, David (b. 1791; d. 1882) was the grandfather of the subject of this sketch. The maternal ancestry descends from Daniel Clark, of Windsor, Conn., who came from England in 1639; through Daniel (b. 1664), a citizen of Colchester, Conn.; John (b. 1710), a second John (b. about 1750), to Thomas Emmons Clark, a prominent lawyer of Utica, who was born at Colchester, Conn., in 1793, was graduated at Union College in 1811, and in 1814 was married to Jerusha Wells. He was state senator at Albany for four terms. He was the father of Harriet Wells Clark (b. 1816), who became the mother of John Seymour Wood. The son received his elementary education at the public schools of Clinton, N. Y., and Weyer's Academy, Westchester, Pa., and at the age of fourteen entered Phillips Academy, Andover, where he was graduated in 1870. He then took a course at Yale, where he was an editor of the "Yale Literary Magazine," and was a member of Skull and Bones, and was graduated in 1874. Pursuing the study of law at Columbia University, he was graduated there with the degree of LL.D. in 1876, and being admitted to the bar in 1876, engaged in the practice of his profession in New York city, forming a law partnership with Henry B. B. Stapler. In that city his legal talent and attainments gained him considerable prominence, and during 1891-94 he was called upon to act as assistant counsel to the Metropolitan Elevated Railway Co. He has also figured in many important cases. Mr. Wood is a member of the Lawyers' Club; Aldine Club; Bar Association; St. George's Cricket Club; is a member of St. George's Episcopal Church; the University Club; the New York Athletic Club; the Authors' Club;

the Yale Club, and the Rye Apawamis Golf Club (golf and cycling being his favorite pastimes). The following works were written by him: "College Days" (1889); "Gramercy Park" (1891); "A Daughter of Venice" (1892); "A Crign of Vantage" (1893); "Old Beau and Other Stories" (1893); "Yale Yarns" (1896); "The Patriots" (1901). He also edited the "Bachelor of Arts" from 1895 to 1898. Mr. Wood was married at Brattleboro, Vt., Sept. 15, 1880, to Mary Buel, daughter of Broughton D. and Sarah (Hollister) Harris.

LEIPER, Thomas, manufacturer, was born in Strathaven, Lanark, Scotland, Dec. 15, 1745. He was educated in Glasgow and Edinburgh, and in 1763 emigrated to Maryland. Two years later he removed to Philadelphia, and engaged in the storing and exportation of tobacco. At the beginning of the revolution the principal tobacco house was interdicted, and taking advantage of the situation, Mr. Leiper forwarded his business until he became the leading tobacco merchant in the city. Subsequently he built in Delaware county, Pa., several large mills for the manufacture of snuff, and in 1780 he bought and operated quarries not far from his mills. Eventually he amassed a large fortune, which he drew upon freely for the improvement of Philadelphia and that part of Delaware county in the vicinity of Avondale, his country residence. He

assisted in organizing the Philadelphia city troop of horse, and served with it as lieutenant during the revolution, taking part in the battles of Princeton, Trenton, Brandywine and Germantown. As treasurer of the troop he carried the last subsidies of the French to the Americans at Yorktown. With his corps he afterward aided in quelling several civil insurrections, notably the whiskey riot of 1794. In the attack on the house of James Wilson he was one of the seven troopers who charged on the mob and put it to flight. The first tramway in America, running from the quarries on Crown creek to the landing on Ridley's creek, was constructed by Mr. Leiper in 1809. The road was three-fourths of a mile in length and was continued until 1828, when it was superseded by a canal. In politics Mr. Leiper was a Democrat, and often served as chairman of the Democratic town meetings. He was a presidential elector; director of the Pennsylvania and United States banks; the U. S. commissioner for the defence of Philadelphia in 1812, and a member of the common council of the city, finally becoming its president. In 1824 he was one of the first officers of the Franklin Institute. Mr. Leiper died in Delaware county, Pa., July 6, 1825. His son, George Gray Leiper, born in Delaware county, Feb. 3, 1786, was graduated at the University of Pennsylvania in 1803. He became prominent in his native county, representing it in congress in 1829-31, also being for many years lay associate judge of the Delaware county circuit court. He died Nov. 17, 1868.

WELLINGTON, Arthur Mellen, civil engineer and editor, was born in Waltham, Mass., Dec. 20, 1847, son of Dr. Oliver Hastings and Charlotte (Kent) Wellington. He was descended from Roger Wellington, who came to this country shortly after the arrival of the Mayflower. His great-grandfather, Benjamin Wellington, was a minute-man at the battle of Lexington, in which town the family resided. He was graduated at the Boston Latin School, but failing sight prevented a collegiate education, and he began the field practice of civil engi-

Thomas Leiper

neering as a student with Prof. John G. Henck, of Boston. From 1865 he was actively engaged in professional work, railway engineering being his chosen specialty, and the location of railway lines his particular field for some years. From 1878 to 1881 he was principal assistant to Mr. Charles Latimer, chief engineer of the New York, Pennsylvania and Ohio railway. In 1878 he carried out an extended series of experiments on the resistance of rolling stock, which had much influence in establishing formulas for train resistance at known velocities. His results, which were obtained by dropping cars down a known grade, were detailed in a paper read before the American Society of Civil Engineers, Jan. 15, 1879. He was also largely instrumental in determining a standard of rail sections, conducting many experimental and other investigations to that end. From 1881 to 1884 he was engaged in Mexico as assistant general manager of the Mexican Central railway, chief engineer of a new line from Vera Cruz to the City of Mexico, and principal assistant engineer in the location of the Mexican National railway. Returning to New York in 1884, he served as one of the editors of the "Railway Gazette," until 1887, when he became one of the editors and part owner of the "Engineering News," which he conducted with energy, activity and enterprise, accompanied with great success, until 1895. Among the more important works on which he gave advice were the elimination of grade crossings at Buffalo, the improvement of railway terminals at Toronto, and the foundations of the Toronto Board of Trade building. In 1888 he made an extended examination of the Canadian Pacific railway system. In 1890 he was a member of the board which examined and approved the estimates of the Nicaragua Canal Co., and in 1893 was called before the Massachusetts legislature with reference to the proposed invasion of

A. M. Wellington

Boston Common by the West End street railway, when, at his suggestion, the Tremont street subway route was selected. He invented an entirely new type of thermodynamic engine, designed to convert heat into mechanical work with a much smaller percentage of loss than the best existing steam engines, but died before a complete machine was constructed. He is the author of "The Computation of Earthwork from Diagrams," two volumes (1874); "The Economic Theory of Railway Location" (1877), of which a new and practically rewritten edition was published in 1887, and was the editor of the revised edition of the "Car Builders' Dictionary." Mr. Wellington was a member of the American Society of Civil Engineers; the Institution of Civil Engineers; the American Society of Mechanical Engineers; the Canadian Society of Civil Engineers, and the Sons of the Revolution. He was married, in 1878, to Agnes, daughter of Alfred Gould Bates, and had one child, Elizabeth Elliott Wellington. He died in New York, May 16, 1895.

MOREY, Samuel, inventor, was born at Lebanon, Conn., Oct. 23, 1762, son of Israel Morey. The family removed to Orford, N. H., in 1766, and there the son was brought up. He was endowed with remarkable ingenuity, combined with mechanical and scientific talent. When an attempt was being made

to Olcott's falls, at Lebanon, N. H., he devised and built the locks at Bellows falls. He engaged extensively in lumbering, and on the West mountains may still be seen the remains of the chutes he used to convey logs from inaccessible heights down to Fairlee pond. These he constructed years before Napoleon utilized the same device in procuring lumber from the Alps. He began experimenting with steam, heat, and light, in 1780, and frequently visited Prof. Silliman, of Yale University, conferring with him on the value of the discoveries he had made. In 1790 he made improvements in steam-engines with a view to adapting them to the propulsion of boats, and in 1793 he succeeded in building a steamboat propelled by a paddle-wheel in the prow and capable of carrying two persons at the rate of four miles an hour. It was navigated successfully on the Connecticut river, and taking it to New York city he spent three successive summers in demonstrating its practicability. Having made improvements in his boat, and placed the wheel at the stern, he succeeded in attaining a speed of five miles an hour. Chancellor Robert R. Livingston, who had taken a great interest in the experiments, offered him \$7,000 for the exclusive privilege of operating on the Hudson river to Amboy under his patents. This offer being declined, he made an additional offer (believed to be \$100,000) if a speed of eight miles was attained. Encouraged by this promise, Morey experimented with vigor during the following summer. A patent on a steam-engine which applied its power by a crank motion, and was adapted to the propulsion of boats of any size, was granted to Samuel Morey on March 25, 1795, and this document is still preserved at Concord by the New Hampshire Historical Society. In June, 1797, he built a boat with side paddle-wheels, at Bordentown, N. J., on the Delaware river; and this vessel, which proved more effective than any previously tried, was openly exhibited at Philadelphia. Between 1790 and 1820 some seven or eight patents were granted to him, among them being documents dated March 27, 1799, and Nov. 17, 1800, for the application of steam, and two others dated 1803 and July 14, 1815, for a steam engine. The last named was described by the inventor in the "Journal of Science," to which he was a contributor. Capt. Morey finally believing that every obstacle had been overcome, and the way opened for the construction of steamboats on a large scale, perfected plans for the establishment of a passenger-carrying system of vessels; but a series of misfortunes, both to the inventor and to the capitalists interested, prevented the prosecution of his design. It is believed that Samuel Morey was the original inventor of the steamboat, as Robert Fulton, who is generally accredited with that honor, visited him at Orford, to witness the demonstrations before launching his first boat on the Hudson river. Morey spent the last seven years of his life on his large estate at Fairlee, Vt., where he died, April 17, 1843.

KENNEDY, Joseph Camp Griffith, lawyer and statistician, was born at Meadville, Crawford Co., Pa., April 1, 1813. His grandfather, Samuel, served on the staff of Gen. Washington as a surgeon. Joseph was educated at Allegheny College, Pennsylvania; read law, and at an early age became the owner of two newspapers; editing the Crawford "Messenger" and the Venango "Intelligencer." In 1849 he was appointed secretary of the U. S. census board; he drafted the bill for the establishment of the census bureau, which was passed by congress. He was appointed the first superintendent of the bureau, conducting the collection of statistics of the seventh census. In 1851 he was commissioned to visit Europe in the interest of statistics and cheap postage, and in 1853 was a member of the international

statistical congress held at Brussels and Paris. In 1856 he was secretary of the U. S. commission to the World's fair in London, England. He was again at the head of the census bureau in 1860; was a commissioner to the international exhibition of 1861, and was corresponding secretary of the National Institute, also of the U. S. Agricultural Society, and editor of the journal of the latter. Mr. Kennedy was a member of the statistical board of Belgium; of the Geographical Society of Prussia; of the statistical societies of France, England and Ireland, and of other European and American associations. In 1866 he was presented by the King of Denmark with a gold medal for his services in statistics, and in 1867 received the degree of LL.D. from Allegheny College. That institution was endowed by him with four perpetual scholarships for the benefit of disabled young soldiers or the orphans of soldiers. He died in Washington, D.C., July 13, 1887.

JACKSON, Samuel, physician, was born in Philadelphia, Pa., March 22, 1787, son of David Jackson, a physician in that city, who served in the revolutionary war as paymaster in 1776-79; as quartermaster in 1779-80, and as hospital surgeon in 1780-81; he was a delegate to congress in 1785. The son was educated at the University of Pennsylvania, where he was graduated in the medical school in 1808. For several years he conducted his father's drug store, and during the same period was a member of the 1st troop of city cavalry. He served as a private in Delaware and Maryland through the campaign of 1814; established himself in the practice of medicine in Philadelphia in 1815, and in 1820 became president of the board of health, making, while holding this position, a special study of yellow fever. In 1821 he was one of the founders of the Philadelphia School of Pharmacy, and became its professor of materia medica, remaining as such until 1826. In 1827 he was chosen assistant to Prof. Nathaniel Chapman, in the University of Pennsylvania, and adjunct in 1828, lecturing at the medical institute. In 1832 an epidemic of Asiatic cholera was apprehended, and Dr. Jackson was placed at the head of a commission of physicians that visited Canada, where the disease first appeared; his reports were published in pamphlet form. During the prevalence of cholera in Philadelphia he had charge of the city hospitals where the patients stricken with that malady were cared for. In 1835 he was appointed professor of the institutes of medicine in the University of Pennsylvania, and held this position for twenty-eight years, afterward being emeritus professor until his death. Prof. Jackson, as he was called to distinguish him from another physician of the same name, made some reputation as a lecturer, and read before the Academy of Sciences in Paris, in 1818, a paper upon "Medical Auscultation." He was the author of "Principles of Medicine" (1832); "Discourse Commemorative of Prof. Chapman" (1854), and "Medical Essays." Late in life he was married to a Scotch woman of fine intellect, whose surname was Christie. He died in Philadelphia, Pa., April 4, 1872.

HAWKINS, Benjamin Waterhouse, author, sculptor, and naturalist, was born in London, England, Feb. 8, 1807. He received his education at the college of St. Aloysius, then studied art under William Behnes, the sculptor, and applied himself to the study of natural history and geology. He was employed during 1842-47 in making models of living animals at Knowlesy Park, the seat of the Earl of Derby. Hawkins also, in 1852, began the construction of colossal figures of extinct animals to adorn the Crystal Palace gardens. In 1868 he came to the United States, where he lectured on science, and was employed to make models of extinct animals for Central Park Museum,

New York. He was a member of the Royal Geographical Society (1854); and of the Linnean Society (1843). He was the author of "Popular Comparative Anatomy" (1840); "Elements of Form" (1842); "The Science of Drawing Simplified" (1843); "A Comparative View of the Human and Animal Frame" (1860); "Atlas of Comparative Osteology," with Prof. Huxley (1860); "The Artistic Anatomy of the Horse" (1865; 5th ed., 1874); "The Artistic Anatomy of Cattle and Sheep" (1867; 3d ed., 1875); "The Artistic Anatomy of the Dog and Deer" (1876); "Comparative Anatomy, as Applied to Purposes of Artists" (1883). He died in 1889.

JOHNSTON, Henry Phelps, educator, was born in Turkey, April 19, 1842, son of Rev. Thomas P. and Marianne C. (Howe) Johnston, natives of the United States, engaged in missionary work in Turkey. He was graduated at Yale, in 1862, and received the honorary degree of A.M. in 1884. After graduation he enlisted in the Federal army, and served until the close of the civil war. In 1879 he was appointed instructor of history in the College of the City of New York, and four years later became professor of American history, a position he still (1901) holds. He has written and delivered numerous historical addresses, and has contributed papers to "Harper's Magazine," and to the "Magazine of American History," of which he was associate editor in 1882, as well as to several other periodicals. The value of his writings rests on the fact that they are based on original sources; they represent years of painstaking investigation and research, and contain a fund of historical material not to be found elsewhere. Every detail of the subject is exhaustively treated, and for accuracy his works are regarded as court of last resort. They are: "The Campaign of 1776 around New York and Brooklyn" (1875), which is the third volume of the Long Island Historical Society's series; "Observations on Judge Jones's Loyalist History of the American Revolution" (1880); "The Yorktown Campaign" (1881); "Yale in the Revolution" (1888); "Correspondence of John Jay" (1890); "Record of Connecticut Soldiers in the Revolution, with Rosters" (1889), published by authority of the state of Connecticut; "The Battle of Harlem Heights, 1776" (1898); "The Storming of Stony Point" (1900); "Life and Memorials of Nathan Hale," privately printed (1901). Prof. Johnston is a member of the New York and Connecticut Historical Societies; the American Antiquarian Society, and the Sons of the Revolution. He was married, in 1871, to Elizabeth Kirtland Holmes.

DIAZ, Abby Morton, author and industrial reformer, was born at Plymouth, Mass., Nov. 22, 1821, daughter of Ichabod and Patty (Weston) Morton. Her first American ancestor, George Morton, was one of the Pilgrims who went from England to Holland to arrange for the departure of the Mayflower. He came to this country on the Ann, in 1623, and settled at Plymouth, Mass., where he afterward wrote the little book, "Mourt's Relation," published in London (1669). This was the first printed account of the colony, and of the four copies known to be in existence one is kept under glass in the Boston state house. From George Morton and his wife, Juliana Carpenter, she is descended through Ephraim.

Ephraim, Ephraim, Ichabod, Ichabod and Ichabod, the last of this name being her father, who was a prominent anti-slavery worker. The child was reared in the atmosphere of devotion to this cause, and her earliest recollections are of anti-slavery meetings, Horace Mann and Garrison being among the men to whom she listened. She was educated in the public schools, and found time to put her thoughts on paper while assisting with household duties. When she was about twenty she was a member of the Brook Farm community for awhile, her father joining the movement and building a house there, but he returned to Plymouth when convinced that the experiment was not successful. She was married later to Manuel A. Diaz, and after a brief married life was left with two little sons to care for. To do this she became a teacher in the Plymouth schools; taught a singing school; was a house-keeper for one summer, and during the civil war gave out "army work" for a large clothing house in Boston. In 1861, under an assumed name, she sent her first story to the "Atlantic Monthly," and was delighted to receive a check for forty dollars from the editor. Thus encouraged, she devoted herself to writing, and eventually became a contributor to "Our Young Folks"; "The Atlantic"; "Hearth and Home"; "Cottage Hearth"; "St. Nicholas";

Abby Morton Diaz

"Aren"; "New England," and other magazines. Invited by Edward Eggleston to contribute to "Hearth and Home," of which he was then editor, she wrote a series of articles called "The Schoolmaster's Trunk," afterward included in the "Bybury Book" and "Domestic Problems." All her writings are characterized by a strong sense of humor. At the woman's congress, held in Philadelphia in 1876, she read a paper entitled: "The Development of Character in Schools," later published in the "Aren." Since about 1874 she has been a member of the New England Women's

Club, which is called the "grandmother" of women's clubs, and she helped to organize the Woman's Educational and Industrial Union of Boston, of which she was president for many years. One mission of this society has been to give legal protection from dishonest employers to women wage-earners. She is one of the vice-presidents of the Massachusetts Women's Suffrage Association; president of the Belmont Suffrage League, and a member of the Belmont Educational League. Mrs. Diaz is a lecturer on ethical and progressive subjects, including Christian socialism, morality, competition, the ethics of nationalism, etc. She is the author of: "The Bybury Book"; "The King's Lily and Rosebud" (1868); "The William Henry Letters" (1870); "William Henry and His Friends" (1871); "Lucy Maria" (1873); "Story Tree Series" (six vols.); "Domestic Problems" (1875); "Story Book for Children" (1875); "Neighborhood Talks" (1876); "Christmas Morning" (1880); "Jimmy Johns" (1881); "The Cat's Arabian Nights" (1881); "Polly Cologne" (1881); "Bybury to Beacon Street" (1887); "The John Spicer Lectures" (1887); "Only a Flock of Women"; "In the Strength of the Lord" (1889); "Mother Goose's Christmas Tree," a drama (1891); "The Religious Training of Children" (1896), and several pamphlets on "The Divine Science of Healing," and a pamphlet containing a series of papers on arbitration, first

published in the "Independent." She lives at Belmont, Mass., and is at present actively engaged in "settlement work" at Cambridge.

HERRICK, Edward Claudius, scientist, was born in New Haven, Conn., Feb. 24, 1811, son of Rev. Claudius and Hannah (Pierpont) Herrick. The father was a noted teacher in New Haven, and the son received a good classical education, though he did not attend college. His first employment was as a clerk in the well-known book shop of Gen. Hezekiah Howe, an employment congenial to the studious, bookish lad. For a time he was in business for himself as a bookseller. In 1843 he was appointed librarian of Yale College, and this position he held until 1858. He was also treasurer of Yale from 1852 until his decease. His labors in behalf of the college were various, and he ever had his interests at heart and furthered them earnestly, so far as it lay within his ability. In 1842 Prof. James Kingsley prepared the initial annual obituary of the graduates of Yale College. In 1844-45 Mr. Herrick became associated with Prof. Kingsley in this work, and after 1851-52 he had sole charge of the necrology, his own obituary record being incorporated in that on which he was employed at the time of his death. After the death of Prof. Kingsley he edited the triennial catalogue; he collected much biographical matter concerning the early graduates and was assiduous and persevering in his researches for data appertaining to the college history. He was throughout life eminently a student, and acquired a vast amount of erudition on those subjects which he made his specialty. Entomology was one of these subjects, and he had a comprehensive knowledge of its literature, and made some original investigations of undoubted value, though he published little. He early became an enthusiastic student of astronomy and meteorology, and in the latter science made important observations concerning the periodicity of meteoric showers. He himself discovered the return of the August shower, and for several years kept an accurate record of the recurrence of the aurora borealis; his communications on these and other subjects are to be found in the "American Journal of Science," to which he was a frequent contributor. Mr. Herrick's knowledge of bibliography, local history, American biography and kindred subjects was varied and extensive; he was regarded as an authority, and his knowledge was ever at the command of those who sought it. He was an honorary graduate of Yale. He was never married, and died in New Haven, Conn., June 11, 1862. A memorial window in Battell Chapel, Yale University, bears his name.

GURNEY, Ephraim Whitman, educator, was born in Boston, Mass., Feb. 18, 1829, son of Nathan and Sarah (Whitman) Gurney. He at first decided upon a mercantile career, but by the time he was nineteen years of age, the reading of his leisure hours changed his purpose, and he began to prepare for a college course. After sixteen months' private instruction, he entered Harvard College in 1848, and was there graduated four years later. An illness shortly after graduation prevented his actively engaging in any work for a time, but when he had recovered he taught in a private school until 1859 when he was appointed tutor of Latin in Harvard. In 1863 he became assistant professor of Latin, four years later was made assistant professor of intellectual philosophy; in 1868 was assistant in history, and in 1869 was elected university professor of history. In the latter position he made so marked an impression as a friend and adviser of the students, that when the office of dean was created, in 1870, he was requested to become the first incumbent; and for six years contrived the methods of the department, established its precedents and set its standards, rendering the

college a service of lasting worth. In 1876 he resigned the office of dean, but he continued to hold the university professorship of history until May, 1886, when, upon the resignation of Prof. Torrey, he became McLean professor of history. He contributed to the "Nation," and from 1868 until 1872 he was editor of the "North American Review," his literary style being charming and polished, yet correct, lucid and strong. At college he neither wrote his lectures nor arranged systematic notes, but simply spoke to the students from the fullness of his knowledge, seeming to live in his discourse, so complete was his mastery of his subject and its related matter. He was a fellow of the corporation of Harvard College from 1884, and of the American Academy of Arts and Sciences from 1890. He died at Beverly, Mass., Sept. 12, 1896.

JORDAN, Ambrose Latting, lawyer, was born at Hillsdale, Columbia co., N. Y., May 5, 1789, of Scotch-Irish parentage. Having aspirations for a professional career, he, when not working on his father's farm, devoted much time to study, and after completing an academic course, continued his studies, supporting himself by teaching school. At the age of eighteen he entered a law office in Albany, N. Y., and in 1812 was admitted to the bar, beginning practice at Cooperstown, N. Y. In 1820 he established his office at Hudson; in the following year was made recorder of that city, and in 1823 was a candidate for the office of circuit judge of the district. He frequently appeared at the bars of other counties and generally in important cases. In the spring of 1838 he removed to New York city, and continued the practice of law there for more than twenty years. He never sought political honors, though these were often thrust upon him. Early in life he represented Columbia county in the assembly and afterwards in the state senate. At that time the senate was the court of last resort, and the opinions of Mr. Jordan, as a judge of that court, attest his fitness for judicial functions. He was also attorney-general, and was a member of the convention of 1846, which formed the state constitution. "His style of oratory was of the highest order, his manner dignified and commanding, and his diction vigorous and elegant." He was married, in 1813, to Caroline Cornelia Phillips, of Claverack, and had four daughters and two sons. His death occurred in New York city, July 16, 1865.

CAHAN, Abraham, author, was born in Podbereze, government of Vilna, Russia, July 12, 1860, of Hebrew descent, his father, Shakhna Cahan, being a teacher of Hebrew and the Talmud. His education was begun under the direction of his father, and he afterward attended a Talmudical academy at Vilna and the Teachers' Institute in the same city. After his graduation in 1881 he was appointed teacher in the government schools at Velish, government of Vitebsk. His membership in a revolutionary circle attracted the suspicion of the Czar's spies, his house being twice searched for incriminating evidence; but in May, 1882, on the eve of sure arrest, he escaped and made his way across the frontier. He landed in New York, June 6, 1882, and almost immediately obtained work in a cigar factory. During his hours of leisure he studied English, also contributing sketches and articles to Russian papers, and teaching English among the Russian Hebrews. Especially conspicuous for his sympathy for the working classes, and holding pronounced socialist views, he was prominently instrumental in organizing the Jewish workmen of America, and was the first in this country to deliver a labor speech in their dialect, Aug. 3, 1882. He was a delegate from the American Jewish workmen to the international socialist congress at Brussels in 1890, and again at Zurich, in 1893. After his arrival in this country he devoted himself to the study of English and American letters with the same

interest formerly aroused by the great masters of fiction. He has a marked preference for realism, and, as his writings show, has largely modeled his style after that of George Meredith, Hardy, Howells and Henry James. In 1888 he contributed his first English productions, sketches of "east side" life to the New York papers, and has since worked almost exclusively on the same line. In 1896 appeared his novel, "Yekl," a story of Jewish life in New York, which has received favorable comment and excited wide interest. W. D. Howells says of his style: "In its simplicity and purity, as the English of a man born to write Russian, it is simply marvelous." He has since written "The Imported Bridegroom and Other Stories" (1898); "The Chasam" (1901), and a number of sketches for the leading magazines. Mr. Cahan was chief editor of the weekly "Arbeiter Zeitung" and the "Zukunft," monthly magazine, and since 1898 has been connected with the New York "Commercial Advertiser." He was married in New York, in 1885, to Anna, daughter of Isaac Bronstein, a merchant of Kieff, Russia.

McMILLAN, Duncan James, clergyman, was born near Pulaski, Giles co., Tenn., June 2, 1816, son of Edward and Mary Ann (Brown) McMillan. His father was a Presbyterian minister and president of the Young Ladies' College in Gallatin, Tenn., afterwards chaplain of the 32d Illinois regiment in the civil war, and died in the service. The son enlisted and fought in Logan's corps of Sherman's army until the end of the war. To gain the means of education he worked as salesman, farm hand and teacher, and entered Blackburn University, where he was graduated in 1870. For two years he was superintendent of the city schools of Carlinville, and pastor of Walnut Grove Presbyterian Church, Carrollton, Ill., for two years and a half. He went to Utah in 1875

and established thirty-nine mission schools, including four academies, out of which twenty-seven churches have been organized. In 1883 he became president of the College of Montana. During this time he erected and equipped buildings, laboratories, and a library; brought together a faculty of thirteen professors, and arranged four graduate and three select courses of study. He received the degree of A.M. from his alma mater, Washington and Jefferson College conferring the degree of D. D. upon him in 1883. In 1890 he was elected secretary of the Presbyterian board of home missions in New York city, and in 1899 he accepted a call to the pastorate of the New York Presbyterian Church, Seventh avenue and One Hundred and Twenty-eighth street, succeeding Dr. Charles S. Robinson. For six years Dr. McMillan edited the home mission department of "The Church at Home and Abroad." He has been made an honorary member of the Victoria Society of Great Britain. He was married, in 1879, to Emily Kent, daughter of Rev. Adam and Mary Ann (Kent) Johnston. They have two children.

ROYCE, Josiah, author and educator, was born at Grass Valley, Nevada co., Cal., Nov. 20, 1855. He is of English descent, though his parents both were citizens of the United States from a very early age; his father being a man of business in California, and his mother a teacher there. He was educated in the public schools of San Francisco, and entering the University of California, was graduated in the

class of 1875. He then spent a year in study in Germany at Leipsig and Göttingen, and two years more at Johns Hopkins University, where he received the degree of Ph.D. in 1878. In that year he became instructor in English in the University of California, and remained there until 1882, when he went to Harvard College as instructor in philosophy. He was appointed assistant professor in 1885, and in 1892 was elected to the professorship of the history of philosophy, a position he still occupies. He has lectured occasionally in addition to his regular professorial duties, and has contributed extensively to various periodicals. He is the author of "A Primer of Logical Analysis" (1881); "The Religious Aspect of Philosophy" (1885); "California from the Conquest to the Vigilance Committee of 1856: A Study of American Character" (1886), in the "American Commonwealth" series; "The Feud of Oakfield Creek: A Novel of California Life" (1887); "The Spirit of Modern Philosophy" (1892); "The Conception of God" (1897); "Studies of Good and Evil" (1898), and introduction to Plato in "The World's Great Books" (1898). His "Studies of Good and Evil," in the words of a reviewer in the Chicago "Dial," is "a series of essays more or less related to each other, and all bearing upon the general aspect of his subject. As might have been expected from the author's previous works, his point of view is that of the ethical idealist. This does not mean that Prof. Royce is an idle dreamer, vaguely explaining away the essential differences between right and wrong. On the contrary, he looks facts squarely in the face, and holds closely to the realities of everyday human life. He is an ethical idealist in that he interprets the universe as a realm whose significance lies in the ethical ideals which its processes realize. . . . As to the problem pertaining to the existence of evil, Prof. Royce regards evil as a real fact, and holds that its existence is not only consistent with the perfection of the world, but is nec-

essary for the very existence of that perfection. As the hero could never be a hero without controlling fear and pain; as the saint could never be saint without overcoming temptations to sin, so a knowledge of good is possible only as one knows evil and subordinates it to the good. 'If moral evil were simply destroyed and wiped away from the external world, the knowledge of moral goodness would also be destroyed' is the language of Prof. Royce." He is a member of the board of editors of the "International Journal of Ethics."

DYER, Eliphalet, jurist, was born at Windham, Conn., Sept. 28, 1731. He was educated at Yale College, where he was graduated in 1740 with the degree of B.A., receiving also the degree of A.M. in course at that institution, and from Harvard as an honorary reward in 1744. Studying law, he was admitted to the bar in 1746, and began practice in his native town, where he also served as justice of the peace and as town clerk. Many times he was elected to the state legislature, between 1747 and 1762, and while a member of that body was especially prominent in the enterprise of establishing a Connecticut colony in the valley of the Susquehanna, at Wyoming, serving in 1753 on the committee to purchase the land, and in 1755 as the agent to petition the general assembly in behalf of the colony.

However, the French and Indian wars caused a suspension of the plan, and in August, 1755, Mr. Dyer was appointed lieutenant-colonel of a regiment sent to reduce Crown Point. Three years later he was colonel of a regiment which was sent against Canada. In 1763 he went to England to obtain from the crown a confirmation of the Wyoming land title, but failed, and on his return became comptroller of the port of New London. Col. Dyer held the position of governor's assistant by annual election from 1762 until 1784; showed zealous opposition to the Stamp Act; was one of the first commissioners to the Stamp Act congress from Connecticut, and later withdrew from the governor's house, accompanied by a majority of his fellow assistants, thus emphasizing his refusal to take the oath of agreement to the Stamp Act provisions. In 1766 he was elected a judge of the superior court, serving until 1793, during the last four years of which period he was chief-justice. John Adams said: "Dyer is long-winded and roundabout, obscure and cloudy, very talkative and very tedious, yet an honest, worthy man; means and judges well." He was a member of the first Continental congress, and by re-election served from 1774 to 1779, and from 1780 to 1783. Upon the formation of the Connecticut committee of safety in May, 1775, he was made a member, and in December, 1776, he was tendered an appointment as brigadier-general of militia, but declined. He was the author of a pamphlet entitled, "Remarks on Dr. Gale's Letter" (1769). He was a fellow of the corporation of Yale, and in 1787 the honorary degree of LL.D. was conferred upon him by that institution. He died at Windham, Conn., May 13, 1807.

JONES, Noble Wimberly, patriot, was born near London, England, in 1724, son of Dr. Noble Jones, who was an early settler of Georgia, a treasurer of the province, and a councillor of state. The son was associated with his father in the practice of medicine at Savannah, from 1748 to 1756. He held a military commission at an early age; was a member of the assembly in 1761, and subsequently, being several times speaker. He was a leading patriot in 1774, and corresponded with Franklin, the agent of Georgia, then in England. He was speaker of the first Georgia legislature, and was a delegate to the Continental congress from 1775 to 1776, also from 1781 to 1783. He lost a son at the capture of Savannah in 1778, and was himself made prisoner at the fall of Charleston, in 1780, being carried to St. Augustine. Dr. Jones was exchanged July, 1781, and practiced medicine in Philadelphia until December, 1782, when he returned to Georgia, and was again a member of the assembly. He practiced in Charleston from December, 1783, to December, 1788, after which he lived in Savannah. He was president of the convention which revised the state constitution, in 1795. He died in Savannah, Jan. 9, 1805.

EATON, William Wallace, U. S. senator, was born at Tolland, Tolland co., Conn., Oct. 11, 1816, son of Hon. Luther and (Caswell) Eaton. He received a public school education in his native town, supplemented by private instruction. On arriving at his majority he engaged in mercantile pursuits at Columbia, S. C., but after four years returned to Tolland, commenced the study of law, and was admitted to the bar in 1850. Between 1847 and 1874 he was elected nine times to the legislature of his native state, serving in 1853 and 1873 as speaker of the house, and in 1850 as a member of the senate. He was clerk of the superior and supreme courts of Tolland and Hartford counties; for several years was one of the judges of Hartford city, and for four years was a recorder of that place. In 1874 he was appointed a senator in congress to fill the unexpired term of William A. Buck-

ingham; and in the fall was elected to that office, serving until 1881. For many years he was chairman of the committee on foreign relations. He was opposed to the appointment of the electoral commission that ratified the election of Pres. Hayes in 1876, and was the only Democrat in the senate who voted against the measure. Strongly advocating tariff reform, he was the author of an important measure providing for the appointment of a non-partisan tariff commission. He also introduced a bill giving the citizens of this country authority to purchase vessels abroad for use in foreign service; but his measure being strongly opposed by the domestic shipbuilders, represented by such prominent members as James G. Blaine and others, was defeated. In 1882 he was elected a member of the national house of representatives by a large majority. At the close of his term of service in 1885 Mr. Eaton retired from active political life, though his counsels were often sought in the weightier matters of public policy. He was a hard money Democrat, holding positive views with regard to the greenback controversy, and during the civil war his advocacy of peace was pronounced. Sen. Eaton was married at Somers, Conn., in 1841, to Eliza M., daughter of Capt. William and Betsy Wood, and had one son, William L. Eaton, a lawyer, of Hartford, Conn.

ADLER, Dankmar, architect, was born at Stadt-Lengsfeld, Saxe-Weimar, Eisenach, July 3, 1844, son of Rabbi Lieberman and Sara (Elie) Adler, who emigrated to America in 1851. He was educated at the public schools of Detroit, Mich.; studied architecture at the University of Michigan, and in Chicago (1867-62). He then enlisted in the civil war, and served in battery M, 1st Illinois artillery for three years. In 1869 he settled in Chicago, Ill., where he designed many important public buildings, such as McVicker's Theatre, the Central Music Hall, the Auditorium, Stock Exchange and Schiller buildings, the synagogues of the Sinai, Zion, Anshe Ma'arabih, and Isaiah congregations, Grace Methodist Episcopal, First Methodist Episcopal, and Unity churches. Among those designed and planned by him in other cities are: the Opera House in Pueblo, Col.; the Wainwright, Union Trust and St. Nicholas Hotel buildings, in St. Louis; the Union Station, in New Orleans; the Guarantee building, in Buffalo, N. Y., and he was associate architect of the Carnegie Music Hall, in New York city. Mr. Adler was president of the Western Association of Architects; secretary of the American Institute of Architects; president of the Illinois State Board of Examiners of Architects, and trustee of the United Hebrew Charities in Chicago, filling (1873-77) also the office of secretary of this organization. He was married, June 25, 1872, to Dila, daughter of Abraham Kohn, Chicago. He died in Chicago, April 15, 1900.

PETTIT, Charles, congressman, patriot, was born near Amwell, Hunterdon co., N. J., in 1763. His ancestors were Huguenots, and emigrated to this country in the seventeenth century, settling in central New York. Charles received a good classical education, and became a successful lawyer. In 1767 he was commissioned surrogate under Joseph Reed, whom he succeeded as deputy secretary of the province in 1769. He was admitted to the bar in 1770, became a councillor in 1773, and secretary of New Jersey under Gov. Franklin in 1772-74, and continued in that office under Gov. Livingston, until called by Gen. Greene to the post of assistant quartermaster-general of the Continental army. At the resignation of Gen. Greene he was offered the position of quartermaster-general, which he declined. After the close of the war he became a merchant in Philadelphia, and a member of the legislature in 1783-84, and during his service in this office he was the author of the funding system. He was a dele-

gate to the Continental congress from 1785 to 1787, and an advocate for the adoption of the Federal constitution in the general convention at Harrisburg. He was a trustee of the University of Pennsylvania in 1791-1802; an active member of the American Philosophical Society, and in 1796-1802 was president of the Insurance Co. of North America. He died in Philadelphia, Sept. 4, 1806.

CLEGG, John, lawyer, was born at Olin, Tredell co., N. C., Sept. 11, 1852, son of Baxter and Temperance Louisa (Collins) Clegg. His father was a noted Methodist minister and teacher, was for many years principal of the Olin high school, which he raised to a high grade of efficiency, and in 1859 became president of Homer College, Homer, La.; his mother was a daughter of Michael Collins, of Warren, N. C., and a descendant of the Fitz, Drake, and other noted families of the state. The original American ancestor emigrated from the Isle of Man previous to the revolution, and settled in Maryland, on Chesapeake bay, his son, William Clegg, was a well-known planter and mill-owner, of Chatham, N. C., and by his wife, Bridget Polk, became the father of Rev. Baxter Clegg. John Clegg was educated at Homer, and at Franklin, St. Mary's Parish, La. In 1870 he entered the employ of the Texas and Pacific Railway Co., and in 1872 became deputy clerk of the district court of Franklin, La., in the following year becoming manager of a contract for the construction of the Louisiana Western railroad. He then began the study of law at Lafayette, La., later entering the law school of the Louisiana University, where he was graduated in 1874 as valedictorian of his class. In the same year he began practice at Lafayette, where, in 1881, he was appointed to fill the unexpired term of Judge E. E. Mouton on the bench of the district court. From January, 1877, to March, 1881, he was secretary of the senate. He was defeated for election to the judgeship of the district in 1884, but was chosen by the general assembly judge of the court of appeals for a term of eight years. At the close of this period, in 1892, he removed to New Orleans,

where he has since practiced his profession, having organized his present firm, Clegg & Quintero, in 1894. Judge Clegg is one of the most widely acquainted men in Louisiana, enjoying universal respect for his high character and ability and wielding a great influence in public affairs. On the bench of the district court he distinguished himself by his summary treatment of anti-negro mobs, imprisoning the leaders and using his judicial authority to compel action by his unwilling sheriff. Judge Clegg is a member of the Pickwick, Boston, Chess, Southern Yacht, Southern Athletic, and Round Table clubs of New Orleans. He was married, Jan. 1, 1882, to Mary, daughter of Albert G. Cagoe, of Terrebonne, La., whose family is among the best known of the state.

ADAMS, John Quincy, lawyer, was born in Boston, Mass., Sept. 22, 1833, son of Charles Francis and Abigail Brown (Brooks) Adams, and grandson of John Quincy Adams. He was graduated at Harvard in 1853, and admitted to the Boston bar in 1855. During the civil war he was on Gov. Andrew's staff. After serving several terms in the Massachusetts legislature he was nominated as governor of the State in 1867, and again in 1871, but was on each occasion defeated. In 1877 he succeeded his father as a member of the corporation of Harvard University. He died in August, 1894.

PLANT, Henry Bradley, merchant, was born at Branford, Conn., Oct. 27, 1819, son of Anderson and Betsey (Bradley) Plant, and descendant of John Plant, who settled in Hartford, Conn., as early as 1639; was a soldier in the Narragansett war and for his services received, with other volunteers, a grant of land in New London county. From him and his wife, Betty Roundkettle, the line of descent runs through their son, John, and his wife, Hannah Wheelon; through their son, Benjamin, and his wife, Lorana Beckwith; through their son, Samuel, and his wife, Sarah Frisbie, grandparents of Henry B. Plant. Among notable representatives of the family are David Plant, of Stratford (1783-1851), a graduate of Yale in 1804; speaker of the Connecticut house of representatives (1819-20); state senator (1821-23); lieutenant-governor (1823-27), and U. S. congressman (1827-29); and Amzi Perrin Plant (1816-74), an extensive and successful manufacturer and founder of Plantsville, Hartford co. Henry Plant was educated at the Gillett Academy and at Lowville, N. Y., and New Haven, Conn. In 1837 he was employed on a steamboat plying between New York and New Haven as captain's boy, deckhand and assistant, and was finally placed in charge of the package freight business, which led him to engage in the express business under the style of Beecher & Co., in connection with this steamboat

line, first in New Haven, and later in New York city. When this firm was consolidated with the line he was placed in charge of the business in New York, and when Adams & Co., expressmen, acquired the trade and transferred it to the railroad his position continued in the new connection. In 1853, owing to the failing health of his wife, he visited Florida, in whose subsequent development he became a potent factor. He was appointed superintendent of the Southern interests of the Adams Express Co., in August, 1854, and under his management the

lines were extended over all railroads south of the Potomac and Ohio rivers. Obtaining the control of the business from the Adams Express Co., in 1861, he immediately incorporated the Southern Express Co., of which he was president until his death. During the civil war the Southern Express Co. did a noble work by carrying, free of charge, packages, boxes and parcels of all kinds to the soldiers serving on both sides. Mr. Plant, however, will be longest remembered as one of the foremost railroad developers of the century and for the practical opening of the state of Florida for winter and health resorts, and the establishment of the orange trade on a profitable basis. In 1879 he purchased the Atlantic and Gulf railroad, of Georgia, which had failed in 1877, and reorganized it as the Savannah, Florida and Western railroad, which was extended by a new line from Wacoger, Ga., to Jacksonville, giving Florida its first impulse to prosperity. In 1880 he purchased the Savannah and Charleston railroad (now known as the Charleston and Savannah), and thoroughly rebuilt it with a view to establishing perfect connections between Florida and the North. The immense increase in the business interests in these railroads led to the organization of the Plant Investment Co., in 1882, to control them and enlarge their territory, with Mr. Plant as president, his associates being H. M. Flagler, M. K. Jesup, H. P. Hoadley, G. H. Tidley, W. T. Walters and others.

As a consequence the Florida Southern and the South Florida railroads were extended until complete lines of communication were established with nearly every important point in the state, as well as with Key West, West Indian and Gulf ports. The Plant system of railroads also traverses all the interior counties of the state as far south as the Everglades, opening up to settlement by tens of thousands of immigrants of a vast and fertile region. Steamboat lines were established on the St. John's river and the Chattahoochee river, adding to the facility in transporting oranges and other perishable fruits, formerly subject to immense loss from unavoidable delays and the uncertainties of wagon lines. Mr. Plant also established lines of steamers between Tampa and Havana, Cuba (so admirably managed and equipped that the fear of fever epidemic, that frequently interfered with traffic in former times, has been removed), and between Boston and Halifax, Nova Scotia. He has built elegant hotels at various resorts in Florida and other points in the South. Mr. Plant was a rare combination of executive ability and high graces of character. He was interested in the happiness and well-being of the humblest of his employees, who held him in the highest esteem. He was twice married: first, Sept. 25, 1843, to Ellen Elizabeth, daughter of Capt. James Blackstone, of Branford, and a direct descendant of Rev. William Blaxton, who settled on the present site of Boston in 1630; second, July 2, 1873, to Margaret Josephine, only daughter of Martin Longman, of New York city, and a member of a noble Irish family, now represented by Lord Dundrum. By the first marriage he had two sons, one of whom died in infancy; the other, Morton F. Plant, is vice-president of the Plant system. His "Life," by his friend, G. Hutchinson Smith, D.D., was published in 1898. He died in New York city, June 23, 1899.

STEELE, Robert W., governor of "Jefferson territory" (Colorado), was born near Chillicothe, Ross co., O., Jan. 14, 1820. In 1845 he removed to Iowa, residing at Fairfield and Indianola, and after remaining there ten years, went still further west, and settled in Nebraska in 1855. Here he became prominent, and was elected a member of the territorial legislature (1857-58). In April, 1859, he removed from Florence, Neb., to Denver (Col.), then included in the territory of Kansas, and during the following summer he engaged in mining operations in the vicinity now covered by Gilpin county. About this time the people began to feel the need of a government nearer home, and the territory of Jefferson was established, of which Mr. Steele was elected governor in 1859. At the expiration of his term, a year later, he issued a call for another election, and was immediately re-elected, serving until June, 1861. This government was provisional, in that it was not officially recognized by congress, which body established the territory of Colorado, and appointed as its first governor William Gilpin, who took his seat at the expiration of Gov. Steele's second term. In an inaugural address he made a prophetic statement regarding the state's prosperity, then highly visionary, but since literally fulfilled; and at the close of his administration he issued a proclamation calling upon all officers appointed by him to yield up their offices and submit to the laws of the U. S. government, saying, "I deem it but obligatory upon me, by virtue of my office, to yield unto Caesar the things that are Caesar's." He then returned to the vocation of mining, and in October, 1864, opened the first silver-producing mine in the territory, thus revolutionizing its industries. This was the "August Belmont" mine, in the Argentine district, Clear Creek co. During the fall of 1865 the family removed to the eastern part of the country, in order

to secure more educational advantages for the children; but, returning in 1878, spent many years in Georgetown, Col., a city created by the discovery of silver. In 1895 Mr. Steele removed to Colorado Springs, remaining there until his death. He was married, in 1849, to Susan Nevin. She died just two days before her husband, whose death occurred Feb. 7, 1901, at Colorado Springs. One son and two daughters survive them.

GEISSENHAINER, Frederick Wilbono, clergyman, was born at Mulheim, Germany, June 26, 1771. As a child he showed evidence of great intellectual capacity, and after completing his studies at the universities of Giessen and Göttingen, by his superior attainments he secured ordination to the ministry at the age of twenty, though five years below the customary age of admission. He served for a time as professor extraordinarius at Göttingen University, but in 1793 emigrated to the United States, and for fifteen years was an active worker in the Groschenhoppen and associated Lutheran churches of Pennsylvania. In 1808 he removed to New York city to succeed Dr. Kunze as pastor of the Old Swamp Church, with which he was connected until his death, except for a short time prior to 1822, when ill health compelled him to retire temporarily from the work. He was an able scientific investigator; one of the first to point out the value of anthracite coal in melting iron, and obtained a patent in December, 1831, for the application of a hot air blast, thus marking a new era in the production of iron. He was the possessor of a powerful and versatile intellect, which he had trained and cultured to an advanced degree, was an accomplished linguist, and read Latin and Greek as easily as his native tongue. The degree of D.D. was conferred upon him by the University of Pennsylvania in 1826. Among his literary compositions were a number of lectures on church history, the gospels, the epistles and portions of the Old Testament. His death occurred in New York city, May 27, 1838. His son, also Frederick Wilbono, was born at New Hanover, Montgomery Co., Pa., June 28, 1797; received his education under the direction of his father, and was licensed to preach in the Lutheran church in 1818, his first charge being at Vincent, Chester Co., Pa., where he remained for ten years. He was for four years pastor of St. Matthew's Church, New York city, and in 1842 organized St. Paul's Lutheran Church. He was also instrumental in founding the Lutheran Cemetery at Newtown, Long Island.

SCRANTON, Joel, capitalist, was born in Belchertown, Mass., April 5, 1798, son of Stephen and Aseuath (Wright) Scranton. His father was a skilled operator in iron and steel, and introduced the manufacture of cut nails in the state of New York. The son settled in Cleveland, O., in 1819, purchasing a tract of land west of the Cuyahoga river, near what is now Scranton avenue. He lived to see his estate surrounded by business houses on every side, and his farm was a large factor in the making of the fortune he left when he died. On June 27, 1828, he was married to Irene P. Blickox, of Cleveland, by whom he had five children. The only surviving descendant is Mrs. Mary Scranton Bradford.

MARSHALL, Thomas, clergyman, was born at East Weare, Hillsboro Co., N. H., April 4, 1831, son of Moody and Sarah (Beard) Marshall. His earliest American ancestor was John Marshall, who emigrated to New England before the revolution. His great-grandfather, Joseph Marshall, was a soldier in the revolutionary war, and his maternal grandfather, William Beard, was an ensign under Gen. Stark. Thomas Marshall was prepared for college mainly at Kimball Union Academy, Meriden, N. H., and was graduated at Dartmouth College in

1857. For several years he was principal of Wilson Academy, Wilson, N. C. He taught in the civil engineering department of Cooper Union, New York city, for one year, while prosecuting his studies in Union Theological Seminary, where he was graduated in 1861. On Dec. 18th he was ordained to the ministry in the (then new school) Presbyterian church by the Fourth Presbytery of New York, and became pastor of the First Presbyterian Church at Mankato, Minn. His labors soon placed the church in a commanding position in the denomination in the state. In 1869 he was called to the pastorate of the High Street Presbyterian Church of St. Louis, and afterwards to the Glasgow Avenue Presbyterian Church of the same city, where he remained until 1881. In that year he was elected synodical missionary of Missouri, and continued in the office with unflinching zeal and energy until May, 1888, when he resigned and started on a tour around the world, for the purpose of acquainting himself with foreign missionary work. He was absent from home for fifteen months, and during that time visited Japan, Korea, China, Siam, Burma, India, Egypt and Palestine. During his travels he was a correspondent of the "Mid-Continent," a Presbyterian newspaper of St. Louis, and his letters were highly praised and were widely read. In 1890 the General Assembly of the Presbyterian Church created the office of field secretary of the Board of Foreign Missions, for the purpose of disseminating missionary information among the churches, and Dr. Marshall was chosen to fill it. He received the degree of A. M. from Dartmouth in 1871, and that of D. D. from Gale College, Wisconsin, in 1892. In 1888, while in the Orient, he was elected a life member of the Asiatic Society of Japan. He was married, at Lebanon, Pa., in October, 1871, to Mrs. Louise Goodheart Schneck, daughter of Daniel Stichter. Mrs. Marshall died in September, 1873, leaving no children. With the proceeds derived from the sale of her jewels and other effects Dr. Marshall established a fund to pay the salary of a native teacher in China for ten years. Also, with his share of his father's estate, he erected a memorial hall at Chefoo, China, in memory of his godly parents. He is a powerful preacher and one of the most popular lecturers on missionary work in the United States.

RICH, Isaac, philanthropist, was born at Wellfleet, Barnstable Co., Mass., Oct. 24, 1801. He was left an orphan at an early age, and being thrown on his own resources, went to Boston, where he worked for a fish dealer, and accumulated enough to enable him to open an oyster stall in Quincy market. As the years went by he became a dealer in fish on a large scale, having developed remarkable business talent. This, together with his proverbial honesty and his pleasing address, enabled him to put his house at the head of that particular trade in the United States. Although he had been brought up religiously he did not unite with the church until he was twenty years of age. He lost his children; but their death did not cause him to become self-centered and despondent; on the contrary, his thoughts turned toward his fellow-men with new interest, and having felt deeply his own lack of schooling he took particular pleasure in promoting education. He became a trustee of Wesleyan

Thomas Marshall

Academy, Wilbraham, Mass., and gave that institution \$40,000 to repair damages caused by fires in 1856-57. To Wesleyan University, Middletown, Conn., Mr. Rich gave more than \$100,000, and erected a library building at a cost of nearly \$75,000. When the School of Theology was removed from Concord, N. H., to Boston he became vice-president of its corporation, and a better endowment being needed gave a sum equal to that bestowed upon Wesleyan University. The bulk of the estate bequeathed to Boston University was valued at his death at \$1,500,000. This was the largest sum that had ever been given by an American for promoting higher education, and it remained the largest until 1894. With characteristic modesty he declined to have the university named after him. He was in hearty accord with the project to open it to women, and thus make it the first university to be organized without restrictions as to sex. Of his personal appearance Pres. Warren has written: "In physical stature he was not the equal of his older colleague, but a more symmetrical, manly form, or a more beautiful and vivacious countenance I have never known. His hand was modeled with exquisite delicacy. It would have graced any of the earls or countesses of Warwick, from whose family line there is good reason to believe he was descended." His house in Winthrop place adjoined that of Rufus Choate, which he subsequently bought. Later he bought of Daniel Webster his house on Summer street, and both estates were part of the property bequeathed to the university. Mr. Rich was married, about 1822, to Sarah Andrews, of Boston, who died in 1871. He died in Boston, Mass., Jan. 13, 1872. A bust of him by Milmore is preserved at Middletown.

SLEEPER, Jacob, merchant and philanthropist, was born at Newcastle, Lincoln co., Me., Nov. 21, 1802, son of Jacob and Olive (Dinsdale) Sleeper. He was educated in the district schools and academy of his native town, and, at the age of fourteen, having been left an orphan, went to Belfast, Me., to live with an uncle, in whose store he became a clerk. In 1823 he went into business for himself; in 1825 found a position in Boston as a bookkeeper and later, with a small amount of capital, took up the wholesale clothing business, in which he prospered. In 1825 a co-partnership was formed under the name of Carney & Sleeper, and he amassed so large a fortune in trade and in real estate transactions, that in 1850 he retired. During a visit to Great Britain he made a study of the universities of Cambridge and Oxford, as well as of the endowed charity schools of London, and aided in founding an evangelical college at Belfast, Ireland. In 1855 he assisted in organizing the New England Education Society and for fourteen years was on its board of managers. At the time Boston University was founded, in 1863, he had been an overseer of Harvard for twelve years; a trustee of Wesleyan Academy at Wilbraham, Mass., for nineteen years, and of Wesleyan University for twenty-five years, and for a time president of the latter's corporation. His colleagues in founding Boston University, Rich and Clafin, also were trustees of the academy at Wilbraham, being thus equipped by experience as well as by ties of sympathy for the new enterprise. When the board of trustees was formed Mr. Sleeper was elected treasurer. "His business sagacity," said Pres. Warren, "has helped to conserve and increase the endowment which his

own generosity helped to create. His never failing cheerfulness and trust in God were sheet anchors to the institution in the dark months which succeeded the disasters of the great fire and money panic of 1872. His trained and ripened power of gauging men, his delicate tact in dealing with them, his hospitality to new ideas, his sunshiny of spirit and winningness of personal manner, all have contributed to the harmony and beauty and strength of her results." In his honor the trustees established two fellowships to prepare young men of Christian character for advanced teaching in colleges and theological schools. He was an influential member and the last survivor of the original incorporators of the Wesleyan Association; was a generous benefactor of the New England Methodist Historical Society and of the Boston Young Men's Christian Association; endowed the Wesleyan Home for orphans at Newton, Mass., and gave \$10,000 to the New England Conservatory of Music, being honored in return by having a hall in that institution named after him. Mr. Sleeper was president of the Massachusetts Bible Society; vice-president of the American Bible Society, and president of the Massachusetts Temperance Association. He was a steward and class leader in the Bromfield Street Methodist Church; was for forty-six years treasurer of the board of trustees and superintendent of the Sunday-school for fifty-nine years. More than 100 churches in the United States were the objects of his charity. Mr. Sleeper was also active in affairs of the state; served on the board of aldermen in 1852; was a member of the state house of representatives and a member of the councils of Gov. Banks and Gov. Andrew. He was a director of the Bank of Commerce of Boston and of the North American Insurance Co., and was officially interested in Western railways. Mr. Sleeper was distinguished in appearance and unassuming in manner. If it became necessary to speak of his benefactions, he always did so with great modesty. He was twice married; first, at Billerica, Mass., May 7, 1827, to Eliza, daughter of Benjamin and Mary (Mann) Davis, and on April 7, 1835, to Maria Davis, her sister. He left a son, Maj. Jacob Henry Sleeper, and four daughters, Mary Elizabeth (Mrs. George N. Davis, of Boston); Abby P. (Mrs. J. W. Harper); Julia Maria (Mrs. E. P. Dutton, of New York city) and Caroline (Mrs. J. W. Harper, of New York city). Mr. Sleeper died in Boston, Mass., March 31, 1889.

CLAFIN, Lee, one of the founders of Boston University, was born at Hopkinton, Middlesex co., Mass., Nov. 19, 1791, son of Ebenezer and Hamah (Tilton) Clafin, and descendant of Robert McClafin, a Scotchman, who emigrated to New England in 1645, and settled in Wenham, Mass. Lee Clafin had a common school education, and then took up the tanning business. About 1815 he removed to Milford and built a tannery, which was converted into a boot and shoe manufactory in 1830. He was president of a bank established in Milford, and in 1834 represented the town in the state legislature. Not long after he removed his business to Hopkinton, and also founded a bank there, of which he was president. About 1839 he opened a branch house in St. Louis, of which his son, William, took charge, and subsequently he established his head quarters in Boston, where he became identified with many philanthropic movements. He served in the state senate. He was the first to propose and advocate the founding of Boston University, and therefore deserves mention before his associates, Sleeper and Rich, although the last named, by making the institution his heir, and heading the application for a charter, took the decisive step that insured the beginning of the enterprise. He was, in addition, a trustee and benefactor of Wesleyan Academy, Wil-

Jacob Sleeper

bridge and Oxford, as well as of the endowed charity schools of London, and aided in founding an evangelical college at Belfast, Ireland. In 1855 he assisted in organizing the New England Education Society and for fourteen years was on its board of managers. At the time Boston University was founded, in 1863, he had been an overseer of Harvard for twelve years; a trustee of Wesleyan Academy at Wilbraham, Mass., for nineteen years, and of Wesleyan University for twenty-five years, and for a time president of the latter's corporation. His colleagues in founding Boston University, Rich and Clafin, also were trustees of the academy at Wilbraham, being thus equipped by experience as well as by ties of sympathy for the new enterprise. When the board of trustees was formed Mr. Sleeper was elected treasurer. "His business sagacity," said Pres. Warren, "has helped to conserve and increase the endowment which his

braham, Mass., and in 1855-71 was a trustee of Wesleyan University, to which he gave large sums. At the close of the civil war he, with others, bought Benton Seminary at Orangeburg, S. C., a building that had been used as a school for young ladies, and opened it as a university for both sexes, under the auspices of the Methodist church. Because of his liberality in this matter the institution was given his name. Pres. Warren in his "Quarter Centennial Address" said of him: "His other charities were so varied that the number of persons and organizations that were the beneficiaries of his fruitful life can never be determined by any calculus known to earth." Among the financial institutions with which Mr. Claflin was connected was the Hide and Leather Bank of Boston, of which he was first president. Mr. Claflin was married, in 1815, to Sarah, daughter of Elisha and Sarah (Watkins) Adams, of Hopkinton. She bore him three sons, one of whom died in infancy. The others, William and Wilbur Fisk, engaged in the boot and shoe business, while the former was governor of Massachusetts in 1869-71, and later a member of congress. Mrs. Claflin died in 1834, and some years later Mr. Claflin was married to Polly Jones Harding, widow of Lewis Harding, and daughter of Phineas and Izanna (Jones) Eames, of Milford, who survived him. Mr. Claflin died in Boston, Mass., Feb. 23, 1871.

WARREN, William Fairfield, educator, clergyman and author, first president of Boston University (1873-), was born at Williamsburg, Hampshire co., Mass., March 13, 1833, youngest son of Mather and Anne Miller (Fairfield) Warren. As a direct descendant from the original immigrant, William Warren, of Roxbury, whose son was married to Susannah Mather, his genealogical line goes well back toward the beginning of New England history. Through his father's mother he is directly descended from Elder John White, the associate of Hooker, and called "the acknowledged father of New England colonization," and through his own mother from Hon. William Fairfield, of Wenham, who at one time held the highest elective office in the royal province of Massachusetts. His father's father was Cotton Mather Warren. After his graduation at Wesleyan University in 1853 he established a classical school in Mobile, Ala. Subsequently he traveled, preached, and for nearly two years studied at the Andover Theological Seminary. In the years 1858-60 he held pastorates, first at Wilbraham, Mass., then at Boston. Of the ten years 1856-66 more than seven were spent in Europe and the Orient. Twice he visited Greece. In Rome he gave much attention to classical and ecclesiastical archaeology, and at the University of Berlin he made a special study of philosophy, Christian art and monumental theology. In Halle his studies related more to Biblical and Oriental antiquities. In 1861-66 he was professor of systematic theology in Missionsanstalt, Bremen, subsequently the Martin Institute at Frankfurt. In 1866 he returned to Boston to organize and preside over the Boston Theological Seminary, which was the nucleus of Boston University, chartered in 1869. To the presidency of this Dr. Warren was called in 1873, and to its development the best work of his life has been given. He received the degree of D. D. from the Ohio Wesleyan University in 1862, and that of LL. D. from the Wesleyan University in 1874. In 1857 he was a delegate to the world conference of the Evangelical Alliance held in Berlin, on invitation of the king of Prussia, and in 1873 he was one of the speakers at the world conference of the same body in New York. In various capacities he has officially represented the Methodist Episcopal church in England, Ireland, Germany, Switzerland and Turkey. In the early seventies, when the revision of the authorized

version of the Bible was undertaken, he was invited to serve on the American New Testament company. His essays, a number of which have been published in pamphlet form, include: "Systems of Ministerial Education" (1872); "American Infidelity" (1874); "Tax Exemption the Road to Tax Abolition" (1875); "Liberation of Learning in England" (1878); "New England Theology" (1881); "Homer's Abode of the Dead" (1883); "The Quest of the Perfect Religion" (1887); "Gates of Sunrise in Babylonian and Egyptian Mythology" (1889). Other works are: "True Key to Ancient Cosmology and Mythical Geography" (1882); "Paradise Found—A Study of the Pictorial World" (1885), and "In the Footsteps of Arminius: A Delightful Pilgrimage" (1888). "Paradise Found" (pp. 505; 11th ed., 1890), presents scientific, historic and other evidence that the cradle of the human race was at the north pole. "The Quest of the Perfect Religion" was translated into Chinese, Japanese, Spanish and German, and suggested the Chicago parliament of religions. Dr. Warren is a member of the University, Ministers' and Alpha clubs of Boston. In 1889 he visited Rome to ascertain if the Italian government would favor the founding there of an American school for archaeological studies, and having secured this made on his return an appeal for an endowment fund of \$100,000. In 1861 he was married to Harriet Cornelia, daughter of John Marshall and Mary J. (Thompson) Merrick, of Wilbraham. Of their four children the son, William Marshall, is a professor of philosophy in Boston University. Bishop Henry White Warren is a brother of the president.

W. F. Warren

DEMPSTER, John, theologian, was born at Florida, Fulton co., N. Y., Jan. 2, 1794. His father, Rev. James Dempster, a Scotchman, who was a graduate of Edinburgh University, although bred a Presbyterian, became a fellow worker with John Wesley, and was sent to North America to do missionary work. After preaching for some time in New York city, he returned to the Presbyterian denomination and was pastor of the First Church at Florida until his death in 1803. His son, John, grew up almost ignorant of books, but was converted at a Methodist camp meeting in 1812, and began to study systematically, with the ministry in view. In 1816 he entered the itinerant ministry of the Methodist Episcopal church, and worked in the St. Lawrence, lower Canada, district, which included part of New York. He labored also in the Cayuga and Black river district and elsewhere. In 1836-41 he was a missionary to Buenos Ayres, and in 1842-44 he was stationed at the Vestry street and Mulberry street churches, New York city. In 1845 he opened the Biblical Institute at Newbury, Vt., and in 1847 aided in forming a similar institution at Concord, N. H., which was transferred to Boston, and as the Boston Theological Seminary became the theological school of Boston University in 1869. The property transferred amounted to about \$250,000, and this gave to the university, as its first department, the largest theological school in New England and one of the largest in the country. Ninety-four students were in attendance at the time, and the former graduates of the seminary, 235 in number, were adopted as alumni of the university. In this way, while the university itself dates back to 1869, its first department is in possession of a history much older. The department is the oldest theological seminary of the Methodist Episcopal church, and the first ever

opened to women as well as men. In 1854 Dr. Dempster removed to Evanston, Ill., where he founded the Garrett Biblical Institute, and from 1855 until his death he was senior professor there. He intended to found similar institutions in Nebraska and California, but the financial crisis of 1857 prevented. By his own efforts Dr. Dempster acquired considerable culture, including a familiarity with the Greek, Hebrew and Latin languages. Said one of his co-laborers: "His mind, naturally metaphysical, turned especially to questions of philosophical theology, such as the divine nature and government, the will, etc., and on these he both spoke and wrote with great success."

As a preacher he was at once simple, stirring and profound. He seized with a master hand upon the cardinal truths of revelation and providence, and wielded them with great application to the judgment and conscience. His name became a household word from Canada to Florida and from New England to Illinois. The degree of D.D. was conferred upon him in 1848 by Wesleyan University. He left manuscripts, some of which were published in 1864 as "Lectures and Addresses." In 1824 he was married to Lydia, daughter of William Chancy, of Montgomery county, N. Y. He lived to see the institutions he had founded in a flourishing condition, and died at Chicago, Nov. 21, 1863.

LATIMER, James Elijah, clergyman and dean, was born in Hartford, Conn., Oct. 7, 1826, son of Ebenezer Latimer, a teacher by occupation. Soon after his birth his father removed to Brooklyn, N. Y., and there opened a private school. At the age of eight the son began the study of Greek and Latin, and at the age of twelve he was ready for college; but being too young he became a clerk in a dry-goods store, and in his leisure hours studied law. In 1844 he entered Wesleyan University, and in addition to the prescribed studies he took up several independently, including French and German, in which he became very proficient. After his graduation he taught at Newbury Seminary, Vermont, and at Genesee Wesleyan Seminary, Lima, N. Y. In 1851-54 he was appointed principal of New Hampshire Conference Seminary, removing then to Fort Plain, N. Y., to take charge of a large seminary in that place. His next field of labor was Elmira Female College, where he was professor of languages. In 1858 he joined the East Genesee conference, and in 1861 was stationed as pastor of a church at Elmira. Subsequently he held pastorates at Ashbury, Rochester (First Church) and Penn Yan. In 1868-69 he visited Europe to study methods of instruction, and while at Halle, Germany, applied to Prof. Erdmann for private tuition in philosophy. Before the first week ended the professor declared that he would not accept pay; that they must meet as equals and as co-workers in a common field. In 1870 he was appointed professor of historic theology in Boston Theological Seminary, and three years later when the university of Boston was formally organized he was called to the chair of systematic theology and appointed dean of the theological faculty. His part in organizing and administering the institution, in its early days, was an important one, his excellent judgment, his wide scholarship and his varied experience being of great value. Prof. Latimer's few publications include book reviews in the "Methodist Quarterly" and "Zion's Herald"; articles in "Johnson's Encyclopedia"; a baccalaureate sermon preached before the university; "The Rationalistic Vindication of Christianity" (1884), and "Systematic Theology." The last forms the central volume of Crook and Hurst's theological series, but was not completed until after his death, and then from outline notes only. He often regretted that he ever gave up pastoral work, and this regret was shared by many

others who felt that he was peculiarly fitted for the ministry. His sermons were characterized by one of his friends as "thoughtful, attractive and inspiring, chaste and classical in their style, and utterly free from rhetorical ruts." He was married, in 1853, to Anna E. Ross, who had been one of his pupils at Genesee Seminary, and who was his assistant in teaching thereafter until he entered the ministry. His successor as dean of the school of theology at Boston University is Marcus D. Buell, A.M., S.T.D., who is also professor of New Testament, Greek and exegesis. Prof. Latimer died at Auburndale, Mass., Nov. 26, 1884.

GREEN, Nicholas St. John, jurist and educator, was born at Cambridge, Mass., March 3, 1830, son of James Diman and Sarah Adeline (Durell) Green. He was graduated at Harvard in 1851, and received the degree of LL.B. in 1853. He became associated with Benjamin F. Butler, but the firm was dissolved at the opening of the civil war, in which he served as major and paymaster. Mr. Green was an instructor in philosophy and political economy at Harvard in 1870-71, and was a lecturer on torts and criminal law in the Harvard Law School, 1870-73. At the opening of the Boston University Law School in 1872 he was appointed lecturer and acting dean, which position he held until his death. In 1874 he published the initial volumes of "Green's Criminal Law Reports," and in the next two years edited volumes 112 to 114 inclusive of the "Massachusetts Reports." He also prepared an abridgment of "Addison on Torts." He contributed articles to the "American Law Review," among them several instalments of a treatise on torts, on which he had been engaged for a number of years. Mr. Green was prominent at the bar, and possessed a keen, logical mind and eminent ability. Although he was more attracted to special branches of the law, he was well grounded in all its essential departments. It was rather as a jurist than as an advocate that he achieved his position even in criminal law. He was married at Cambridge, Mass., Jan. 24, 1861, to Cornelia, daughter of John and Mary A. (Levi's) Henshaw. She bore him two sons and one daughter. Mr. Green died at Cambridge, Mass., Sept. 8, 1876.

BENNETT, Edmund Hatch, jurist and educator, was born at Manchester, Bennington co., Vt., April 6, 1824, son of Milo Lyman and Adeline (Hatch) Bennett. His father, a native of Connecticut and a graduate of Yale in 1811, was a judge of the supreme court of Vermont for many years. The son was educated at academies in Manchester and Burlington, Vt., and at the University of Vermont, where he was graduated in 1843. He taught a private school in Virginia, studied law in Burlington, and was admitted to the Vermont bar in 1847. In 1848 he was admitted to the bar of Suffolk county, Mass. He soon removed to Taunton, Mass., and resided there until 1884. He was elected the first mayor of Taunton, when it was incorporated as a city (1865), by a unanimous vote; was re-elected in 1866 and in 1867; and was selected to deliver the historical address upon the celebration of the 250th anniversary of the founding of the municipality in 1889. He was a partner in the practice of law with Nathaniel Morton, with Hon. Henry Williams, with Henry J. Fuller, and with Frederic S. Hall, of Taunton. In May, 1858, he was appointed judge of probate and insolvency for Bristol county, Mass., held the office for twenty-five years, and resigned it in 1883. During his incumbency the famous Robinson will case, affecting the fortune of Mrs. Hetty Green, came under his supervision. In 1870-72 Judge Bennett was lecturer at the Law School at Harvard University. In 1876 he succeeded Prof. Greene as dean of the Law School of the Boston University, and

a professor in that institution. His legal works, written or edited alone or in company with others, number nearly one hundred volumes. The chief of these are: "English Law and Equity Reports" (30 vols.); several editions of the legal works of Judge Story; "Cushing's Massachusetts Reports" (vols. 9-12 inclusive); "Greenleaf's Reports" (8 vols.); "Leading Criminal Cases" (2 vols.); "Fire Insurance Cases" (5 vols.); "Digest of Massachusetts Reports"; American editions of the recent English works of "Goldard on Easements"; "Benjamin on Sales"; "Indemnitor on the Common Law"; "Blackwell on Tax Titles"; "Pomeroy's Constitutional Law." He was one of the editors of the "American Law Register" of Philadelphia, Pa., and contributed frequently to the "Albany Law Journal," "Boston Law Reporter" and other legal periodicals. His lecture on "Farm Law," delivered at Hingham, Mass., in December, 1878, before the Massachusetts state board of agriculture, attracted very general attention, and was republished in agricultural journals all over New England as well as in the West. In 1872 he received the degree of LL.D. from the University of Vermont. Judge Bennett was married at Taunton, Mass., June 29, 1833, to Sally, daughter of Hon. Samuel L. and Caroline (Thomas) Crocker. His son, Samuel Crocker Bennett (b. April 19, 1858), was graduated at Harvard in 1879, and succeeded his father as dean of the law department of Boston University, which conferred upon him the degree of LL.B. in 1882. Judge Bennett died in Boston, Mass., Jan. 2, 1898.

LINDSAY, John Wesley, educator, was born at Barre, Washington co., Vt., Aug. 20, 1829, son of John and Lucy (Nourse) Lindsay. His earliest ancestor in this country, Christopher Lindsay, a Scotchman, was one of the settlers of Lynn, Mass., in 1629. The Nourses, or Nerses, were of English origin, and a branch of the family settled in Salem, Mass., in the seventeenth century. John Lindsay (1788-1850), a native of Lynn, and an eminent minister of the Methodist Episcopal Church, filled important appointments in the New England and the New York and Troy conferences; was presiding elder in the New Haven and Albany districts; was agent for Wesleyan University and for the American Bible Society, and was active in founding Wilbraham Wesleyan Academy and Wesleyan University. The son, after attending the Boston Latin School and Wesleyan Academy, entered Wesleyan University, and was graduated in 1840. After a course at Union Theological Seminary, New York city, he was ordained to the ministry in 1843, and joined the New York conference of the Methodist Episcopal church. In 1847 he became a tutor in Wesleyan University, and in 1848 professor of Hebrew and Latin in the same institution. He returned to pastoral work in 1860. From 1864 until 1868 he was president of Geneva College, Lima, N. Y., and was then called to the chair of exegetical theology in Boston Theological Seminary. In 1871 he was appointed to the same chair in the School of Theology of the Boston University; in 1873 was elected dean of the faculty of the College of Liberal Arts; and in 1878 was made professor emeritus. He was a member of the general conference of the Methodist Episcopal church in 1864, 1868 and 1872, and is a trustee of Wesleyan University and of Boston University. The degree of S.T.D. was conferred upon him by Wesleyan University in 1878. Dr. Lindsay is the author of the Commentary on Deuteronomy in Wheldon's "Commentary," and of articles in the "Methodist Quarterly Review." He was married, in Baltimore, Md., in 1852, to Emily, daughter of Thomas E. Bond, M.D., a descendant of early English emigrants to Maryland, and member of a family identified with patriotic movements.

HUNTINGTON, William Edwards, clergyman and dean in Boston University was born at Hillsborough, Montgomery co., Ill., July 30, 1811, son of William Pitkin and Lucy (Edwards) Huntington. His early education was received in public and private schools in Milwaukee, Wis., and he was graduated at the University of Wisconsin in 1870 and the School of Theology, Boston University, in 1873. During the last year of the civil war he served as first lieutenant in the 19th Wisconsin infantry. In 1872 he was ordained an elder in the ministry of the Methodist Episcopal church, and was appointed pastor of the Nahant (Mass.) Church, subsequently being assigned to the following pastorates: Roslindale, 1872-74; Newton, 1875-76; Harvard Street, Cambridge, 1877-79; Tremont Street, Boston, 1880-82. In 1881 he received the degree of Ph.D. from the Boston University, and in the following year, upon the resignation of Rev. John W. Lindsay, S.T.D., he became dean of the College of Liberal Arts in that institution. This college had been opened in 1873, in the autumn of which the first class was organized, numbering twenty-two students. Mr. Huntington was married Oct. 3, 1856, in Newton, Mass., to Emma Caroline, daughter of Alden and Caroline (Robinson) Speare. They have one son, Raymond Edwards Huntington.

TALBOT, Israel Tisdale, physician and surgeon, was born at Sharon, Norfolk co., Mass., Oct. 29, 1829, son of Josiah and Mary (Richards) Talbot, and a descendant of Peter Talbot, an Englishman, who settled in Dorchester, Mass., in 1670. His grandfather, Josiah Talbot, was a revolutionary soldier, and was in the march to Saratoga. In his fifteenth year Tisdale Talbot went to Baltimore and established a private school. While there he made the acquaintance of Dr. John Morris, from whom he gained great enthusiasm for the medical profession. He continued his classical studies at South Woodstock, Conn., and at Worcester Academy, Massachusetts, and in 1850 began medical study under the direction of his relative, Dr. Samuel Gregg, of Boston, the first physician in New England to adopt the homoeopathic method of treatment. He was graduated at the Pennsylvania Homoeopathic Medical College in 1853 and at Harvard Medical College in 1854. He spent fifteen months in the hospitals and medical schools of Europe. Returning, he gave his attention to surgery, and on June 3, 1855, he performed a tracheotomy, which proved to be the first successful operation of the kind in America. Continued study gave him a profound conviction of the great importance of homoeopathy. On his return to Boston, after another residence of eighteen months in Europe, he found himself, with all other homoeopaths, shut out from active participation in the established hospitals, societies and medical schools, and felt that the proper course to be pursued was to establish societies and institutions in which the principles of homoeopathy could be developed and demonstrated. The legislature of 1856 granted charters to a State Homoeopathic Society and to a Homoeopathic Dispensary in Boston. Under the direction of Dr. Talbot these institutions were promptly organized and are still in successful operation. In 1870 the opening of a small homoeopathic hospital indirectly aroused old prejudices, which had been smoldering for years. By the charter of the Massachusetts Medical Society every physician of proper education and good moral character was entitled to membership; but a special resolution was passed prohibiting the admission of any who believed in homoeopathy. An effort to expel homoeopathic physicians who were already members resulted on Nov. 21, 1871, in the trial of eight prominent physicians, of whom Dr. Talbot was perhaps the most active, "for con-

duct unworthy an honorable physician and member of the society." Expulsion followed, as had been predetermined; but the public was aroused to indignation, and under his direction it was determined to secure an expression of popular feeling. A fair was held in May, 1872, which netted for the Homeopathic Hospital the sum of \$80,000. In all the efforts in behalf of the professional, charitable and business interests of the hospital, he had always taken a prominent part, and after many years of service as chairman of its medical board, became its director. In 1873 Boston University established a medical school, of which Dr. Talbot was dean and professor of surgery from the time of its opening until his death. His successor is Dr. John P. Sutherland, who is professor of anatomy. In 1866 he established the "New England Medical Gazette," of which he was for several years the sole editor. For many years he was the secretary of the American Institute of Homeopathy, later its president, and as chairman of its intercollegiate committee for fifteen years has done much to improve the status of medical education in the United States. In 1891 he was president of the international homeopathic congress, and was honorary member of the national homeopathic associations of Great Britain, France and Germany, and of many of the state medical societies and other associations in the United States. He was married, on Oct. 29, 1856, to Emily, daughter of Columbus and Lydia (Tinkham) Fairbanks, of Winthrop, Me. Four children are living: Marion, dean of women and professor in the University of Chicago; Edith, wife of Dr. William L. Jackson, of Roxbury; Winthrop Tisdale, physician and professor of pathology in Boston University Medical School, and Henry Russell, an Episcopal clergyman. He died at Hingham, Mass., July 2, 1899.

WESSELHOEFT, Conrad, physician, was born in Weimar, Germany, March 23, 1834, son of Robert and Ferdinanda Emilie (Hecker) Wesselhoeft. His father was a distinguished physician, who came to this country in 1849, and was the first to introduce hydropathy into the United States. The son was educated in the public and private schools of New England, and was graduated at the Nicolai College, Leipzig, Germany, and at Harvard Medical School in 1856. He began his practice in Boston in 1857, and became a member of the medical staff of the Massachusetts Homeopathic Hospital. In 1871 he was elected professor of pathology and therapeutics in the Boston University School of Medicine, where he officiated in that capacity for twenty-eight years. Dr. Wesselhoeft was the translator of Hahnemann's "Organon," and is the author of many treatises published in homeopathic journals. He is a member of the American Institute of Homeopathy, of which he was president in 1879, during its meeting at Lake George, N. Y., and of the St. Botolph Club of Boston, and is also a member of the Unitarian church. In 1863 he was married to Elizabeth Foster, daughter of William Pope, of Dorchester, Mass. They have one child, a daughter, Minna.

PAINE, Henry Warren, lawyer, was born at Winslow, Kennebec co., Me., Aug. 30, 1810, second child of Lemuel and Jane Thompson (Warren) Paine. His father was a native of Foxborough, Mass., a graduate of Brown University and a lawyer by profession. His mother also was a native of Foxborough, daughter of Ebenezer T. Warren and niece of Gen. Joseph Warren, who fell at Bunker hill. Henry Warren Paine was graduated at Waterville College (now Colby University) in 1830, and remained in the institution for a year as a tutor. He then began the study of law in the office of Samuel S. Warren, at China, Me.; continued it for a year at the law school of Harvard University, and was ad-

mitted to the bar of Kennebec county, Me., in 1834. He at once began practice at Hallowell and represented that town in the state legislature in 1835-37 and again in 1853. In 1834-39 he was attorney for Kennebec county, and later was several times offered a seat on the bench of the supreme court of Maine. In 1854 he opened an office in Boston, having his residence at Cambridge, and became so esteemed that he was offered an appointment to the reference court of Massachusetts, but declined it. His practice both in the state and in the Federal courts became extensive and as referee and master in chancery he decided many difficult cases, involving the disposition of large amounts of property. In 1872-83 he was lecturer at the Law School of Boston University on real estate and property law. Chief Justice Appleton, of Maine, described him as "a gentleman of a high order of intellect; of superior culture; in private life one of the most genial of companions; in his profession a learned lawyer as well as an accomplished advocate." In 1863 and 1864 Mr. Paine was Democratic candidate for governor, but was defeated. He was once elected an overseer of Harvard. The honorary degree of LL.D. was conferred upon him by Colby University in 1872. He was married at Newburyport, Mass., May 1, 1837, to Lucy Elizabeth, daughter of John and Mary P. Coffin. She bore him one child, a daughter, Jane Warren Paine. He died in Boston, Mass., Dec. 26, 1893.

BOWNE, Borden Parker, educator and author, was born at Leonardville, Monmouth co., N. J., Jan. 14, 1847, son of Joseph and Margaret (Parker) Bowne, whose ancestors emigrated to New Jersey from England before the revolution. His father, a farmer, and a justice of the peace, was a local preacher in the Methodist Episcopal church. The son was graduated at the University of the City of New York, in 1871, and received from that institution the degree of A.M. in 1876. He was pastor of the Methodist Church, Whitestone, L. I., in 1872-73, and next spent the years 1873-75 in Europe, attending lectures at the universities of Halle, Göttingen and Paris. In 1875 he became assistant editor of the "Independent" and assistant professor of modern languages in the University of the City of New York; in 1876 was called to the chair of philosophy in Boston University, which he still holds, in connection with the deanship of the Graduate School of Arts and Sciences, to which he was appointed in 1888. His published works include: "Philosophy of Herbert Spencer" (1874); "Studies in Theism" (1879; 2d ed., 1882); "Metaphysics" (1882; rev. 1898); "Introduction to Psychological Theory" (1886); "Philosophy of Theism" (1887); "Theory of Thought and Knowledge"; "The Christian Revelation"; "The Christian Life"; "The Atonement"; also contributions to magazines, including the "New Englander," "Methodist Review," "Princeton Review," "Andover Review," "Christian Thought," and many newspapers. Of his "Metaphysics," a reviewer for the "Nation" said: "For those interested in pure metaphysics and not familiar with Lotze's views of ontology and cosmology, this will prove a work of great freshness and utility. The work as a whole stands in the same relation to Lotze's 'Metaphysik' that John Fiske's 'Cosmic Philosophy' stands to Spencer's system in general." The degree of LL.D. was conferred upon him by Ohio Wesleyan University in 1881. Dr. Bowne was married at Whitestone, L. I., in 1875, to Kate, daughter of John Morrison,

Henry W. Paine

SCHOULER, James, lawyer and author, was born at West Cambridge (now Arlington), Mass., March 20, 1839, eldest son of William and Eliza (Warren) Schouler. His father was honorably known in Massachusetts for many years as a journalist and public man, serving as adjutant-general of that state during the entire period of the civil war, and was the author of "History of Massachusetts in the Civil War," a work of two volumes. The family is Scotch, from Glasgow and its environs, where several members attained local distinction; and the family surname is properly written Scouler. James Schouler (or Scouler), the grandfather of the present James, emigrated to the United States with his family in 1815, from Kilbarchan, a village near Glasgow, his son William being then an infant, and with good success established calico-printing factories in West Cambridge and elsewhere, such as he had previously carried on in Scotland. The eldest grandson, James Schouler, who was named from this immigrant, and founder of a new American family, received a liberal education at Lowell and Boston, and at Cincinnati, O., and was graduated at Harvard in 1859. After a year spent in teaching at St. Paul's School, Concord, N. H., and in general studies, he prepared for the legal profession, and was admitted to the Boston bar in 1862, having meanwhile assisted his father for several months in the adjutant-general's office, while the first Massachusetts troops were being sent to the front. He soon left his law practice to serve among the nine months' troops at the seat of war, and as a second lieutenant in the 43d Massachusetts regiment was detailed on U. S. signal service. Returning home in 1864, he resumed his law practice, being also appointed a public administrator by Gov. Andrew; since that time he has resided constantly in Boston, though passing much of the year in Washington city, or in travel, or at his summer cottage among the White Mountains, at Intervale, N. H. Camp exposure, while he was in service during the civil war, brought on a partial deafness, which increased so greatly after 1865 that he was obliged to give up the large law practice he had built up, and to devote his time chiefly to labors of the pen, and such has since been his somewhat secluded course of life. He was not without experience and reputation as a speaker and advocate, and when in 1884 he was invited to lecture before law students upon a subject already treated in one of his text-books, he found his service so well appreciated that he determined to devote part of his time regularly thenceforward to that line of work, though unable to conduct oral recitations with advantage. He has since extended his labors very considerably in that direction, being occupied in legal and historical instructions at three universities. His hopeful intention at the time he left college was to be a college professor some day, and events seem to have developed him in that direction, though by a process and under drawbacks which then could least have been expected. During the past twenty years he has been busily engaged in writing legal treatises which have taken rank as standard works in the profession: "The Law of the Domestic Relations" (1870); "Personal Property," (2 vols., 1873-76); "Bailments, Including Carriers" (1880); "Husband and Wife" (1882); "Executors and Administrators" (1883); "Wills" (1887). He has also gained distinction in general literature by his "History of the United States under the Constitution, 1788-1865," prepared during the intervals of professional labors, a work of six volumes (1880-99). "Historical Briefs" (1896) is a collection of fugitive papers. He has also written a short "Life of Thomas Jefferson" (1893), and "Constitutional Studies, State and Federal" (1897). Since 1884, he has, besides, been a lecturer at the Boston University Law School

and in the National University Law School at Washington, D. C. From the latter institution he received in 1891 the honorary degree of LL.D. Since 1891 he has also lectured at Johns Hopkins University, Baltimore, upon American constitutional law and political history. He was married in Boston, Dec. 20, 1870, to Emily Fuller, daughter of Asa F. and Mehitabel (Fuller) Cochran.

TUCKER, George Fox, lawyer, legislator and author, was born at New Bedford, Bristol co., Mass., Jan. 19, 1852, son of Charles Russell and Dorcas (Fry) Tucker. His ancestors, who were members of the Society of Friends, were among the early settlers of the Plymouth colony and the state of Rhode Island; since 1660 seven successive generations of the family have lived either at Dartmouth or New Bedford, Mass. His father was a leading merchant of the latter place. The son obtained his preparatory education at the Friends' Seminary, New Bedford, and the Friends' School, Providence, R. I. He was graduated at Brown University in 1873; at the Boston University Law School in 1875, having previously studied law in the office of George Marston & William Cropp, of New Bedford; was admitted to the bar in 1876, and began the practice of law at New Bedford. In 1881 he was a member of the school committee. In 1882 he removed his office to Boston, where he was associated with his former preceptor, the Hon. George Marston, at that time attorney-general of the commonwealth. He retained his residence at New Bedford and in 1889 was elected to the state legislature by the Republicans of the 6th district of Bristol county, serving during his term of office as chairman of the committee on bills in the third reading and as a member of the committees on rules and on constitutional amendments. In 1892 he was appointed reporter of the decisions of the supreme judicial court of Massachusetts. Mr. Tucker is a member of the St. Botolph University and Press clubs of Boston and of the Wamsutta Club of New Bedford. He is the author of a "Manual of Wills" (1884); "The Monroe Doctrine" (1885); "Manual of Business Corporations" (1888); "Notes on the U. S. Revised Statutes" (1889); and "The Federal Income Tax" (1894). In association with John M. Gould; "A Quaker Home," novel (1891); "Manual of the Constitution of Massachusetts" (1894); "Your Will—How to Make It" (1895); "Uncle Gallup's Christmas Dinner" and "Mildred Marvel" (novels); and "The Interpretation of Statutes, Special Writs, and Motions for the New Trials." In 1891 Brown University conferred the degree of Ph.D. upon him in recognition of his literary work.

RUSSELL, Charles Theodore, lawyer, was born in Princeton, Mass., Nov. 20, 1815, son of Charles and Persis (Hastings) Russell, and descendant of William Russell, who settled in Watertown, Mass., as early as 1645. His father, a merchant of Princeton, filled various public offices, serving as postmaster, town clerk, representative to the general court for eight successive years, state senator for four terms, and member of the governor's council for three years. He was graduated at Harvard University in 1837; entered the law office of Henry H. Fuller, in Boston, and later the Harvard Law School, and was admitted to the Suffolk bar in 1839. In 1839-41 he was associated with Mr. Fuller; afterwards he practiced alone until 1845, when he formed a co-partnership with his brother under the style of C. T. & T. H. Russell, which continued until his death. Soon after beginning the active practice of his profession Mr. Russell became a member of the Boston school committee, and as such was alone in that body in advocating the admission of colored children to the public schools of the city, instead of confining

them to special schools, as was then the custom. He was a member of the lower house of the legislature in 1844, 1845 and 1850, and of the senate in 1851 and 1852. In 1855 he took up his residence in Cambridge, where he served as mayor in 1861 and 1862. In 1877 and 1878 he was state senator from Middlesex county. For many years he was a member of the board of visitors of the Theological School at Andover, Mass., and secretary of the board, and made the closing argument before that board concerning the five professors of the institution who were accused of heterodoxy, and was senior counsel for them in the hearing of the case before the supreme judicial court. He was a corporate member of the American Board of Commissioners for Foreign Missions; a member of the American Oriental Society, of the American College and Education Society, and of the Society for Promoting Theological Education among the Indians; president of the Board of Ministerial Aid and of the Congregational Club of Boston; a member of the Massachusetts Bible Society, and a member, vice-president and president of the Boston Young Men's Christian Association. He was a professor in the Boston University Law School from its organization until his death. Mr. Russell was married in Boston, June 1, 1840, to Sarah Elizabeth, only daughter of Joseph Ballister, a prominent merchant. They had six daughters and four sons, two of the latter being the late William E. Russell, governor of Massachusetts, and Charles T. Russell, Jr., a member of the Boston bar. He died at Cambridge, Mass., Jan. 16, 1896.

PARSONS, Frank, author and educator, was born at Mount Holly, N. J., Nov. 14, 1854, son of Edward and Alice (Rhees) Parsons; of English ancestry on his father's side and of Scotch-Welsh on his mother's. His early education was obtained at home and at Aaron Academy, near Mount Holly, enabling him to enter Cornell University in the sophomore year. He was graduated there in 1873 in the mathematical and engineering course, and then obtained a position on the engineering staff of a new railway; but the panic of 1873 threw the company into bankruptcy, and he began teaching in a district school at Southbridge, Mass., from which he was transferred to the high school, to instruct in higher mathematics, history, elocution and

James Parsons

other branches. Later he became a professor of art, having charge of drawing and painting in all the schools of the town. He began the study of law at Southbridge under Judge A. J. Bartholomew, continued in the office of F. P. Goullard at Worcester, and was admitted to the bar in 1881. He opened an office in Boston, became a legal text writer for Little, Brown & Co., and for two years lectured on English literature before the Young Men's Christian Association. The substance of these lectures was published in 1889 as the "World's Best Books." In 1891 he was appointed lecturer in the Law School of Boston University. In 1897, without resigning his chair in Boston, he became professor of history and political science in the Kansas State Agricultural College, remaining there for two years. With the aid of his colleagues he planned a college of economic and social investigation, and at the national political and social conference in Buffalo, June, 1899, he called a special meeting of those interested in academic freedom and presented his plans. The result was the adoption of the idea by the convention, the subscription of a considerable sum and appointment of trus-

tees to organize the Ruskin College of Social Science, Trenton, Mo., in which Prof. Parsons became dean of the lecture extension department and professor of history and economics, retaining, however, his lectureship in the Law School of Boston University. This college has centers of work in Boston, New York, Chicago, St. Louis, Kansas and California, Boston and Chicago being the points at which it is planned to develop the system most completely; in addition, he is lecturer for the National Direct Legislation League; chairman of the lecture department of the Social Reform Union; president of the National League for Promoting the Public Ownership of Monopolies; director of the Industrial Brotherhood; member of the Twentieth Century Club; the American Social Science Association; the National Institute of Art, Science and Letters, and the American Academy of Political and Social Science; delegate with Henry D. Lloyd to represent American co-operators in the International Co-operative Union at the Paris exposition of 1900. His platform work is characterized by great clearness and depth of thought, abundance of striking facts and a power of humor and imagination which can be very telling when he cares to use it. He combines in high degree the power of searching analysis and broad constructiveness, the latter being the most pronounced characteristic of his mind. He has published numerous pamphlets and magazine articles on economic and sociologic subjects; is editor of "Morse on Banks and Banking"; "May on Insurance," and other texts, and author of many books. His principal writings are: "Philosophy of Mutualism" (written in 1890), which was highly commended by his friend, Phillips Brooks; "Our Country's Need; or, a Scientific System of Industry" (1894); "Compulsory Arbitration" (1897); "Rational Money" (1898); "The Telegraph Monopoly" (1896); "The People's Lumps" (1895); "The Drift of Our Century" (1897); "Legal Aspects of Monopoly" (1898); "Public Ownership of Monopolies" (1892); "The City for the People" (1900); "New Political Economy" (1899); "Power of the Ideal" (1899); "Great Movements of the 19th Century" (1901). He has contributed to Prof. Ely's books on economic and sociologic subjects and to the "Cyclopedia of Social Reform." Prof. Parsons is unmarried.

PILLSBURY, Albert Enoch, lawyer, was born at Milford, N. H., Aug. 19, 1849, son of Josiah Webster and Elizabeth (Dinsmoor) Pillsbury, and a descendant of William Pillsbury, who came from Derbyshire and settled in Newbury (now Newburyport), Mass., in 1641. His great-grandfather, Parker Pillsbury, was a soldier of the revolution, and Parker Pillsbury, distinguished as an anti-slavery orator, was his uncle. He attended the high school in his native town, Appleton Academy, New Ipswich, N. H., and Lawrence Academy, Groton, Mass., where he was graduated, and entered Harvard in 1867, but did not finish the course. He read law with James Dinsmoor, his uncle, at Sterling, Ill., and was admitted to the bar in 1870. Returning to the East, he was admitted to the Massachusetts bar in 1871 and began practicing in Boston. He was a member of the state legislature in 1876, 1877 and 1878. From the beginning he took his place among the leaders. He was elected to the senate in 1884, and twice re-elected, being president of the senate in 1885 and again in 1886. In 1891-93 he was attorney-general of the commonwealth. Mr. Pillsbury is in extensive practice as counsel for several corporations; is vice-president and a director of the United States Trust Co., and a trustee of the Franklin Savings Bank. Since 1896 he has been lecturer on constitutional law in the Law School of Boston University, and he is a member of the commission to revise the charter of the city of Boston. He is a

member of the Algonquin, Art and University clubs; of the Massachusetts, Middlesex and other political clubs; vice-president of the Massachusetts Society for the Prevention of Cruelty to Animals; a member of the American Academy of Political and Social Science, and various other scientific, charitable and literary societies. He was given an honorary degree by Harvard in 1891.

MITCHELL, Hinckley Gilbert, clergyman, educator, and author, was born at Lee, Oneida co., N. Y., Feb. 22, 1846, eldest child of James and Sarah Gilbert (Thomas) Mitchell. Barnabas Mitchell, his great-grandfather, was a soldier of the revolution in the 5th regiment of the Connecticut line, enlisting July 9, 1781, but from what part of the state is unknown. James Mitchell's mother, Catherine Hinckley, was descended from Samuel Hinckley of Plymouth colony, first of the name in this country; his wife was the daughter of John Thomas, an emigrant from Nevin, Wales, and Sarah Gilbert, a native of Philadelphia. Soon after the birth of Hinckley Mitchell, his parents removed to Prospect, N. Y., then after two years to West Branch, and finally to Remsen, in the same state. Young Mitchell was educated at Talley Seminary, Fulton, N. Y., and at Wesleyan University, Middletown, Conn., where he was graduated at the head of his class in 1873. He studied theology at Boston University, earning his own support by teaching and writing, and was graduated with honor in 1876. Midway in his theological course, Mr. Mitchell, at the suggestion of Dean Lufiner, had begun to give special attention to exegesis. He spent nearly three years at the University of Leipzig, studying with Delitzsch, Fleischer, and others, and receiving the degree of Ph.D. in 1879. Returning to the United States he joined the Central New York conference of the Methodist Episcopal church and received an appointment at Fayette, N. Y., but before he had finished the first year in the ministry he accepted a call to teach Latin and Hebrew at Wesleyan University. He continued in this position until 1883, when he was called to Boston University, where he is professor of Hebrew and Old Testament exegesis, and instructor in Assyrian languages. Prof. Mitchell wrote "Hebrew Lessons" (1884), a text book for colleges and theological schools; a commentary on the book of Amos, and another on the first twelve chapters of Isaiah, and translated from the French a work (Piepenbring's) on the theology of the Old Testament. He has contributed to the leading theological periodicals of the country, especially the "Journal of Biblical Literature," of which he was editor for six years. Prof. Mitchell was married at Springfield, Mass., June 29, 1880, to Alice, daughter of Joshua R. Stanford, of Alton, Ill. He received the degree of S. T. D.

CROSS, Charles Robert, physicist, was born at Troy, N. Y., March 29, 1848, son of George and Lucy Ann Cross. His ancestors settled at Ipswich, Mass., about 1635, and members of the family were prominent shipbuilders at Newburyport during colonial and revolutionary times. Prof. Cross studied at the Putnam School, Newburyport, and (after spending a year in teaching) at the Massachusetts Institute of Technology, where he was graduated in 1870. Immediately he was appointed instructor in physics in that institution; was promoted to be assistant professor in 1871, and full professor in 1875. In the winter of 1876-77, upon the resignation of Prof. E. C. Pickering, he was placed in charge of the department of physics. From 1878 to 1882 his principal occupation consisted in the development of the work of the institute in physics, an increasing portion of which related to the new technical applications of electricity. In 1882 at his sug-

gestion a complete course in electrical engineering was established by the corporation of the institute, of which the details as well as the general plans were laid out by him. This was the first course of the kind to be opened in this country, and was followed within a year or two by the opening of similar courses in various other institutions. During the last few years it has been the course adopted by the largest number of students in the institute. Since 18 he has been professor of physics in the College of Liberal Arts of Boston University. Prof. Cross has published numerous papers, chiefly relating to acoustics and telephony, most of which were originally published in the "Proceedings" of the American Academy of Arts and Sciences. He has given many public courses of lectures in Boston in the Lowell Institute and elsewhere, relating to physics and electrical engineering, to which subject he has given especial attention; he has also been consulted by the leading electrical corporations of the country in regard to the legal aspects of various electrical inventions. He is a fellow of the American Academy of Arts and Sciences, and a member of the Rumford committee of that society; of the American Institute of Electrical Engineers; of the American Association for the Advancement of Science, and of various other scientific bodies. He was president of the Appalachian Mountain Club in 1881; has been vice-president of the American Institute of Electrical Engineers, and presided over one of the three sections of the international congress of electricians at the Chicago World's fair in 1893. He received the degree of Ph.D. He was married, in 1873, to Marianna Pike.

ANGELL, Henry Clay, ophthalmologist and educator, was born in Providence, R. I., Jan. 27, 1829, son of Daniel and Phebe (Aldrich) Angell, and a descendant of Thomas Angell (1618-85), whose son was married to a granddaughter of Roger Williams. Through his father Dr. Angell is descended from several other founders of Rhode Island. One of his ancestors, Col. Samuel Angell, served in the French and Indian war, while Col. Israel and Col. John Angell served in the revolutionary war. He was graduated at Hahnemann Medical College, Philadelphia, in 1853, and later studied at the University of Vienna. After four years' study in the hospitals of London, Paris, Vienna and Berlin, he settled in Boston. On the foundation of Boston University he became professor of ophthalmology in its medical school, and held the position for twenty years. His technical writings include: "Diseases of the Eye" (7th ed., 1892), and "How to Take Care of Our Eyes" (1880; 4th ed., 1890). He is the author of "Records of William Morris Hunt" (1879) and of papers on art topics in the "Atlantic Monthly" and the "American Art Review." He has devoted considerable time to making a collection of pictures of the Barbizon school. In his own words, he is "an amateur painter, an amateur musician and an amateur farmer"; was president of the Philharmonic Society of Boston, and is an honorary member of the New Hampshire Historical Society, and several organizations of similar nature; also a member of the St. Botolph Club, of Boston. Dr. Angell was married, in Boston, Mass., in 1859, to Martha J., daughter of Levi and Charissa (Walter) Bartlett, and grandniece of Josiah Bartlett, of New Hampshire, signer of the Declaration of Independence.

WHARTON, Francis, lawyer and author, was born in Philadelphia, Pa., March 7, 1820, son of Thomas Isaac and Arabella (Griffith) Wharton and descendant of Thomas Wharton, of Westmorland, England, who emigrated to Pennsylvania about 1683. His father was an eminent lawyer, one of the revisers of the civil code of Pennsylvania, and author of a number of legal works, including "Reports of Cases in the Supreme Court of Pennsylvania." Francis Wharton was graduated at Yale in 1839, was admitted to the bar in 1843, and practiced law in Philadelphia for thirteen years, being assistant attorney-general in 1845. In 1856-63 he was professor of logic, rhetoric, English literature and history in Kenyon College, Ohio; in 1862 was ordained deacon in the Protestant Episcopal Church by Bishop Bedell, at Cleveland, and in 1863 was ordained priest, and took charge of St. Paul's Church, Brookline, Mass. In 1877 the Episcopal Theological School was established at Cambridge, and he was appointed professor of ecclesiastical polity, homiletics and pastoral care. He held this position until 1882, having meantime (1869) resigned his rectorship. Mr. Wharton became the leading authority on international law in this country, and lectured on that subject in the law school of Boston University. In March, 1885, he was appointed solicitor for the department of state. Accordingly, he removed to Washington, and resided there until his death. In 1888, by resolution of congress, he was appointed supervisor of a new edition of the diplomatic correspondence of the United States in the revolutionary period, but did not live to finish his work. He was a voluminous writer. His principal works were: "Treatise on the Criminal Law of the United States" (1846; 7th ed., 3 vols., 1874); "Precedents of Indictments and Pleas" (1849); "Treatise on the Law of Homicide in the United States" (1855); "Treatise on Medical Jurisprudence" with Dr. M. Stillé (1855; 2d ed., with additions by A. Stillé, 1869); "Treatise on the Conflict of Laws" (1872); "Commentary on the Law of Evidence in Civil Issues" (2 vols., 1877); "Commentary on the Law of Contracts" (2 vols., 1882); "Digest of the International Law of the United States" (3 vols., 1886). Several of his works were translated into German and Spanish. The degree of LL.D. was conferred upon him by Kenyon College in 1865, and by the University of Edinburgh in 1883, and the degree of D.D. by Kenyon in 1866. Dr. Wharton was married in Philadelphia, in 1853, to Sidney, daughter of Comegys Paul, of that city. She died in 1854, and in 1860 he was married to Helen, daughter of Lewis R. and Mary (Hazlehurst) Ashurst. Dr. Wharton died in Washington, D. C., Feb. 21, 1889.

BIGELOW, Melville Madison, lawyer, was born near Eaton Rapids, Mich., Aug. 2, 1846, son of William and Daphne (Mattison) Bigelow. His father was a clergyman, and the son inherited a love of learning and a taste for literature. He was educated at the University of Michigan, where he was graduated in 1866, and at Harvard University, where he took the double degree of Ph.D. and A.M., in 1879. The honorary degree of LL.D. was conferred upon him by the Northwestern University, Evanston, Ill., in 1896. He was admitted to the bar in 1868. He is a professor of law in Boston University, and also has delivered law lectures at the University of Michigan and the Northwestern University. He is the author of a number of works on legal subjects, including "Law of Estoppel" (5th ed., 1890); "Law of Fraud" (2 vols., 1888, 1890); "Law of Torts" (7th ed., 1901); "History of Procedure in England" (London, 1880); "The Law of Bills, Notes and Cheques" (2d ed., 1900), and "The Law of Wills" (1898). His "Law of Torts" was adopted as a textbook by the law school of the University of Cam-

bridge, England, and afterwards republished there by the University Press, as edited by the author. It is believed to be the first instance of the adoption of an American law book by an English university. This and other works have given him a wide reputation as a writer. Mr. Bigelow, in addition, is editor of "Pacifica Anglo-Normannica" (London, 1879); Story's "Equity Jurisprudence" (13th ed., 1886); "Story on the Constitution" (4th ed., 1891), and "Jarman on Wills" (6th ed. under the international copyright law). He is a member of the Massachusetts Historical Society and of several other learned societies, also of the Society of Colonial Wars and of the Sons of the American Revolution. He is well known in Europe, and has three times been made an honorary member (1889, 1894, and 1897) of the Athenæum Club of London, the leading literary club of Great Britain. He was married, in 1869, to Elizabeth Chamberlin, daughter of the late Hon. Alfred Bragg, of Milford, Mass. She died in 1881, leaving a son, Leslie Melville, who is still living. In 1883 Dr. Bigelow was married to Cornelia Frothingham Read, who died in 1892. In 1898 he was married to Alice Bradford, daughter of Dr. George S. Woodman.

JAMES, Thomas Chalkley, physician, was born in Philadelphia, Pa., in 1766, son of Abel and Mary (Chalkley) James, who were Quakers, of Welsh origin. His father was a prominent merchant in Philadelphia, and at one time a member of the provisional assembly; his mother was a daughter of Thomas Chalkley, the Quaker preacher. He was educated at the Friends' School, and studied medicine at the University of Pennsylvania, where he was graduated in 1787. After serving for a year as surgeon on an East Indianman, bound on a trip to Canton, China, he went to London and Edinburgh, where he completed his studies in 1793. On his return to America, in that year, he began practicing in Philadelphia, rendering important service during the terrible epidemic of yellow fever that scourged the city in the fall. In 1803 he established the School of Obstetrics in that city; was for twenty-five years physician and obstetrician in the Pennsylvania Hospital; was for some years president of the Philadelphia College of Physicians, and from 1811 to 1844 was professor of obstetrics in the University of Pennsylvania. He was associate editor of the "Eclectic Repertory," a medical journal, during its eleven years of existence. He edited Brus's "Principles of Midwifery," making many valuable additions to it, and he also annotated Merriman's "Synopsis," using both of these works as text-books in his classes. In 1801, under the signature "P. D.," he contributed to the "Portfolio" some excellent translations of the "Idyls" of Gessner. Dr. James was the founder of the Pennsylvania Historical Society. He died in Philadelphia, Pa., July 25, 1835.

ADAMS, Andrew, jurist, was born at Stratford, Fairfield co., Conn., Dec. 11, 1736, son of Samuel and Mary (Fairchild) Adams. He was graduated at Yale College in 1760; adopted the profession of the law, and for a time practiced at Stamford, finally removing to Litchfield in 1774, where he became king's attorney. He was major of militia at the outbreak of the Revolutionary war, and later, but for a short time only, lieutenant-colonel. He was one of the governor's assistants; a member of the legislature from 1776 to 1781, and several times speaker; a member of the council of safety; a delegate from Connecticut to the Continental congress in 1777-78, 1779-80, and again in 1781-82. In 1789 he was appointed a judge of the supreme court of Connecticut, and in 1793 chief-justice of that court. He received from Yale College the degree of LL.D. Judge Adams died at Litchfield, Nov. 26, 1799.

O'NEILL, James, actor, was born in county Kilkenny, Ireland, Oct. 14, 1847, son of Edmund and Mary (O'Neill) O'Neill. With his parents he came to the United States in 1850, and settled in Buffalo, N. Y., where he began his education in the public schools. Upon the death of his father he worked at the machinists' trade for two years. Discovering remarkable histrionic gifts he went to Cincinnati in 1865, and studied under an actor named Seamon, then a member of the stock company at the National Theatre. He made his first appearance at the National Theatre, in that city in 1867, as one of the lords in "The Colleen Bawn." The rôle was a very small one, but the young actor gave satisfaction; later he played occasional small parts and finished the season as "utility man" on the regular list. In 1868 he played "utility" parts at the Variety Theatre, St. Louis; in 1869 he again appeared at the National Theatre, Cincinnati, and in 1870 joined John T. Ford's company in Baltimore, playing both juvenile and leading parts throughout the South, distinguishing himself as Hotspur to Hackett's Falstaff. In 1871 he was engaged as leading man by John A. Ellsler at the Academy of Music, Cleveland. His rapid advance was largely due to the fact that he never had understudied some fifty parts which he never was called upon to act. His work in Cleveland gave him added reputation, and he became leading man at McVicker's Theatre, Chicago, for two seasons. In 1874 he formed the famous Hooley Comedy Co. in Chicago, with such artists as Harry Murdoch, William H. Crane, Nate Salisbury, John Webster, Fred Williams, Louise Hawthorne and Clara Fisher Maeder. The company became renowned for brilliant presentations of contemporary drama and for its Shakespearean Saturday nights, when Mr. O'Neill appeared in a number of rôles. His most notable part was Othello, which was declared by the critics as fully equal to the best portrayals of the jealous Moor. In 1876 he became leading man at the Union Square Theatre, New York, where he created the parts in America of

Pierre Frochard in "The Two Orphans," and Valdimir in "The Danichells." In 1878 he returned to San Francisco in "A Celebrated Case" under the management of A. M. Palmer and remained in that city until 1881, appearing in Salmi Morse's "Passion Play." While this play excited strong religious opposition, which resulted in its withdrawal, Mr. O'Neill earned high praise for his reverent and tragic power. The manager, Henry E. Abbey, intended to produce it in New York city, but again religious sentiment prevailed and the production was abandoned. In 1881 Mr. O'Neill appeared

at Booth's Theatre, New York, as Enoch Arden, alternating nights with Salvini. In 1882, with his own company, he produced "An American King," which greatly increased his reputation. With this and "A Celebrated Case" he made an extended southern tour. In February, 1883, he produced at Booth's Theatre "Monte Cristo," which proved a continued success. In addition to "Monte Cristo," he has produced "The Dead Heart," "Fontenelle" and "When Greek Meets Greek." He has also revived "Virginias," "Hamlet" and "The Three Guardsmen." Mr. O'Neill adds to striking natural gifts of face, form

and voice the art acquired by deep study and conscientious work. As a romantic actor and a tragedian he is in the front rank of his profession and in the ripe prime of his powers. He was married, in 1877, to Ella, daughter of Thomas J. Quinlan, of Cleveland, O.

BRYANT, Frank Augustus, physician, was born at North Jackson, Susquehanna co., Pa., Oct. 18, 1851, son of Chauncey E. and Hannah A. (Corse) Bryant, of English descent. His great-grandfather, Capt. Daniel C. Bryant, and his grandfather, Samuel Bryant, with his five brothers, served in the war of the revolution, and the war of 1812; and his father, Chauncey E. Bryant, as a member of the 112th Pennsylvania volunteers, in the civil war. He was educated in the district schools of North Jackson, Pa., and at the age of sixteen completed the course at the Windsor Academy, Windsor, N. Y. The death of his mother when he was but ten years of age, and his father's absence in the service of his country, threw him on his own resources, and his studies were much interrupted that he might earn a livelihood. He worked successively on the farm, as a clerk in a country store and in various mechanical occupations. He was ambitious to enter business or professional life, but a severe impediment in speech, inherited from his father, prevented this. In 1879

he attended the American Vocal Institute in New York city, a school for the correction of speech defects, and such was his interest in the subject that in the following year he became a teacher and equal partner in the institution. While pursuing this occupation, he attended the evening classes in elocution at Cooper Union, and continued study in other branches. He left New York in 1882, and during the next five years continued his studies and work for the practical correction of vocal defects in various parts of the country. He realized his long cherished desire to study medicine in 1892, and after a three years' course at Bellevue Hospital College, was graduated in 1895. With the added advantages of a thorough professional training, he was enabled to formulate and to arrive at a definite and intelligent theory of speech defects. Unlike many teachers in his specialty, he discarded the idea of a fundamental difference between stuttering and stammering, regarding both as nervous habits resulting from lack of co-ordination in the speech centres of the brain. He also discarded the continuous use of any of the various methods then in vogue, and taught his pupils that there is only one correct way of using the speech organs, viz.: by putting into practice the rules and principles that underlie and govern the art of speech, and in this way avoiding the violation, known as stammering. He also introduced the theory that the will power should be developed and directed to the control of the diaphragm and other muscles of respiration, vocalization and articulation. Since 1887 he has conducted the Bryant School for Stammering in New York city. Dr. Bryant has contributed to medical and scientific literature on subjects connected with his specialty. He has a wide reputation, and has frequently been called in consultation by other physicians, especially in nervous affections concerning speech. He is a member of the New York County Medical Association, and enjoys the confidence and respect of the profession generally. In 1871 Dr. Bryant was married to Miranda S., daughter of Alvan P. Mitchell, of Hollisterville, Pa. She died in 1888, leaving two sons, who aid their father in his work.

Frank Augustus Bryant

James O'Neill

SULLIVAN, George, congressman, was born at Durham, N. H., Aug. 29, 1772, son of John and Lydia (Wooster) Sullivan. His father was a revolutionary soldier and was president of New Hampshire in 1786-88 and 1789-90. James Sullivan, governor of Massachusetts, was his uncle. His grandfather, Owen Sullivan (b. 1691; d. 1796), was a native of Kerry county, Ireland, who emigrated to America in 1723, first settling at Somersworth, N. H., and later at Berwick, Me. He was a man of liberal education, speaking five languages. George Sullivan was graduated at Harvard University, in 1790, and after pursuing his studies at the law school commenced practice at Exeter, N. H., in 1794, continuing for more than forty years, and acquiring a high reputation. He was county solicitor from 1802 to 1804, attorney-general from 1805 to 1807, and again from 1815 to 1835. He served as a representative in the general court in 1805 and 1813, and in 1811 was elected to the U. S. congress, serving for four years, and declining a further election. In 1814 and 1815 he also served as a member of the state senate. Throughout his career he was highly esteemed for his talents and public usefulness. He was married twice; the second time to Philippa Call, of Newburyport, Mass. He died at Exeter, N. H., June 14, 1858.

RODGERS, William Baker, lawyer, was born in Coles county, Ill., Jan. 7, 1865, son of John White and Margaret Elizabeth (Gill-
lenwaters) Rodgers, of Scotch-Irish descent. His father was a farmer in moderate circumstances. His early education was obtained in the public schools, and in 1884 he entered Lincoln University, Lincoln, Ill., where he obtained his collegiate education. Subsequently he studied law at Cumberland University, Lebanon, Tenn., where he was graduated in 1891.

The same year Mr. Rodgers went to Montana and began to practice law at Phillipsburg. In 1892 he was joined by his brother, Hiram W. Rodgers, from Illinois, and they immediately formed a partnership, with offices at Deer Lodge and Phillipsburg; the firm's present office is at Anaconda. They have been very successful, being engaged as counsel in much important litigation, and have a large and growing business. Mr. Rodgers early took an interest in politics, and in 1892 was elected attorney of Deer Lodge county as the candidate of the Republican party, although the county was then largely Democratic. In 1894 he was elected to the legislature and served on the judiciary committee, the committee of ways and means, and as chairman of the committee of state boards and officers. In October, 1897, he was appointed assistant U. S. attorney for the district of Montana, and his services proving highly satisfactory, he received the appointment as U. S. attorney in February, 1898, which position he still occupies (1901). He is a Royal Arch Mason, a member of the Knights of Pythias, and of the Alpha Tau Omega college fraternity. He was married, on June 17, 1896, to Alice, daughter of William D. and Elizabeth (Shepherd) Knowles, of Petersburg, Ill. They have one child.

HAWES, Joel, clergyman and author, was born at Medway, Mass., Dec. 22, 1789. His parents were in poor circumstances, and he had few educational advantages in his early youth. By perseverance and force of ability he surmounted all obstacles, and after graduating at Brown University, in 1813,

he pursued a theological course at Andover; was ordained to the Congregational ministry, and settled as pastor of the First Congregational Church of Hartford, Conn., March 4, 1818. He early acquired distinction as an author and a preacher of no mean ability, and throughout his long and useful pastorate, for he remained at Hartford until his death, he was largely occupied with literary work. His "Lectures to Young Men on Character and Reading," were popular, both in England and America, 100,000 copies having circulated in the United States alone. He published in 1830 "A Tribute to the Memory of the Pilgrims, and a Vindication of the Congregational Church in New England," consisting of six lectures in which the constitution and order of the primitive churches, the origin of the Congregational churches of New England, and the character of the Pilgrims were set forth from a Puritan point of view. "These topics," says the "Quarterly Christian Spectator," "have been treated by one who sincerely believes and cordially loves the principles, character, and institutions of our Pilgrim Fathers, and they have been handled with ability and in the spirit of Christian candor. The author loves truth, and seeks it diligently; judges with discrimination, and presents the result of all his studies in a style of great simplicity and perspicuity." He published besides numerous sermons in the "National Preacher" and elsewhere, and frequent contributions to the "Quarterly Reviews" and the religious press, the following works: "Memoir of Normand Smith" (1839); "Character Everything to the Young" (1843); "Religions of the East, with Impressions of Foreign Travel" (1845); "Looking-Glass for the Ladies" (1845); "Washington and Jay" (1850); "Letters on Universalism"; "Century Address, Delivered at Hartford, Nov. 9, 1835"; "An Offering to Home Missionaries" (1865); "Reminiscences of Revivals of Religion in the First Church at Hartford, Conn." (1865); "Sermons, Experimental and Practical" (1866). His daughter, Mary Elizabeth, became the wife of Rev. Henry J. Van Lennep, a well-known missionary in Turkey. Dr. Hawes died at Gilead, Conn., June 5, 1867.

McMAHON, John Van Laer, lawyer and historian, was born at Cumberland, Md., Oct. 18, 1806, son of Nathan McMahon, of Scotch-Irish ancestry. His mother was a sister of Matthew Van Laer, of Williamsport, Md. The son was graduated at Princeton College, in 1817, taking the highest honors; he then studied law, and was admitted to the bar in 1821. He was shortly after elected to the state legislature from Allegheny county, and became the recognized leader of that body, taking a memorable stand in favor of granting equality of civil rights to the Hebrew. His success at the bar was immediate, and it is said of him that he never lost a case, while he was known as the most popular orator in Maryland, being possessed of a commanding presence, a superb voice and a high order of eloquence. In 1826 he removed to Baltimore, and was twice again elected to the legislature as a Jackson Democrat. Although he had contributed more than any other to the prosperity of the Jackson party, he finally left it on account of the United States Bank question. During the "Log Cabin" and "Hard Cider" campaign of 1840, he was chairman of an immense ratification meeting at which Henry Clay and Daniel Webster were present, and opened the proceedings by saying: "Let the nation come to order. The mountains have sent forth their rills; the hillsides their streams; the valleys their rivers; and lo, the avalanche of the people is here." He drew the charter of the Baltimore and Ohio railroad, the first incorporating act of the kind ever prepared in this country, and was for several years counsel for the railroad. For some reason he refused many tenders

William B. Rodgers

of office, among them a callinet appointment, a U. S. senatorship, when only his consent was necessary for his election, and positions on the bench. He would never make a speech outside his native state. The failure of his eyesight compelled him to relinquish his profession about 1855, and much of his later life was spent in Ohio. St. John's College, Annapolis, gave him the degree of LL.D., in 1869. He published, in 1831, "An Historical View of Maryland," which is a standard authority on the early history of the province of Baltimore. In general he was reserved, dignified and rather austere, but the verdict of his contemporaries was that "McMahon possessed extraordinary gifts as a lawyer and one of the finest intellects that ever adorned the bar." He was never married, and died at Cumberland, Md., June 15, 1871.

HERNBEL, William, president of the Academy of Natural Sciences, was born at Philadelphia, Pa., Sept. 24, 1764, received a liberal education, and studied medicine. He served as a surgeon in the revolutionary army in Virginia, but becoming afflicted with deafness he refused to apply for the diploma to which his attainments in medicine had fully entitled him, under the idea that his infirmity incapacitated him. Practicing gratuitously among the poor of Philadelphia, he was known far and wide, and his benevolence in other ways made him prominent. He was an ardent student of chemistry and was president of the Academy of Natural Sciences 1840-49, resigning in the latter year on account of infirmities. He was for a great number of years an active member of the Humane Society for the Recovery of Drowned Persons. Mr. Hernbel died in Philadelphia, June 12, 1851.

ALLEN, John W., lawyer and congressman, was born at Litchfield, Conn., in 1802, son of John Allen, a native of Great Barrington, Mass., who was a lawyer by profession, and after his removal to Connecticut, represented that state in the last congress held in Philadelphia. The son left Litchfield at the age of sixteen, going to Chenango county, N. Y., where he received a fair classical education and studied law. He settled in Cleveland, O., in 1825, and in the following year began to practice his profession. From 1821 to 1835 inclusive, he was annually elected president of the village corporation, and was a member of the senate of Ohio from 1835 to 1837. In 1841 he was mayor of Cleveland. He was elected a representative in congress in 1837-41, serving as a member of the committee on the militia and military affairs. In 1847 he was largely instrumental in procuring the legislative charter for the Cleveland, Columbus and Cincinnati railroad, and became the first president of the company. He was, for a time, one of the five state commissioners charged with the management of the State Bank of Ohio. In 1850 he was appointed by the legislature agent of the state to investigate the claims of Ohio against the United States, growing out of the grants of land in aid of canals, a commission which kept him in Washington, D. C., for five years, and in which he was very successful. In 1870 he received from Pres. Grant the appointment of postmaster of Cleveland, and again in 1874, serving in this capacity until 1875, when he resigned. He was married, first, to Ann Maria Perkins, of Warren, O.; second, to Harriet C. Mather, of New London county, Conn., by whom he had two sons and two daughters.

PRATT, Daniel Darwin, senator, was born in Palermo, Waldo co., Me., Oct. 23, 1813, son of Daniel and Sarah Rogers (Hill) Pratt. His father (b. 1780; d. 1864), was a practicing physician of Maine, and the son of David Pratt, a soldier of the revolution. When a child he removed, with his parents, to Fenner, Madison co., N. Y. His early

education was received in the seminary at Cazenovia, N. Y., and at Hamilton College, where he was graduated in 1831 with the valedictory. In 1832 he went to Indiana, where he taught school, and in 1834, removing to Indianapolis, wrote in the office of the secretary of state, and studied law. In 1836 he settled at Logansport, Ind., where he commenced the practice of his profession, and acquired much local fame as an orator. In 1851 and 1853 he was elected to the state legislature; in 1860 was a delegate to the Chicago convention, officiating as leading secretary, and in 1868 was elected a representative from Indiana to the 11st congress. In January, 1869, he was elected a senator in congress for the term ending in 1875, serving on the committees on pensions, claims, and District of Columbia. In May, 1875, he was appointed, by Pres. Grant, commissioner of internal revenue, remaining in office until August, 1876. The degree of LL.D. was conferred upon him by Hamilton College in 1872. He was married, Nov. 28, 1839, to Sophia J. James, of Rising Sun, Ind. She died in 1861, and he was married the second time, May 22, 1865, to Jane Warren. His death occurred at Logansport, Ind., June 17, 1877.

BOTSFORD, Elmer Francis, lawyer, was born at Burke, Franklin co., N. Y., Nov. 24, 1861, son of Henry and Jennie (Bromley) Botsford. He was graduated at Dartmouth in 1886, meanwhile teaching school and studying law with Beckwith, Barnard & Wheeler, of Plattsburg, N. Y. Being admitted to the bar in 1889, he opened an office at Plattsburg, later forming a partnership with George H. Beckwith under the firm name of Beckwith & Botsford, since which time he has continued to practice in the same place, the firm name at present being Botsford, Merrilow & Allen. For several years he was corporation counsel for the city, and he is now (1901) attorney and director of the First National Bank of Plattsburg; director of the New York Building, Loan and Banking Co.; secretary, treasurer and managing director of the Joseph Ludue Mining and Development Co., of Yukon, and secretary, treasurer and director of the Ludue Yukon Transportation Co. Mr. Botsford has made three trips through Alaska and the Klondike region, and he is attorney for Joseph Ludue, founder of Dawson City and for the Dawson Town Site Co., at Dawson, Canada. He is a member of the Lake-Side Club, Plattsburg; Transportation Club, New York city; Dartmouth College Club; Psi Upsilon Club; Dartmouth Alumni Association of New York city; Frontier Lodge 71, F. & A. M., Franklin, Vt.; the Oriental Temple, Troy, N. Y. He is a Knight Templar, also a Fellow of the American Geographical Society. He was married, June 29, 1892, to Katherine L., daughter of Emory M. and Mary B. Lyon, and has one child, Benedict Lyon Botsford.

KNAPP, Chauncey L., congressman, was born at Berlin, Washington co., Vt., Feb. 26, 1809. He commenced active public life by serving an apprenticeship of seven years in a printing office in Montpelier, and was elected reporter for the legislature in 1833. For some years he was co-proprietor

and editor of the "State Journal." To him was awarded the credit, while editing the "Journal," of first nominating Gen. Harrison for the presidency, which resulted in his obtaining the electoral votes of Vermont four years before he was really elected. He was elected secretary of state in 1836, in which capacity he served for four years; removing to Massachusetts he was elected secretary of the state senate in 1851, and was elected a representative to the 34th congress. He was re-elected to the 35th congress, and was a member of the committee on territories. Mr. Knapp's tastes led him to the study of mechanics, and in all his public positions he paid particular attention to the mechanical interests of his constituents.

CARTER, Leon Marks, banker and financier, was born at Shreveport, La., July 11, 1855, son of Louis Everett and Bettie Hunter (Raney) Carter. At an early age he evinced a decided taste for finance, and in 1879 began independently a drug business. This has so developed that it commands the leading markets of northern Louisiana, both wholesale and retail. It is now incorporated under the name of the Leon M. Carter Drug Co., of which Mr. Carter is president. Two other large mercantile establishments have been advanced to foremost positions in north Louisiana by Mr. Carter:

the Pleasant Hardware Co. and the Leon M. Carter jewelry establishment. Besides having the care of these extensive interests he is president of the Merchants' and Farmers' Bank of Shreveport, La. For eleven years he served as deputy internal revenue collector for the district of northern Louisiana. He was also collector of the port at Shreveport until that office was abandoned there. Mr. Carter is regarded as one of Shreveport's most progressive citizens, and is always a leader in enterprises which tend to advance the interests of that city. Although a Republican, he claims among his closest friends many of the leading Democrats of the state. He was married, July 8,

1879, to Mattie Leonard, daughter of Porter Parsons, of one of the best known and most honorable families of the South.

LAW, John, jurist, was born at New London, Conn., in 1796, son of Lyman Law, who was a lawyer and congressman; grandson of Richard Law, an eminent jurist, of Connecticut; and great-grandson of Jonathan Law, chief-justice of the supreme court of that state, and colonial governor from 1741 until his death, which occurred in 1750. He was graduated at Yale College in 1814; studied law, and was admitted to practice in the supreme court of Connecticut in 1817. Soon afterward he emigrated to the new state of Indiana, and settled at Vincennes. Law in a short time was elected prosecuting attorney, and in 1823 a member of the legislature. Refusing a re-nomination, he was again elected attorney for his district, and held that position until promoted to a judgeship, which office he held by re-elections for eight years. In 1838 he was appointed, by Pres. Van Buren, receiver of public moneys at Vincennes, and held the office for four years. In 1851 Judge Law removed to Evansville, and, with three others, purchased 700 acres of land adjoining that place, and laid out the town of Lamasco. In 1855 he was appointed, by Pres. Pierce, judge of the court of land claims, to adjudicate the claims of the old inhabitants of Indiana and

Illinois, and was reappointed in 1856. In 1860 he was elected a representative from Indiana to the 37th congress, where he served on the committees on the library and on revolutionary pensions. He was re-elected to the 38th congress, serving during this term on the committees on agriculture and revolutionary pensions, and the select committee on emigration. As chairman of the committee on pensions, he drew up and reported the bill giving to the soldiers of the revolution, of whom only twelve survived, one hundred dollars per annum, which bill passed unanimously. Judge Law was partial to historical studies, and was president of the State Historical Society for several years. His address on the "Colonial History of Vincennes," first delivered before the Vincennes Historical Society, was published in 1839, a new edition, with additional notes and illustrations, appearing in 1858. Amasa Learned, who was his grandfather on his mother's side, was in the first congress that sat under the constitution. He died at Evansville, Ind., Oct. 7, 1873.

PIRCE, William Almy, congressman, was born at Scituate, R. I., Feb. 29, 1824, son of Benjamin and Abigail (Johnson) Pirce. His father, who died in 1868, was a farmer, a cotton mill-owner, and for several years a representative in the general assembly of Rhode Island. The son attended district schools, and worked in mills and on the farm, alternately, until he was eighteen years old, when he attended the Smithville Seminary, now Lapham Institute. After that he taught schools in the district, and for ten years had charge of the store and counting-room of the company of which his father was a member. In 1854 he commenced the manufacture of cotton goods on his own account, and continued in the business until 1863. In 1855 he was elected a state senator, and in 1858 and 1862 was elected a representative in the Rhode Island legislature. In the latter year he was appointed, by Pres. Lincoln, assessor of internal revenue for the 2d district of Rhode Island, which position he held until the office was abolished in May, 1873, when he devoted his attention to farming, in addition to political and official duties. In 1879 he was again elected a member of the state house of representatives, being re-elected in 1880 and 1881. To the state senate he was again elected in 1882. Mr. Pirce served as chairman of the Rhode Island delegation to the Republican national convention of 1880, and member of the Republican national committee in 1880 and 1884; was a member of the Republican state committee for twenty-two years, and its chairman for fourteen years. In the district convention of 1880, to nominate a candidate for the 47th congress, he had a plurality of votes until the sixty-eighth ballot, when he withdrew his name and nominated the successful candidate. In 1884 he was elected a representative from Rhode Island to the 49th congress. During the civil war he was appointed (1863) a paymaster, with the rank of major, on the staff of Maj.-Gen. Gould, commanding the state militia. He was married, Jan. 1, 1865, to Asenath S., daughter of James and Abigail (Colwell) Aldrich, of Scituate, R. I., and had four children: Mary Elizabeth C., William B., James A. and Abby A. Pirce.

KNICKERBOCKER, Herman, lawyer, was born in Albany, N. Y., July 27, 1782, son of Johannes Knickerbocker, who was a colonel in the revolution, and afterward represented Rensselaer county in the legislature. His grandfather, Herman Jansen Knickerbocker, of Friesland, Holland, was one of the original emigrants to New York. The grandson received a good classical education, studied law, and began to practice in Albany, removing from there to Schaghticoke, N. Y., upon inheriting a large estate. He early engaged in politics, and was

Leon M. Carter.

a member of congress from 1809 to 1811, as a Federalist, but during Pres. Jackson's administration he became a Democrat. In 1816 he was chosen to the state assembly, and he also filled the office of judge of his county. Washington Irving alluded to him as "my cousin, the congressman," in the preface to his "Knickerbocker's History," and, on visiting Washington, presented him to Pres. Madison as "Diederick Knickerbocker, the great historian of New York." On account of his lavish hospitality, he was called the "Prince of Schaghticoke." Observing the time-honored custom of his family, he entertained the mayor and council of Albany annually at his mansion. He was particularly fond of practical jokes, some of which were extremely ludicrous in their consequences. In his latter years he became financially embarrassed. He died at Williamsburg, N. Y., Jan. 30, 1855. His son, David Buel, was consecrated Protestant Episcopal bishop of Indiana in 1883.

BIGGS, Asa, jurist, was born at Williamstown, Martin co., N. C., Feb. 4, 1811. He was educated at an academy, and, after serving as a merchant's clerk, studied law, and was admitted to the bar in 1831. In 1835 he was elected a member of the constitutional convention of that state; in 1840, 1842 and 1844 was elected to the state legislature, and was chosen a member of the 29th congress. In 1850 he was one of the three commissioners appointed to revise the statutes of the state, the new code going into effect in 1854. In the latter year he was again elected to the state senate, and was also chosen a senator in congress in 1854 for six years, but resigned, May, 1858, to accept the appointment of judge of the U. S. district court of North Carolina. He held this office until the beginning of the civil war, when, in May, 1861, he was elected to the state convention that passed the ordinance of secession. After the war he resumed the practice of law, and subsequently engaged in the commission business at Norfolk, Va., where he died, March 6, 1878.

JOHNSON, Philip, lawyer and congressman, was born in Warren county, N. J., Jan. 17, 1818. His grandfather was a soldier in the revolutionary war. In 1839 he removed with his father to Pennsylvania, settling in Northampton county. He was educated at Lafayette College, where he spent two years, 1842-44, after which he taught school in Mississippi for two years. On his return home he studied law; was admitted to the bar at Easton, Pa., in 1848; soon afterwards was elected clerk of the court of sessions and of oyer and terminer, and in 1853-54 was a member of the state assembly. In 1857 he was chairman of the Democratic state convention; in 1859 was the revenue commissioner for the third judicial district of the state, and in 1860 was elected a representative from Pennsylvania to the 37th congress, serving on the committees on roads and canals, and on patents. He was re-elected to the 38th congress, and was a member of the committee on territories. He was a delegate to the Chicago convention of 1864, and was re-elected to the 39th congress, serving on the committees on the post-office and post roads, and expenditures on the public buildings. He died in Washington, Jan. 31, 1867.

FAIR, James Graham, senator, was born near Belfast, Ireland, Dec. 3, 1831. His parents emigrated to the United States in 1843, and settled at Geneva, Ill., where he attended the public schools. He completed his studies in Chicago, receiving a thorough business education, and paying special attention to chemistry and mathematics. In 1849 he joined the rush to the newly discovered gold fields of California, and while crossing the plains displayed such shrewdness, coolness, practical wisdom and endurance, that, young as he was, the leadership was tacitly accorded to him. Upon his arrival he engaged

in mining on Feather river; but, realizing that surface digging would soon be exhausted, he began extensive tunneling operations to develop the ore bodies which supplied the surface diggings. In 1853 he turned his attention to agriculture in Petaluma, but soon returned to mining, in which, as a practical and scientific operator, he never had a superior. When the Comstock lode in Nevada was discovered, Mr. Fair removed to Virginia city, and became interested in silver mining, in which his fortune was amassed. He was superintendent of the Ophir mine in 1865, and of the Hale and Norcross in 1867, and meanwhile became interested in many other of the large mining companies. In 1867 Mr. Fair formed a partnership with John W. Mackey, James C. Flood and William T. O'Brien, to engage in mining enterprises. The first venture of this firm was wresting the control of the Hale and Norcross mine from the Bank of California, and making it dividend paying. They subsequently secured thirteen other mines, including the famous California and Consolidated Virginia mine, from the Bank of California, together with the Union Mill and Mining Co., organized by Messrs. Ralston & Sharon. The firm then developed their properties and opened the three "bonanzas," which produced \$357,000,000, most of which was divided between the respective partners. It was to Mr. Fair's executive mind and untiring energy that these enormous results were possible.

He had a wonderful instinct for determining the localities of ore deposits, a genius for devising appliances for accomplishing his ends, and a rare administrative ability which kept both men and machinery in perfect working order. His prominence in the state of Nevada resulted in his being sent to the U. S. senate in 1881, to succeed Sen. Sharon, where he exerted a strong influence in furthering silver legislation. He was made a member of several important committees, and his keen intelligence and broad practical information made his speeches terse, clear and pertinent. With his associates he established the Nevada Bank with a capital of \$10,000,000, but in 1886, on withdrawing from mining interests, he also retired from the bank. When, however, his late associates became involved in ruinous wheat speculations, Mr. Fair's sympathies were aroused and he advanced all the money needed for the restoration of the bank, which was reorganized with himself as president. The re-establishment of the credit of a gigantic corporation in a moment, and his subsequent management by which he cleaned up the famous wheat deal and extricated the bank from its unfortunate predicament, were considered to be some of the greatest feats of financiering the world had ever seen. His health became broken from unremitting attention to business, and after a short illness he died in San Francisco, Dec. 28, 1894. He left a son and two daughters, one of whom, Theresa Alice, was married to Herman Oelrichs, of New York.

JOHNSON, Sarah (Barclay), author, was born in Albemarle county, Va., in 1837, daughter of Dr. James T. Barclay. Her education was received under the direction of her father, a missionary, who was for some time stationed at Jerusalem, of which he wrote a description entitled, "The City of the Great King" (1857). For this book his daughter, who accompanied him on his mission, drew most of the illustrations. She was married, in 1856, to J. Augustus Johnson, U. S. consul-general in

James H. Fair

Syria, and with him lived many years in that country, where she wrote her only published volume, "The Hadji in Syria" (1858), which became exceedingly popular. Returning to America, she made her home in New York city until 1883, when she removed to Greenwich, Conn., where her death occurred, April 21, 1885. Her son, Barclay Johnson, who was born in 1862, was a young man of great promise, having graduated at Yale at the head of his class, contributed to periodicals, and published an address on education (1884); but he died at the age of twenty-three.

KANE, John Kintzing, jurist, was born in Albany, N. Y., May 16, 1795. He was graduated at Yale College in 1814, after which he studied law with Joseph Hopkinson, and was admitted to the bar in 1817. Settling in Philadelphia, he manifested an interest in political questions, and identifying himself with the Federalist party, was elected to the state legislature in 1823. He was elected by the Democrats in 1828 as solicitor of Philadelphia, and served two years. During the campaign of 1828 he supported the cause of Andrew Jackson with marked ability. In 1832 he was appointed a member of the board of three commissioners to settle certain claims with France, and besides preparing the report of the board, he published notes on questions decided by that body in 1836. He enjoyed the friendship of Pres.

Jackson, and was the author of a memorable letter addressed by the latter to James K. Polk, during the campaign of 1844. The first printed attack on the U. S. Bank was written by him, and several portions of messages and public utterances of the president were supposed to have been from his pen; so that in Philadelphia, which was the stronghold of the bank party, he was for a short period under social proscription. During what was termed the "Buckshot" war in Pennsylvania, he was the principal strategist of the Democratic party. In 1845 he was appointed attorney-general of Pennsylvania, but resigned the office in the following

year, to accept that of U. S. judge for the district of that state. As a judge he was distinguished for his grasp of the Roman and Continental law, his decisions being widely cited, especially in relation to the admiralty and patent law; but his action in the case of Passmore Williamson, who was committed for contempt of court under the fugitive slave law, was violently assailed by the Abolition party. He was one of the trustees and legal advisers of the Presbyterian church of the United States, and took a prominent part in the controversy that resulted in 1837 in the division of the church into the new and old schools. In the struggle of the first board of trustees of Girard College to open the institution, he was the leader; of the American Philosophical Society, he served as president, from 1836 until his death. He was married to Jane Leiper, and had two sons, Elisha Kent Kane, the arctic explorer, and Thomas L. Kane, soldier. Judge Kane died in Philadelphia, Pa., Feb. 21, 1858.

BUCKALEW, Charles Rollin, senator and diplomat, was born at Fishing Creek, Columbia co., Pa., Dec. 28, 1821. He received an academic education, studied law, was admitted to the bar soon after attaining his majority and commenced practice at Bloomsburg, Pa. His success as a lawyer was marked and immediate, and in a short time he was made district-attorney of his county (1845-47). Later he served in the state senate (1850-56), where

he carried through amendments which gradually caused a reduction of the state debt; was sent as treaty commissioner to Paraguay in 1854, and was also a member of the commission to revise the U. S. penal code in 1857. In the latter year he was chairman of the state Democratic committee and again elected to the legislature. During the administration of Pres. Buchanan he was U. S. minister to Ecuador (1858-61). When the civil war opened he returned to the United States and resumed the practice of law at Bloomsburg, but in January, 1863, he was elected to the U. S. senate from Pennsylvania, defeating Simon Cameron by one vote after a contest of singular bitterness and interest. Though meeting with criticism from his party for not opposing the party in power more aggressively, he was true to his conviction that his chief duty was to support the government in its efforts to raise troops and war funds. His talents were actively employed in the national legislature as a member of the committees on Indian affairs, post-offices and post roads, pensions, mines and mining, foreign relations, contingent expenses of the senate, retrenchment, and as chairman of the committee on ventilation. He served until 1869, taking a prominent and able part in all deliberations, and was one of the leaders of the Democratic opposition to the attempted impeachment of Pres. Johnson. At the close of his term in the national senate he was again elected to the state senate, and the crowning work of his life was the persuading a hostile legislature to issue a call for a constitutional convention. This he accomplished in spite of obstacles and discouragements; making speeches that were models of logic and eloquence, and holding conference after conference with members of both houses. He also published "Examination of the Constitution of Pennsylvania." By universal consent he was the leader of the convention, held in 1873; his ability as a lawyer was proven anew during its deliberations, and that the convention did not accomplish more in the matter of reform than it did was not his fault. Though he had been conspicuously patriotic during the war, he was, in 1872, when a candidate for the governorship, charged with having encouraged resistance to the government at that time, and was defeated. After this he took no active part in public affairs until 1886, when he was elected to the national house of representatives by the Democrats of the eleventh district of Pennsylvania. His career was a consistent and honorable one. He was married, Feb. 13, 1849, to Permelia S. Wadsworth, fifth in descent from Capt. Joseph Wadsworth, of Hartford, Conn., who hid the charter of Connecticut in the historic oak tree. He died at Bloomsburg, Pa., May 19, 1899.

HALE, Edwin Moses, physician, was born at Newport, N. H., Feb. 2, 1829, son of Syene and Betsey (Dow) Hale. His first American ancestor, Thomas Hale, emigrated from Hertfordshire, England, in 1637, and settled at Newburyport, Mass. He was educated in the public schools, and at the age of fifteen went to Newark, O., where he was employed in the printing office of the chief newspaper. He soon after entered the office of Dr. Blair, the pioneer homœopathist of the town as a pupil, and attended the Cleveland Homeopathic College for one session. Dr. Edwin M. Hale was one of the twelve pioneers of homœopathy in Michigan, rising to prominence in its profession. He was for eighteen years professor of materia medica in Hahnemann College, Chicago, a voluminous writer for the medical press, and one of the most advanced thinkers in his department of research of his day. In 1862 he located in Chicago, where he was in partnership with Prof. A. E. Small for five years. In 1864 he published his "New Remedies;" and in 1871 appeared "Diseases of the Heart," which was translated into Spanish. He also

J. Kane

published "The Therapeutics of Sterility" (1868), and "Diseases of Women" (1878); "The Heart and How to Take Care of It" (1881); also translated into Spanish. In 1876 Dr. Hale made a visit to Europe, and on his return was appointed to the chair of materia medica and therapeutics in the Chicago Homeopathic College. This chair he filled for five years, when he resigned. In addition to his professional researches he was an energetic student of botany, zoölogy, archaeology and the allied sciences, and during his spare moments published a valuable series of papers on "Ant Life," and several other articles on scientific subjects. He was married, in 1853, to Abba Ann, daughter of Austin George and Roxanna (Smith) George, of Newburyport, Mass., and had two children. He died in Chicago, Jan. 15, 1899.

BOYLE, John, jurist and congressman, was born in Botetourt county, Va., Oct. 28, 1774. His parents removing to Kentucky, he there received a thorough education, and began the practice of law in 1797. During the latter year he was married, and went to live in a log house successively occupied by three other men who subsequently rose to eminence, one as a representative in congress, one as chief justice, and another as governor of Kentucky. In 1803 he was elected to congress, serving by re-election until 1809, and, declining the governorship of the territory of Illinois; in 1810 was made chief justice of the Kentucky court of appeals, which position he held until 1816, when he resumed his private practice. In 1826 he was appointed by Pres. Adams judge of the U. S. district court for Kentucky, and served as such until his death, which occurred Jan. 21, 1835.

PILE, William A., clergyman, soldier, and governor of New Mexico (1869-70), was born near Indianapolis, Ind., Feb. 11, 1829. He received a good English and classical education; studied theology, and became a clergyman of the Methodist Episcopal church and a member of the Missouri Conference. In 1861 he joined the Missouri volunteers as chaplain; in 1862 commanded a battery of artillery as captain; was soon afterwards promoted to the rank of colonel of infantry, and in 1863 was appointed a brigadier-general of U. S. volunteers. He was in the Missouri campaign under Gen. Lyon, and was with Gens. Grant and Halleck at Corinth, being also at Vicksburg and near Mobile; his command was the first to break the enemy's line at the capture of Fort Blakely. In 1866 he was elected a representative from Missouri to the 40th congress, and served on the committee on Union prisoners and military affairs, and as chairman of the committee on expenditures in the post-office department. In 1869 he was appointed by Pres. Grant governor of New Mexico; served in 1869-70, and in 1871 was appointed minister resident of Venezuela, where he remained until 1874, when he resigned this office.

BROOKE, Walker, senator, was born in Virginia, Dec. 13, 1813. After graduation at the University of Virginia, in 1835, he engaged in the study of law, removing to Kentucky, where he taught school for two years. Upon receiving his admission to the bar he settled for the practice of his profession at Lexington, Miss., where he attained prominence and was elected to the U. S. senate, filling the vacancy caused by the resignation of Henry S. Foote, who had been nominated for the governorship of Mississippi. This office he held from March 11, 1852, until March 3, 1853. In 1861 he was a member of the secession convention of Mississippi, and was elected to a seat in the provisional Confederate congress, serving as a member of that body from Feb. 18, 1861, until Feb. 18, 1862. He was then a candidate for the Confederate senate, though defeated by James Phelan. His death occurred in Vicksburg, Miss., Feb. 19, 1869.

WILDER, Daniel Webster, author and journalist, was born at Blackstone, Mass., July 15, 1832, son of Abel and Fanny (Richardson) Wilder. His earliest American ancestor was Thomas Wilder, a native of England, who emigrated to Hingham, Mass., in 1638, lived in Charlestown, removed to Lancaster, and was selectman there in 1659. The line of descent runs through his son, Thomas (1644-1717); through his son, Joseph (1683-1757), who was chief justice of the court of common pleas (1731-57) and executive councillor (1735-42); through his son, Col. Caleb (1710-76), and through his son, Samuel (1739-98), who removed from Lancaster to Ashburnham, and was elected to the state legislature several years and was an officer of that town for twenty-five years. Abel (1786-1861), son of Samuel, of Mendon and Blackstone, held commissions as a justice of the peace from seven governors of Massachusetts, was a physician, and was one of the pioneer abolitionists. Daniel W. Wilder was educated at the Public Latin School in Boston, where he was graduated in 1852, winning prizes every year, and the Franklin medal. He was graduated at Harvard in 1856, studied law at the Harvard Law School, and was admitted to the bar in Boston in 1857. He settled in Kansas. He has been the publisher and editor of the Leavenworth "Conservative" and "Times," the St. Joseph, Mo., "Free Democrat," and the "Herald" and the "Insurance Magazine," at Kansas City, Mo. Pres. Lincoln appointed him surveyor-general of Kansas and Nebraska in 1863, and in 1872 and again in 1874 he was elected state auditor. Mr. Wilder's love of historical research prompted him to write the "Annals of Kansas," which he published in 1875, and in the same year he founded the State Historical Society, of which he became a director and president. The library of this society contains 70,000 volumes (1901). In 1887 Mr. Wilder became state superintendent of insurance, which post he held for four years. A second edition of the "Annals of Kansas" was called for in 1885, and in 1893 appeared his "Life of Shakespeare." Since 1891 he has been the publisher and editor of the "Insurance Magazine." He was married, March 3, 1864, to Mary E., daughter of Dr. John B. Irvin.

Portrait of Daniel Webster Wilder

FELLOWS, John R., soldier and lawyer, was born in Troy, N. Y., in 1832. His parents removed to Arkansas in 1840. He was educated in the common schools of that state, studied law, and was admitted to the bar in 1855. His ability and brilliant oratory speedily won him prominence in legal and political circles. He strenuously opposed secession, and in 1860 was a Bell and Everett presidential elector. When the final break came he cast his lot with his native state, and enlisted in the first Arkansas regiment; served in the Virginia campaign of 1861, and later took part in the operations of the army of the Tennessee. He was appointed colonel on the staff of Gen. W. N. R. Beal in 1862; was inspector-general at Port Hudson, La., and with the garrison during the siege. In July, 1863, he was one of the three commissioners who arranged the surrender of Port Hudson to Gen. Nathaniel P. Banks. From that until April, 1865, he was a prisoner of war. After the surrender of Gen. Robert E. Lee he resumed the practice of law in Arkansas. In 1868 he was a delegate to the Democratic national convention held in New York city, and his talents so favorably impressed Horatio Seymour that the latter

persuaded him to take up his residence in the metropolis, where his abilities were soon recognized. He was appointed assistant district-attorney of New York city, and served in that capacity from 1869 until 1873, and subsequently served for two terms in the same capacity. He was also for two years counsel to the New York board of excise. In 1886 he was elected district attorney, and held that office until 1890, when he was elected to congress as a Democrat, serving until June 1, 1894, when he became district attorney again, and held this position until his death. He was a delegate to the Democratic national conventions of 1876, 1880, 1884 and 1888, and for many years was one of the most noted political speakers of the country. He was an eloquent, forceful and impressive orator, and excelled as an advocate. In private life he was distinguished for his genial and generous traits of character. He died Dec. 7, 1896.

BREWER, Leigh Richmond, first P. E. bishop of Montana, and 126th in the succession of American bishops, was born at Berkshire, Franklin co., Vt., Jan. 29, 1839, son of Sheldon Sykes and Lura (Crampton) Brewer. He worked upon his father's farm and attended the schools of his native county until the age of seventeen, when he entered an academy at Canton, N. Y., and from this period until he was twenty alternated by teaching and attending school, defraying his expenses with the money

he earned as teacher. In 1863 he was graduated at Hobart College, Geneva, N. Y., and became tutor in a private family, which enabled him to pursue his studies in theology. He was graduated at the General Theological Seminary, New York, in 1866; was ordained deacon the same year, and priest in 1867. For six years Dr. Brewer was rector of Grace Church, Carthage, N. Y., where he built a church and rectory, and left the parish in a flourishing condition, with a membership of about a hundred. In 1872 he was elected rector of Trinity

Church, Watertown, N. Y., and in 1880 he was elected missionary bishop to Montana, being consecrated at Watertown, December 8th. Since then he has resided at Helena, Mont. Finding the parish of Helena vacant, he took charge of it until the following June, when Rev. R. M. Duff, of New York, became its rector. He then started on a general visitation of the territory, traveling about four thousand miles. Forty-seven persons were confirmed, and services were held in fifty-two places. In 1881 eight clergymen were at work in Montana, besides the bishop, and these eight men reached twenty-six places with services. During the year a debt of more than \$2,000 on St. Peter's Church, Helena, was paid, and the church was consecrated. A rectory was also purchased. St. John's Church, Butte, was built at a cost of \$13,000. Work was begun in a new field in Beaverhead county, by the Rev. E. G. Prout. The number of communicants at this period was less than four hundred, and the value of church property was about \$25,000. Now (1901) there are twenty-four clergymen besides the bishop. There are four parishes and thirty-eight organized missions, where regular services are held, while about thirty other places are reached with occasional ministrations. The churches have increased to twenty-nine and the rectories to thirteen. There is a parish school

and one hospital. A bishop's house has been purchased, and endowments for the future diocese have been well begun. The communicants number 2,400, and the value of the church property is \$305,000. He was married, July 10, 1866, to Henrietta W., daughter of Henry and Amelia (Bird) Foote, of New York, and has one child, Jennie E., wife of Richard Mead Atwater, a mining expert.

ROSENTHAL, Herman, author and librarian, was born at Friedrichstadt, Courland, Russia, Oct. 6, 1843, son of Moritz and Pauline (Birkhain) Rosenthal. His father was a merchant, of Jewish descent. Rosenthal, at the age of ten, began to attend a district school of Bauske, Courland, and three years later entered a private school at Jacobstadt, Courland, at which institution he was graduated in 1859. Subsequently he for some time attended Prof. Schlieden's lectures on botany and natural science at Dorpat University. At the early age of sixteen he began writing for German and German-Russian publications, and translated into German several poems of the great Russian poet, Nekrassov; among others his "Sasha," which was in 1886 reprinted in the "Freidenker Almanach," of Milwaukee. During the period 1869-81 he was engaged in the printing business in three different places (Kremenchug, government of Poltava; Smyda, government of Kiev, and in Kiev). At the same time he acted as agent for the Russian Transportation Co., "Dvigatel"; for the Russian Insurance Co., and occasionally contributing to the Hebrew paper, "Hameliz," and writing poems in German. In 1868 there appeared a collection of his poems "Gedichte" (Kremenchug), and in 1872 a humorous tale, "Die wunderliche Kur" (ibid.). He was one of the founders of the Russian daily "Zarya" (Dawn), established in 1878 in Kiev, and a member of the St. Petersburg Society for the Promotion of Culture Among the Russian Jews. In 1881 Rosenthal came to New York city with the object of establishing in the United States agricultural colonies of Russian-Jewish immigrants. He succeeded in founding such colonies in Louisiana and South Dakota (1881-82), acting for about a year as president of the former colony, and later (1891) in a similar capacity at Woodbine, N. J. After engaging in the book trade for some time (1887-88) he secured the position of chief statistician of the Edison General Electric Co., which he held for three years, and then (1892) he was despatched by the Great Northern Railroad Co. to the far East to investigate the conditions of trade and commerce in Japan, China and Corea. A report of this journey was published in St. Paul, Minn., in 1893. Upon his return he became secretary of the German-American Reform Union of New York city, was on the committee of seventy, and served for two years as chief of the discharging department at Ellis Island. Since 1898 Herman Rosenthal has been in charge of the Slavonic department of the New York public library (Astor branch), and is now editor of the Russian department of the "Jewish Encyclopaedia." He is a member of several German-American societies, and, in conjunction with K. Nies, edited the "Deutsch-Amerikanische Dichtung" (New York, 1889-91). In June, 1900, he began the publication of a Hebrew monthly ("Monthly Intelligence"), which is mainly devoted to the history of American Jews. Further, he has translated into German verse the "Ecclesiastes" ("Worte des Sammlers," New York, 1885), and the "Song of Songs" ("Lied der Lieder," ibid., 1893). His German poems and translations are of considerable poetical value. Herman Rosenthal was married near Wilna, Russia, June, 1864, to Anna, daughter of Leon Rosenthal, of Byelostok, Russia. He has two sons and four daughters.

Leigh Richmond Brewer

PETTIS, S. Newton, lawyer and congressman, was born in Ashtabula county, O., in 1828. He studied law and was admitted to the Pennsylvania bar in 1848. In 1861 he was appointed by Pres. Lincoln a justice of the U. S. court for Colorado, but before the close of that year he resigned, and returned to Pennsylvania. He was subsequently elected a representative from that state to the 40th congress for the unexpired term of D. A. Finney, and served on the committee of elections. In 1878 he was appointed minister resident to Bolivia, and remained there until 1880.

HALLOCK, Jeremiah, clergyman, was born in Brook Haven, Suffolk co., N. Y., March 13, 1758, son of William Hallock, who a few years later removed to Goshen, Mass. His earliest American ancestor was Peter Hallock, a Puritan, who fled from England in 1640. He is said to have been the first white man who stepped upon the shores of Long Island at the place which is still called Hallock's neck. He located at Southold, Long Island, where the original homestead is still occupied by a descendant (1901). He was married to a Mrs. Howell, and the line of descent runs through their son, William; through his son, Peter; through his son, Noah, the grandfather of Jeremiah Hallock. The latter studied theology under Timothy Dwight at Northampton, Mass., and in April, 1784, was ordained to the ministry. From the following October until his death he was pastor of the Congregational church at West Simsbury. He was a model pastor and had an influence far beyond the limits of his congregation. Although not a college graduate, he received the honorary degree of A. M. from Yale in 1788. He died at West Simsbury, Conn., June 23, 1826.

HALLOCK, Moses, clergyman and educator, was born in Brookhaven, Suffolk co., N. Y., Feb. 16, 1769, youngest son of William Hallock. With his brother, Jeremiah, he served for several months in the revolutionary war (1776-77). He was graduated at Yale College in 1788, after which he studied theology, and was licensed to preach August, 1790. In 1792 he was ordained the first pastor of the Congregational Church at Plainfield, Mass. a position he occupied until his death. To supplement the deficiencies of his salary, he taught a classical school in his own house, where he fitted for college 132 young men, of whom fifty became ministers. Among his pupils were Prof. James H. Coffin, William Cullen Bryant and John Brown, the noted abolitionist. His wife was Margaret Allen, of Chilmark, Martha's Vineyard, who died in 1835, leaving four sons, William A., Gerard, Leavitt and Homan. He died in Plainfield, Mass., July 17, 1837.

HALLOCK, Gerard, journalist, was born at Plainfield, Mass., March 18, 1800, second son of Moses and Margaret (Allen) Hallock. In 1819 he was graduated at Williams College second in his class, his brother, William A., being first. From 1819 to 1821 he was a preceptor in Amherst Academy, and then entered Amherst with a view to the ministry, which idea he later rejected, and left that institution to open a school in Salem, Mass. In 1824 he established in Boston a weekly paper, called the "Telegraph," which was so markedly successful that the proprietor of the Boston "Recorder" made overtures resulting in the union of the two papers in 1825. Two years later Mr. Hallock became part owner in the New York "Observer," and in the following year he was invited by Arthur Tappan, proprietor of the "Journal of Commerce," to assume the editorial management of that paper, in partnership with David Hale, who was already its business manager. The proposal was accepted, and resulted in the establishment of the well-known firm of Hale & Hallock, which inaugurated a new system

of journalism. They built a schooner of ninety tons, the Evening Edition, which, in conjunction with a vessel already in operation, intercepted vessels arriving at Sandy Hook, thus giving them a decided advantage over other newspapers in obtaining the latest news. They were the initiators of the "special edition," which has since become so marked a feature of American journalism. In 1833 they established a pony express from Philadelphia to New York, which enabled them to publish the proceedings of congress and other southern news one day in advance of their contemporaries, and later they extended their relays to Washington. The "Journal of Commerce" prospered and grew under suchable management, and when Mr. Hale died, in 1819, Mr. Hallock assumed the sole management. Although he firmly opposed the abolition movement, he devoted himself assiduously to the purchase and liberation of slaves, at least 100 of them receiving from him their liberty and transportation to Liberia. In 1854, when the American Home Missionary Society withheld its support from slave-holding churches, he assisted in founding the Southern Aid Society. In August, 1861, the "Journal of Commerce" and four other newspapers were indicted by the grand jury of the U. S. circuit court for "encouraging rebels now in arms against the Federal government by expressing sympathy and agreement with them, the duty of acceding to their demands, and dissatisfaction of the employment of force to overcome them," and by an order from the post-office department the use of the mails was forbidden to them. Rather than sacrifice his principles Mr. Hallock at once retired from journalism after an honorable editorial record of thirty-eight years, and the remainder of his life was spent at his home in New Haven, Conn., known as "Hallock Castle." He was a man of great modesty, simplicity and kindness, but was possessed of a strong and determined mind and an inflexible sense of justice and rectitude. When a change in the tone of his editorials was suggested, because so many of his subscribers were withdrawing, he indignantly replied: "I do not consult my subscription lists to find out my principles." A man of most benevolent nature, he gave freely of his means to charitable and religious objects, and contributed over \$100,000 towards the building of the South Congregational Church, of New Haven, a history of which he published. He was one of the founders of the New York Associated Press. Amherst College conferred upon him the degree of A. M. in 1828. He was married, June 2, 1825, to Eliza Allen, of Martha's Vineyard, and he died at New Haven, Conn., Jan. 4, 1886.

HALLOCK, Homan, inventor of Arabic type, was born at Plainfield, Mass., May 24, 1803, youngest son of Rev. Moses and Margaret (Allen) Hallock. He was graduated at Amherst College in 1820, and in 1826 he went to Smyrna with Rev. Daniel Temple. At that time Arabic speaking people used only the manuscripts of life-trained writers, though the effort had been made in Europe for many years to imitate the caligraphy with metal type. From the best attainable specimens of manuscript, he designed and cast the first Arabic type. It was at once adopted by the Dominican Convent at Mosul, the German Oriental press at Leipzig and the Jesuits at Beirut, and literature printed from it is in use by 150,000,000 of people from Monrovia in western Africa to

Pekin in China. Seven different fonts were made in different sizes, with and without vowels, and he was appointed missionary printer to the American Board of Commissioners for Foreign Missions. He also invented a time-lock in 1838 and a reversed pantograph, which he manufactured and sold until his death. Mr. Hallock was married, in 1828, to Elizabeth, daughter of Benjamin Fleet, of London, England. He died Oct. 28, 1894.

HALE, David, journalist, was born at Lisbon, Conn., April 25, 1791, son of David and Lydia (Austin) Hale, grandson of Richard and Elizabeth (Strong) Hale, great-grandson of Samuel and Apphia (Mooly) Hale, great-great-grandson of Rev. John and Sarah (Noyes) Hale, and great-great-great-grandson of Robert and Joanna Hale, of Charlestown, Mass. His father, a man of great probity, was a clergyman in Lisbon, but his health failing him he was dismissed and opened a classical school there. The son was educated by his father, and at the age of fifteen was employed, and later engaged, in the dry-goods business in Boston. After teaching school for a year in Connecticut he assisted his uncle, Nathan Hale, in the Boston "Advertiser" office. He contributed to the "Boston Recorder" and had editorial charge of its foreign and domestic news and political affairs. When Arthur Tappan established the New York "Journal of Commerce," in 1827, he invited Mr. Hale to take charge of the commercial and business department; Mr. Maxwell and, later, Horace Bushnell being the literary editors. Later he became joint proprietor with Gerard Hallock. Immersed in practical business as he was, he yet could not withhold his hand from his pen, and his articles, written in a noisy business office, possessed a vigor and pertinacity which proved him one of the most able of editors. The "Journal of Commerce" was at this time shut out from the combination of newspapers, and for some years main-

David Hale

tained a private news-boat, the Journal, which brought many "scoops" to the columns of the paper—notably, the first account of the French revolution in 1830, which was read by Mr. Hale from the steps of the exchange, and during the excitement of the Jackson administration the proprietors instituted an express from Philadelphia to New York, which resulted in the establishment of the celebrated Halifax express. Mr. Hale connected himself with the Broadway "Tabernacle," desiring to worship "where he could be most useful," and when its congregation was broken by dissension and financial disaster and the building was about to be sold, he bought it in with the object of forming a Congregational church. He was criticised because of this act, which his friend, Gerard Hallock, said was perhaps the greatest act of his life. Hallock also said: "One of the agreeable traits of Mr. Hale's character was his perfect frankness. There was no guile about him; he was incapable of it himself and despised it in others." He was married, in 1821, to his cousin, Laura Hale, who died in 1824; and in 1825, to Lucy S. Turner, of Boston. He died in Fredericksburg, Va., Jan. 25, 1849.

BULLITT, Alexander Scott, legislator, was born in Prince William county, Va., in 1761. In 1784 he emigrated to Kentucky, then a part of Virginia, and settled in what is now Shelby county;

but, owing to the annoyances he suffered from the Indians, he sought a safer locality, and this he found in Jefferson county, finally settling near Sturgus' station. In 1792 he was elected delegate to the convention which met in Danville to frame the constitution of Kentucky, and after the admission of that state served in its senate (1792-1804) and was elected the first president of that body. In 1799 he served as president of the Frankfort convention for amending the state constitution, and in the year following was elected the first lieutenant-governor of Kentucky, serving until 1808, when he retired from public life and spent the remainder of his life upon his farm in Jefferson county, where he died, April 13, 1816.

ABBOT, Henry Larcum, military engineer, was born in Beverly, Essex co., Mass., Aug. 13, 1831, son of Joseph Hale and Fanny Ellingwood (Larcum) Abbot. His earliest American ancestor was George Abbot, probably a native of Yorkshire, who settled in Andover, Mass., about 1643. John Abbot, third of the name, and great-grandson of George, of Andover, was a captain in the French and Indian war. His son, Abiel, removed from Andover to Wilton, N. H., of which he was one of the first settlers; was deacon, representative, captain in Col. Lutwyche's regiment under King George, 1769; second major, 1st regiment, New Hampshire militia, 1776, and first major, same regiment, 1781. Ezra, son of Abiel, with his brother, Samuel, founded the first factory for the manufacture of potato starch. Joseph H. Abbot, father of Gen. Abbot, born at Wilton, N. H., was graduated at Bowdoin College in 1822. He taught private schools in Watertown and Beverly; was tutor in Bowdoin College in 1825-27; in 1827-33 was professor of mathematics and natural philosophy at Phillips (Exeter) Academy. In 1833-55 he was principal of a private school for young ladies in Boston, and in 1861-67 was first principal of the high school, Beverly, Mass. He was elected a fellow of the American Academy of Arts and Sciences in 1838, and was its recording secretary in 1850-52. Gen. Abbot was graduated at West Point in 1854; was appointed, with the rank of lieutenant, to the corps of topographical engineers, and was assigned to duty in the office of the Pacific railroad surveys, in Washington. The next year he served on the exploration for a railroad route between California and Oregon, and from 1857 to 1861 was occupied in the hydrographic survey of the Mississippi river delta. During the war he was chief of topographical engineers on the staff of Gen. Tyler, and was wounded at the first battle of Bull run; he served as engineer on the staff of Gen. McClellan in the campaign of 1862; accompanied the Banks expedition to New Orleans; was appointed colonel of the 1st Connecticut artillery in the spring of 1863; commanded the siege train of both armies operating against Richmond in 1864-65, and took part in the capture of Fort Fisher. He received brevets for gallant and meritorious conduct as major general of volunteers, and brigadier-general in the regular army, March 13, 1865. After the war he engaged in the construction of defensive works at Fort Schuyler; commanded the engineer battalion at Willett's point, and organized the Engineer School of Application. Here he conducted torpedo experiments of high value to the government, and designed the system of submarine mine defense, which was adopted by the United States and won for him a wide reputation. In 1870 he was a member of the expedition which went to Sicily to observe the solar eclipse of that year. After his return he served on a number of important boards in relation to military matters and to river and harbor improvements, going twice to Europe in this capacity. On October 12, 1886, he became colonel,

corps of engineers, and served for several years as engineer of the northeast division, and as president of the permanent board of engineers of the war department, and as member of the board of ordnance and fortification. He was retired from active service in 1895. In 1896 he designed the new harbor at Manitowoc, Wis., and was president of the board of consulting engineers of the Lake Erie and Ohio river ship canal committee of Pittsburgh. In 1897 he was appointed a member of the international commission of engineers for the project of the new Panama Canal Co. At the 250th anniversary of the founding of Harvard he was honored with the degree of LL.D. Since 1872 he has been a member of the National Academy of Sciences, as well as of the American Philosophical Society, the American Academy of Arts and Sciences, and of other similar bodies. Gen. Abbot has published "Vol. VI., Pacific Railroad Reports" (1857); with Capt. A. A. Humphreys, "Physics and Hydraulics of the Mississippi" (1861); "Siege Artillery in the Campaign Against Richmond" (1867); "Experiments and Investigations to Develop a System of Submarine Mines for Defending Harbors of the United States" (1881); with boards and commissions, "United States Bridge Equipage and Drill" (1870); "Reclamation of the Alluvial Basin of the Mississippi River" (1875); "Report of Gun-foundry Board" (1884); and "Report of the Board on Fortifications and other Defenses" (1886). He also contributed various articles on professional subjects to "Johnson's Cyclopaedia" and to the "Encyclopaedia Britannica."

JUENGLING, Frederick, wood engraver, artist and etcher, was born in Leipzig, Germany, Oct. 18, 1846. He obtained a common school education in his native city, and at the age of fourteen became a compositor, but soon tiring of this, learned engraving on wood in the well-known publishing house of Payne, in Leipzig. After serving the usual apprenticeship he worked for several firms in Leipzig, and later went to Berlin, where he received instruction from the celebrated engraver, Jahrmarkt. Emigrating to America, in 1866, he was successively employed in New York city on Frank Leslie's, Harpers', and Street & Smith's publications, until 1871, when he spent some months in Cleveland, O., where he had previously worked for a short time. Upon his return to New York city in December, 1871, he started an establishment of his own, and engraved for the "American Agriculturist," the "Fireside Companion" and "Scribner's Magazine," soon receiving so many commissions from all parts of the country that he employed a hand-pressman and ten engravers, among them such men as Henry Wolf, E. Heineman and William Miller. He also undertook the drawing for publishers. Encouraged by his marked success, he started a printing house in 1875, a venture which proved to be unfortunate, leaving him, two years later, without assets and burdened with liabilities. He finally succeeded, however, in paying his debts, and in 1879 the printing business was sold. Mr. Juengling had by this time attained a high rank among engravers of the new school, but having begun to draw and paint, after 1879 he devoted himself to this form of expression. During the summer of that year he painted at Gilboa, N. Y., with Alfred Kappes, and in the winter entered the evening life class at the Art Students' League, afterward working in the daytime, too, and remaining until 1884. He was one of the league's vice-presidents in 1881-82. For his engraving, "The Professor," he received an honorable mention at the Paris Salon of 1881 (being the first American engraver thus distinguished), and a gold medal at the international exhibition of fine arts held in Munich, in 1883. He was a founder of the American Society of Wood En-

gravers; was its first secretary in 1881-82, and was also a member of the Salmagundi and Lotus clubs. Some of his important engravings are: "The Voice of the Sea," after Arthur Quartley; "Spanish Peasant," after William M. Chase; "Portrait of J. McNeil Whistler," after Whistler's painting of himself, and "At the Forge," after Walter Shirlaw. He painted, among other pictures: "The Intruder" (1884); "The Housewife" (18); "In the Garden" (18), and "Boys Playing Marbles," in oil, and "Westward Bound" (1884); "Old German Emigrant," and "First Snow," in water color. Mr. Juengling was also an etcher of considerable merit, "A Humble Thoroughfare" (original); "Pilgrims to Emmaus," after Descamp, and "Why," after Kappes, being among his notable etchings. His health failing in 1887, he went to Carlsbad, Bavaria, and afterward traveled in Germany, Italy, Austria and France, engraving and painting but little during this time. He returned to New York city in November, 1889, and died there, Dec. 31, 1889.

WHITE, William Allen, author and editor, was born at Emporia, Lyon co., Kan., Feb. 10, 1868, son of Allen and Mary (Blanton) White. He is a direct descendant of Peregrine White, the first child born in New England of Puritan parentage. His paternal grandmother was related to Com. Perry. In 1869 his father, who was a physician, removed to Eldorado, Kan., and there the son attended the common schools. He entered Emporia College in 1881, where he remained for two years, in the meantime learning the printer's trade in the office of the Butler county "Democrat." In 1886 he was a local reporter on the Eldorado daily "Republican," entering the University of Kansas in the fall. He studied there until January, 1890, being city editor of the "Republican" in the summer of 1887; reporter for the Lawrence "Journal" in 1888, and going to Estes Park, Col., the following summer with "Fred" (now Gen.) Funston and half a dozen other university boys. In 1890 he left the University to become business manager of the "Republican," later being successively an editorial writer on the Kansas City "Journal"; Topeka correspondent of the "Journal," and editorial writer on the "Star." In 1895 Mr. White bought the Emporia "Gazette," in which his widely-copied editorial, "What's the Matter with Kansas," appeared in August, 1896. He published a volume of short stories, entitled, "The Real Issue," in the same year, since which time he has contributed to the "Atlantic Monthly," "Harper's Weekly," "Scribner's Magazine," "McClure's Magazine," and other leading periodicals. His second book, "Court of Boyville," was published in 1899; his third, "Strategems and Spoils" (political stories), in 1901. He was married, April 27, 1893, to Sallie, daughter of Joseph M. Lindsay, of Kansas City, Kan. They have one child.

W. A. White

HITCHCOCK, Samuel, jurist, was born at Brimfield, Mass., March 23, 1755, son of Noah and Mary () Hitchcock and grandson of David Hitchcock, one of the earliest settlers of Brimfield. The earliest American ancestor was Luke Hitchcock, who settled at Wethersfield, Conn., about 1635. Samuel Hitchcock was graduated at Harvard College in 1777, and after being admitted to the bar removed to Burlington, Vt.,

where he resided and practiced law until 1794. He was state's attorney for Chittenden county from 1787 until 1790, and represented Burlington in the state legislature, 1789-93; was attorney-general of Vermont, 1790-93, and served as a member of the Vermont convention which ratified the U. S. Constitution in January, 1791. He was presidential elector-at-large at Washington's second election in 1793. He was not only distinguished as a lawyer, among the foremost in New England, but was an accomplished scholar. He drafted the charter of the University of Vermont, was one of its trustees from its incorporation on Nov. 3, 1791, until his death, and its secretary from 1791 to 1800. Samuel Hitchcock removed to Vergennes, Vt., in 1794, but he returned to Burlington, in 1806; was U. S. district judge, and was appointed circuit judge by Pres. Adams in 1801, holding that office until it was abolished under Pres. Jefferson. On May 26, 1789, he was married to Lucy Caroline, second daughter of Gen. Ethan Allen. Their son, Henry Hitchcock, was a prominent lawyer, and another son, Ethan Allen Hitchcock, became famous as a soldier. His last years were spent in Burlington, Vt., where he died, Nov. 20, 1813.

HITCHCOCK, Ethan Allen, soldier, was born at Vergennes, Vt., May 18, 1798, son of Samuel and Lucy Caroline (Allen) Hitchcock. His maternal grandfather was Gen.

Ethan Allen, of Ticonderoga fame. He was graduated at the West Point Military Academy in 1817; was commissioned first lieutenant in 1818, adjutant in 1819, and captain in 1824. He was assistant instructor of military tactics at West Point, and was later commandant of the cadets there. He served in the Seminole war, and was acting inspector-general in Gen. Gaines' campaign of 1836. He was promoted major in 1838, and became lieutenant-colonel in 1842. He served throughout the Mexican war, taking part in all the important battles, and receiving the brevet

colonel for gallantry at Contreras and Churubusco. In 1851 he was promoted colonel of the 2d infantry, and commanded the Pacific military division until 1854. He resigned his commission in October, 1855, because Jefferson Davis, who was then secretary of war, refused to confirm a leave of absence that had been granted him by Gen. Scott. He was engaged in literary pursuits in St. Louis, Mo., until the breaking out of the civil war, when he became major-general of volunteers. He was stationed at Washington, and served on the commission for exchange of prisoners and also that for revising the military code. Gen. Scott and Gen. Sherman had the highest opinion of his military ability, and while in Washington he became the military adviser of Pres. Lincoln, serving until he was mustered out in 1867. He was a scholar of unusual attainments, and published "Remarks on Alchemy and the Alchemists" (1857); "Swedenborg a Hermetic Philosopher" (1858); "Christ the Spirit," in which he attempted to show that the gospels were symbolic books, written by members of a Jewish secret society (1860); "The Sonnets of Shakespeare" (1865); "Spenser's 'Colin Clout' Explained" (1865); "Remarks upon the Amoretti Sonnet, etc." (1866); and "Notes on the Vita Nuova and Minor Poems of Dante" (1867). Gen. Hitchcock was an acceptor of the teachings of Emanuel Swedenborg and in his works attempted to prove that the hermetical system

of philosophy teaches a subtle and elevated theology. In 1868 he was married to Martha R. Nicholls, but had no children. His brother, Judge Henry Hitchcock (1791-1839), was graduated at the University of Vermont in 1813. Removing to Alabama territory in 1816, he became secretary of the territory. He was attorney-general of Alabama, U. S. district-attorney, and chief justice of the state. Gen. Ethan Allen Hitchcock died at Hancock, Ga., Aug. 5, 1870.

HITCHCOCK, Henry, jurist, was born in Burlington, Vt., Sept. 11, 1791, son of Samuel and Lucy C. (Allen) Hitchcock, and brother of Ethan A. Hitchcock. After graduating at the University of Vermont, he removed, in 1815, to Alabama, then a territory, and made it his permanent home. He served as secretary of the territory, and was a member of the convention which framed the constitution of Alabama (1819). He was attorney-general of the state, U. S. district attorney, and in 1835 was appointed associate justice of the state. In 1836 he became chief justice, resigning the latter office in 1837. He was a man of the highest character, influence and reputation, universally honored and beloved, and his death was lamented throughout the state of Alabama as a public calamity. He was married, in 1821, to Anne, daughter of Col. Andrew Erwin, of Bedford county, Tenn. He died at Mobile, Ala., on Aug. 11, 1839, of yellow fever.

HITCHCOCK, Henry, lawyer, was born at Spring Hill, Ala., July 3, 1829, eldest son of Henry and Anne (Erwin) Hitchcock. After the death of his father his mother removed with her children to Nashville, Tenn., where Henry entered the junior class of the University of Nashville and was graduated there in 1846. He immediately afterwards entered the junior class at Yale College, and was graduated with honor in 1848. After studying law in New York city for a short time, in November, 1848, he accepted an appointment as classical teacher in the High School of Worcester, Mass., fulfilling those duties until November, 1849, when he returned to Nashville. He read law in the office of William F. Cooper, afterwards chancellor and a judge of the supreme court of Tennessee. In September, 1851, he removed to St. Louis, Mo., where he has ever since resided, and was at once admitted to the bar. A few months later he became assistant editor of the St. Louis "Intelligencer," a national Whig newspaper, but in December, 1852, gave up journalism, thereafter devoting his attention exclusively to his profession. Having joined the Republican party, he took an active part in the presidential canvass in 1860, advocating the election of Lincoln. In February, 1861, he was one of the six Republican delegates elected on the "unconditional Union ticket" to the state convention called by the legislature to determine the relations between the state and the Union. He served in the civil war as assistant adjutant-general of volunteers, and as judge-advocate on the personal staff of Gen. Sherman, during the march to the sea, and the subsequent campaigns through North and South Carolina. In April, 1865, Gen. Hitchcock was the bearer of dispatches to Washington announcing the truce between Gen. Sherman and Gen. Joseph Johnston. Being mustered out of service in June, 1865, he spent several months traveling in Europe, thence returning to active practice until 1871, when, on account of failing health, he temporarily gave up practice, making a voyage to China and Japan. In 1884 he formed a partnership under the name of Hitchcock, Madill & Finkelnburg, which was dissolved in 1890, since which he has practiced alone. He has been a member of the board of directors of Washington University since 1859, and its vice-president since 1886. In 1867 he bore the chief part in organizing its law department, known as the St.

Louis Law School, of which he was dean until 1881. He also served as professor, occupying at different times the chair of commercial law, and corporation, equity, real estate, and constitutional law, and he continued to lecture after resigning as dean. He was one of the original trustees of the Missouri Botanical Garden, and has been vice president of the board since its organization in 1889. He was president of the St. Louis Bar Association in 1880, and president of the Missouri State Bar Association in 1882, being one of the organizers of the latter. He was also one of the founders of the American Bar Association, and was elected its president in 1889. In 1881 he organized the Missouri Civil Service Reform Association, of which he was president for several years, and he was associated with George William Curtis and Carl Schurz in establishing the National Civil Service Reform League. Mr. Hitchcock received the honorary degree of LL.D. from Yale College in 1875. He is a member of the Loyal Legion, the Grand Army of the Republic, and of the University, Commercial and St. Louis clubs of St. Louis, and the Union League, University and Lawyers' clubs of New York city. He was married, March 5, 1857, to Mary, daughter of George Collier, of St. Louis, and has two sons, Henry and George Collier Hitchcock.

SMITH, John, senator, was born at Mastie, near Brookhaven, N. Y., Feb. 12, 1752, and received a careful education. In 1784 he became a member of the state legislature, and continued in that body until 1799. In the latter year he was elected a representative in congress from New York, serving until 1804. Upon the resignation of DeWitt Clinton from the U. S. senate in 1804, Mr. Smith was chosen to take his place. This prompted his resignation from the lower house, and he continued to serve as a Democratic senator from New York until 1813. In the latter year he was appointed by Pres. Madison U. S. marshal for New York. Sen. Smith served in the convention which adopted the Federal constitution, and for many years held the rank of major-general in the New York militia. He died at Mastie, N. Y., Aug. 12, 1816.

JONES, Walter Restored, marine underwriter, was born at Cold Spring, Long Island, April 15, 1793, son of John Jones, and nephew of Samuel Jones (q. v.). He was the founder of the Atlantic Mutual Marine Insurance Co., of New York city, and by untiring energy, determination, accuracy and masterly management, built up a comparatively weak corporation, making it a very important institution. For many years he presided over the company which he had founded, but was also largely interested in manufacturing and whaling enterprises, the latter then being one of the lucrative national industries. In the establishment of the Life Saving Association he took a prominent part. His death occurred in New York city, April 5, 1855.

STIEGEL, Henrick Wilhelm von, manufacturer, was born near Manheim, Germany, in 1730, of noble and wealthy parents. He came to America in 1750 with a fortune of £40,000 and settled in Philadelphia. In 1753 he was married to Elizabeth, daughter of Jacob Huber, an ironmaster of Lancaster county, Pa., and, having purchased the latter's iron furnace, one of the oldest in America, he removed there and built a stately mansion. He named the furnace and the town also after his wife, Elizabeth. He engaged in the manufacture of wood-burning stoves without pipe or oven, some of which bore the name "Baron Stiegel." His employees numbered nearly 300 men, in whose welfare he took the utmost interest, and his devout nature and regard for their spiritual welfare resulted in a chapel built in his private residence,

where they gathered whenever opportunity offered, the baron himself conducting the religious services. For those who were musically inclined he engaged instructors from abroad, and in other ways he strove to educate his people. In 1763 he bought a tract of land on which he laid out the town of Manheim, of which he became sole owner, and as an impetus to its growth he imported skilled workmen, who erected a glass factory, the first in America. During the latter part of 1769 Baron von Stiegel built a castle five miles from Elizabeth furnace, on an eminence which still bears the name of Castle hill. He built another residence at Manheim, by far the most costly of his several mansion houses. During the revolutionary war he received large orders for cannon and ammunition for the patriot army. After the battle of Trenton Washington sent him about 200 Hessian prisoners, who were taken into his employ. After the war reverses crippled the industries he had established, and he was engulfed in financial ruin. In 1772 he founded a German Lutheran church at Manheim, giving the lot on which the building was erected, for the sum of five shillings, to make the deed lawful, and the annual rental of one red rose, payable in the month of June forever. The "Feast of Roses," held on the second Sunday of June, is an occasion of great rejoicing in the church. The members of the congregation, each bearing a blossom, form in procession after religious services have been held and drop the flowers one by one within

the chancel rails. The roses are then collected and sent to various hospitals. The baron's career constitutes perhaps the most romantic page in the annals of Pennsylvania. By his first wife, who died in 1758, he had two daughters; Barbara, who was married to a Mr. Ashton, of Virginia, and died without issue; and Elizabeth, who was married to William Old, of Pennsylvania, and had four sons. In 1759 he was again married to Elizabeth Holtz, of Philadelphia, by whom he had one son, Jacob, who removed to Stanton, Va., was married to Rachel Holman and had one son, Jacob. Baron von Stiegel died in his mansion at Charming forge, Pa., 1783.

BIRD, Frederic Mayer, clergyman and hymnologist, was born in Philadelphia, Pa., June 28, 1828, son of Dr. Robert and Mary E. (Montgomery) Bird. His father was a well-known novelist and dramatist. He was graduated at the University of Pennsylvania in 1857, and at Union Theological Seminary, New York, in 1860; was ordained as a Lutheran minister, and during the civil war served as a chaplain in the army. He took orders in the Protestant Episcopal church in 1868, and was rector at Spotswood, N. J., in 1870-74, and other parishes. In 1881-'86 he was professor of psychology and rhetoric at Lehigh University. He collected the largest hymnological library in America, and was an editor of the General Council's Lutheran Hymn-Book (1864-'68), and, with Bishop Odenheimer, of "Hymns of the Spirit" (1871). He has published "Charles

Wesley, Seen in His Finer and Less Familiar Poems" (1866), and a series of articles on hymns, which appeared in the New York "Independent" in 1880-86; most of the hymnologic matter in the Schaff-Herzog "Encyclopedia," and most of the American matter in Julian's "Dictionary of Hymnology" (London, 1892). He has contributed much biographical and other matter to sundry encyclopedias, especially Stoddard's reprint of the "Britannica," Alden's "Manifold," Jackson's "Concise Dictionary of Religious Knowledge," and White's "National Encyclopedia of American Biography." He has written for "The Churchman" and other periodicals, and has published "The Story of Our Christianity," 1893, besides two books without his name. He was editor of "Lippincott's Magazine" in 1893-98, and associate editor of Chandler's "Encyclopedia" (1898). He was married in 1877 to Frances P., daughter of W. O. Snowhill, of Spotswood, N. J., and has one son.

FLINT, Weston, educator and librarian, was born in Pike, Wyoming co., N. Y., July 4, 1835, son of Nicholas and Phebe (Willoughby) Flint, of Dutch and English descent. He was brought up on his father's farm in Cattaraugus county, N. Y., and studied at Chamberlain Institute, New York.

Weston Flint

At the age of seventeen he began teaching, and in 1855 entered Alfred Academy, which was about to be raised to a university, where he was graduated in 1858. In 1860 he was graduated at Union College, and in 1863 received the degree of A. M. After teaching in New York, Pennsylvania and Ohio, he went to St. Louis, and while looking after the sick and wounded of the Federal army in the hospitals was appointed military agent for Ohio, also acting a part of the time for the states of Michigan and New York in the care of their soldiers

in camps and hospitals. In 1866-69 he was attorney for claims in St. Louis, and took an active part in the politics of the state. In 1866 he was one of the organizers and secretary of the Southern Loyalist convention at Philadelphia, and in 1868 was a delegate to the Republican convention at Chicago. Dr. Flint became editor and publisher of the St. Louis Daily "Tribune"; he was also the organizer and secretary of the second board of the geological survey of Missouri. In 1871 he was appointed U. S. consul to Chin Kiang, China. On his return in 1874 he engaged in literary work and lecturing; then studied law in Columbian University, receiving the degree of LL. B. in 1877 and that of LL. M. in 1878, and being admitted to the bar in the latter year. In 1877-87 he had charge of the scientific library of the U. S. patent office, and during that time, through his efforts, two large catalogues were prepared and the library was reorganized, and made the best working library of its kind in the world. He had much to do with the organization of the civil service commission, and was acting chairman and one of the examiners. In 1887-88 he served with the senate committee which investigated the operations of the civil service; in 1889 was appointed statistician of the U. S. bureau of education, and prepared the report on the libraries of the United States and Canada. In 1898 he was appointed librarian of the new public library of the District of Columbia. He is

secretary of the Anthropological Society of Washington; member of the American Historical Society; of the American Association for the Advancement of Science; a member of the council of the American Library Association; member of the American Folk Lore Society; of the National Geographical Society, and of the Society for University Extension. Dr. Flint has also been prominently identified with the Chautauqua movement. He has written a number of verses and done a large amount of newspaper work under the nom de plume of "Ik Iopas." In 1885 his alma mater conferred on him the degree of Ph. D., and in 1900 the degree of LL. D. was given by Alfred University. In 1883 he was married to Lucy Romilda, daughter of Capt. Wm. Barbee and Christabel (Newman) Brown, of Ohio. They have one son, Weston Brown Flint.

HAYNE, Arthur Perronneau, soldier and senator, was born at Charleston, S. C., March 12, 1790. His grand-uncle was the distinguished Col. Isaac Hayne, who was executed by the British. He received a good education, and entered a counting-room, where he remained four years, but in 1807 he entered the army, and, though only seventeen years of age, was commissioned lieutenant in a regiment of light dragoons commanded by Col. Wade Hampton. In 1809 he was ordered to the Mississippi, where the foundation of his military knowledge was laid. In 1812 he was ordered to the North, winning at the battle of Sacket Harbor his promotion to the command of a squadron, with the rank of major in the line, and in 1813 accompanied Gen. Wilkinson in his campaign down the St. Lawrence. In 1814 he was appointed inspector-general; joined Gen. Jackson in the campaign against the Creeks, and after the ratification of the treaty of Fort Jackson accompanied that officer to Mobile, where he acted as adjutant-general and inspector-general. He participated in the storming of Pensacola, and in the engagement below New Orleans on Dec. 23, 1814, distinguishing himself in both actions. Gen. Jackson said of him: "Col. Hayne was every where that duty or danger called." He received the brevet of lieutenant-colonel for his services at Sacket Harbor, Pensacola, and the siege of New Orleans. On the conclusion of the war he was appointed adjutant-general in the northern division of the army, the post of inspector-general being for the time abolished. He was allowed a furlough that he might pursue legal studies, and was admitted to the bar of Pennsylvania after a course pursued under the direction of Judge Duncan. On the reorganization of the army he was again made inspector-general under Gen. Jackson, and during the second Florida campaign commanded the Tennessee volunteers. In 1820 he retired from the army, and shortly after was elected to the state legislature for several terms, serving as chairman of the military committee. In 1829 he was chosen a presidential elector, voting for Jackson and Calhoun. Later he was appointed by Pres. Jackson agent for naval affairs in the Mediterranean, held that position five years, and when offered a mission to Belgium, declined. In 1858 he was appointed to fill a vacancy in the U. S. senate, made by the death of J. J. Evans, and represented South Carolina in that body from May, 1858, to January, 1859. He died at Charleston, S. C., Jan. 7, 1867. He was a brother of Sen. Robert Y. Hayne.

PINCKNEY, Henry Laurens, congressman, was born in Charleston, S. C., Sept. 24, 1794, son of Charles Pinckney, who was governor of South Carolina in 1796-98 and 1806-8. Henry was graduated at the South Carolina College in 1812; studied law with his brother-in-law, Robert Y. Hayne, and was admitted to the bar, but never practiced. He was a member of the legislature from 1816 to 1833.

and was chairman of the committee on ways and means for eight years. He was mayor of Charleston in 1832, and in 1839 and 1849; was a representative in Congress from South Carolina from 1833 to 1837, and was subsequently collector of the port, and a member of the legislature. He founded and was editor of the Charleston "Mercury" in 1819-34, the organ of the State Rights party, of which he was a prominent leader. He was the author of "Memoirs of Jonathan Mayne"; "Robert Y. Hayne"; and "Andrew Jackson," and published many addresses and orations. He died in Charleston, Feb. 3, 1863.

GRONLUND, Laurence, author and socialist, was born in Denmark, July 13, 1846. As a boy he took part in the war between Denmark and Germany. In 1865 he was graduated at the University of Copenhagen, receiving the degree of A.M., and then began the study of law, but in 1867 came to the United States, and taught German in a public school in Milwaukee. In 1869 he was admitted to the bar, and practiced in Chicago. By reading Pascal's "Pensees" he, according to his own statement, became a socialist "before he knew it." He soon gained prominence in the socialist labor party; made a lecturing tour through the West, and in the state of Washington became the editor of a socialist paper. Subsequently he secured a position under Carroll D. Wright, U. S. commissioner of labor statistics in Washington, D. C., and in this capacity did important work, but relinquished it for the lecture field. About 1888 he was elected a member of the national executive committee of the socialist labor party. In later years, however, he discontinued his connection with the party, having changed his views, and since then has worked more with the opportunist reformers. Shortly before his death he joined the staff of the New York "Journal," for which paper he edited the labor department. Laurence Gronlund published a number of books and pamphlets all having a wide bearing on social problems. In 1880 appeared a dialogue on the "Coming Revolution," and in 1884 his "Coöperative Commonwealth." This was the first statement of modern socialism published in this country, and it has had a wide influence. His other works are: "The Insufficiency of Henry George's Theory" (New York, 1886); "C'a Ita; or, Danton in the French Revolution" (1887); "Our Destiny" (1891), a work religious as well as socialistic, its central thought being that socialism is not a "bread and butter question," nor one of personal or altruistic idealism, but a movement toward the organic unity of national society, without which true morality is impossible; and "The New Economy" (Chicago, 1898), a means for the peaceable solution of the social problem. Laurence Gronlund was married Dec. 24, 1895, and died in New York city, Oct. 15, 1899.

HAAS, Carl de, journalist and author, was born at Wuppertal, Germany, and became a teacher in his native place. In the early forties he emigrated to the United States, and engaged in agricultural work near Fond du Lac, Wis. In 1848 he removed to Buffalo, N. Y., and founded there a German weekly, "Der Demokrat." Three years later he began to publish it as a daily, but it was soon amalgamated with Bruen's "Weltbürger." After several years he left the publishing company and became a theatre director in Detroit, whence, in 1860, he returned to Fond du Lac, and there spent the rest of his life. Besides a number of poems that appeared in the Buffalo, St. Louis and Fond du Lac papers, he published "Nordamerika, Wisconsin, Winke für Auswanderer" (Barmen, 1846), a book which served to vigorously promote German emigration to Wisconsin. Carl de Haas died at Fond du Lac in 1875.

DE KOVEN, James, clergyman and author, was born at Middletown, Conn., Sept. 19, 1831, son of Henry Louis and Margaret (Schor) De Koven. He early evinced literary ability, and at the age of twelve wrote a hymn on the Epiphany, which, by request of Francis Vinton, D. D., was printed, and was sung by the children of Grace Church, Brooklyn heights, upon that festival. There is also extant a little book of poems written by him, at the age of fourteen, chiefly upon religious topics. He was graduated at Columbia College in 1851, and desiring to enter the Episcopal ministry, studied theology at the New York General Theological Seminary, where he was graduated in 1854. He was ordained to the diaconate by Bishop Williams, and became principal of St. John's hall, at Nashotah House, Wis., then the preparatory department of that theological seminary. On his ordination to the priesthood, by Bishop Kemper, Sept. 23, 1855, he became rector of the Church of St. John Chrysostom at Delfield, Wis., where he founded a parish school, and for five years maintained this in addition to the duties of his professorship. His life from this time forth was one of hard work and self-sacrifice. In 1859, when St. John's Hall and Racine College were amalgamated, chiefly through his instrumentality, as Racine University, he became its warden. To this institution he devoted his life and all his gifts of intellect and heart,

and he bequeathed to it his entire fortune. He effected many reforms in the methods and discipline, and under his management the capacity and means of the university were very greatly augmented; new buildings were erected, 200 acres of land were added, and in 1861 he introduced the Oxford cap and gown for both students and professors. His personal influence was great; he ruled by love, and was noted for his kindly courtesy, genial humor, and brilliant conversational powers. Dr. De Koven was a very advanced high churchman, and in 1873 was high church candidate for the bishopric of Massachusetts, which he lost by only a few votes. During the bitter controversy which arose at that time between the high and low church parties, he established his reputation as one of the most powerful orators in the Episcopal pulpit; his utterances made a deep impression, and he was elected bishop of Illinois; but his election was not confirmed by the diocesan convention. The following year he was again put forward as a candidate for a bishopric, but withdrew his name, preferring to remain at Racine in the work to which he was so peculiarly adapted. He received the degree of D. D. from Hobart College in 1862. He never married. He died very suddenly at Racine, March 19, 1879.

BARBOUR, Lucien, jurist, was born at Canton, Hartford co., Conn., March 4, 1811. He was graduated at Amherst College in 1837, having been himself a teacher while receiving his education; he removed to Indiana, where he studied law, and established himself in his practice at Indianapolis. He was appointed by Pres. Polk U. S. district attorney; acted a number of times as arbitrator between the state of Indiana and private corporations; in 1852 was appointed a commissioner to prepare a code of practice for the state, and in 1855-57 was a representative from Indiana in the 34th congress.

NYE, James Warren, territorial governor of Nevada (1861-64), was born at De Ruyter, Madison co., N. Y., June 10, 1815. He was educated at Cortland Academy, Homer, N. Y.; but left it to study law in Troy. He practiced with much success in his native county, served as district attorney and in 1840-48 as county judge. In 1848 he was an unsuccessful candidate for congress as a Free-soil Democrat. Removing to Syracuse he practiced until 1857, when he became president of the metropolitan board of police, New York city, being the first to hold that office. He was identified with the Republican party from the time of its formation, and having a strong sense of humor and the gift of eloquence, he proved an effective stump-speaker, especially during the canvass of 1860, when he made a tour through the West in company with William H. Seward. In 1861 Pres. Lincoln appointed him governor of Nevada territory, where he exerted a strong influence in counteracting the efforts of the pro-slavery party. On the admission of Nevada as a state (Oct. 31, 1864) he was elected U. S. senator for the term 1865-67, and served on the committees on naval affairs and territories and as chairman of that on enrolled bills; was also a member of the national committee appointed to accompany the remains of Pres. Lincoln to Illinois. In January, 1867, he was re-elected to the senate for a full term, and served as chairman of the committee on revolutionary claims. Sen. Nye died at White Plains, N. Y., Dec. 25, 1876.

BLASDEL, Henry Goode, first state governor of Nevada (1864-71), was born near Lawrenceburg, Dearborn co., Ind., Jan. 20, 1825, third son of Jacob and Elizabeth (Weaver) Blasdel. His father, a native of New Hampshire, was descended from a Scotchman who emigrated to New England from Glasgow in the latter part of the seventeenth century. His mother was the eldest daughter of John W. Weaver, descendant of a German family which settled in Virginia early in the seventeenth century. In 1804 Mr. Weaver removed from Virginia to Kentucky, and in 1810, on account of his opposition to slavery, to Indiana, settling at Lawrenceburg, where he became prominent as a merchant. Jacob Blasdel was a strong Whig and a warm personal friend of the first Pres. Harrison, and was perhaps the first man west of the Alleghany mountains to publicly advocate total abstinence. He and his wife were members of the Methodist Episcopal church, and their precepts and example had much to do with the formation of their son's character. At the age of fourteen Henry Blasdel entered a seminary to prepare for college; but his father's death two years later necessitated a change of plan, and he took up farming. In 1847 with his wife and child he removed to Aurora, Ind., engaged in various mercantile pursuits there, and in 1851 bought an interest in a steamboat and became her captain. In 1852

H. G. Blasdel

he went to California *via* Nicaragua, and arrived in San Francisco early in June. After an experience of four months' duration he took up farming at Santa Cruz; in the following year was joined by his family and removing to San Francisco opened a produce commission house. This business proved very profitable, but in 1867 he disposed of it and acquired large interests in grain; but in the fall of 1859 found his last dollar

gone. In 1861 with his family he removed to Virginia City, then in the territory of Utah, now in Nevada, where he engaged successfully in mining and in the reduction of gold and silver ores, and was the superintendent of the celebrated Potosi, Hale and Norcross mines. Early in 1864 he sold most of his mining interests, and with his family visited his old home in Indiana. In June of that year he

Nevada State Capitol.

represented Nevada on the committee from the National Union League that informed Pres. Lincoln of his second nomination. He went to the front in June, 1864, while Gen. Grant was moving his columns to the James river. In September he returned to Nevada, where during his absence a state constitution had been adopted. He was unanimously nominated as a candidate for the governorship by the Republican convention and was elected, serving for two years as was provided by the constitution as to the official term of the first governor. His first message was read to the legislature on Dec. 14th. Among other facts presented for consideration was the indebtedness of \$264,000 inherited by the new government from the territory, and to meet this, as also the expenses of the constitutional convention, was an empty treasury and an uncollected tax of \$70,000. Gov. Blasdel recommended economy and wise revenue laws. The legislature passed a joint resolution congratulating the country on the reelection of Lincoln and pledging the lives, honor and fortunes of Nevada in support of the government, also a congratulatory resolution to Gen. Sherman on the design and brilliant execution of his "march to the sea." On Feb. 16, 1865, the legislature ratified the thirteenth amendment to the Constitution of the United States, by which slavery was abolished. Under the constitution of Nevada the terms of all officers elected upon the admission of the state in 1864 expired in November, 1866, and biennially thereafter. This provision made another election necessary in 1866, and Blasdel was returned. At the close of his term he again turned his attention to mining. Gov. Blasdel was a Freemason, a Knight Templar, and an Odd Fellow. Like his father he was a strong advocate of total abstinence. He was married, Dec. 9, 1845, to Sarah Jane, third daughter of Elisha and Lucinda (Sherrill) Cox. Her father was a native of Baltimore; her mother of Boone county, Ky., and a grandniece of Hon. John Minor Botts, of Virginia. Three of their children are Hygin, Sherrill, Henry Goode, Jr., and Mrs. Lillian M. Bernard. Gov. Blasdel died at Fruitvale, Cal., July 26, 1900.

BRADLEY, Lewis Rice, second governor of Nevada (1871-79), was born in Orange county, Va.,

Feb. 18, 1805, son of John and Martha Bradley. After receiving a common school education he engaged in the dry-goods business in Richmond. In 1845 he removed to Howard county, Mo., where he spent seven years in farming. From 1852 until 1866 he lived in Stockton, Cal., made cattle-raising his occupation, and in 1860 was elected to the legis- lature. Removing to Nevada in 1866, he continued to raise stock. In 1870 he was elected governor, and in 1874 was re-elected by a greatly increased major- ity. He was a prominent member of the Independ- ent Order of Odd Fellows. Gov. Bradley was mar- ried in Orange county, Va., to Virginia, daughter of Reuben and Sarah Willis. They had a son and three daughters. Gov. Bradley died at Elko, Nev., March 21, 1879.

KINKEAD, John Henry, third state governor of Nevada (1879-83), was born at Smithfield (now known as Somerville), Somerset co., Pa., Dec. 10, 1826, son of James S. Kinkead. His father was an engineer and contractor on the old national turnpike road, following its construction from Baltimore county, Md., to Zanesville, Muskingum co., O., building all or nearly all the bridges on the line, the material used being stone. One constructed at Smithfield, on the Yonghiozheny, was in as good condition a few years ago as when constructed in 1818. The family removed to Zanesville, in 1829, and thence to Lancaster, where John received his

education at the high school, an institution of some repute at that time. From school he went into business, removing in 1844 to St. Louis, Mo., where he became a salesman in a large jobbing dry-goods store. In 1849 he formed a partnership with J. W. Livingston, and the young men established themselves in Salt Lake City, there building up a large trade in dry-goods. He removed to California in 1854, engaged in various pursuits and finally settled in Marys- ville, but two years later went back to the East and tried mer- cantile business in New York city. Returning to Marysville in the winter of 1856-57, he

met with one reverse after another. The discovery of the great silver mines in the Washoe region, at that time a part of Utah territory, led to a large emigration from California and Mr. Kinkead was one of the many who hoped to retrieve their fortunes in a new centre of population. Making Carson City his place of residence, he was active in the move- ment to create the commonwealth of Nevada, and when, in 1861, the territory was formed from the western part of Utah, he was elected territorial treasurer. He was a member of the convention which framed the present constitution of the state. In 1867 he went to Alaska with the "occupancy" expedition, and witnessed the transfer of the ter- ritory to the United States. He remained there nearly three years, in business in Sitka; then returned to Nevada, engaging in mercantile, mining and mill- ing business in Humboldt and Lander counties. In 1878 he was elected governor by the Republican party and at the end of his term was offered a re- election, but declined it. In 1884 Pres. Arthur ap- pointed him governor of the newly created district of Alaska, but in 1885 he returned to Carson City. Gov. Kinkead was married at Marysville, Cal., Jan. 1, 1856, to Lizzie, daughter of John C. Fale.

ADAMS, Jewett W., fourth governor of Nevada (1883-87), was born on South Hero Island, Grand Isle co., Vt., Aug. 6, 1835, son of William and

Nancy Adams. He was educated at a district school. It became necessary for him to earn his own living, and at the age of sixteen he started for California, which he reached in 1852 by way of the isthmus of Panama. Five years were spent in various kinds of business, chiefly at mining camps, and then he settled in Bear valley, Marijosa co., where he opened a general store. In 1860 he disposed of this business at a handsome profit, and accepted the position of pay- master on the Fremont estate, with its large mercan- tile interests and its large number of employees, but after four years resigned, and, having enjoyed a sea- son of rest, removed to Carson City, Nev. Prosperity attended the investment of his earnings in cattle and his efforts at stock-raising, while as a citizen he gained so great popularity that in 1871 he became the Democratic candidate for the office of lieutenant governor. He was elected by a hand- some majority, and in 1878 was renominated and re-elected, being the only candidate of his party not defeated. In 1882 he was elected governor. On the expiration of his term he retired to private life and to stock-raising; but in June, 1891, was appointed superintendent of the U. S. mint at Carson City by Pres. Cleveland, and is still incumbent of the office. He was married at Corsicana, Texas, in 1878, to Emma, daughter of William and Lucia (E.) Lee.

STEVENSON, Christopher C., fifth governor of Nevada (1887-91).

COLCORD, Roswell K., sixth governor of Nevada (1891-95), was born at Searsport, near Belfast, Waldo co., Me., April 25, 1839, descendant of Edward Colcord, one of the settlers of Exeter, N.H., in 1638. He was educated in the public schools of his native town and subsequently learned the trade of shipcarpenter. This he carried on until 1856, when removing to California he engaged in placer mining in Tuolumne and Calaveras counties. In 1860 Mr. Colcord became a resident of Nevada, and as super- intendent, manager and owner of mines and mills he has been continuously identified with the material progress of the state, while as an adherent of the Republican party he has been politically prominent, though not from choice. He is an advocate of the free coinage of silver; a tariff for revenue with in- cidental protection; a high liquor license, proper restriction of immigration and naturalization, and the strict separation of religion from politics and the public schools. In 1890 he was nominated for office for the first time as the Republican candidate for the governorship. His administration, which covered the regular period of four years, was creditable to himself and to his state. Gov. Colcord is married, and has one child, a daughter.

JONES, John Edward, seventh governor of Nevada (1895-96), was born in Montgomery- shire, Wales, Dec. 5, 1810, eldest son of Edward Jones, a farmer, well known for his hospitality and philanthropic spirit. His primary education was acquired in the national school of his native town. In 1856 the family came to the United States, and settled near Pleasant Grove, Des Moines co., Ia. Two weeks after their home was established Edward Jones died, and removal becoming necessary, the mother settled near Iowa City, John- son co. Young Jones was now enabled to attend the State University, and during the course taught a school for a time in order to meet expenses. After his graduation, in 1865, he removed to Colorado, where he engaged in teaching, mining and farming until the autumn of 1867, when he went to the ter- ritory of Wyoming to aid in the construction of the Union Pacific railroad. On the completion of the work, two years later, Mr. Jones removed to White Pine county, Nev., and in the same year to Eureka

county, settling in the town of Eureka. He was occupied with mining and agricultural pursuits until 1883, when Pres. Arthur appointed him U. S. deputy internal revenue collector. In 1886 he was elected surveyor general of the state, in 1890 was re-elected and served until his election to the executive chair in 1894. He was one of the active organizers of the state militia, and in 1876 joined company B, 1st brigade; in 1882 was commissioned junior second lieutenant; in October, 1885, was commissioned paymaster, with the rank of major; in July, 1886, was commissioned assistant adjutant with the rank of major, on the staff of the 2d brigade. As the candidate for governor of the silver Republicans he had as opponents a regular Republican, a Democrat and a Populist, but was elected by a plurality of 1,362 votes, and was inaugurated Jan. 8, 1895. He was an advocate of internal improvements by the general government, of the irrigation of arid lands, of non-sectarian teaching in schools and other public institutions supported by public funds, and of protection to American industries. Gov. Jones was married at Eureka, Nev., Nov. 25, 1880, to Elizabeth, daughter of William and Ann (Howells) Weyburn, who bore him a son and a daughter. He died in San Francisco, Cal., April 10, 1896.

John Jones

ter of William and Ann (Howells) Weyburn, who bore him a son and a daughter. He died in San Francisco, Cal., April 10, 1896.

SADLER, Reinhold, eighth governor of Nevada (1897-1903), was born at Czarnikau, kingdom of Prussia, Jan. 10, 1848, son of Wilhelm and Wilhelmine Sadler. His father was a toolsmith and merchant; his mother's father was a nailsmith. In 1864, Reinhold Sadler came to the United State, and seven years later was followed by his parents. Virginia City was his first place of residence, whence in 1864 he removed to Austin, Nev., to remain two years. In 1869 he removed to Hamilton, White Pine co.,

and with H. J. Sadler and Albert Mau, his brother and uncle, formed the business firm of Albert Mau & Co., dealers in general merchandise. In 1874 he established himself in Carson City, and there engaged in stock raising, mining and milling, also serving as county commissioner to fill a vacancy. He was elected treasurer of Eureka county on the Democratic ticket in 1880; as lieutenant-governor of the state in 1895, and as governor in 1896, after serving as chief executive *ex officio* after the death of Gov. Jones. In 1899 he was re-elected. Gov. Sadler has been chairman of the Democratic

county central committee several times and delegate to the national Democratic convention. He was married at Hamilton, Nev., in 1875, to Louisa, daughter of Wilhelm Zadrow, natives of Czarnikau, Prussia. They have two sons and three daughters.

DE ROSSET, Armand John, physician, was born at Wilmington, N. C., Nov. 17, 1767, son of Dr. Moses John and Mary (Ivlie) De Rosset, de grandson of Armand De Rosset, M. D., a Hugue-

not. His father, who was a native of London, England, traced his ancestry back to residents of Narbonne, one of the old French provinces in the fourteenth century. He emigrated to America about 1760, and settled in Wilmington, where he practiced medicine until his death there in 1767. His brother, Louis Henry, was a member of the king's council in 1754-64, and remained loyal during the revolution, dying in London. Dr. Armand J. De Rosset's mother was a native of Jamaica, W. I. He was graduated at the College of New Jersey in 1784, completing his course in three years, owing to his diligence and close attention to his studies; next studied medicine under Dr. Benjamin Rush, with whom he enjoyed a long friendship. He was appointed port physician at Wilmington, and held that position for many years. He practiced for sixty-nine years, and was said to have prescribed for six generations in one family. Dr. De Rosset was considered one of the most remarkable men of the medical profession in this country, and was in every respect a model of the Christian and gentleman. In 1791 he was married to Mary Fullerton, of Charleston, S. C., and after her death to her sister, Catherine, Aug. 1, 1799. He had seven children. His two sons, Moses John (b. Jan. 11, 1796; d. June 30, 1826), and Armand John (b. Oct. 6, 1807; d. Dec. 9, 1897), were associated with him in practice. Three daughters survive him: Catherine Gabrielle, wife of William M. Kennedy; Elizabeth Ann, and Mary Jane, wife of Rev. Moses A. Curtis, the botanist. He died at Wilmington, N. C., April 4, 1859.

DE ROSSET, William Lord, merchant and soldier, was born at Wilmington, N. C., Oct. 27, 1832, son of Dr. Armand John and Eliza H. (Lord) De Rosset. He was educated at the University of North Carolina, which he left to apprentice himself to the Lawrence Machine Works, Lawrence, Mass. His health failed, and returning home, he engaged in business with his father until the civil war. Being in command of a volunteer military company, he was ordered to report to the commander of the 30th regiment, North Carolina militia, and with several other companies, proceeded to Fort Caswell, at the entrance to the Cape Fear river. In May he was appointed major of state troops. He served in the seven days' fights around Richmond, in the defeat of McClellan. In 1863, after being disabled by wounds in the battle of Sharpsburg, and incapacitated from further field service, he again took up mercantile business, in connection with his father and brother, until 1877, when he accepted service with the Navassa Gunno Co., of Wilmington. He became secretary and treasurer in 1896, and still holds that position. In 1854 he was married to Caroline Horatia Nelson, a lineal descendant of Lord Nelson, by whom he had two children, one of whom, W. L. De Rosset, Jr., still lives. He was married again, to Elizabeth Simpson Nash, a granddaughter of Chief-Justice Nash, of the North Carolina supreme court, by whom he had seven children. Of these Mary, wife of Walter L. Holt, a large cotton mill operator, of Fayetteville, N. C.; Catherine, wife of Chas. A. Scott, banker, of Graham, N. C.; Anita and Frederick Nash still live.

DE ROSSET, Moses John, physician, was born at Wilmington, N. C., July 4, 1838, son of Armand John and Eliza Hill (Lord) de Rosset. He received his early education in Geneva, Switzerland, and showed remarkable aptitude for languages and mathematics. He studied medicine at the University of New York, where he was graduated in 1850, and was immediately appointed resident physician at Bellevue Hospital, New York. During the civil war he was assistant surgeon in the Confederate army, and after serving through Stonewall Jackson's valley campaign, was promoted to be full sur-

Reinhold Sadler

geon, doing duty in Richmond, Va. Later he became inspector of hospitals of the department of Henrico. After the war he renewed the practice of his profession in Baltimore, and became adjunct professor of chemistry in the medical department of the University of Maryland. He was also professor of chemistry in the Maryland College of Pharmacy and in the Baltimore College of Dental Surgery. In 1873 he removed to Wilmington, N. C., and made a specialty of ophthalmology and otology. Dr. De Rosset was a member of the Medical Society of North Carolina; the New Hanover County Medical Society; the Historical and Scientific Society of Wilmington; the Maryland Academy of Sciences; the Baltimore Pathological Society, and an honorary member of several other societies; contributor of many papers to medical journals, and translator and publisher of "Bonchardat's Annuaire" for 1867. He devised a new form of inhaler for anaesthesia and a new form of canule-scissors for operating within the eye. He also demonstrated by frozen section that after the extraction of the lens the lenticular fossa disappears and the anterior surface of the vitreous becomes convex. In 1863 he was married to Adelaide Savage, daughter of Hon. Wm. B. Meares, of Wilmington, by whom he had nine children. Dr. De Rosset died in Wilmington, May 1, 1881.

SEWELL, David, jurist, was born at York, Me., Oct. 7, 1735. He was graduated at Harvard University in 1755, and was a classmate and friend of John Adams. In 1759 he established himself at York, and practiced law for several years. He was appointed justice of the peace in 1762; became register of probate in 1766; took an active part in the revolution in 1776; was a member of the legislature, and was chosen councilor. In 1777 he was appointed a justice of the superior court. From 1789 to 1818 he was judge of the U. S. district court of Maine. He received the degree of LL. D. from Bowdoin College in 1812. Judge Sewell died at York, Me., Oct. 22, 1825.

MCBRIDE, James, physician and botanist, was born in Williamsburg county, S. C., April 17, 1784. He was early left an orphan with small means, and gained his education largely by his indefatigable industry and perseverance. He was a classmate of Gadsden, Grimké and Calhoun at Yale College, and was graduated in 1806. He then studied medicine, and practiced as a physician at Pineville, S. C. His love of natural science led him to devote much of his leisure to the study of botany. He contributed valuable papers to the "Transactions" of the Linnean Society, as well as to scientific and medical journals. Dr. Stephen Elliott, who dedicated the second volume of his "Botany of South Carolina and Georgia" to the memory of Dr. McBride, and also named for him the *Macbridia pulera*, said of him: "For the medical observations I have been indebted to Dr. James McBride, a gentleman who, uniting great sagacity to extensive and accurate botanical knowledge, has made the medical properties of our plants a subject of careful investigation. Devotedly attached to science, he had the talent to make it popular wherever his influence extended. Profoundly skilled in his profession, and high in the confidence of his fellow-citizens, he fell a victim to the fatigue and exposure of an extensive practice, in the midst of a brilliant career, with prospects of increasing usefulness and extended reputation." He died during an epidemic of yellow fever, in Charleston, S. C., Sept. 21, 1817.

ROBINSON, Albert Alonzo, railroad president, was born at South Reading, Windsor co., Vt., Oct. 21, 1844, son of Ebenezer, Jr., and Adaline (Williams) Robinson, and a descendant of William Robinson, one of the early settlers of Cambridge, Mass. His grandfather, Ebenezer Robinson, of Lex-

ington, Mass., served in the revolutionary war for two years, both as privateer and as a soldier in the land forces, and for about six months was a captive on the prison ship Jersey. Mr. Robinson was educated in the public schools, at Milton (Wis.) Academy and at the University of Michigan, where he was graduated in 1869, taking the degrees of C. E. and B. S., and in 1871 that of M. S. In June, 1900, the honorary degree of LL. D. was conferred upon him by his alma mater. From childhood until he reached his majority he was engaged in farm labor out of school hours, except in 1856-59, when he worked as a clerk in dry-goods or grocery stores. In 1866-68 he was employed for about five months each year as assistant on the U. S. lake surveys in astronomical field work and on triangulation of the Great lakes. His work on railroads began May 27, 1869, when he entered the service of the St. Joseph and Denver City railroad as a man in the engineering corps. Thereafter he served successively as chairman, levelman, transit man, office engineer, locating engineer and assistant engineer, until April 1, 1871. Then he became assistant engineer of the Atchison, Topeka and Santa Fé railroad, in charge of location and construction, and two years later (April 1, 1873) was made chief engineer, which position he held until August, 1890. From September, 1880, until October, 1881, he also served as division superintendent on the Atchison, Topeka and Santa Fé railway, Las Vegas to Santa Fé, Deming and El Paso. From Oct. 1, 1881, until June 1, 1883, he was superintendent of bridges, buildings and water service on that rail road; from June 1, 1883, until Sept. 1, 1883, assistant general superintendent; from Sept. 1, 1883, until March 1, 1884, general superintendent. From March 1, 1884, until Feb. 1, 1886, Mr. Robinson was general manager; from Feb. 1, 1886, until May, 1888, second vice-president, and was second vice-president and general manager from May, 1888, until May 3, 1893, when he left this system to accept the presidency of the Mexican Central Railway Co., Ltd. From Aug. 1, 1888, until May 1, 1893, Mr. Robinson was general manager of the Gulf, Colorado and Santa Fé railroad, and for the same period that he was superintendent of the Atchison, Topeka and Santa Fé system he was also general manager of the Sonora railway of Mexico (1884-93), excepting the period February, 1886-May, 1888. During his engineering experience he has had direct charge of the construction of over 4,500 miles of railroad, including, in 1887, the building of the Pueblo and Denver line, 116 miles in 216 days, and also 360 miles of the line from Kansas City to Chicago in 276 days, the latter embracing permanent bridges across the Missouri, Mississippi, Des Moines and Illinois, and of the Atchison, Topeka and Santa Fé. As president of the Mexican Central, he is in charge of the general business and affairs of the road, with headquarters in Boston. Mr. Robinson is a member of the American Society of Civil Engineers. In politics he is a Republican. He was married, Dec. 9, 1869, to Julia Caroline, daughter of Perez C. and Katharine C. (Burdick) Burdick, of Edgerton, Wis. She died Aug. 3, 1881, leaving a daughter, Metta Burdick Robinson, born July 17, 1876. He was married, second, Sept. 3, 1885, to Mrs. Ellen Francis Williams, a sister of his first wife.

TODD, Robert Nathaniel, physician, was born near Lexington, Ky., Jan. 4, 1827, son of Levi L. and Sarah (Ashley) Todd. His mother was a daughter of Capt. Nathaniel Ashley, of Virginia, who served as an officer of the line throughout the war of the revolution. The family removed to Indiana in 1834. Robert's educational advantages were limited to common schools, with such knowledge of Latin as he could gather from an old grammar and reader. He was for several years an invalid, and commenced the study of medicine more as a diversion than a life work. His health, however, began to improve, and the next year (1850) he attended lectures at the old Indiana Central Medical College, which was organized about that time under the preceptorship of Drs. Bobbs, Mears, Deming, Dunlap and others. He was graduated in 1851, and settled

R. A. Todd.

the following spring at Southport, where he remained until the breaking out of the civil war. In 1861 Dr. Todd was appointed surgeon of the 26th Indiana volunteers, and soon after went with his regiment to Missouri, where he remained on duty in camp for almost two years, being finally recalled on account of his wife's death. He again entered the government service as surgeon at Camp Morton, where associated with Dr. Kipp, of the regular army, and under the directorship of Dr. Bobbs he continued until the close of the war. Dr. Todd was appointed professor of the theory and practice of medicine in the Indiana Medical College in 1869, and remained in that capacity until 1874, when he was assigned a similar chair in the Indiana College of Physicians and Surgeons. When both these colleges were unified under the head of the Medical College of Indiana he was appointed professor of the principles and practice of medicine, and filled the chair until his death. He was the first representative from Indiana upon the judicial council of the American Medical Association, and was president of the state society in 1871; an active worker for seven years upon the provisional board, created by the legislature, whose work was the erection and fitting up of large buildings, occupied as the female department of the Hospital for the Insane; was one of the physicians to the Deaf and Dumb Asylum for nearly eight years, and served a single term in the legislature as representative in 1856-57. He was married, in 1854, at Southport, Ind., to Margaret White, his first wife, by whom he had five children; he was married to his second wife, Martha J. Edgar, in 1866, and had four children. He died in Indianapolis, June 13, 1883.

MURPHY, Blanche Elizabeth Mary Annunciata Noel, author, was born at Exton Hall, England, about 1845, eldest daughter of Charles George, second earl of Gainsborough, and Ida Harriet Augusta, daughter of William George, sixteenth earl of Erroll. In a letter to her father, Cardinal Manning thus described the impression she made upon him in her eighteenth year: "I thought her quick, observant and thoughtful, and in character decided and independent beyond her years. In truth, I thought I could see more of this than I could have wished in any one so young; for I did not then know that her mind had balance and strength enough as a counterpoise to a certain self-reliance. She had mixed in society in Rome, and had there met men prominent in Italian politics. I was surprised to see how far she had advanced in their way of thinking, and I remember being half amused and half anxious at her talk about

Garibaldi. . . (but) she was too truly Christian and Catholic to sympathize in anything opposed either to the faith or to the Holy See. . . This gave me the first insight into her character, which was very simple, unaffected and outspoken. Though she had been born and brought up with all the surroundings of the world, and with all the relations and associations which draw other minds under its influence, she seemed to me not only to be unattracted by such influences, but to be repelled by them. I thought I saw a reaction against them and a decided tendency to break through the conventionalities of her life." On March 6, 1870, she was married to Thomas P. Murphy, her father's organist. The earl had shown a natural disinclination to the match, but was finally overborne, and sanctioned it by having the marriage ceremony performed at his residence, and he kept up his relations with his daughter by a close and cordial correspondence after her departure to the United States. After spending some time in London, Mr. and Mrs. Murphy came to this country, where they devoted themselves to music and literature, respectively. She contributed largely to English and American magazines, among the latter the "Galaxy," "Lippincott's" and "The Catholic World." She also published a volume of travels. In 1881 she began the preparation of a treatise upon the "Greek Inscriptions on Mt. Athos," which was never finished, owing to her death, which occurred March 21, 1881, at North Conway, N. H., where she had purchased a cottage and a small farm. Her remains were interred in the family vault at Exton. Her husband died Oct. 11, 1890.

BEEBER, Dimmer, lawyer and jurist, was born at Muncy, Lycoming co., Pa., March 8, 1854, son of Peter D. and Mary Jane (Arley) Beeber, of German extraction. He traces descent from John Beeber, one of three brothers, who settled in Berks county, Pa., in 1768. He enlisted in the 2d battalion, Berks county militia, participated in the battle of the Brandywine, and was known as one of the "court-martial men." After the war he settled in Lycoming county on a tract of land awarded him for his services, and here was born his son, Jacob Beeber, a farmer, and his grandson, Peter D. Beeber, a blacksmith. Dimmer Beeber was educated in the schools of his native town, at the Selingsgrove Academy and at Pennsylvania College, Gettysburg, where he was graduated in 1874. He read law with his elder brother, J. Arley Beeber, was admitted to the bar at Williamsport, Pa., in May, 1876, and in the following September settled in practice in Philadelphia, becoming a partner in the firm of Jones, Carson & Beeber in December, 1894, the other members being J. Levering Jones and Hampton L. Carson. They have appeared in some of the most important cases before the Pennsylvania state and Federal courts, and enjoy a conspicuous position at the bar of Pennsylvania. In 1898 a strong effort was made to have him appointed district attorney, and over 700 prominent lawyers signed a testimonial of his personal and professional qualifications for the office. Failing to receive this honor, he was, in January, 1899, appointed to the bench of the state superior court. Judge Beeber has been an efficient worker in the Republican party for many years, and has been widely known as a campaign orator since his first appearance in behalf of Garfield. He is a member of the Union League and Pennsylvania clubs, both of Phil-

Dimmer Beeber

adelphia, and of the American and Pennsylvania State Bar associations.

COUNSELMAN, Charles, broker, was born in Baltimore, Md., Dec. 25, 1849, son of Jacob and Mary Ann (Wigart) Counselman. He was educated in the common schools of his native city, and spent a year in the office of the general freight agent of the Baltimore and Ohio railroad. In 1869 he went to Chicago, and was employed by the firm of Eli Johnson & Co., dealers in grain and provisions. The next year he sold oil on commission for Chase, Hanford & Co., and in 1871 started in the commission business for himself, about that time becoming a member of the board of trade. His business increased steadily through periods of financial depression as well as of commercial prosperity, disasters

that impeded from time to time being averted by his foresight and courage. Mr. Counselman's principal business is dealing in stocks and grain. He has a branch office in New York, connected by private wires, as well as with Cleveland, Buffalo, Rochester, Boston, Providence, Baltimore, Richmond, Norfolk and other cities. He has about 150 stations in Iowa, Kansas and Nebraska, where grain for his markets is received. Mr. Counselman aided in the erection of the board of trade building, and of the fine building named after him. In politics he is a Republican, and, believing that needed reforms can be best accomplished within the party, has little patience with those

who content themselves with criticism and offer no remedy. He is a member of the Union League, Chicago, Washington Park and Chicago Athletic clubs. He was married in Chicago, Oct. 7, 1874, to Jennie E., daughter of Judge L. B. and Lydia (Arnold) Otis. They have one son, Charles Counselman, Jr., and one daughter, Edith.

TOPPAN, Roland Worthington, president of fire insurance companies, was born at Newburyport, Essex co., Mass., Nov. 9, 1841, son of Edward and Susan Little (Smith) Toppan. His earliest American ancestor was Abraham Toppan, who emigrated from England in 1637, and settled at Newburyport; he is also a direct descendant, on his father's side, from Rev. Michael Wigglesworth, of Malden, Mass., author of "The Day of Doom" (1662), a poem popular in New England until the war of the revolution. He was educated in the public schools in Newburyport. In 1860 he was employed by a wholesale firm dealing in oil; in 1864 and 1865 he was engaged in the ice business in Havana, Cuba; in 1867-72 he was connected with the Boston agencies of several New York insurance companies, and in 1881-89 was assistant secretary for the Boston Manufacturers' Mutual Fire Insurance Co., at Boston. In 1869 Mr. Toppan was elected president of the Mill Owners' Mutual Fire Insurance Co., of Boston. This company was incorporated with the Arkwright Mutual Fire Insurance Co., of Boston, in June, 1891, when he became president of the surviving company. He still holds this position (1900), and also that of president of the Paper Mill Insurance Co., of Boston, having been elected to the last-named office in June, 1889. He served three months, in 1864, as sergeant of an unattached company of the Massachusetts militia; but has held no political or social offices, preferring to devote himself entirely to his business pursuits. He is a member of the Malden Club, of Malden, Mass., his

place of residence. Mr. Toppan was married, Oct. 19, 1870, to Elizabeth, daughter of Edward and Sarah (Frothingham) Lesley. They have one child, Roland Lesley Toppan.

ALTSHELER, Joseph Alexander, journalist and novelist, was born at Three Springs, Hart co., Ky., April 29, 1863. His father, a native of Prussia, came to the United States at the age of twenty. He was educated in the common schools of his native state, at Liberty College, Glasgow, Ky., and then at Vanderbilt University, Nashville, Tenn. After leaving college Mr. Altsheeler entered journalism on the Louisville "Evening Post," but a year later was transferred to the Louisville "Courier-Journal," where he served successively as reporter, dramatic critic, legislative correspondent, city editor, commercial editor and editorial writer. In 1892 he removed to New York city and joined the staff of the "World," which paper he represented at the Columbian exposition and in the Hawaiian islands. Returning in 1894 he took charge of the "World's" tri-weekly edition and still holds that position. He began writing fiction in 1896, devoting himself to American historical novels, published as follows: "The Sun of Saratoga" (1897); "In Hostile Red"; "A Soldier of Manhattan" (1897); "A Herald of the West" (1898); "The Last Rebel" (1899); "My Captive," and "In Circling Camps" (1900). These have attained great popularity solely by their merit. The San Francisco "Chronicle," speaking of "A Herald of the West," called it "a romance of our history which has not been surpassed in dramatic force, vivid coloring and historical interest." He is a member of the Authors' Club. Mr. Altsheeler was married at Glasgow, Ky., May 30, 1888, to Sara, daughter of Samuel H. and May R. Boles. Her father has served several terms in the state senate, and has held other offices of distinction. They have a son, Sydney.

MEYER, George von Lengerke, merchant and legislator, was born in Boston, Mass., June 24, 1858, son of George Augustus and Grace Ellen (Parker) Meyer. His father, a native of New York city, was a prominent merchant of Boston; his mother was a daughter of William Parker, of Boston, and a granddaughter of Bishop Samuel Parker, of the Episcopal diocese of Massachusetts. He was educated in the private schools of his native city, and was graduated at Harvard College in 1879. Thereafter for two years he was in the office of Alpheus H. Hardy, commission merchant, and then became a member of the firm of Linder & Meyer, East India merchants, established by his father in 1848. In addition to conducting the business of this firm, Mr. Meyer is president of the Ames Plow Co., of the New England Electric Vehicle Transportation Co., and of the Essex Agricultural Society; director of the Old Colony Trust Co., of the National Bank of Commerce, the Amoskeag Manufacturing Co., the Amory Manufacturing Co., and the Electric Corporation. He is also treasurer of the Boston Lying-in Hospital. He has always been active in politics as a Republican, and in 1889 was elected to the common council of Boston for two years, serving meantime as a member of committees on finance, water, laying out and widening of streets, and on the Charles river bridges. In 1890 he was elected an alderman from the 4th district; in 1891 a representative from the 9th ward to the state legislature.

Ch. Counselman

George Meyer

He was five times re-elected to the legislature, serving as chairman of the committee on railroads in 1892, and receiving election as speaker of the house of representatives for three consecutive years, 1894, 1895 and 1896. He was elected a member of the Republican national committee in 1899. In December, 1900, he was appointed by Pres. McKinley U. S. ambassador to Italy, an office he still holds. Mr. Meyer is a member of the Athletic, St. Botolph and Somerset clubs, of Boston. He was married, in 1885, to Alice, daughter of Charles H. Appleton, of Boston, and has two daughters, Julia and Alice, and one son, G. v. L. Meyer, Jr.

POWERS, Samuel Leland, lawyer, was born at Cornish, Sullivan co., N. H., Oct. 26, 1848, son of Larnard and Ruby Metcalf (Barton) Powers. His original American ancestor was Walter Power, who came from England to Salem, Mass., in 1648. William, the son of this colonist, who added the letters to the surname, was among the early settlers of Littleton, Middlesex co., Mass. Col. Samuel Powers, of a Massachusetts regiment in the revolutionary war, was grandfather of the present representative. Samuel L. Powers was educated at Kimball Union Academy, Meriden, N. H., and Phillips Exeter Academy, and was graduated at Dartmouth College in 1874. He studied law in the University of the City of New York and in the office of Berry & Gaskill, Worcester, Mass. Being admitted to the bar in 1875,

he began practice in partnership with Hon. Samuel W. McCall; but this association was dissolved at the end of a year, and Mr. Powers was associated with Col. J. H. Benton, Jr., for four years, and later with his brother, Erastus B. Powers. In 1887 he became general counsel for the New England Telephone and Telegraph Co., and since that time has devoted himself to corporation law, with particular reference to electrical developments. He has been counsel for the American Bell Telephone Co. and other corporations controlling the telephone business in New England, as well as various electric

street railways. Removing to Boston in 1876, for many years he held office in the city government of Newton, his residence, and was a member of the local school board. He is a member of the Boston University and Boston Athletic clubs; was one of the originators and former president of the Newton Club, of Newton, and is president of the Dartmouth Club, of Boston; was the founder of the Dartmouth Educational Association, and of an entrance scholarship at Dartmouth College. On June 1, 1898, he was married to Eva, daughter of Capt. Prince S. Crowell, of Dennis, Mass., and has one son, Leland Powers.

MANSFIELD, Edward Deering, author, was born in New Haven, Conn., Aug. 17, 1801, son of Jared Mansfield, one of the prominent scholars of his day. He was appointed to the U. S. Military Academy at West Point, where he was graduated in the class of 1819, and became a lieutenant of engineers. He did not remain in the army, however, but desiring to continue his literary studies he entered Princeton College, where he was graduated in 1822 with honors. He then studied law under Judge Gould, of Litchfield, and was admitted to the Connecticut bar in 1825, but he immediately removed to Cincinnati, O. Here he entered into partnership with Prof. O. M. Mitchel, but his legal practice was of short duration, the members of the firm

being more given to scientific and literary investigation than to details of the law. For a short time he was professor of constitutional law and history in Cincinnati College. He became editor of the Cincinnati "Chronicle" in 1835, and continued as such until 1849, when he took charge of the "Chronicle and Atlas." During the year 1857 he edited the Cincinnati "Gazette," and in 1853-71 the "Railroad Record." He was for many years correspondent of the New York "Times" under the pen-name of "A Veteran Observer." Mr. Mansfield was one of the most extensive newspaper writers in the country, and was remarkable for his impartiality and fairness. He served as commissioner of statistics for Ohio in 1859-68, and was an associate of the French Société de Statistique Universelle. Of his writings the most interesting is a volume of "Personal Memoirs," extending from 1803 until 1843 (1879). His other publications are: "The Utility of Mathematics" (1834); "A Political Grammar of the United States" (1834), which has been used extensively as a textbook; "Legal Rights, Duties and Liabilities of Married Women" (1845); "Life of Gen. Winfield Scott" (1846); "History of the Mexican War" (1848); "American Education" (1850); "Memoirs of Daniel Drake" (1855); "Life of Gen. U. S. Grant" (1868), and many papers on mathematics, politics, education and the early history of Ohio. The degree of A.M. was conferred upon him by Princeton College in 1851, and that of LL.D. by Marietta College in 1854. He was simple in his habits, easy of approach, and cheerful and sympathetic in his intercourse with men. He died at Morrow, O., Oct. 27, 1880.

DAVIS, George Leonard, naval officer, was born in Boston, Mass., Aug. 10, 1833. At the outbreak of the civil war he enlisted in the navy, and was commissioned paymaster, April 16, 1861. He commanded the powder division of the steam sloop *Pensacola* during the passage of forts St. Philip and Jackson and at the capture of New Orleans in 1862. On this last occasion he received honorable mention. He was relieved in May, 1863, and went North, but was again paymaster on the *Clara Dolan* and the *Great Western*. He was commissioned pay-inspector from March 3, 1871, and was on duty at the Boston navy yard in 1883; was fleet paymaster of the north and south Pacific stations, south Atlantic station, and was retired Jan. 17, 1881. He died in Brooklyn, N. Y., Dec. 3, 1884.

SCOTT, Richard, colonist, was born at Glemsford, Suffolk, England, in 1605, son of Edward and Sarah (Carter) Scott, and a descendant of the Scotts of Scotts-Hall, Kent. He sailed for Boston in the ship Griffin, in 1634, with Ann Hutchinson and her husband, and joined Roger Williams in Providence, R. I., in 1637. He was one of the fifty-four co-proprietors with Williams in his purchase from the Indians, and was one of those who participated in the laying out of the town lots in Providence. Later he occupied an extensive tract of land between Providence and Pawtucket and extending north into Smithfield. It embraced Scott's pond and the land on which the village of Lonsdale now stands, a part of which he later sold to the Browns and others. A part of this tract was owned by his descendants for more than 200 years. In 1657 he became the first Rhode Island Quaker with his wife and daughters, Patience and Mary, and some of his descendants still remain of that faith. He was a commissioner to Boston in 1645 to settle the controversy with that colony in regard to Shawmut, and a deputy to the assembly in 1666. Richard Scott was a signer, and the reputed author of the celebrated covenant made between the first settlers of Providence, which is as follows: "We whose names are hereunder desirous to inhabit in ye towne of providence do promise to subject ourselves in active or passive obedience to all such orders or

Samuel L. Powers

agreements as shall be made for publick good of Or body in an orderly way by the minor consent of the present Inhabitants ministers of families incorporated together into a towne fellowship and others whom they shall admit unto them

Only in civil things.

Richard Scott was married in Boston, in 1637, to Catharine, daughter of the Rev. Francis Marbury and Bridget Dryden, daughter of Sir John Dryden. Catharine Scott was born in London, about 1600, and died in Newport, R. I., March 2, 1687. She was imprisoned in Boston, Mass., in 1658, and whipped "Ten cruel stripes with a three fold corded knotted whip" for denouncing the cruelty and intolerance of the government to Quakers. Richard Scott died in Providence, R. I., about 1681.

SCOTT, Job, minister of the Society of Friends, was born in Providence, R. I., Oct. 18, 1751, son of John and Lydia (Comstock) Scott. He was in the sixth generation from Richard Scott and Catharine Marbury, and was also descended from many other companions of Roger Williams. He received his early education in the schools of the neighborhood, and became a writer and speaker of remarkable vigor. When a young man he taught a private school in the Friends' meeting-house near Lonsdale, R. I. (the oldest building for religious purposes standing in that state). He was an early promoter and vigorous advocate of the better education of Friends, and was one of the most active among the founders of the New England Friends' Yearly Meeting Boarding School, established in Providence, R. I., near the close of the eighteenth century and still successfully conducted. Scott was a friend of Moses Brown, who did much to aid him. He made long journeys among Friends, as far south as North Carolina, and finally to Ireland, where he died at the house of Thomas Shackleton, where Edmund Burke received, among the Quakers, his early classical education. He left unpublished manuscript books and addresses, mainly relating to the doctrines of Friends, and the "Journal" of Job Scott is widely known among the sect. It was published by the New England Yearly Meeting about 1794. This journal was carefully examined by the "committee for sufferings" of the New England Yearly Meeting, seeking for Unitarian heresy, but most of it was sanctioned and was published and republished to all the English speaking world. Job Scott was married, June 1, 1780, to Eunice, daughter of Daniel and Mary (Bowen) Anthony, of Providence. He died at Balutore, Ireland, Nov. 22, 1793.

DELANVAN, Edward Cornelius, merchant and temperance reformer, was born in Schenectady county, N. Y., in 1793. He was a wine merchant by trade, and accumulated by industry and economy a large amount of property at Albany, N. Y., where he erected the Delavan House, which was for a long time a famous temperance hotel. It is remarkable that a man who had amassed a fortune in the sale of intoxicating liquors should have spent it so freely in the cause of temperance. In 1828, together with Dr. Eliphalet Nott, he formed the State Temperance Society, and entered with much zeal

into the cause. He paid generously for the publication of books and for the preparation and circulation of tracts and articles in the newspapers. He also spoke freely and lectured on the subject, and employed others to do the same. During 1835 he contributed articles to the "American Temperance Intelligencer," and to the Albany "Evening Journal," in which he charged the brewers of the city with using filthy water for malting. Eight of them brought suit against him for libel, the aggregate claims for damages amounting to \$300,000. The first trial, which took place in 1840 and lasted six days, attracted wide attention, and resulted in the acquittal of Mr. Delavan and the withdrawal of the other suits. In January, 1837, the first number of the "Journal of the American Temperance Union" was published, Rev. John Marsh being its editor, and 50,000 copies were printed and distributed gratuitously, under Mr. Delavan's direction. He also circulated colored drawings of the human stomach, showing diseased conditions resulting from the effects of alcoholic drinks, and published "Temperance in Wine Countries" (1860). He presented Union College, Schenectady, with a collection of shells and minerals, valued at \$20,000. His reputation extended to Europe. Mr. Delavan lost a large part of his property in the latter years of his life. He died at Schenectady, N. Y., Jan. 15, 1871.

WITHERS, Jones Mitchell, soldier, was born in Madison county, Wis., Jan. 12, 1814, of English descent. In 1835 he was graduated at the U. S. Military Academy, but resigned the same year. During the Creek disturbances, in 1836, he commanded the Alabama volunteers. He subsequently studied law in Tuscaloosa, Ala., being admitted to the bar in 1838. In 1841 he settled in Mobile as a lawyer and commission merchant. He was in the legislature in 1855, and from 1856-61 was mayor of the city. At the outbreak of the civil war he entered the Confederate army as colonel of the 3d Alabama infantry; became brigadier-general in 1861, commanding the defenses of Mobile; major-general in 1862, commanding a division at Shiloh, and participating in the battle of Stone river. During the latter period of the war he was in charge of a department, with headquarters at Montgomery. After the war he returned to Mobile, and edited the "Tribune."

RICE, Thomas D., actor, was born in New York city, May 20, 1808, and learned the trade of wood carving but abandoned it for the stage. He appeared for the first time in a negro character while playing small parts in the dramatic company of Noah Ludlow in Louisville, Ky., and scored a pronounced success by his imitation of an aged, deformed and decrepit slave called Jim Crow, the property of a resident of Louisville. Encouraged by his first reception he adapted Jim Crow to a farce which he produced before crowded houses in the leading cities of the country. He visited England in 1836, where his personation of Jim Crow became the theatrical sensation of the period, and where he laid the foundation of a handsome fortune. Macready and other favorite actors were compelled to give way in the face of his phenomenal popularity, and his tour through the provinces became an ovation. Upon his return to the United States Rice became and remained for many years one of the highest paid and most sought after performers of the time. He soon had a host of imitators and thus became the founder of negro minstrelsy. He wrote many

of his own forces and was also the originator of the dandy stage-negro. Some of his original songs, such as "Jim Crow," "Lucy Long" and "Sich a Gittin' Up Stairs," had great popularity in England, as well as in the United States. He was married while in England to Miss Gladstone, daughter of a well-known London theatrical manager. During the last years of his life he was a member of Wood's minstrels. He died in New York city, Sept. 19, 1860.

JENNEY, Charles A., author and publisher, was born at New Bedford, Mass., Oct. 18, 1841, son of Sanford and Julia Ann (Jenney) Jenney. His father was an architect and builder at New Bedford. His earliest American ancestor, John Jennic, came from England in 1623 in the ship Little James, and became an influential man and of great assistance in building up the colonies. He was private counsel to Gov. Bradford. Weston Jenney, our subject's grandfather, changed the spelling of the family name. Mr. Jenney obtained his early education in the public schools of New Bedford, and was graduated at the High School at the age of fifteen. He then entered the dry goods business and continued in it until the civil war, when he enlisted in the 58th Massachusetts infantry, and was immediately promoted to be quartermaster-sergeant. Subsequently he was transferred to the commissary department and assigned to the U. S. Hospital at Montpelier, Vt., where he remained until mustered out, November, 1865. Mr. Jenney removed to the town of Waupun, Wis., and established a general merchandise business. In 1875 he sold his business there, and went to New York city, where he at once became connected with the National Board of Fire Insurance Underwriters, holding the office of secretary of its statistical bureau up to 1883, when he became a member of the staff of the "Weekly Underwriter" and secretary of the Underwriter Printing and Publishing Co. In 1893 he was elected president and treasurer of this corporation, and still holds the offices. He publishes annually "The Record of Fire Insurance by States." He was appointed special expert on insurance for the

Charles A. Jenney

tenth and the eleventh census of the United States, and he compiled the fire insurance statistics for the tenth census, and gathered and compiled the entire insurance statistics of the country for the eleventh census. Mr. Jenney is a member of the American Statistical Association; the Royal Statistical Society of England; the American Academy of Political and Social Science; the American Trade Press Association; the New England Society, and is on the board of managers of the Society of American Authors. He holds membership in the Union League, the Marine and Field and Church clubs of Brooklyn; the New York Press Club, and the Once a Year Club, composed of insurance journalists, of which he is vice-president. He was married at New Bedford, Dec. 4, 1865, to Mary Francis, daughter of Humphrey and Sarah Ann (Wood) Smith. They have no children.

LOTHROP, Thomas, soldier, was born in England in the early part of the seventeenth century, and resided in Salem, Mass., for many years, where he was a freeman in 1634. He was a representative in the general court for the years 1647, 1653 and 1664. He afterwards settled in Beverly, founded a church there, and represented that town for four years in the

general court. Upon the breaking out of King Philip's war, he joined Maj. Willard at Brookfield, Mass., on Aug. 7, 1675, and had a severe battle with the Indians near Hadley. When Deerfield was attacked by the Indians the farmers in their hurried flight had left a quantity of grain, and Lothrop was detailed from Hadley to rescue it. The grain was loaded in sacks, and while returning on Sept. 18th (o. s.), he was surprised by a large body of Indians in ambush, on the banks of a river, a small stream near South Deerfield, and with all but seven of his men was massacred. The savages numbered 600 or 700 (some authorities say 1,000), and according to Sheldon, the historian, many of Elliot's "praying Indians" were among them. This incident is known as the battle of Bloodybrook, and a monument was erected over the spot in 1838, which bears the following inscription: "On this ground, Capt. Thomas Lothrop and eighty-four men under his command, including eightcentamsters from Deerfield, conveying stores from that town to Hadley, were ambuscaded by about 700 Indians, and the captain and seventy-six men slain, Sept. 18th, 1675 (o. s.). The soldiers who fell were described by a contemporary historian as 'a choice company of young men, the very flower of the county of Essex, none of whom were ashamed to speak with the enemy in the gate.'" Accounts vary as to the number of the slain. Sheldon ("History of Greenfield") gives it as sixty-four, three men belonging to the company of Capt. Moseley, which attacked the Indians on the following day. Twelve were wounded.

POOLE, Hester Martha (Hunt), author, was born at Georgia, Franklin co., Vt., May 27, 1833, daughter of Harry Hunt, who died in his ninety-sixth year, after experiencing, as soldier and farmer, many vicissitudes which impressed themselves on the mind of his daughter. Her literary tastes were early developed, and throughout her school life at Burlington and Castleton, Vt., she was constantly making literary attempts, both in prose and verse, many of which were so admirable as to obtain publication. While traveling extensively in Europe, in 1868, she contributed a series of letters on her experiences to newspapers in New York city. She has since been a frequent contributor to various magazines, writing on domestic subjects, decorative art and ethical matters. Her writings eventually gained her appointments on the staffs of two magazines: "The Household News," of Philadelphia, and "The Decorator and Furnisher," of New York. The most successful of her longer works are: "Fruits and How to Use Them" (1890), a unique work; a series of articles, entitled "From Attic to Cellar," in "The Home Magazine"; "The Philosophy of Living" and "Social Graces," in "Good Housekeeping." She is a member of various societies and an ardent worker for the advancement of woman. In January, 1865, she was married to Cyrus O. Poole, and resides at Metuchen, N. J.

DOWNER, Samuel, merchant and manufacturer, was born at Dorchester (now a part of Boston), Mass., March 8, 1807, son of Samuel and Cath-

erine (Ayres) Downer, the former a successful merchant and enthusiastic horticulturist, especially in the line of pomology. His grandfather, Eliphalet Downer, M.D., a resident of Roxbury, became widely known as "the fighting surgeon." When news came of the advance of the British on Lexington he shouldered a musket, and falling in with the troops on their retreat, had a fierce hand-to-hand combat with a British soldier, whom he bayoneted. Soon after this experience he enlisted as surgeon on one of the first privateers to sail from a New England port. His vessel captured so many of the enemy's ships that her own safety was endangered, the prisoners outnumbering the privateers; as a result, the conquered became conquerors, having excited an insurrection, and carried the vessel to Halifax, where the Americans were imprisoned. Dr. Downer, however, escaped and succeeded in reaching the Continent, where he entered the service of John Paul Jones, at times acting as surgeon, and at other times as volunteer, with the title of surgeon. He passed through many exciting scenes, and twice was captured and imprisoned in England, but escaped. On reaching his native land, after a three years' absence, he made depositions as to the inhuman treatment of his fellow countrymen in English prisons, which led to a vigorous correspondence between Benjamin Franklin, Silas Deane and Viscount Stormont, British ambassador at Paris. Eventually Dr. Downer resumed his practice, and acquired a comfortable competence thereby. His grandson, Samuel, the subject of this sketch, left school at the age of fourteen, to enter business life under his father, in the shipping house of Downer & Baldwin. He was taken into partnership by his father on arriving at the age of twenty-one, the firm name being Downer & Son; three years later he became associated with Silas P. Merriman in the wholesale grocery trade; another period of three years passed, and then he became again associated with his father and Capt. William R. Austin in the manufacture of sperm and whale oil, and sperm candles. The new firm prospered, and continued unchanged until 1844, when the elder men retired, and Samuel Downer, Jr., managed

the business alone until about 1854. A series of experiments begun about that time led him to the discovery that naphthalized hydrocarbons had a power to dissolve castor oil such as no other known hydrocarbons possessed, and by compounding he obtained a good but ill-smelling and not always uniform lubricant. Further experiments resulted in the production of a good illuminating oil from the light ends of oil and the light ends of coal tar, and for a time the manufacture was very profitable; but the opening of oil wells in Pennsylvania and West Virginia caused the artificial liquid to drop in price, and Mr. Downer saw the necessity of using the natural supply

and of establishing works at its source. Investing nearly all his wealth in lands at Corry, Pa., he opened wells there, and in 1861 organized the Downer Kerosene Oil Co., of Boston, New York and Corry, of which he became president. He was president of the National Petroleum Association also, and in its behalf visited Washington, and, much to the benefit of the general public, was successful in his endeavors to induce congress to free this special industry, kerosene oil production, from taxation. He was actively interested in the campaign of 1848 as a Free-soiler, and he was an intimate personal friend of Charles Sum-

ner, Dr. Samuel G. Howe, Horace Mann and Theodore Parker. At the age of seventy Mr. Downer disposed of most of his interest in the works at Corry. He was married at Brighton, in 1836, to Nancy, daughter of Capt. John and Mary (Melville) De Wolf, and granddaughter of Maj. Thomas Melville, a member of the historical Boston tea party. They had two sons and six daughters. He died at Dorchester, Mass., Sept. 20, 1881.

GARNETT, Richard Brooke, soldier, was born in Virginia, in 1819. He was graduated at the U. S. Military Academy in 1841, and entered the army as second lieutenant. He served in the Florida war and on the Texas frontier, becoming a captain on May 9, 1855. From 1856 until 1857 he was engaged in Kansas, and was also in the Utah expedition of 1858, resigning May 17, 1861, to join the Confederate army. He was in many of the battles in Virginia, and was afterward attached to Gen. Lee's army with the rank of brigadier-general, and fell at Gettysburg, July 3, 1863.

HOYT, Joseph Gibson, first chancellor of Washington University, St. Louis (1858-62), was born at Dumbarton, Merrimack co., N. H., Jan. 19, 1815, son of Joshua H. and Olive R. (Gibson) Hoyt. He worked on his father's farm until he was sixteen years of age, and it was largely due to his mother, a brilliant and intellectual woman, that he was encouraged in his desire to obtain something more than a common-school education. In his eighteenth year he entered the Teachers' Seminary at Andover, Mass., where he prepared for Yale, which institution he entered, without conditions, in 1836. Before going to college Mr. Hoyt taught school for five winters. He was distinguished at Yale for superior scholarship, forensic ability, originality of thought and expression, the strength of his friendships and his magnetic power over his associates. He took prizes for excellence in mathematical studies and English composition, and was graduated sixth in a class of 100, his part being an oration. During his senior year he was one of the editors of the "Yale Literary Magazine" and president of the debating society, the Brothers in Unity. In 1841 Mr. Hoyt was appointed professor of mathematics and natural philosophy in Phillips Exeter Academy, New Hampshire, and for eighteen years was connected with that institution. "He was a model teacher. No one better understood the nature of young men. Honest himself, he trusted his pupils, and they knew it. Like a general at the head of an obedient and enthusiastic army, he led them to success." For many years he was the superintendent of schools at Exeter, introduced improved classification and better systems of teaching, and by his efforts, especially by his reports, raised the standard of scholarship in the state. In 1851 he was a member of the convention for the revision of the constitution of New Hampshire, and in 1858 was spoken of as a possible candidate for election to congress. In December, 1858, he accepted the appointment of chancellor of Washington University, St. Louis, and professor of Greek language and literature, to the deep regret of his fellow-citizens and of the students, by whom he was greatly beloved. In his new position he displayed the same sagacity, breadth of view and exceptional qualifications as an instructor that had characterized him at Exeter; but his sojourn was brief, for in the fall of 1860 his health failed, and after that his work was intermittent. Dartmouth conferred upon him the degree of LL.D. in 1859. Dr. Hoyt was a man of great physical and moral courage, a

man of varied gifts, and a writer of much ability on politics, agriculture, music, criticism and other topics, as well as education. He published a revised edition of Colton's "Greek Reader," with a vocabulary prepared by himself, and a volume of "Miscellaneous Writings, Addresses, Lectures and Reviews" (1861). He was married at Exeter, April 13, 1842, to Margarette T., daughter of Samuel and Jessie (Robertson) Chamberlain. She died in 1898, leaving two sons and two daughters: Edward R. and Charles C., metal manufacturers in St. Louis; Annie H. and Frances. Chancellor Hoyt died in St. Louis, Mo., Nov. 26, 1862. A eulogy of him was delivered in St. Louis, Jan. 20, 1863, by Prof. Samuel Waterhouse, and was afterwards published.

CHAUVENET, William, mathematician and second chancellor of Washington University (1862-69), was born at Milford, Pike co., Pa., May 24, 1820, son of William Marc and Mary B. (Kerr) Chauvenet. His father, a native of Narbonne, department of Aude, in southern France, was educated by two brothers then residing in Italy, and cultivated a natural taste for music and literature. He acted as secretary to one of these brothers, who was chief commissary in Napoleon's army in Italy, but on Napoleon's downfall came to the United States in search of some means of support. After a short residence in Boston, where he married, he removed to New York city as partner in a silk importing and manufacturing company. This enterprise failed and he bought a farm near Milford, Pa., but having no better success as an agriculturist, removed to Philadelphia in 1821, and re-entered business life. In 1845 he settled in Annapolis, Md., and later was appointed assistant professor of French in the Naval Academy. He was greatly esteemed for his gentleness of character, his earnest religious spirit and his refined tastes. His son, William, was brought up in Philadelphia, and attended the best schools of that city. It is supposed that from his mother, a woman of excellent judgment, he inherited his logical exactness and methodical reasoning powers. The kites and fire balloons his boyish fingers made were far better than any produced by his playmates, and he showed great cleverness in imitating feats of legermain. His teacher, during the years in which he was preparing for college, was Dr. Samuel Jones, who persuaded Mr. Chauvenet to send the youth to Yale instead of trying to make a business man of him. Before he applied for admission to college he had mastered all the mathematics studied during the four years' course, and beginning the study of Latin and Greek at the age of fifteen, was ready for examination in those languages in a year's time. At the end of his freshman year he was awarded the first prize for Latin composition, and at his graduation in 1840 took high honors, his proficiency in the classics being almost as remarkable as in mathematics, although he was the only one in a class of 100 who had taken the special optional course in mathematics during junior and senior years. Soon after leaving college he assisted Prof. Alexander D. Bache in a series of magnetic observations undertaken at Girard College, Philadelphia. The friendship formed with this eminent scientist was of great value to him as was that with Sears C. Walker, who had charge of the astronomical observatory of the Philadelphia High School. In 1841 he was appointed a professor of mathematics

in the navy, and for a few months served on board the U. S. steamer Mississippi, resigning at the end of that time through his dissatisfaction with the plan of teaching on shipboard. In 1839 the three principal naval schools in the United States were concentrated at the Naval Asylum in Philadelphia, under Prof. David McClure. On his death, in 1842, Prof. Chauvenet succeeded him. He found this so-called naval school unprovided with suitable appliances and accommodations, and in addition to establishing an eight months' course in mathematics, drew up a plan for the expansion of the school into a regularly organized institution. A four years' course was not adopted until 1851; even then, the school fell short of the high standard he desired. Meanwhile (1845), and chiefly through his influence, it was removed to Fort Severn, at Annapolis, Md., its title being changed to the Naval Academy. At first he was professor of mathematics and astronomy; next of astronomy, navigation and surveying, and both as organizer and teacher gave reputation to the institution. In order to induce graduates to return for study in his own department he erected a small observatory in which were an equatorial and meridian circle by Reissold, the latter constructed much after his own plans. In a sketch contributed to the "Memoirs of the Academy of Sciences" (1877), Prof. James H. Coffin says: "His intellectual abilities, his thorough knowledge of the subjects of instruction, the wide range of his attainments, a just appreciation of merit, an unwavering integrity, a uniform disposition, never disturbed by passionate excitement, and a kindly interest in those with whom he was associated, gained the esteem and respect of all. In naval circles his memory is revered." In 1855 he was offered the professorship of mathematics in Yale College, but would not relinquish his work at the Naval Academy, and in 1859, was given the professorship of astronomy and natural philosophy. The chair of mathematics in Washington University was offered also and this he accepted, chiefly because the West afforded a better field for his sons. A year later he was urged to return to Annapolis, but he was too well established in his new position. In 1862 he was chosen chancellor, and held this office until 1869, though not without interruptions caused by ill-health. He gave the university the same character and reputation that he had given the Naval Academy, and his labors there were appreciated to the full. Prof. Chauvenet was one of the original members of the American Association for the Advancement of Science, and in 1859 its general secretary; also an original member of the National Academy of Sciences, and at the time of his death was its vice-president. He published "Binomial Theorem and Logarithms for the Midshipmen at the Naval School" (1843); "Treatise on Plane and Spherical Trigonometry" (1850), which has been regarded as the most complete work of its kind in the English language; "Manual of Spherical and Practical Astronomy" (2 vols., 1863), and "Treatise on Elementary Geometry" (1870). In addition, fifteen papers appeared in scientific periodicals. Prof. Chauvenet was married in Philadelphia, Pa., in 1842, to Catharine, daughter of Samuel and Ann (Cook) Hemple. She survived him with a daughter, who inherited his musical ability, and four sons, one of whom, Regis, is president of the Colorado State School of Mines. On his resignation, in 1869, Prof. Chauvenet visited various parts of the United States for his health. He died in St. Paul, Minn., Dec. 13, 1870.

ELIOT, William Greenleaf, third chancellor of Washington University (1871-87), was born at New Bedford, Mass., Aug. 5, 1811, son of William G. and Margaret (Dawes) Eliot. He was educated in the schools of his native city and at Washington, D. C., where he was graduated at Columbian College in 1829. Immediately after he obtained a posi-

W. Chauvenet

ment, he inherited his logical exactness and methodical reasoning powers. The kites and fire balloons his boyish fingers made were far better than any produced by his playmates, and he showed great cleverness in imitating feats of legermain. His teacher, during the years in which he was preparing for college, was Dr. Samuel Jones, who persuaded Mr. Chauvenet to send the youth to Yale instead of trying to make a business man of him. Before he applied for admission to college he had mastered all the mathematics studied during the four years' course, and beginning the study of Latin and Greek at the age of fifteen, was ready for examination in those languages in a year's time. At the end of his freshman year he was awarded the first prize for Latin composition, and at his graduation in 1840 took high honors, his proficiency in the classics being almost as remarkable as in mathematics, although he was the only one in a class of 100 who had taken the special optional course in mathematics during junior and senior years. Soon after leaving college he assisted Prof. Alexander D. Bache in a series of magnetic observations undertaken at Girard College, Philadelphia. The friendship formed with this eminent scientist was of great value to him as was that with Sears C. Walker, who had charge of the astronomical observatory of the Philadelphia High School. In 1841 he was appointed a professor of mathematics

tion in the dead letter department of the U. S. post-office, where he remained one year, then entering the divinity school of Harvard University, passed through the usual course. In 1831 he removed to St. Louis, Mo., where he established the Church of the Messiah, the first Unitarian society west of the Mississippi river, and continued its pastor for thirty-nine years. In 1871 he resigned his charge to become chancellor of Washington University, of which he had been president since 1854. In this office, succeeding that distinguished educator, William Chauvenet, he signaled his high executive ability and zeal for education by advancing its interests in a multitude of ways. He held it continuously until his death. Dr. Eliot was one of the early presidents of the public school board of St. Louis, and throughout his life his energies were employed in advancing education in the city. He was also active in every worthy philanthropic enterprise and all public movements, and is to be credited with a generous share in upbuilding the institutions of the great Southwest. Throughout the civil war he was an earnest and outspoken advocate of the Federal cause, and organized the western sanitary commission, the first institution of its kind established in this country for the care and relief of wounded soldiers. In addition to a number of monographs and periodical articles, he was author of: "A Manual of Prayer" (1851); "Discourses on the Doctrines of Christianity" (1852); "Lectures to Young Men" (1853); "Lectures to Young Women" (1853); "The Unity of God" (1854); "Early Religious Education" (1855); "Discipline of Sorrow" (1855), and "The Story of Archer Alexander, from Slavery to Freedom" (1885). Dr. Eliot was married, in 1837, to Abbie Adams, daughter of Judge William Cranch, of Washington, D. C. They had four sons and one daughter, now living. He died at Pass Christian, Miss., Jan. 23, 1887.

SNOW, Marshall Solomon, dean of Washington University and acting chancellor (1887-94), was born at Hyannis, Barnstable co., Mass., Aug. 17, 1842, son of Rev. Solomon Pepper Snow, Methodist Episcopal clergyman, and of Maria Jane Pratt. His paternal ancestors were sailors, and settled in Massachusetts in 1623; his mother's family was established in Massachusetts at the same time. He was educated at Phillips Exeter Academy and at Harvard University, where he was graduated in 1865. Immediately upon graduation he was made sub-master of the high school in Worcester, Mass.; in the following year was principal of the high school at Nashville, Tenn., and in 1867, when the University of Nashville was reopened after the civil war, was appointed to the chair of mathematics. He afterwards held the chair of Latin. In 1868-70 he was head of the Montgomery Bell Academy, the preparatory school of the university. This position he resigned in 1870 to accept the chair of belles-lettres in Washington University, St. Louis, and since 1874 has been professor of history there. He also served as registrar of the college for many years; has been dean since 1877, and from January, 1887, until October, 1891, acting chancellor of the university. He has contributed various articles, chiefly on historical subjects, to magazines, and is one of the writers of the series of "Political Studies" in the Johns Hopkins University publications. He was president of the University Club of St. Louis in 1892-96; has been president of the Missouri Historical Society since 1892, and is an honorary member of the New Hampshire Historical Society; corresponding member of the Minnesota Historical Society and the American Academy of Political Science. In the ecclesiastical affairs of the state he is actively interested, acting as junior warden of Christ Church Cathedral, St. Louis, and secretary of the

standing committee of the diocese of Missouri. He was married at Exeter, N. H., July 9, 1867, to Ellen Frances, daughter of Asa and Theodate (Page) Jewell, of early New Hampshire ancestry. They have no children.

CHAPLIN, Winfield Scott, fourth chancellor of Washington University (1891—), was born at Glenburn, Penobscot co., Me., Aug. 22, 1847, son of Daniel and Susan Davis (Gibbs) Chaplin, and a descendant of Hugh Chaplin, of Rowley, Mass. (1638). His father, colonel of the 1st Maine heavy artillery and brevet major-general of volunteers, was killed at Cold Harbor, Va., in August, 1864. Young Chaplin entered West Point in 1866, and was graduated second in his class in 1870. He was appointed second lieutenant of the 5th artillery, in which regiment he served until the spring of 1872, when he resigned his commission and followed railroad engineering in Michigan and Illinois and later in New England. In 1873 he was appointed professor of civil engineering in the Maine State College, Orono, and filled this chair until January, 1877, when he was appointed to a similar professorship in the Imperial University at Tokio, Japan. In the latter position he remained until the summer of 1882. Returning to America he was employed in railroad engineering until September, 1883, when he became professor in Union College, Schenectady, N. Y. In 1886 he was appointed professor of engineering and dean of the Lawrence Scientific School, Harvard University, which position he held until 1891, when he was appointed chancellor of Washington University, St. Louis. This position he still holds. Mr. Chaplin received the honorary degree of A.M. from Union College and that of LL.D. from Harvard University. He was married, Oct. 18, 1873, to Harriet Brewster Caldwell, of New Windsor, N. Y., and has two children.

NIPHER, Francis Eugene, electrical engineer and educator, was born at Port Byron, Cayuga co., N. Y., Dec. 10, 1847, son of Peter and Roxaluna (Tilden) Nipher. He is descended from Michael Nipher, a native of Wittenberg, Germany, who came to America with his father, Michael, in 1747, and settled on Livingston manor, near the present city of Hudson. Michael Nipher, junior, was a soldier in the Continental army and was present at the battle of Saratoga. Another ancestor was Nathaniel Tilden, who settled in Plymouth colony in 1628. Francis Nipher removed to Iowa City, Ia., in 1844; was graduated at the State University of Iowa in 1870, and was then made assistant in physics at the university, holding the position for four years. In 1874 he was called to the chair of physics at Washington University, St. Louis, a position which he still holds. In addition to physics he has charge of the instruction in electrical engineering. In 1877 he organized the Missouri weather service, which for ten years he conducted independent of official support, finally turning it over to the state board of agriculture. From 1878 until 1883 Prof. Nipher conducted a magnetic survey of Missouri, doing the work on private means, and publishing annual reports in the "Transactions" of the Academy of Science of St. Louis. He was made a member of the Academy of Science of St. Louis in 1875, and in 1876 became its recording secretary, holding this position for ten years. In 1885 he became president of the academy, and was re-elected for six successive years; in 1890-91 was president of the St. Louis Engineers' Club, and in 1891 became vice-president and chairman of the physics section of the American Association for the Advancement of Science, at the Washington meeting. He is the author of "Theory of Magnetic Measurements, with an Appendix on the Method of Least Squares," and of a mathematical treatise

on electricity and magnetism. He has contributed many original papers to the "Transactions" of the Academy of Science of St. Louis and to various scientific journals. Among the more important are: "Evolution of the American Trotting Horse," which is a mathematical discussion of speed records, with a view of determining the final speed of the trotter; a "Determination of the True Rainfall in Elevated Gauges"; "Surface Integrals in Meteorology"; on the "Theory of the Compound Pendulum"; on the "Electrical Capacity of Bodies and the Energy of Electrical Charges"; "A Method of Measuring Pressure at any Point on a Structure due to Wind Blowing Against that Structure," and "The Appreciation of Gold." He has shown that photographic plates having had a long exposure in the camera may best be developed in the light as positives, and that between positives and negatives there is a zero condition, where in a given dark room nothing will develop. With any exposure there is a definite degree of illumination of the developing bath, which will fog the plate into a zero condition. In a lighter room it will develop as a positive, and in a darker room it will develop as a negative. An account of this work, together with an account of the artificial production of ball-lightning discharges, was published by the Academy of Science of St. Louis, May 16, 1900. Prof. Nipher was married at Atalissa, Ia., July 1, 1873, to Matilda, daughter of William R. and Grace (Cope) Aikins. They have one son and four daughters.

TRELEASE, William, botanist and educator, was born at Mount Vernon, N. Y., Feb. 22, 1857, son of Samuel R. and Mary (Gandall) Trelease. He was educated at public schools in Mt. Vernon and Branford, Conn., at Cornell University, where he was graduated B.S. in 1880, and at Harvard, where he received the degree of Sc.D. in 1884, having previously (1879), been employed by the U. S. department of agriculture to make special investigations on the cotton insects in Alabama. He was instructor in botany at Harvard in 1880-81; at the University of Wisconsin in 1881-83, and professor of that science in 1883-85. He was also special lecturer in botany at Johns Hopkins University during 1883-84, and in the same years was in charge of the summer school of botany of Harvard University. Since 1885 he has been Engelmann professor of botany in Washington University, St. Louis, Mo., and since 1889 director of the far-famed Missouri botanical garden, one of the most complete collections of flora and herbaceous plants in the world. For several years he was associate editor of "Psyche," a journal devoted to entomological science, published in Cambridge. Prof. Trelease translated Poulsen's "Botanical Micro-chemistry" (1884) and Salomonson's "Bacteriological Technology" (1890); edited with Asa Gray the "Botanical Writings of George Engelmann" (1887) and has issued the annual reports of the Missouri botanical garden since 1890. He has since 1879 contributed numerous papers to botanical and entomological journals and "Proceedings" of various scientific societies, and is associate editor of the "American Naturalist," for systematic botany, and of the "Botanical Gazette." He is a life member of the Swiss Society for the Protection of Plants; of the Wisconsin Horticultural, American Pomological and Massachusetts Horticultural societies, and of the academies of science of Wisconsin, California and St. Louis, and others. He is an associate fellow of the American Academy, succeeding Lesquereux; was first president of the Botanical Society of America, and has been president of the Cambridge Entomological Club and of other organizations. His name is enrolled in the Académie des Sciences of Cherbourg; the Société Botanique de

France; the Académie de Géographie Botanique; the Société Centrale Forestière de Belgique, and other European societies and learned bodies. Prof. Trelease was married at Madison, Wis., July 19, 1882, to Julia M., daughter of Hiram and Maria S. (Briggs) Johnson. They have three sons.

MACFARLANE, Hugh Campbell, lawyer, was born at Crossmyloof, near Glasgow, Scotland, Dec. 28, 1851, son of James Dick and Annie (Campbell) Macfarlane. His father, a baker by occupation, came to the United States in 1865; resided first in Massachusetts; later in Stearns county, Minn., and in 1876 removed to Fall River, Mass. His mother was a daughter of Hugh Campbell, of Pollockshaws, near the city of Glasgow, where the Macfarlanes and Campbells have resided for many generations. Mr. Macfarlane passed his early years in Minnesota, where he was educated in the common schools and St. John's College. He then studied law, and attended the Boston University School of Law, class of 1878. In January, 1878, he was admitted to the bar, and after practicing for six years removed to Tampa, Fla. During his residence in that city he has practiced successfully in association with Judge Dennis F. Hammond, Nott B. K. Pettingill and Thomas M. Shackelford. He was a member of the state Democratic executive committee for Hillsboro county (1892-1900), and in 1894-96 was chairman of the Democratic executive committee for the 1st congressional district of the state of Florida. In 1887-88 he was city attorney of Tampa, and in 1894-95 was state's attorney of the 6th judicial circuit. In practice he has maintained a leading position at the bar of his circuit for many years, and is reputed one of the foremost criminal lawyers of the state. Among the notable cases in which he has appeared were the Sarasota murder trials, in 1885, against an organized band of murderers in Manatee county, in which he was special prosecutor, by appointment of Gov. E. A. Perry; the famous cases of the state vs. Gibson, the state vs. Garcia and the state vs. Rodriguez, all of which he won after lengthy litigation. In 1893 he purchased an extensive tract of land on the banks of the Hillsboro river, opposite Tampa, and there laid out the town of West Tampa, which at the present time has a population of 5,000 and is the site of more than twenty large cigar manufactories. It has its own municipal organization, controlling all public works, and is a good example of the immense growth and prosperity following on enterprise and the wise use of natural advantages. The land, which in 1892 was assessed at \$10,000, is now valued at \$1,000,000, an increase of 1,000 per cent. in eight years. Mr. Macfarlane was married, in 1887, to Frances Ida, daughter of Howard Pettingill, and has one son and one daughter.

Hugh C. Macfarlane

BRUCE, Horatio Washington, lawyer and jurist, was born near Vanceburg, Lewis co., Ky., Feb. 22, 1830, son of Alexander and Amanda (Bragg) Bruce. His father was a member of the state legislature in 1825-26, and a descendant of Alexander Bruce, a noted merchant of Virginia in the eighteenth century, whose son, John, was married to a daughter of Henry Clay, Jr., of Mecklenburg county, Va., and migrated to Garrard county, Ky. Horatio W. Bruce was educated in the schools of Lewis county and at Manchester, O. At the age of fifteen he accepted employment in a general store,

where he was employed for several years as salesman and bookkeeper. He also taught school for two terms (1849-50), meanwhile devoting his leisure hours to study. He read law under Leander M. Cox at Flemingsburg, Ky.; was admitted to the bar in 1851, and began practice in Fleming county. In the first year of his practice he was appointed examiner for the county. He was a trustee of the common schools; representative in the legislature in 1855-56, and commonwealth's attorney for the 10th judicial district (1856-59). The last-named office he resigned on his removal to Louisville, where he formed a law partnership with Gen. Ben Hardin Helm. He was an active supporter of the Bell and Everett ticket in 1860, and a candidate for congress of the States'

W. Perry

Rights party from the Louisville district at the special election held in June, 1861. His sympathy for the southern states determined his action, and he joined in the conference at Russellville, Ky., Oct. 29-31, 1861, and was a member of the sovereignty convention at the same place on Nov. 18th-20th, which declared the independence of Kentucky, adopted a constitution, and established a provisional government. He was a member of the legislative council until 1862, and was a representative in the Confederate congress from the organization of the permanent Confederate government until the end of

the war. On the return of peace he resumed practice in Louisville, where he was circuit judge (1868-73); chancellor of the Louisville chancery court, by appointment to fill a vacancy in 1873, and by popular elections in 1873 and 1874, until he resigned in 1880, when he became counselor of the Louisville and Nashville Railroad Co., which position he has held until the present time (1900), having become chief law officer of the company in 1895. Judge Bruce for eight years held a professorship in the law department of the University of Louisville, contributing not a little to its efficiency and progress. He has an accurate and comprehensive knowledge of the law; a keen, analytical mind, and decided literary tastes, and these qualities, coupled with his broad scholarship, have made him one of the most brilliant and able members of the Kentucky bar. In 1856 he was married to Elizabeth Barbour, daughter of John L. Helm, governor of Kentucky, and of Lucinda Barbour, daughter of Ben Hardin, the great lawyer and congressman. They have two sons and three daughters.

PERRY, William, physician and surgeon, was born at Norton, Bristol co., Mass., Dec. 20, 1788, son of Nathan and Phoebe (Braun) Perry. Beginning his higher education at Union College he removed his connection to Harvard, and was graduated in 1811. He studied medicine with Dr. James Thacher, author of the "American Medical Biography," and Dr. John Warren, of Boston, brother of the hero of Bunker hill. In 1814 he received his medical degree from Harvard and settled at Exeter, N. H., whither he was invited by Dr. Benjamin Abbot and other prominent citizens. The practice thus begun became very extensive and lasted over sixty years. In 1835-36 he lectured on the theory and practice of medicine to the medical students of Bowdoin College, and a little later declined a full professorship in the institution. He was specially noted as a surgeon, retaining his skill beyond

his ninetieth year; operated successfully in five cases of strangulated hernia after reaching the age of eighty-seven and once again at the age of ninety-two. He gave much attention to mental diseases, was often in request as an expert witness in court, and was the first person to suggest the establishment of a state asylum for the insane in New Hampshire. His address before the legislature in favor of the plan greatly contributed to its success. Dr. Perry possessed to an unusual degree mechanical and inventive skill, and was the first to discover that British gum, a substance much used in sizing cotton goods, was charred potato starch. He was married, in 1818, to Abigail, daughter of Col. Nathaniel and Abigail (Odlin) Gilman, of Exeter. Five children were born of this union, of whom his professional successor, Dr. William Gilman Perry (Dartmouth, 1842), and John Taylor (Harvard, 1852), are the only survivors. The last named was for a quarter of a century one of the proprietors and literary editor of the Cincinnati "Gazette." In 1883 he returned to Exeter, where he held the position of trustee of the Phillips Academy for fourteen years, and was finally president of the board, declining a re-election at the end of his term of service, in 1899. He has been a contributor to the "Bibliotheca Sacra" and other periodicals. Sarah Orne Jewett, famed for her stories of New England life, is a granddaughter of Dr. William Perry. He died at Exeter, Jan. 11, 1887, aged ninety-eight years and twenty-two days.

LITHGOW, James Smith, merchant and manufacturer, was born in Pittsburgh, Pa., Nov. 29, 1812, son of Walter and Frances (Stevenson) Lithgow, of Scotch-Irish descent. His father, a plane manufacturer and one of the first of that calling in the Ohio valley, died in 1813, and the widow devoted her life to the education and training of her son. He learned the trade of tin and copper-smith work and in 1832 settled in Louisville, Ky., when he began a business career. In 1836 he established the firm of Wallace & Lithgow, which continued until 1861, when the

death of his associate dissolved what had been a large and prosperous copartnership. Continuing in business under the firm name of J. S. Lithgow & Co., and later of the Lithgow Manufacturing Co., of which he has always been president, he has manufactured stoves and iron mantels, developing one of the chief industries of the city. His long life has been devoted to good works. As a lay member of the Methodist Episcopal church, South, he has been identified with its work in general conferences and with its public and private charities, having given generously to the cause of religion. As a member of the charter convention and in 1866 as mayor of the city, and by frequent services in both branches of the city council, his advice has been of great value to the city, as well as a credit to himself. The board of trade building, one of the largest in the city, was erected by him, and he has been foremost in every enterprise contributing to the welfare and upbuilding of his chosen home. He has been identified with the banking and railroad interests of Louisville, and for many years was a member of the board of directors of the Louisville Water Co. Mr. Lithgow was married, in 1837, to Hannah Craig, of Louisville, of English parentage. She died March 28, 1891.

J. S. Lithgow

JUHRING, John C., merchant, was born in New York city, Oct. 6, 1850, son of John C. and Lena (Stuke) Juhring, of German descent, the former a native of Bissendorf. His father was a successful New York business man for over thirty-five years. He was educated in the public schools of New York, and the Mt. Washington Collegiate Institute. In 1870 he began his business career as a clerk, and, after several years experience, became assistant cashier in the firm of Francis H. Leggett & Co. About the year 1877 he was advanced to the position of assistant buyer, and some three years later was made general buyer, and also given the management of one of the leading departments of the business, which he developed to such proportions and in such a manner

John C. Juhring

as to attract attention to him as progressive and straightforward and as a man of sound mercantile sense. In 1887 he was given an interest in the business, and in 1892 was admitted to partnership. During his long career with this representative firm, one of the largest wholesale houses in the world, he has been at different times at the head of many departments, and has made himself prominent for the enterprise he displays in the management of the same, remedying prevailing abuses and introducing measures which insure to buyers standard qualities and correct weights and measures. Mr. Juhring was one of the organizers of the Merchants' Association in 1897; at its first meeting was elected vice-president, and was re-elected for three consecutive terms. The object of this association is to foster trade and commerce in the interests of the merchants of New York city, to secure freedom from unlawful exactions and to procure uniformity in the customs. The wide and beneficial influence of this organization in increasing trade cannot be over-estimated. Its roll of membership embraces 1,500 of the leading business houses of Greater New York. Mr. Juhring is a typical self-made man. He has fought his way by his own efforts, and commands success and respect, standing to-day a representative New York merchant. He is unmarried. In politics he is a Republican, but of independent views. He is a member of the Montauk and Crescent clubs of Brooklyn.

O'CONNELL, Jeremiah Joseph, R. C. priest, was born in Cork, Ireland, Nov. 21, 1821. In 1838, with his parents he emigrated to America and located in Georgia. He was sent to Charleston, S. C., and there entered the seminary under Bishop England in 1840. After four years' study he was graduated and ordained a priest; was stationed in Savannah, Ga.; was afterwards transferred to Beaufort, S. C., and subsequently to Columbia, S. C. His missionary district embraced half of the state. In 1857, seeing the need of a higher school in his mission he erected at Columbia St. Mary's College, obtained for it a charter from the state and became its president. His brother, Lawrence, joined him in its management and later they were further aided by another brother, Joseph. These three devoted missionary priests made this school a great power in advancing Catholicism in the Carolinas and Georgia, but its career was terminated in 1865 at the time the city of Columbia was destroyed by fire on the advent of Sherman's army. Father O'Connell, during a pastorate of twenty-three years preached in every corner of his mission and succeeded in gaining more

than 300 converts to the church. In 1858 he began the organization of missions in the interior of the state, building a church at Andover and erecting a rectory and a parochial school there. He organized a temperance society and brought the rougher elements among his people under a healthful discipline. In 1871 his health failed and he was transferred to the mission of western North Carolina. In 1872 he purchased a large estate near Charlotte and conveyed it to Bishop (afterwards Cardinal) Gibbons, as the site for a religious and educational institution, thus founding the Benedictine monastery which includes Mary-Help Abbey; St. Mary's College; St. Mary's Seminary; Convent of the Sacred Heart, and Sacred Heart Orphan Asylum for girls at Belmont, where Dr. O'Connell died, Oct. 23, 1894. He wrote "Catholicity in the Carolinas and Georgia. Leaves of History," published in 1878.

WOODBIDGE, William Channing, educator and author, was born at Medford, Middlesex co., Mass., Dec. 18, 1794, son of William and Ann (Channing) Woodbridge. His earliest American ancestor was the Rev. John Woodbridge, who came to America from Wiltshire, England, in 1634, and settled in Newbury, Mass. His father, who was born in 1755, was the first principal of Phillips Academy, Exeter, N. H. Mr. Woodbridge was graduated at Yale with the degree of A. B. in 1811; he then studied theology at Princeton, but being obliged to abandon the work of the ministry on account of ill health, devoted the remainder of his life to education, and especially to the preparation of a new system of school geographies. For several years he was principal of academies in the state of New Jersey, and in 1817 became an instructor in the Institution for the Deaf and Dumb in Hartford, Conn., remaining there for three years. In 1821 he visited Europe and traveled extensively searching for accurate statistics and methods of instruction. On his return to America, in 1830, he devoted himself to elevating the condition of the common schools by introducing the Pestalozzian system of instruction as modified by Philip Emanuel von Fellenberg, and by his own observations. In August, 1831, he purchased the "American Journal of Education," changed its name to "The Annals of Education," and published it until 1838, serving as one of its editors. In this publication appeared a series of "Letters from Hofwyl," in which he gave an account of Fellenberg's system of instruction. In 1824 he, with Mrs. Emma Willard, published "Universal Geography, Ancient and Modern," the last edition of which was published in 1845 in Hartford, Conn. "Woodbridge's Geography" was published in London in 1827, and another edition in America in 1845.

He was also author of "Rudiments of Geography" (1833); "Modern School Geography" (1845), and many other text-books for schools. Mr. Woodbridge was a member of the Congregational church. He was married to Lucy Ann Reed, Nov. 29, 1832, at Marblehead, Mass., and had two children. He died in Boston, Nov. 9, 1845.

GODFREY, Freeman, railroad president and capitalist, was born at Vershire, Vt., Sept. 5, 1825, son of Josiah and Nancy (Burham) Godfrey. He attended the district school of his native place until fourteen years of age. He soon developed mechanical skill, and made various farming implements by hand; ran a saw-mill, and worked on his father's farm until 1845, when he went to Lowell, Mass., and

W. C. Woodbridge

spent a year at work in a cotton mill. In 1847 Mr. Godfrey removed to Pittsburg, Pa., and next traveled from place to place through Ohio and Indiana, selling brass clocks. In 1851 he was engaged as contractor on the Terre Haute and Alton railroad, and later with the Illinois Central road. In 1856 he removed to Grand Rapids, Mich., and engaged in the construction of the Detroit and Milwaukee railroad, which he completed in 1858. Mr. Godfrey, however, took upon himself the construction of the northern ten miles of the second twenty mile section of the Grand Rapids and Indiana railroad, and put it through an unbroken wilderness in five weeks and two days—just in time to save the company its land grant.

Freeman Godfrey

Mr. Godfrey was prominently identified with the organization of the Grand Rapids and Holland Railroad Co., of which he was elected president in 1871. He had an extensive private business, being engaged in the manufacture of land and calcined plaster, and shortly after 1860 opened a gypsum quarry, taking his brother, Silas F., into partnership with him. In 1865 they purchased a one-third interest in the firm of George H. White & Co.'s plaster quarry and mills, and succeeded in building up an extensive trade. When the Michigan and Ohio Plaster Co. was organized, in 1875, Mr. Godfrey was made president

and manager; also president of the Diamond Wall Finish Co.; he was for fourteen years vice-president of the Grand Rapids National Bank, organized in 1880. In 1888-90 he was a member of the board of public works. On March 25, 1851, he was married to Abby E., daughter of Jonathan Eastman, of Ver-shire, Vt. They had five children. He died Nov. 25, 1898.

STONE, Charles Pomeroy, soldier and engineer, was born at Greenfield, Mass., Sept. 30, 1824, son of Alpheus Fletcher Stone, M. D., and Mrs. Fanny Lincoln (Cushing) Arms, of Hingham, a descendant of Gen. Lincoln, of Washington's army. His first American ancestor, Deacon Gregory Stone, born in England in 1590, came to New England in 1634 and settled in Cambridge, Mass. His great-grandfather, John Stone, was captain in the provincial troops in the French and Indian wars, and his grandfather, also named John, was a captain of infantry during the revolutionary war. Charles Pomeroy Stone was appointed a cadet in the Military Academy at West Point in 1841, and was graduated in 1845. He was then promoted to be second lieutenant in the ordnance corps and assigned to duty at the Military Academy as acting assistant professor. War with Mexico being declared, he applied for service in the field, but his request was denied on the ground that he was too young and inexperienced for staff duty. In the fall of 1846, however, he was attached to the siege-train battery organized for service at the headquarters of Gen. Scott. He took part in all the principal battles from Vera Cruz to the City of Mexico, and at the age of twenty-two (1846) was twice brevetted for "gallant and meritorious service." He received the brevet rank of first lieutenant for services in the battles of Molino del Rey, and captain for the capture of Chapultepec. While with the army he ascended Popocatepetl and planted there his country's flag, being the first American who ever reached the summit. At the close of hostilities he received leave of absence for twenty months to visit Europe and study the armies of the Continent. He bore letters

from Gen. Scott, and exceptional opportunities for studying the French and German armies were afforded him by Louis Napoleon, Maj. Donaldson, then U. S. minister to Berlin, and Baron Von Humboldt. While on this trip he witnessed part of the Schleswig-Holstein war and part of the Hungarian campaign. After an extended tour through Europe, Greece, Turkey, Syria and Egypt, he returned to the United States in June, 1850. In 1851 he was ordered to Benicia, Cal., where he was appointed chief of ordnance, and in the following year made a tour through Oregon and Washington territory, reporting on the resources of the region and selecting sites for arsenals and depots. He resigned from the army in 1856. In March, 1857,

he was appointed by the Mexican government chief of the scientific commission for the exploration of the state of Sonora. On Jan. 1, 1861, he was re-appointed colonel on the staff and inspector-general of the District of Columbia for the purpose of organizing volunteers for the protection of the national capital in anticipation of the civil war. By March 1st he had organized 3,400 volunteers, a large number of whom were mustered into service before the firing on Fort Sumter. With these troops Col. Stone guarded the public departments and outposts of the capital until the arrival of troops from the North. He became colonel of the 14th

infantry on May 14, 1861, retaining his command of the District of Columbia. On May 24, 1861, he drove in the pickets on the Virginia side of Long bridge, and secured the passage of the advance guard for the attack on Alexandria, where he temporarily remained in command. He commanded the Rock-ville expedition, and was engaged in the skirmishes at Edward's and Conrad's ferry in June and Harper's ferry in July, 1861. Gen. Robert Patterson having urgently called for reinforcements, Stone made a forced march from Harper's ferry to Martinsburg in thirty-six hours, and was given the command of the 5th brigade, which led the advance. He was appointed brigadier-general of volunteers May 17, 1861, and in August took command of a special corps of observation on the upper Potomac. Here, in October, an unfortunate mistake occurred. Stone was told by Gen. McClellan to make a feint of crossing the Potomac at Ball's bluff. After having made the feint Gen. Stone was led to believe that the enemy might be surprised, and accordingly caused a part of his command to cross the Potomac in the night. The enemy attacked in force at daybreak of the 21st and drove the national troops into the river with great loss. Stone at once asked for a court of inquiry to fix the responsibility, but as Gen. McClellan, in a dispatch to Pres. Lincoln, exonerated him, did not insist upon it. He was retained in the same command until February, 1862, when he was suddenly arrested and was held a prisoner in Fort Lafayette, New York harbor, until August, 1862, when he was released, no charge having been preferred against him. (See "McClellan's Own Story," by Gen. McClellan, and Blaine's "Twenty Years of Congress.") In May, 1863, Stone was ordered to the department of the Gulf and was chief of the commission that received the surrender of Port Hudson in July, 1863. He also commanded the relief of Donaldsonville. Having been appointed chief of staff of the department of the Gulf in July, 1863, he served on the Bayou Teche and Red river campaigns. Gen. Stone was mustered out of the volunteer ser-

Charles Pomeroy Stone

vice April 4, 1864, and was placed in command of the 5th corps (army of the Potomac) before Petersburg, Aug. 21, 1864. He resigned his commission Sept. 13, 1864, and from the autumn of 1865 until 1870 was engineer and superintendent of the Dover Mining Co., in Goochland county, Va. In 1870-83 he was brigadier-general and chief of the general staff of the Egyptian army. He rendered great services not only in the army proper but in expeditions and explorations in upper Egypt and in the surveys of the Soudan. In 1871 he was appointed general ad-de-camp to the Khedive. In 1873 he was promoted to ferik pasha (lieutenant-general) for his "valuable services in command, organization and administration," and was successively decorated commander of the Order of Osmanieh, grand officer of the Medjidieh, grand officer of the Osmanieh, and for his services in the war of 1882 received the Star of Egypt. For his geographical work he received from the king of Italy the Order of the Crown of Italy and was made honorary corresponding member of the Royal Geographical Society of London and the Imperial and Royal societies of Vienna and Lisbon; honorary member of the Geographical societies of Switzerland

and Rome and honorary corresponding academician of the Royal Academy of Fine Arts of San Fernando, Madrid. During his stay in Egypt he was appointed inspector-general of the military schools; director-general of the Cadastra; member of the superior council of public institutions; member of the superior council of agriculture; chief of the department of public works; member of the senior generals to form new conscription laws, and was elected president of the Khedivial Geographical Society, which he founded. In 1883 he resigned and returned to the United States. He was engineer-in-chief of the committee of the statue "Liberty Enlightening the World," constructing the massive pedestal and successfully erecting the statue on Bedloe's Island, New York harbor. This statue, which is the largest in the world, was planned by a French sculptor, Frederic A. Bartholdi, who was born in Colmar, Alsace, April 2, 1834. As an expression of the fraternal feeling existing between the two great republics, the French people subscribed 1,000,000 francs to pay for its construction, and \$300,000 more were raised in the United States to construct the pedestal. The statue was unveiled with appropriate ceremonies,

Oct. 28, 1886. It represents a great female figure crowned with a diadem, holding in her right hand above her head a torch that is lighted by electricity at night, and clasping in her left hand, close to the body, a tablet bearing the inscription, "July 4, 1776." The figure is 151 feet high, the head being fourteen feet high and the torch, which is reached by a winding stairway in the arm, is large enough to hold ten people. It is made of copper, and weighs twenty-five tons. The pedestal upon which it stands is 155 feet high, and was constructed of concrete and granite from a design by Richard M. Hunt, the architect. Bartholdi, who received the cross of the Legion of Honor for his statue, "Grivauval," exhibited at the Salon in 1878, also designed the statue of Lafayette, which was erected in 1876 by French residents of New York city in Union square. Among his publications are: "La Loi de Guerre" (Cairo, Egypt, 1874,) and "The State of Sonora" (Washington, 1860). Gen. Stone was twice married: in 1853, to Maria Louisa, daughter of Gen. Robert E. Chary, U. S. A., by whom he had one child; and in 1863, to Annie Granier, daughter of Dr. John Horace Stone, by whom he had five children. He died in New York city, Jan. 27, 1887, and was buried at West Point with military honors.

DWIGHT, Theodore, journalist and author, was born at Northampton, Mass., Dec. 15, 1764, son of Timothy and Mary (Edwards) Dwight. His earliest American ancestor was John Dwight, who emigrated from England, and was one of the first settlers of Dedham, Mass. His father was graduated at Yale in 1744, and was educated for the bar, but became a prominent merchant in Northampton; his mother, a lady of great mental ability and force of character, was the third daughter of Rev. Jonathan Edwards. He studied law in New Haven with his cousin, Judge Pierrepont Edwards, and after being admitted to the bar began the practice of his profession at Haddam, Conn., but in 1791 removed to Hartford, where he soon rose to great prominence in his profession. He became editor of the Hartford "Courant" and the "Connecticut Mirror," the latter being the organ of the Federalist party, of which Theodore Dwight was a leader. He was a member of congress in 1806-07, declining a re-nomination; was a member of the state council, 1809-15; and in the celebrated Hartford convention of 1814 presided as secretary. Dwight removed to Albany, N. Y., in 1815, but after remaining there two years, during which he established the "Daily Advertiser," he went to New York city, and founded the "Daily Advertiser," which he edited until 1835. He was a brilliant political writer and an able debater. While in Hartford he was an active member of a club of young poets and authors known as the Hartford Wits, and he contributed frequently to the "Political Greenhouse" and the "Echo." His publications are: "History of the Hartford Convention" (1833); "Life and Character of Thomas Jefferson, as Exhibited in His Own Writings" (1839). He was married at Middletown, Conn., Sept. 9, 1792, to Abigail, daughter of Richard Alsop. He died in New York city, June 12, 1846.

DWIGHT, Theodore, author, was born in Hartford, Conn., March 3, 1796, son of Theodore and Abigail (Alsop) Dwight. He was graduated at Yale College in 1814, and studied theology with his uncle, Pres. Timothy Dwight, at Yale; but, on account of ill-health, gave up the study and went to Europe. On his return he settled in Brooklyn, N. Y., in 1833. He devoted much time to philanthropic enterprises, and was a director of many religious and educational societies. From 1854 until 1858 he was engaged in a systematic effort to send free-soil emigrants to Kansas. He was connected editorially with the New York "Daily Advertiser," a paper established by his father

in 1817; the "American Magazine"; the "Family Visitor"; the "Protestant Vindicator"; the "Christian Alliance"; the "Israelite, Indeed," and the "New York Presbyterian." In his later years he was employed in the New York custom-house. He was familiar with six or eight languages, and was a prolific writer. He was the author of "A Tour in Italy in 1821" (1824), with William Darby; "New Gazetteer of the United States" (1833); "President Dwight's Decisions of Questions Discussed by the Senior Class in Yale College in 1833-4" (1833); "History of Connecticut," and "The Northern Traveler" (1841); "Summer Tour of New England" (1817); "The Roman Republic of 1849" (1851); "The Kansas War" (1859); "Life of Garibaldi, Translated from His Private Papers" (1859); "The Father's Book" (1859); "First Lessons in Modern Greek" (1861). He was married, April 24, 1827, to Eleanor, daughter of Samuel Boyd, of New York city. He died in Brooklyn, N. Y., Oct. 16, 1866.

MCCLURE, Alexander Wilson, clergyman and author, was born in Boston, Mass., May 8, 1808. He was graduated at Amherst College in 1827, and at Andover Theological Seminary in 1830; became pastor of a Congregational church at Malden, and was ordained in 1832. He remained there until 1843, and in that year removed to St. Augustine, Fla., where he labored successfully among the soldiers who were on duty there. Returning to Boston in 1846, he founded a religious paper called the "Christian Observatory," which was edited by him for several years. He also assisted Dr. Parsons Cooke in conducting the "Puritan Recorder" in Boston. Returning to the pulpit, he preached at Malden and at the Grand Street Church, Jersey City. In 1855 he became secretary of the American and Foreign Christian Union. He labored for some time in Rome, Italy, as chaplain of this union, returning in 1858 a confirmed invalid. He was a prolific writer for the religious press, and published the "Life-Boat," which had a wide circulation; "Four Lectures on Ultra-Universalism"; "A Series of Letters Upon the Bible in the Public Schools"; "Lives of the Chief Fathers of New England" (1850), and "Translators Reviewed" (1853). He was a learned scholar, a genuine wit and a keen polemic. He died at Canonsburg, Pa., Sept. 20, 1865.

JOHNSON, John Butler, civil engineer and educator, was born at Marlboro, Stark co., O., June 11, 1850. His father was Jesse Johnson, a farmer in good circumstances. His mother was Martha Butler. Both parents were Quakers of English descent, and were natives of Virginia. The son was educated primarily in the graded school of his native village. He afterwards prepared for college, was matriculated at the University of Michigan and was graduated as a civil engineer in 1878. Upon leaving the university he engaged as assistant engineer in the U. S. lake and Mississippi river surveys. In 1883 he resigned from the service to accept the chair of civil engineering in Washington University, St. Louis, Mo., where he won a place among the prominent educators of his day. In 1898 he accepted the position of dean of the College of Mechanics and Engineering at the University of Wisconsin. He is the author of "Theory and Practice of Surveying"; "Engineering Contracts and Specifications"; "The Materials of Construction," and a joint author of "Modern Framed Structures." These works are ranked as standards in all English-speaking countries. He has contributed largely to current literature on subjects embracing engineering and social questions of the times; has conducted the leading "Index to Current Literature" in the "Journal of the Association of Engineering Societies" since 1884, and has had charge of the very extended series of

tests of American timbers, under the forestry division of the U. S. agricultural department. Prof. Johnson is a member of the Institute of Civil Engineering (London); of the American Society of Civil Engineers; of the American Society of Mechanical Engineers; a fellow of the American Association for the Advancement of Science, and a corresponding member of the American Institute of Architects. He was married at Wabash, Ind., Nov. 12, 1879, to Phoebe E. Henry.

DENT, Louis Addison, lawyer, was born in Baltimore, Md., Oct. 6, 1863, son of Addison and Mary J. (Sumner) Dent. His earliest American ancestor was Thomas Dent, who obtained a grant of land on the Potomac, opposite the present site of Washington, and called it Guilborough, after the home town in Yorkshire, England. He was one of the few Protestants in the colony; was married to the daughter of Rev. William Wilkinson, and was a judge of the provincial court in 1659. From him descended Rev. Hatch Dent, who was a captain in Smallwood's battalion of the Maryland line, the favorite troops of Washington, which became famous for its gallant action in saving the retreat of Washington at the battle of Gowanus, L. L. under Lord Stirling. Capt. Hatch Dent was wounded and languished for fourteen months in a British prison ship. He afterwards took orders in the Church of England, and was the founder of the famous Charlotte Hall Academy. His grandson, Addison Dent, father of Louis A., served in the Mexican war in Sam Walker's mounted rifles. Louis A. Dent was educated in the schools of the Christian Brothers in Washington and New York city, finishing an academic course at fifteen years of age. He became a stenographer, and for five years was engaged as a reporter in Washington courts. He was private secretary of Hon. Robert R. Hitt, and private secretary

and literary assistant of James G. Blaine. In the second year of this service he was the official reporter of the Maine house of representatives. He was intimately associated with Mr. Blaine during the last years of his life, studying with him closely the foreign affairs of the United States; twice inspected the consular service in the West Indies and Mexico, traveling particularly through the whole of Cuba, and after Mr. Blaine's retirement from the cabinet, in 1892, was consul at Kingston, Jamaica, for a short period. For the next four years Mr. Dent was engaged in literary work, and in June, 1897, he was restored to his position at Kingston by Pres. McKinley. On reaching the island he detected the existence of yellow fever, and was stricken with it. His services in exposing the epidemic not only attracted the attention of the marine hospital service of the United States, but brought about many needed reforms in the medical laws and medical organization of the island and the expenditure of large sums in improving the sanitation of Kingston. During the Spanish-American war his labors were unremitting. His extensive knowledge of Cuba and its coasts and his close relations with the officials of Jamaica enabled him to render valuable services in aiding refugees to escape from Cuba, in furnishing pilots to the American fleet, in procuring special facilities from the British government for American war vessels, and in giving information of the movements of

the numerous Spanish agents on the island, and of vessels engaged in the attempted provisioning of Cuba. After the war Mr. Dent took advantage of a proposed new tariff for Jamaica to bring on a controversy in the press and the legislature which ultimately forced Mr. Chamberlain to negotiate reciprocity treaties for Jamaica and the other British West India colonies. He went to Washington with the Jamaica commission and assisted in the preparation of their treaty with this country. Shortly thereafter, as a reward for his services during the war, he was appointed register of wills at Washington. He was married in Washington, June 3, 1884, to Kate E., daughter of Louis H. and Catharine (Hinman) Yost. They have two sons and one daughter.

HEWITT, Fayette, banker, was born in Hardin county, Ky., Oct. 15, 1831, son of Robert and Eliza (Chastain) Hewitt, both natives of Virginia. He was educated under the instruction of his father, a man of broad scholarship, who died when the son was seventeen years old, whereupon Fayette assumed the care of his mother and younger brothers and took charge of the academy which his father had conducted. He filled this place for eight years, and then accepted a position in the post-office department, Washington, D. C., under Postmaster-General Holt. In March, 1861, he resigned and was summoned to the aid of the postmaster-general of the Confederate States at Montgomery, Ala., there beginning the work of putting that department of the government on a firm basis. This position he resigned on Dec. 1, 1861, to accept an appointment as assistant adjutant-general of the provisional Confederate army, and was ordered to duty with Gen. Albert Pike in the Trans-Mississippi department. During the remainder of the war he served on the staffs of Gen. Walker, J. C. Breckinridge, Ben Hardin Helm and Joseph H. Lewis, participating in the battles of Chickamauga and Elkhorn, Pea ridge and all the engagements of the Atlanta campaign, having three horses killed under him, although escaping personal injury. On his return home in May, 1865, he became principal of Hardin Female Academy, and in March, 1866, began the practice of law in Hardin county. He was appointed quartermaster-general of his state with the rank of brigadier in October, 1867, and undertook the arranging of claims of Kentucky against the United States, a duty which he successfully concluded. He remained in this office under Govs. Stephen, Leslie and McCreary, resigning in April, 1876, and resumed the practice of his profession at Elizabethtown. In 1879 he was elected auditor of Kentucky, and in 1883 and 1887 was re-elected. In November, 1889, he resigned this office to accept the

Fayette Hewitt

presidency of the State National Bank of Kentucky, which he still holds. Gen. Hewitt is a gentleman of high scholarly attainments, charming manners and great business ability. Since he assumed control of the bank it has seen a steady progress in its prosperity. At the present time its surplus is \$45,000. He was never married.

BRAGG, Braxton, soldier, was born in Warren county, N. C., March 22, 1815, son of Thomas and Margaret (Crossland) Bragg, and brother of Thomas Bragg, governor of North Carolina, U. S. senator and attorney-general of the Confederate States. Another brother, John Bragg (1808-1878), was a judge in Alabama and a member of congress from the Mobile district. Braxton was graduated at the Military

Academy at West Point in 1837, and became second lieutenant, 3d cavalry, July 1, 1837. He assisted in removing the Cherokee nation to the West in 1838; served in the Florida wars (1838-42); took part in the military occupation of Texas (1845-46) and in the Mexican war; was brevetted captain, May 9, 1846, for meritorious conduct in the defense of Fort Brown, Texas; was brevetted major for gallantry at Monterey, Sept. 23, 1846, and made brevet lieutenant-colonel, Feb. 23, 1847, for gallantry at Buena Vista. He served as acting assistant inspector-general in 1849; on garrison duty in 1849-53; was promoted major 1st cavalry, March 3, 1855; resigned from the army Jan. 3, 1856. Maj. Bragg was a sugar planter in Lafourche parish, La., 1856-61, and from 1853 until 1861 served as commissioner of public works of Louisiana. At the beginning of the civil war he was made commander-in-chief of the forces in Louisiana by the legislature of that state; on March 7, 1861, was made a brigadier-general of the C. S. army; was put in command of the forces at Pensacola; became a major-general, Sept. 12, 1861, and on Oct. 8, 1861, broke up the Federal encampment on Santa Rosa island, Florida. In February, 1862, he transferred his headquarters to Mobile and soon after was sent with his troops, the 2d division, to join the

army of Mississippi, then under the command of Albert S. Johnston, with Beauregard as commander-in-chief of the department. He established his headquarters at Jackson, Tenn., and commanded the centre of the army at Shiloh. He was made a full general of the C. S. army, April 12, 1862, and a little later succeeded Beauregard as commander of the department. He now began his movement from Tupelo, Miss., through Alabama and Georgia to Chattanooga, Tenn., with a view to operations in East Tennessee and Kentucky. He entered Kentucky, Sept. 5th; captured Mumfordsville, Sept. 17th; moved on Bardstow and on Frankfort, where a Confederate provisional government was inaugurated; on Oct. 8th, fought the battle of Perryville, which resulted in a Confederate victory, but as the Federals were reinforced that night Bragg was forced to retreat. He then returned to Tennessee, where his army was somewhat recuperated; on Dec. 31, 1862, and Jan. 1 and 2, 1863, he fought the battle of Murfreesboro, or Stone river, and after retaining possession of the ground he had won for three days, thought it wise to withdraw to Tullahoma; on Sept. 19-20, he again fought Raccoon at Chickamauga and drove him back to Chattanooga. Then followed the disastrous battle of Missionary ridge, Nov. 25, and the retreat to Dalton. Bragg was relieved of his command, Dec. 2, 1863, but on Feb. 24, 1864, was assigned to duty at the seat of government, and under the direction of the president was charged with the conduct of military operations in the armies of the Confederacy. In November, 1854, he was in command of forces in North Carolina, and defended Fort Fisher against the Porter-Butler attack in December, 1864. He was noted as a stern disciplinarian. He served as superintendent of the New Orleans water-works in 1869, and later was chief engineer of the board for the improvement of the river, harbor and bay of Mobile, Ala. He was chief engineer of the Gulf, Colorado and Santa Fe railroad in 1874. Gen. Bragg died in Galveston, Tex., Sept. 27, 1876.

LINDSTRAND, Frans Albin, journalist and author, was born at Araby, East Gothland, Sweden, March 24, 1847, son of Gustaf Jönsson Lindstrand, a man of deep learning, who instructed him in the rudiments of education, after which he was sent to the common schools in Presttorp. He was apprenticed to a watchmaker and jeweler in Vadstena, and during the four years of his indenture also attended the Citizens' School of that place. Having been accepted as a craftsman, he assumed the name of Lindstrand. In 1864 he left Vadstena and worked at his trade, first at Motala, then at Stockholm, Carlstad, Gothenburg and Copenhagen. In May, 1871, he came to the United States, settling in Chicago, and during the next seventeen years followed his

trade. In 1888 he bought an interest in the "Svenska Amerikanaren," a Swedish American newspaper, then in a struggling condition, and in the following August he became its publisher and managing editor. Largely as a result of his efforts, it has at the present time a larger circulation than any other Swedish-American newspaper. Mr. Lindstrand has constantly contributed to its columns sketches from life, humorous pieces, poetry and editorials, which under the pen-name of "Albin" and "Onkel Ola" have given him a wide reputation. He has also published several volumes, principally on subjects connected with travel. "Travels in the Far West,

and Pen Pictures by Onkel Ola" (1897), and "In Orient and Occident" (1899). The latter, a profusely illustrated volume, was originally published as a serial in Mr. Lindstrand's weekly paper, "Iduna." Both have met with high appreciation by the critics, and enjoyed a wide sale. He is a prominent figure in social and benevolent activities among his countrymen, and has been prominent in founding several Swedish-American societies, notably the Swedish National Association of Chicago. He frequently delivers speeches and lectures before social and religious societies and in political campaigns. In addition to his other connections, he is a member of the Masonic fraternity and a Knight Templar. In 1881 he was married to Selma, daughter of C. Wennerberg, of Gothenburg, a lady of high accomplishments. They have one daughter, Hildur, born in 1882.

FREEMAN, Pliny, insurance manager, was born at Salem, Washington co., N. Y., April 8, 1798. His tastes inclined him towards mercantile pursuits, and at an early age he began business life in a country store. Removing to New York city, he connected himself with a wholesale dry-goods house in Hanover square. His attention was early directed to life insurance, and he devoted all his leisure moments to the study of the subject and its practical workings as they were in operation in England. He carefully noted the defects of the system, and devised many improvements, and in 1845 organized the New York Life Insurance Co., under the name of the Nautilus. The knowledge that he had gained was put to a practical test, and under his skillful management this pioneer company rose rapidly in public estimation. One of the improvements he made was introducing into the company's policies the ten years' non-forcible clause. His attention was not confined to this one company alone; but, with a desire to extend the system and surround it with a network of statute laws which would establish all the com-

panies of the state on a firm basis, he originated the first general insurance law and secured its passage in the legislature in 1849. This law required every company before issuing a policy to deposit \$100,000 in securities equivalent to cash with the superintendent of the life insurance department of the state. He continued in the management of the New York Life Insurance Co. until 1863, and in the following year he organized the Globe Mutual Life Insurance Co. The non-forcible principle, which he had introduced to a limited extent in the New York Life Insurance Co., was made to apply universally to all policies in the Globe, which was considered a bold step, but was hailed as removing the greatest objection against life insurance. Mr. Freeman conceived the idea of and organized the company which had out Greenwood Cemetery, Brooklyn. On June 26, 1826, he was married to Sarah, daughter of Rev. James Maus, of Galway, N. Y., and they had five children. He died in New York city, May 12, 1879.

KENNEDY, Julian, mechanical engineer and inventor, was born at Poland, Mahoning co., O., March 15, 1852, son of Thomas Walker and Margaret (Truesdale) Kennedy. His father's grandfather was a native of Virginia; his mother's, of Pennsylvania. His early education was received in public schools and at Poland Union Seminary. He then became a draughtsman under his father in the construction of the blast furnace of the Struthers Iron Co., where he was employed three years. Entering the Sheffield Scientific School of Yale, he was graduated in 1875, and was then appointed instructor in physics, and while serving took a post-graduate course in the chemistry of iron and steel and in higher mathematics and astronomy. During this time Mr. Kennedy had charge of the physical laboratory and gave a course of illustrated lectures on physics and mechanics to the students in various seminaries in New Haven. He was a member of the University crew from 1873, when Yale won, there being thirteen colleges in the race, at Springfield, Mass., up to 1876, when he rowed in the first eight-oared race against Harvard, also at Springfield. In 1875 he won the inter-collegiate championship for single sculls, at Saratoga lake, as well as rowing in a great number of other races, and was winner in fourteen out of eighteen important races. Mr. Kennedy was also stroke of the Yale four-oared crew at the centennial regatta in 1876, which won the inter-collegiate championship, and in the same year won the pair-oared race at Greenwood lake, N. Y., in company with James Riley, of Saratoga, defeating Eustis and Downs, of the Atalanta Rowing Club, New York, and Smith and Eldred, of the Argonauta Club of the same place. In the same regatta, at Greenwood lake, he won the amateur single scull race. In 1876-85 he was superintendent of blast furnaces at the Briar Hill Iron Co.'s works; the Struthers Iron Co.'s works; the Morse Bridge works; the Edgar Thompson Steel works, and at the Lucy furnaces. He was general superintendent for Carnegie, Phipps & Co., with headquarters at Homestead, in 1885-88. While connected with all these works he had charge of both construction and operation, and during this time the Edgar Thompson and Lucy furnaces held the world's record for the output of pig-iron. In 1888 he became chief engineer of the Latrobe Steel works, and had charge of their construction without severing his connection with these works. Mr.

Frans Albin Lindstrand

Julian Kennedy

Kennedy opened an office in Pittsburgh in 1890, since which time he has been engaged in a general consulting and contracting engineering business. He has been connected as consulting engineer with nearly every important steel manufactory in the United States, and has also done a great deal of work in England, Germany, Austria and Russia. Mr. Kennedy has taken out a large number of patents, most of which are in connection with the manufacture of iron and steel, and has also acted as expert in a large number of patent suits. Among his inventions are improvements on hot-blast stoves; blast furnace filling devices; improvements in blowing engines; reversing engines; blooming mills and manipulators, and special machinery for hammering and rolling locomotive tires, which is used at the Latrobe Steel Works. Mr. Kennedy is a member of the Engineers' Society of Western Pennsylvania; the American Institute of Mining Engineers; the British Iron and Steel Institute, and of the Duquesne Club of Pittsburgh. He received the degree of A.M. from Yale University in 1900. On Nov. 14, 1878, he was married to Jennie Eliza, daughter of Joseph Brememan. They have three sons and two daughters.

CALL, Rhydon Mays, jurist, was born at Fernandina, Fla., Jan. 13, 1858, son of George William and Sarah (Stark) Call. His father, a lawyer, and a brother of Sen. Wilkinson Call, was major of the 2d Florida regiment in Lee's army, and was killed at the battle of Seven Pines; his mother was a daughter of Rydon G. Mays, a physician and planter of Edgefield, S. C., and his wife, Sarah (Butler) Mays. He was educated in the schools of his native town and at Washington and Lee University, Virginia, where he was graduated in 1878. His professional studies were made at Washington and Lee University, and having been admitted to the bar of Virginia in July, 1878, he began practice at Jacksonville, Fla., in 1881. In June, 1893, he was appointed judge of the 4th judicial circuit of the state. By re-appointment in 1899, he still occupies the position with distinguished ability and credit. Judge Call is a member of the Bar Association of Jacksonville, and is owner of the largest general and professional library in the state. He was married, in April, 1887, to Ida, daughter of Henry Edwin Holmes, of Jacksonville, and has one son, George William Call.

SKINNER, Otis, actor, was born at Cambridge, Mass., June 28, 1858, son of Charles Augustus and Cornelia (Bartholomew) Skinner, and descendant of Thomas Skinner, born in England, in 1617, who emigrated to New England about 1650. He was educated at Cambridge, and at Hartford, Conn., where for a long time he was clerk in the National Insurance Co.'s office. He next became shipping clerk in a wholesale commission house, and for a brief period edited a small weekly paper in Hartford. From childhood he had an inclination towards the stage, and his inspiration to become an actor was received while attending performances at the Boston Museum. At the age of nineteen he began his professional life, making his debut at the Philadelphia Museum in the character of an old negro in the play of "Woodleigh," and during the first season he had a line of parts of wide range. Two seasons with stock companies followed in New York and Boston and an association with all the prominent stars then before

the public. In 1880 he first met Edwin Booth and came under the influence of that great actor, and to the opportunity afforded him to play the part of François in "Richardien," much of the success of later years is due. By means of the notices this performance brought him, and through the influence of Mr. Booth, Mr. Skinner entered the stock company of the Boston Theatre the next season, and the year following procured an engagement with Lawrence Barrett as the "juvenile man" of his organization. Three years with Mr. Barrett (1881-84) increased his reputation, notably his performance of Paolo in "Francisca da Rimini." Following this came five years at Daly's Theatre, New York, rich in experience and pleasant association with artists like Miss Rehan, Mrs. Gilbert, Charles Fisher, John Drew, Jr., and James Lewis, and varied by trips to Europe with the company. In 1889-90 he played with Booth and Modjeska. A season followed wherein he assumed the responsibilities of management and direction of affairs of Margaret Mather, just prior to her retirement from the stage. From that time on until he became an independent star, he played with Mue, Modjeska, and to her he acknowledges great indebtedness for influence and counsel, and for his first opportunities of playing Macbeth and Shylock. During that engagement, in the summer of 1890, Mr. Skinner made his appearance as Romeo in a production of "Romeo and Juliet" at the Globe Theatre, London, and was enthusiastically praised by the critics. On Sept. 24, 1894, he appeared as a star in Clyde Fitch's comedy "His Grace de Grammont" at the Grand Opera House, Chicago, and soon after, in the same city, took the part of Triboulet in Victor Hugo's "The King's Jester." As Shylock he won a triumph in New Orleans in the same year. In 1895 he re-appeared in Chicago, almost unannounced, and gave an interpretation of Hamlet that was startling by reason of his poetic and novel conception of the character. Here he also produced "Villon the Vagabond," written by his brother, Charles M. Skinner. William Winter said of Otis Skinner: "He is one of the most studious, sincere, intellectual and refined of the younger actors of this period." In September, 1896, he brought out in Chicago an original play, "A Soldier of Fortune," taking the leading part himself. In the spring of 1897 he played on the Pacific coast, and the San Francisco "Argonaut" declared him to be "almost the only romantic actor in the country who has the delicacy of imagination, the color and fire which go to the making of a good stage lover." In September, 1897, at St. Louis, Mo., he repeated his successes in a play entitled "Prince Rudolph," an adaptation of Stevenson's romance "Prince Otto." In the fall of 1898 he joined Joseph Jefferson's comedy company as Captain Absolute in "The Rivals"; in September, 1900, he appeared in New York city in the title rôle of a new play, "Prince Otto." The degree of A.M. was conferred upon Mr. Skinner by Tufts College, June 19, 1895. He was the first actor in America to receive that degree, Joseph Jefferson being similarly honored by Yale about a week later. He is a member of the Players' Club of New York city. Mr. Skinner was married at Corning, N. Y., April 21, 1895, to Lucy Maud, daughter of William L. and Missourie Anne (Pew) Durbin, of Moberly, Mo.

MEEHAN, Thomas, scientist, author and editor, was born at Potter's Bar, near London, England, March 21, 1826, son of Edmond and Sarah (Denham) Meehan. His father, a native of Ireland, after an apprenticeship to the gardener of the lord-leutenant, Dublin, removed to England, and managed the estates of Adm. Byng, near St. Albans; later having similar employment near Ryde, Isle of Wight. The son attended a Lancasterian school for two years, and

R. M. Call

at the age of twelve began to learn botany and gardening under his father. Three years later he was employed by Dr. W. Arnold Bromfield and other botanists, who were studying the plants of the Isle of Wight, to assist in collecting specimens. Dr. Bromfield crediting him with several original discoveries in his well known work, "Flora Vectensis." His recorded observations found a place in other scientific publications, and before his nineteenth year he received the honor of membership in the Royal Wernerian Society, Edinburgh. His papers were mainly devoted to describing actual observations on natural objects. One of these, that snakes are accustomed to take their young into their mouths for protection when disturbed, was the subject of much ridicule in scientific journals, but was finally verified by Prof. G. Brown Goode, of the Smithsonian Institution. After holding the position of head gardener to the paymaster of the forces, Vaux, at Ryde, and to Sir Augustus Clifford, he in 1845 became a student in the botanical gardens at Kew, and as a result of his studies and of intercourse with eminent botanists determined to make gardening his life-work. In 1847 he came to America on an invitation from Robert Roast, of Philadelphia, to superintend his nursery at Rosedale; later had charge of the Bartram gardens, Spring Brook, Pa. In 1853 he started nurseries at Germantown, which, with the aid of three of his sons, have become famous, at the same time engaging in literary and scientific work as side issues. He made the discovery that vitality in plants is what determines the sex—that weaker branches produce male flowers and stronger female flowers. He is probably the leading authority in the world on vegetable biology. Since he published his "Handbook of Ornamental Trees," in 1853, he has written a large number of papers relating to vegetable morphology and other departments of plant life, which have been published in the "Proceedings" of the Academy of Natural Sciences of Philadelphia and the "Proceedings" of the American Association for the Advancement of Science. In 1860 he became editor of the "Gardeners' Monthly," which position he held under various proprietors for thirty years. In 1878, in connection with Louis Prang, he began the publication of "Flowers and Ferns of the United States," which, with an added department on gardening, he continues with his sons as "Mechan's Monthly." For fifteen years he was on the staff of "Forney's Press" in charge of the weekly edition; but apart from these connections, his scientific work has been mostly in gratuitous contributions to current knowledge. He has been for many years state botanist of Pennsylvania; professor of botany to the Pennsylvania Horticultural Society and other similar bodies; annually elected one of the two vice-presidents of the Academy of Natural Science of Pennsylvania, and is one of the original fellows of the American Association for the Advancement of Science. He took part in the movement to prevent hostilities between the North and South, which culminated in the Crittenden resolutions of 1860-61. Mr. Meachan has been for over twenty years a director of public schools of the 22d district; is a member of the Philadelphia common council, and is known as the "father of the small parks," on account of his instrumentality in securing twenty-three plots for that purpose. He is also the father of the axiom that a tax rate on city property should be of a fixed character and not subject to annual increases or deductions. He is on the board of trustees of the Commercial Museum, of which he was a founder. In 1852 he was married to Catharine Emma, daughter of William Collesh, of Spring Brook, Pa., a connection of the Bartram family. They have four sons and two daughters living. William E., the eldest, is an associate editor of the Philadelphia "Public Ledger"; Thomas B., J.

Franklin and S. Mendelssohn Meachan are associated with him in the nursery business, and the two daughters are Sarah D. Lanning and Frances G. Burn.

DORR, Benjamin, clergyman, was born at Salisbury Point, Essex co., Mass., March 22, 1796, son of Edward and Ruth (Dalton) Dorr. His earliest American ancestor was Edward Dorr, who came to America from England in 1674, and settled in Roxbury, Mass. Benjamin Dorr attended the public schools at Salisbury and Amesbury, and was graduated at Dartmouth College, with the degree of M.A., in 1817. He then entered the office of Hon. Amasa Paine, of Troy, N. Y., one of the most eminent members of the New York bar; but after eighteen months' study of the law Mr. Dorr removed to New York to prepare himself for the ministry. There he became one of the little company of six students who formed the first class at the organization of the General Theological Seminary of the Protestant Episcopal church. He was ordained deacon in 1820 and priest in 1823 by the Rt. Rev. Bishop Hobart, who was his life-long and intimate friend. In December, 1820, Mr. Dorr was called to the united churches of Lansingburg and Waterford, N. Y., which charges he held until May, 1829, when he resigned to take charge of Trinity Church, Utica, N. Y. Here he remained six years, when at the general convention in Philadelphia, in 1825, he was unanimously elected secretary and general agent of the domestic committee of the board of missions under the new organization of the General Missionary Society. Accepting this office, he resigned his charge in Utica and removed to New York city. In March, 1837, he accepted a call to Christ Church, Philadelphia, as the successor of Bishop White. He was installed rector May 4, 1837. He received his degree as D. D. from the University of Pennsylvania in 1838, and was for some time a trustee of that institution. Dr. Dorr was honorary member of several learned societies, among them the Historical Society of Pennsylvania and the American Philosophical Society. His best known works are: "The Churchman's Manual" (1837); "History of a Pocket Prayer-book" (1839); "An Historical Account of Christ Church, Philadelphia" (1841); "Recognition of Friends in Another World" (1840); "Sunday-school Teachers' Encouragement" (1842); "Prophecies and Types Relative to Christ" (1848), and "Notes of Travel in Egypt, the Holy Land, Turkey and Greece" (1854). He was married, July 12, 1827, to Esther Kettell, daughter of John Odlin, of Boston, and had six children. He died in Philadelphia, Pa., Sept. 18, 1869.

KEITH, George Eldon, manufacturer, was born at Brockton, Plymouth co., Mass., Feb. 8, 1850, son of Franklin and Betsey (Bailey) Keith. His father, like his ancestors for several generations, was a shoe manufacturer, a partner in the firm of Martin L. Keith & Co., and twice selectman of North Bridgewater. The original American ancestor was Rev. James Keith, a graduate of Aberdeen University, who emigrated to Massachusetts in 1662 and became pastor of the church at Bridgewater. His wife was Susanna, daughter of Deacon Samuel Edson, by whom he had six sons. Through his son, Timothy, and his wife, Hannah Forbes, the line of descent runs through their son, Levi, and his wife, Jenima Perkins; through their son, Benjamin, and his wife,

Martha Cary; through their son, Ziba, and his wife, Sally Cary, parents of Franklin Keith. Mr. Keith was educated in the public schools of his native town, and completed the course at the Brockton High School in 1867. While at school he worked in his father's shoe factory mornings and evenings, and later became a regular employee of the firm. In July, 1871, with \$1,000 he had saved he entered upon a successful career on his own account in the manufacture of men's shoes as a partner in the firm of Green & Keith. This partnership continued until 1880, when he erected

a large factory, now occupied by him, and from this beginning the business has increased by steady growth until at the present time (1900) he employs between thirteen and fourteen hundred hands, and the sales average \$3,000,000 per year. He was the first American shoe manufacturer to send representatives to Australia and New Zealand, in 1890, in both of which countries he now has a large and regular wholesale trade; and in 1897 he sent the first salesman from America to India, Java, China and Japan, introducing American shoes. He also opened the first store in London, England, dealing in American shoes exclusively. Mr. Keith has always been an active and influential citizen of Brockton.

He was a member of the first board of aldermen; is president of the Brockton National Bank, and a director of the Third National Bank of Boston and of the United Shoe Machinery Co.; is a member and generous supporter of the South Congregational Church, and was first president of the local Y. M. C. A. He resides in a handsome residence on the corner of Maine and Plain streets. Mr. Keith was married, Oct. 23, 1877, to Anna Gertrude, daughter of William L. Reed, of Abington, Mass. They have two sons, Eldon Bradford and Harold Chesman.

PAYNE, William Morton, educator and writer, was born at Newburyport, Mass., Feb. 14, 1858, son of Henry Morton Payne, a manufacturer of cotton-mill machinery in Newburyport, and of Emma (Tilton), his wife. His earliest American ancestor, William Paine, settled in Massachusetts in 1635, and rose to prominence in the colony. The family removed from Newburyport to Chicago, Ill., while the son was still a child; and he obtained his education in the schools of that city. Mr. Payne early evinced a strong interest in science and literature, and since 1876 has been an instructor in the Chicago high schools. He has also given courses of lectures at the University of Chicago and the University of Wisconsin. When about twenty-five years of age, in addition to teaching, he began writing both independently and for the press. He was literary editor of the Chicago "News" from 1884 until 1888, and held the same position on the staff of the "Evening Journal" from 1888 until 1892, when he became associated with "The Dial" as one of its editors. He was president of the Chicago French Club 1887-90, and secretary and treasurer of the Chicago Twentieth Century Club 1889-1900. He has contributed to "The Forum," "The Bookman," "Harper's Weekly," "The Atlantic Monthly," "Musie," "The New England Magazine," "The International Monthly" and other periodicals, in addition to writing continuously for "The Dial" during the past seventeen years. He is acquainted with a number of foreign languages, and has translated from the Norwegian Björnson's historical trilogy of "Sigurd Stenbe" and Jaeger's "Henrik Ibsen: A Critical

Biography." An essay on "The New Education" was awarded a prize and was published by the American Institute of Instruction. He is the author of "Little Leaders," a volume of essays, and of numerous critical papers (largely devoted to Scandinavian writers) prepared for "A Library of the World's Best Literature." He edited, with a lengthy introduction, the work called "English in American Universities." Mr. Payne was one of the founders of the Twentieth Century Club of Chicago, and acted as chairman of the committee which organized the congress of philologists held in Chicago in the summer of 1893.

DAVIS, Noah, clergyman, was born near Salisbury, Worcester co., Md., July 28, 1802. After obtaining a common school education, he entered the employ of a merchant in Philadelphia. Deciding to become a minister, he joined the Baptist church in Salisbury, Md., and was licensed to preach July 9, 1820. Upon the opening of the Columbian College, Washington, in 1821, he entered upon a course of study, preaching meanwhile. For a time he labored in Accomac county, Va., and then in Norfolk. While here he became interested in the welfare of sailors, formed a society for their benefit, and compiled a selection of hymns for their use. He was one of the founders of the Baptist General Tract Society, established in 1824, formed in Washington, but subsequently removed to Philadelphia. This afterwards became the American Baptist Publication Society. Mr. Davis was the manager for a short period, fulfilling his duties with great energy and success. Noah Knowles Davis, LL.D., was his son. He died in Philadelphia, Pa., July 15, 1880.

GALLAGHER, Charles Theodore, lawyer and legislator, was born in Boston, Mass., May 21, 1851, son of William and Emily Gallagher, of Scotch-Irish and English descent. In 1864, although but thirteen years of age, he enlisted as a drummer boy in the 1st unattached company Massachusetts infantry; and served about four months. He was prepared for college, but engaged in business for a short time, and then entered the Harvard Law School, continuing his studies in the office of Rumney & Morse, and in Boston University, where he was graduated in 1875. In the same year he was admitted to the bar, and immediately entered on an extensive and profitable practice. He has been engaged principally in administering trust estates, and has also had extensive business in mercantile and corporation cases. In 1882 he was admitted to practice before the U. S. supreme court. He was for twelve years a member of the Boston school committee, being its president for four years; in 1882 served in the Massachusetts state senate. Mr. Gallagher has been a director in a trust company, railroad, national bank, savings bank and life association, has held offices of trust in numerous large corporations, and is a trustee under the will of Benjamin Franklin. He is a member of the executive council, Boston Bar Association; a commissioner of trials, and director of the corporation of the Masonic grand lodge of Massachusetts, and in 1900 was elected grand master for Massachusetts; a member of the Boston Art Club, and in 1900 its president; of the Athletic, Exchange, Algonquin and Curtis clubs; of the Bostonian Society, and a life member of the Young Men's Christian Union of Boston. In 1897 he was elected a trustee of Boston University, succeeding Gov. Russell (deceased), and in 1894 received

Franklin Keith

Charles Theodore Gallagher

the degree of A.M. from Dartmouth College. He was married, in 1880, to Nellie W. Allen, of Seitate, Mass., a granddaughter of Rev. Morrill Allen, a noted preacher of Plymouth county. They have one son and two daughters.

BURKHARDT, Richard Peter, manufacturer, was born in the grand duchy of Baden, Germany, Oct. 28, 1845, son of Joseph Anthony and Theresia (Besberich) Burkhardt. His father was burgomaster of his native city, Gissenheim. With his wife and family he emigrated to the United States in 1850 and settled in Dayton, O., where Richard was educated in the Roman Catholic parochial school and St. Mary's Institute, Dayton, until he was thirteen years old. He was then engaged for a year by the Cabinet-makers' Union as an errand boy, and for two years and a half he was apprenticed to Philip Haverstick, a cabinet-maker. From 1861 he was a clerk for M. Olmer in his furniture business until it was destroyed by fire in the spring of 1869. He then purchased, on Nov. 2, 1869, the interest of Martin Brabeck in the chair-making firm of G. Stomps, Brother & Co. A month later G. Stomps

purchased the interest of his brother, Joseph, and the firm name was changed to G. Stomps & Co., under which style business was carried on for twenty-one years. On Jan. 1, 1890, it was merged into a joint stock company under the title of the Stomps-Burkhardt Co., Mr. Burkhardt becoming vice-president and general manager. Mr. Stomps died six months later, June 26, 1891, and Mr. Burkhardt became president of the company. When the latter first entered this firm its annual financial transactions amounted to \$24,000; they now amount to \$300,000. He is also inventor of a number of valuable machines used in the manufacture of chairs, the patents for which they control. In politics he is a Democrat, and was a member of the first board of tax commissioners of Dayton. Mr. Burkhardt was married, Nov. 21, 1871, to Mary Adelaide, daughter of Gustave Stomps, and has two sons, Richard Peter, Jr., vice-president and superintendent, and William M., treasurer, in the firm of which their father is head; and three daughters, Mary A., Katharine T. and Eleonore E.

LOVE, William De Loss, clergyman and author, was born at Barre, Orleans co., N. Y., Sept. 29, 1819, son of William and Lucinda (Oaks) Love, who were among the early settlers of the county, having removed thither from Bridgewater, Oneida co., N. Y. He was educated at Genesee Wesleyan Seminary, Lima, N. Y., and was graduated at Hamilton College, Clinton, N. Y., in 1843. In 1844 he entered Andover Theological Seminary, but the following year removed to New Haven, Conn., and was graduated at Yale Theological Seminary in 1847. On April 5, 1848, he was ordained to the Congregational ministry, and installed over the Howe Street Church of New Haven, Conn. His later pastorates were as follows: Eastern Congregational Church, New York city, March, 1852, to December, 1852, when his health failed; Second Congregational Church, Berlin, Conn., Oct. 5, 1853, to Nov. 23, 1857; Spring Street Congregational Church (Grand Avenue) Milwaukee, Wis., Feb. 2, 1858, to July 2, 1871; First Congregational Church, East Saginaw, Mich., July 9, 1871, to Nov. 20, 1876; First Congregational

Church, South Hadley, Mass., 1878-89, when he retired from active service, and took up his residence at Hartford, Conn. Besides his ministerial labors, in which he added about 1,800 members to the churches in which he served, Dr. Love was widely known as a contributor to the religious press, writing articles for the "New Englander" and "Bibliotheca Sacra." He was the editor of the "Wisconsin Puritan," a newspaper published in Milwaukee. In early manhood he became an ardent abolitionist, and was the author of "The Child's Book on Slavery," published anonymously in Cincinnati in 1857. His anti-slavery and patriotic utterances won for him and his church in Milwaukee prominence during the civil war. By his church he was sent into the U.S. Christian commission service, and attended at Annapolis the exchanged prisoners from Andersonville. He was with Gen. Grant in the movement on Richmond, and preached in that city on the Sunday after its surrender. He formed what was known as a provisional church in the army, to which hundreds united themselves, and was prominent in the Society for Aiding the Freedmen, of which he had been one of the originators. After the war he gathered the records of Wisconsin soldiers, and became the author of "Wisconsin in the War of the Rebellion," printed in Chicago in 1866. His later books are: "Christ Preaching to Spirits in Prison" (1883); "Future Probation Examined" (1888); "St. Paul and Woman" (1894), and "Sabbath and Sunday" (1896). Dr. Love was connected with several educational institutions as trustee, especially with Mount Holyoke Female Seminary. The degree of D.D. was conferred upon him by Hamilton College in 1871. During his later years he resided in St. Paul, Minn. He was married to Matilda Longworth Wallace, on Sept. 9, 1847, and had six children. He died in St. Paul, Sept. 5, 1898.

CLARK, Edward, architect, was born in Philadelphia, Pa., Oct. 20, 1824, son of James Clark, a well known architect of that city, and a teacher of architectural drawing in the Franklin Institute. He was educated partly at the public grammar schools of Philadelphia and partly by his uncle, Thomas Clark, the well-known editor of classical and mathematical works. He studied architecture and drawing under Thomas U. Walter, the architect of the Girard College. In 1851 he removed with Mr. Walter to Washington, where he became assistant architect of the capitol extension. While retaining his connection with Mr. Walter, he was made superintending architect of the patent office extension, and later of the extension of the general post-office. He was continuously engaged upon these works until 1865, when, after the resignation of Mr. Walter, he was appointed to succeed him as architect of the capitol. Mr. Clark has been connected with many important public works. He was a member of the commission to build the new congressional library; of the Lafayette monument commission; also of the Washington monument commission, and of the commission to pave Pennsylvania avenue. He has one of the best private collections of musical works in Washington, as well as a large and valuable library of works on architecture and general literature. Mr. Clark is a trustee of the Corcoran Gallery of Art and a member of the art committee of that institution. He is also a fellow of the Clarendon Historical Society of Edinburgh; of the American Institute of

Edward Clark

R. P. Burkhardt

Architects; a member of the Franklin Institute; of the American Institute of Archaeology; of the Washington Philosophical Society. He was married, in 1860, to Evelyn Fessenden, daughter of Watson Freeman, U. S. marshal for the district of Massachusetts.

ROSS, John (Kooweskoowe), Cherokee chief, was born in Georgia, about 1790. The son of a white father, he received a fair education. His house still stands at Rossville, Ga., where he lived, close to the border line of Tennessee. He is said to have been the founder of Chattanooga, which was formerly known as Ross' landing, the Indian name, meaning "Eagle's nest," being subsequently adopted by the city. On becoming principal chief of his nation, in 1828, he spurned a bribe offered him to induce his people to cede their lands and remove, and, as their agent, conducted an appeal to the U. S. supreme court, which decided in their favor as to the validity of their titles against Georgia.

The state disregarded this decision, and pursued an aggressive course. Some of the tribe, under Maj. Ridge, agreed, in 1835, to what was known as the treaty of New Echota, binding them to give up their lands within two years; Ross, acting for most of the Cherokees, protested; but in vain, and they were removed to the Indian Territory by Gen. Scott, with 2,000 soldiers, in 1838. There, still under his leadership, they made good progress, though divided by factions. Ross made an effort to keep out of the civil war, but in August, 1861, took the side

of the Confederacy, though many of his people fought for the Union. After the conflict the Cherokees were compelled to give up portions of their lands to their late slaves. While trying to adjust these difficulties, Ross died at Washington, Aug. 1, 1866, and was succeeded by his son, William R. Ross.

WILMER, Simon, the progenitor of the family in America, was a native of England, and settled in the province of Maryland in 1660. He was a prominent man in Old Kent, a representative in the assembly, and a vestryman in the parish of St. Paul and Shrewsbury. He had two sons, Simon and Lambert Wilmer, both of whom were noted in the church and state, and from whom have descended many representative men in the church, in the professions and in business circles.

LOUGHEAD, Flora (Haines), author, was born in Milwaukee, Wis., July 12, 1855, daughter of John Penley and Mary (Averill) Haines, both of whom were natives of Maine. Her father was a man of most lovable character, gentle, unselfish and charitable, and was possessed of marked literary gifts. Her mother was a woman of rare intelligence and force of character. In 1635 the first American of the family, Samuel Haines, landed at Portsmouth, N. H., and founded the New England branch of the house, which sent at least one representative, her great-grandfather, Thomas Haines, to fight for American independence. Another great-grandfather, Joseph Penley, fought through the revolutionary war. Flora Haines was educated at Columbus, Wis., and at an institution at Lincoln, Ill., known as Lincoln University, where she was graduated in 1872. Inheriting her father's tastes, she did not allow her education to end with her schooling, but has continued ever since to be an ardent student. Her literary career began with a story written in her fifteenth year; but it was not until after she had married and settled in California that she first sought publication for her literary work of a permanent

character. Almost immediately on leaving school, however, she had begun to write for newspapers, being at one time on the staff of the Chicago "Inter-Ocean," and later on connected with several Denver journals. This journalistic work she continued at intervals until 1886, latterly in connection with San Francisco dailies, in whose active service she was engaged for years. She has also written a large number of short stories for leading western magazines and literary syndicates, as well as corresponding occasionally for New York journals; has published in book form: "Libraries of California" (1878); "Hand-book of Natural Science" (1886); "The Man Who Was Guilty" (1886); "The Abandoned Claim" (1891); "The Man from Nowhere" (1892); "Santos's Brother" (1892); "A Crown of Thorns" (1892), and "The Black Curtain" (1898). She was married in California, in 1875, to Charles E. Apponyi; and in February, 1886, to John Loughead. Mrs. Loughead has five children. She resides at Oakland, Cal.

WALLER, Emma, actress, was born in London, England, in 1820. After playing in provincial theatres for several years, she made her first London appearance in Drury Lane Theatre in 1856 as Pauline in "The Lady of Lyons." On Oct. 19, 1857, she appeared in Philadelphia, playing Ophelia, and on April 5, 1858, made her first appearance on the New York stage at the old Broadway Theatre as Marina in "The Duchess of Malfi"—a version of that play having been written for her by her friend, Richard Hengist Home. In February, 1862, she appeared in Edmund Falconer's Irish drama, "The Peep-o'-Day Boys," in which she played the part of Nelly Brady. Her husband played McCarthy, and the cast included J. C. Burnett, J. H. Stoddard, John T. Raymond, Charles Peters, Milnes Levick, Owen Marlow, H. F. Daly, Mrs. J. H. Allen and Ione Burke. After touring for several seasons, she made a brilliant re-entrance in New York on Dec. 27, 1869, appearing at Edwin Booth's theatre as Meg Merrilies in a revival of "Guy Manuering," giving, the newspapers stated, "the most powerful performance that had been seen in our time." The drama was often repeated, Mrs. Waller's impersonation of her subject making her universally famous. Although her great performances were those of Lady Macbeth, Meg Merrilies and the Duchess of Malfi, she also played male characters, her impersonations of Hamlet and Iago being exceptionally clever. She was a tragic actress of the first magnitude—worthy to be named with Mrs. Duff, Charlotte Cushman, Charlotte Crompton and Mrs. Warner. From 1875 until Dec. 1, 1881, when she made her last public appearance, she gave dramatic readings and taught elocution, appearing only occasionally as an actress. She died in New York city, March 24, 1899.

PITTENGER, William, soldier and clergyman, was born in Jefferson county, O., Jan. 31, 1840. He was brought up on a farm, and at sixteen became a school teacher. At the outbreak of the civil war he enlisted in the 2d Ohio volunteer infantry, and in 1862 was one of the Andrews raiders who made a remarkably daring but unsuccessful attempt to burn the railroad bridges and destroy the telegraph lines between Atlanta and Chattanooga. Early in the morning of April 12th, while the conductor, engineer and passengers were at the breakfast table of the Big Shanty Hotel, Camp McDonald, on the Western and Atlanta railroad, they mounted the engine of the waiting train, put on all steam, and started up the track. They were hotly pursued for several hours, and were finally obliged to abandon the engine and take to the woods, their supply of water, wood and oil being exhausted. Eventually they were all captured and imprisoned, but some of them escaped in October of the same year, some

were hung, and others, with Pittenger, were exchanged in the spring of 1863 and were rewarded with lieutenant's commissions. Lieut. Pittenger was discharged for disability, Aug. 11, 1865, and since that time he has been in the active ministry of the Methodist Episcopal church in the conferences of Ohio, New Jersey and California; his present charge being the church at Fallbrook, Cal. From 1876 until 1889 he was connected as a teacher with the national school of elocution and oratory in Philadelphia. He is the author of "Daring and Suffering" (1862); "Oratory, Sacred and Secular" (1867); "Extempore Speech" (1882); "Interwoven Gospels" (1888); "Debater's Treasury" (1890); "The Great Locomotive Chase" (1893), and "Tourists" (1895). In 1864 he was married to Winnie C. Osborne, of New Brighton, Pa.

EDWARDS, William, inventor, was born at Elizabeth, N. J., Nov. 11, 1770, son of Timothy and Mary (Ogden) Edwards. His father (b. July 25, 1738; d. Oct. 27, 1813) was the oldest son of Rev. Jonathan and Sarah (Pierpont) Edwards. He was graduated at the College of New Jersey in 1787, and for a time followed mercantile pursuits in Elizabeth. In 1770 he removed to Stockbridge, Mass., where he resided the rest of his life, an influential and leading citizen and judge of probate for Berkshire county. He had fifteen children. His wife was the sister of Aaron Ogden, fifth governor of New Jersey. After obtaining a common school education, William learned the tanning business and then removed to Northampton, Mass., where he soon built a tannery of his own. The first leather made in it was sent to Boston in 1794. The supply of hemlock bark having failed in the valley of the Connecticut, his attention was attracted to the vast hemlock forests in the Catskill mountains, and in 1817 he removed to Hunter, Greene co., N. Y., erecting a novel tannery on Schoharie creek. He was assisted in the business by his sons, and in 1822, in connection with Jacob Lorillard, they purchased the real estate of the company, which had been incorporated, amounting to 1,200 acres. Mr. Edwards not only invented several machines, but he adapted many devices previously used for other purposes to the art of tanning, and he made water-power take the place of manual labor to a great extent. His rolling machine was considered especially valuable, and continued in use many years after his death, giving to leather the smoothness of surface and solidity of texture peculiar to the hammered article. He introduced the system now employed in nearly all American tanneries, by which leather is made in about one-fourth of the time required by the old European process. His establishment was able to convert imported hides into sole leather with marvelous rapidity, and about 10,000 sides were made and sent to the city of New York annually. The success which has attended the manufacture of leather in the United States must be ascribed not only to the plentiful supply of tanning material, but also to the improved methods introduced by William Edwards. In New York city and Brooklyn, where he lived in his later years, he was active as a Sunday-school teacher and tract distributor. His wife was Rebecca, daughter of Benjamin Tappan, a merchant of Northampton, Mass. They had eight children. Mr. Edwards died in Brooklyn, N. Y., Dec. 1, 1851.

LITTLEJOHN, DeWitt Clinton, soldier and legislator, was born at Bridgewater, Oneida co., N. Y., Feb. 7, 1818, son of Levi S. and Lucy (Pratt) Littlejohn. He was well educated, but did not attend college, and at the age of twenty-one went to Oswego, where, in partnership with Henry Fitzhugh, he engaged in commerce of the lakes and in the manu-

facture of flour. He served as president of the village of Oswego, and when it became a city he was an alderman, and was twice elected mayor. In 1853 he was chosen to the state legislature, and was re-elected many times, serving as speaker of the house five times. In 1860 Mr. Littlejohn was offered by Pres. Lincoln the position of U. S. consul at Liverpool, England; but declined it, as the civil war was threatening, and he preferred to give his services to his country. He was made colonel of the 110th New York regiment, and served in the field until March, 1863, when, having been elected to the 48th congress, he resigned. As a congressman he served on the committee on roads and canals, and was chairman of the committee on revolutionary pensions. After retiring from congress, in 1865, Mr. Littlejohn was re-elected to the state legislature. He was instrumental in building the New York and Oswego Midland railroad, and became president of the company. He was again chosen a member of the legislature in 1867 and 1871. On Sept. 22, 1846, he was married to Aida, daughter of Moses and Jane (Arroll) Tabbs, by whom he had three children. He died at Oswego, Oct. 27, 1892.

RHETT, Robert Goodwyn, financier, was born in Columbia, S. C., March 25, 1862, son of Albert Moore and Martha (Goodwyn) Rhett. His father, a native of South Carolina, was a planter and is now a manufacturer; his mother is a daughter of Dr. Robert Goodwyn, of Virginia, who fought with distinction in the Florida war, and settled in Columbia, S. C., where for twenty years he was president of the branch bank of the state. He is descended from Landgrave Thomas Smith, his paternal grandfather, Thomas Moore Smith, having changed his name to Rhett in honor of a favorite colonial ancestor, Col. William Rhett, whose family name was about to become extinct. This William Rhett was speaker of the house of commons of the colony of South Carolina in 1706, in which year

he was also commissioned vice-admiral of a fleet fitted out against the French, and in 1717 commandant of the fleet which captured the pirate, Bonnet. Rhett was educated at the Porter Academy, Charleston, S. C., and at the Episcopal High School near Alexandria, Va. In 1883 he was graduated at the University of Virginia with the degree of M. A., and in 1884 took the degree of LL. B. He immediately settled in Charleston, and began the practice of law in the office of Brawley & Barnwell. In 1886 he formed, with George M. Trenholm, the law firm of Trenholm & Rhett. In 1893 W. C. Miller, and in 1899 R. S. Whaley, were added to this firm, now styled Trenholm, Rhett, Miller & Whaley. Mr. Rhett turned his whole attention to commercial and corporation law, and early developed a taste and aptitude for finance. In 1896 he was elected president of the South Carolina Loan and Trust Co., one of the oldest banking institutions of the city. He is also president of the Land Pebble Phosphate Co., the Oakland Mining Co., and the Domestic and Imperial Building and Loan associations; a director in the Imperial and Standard fertilizer companies, the Bank of Barnwell, the Granby cotton mills, the Courtenay (cotton) Manufacturing Co., the Charleston Importing and Exporting Co., the Johnston-Crews Co. (wholesale dry-goods), the Charleston Dry-goods Co., the Mutual Carpet Co., the Palmetto Land and Improvement Co., the T. P. Smith-Meyer Co. (rice planting and factorage), and a member of the insurance firm of W. D. Middleton & Co. In 1899 he acquired the controlling interest in the People's National Bank, of Charleston, the oldest

R. G. Rhett

national bank in the city, and became its president. He is a member of the city council of Charleston, and chairman of the executive committee of the city Democratic party. On Nov. 15, 1888, he was married to Helen Smith, daughter of William Baynard Whaley, of Charleston, S. C. They have two daughters and one son.

CHASE, Carlton, first P. E. bishop of New Hampshire and forty-second in the succession of the American episcopate, was born at Hopkinton, N. H., Feb. 20, 1794, son of Capt. Charles and Sarah (Currier) Chase.

His grandfather was Capt. Jonathan Chase, who came of sound New England stock. In the academy at Salisbury young Chase was prepared for college. He entered Dartmouth College in 1813, and was graduated in 1817. After graduation, he taught school in his native town, and during this period he became deeply impressed with the privileges and obligations of a Christian life. Having given considerable study to matters pertaining to the church, he decided to make theology his profession. His theological studies were pursued in Rhode Island under the venerable Alexander V. Griswold, bishop of the eastern diocese, by whom he was ordained in 1818. He was made priest in Newport in 1820, accepted a call to Immanuel Church, Bellows Falls, Vt., and was its rector for twenty-four years. On Oct. 20, 1844, he was consecrated first bishop of New Hampshire in Christ Church, Philadelphia, his kinsman Rt. Rev. Philander Chase, being chief consecrator, after which he removed to Claremont, N. H., and was rector of Trinity Church there for several years. After the deposition of Bishop Onderdonk, of New York, Bishop Chase made three visitations to that diocese. Bishop Chase was a member of the New Hampshire Historical Society and a Royal Arch Mason. The University of Vermont conferred upon him the degree of A. M. in 1839. He was married at Windsor, Vt., Sept. 13, 1820, to Harriet, daughter of Dr. Samuel Cutler, of Bellows Falls. A contemporary said: "Bishop Chase was a man and a bishop of an antique mould. In him there was no weakness,—no littleness. Calm, self-centered, faithful, and true, of a grand simplicity, he stood four square to every wind that blew." He published some sermons and addresses and contributed information respecting the history of the church in Vermont to Thompson's "Gazetteer." He died at Claremont, N. H., Jan. 18, 1870.

NORDHOFF, Charles, journalist and author, was born at Erville, Westphalia, Prussia, Aug. 31, 1830. He was brought to the United States by his father in 1834; attended the primary department of Woodward College, in Cincinnati, O.; served in a printing-office; in 1844-53 was at sea in the merchant and fishery service; in 1853-57 worked in newspaper offices. He was connected with "Harper's Magazine" and "Harper's Weekly" from 1857 until 1861; with the New York "Evening Post" from 1861 until 1872, and with the New York "Herald," as its special Washington correspondent, from 1874 until 1890, when he retired from active journalism. James Gordon Bennett generously granted him half pay on his retirement. Mr. Nordhoff has published: "Man-of-War Life" (1856); "The Merchant Vessel" (1856); "Whaling and Fishing" (1857); "Stories of the Island World" (1858); "Secession is Rebellion" (1860); "The Freedmen of the South Carolina Sea Islands" (1863); "Slavery Injurious to the Free Laborers" (1864); "Cape Cod and All Along Shore;

"A Collection of Tales" (1868); "California for Health, Pleasure and Residence" (1872, with a revised edition 1881); "Northern California, Oregon and the Sandwich Islands" (1873); "The Communitistic Societies of the United States" (1874); "The Cotton States under Reconstruction" (1875); "Politics for Young Americans" (1875), which was translated into Spanish in 1885 by Senor Edwardo Ruiz, a well-known Mexican author, and is used as a school text-book in Mexico as well as in the United States, and "God and the Future Life" (1883).

KNIGHT, Clarence A., lawyer, was born at McHenry, Ill., Oct. 28, 1853, son of John Knight, of the Federal navy, who was killed in the White river expedition in June, 1862. He attended the public and high schools of his native town and afterwards the Cook County Normal School, and after teaching school in 1871-72, began to study law. He was admitted to the bar at Ottawa in 1874, and immediately entered upon the active practice of his profession. His ability soon brought recognition, and in 1879 he was appointed first assistant city attorney of Chicago, a position he held for five years, when he became city attorney. Upon the election of Hon. Hempstead Washburn as city attorney, Mr. Knight was retained as first assistant and so continued until January, 1888, when he was appointed assistant corporation counsel. During the ten years in the law department of the city of Chicago he had charge of a vast amount of municipal legislation, including the preparation of numerous acts passed by the state legislature, and important ordinances passed by the city council, including grants to quasi public corporations, and is now a recognized authority upon matters pertaining to municipal grants and municipal law. He prepared the act passed in 1889 by the legislature under which the towns of Hyde Park, Lake View, Jefferson, Lake and portions of the town of Cicero became a part of the city of Chicago. This act was repeatedly tested before the supreme court and was held to be constitutional and valid in every respect. In 1889 Mr. Knight resigned to enter upon the private practice of law, and formed a partnership with Paul Brown, under the firm name of Knight & Brown, which still continues as originally formed. He is general counsel for numerous corporations and street car companies of Chicago, including the Consolidated Traction Co.; the Lake Street Elevated Railroad Co.; the Northwestern Elevated Railway Co., and the Union Elevated Railroad Co. (Union Loop—so-called), and since his resumption of private practice has been engaged in much of the most important litigation affecting corporate and real estate interests that have been before state and Federal courts in the city. In the suits to restrain by injunction the building of the elevated railroads, and particularly the building of the Union Loop, Mr. Knight represented the defendants, and was sustained by the supreme court in his contention (in which the *visi prius* courts were against him) that a bill for injunction could not be maintained. He is gifted with a logical mind and legal intuition to a marked degree which, coupled with his indefatigable industry and tireless energy, has led to his truly remarkable success. He is a Mason; a Knight Templar, a Forester and is a member of the Union League and Chicago Athletic clubs. He was married, Oct. 31, 1877, to Adelle, daughter of Dr. H. T. Brown, of McHenry, Ill., and has one son and one daughter.

RHODES, Stephen Holbrook, insurance manager, was born at Franklin, Norfolk co., Mass., Nov. 7, 1825, son of Stephen and Betsey (Bird) Rhodes, natives of Foxboro, Mass. He was educated in the public schools of his native town, and at the high school and Bristol Academy, both of Taunton, Mass., and then entered the employ of his father at Taunton. In 1867 he took up the insurance business as agent for various fire and life companies, and soon became prominent in the community both in business and politics. He was mayor of the city of Taunton in 1866-69; was member of the state senate in 1870-71, and deputy state insurance commissioner in 1872-74. In the latter year he was appointed insurance commissioner, and in 1877 was reappointed to the same office. He resigned, however, two years later, to accept the presidency of the John Hancock Mutual Life Insurance Co., of Boston, Mass., which position he still holds (1900). One of his first acts in this office was to establish the industrial branch of the company, which began on July 1st of that year, and so successful was this department under his management that at the end of the year 9,327 policies had been issued, representing a total insurance of \$951,000. The unprecedented record of the first six months, when the scheme was new to the public and had to be thoroughly explained in each case, has since been steadily maintained. On Dec. 31, 1883, the amount of industrial business indicated 63,625 policies, representing \$6,730,902. The average gain in all departments since 1890 has amounted to about \$10,000,000 per annum, and at the end of 1899 the books recorded assets to the amount of \$12,495,946; surplus to the amount of \$1,335,427; and an annual income of \$7,400,654, while the total amount of insurance in force was \$167,138,345. Mr. Rhodes' executive ability has placed him in the first rank of insurance managers in the United States. He was married, Nov. 25, 1847, to Elizabeth Maltby, daughter of Charles Godfrey, of Taunton, Mass., and a descendant of Brig.-Gen. Godfrey, of the American revolution. They have one daughter, Annie Elizabeth, wife of Lieut. James M. Grimes, U. S. N., retired, of Peoria, Ill., and a grandson, Henry Holbrook Grimes, born in 1886.

Stephen H. Rhodes

LUMMIS, Charles Fletcher, author, was born at Lynn, Mass., March 1, 1859, eldest son of Henry Lummis. He was educated at home and at Harvard College. While an undergraduate at Harvard he published the smallest volume of poems in existence, printing it on birch bark, and doing all the mechanical labor of the "Birch Bark Poems." In 1882 he removed to Ohio, and edited at Chillicothe the "Scioto Gazette." In 1884 he walked from Ohio to California. The trip covered 3,507 miles, and is recorded in his "Tramp Across the Continent" (1892). Arriving in Los Angeles, Feb. 1, 1884, he became, next day, city editor of the "Daily Times," and later one of the owners. In January, 1888, prostrated by paralysis from overwork, he went to New Mexico to recuperate, living among the Mexicans and studying their folk-lore and folk-songs. For five years he resided in a village of the Pueblo Indians, mastering their folk-lore and customs and two of their languages. He is the author of "A New Mexico David" (1891); "Some Strange Corners of Our Country" (1892); "Tramp Across the Continent" (1892); "The Land of Poco Tiempo" (1893); "Spanish Pio-

neers" (1893); a volume of Tigua folk-stories, "The Man Who Married the Moon" (1894); "The Gold Fish of Gran Chimu" (1896); "The Enchanted Barro" (1896); "The Awakening of a Nation: Mexico Today" (1898); "The King of the Bronces" (1898); "Right Hand of the Continent" (1901); Villagran's New Mexico" (1901); "Benavides' Memorial of 1630" (1901). Mr. Lummis was associated in New Mexico with the historian, Adolph F. Baudelier, and in 1892 accompanied him to Peru and Bolivia on an ethnological and historical expedition. Returning to the United States in 1894, he settled in Los Angeles, and in the same year assumed the editorship of the first magazine of the Southwest, the "Land of Sunshine." He is recognized as an authority in Southwestern exploration, history and ethnology. In 1900 he began building a large stone castle with his own hands. On March 27, 1891, he was married to Eve Frances Douglas, of Connecticut, and has three children.

WARD, Durbin, lawyer and soldier, was born at Augusta, Bracken co., Ky., Feb. 11, 1819, son of Jesse and Rebecca (Patterson) Ward. His paternal ancestors, who were farmers, of English origin, settled on the eastern shore of Maryland and Virginia about 1734; but removed to Pennsylvania early in the eighteenth century. His father served in the war of 1812, and fought at Bladenburg and in the defense of Baltimore. After the war he lived in Kentucky; married, and the subject of this sketch was his eldest son. The family subsequently removed to Everton, Fayette co., Ind., and there young Ward was brought up, aiding his father in the rude labors of the farm. At the age of eighteen, having acquired unabled a knowledge of the rudiments of Latin, algebra and geometry, he entered Miami University; but left it without graduation two years later. He removed to Lebanon, O., and studied law under Judge Smith, completing his studies with Gov. Corwin, with whom he entered into partnership in 1843. The partnership was dissolved when Mr. Ward was prosecuting attorney of Warren county, which post he filled from 1845 until 1851, in the latter year being elected to the first legislature under the present constitution in 1851. In 1850 he was a member of the Democratic national convention that met in Charleston, S. C., and reassembled in Baltimore, Md., in which he supported the candidacy of Stephen A. Douglas. Mr. Ward enlisted as a private in the Federal army at the outbreak of war in 1861; then gradually he was promoted to lieutenant-colonel, colonel and brigadier-general. He fought in West Virginia under McClellan, and afterward becoming major of the 17th Ohio volunteer infantry, served under Gen. Thomas, taking part in the battles of Rich mountain, Mills' spring, Pittsburg landing, Perryville, Stone river and Chickamauga, the Atlanta campaign and Nashville. At the close of the war he opened an office in Washington for the prosecution of soldiers' claims, and remained there for nearly two years. While there he took part in the organization of the Union Club, which gave support to Andrew Johnson's administration. In 1866 he was appointed U. S. district attorney for the southern district of Ohio, and served nearly three years. The plan of the present circuit court system of that state was drafted by him. In 1870 he entered the state senate. He was an orator, and at the Democratic national convention of

Durbin Ward

1884 presented the name of Allen G. Thurman as a candidate for the presidency. Gen. Ward was married at Lebanon in 1866 to Elizabeth Probasco. He died at Lebanon, O., May 22, 1886.

SWEENEY, Thomas William, soldier, was born in Cork, Ireland, Dec. 25, 1829, son of William Sweeney. He came to America in 1832, and at an early age was apprenticed to the printing business. When a young man he joined the Baxter Blues, a military organization in New York city, and in 1846, at the beginning of the war with Mexico, became second lieutenant in Burnett's 1st New York volunteers. Under Gen. Scott, Sweeney participated in the campaign from the siege of Vera Cruz to the storming of

Churubusco, where he lost an arm. When he returned to New York, in 1848, he was brevetted captain by the governor of the state, and presented a silver medal by the city government. In November, 1848, upon the recommendation of Gen. Scott, he was given the commission of second lieutenant in the 2d infantry, and was in charge of Fort Yuma, California, and elsewhere in the West, being engaged in frequent actions with hostile Indians. He was promoted first lieutenant in 1851, and after seeing service in the Yuma Indian war, was ordered to New York city in 1858 on general recruiting service. At the

outbreak of the civil war he was ordered by Gen. Scott to proceed to St. Louis, Mo., and assume command of the arsenal, which was the only one west of the Alleghany mountains in the Southern states which had not fallen into the hands of the Confederates. It contained an immense quantity of stores, sufficient to arm and equip 60,000 troops. Sweeney had only forty unassigned recruits under him, while in the city were 3,000 Confederate minute-men, armed and drilled, ready at a moment's notice. Advances were made to induce him to surrender; but the reply, that if a serious attempt should be made to capture the arsenal he would blow it to atoms, prevented any action on the part of the Confederate sympathizers. At the capture of Camp Jackson in May, 1861, Sweeney was second in command of the Federal forces, and, Gen. Lyon having become disabled, conducted the final negotiations which led to the surrender. He was mainly instrumental in the organization of the Missouri three months' volunteers, or "Home guards," of which organization he was unanimously chosen brigadier-general in 1861, and, at the request of Gen. Lyon, accepted the command. In the campaign that followed he took an active part with Gen. Lyon, and was severely wounded at the battle of Wilson's creek; later he was acting adjutant-general under Gen. John C. Frémont. He then accepted the command of the 53d Illinois volunteers, and was attached to the army under Grant, participating in the capture of Fort Donelson, after which he took 6,000 prisoners to Alton, Ill. At a critical moment, toward the close of the battle of Shiloh, a gap existed between the right flank of Sweeney's brigade and Gen. Wm. T. Sherman's left. The defense of this position, which was the key to the situation, was intrusted to him by Sherman. He received his commission as brigadier-general of volunteers on Nov. 29, 1862, and thereafter he commanded a division of the 16th army corps, and was engaged in protecting the Memphis and Charleston railroad. He was promoted major of the 16th infantry in 1863, and in the Atlanta campaign had the 2d division of the 16th corps in the army of the Tennessee. In 1863, being disabled by his wounds, Sweeney obtained leave of absence. He was presented by the

city of Brooklyn with a gold-mounted sword in consideration of his "distinguished valor and bravery." He took part in the battle at Snake creek, and his command gained possession of the gap twenty-four hours in advance of the cavalry, and held it in spite of every effort of the enemy. At Resaca he forced a passage across Oostenaula river at Lay's ferry, where he fought a successful battle, which resulted in the retreat of Gen. Joseph E. Johnston southward. He also served in the battle of Dallas and Knesaw mountain and at the battle before Atlanta, on July 22, 1864, his division drove the enemy back with great slaughter, capturing 900 prisoners. Subsequently he had command of the post of Nashville until July, 1865, and was mustered out of the volunteer service on Aug. 24th of that year. He took part in the Fenian invasion of Canada in 1866; soon afterward was reinstated in the U. S. army, and was retired May 11, 1870, with the rank of brigadier-general. Gen. Sweeney was twice married. His first wife was Eleanor Swain, daughter of John Clark, of Brooklyn; his second was Eugenia Octavia, daughter of Dr. Francis Washington Reagan, of Augusta, Ga. He died April 10, 1892.

MCKAY, James J., congressman, was born in Bladen county, N. C., in 1793, practiced law and was U. S. district attorney for several years. He was state senator in 1815, 1819-22 and 1826, when he was elected to congress, and served regularly from the 23d to the 30th congress. He was chairman of the committee of ways and means and leader of the Democratic party in the house of representatives. He received the vote of his state as a candidate for vice-president in the Baltimore convention of 1848. He died at Goldsboro, N. C., Sept. 14, 1853.

GREENE, Nathaniel, editor, was born at Boseawen, Merrimack co., N. H., May 20, 1797. Early in life he was left to depend upon his own resources, and in 1809 apprenticed himself in the office of the New Hampshire "Patriot." In 1812 he became editor of the Concord "Gazette," and in 1814 removed to Portsmouth, where he had charge of the New Hampshire "Gazette." He afterwards settled in Haverhill, Mass., and for two years managed a newspaper, the "Gazette." Mr. Greene founded and edited the Essex "Patriot" in 1817, with which journal he remained until 1821, when he founded the Boston "Statesman." This became the foremost Democratic paper in Massachusetts. He was postmaster of Boston in 1829-40 and again in 1845-49. From 1849 until 1861 he traveled in Europe. Under the pen-name of "Boscawen" he contributed more than two hundred poems to various Boston journals, and published a translation of G. Storzosi's "History of Italy" in 1836; "Tales from the German" (1837); "Tales from the German, Italian and French" (1843), and "Improvisations and Translations" (1852). His son, William Batchelder (1819-78), a Unitarian clergyman, noted as a reformer, served for a year in the Federal army during the civil war, as a colonel. He was a fine Hebrew scholar and a mathematician, and was the author of various works. Mr. Greene died in Boston, Mass., Nov. 29, 1877.

WOODBIDGE, William Reed, clergyman, was born at Marblehead, Mass., March 30, 1834, son of William Channing and Lucy Ann (Reed) Woodbridge. From 1836 five years of his life were spent in Switzerland and Germany, but after the death of his mother in Frankfort-on-the-Main, in 1840, he

Nath. Greene

was taken into the family of his uncle, Benjamin T. Reed, of Boston, where he attended the public schools, and after five years' preparation in the Latin school, entered Yale College in 1851, where he was graduated with the class of 1855. After spending three years in commercial pursuits, he was married, Dec. 13, 1860, to Emily F. Weatherly, of Port Henry, N. Y., and in 1862 removed to Gambier, O., where he studied for the Episcopal ministry. He was ordained deacon by Bishop Charles P. McVaine, June 28, 1865. The next October he took charge of St. Paul's Church, Vergennes, Vt., where he was ordained presbyter by Bishop John Henry Hopkins, July 6, 1866. He accepted the rectorship of St. Michael's Church, Marblehead, Mass., Nov. 17, 1867, where he remained until 1871. Removing to Port Henry, N. Y., for his health, he, when partially restored held services there, and when, in 1872, Christ Church was built, became its rector. He was for years a member of the village school board, and has served as secretary of the board of missions of the diocese of Albany. In 1892 he resigned his rectorship at Port Henry and for a year officiated in Christ Church, Morristown, N. Y. In 1894 he retired from the ministry. Of his six children five are living.

PERRY, Isaac Newton, banker, was born at Lee, Oneida co., N. Y., Feb. 10, 1847, son of Henry L. and Charlotte (Hall) Perry. When about eight years of age he removed with his parents to Kane county, Ill., and there passed his early years on his father's farm, obtaining his education at the Kaneville public schools. Later he attended the Jennings Seminary at Aurora, and at sixteen began his business career as clerk in a dry-goods store of that town. After employment in the First National Bank of Aurora, in 1872 he embarked in the dry-goods business on his own account, at Rochelle, Ill., under the style of Perry Brothers; but in the following year he became cashier of the Rochelle National Bank. For twelve years he occupied this position, and then removed to La Crosse, Wis., where he organized the Union National Bank, of which he became

cashier. Very largely as a result of his eminent business capacity, this institution in the course of six years obtained recognition as one of the leading banks in western Wisconsin. He resigned, however, on Jan. 10, 1891, to become vice-president of the Continental National Bank of Chicago, an institution of such high standing in the commercial world as to afford the widest opportunities in his chosen line of business. Mr. Perry is identified with a number of interests outside the banking business, has been vice-president and treasurer of the Star Coal Co., one of the largest concerns of its kind in the state, and is director or officer in several leading financial and manufacturing corporations. He is an indefatigable worker, and, apart from his business, has carefully studied financial interests that have in recent years emerged into national politics. Socially, he enjoys a wide popularity, on account of his sterling character and high intelligence, and is a member of the Union League and Hamilton clubs and Bankers' Association, all of Chicago. He was married, Nov. 6, 1894, to Sarah E., daughter of Augustus Byram, of Chicago, a woman of high culture and accomplishments. They have one son and one daughter.

BEDELL, Gregory Townsend, clergyman, was born at Fresh Kill, Staten Island, N. Y., Oct. 28, 1793, son of Israel Bedell, and descendant of an Eng-

lishman who settled at Hempstead, L. I., in 1673. His mother was a sister of Bishop Richard C. Moore, of Virginia. His elementary education was received at the Episcopal Academy, Cheshire, Conn. He was graduated at Columbia College in 1811, studied for the ministry of the Episcopal church, and was ordained by Bishop Hobart, Nov. 4, 1814. His first charge was at Hudson, N. Y., where he remained for three years. He accepted a call to Fayetteville, N. C., in 1818, but the climate had an unfavorable effect and he removed to Philadelphia in May, 1822. Through his labors St. Andrews Church was established.

He acquired great popularity as a preacher, while his evangelical spirit and catholicity endeared him to Christians of every denomination. Dr. Bedell was the author of several sacred poems and musical compositions. He edited the "Episcopal Record" for several years and published "Bible Studies" (1829), "Ezekiel's Vision" (1829), "Onward; or, Christian Profession" (1829), "Is it Well?" and "It is Well." Dickinson College conferred upon him the degree of D. D. He was married to Penelope Thurston, by her he had a son, Gregory Thurston, who became bishop of Ohio. Dr. Bedell died in Baltimore, Md., Aug. 20, 1834. His sermons, with memoir by Stephen H. Tyng, D. D., were published in 1836.

DAVIS, Isaac, lawyer, was born at Northboro, Worcester co., Mass., June 2, 1799, and was graduated at Brown University in 1822. Taking up law as a profession he practiced at Worcester, Mass. Mr. Davis was a liberal but judicious patron of education. He served as president of the board of trustees of Worcester Academy in 1833-73, and was a member of the state board of education in 1852-60; as a member of the board of trustees of Brown University, became a fellow in 1851, and received from that institution the degree of LL. D. He was president of the Massachusetts Baptist state convention in 1833-40; a Democratic candidate for governor in 1845, was mayor of Worcester in 1856, 1858 and 1861; in 1833-54 was a member of the state senate, serving on the governor's council in 1851, was chairman of the committee on judiciary in 1852, attended the state constitutional convention in 1853. Mr. Davis died at Worcester, April 1, 1883.

HILLEGAS, Michael, merchant, was born in Philadelphia, Pa., in 1728, son of Michael Hillegas, who came to America from Germany. He became interested in sugar-refining, was active in municipal affairs, and after serving as treasurer of the committee of safety of which Dr. Franklin was president, in 1774, was appointed by the Continental congress treasurer of the United States in 1775. This office he held until 1789. The general assembly, in April, 1781, passed the following resolution: "Resolved, that Michael Hillegas be requested and empowered to revise, compare, correct and publish in one volume the resolves of the committee of the late province of Pennsylvania, with their instructions to their representatives in assembly held at Philadelphia, July 15, 1774; the proceedings of the provincial conference of committees held at Carpenter's Hall, June 18, 1776; the

G. T. Bedell

I. N. Perry

Declaration of Independence, made July 4, 1776; minutes of the proceedings of the convention of the state of Pennsylvania, July 15, 1776, with the constitution; the minutes of the assemblies of the commonwealth of Pennsylvania to the end of 1781, and the articles of confederation." In 1782 the volume was published. He died in Philadelphia, Sept. 29, 1801.

EDES, Benjamin, journalist, was born at Charlestown, Mass., Oct. 14, 1732, his great-grandfather being John Edes, who went from England to Charlestown in 1674. After a common school education in his native city, in 1755, with John Gill, he began to publish the "Boston Gazette and Country Journal," a newspaper zealously advocating the cause of liberty. He continued to edit this paper for forty-three years, and was a caustic writer on the political questions of the day. During the siege of Boston he escaped to Watertown, and carried on the publication of the "Gazette" there. Gov. Bernard, writing to the earl of Hills-boro, advised the arrest of both Edes and Gill as instigators of sedition, and Andrew Oliver wrote of the "Gazette" to England in 1768: "The temper of the people may be surely learned from that infamous paper." He was one of the Sons of Liberty, and those who took part in the memorable Boston "tea party" met at his house on the afternoon of Dec. 16, 1773. Through the depreciation of paper money he lost his property and died in poverty in Boston, Mass., Dec. 11, 1803.

ROSS, John Wesley, commissioner of the District of Columbia, was born at Lewistown, Fulton co., Ill., June 23, 1841, son of Lewis W. and Frances (Simms) Ross. His father, son of Ossian M. and Mary (Winnans) Ross, was a well-known lawyer of Illinois, born at Seneca Falls, N. Y., Dec. 8, 1812; educated at Illinois College, Jacksonville, Ill.; admitted to the bar in 1838; a member of the Illinois legislature for two years; a presidential elector in 1848; a member of two state constitutional conventions; a delegate to the Charleston and Baltimore conventions in 1860, and a member of the 38th, 39th and 40th congresses. His father laid out Lewistown, and named it after himself. John W. Ross was educated in private schools, the Lewistown Seminary and Illinois College, completing the classical course in 1862. He attended the Harvard Law School in 1864-65, and was admitted to the bar in January, 1866. He practiced at Lewistown from 1866 until 1873, meantime serving in the state legislature as the representative from the Fulton county district for four years. In April, 1873, Mr. Ross was admitted to practice in the U. S. supreme court, and has since practiced in Washington, D. C. He was appointed, in October, 1883, lecturer in the law department of Georgetown University on the subjects of torts and domestic relations, and in 1885 that institution conferred on him

the degree of LL. D. He was president of the board of trustees of public schools of the District of Columbia for two years; was appointed postmaster of Washington in 1888, and held the office until September, 1890, when he was appointed commissioner of the District of Columbia; was reappointed in 1894, again in 1897, and for a fourth term in 1900, serving as president of the board from 1893 until 1898. Mr. Ross was married, in June, 1870, to Emma, daughter of Franklin Tenney, of New Hampshire, who died in 1879; and second, in September, 1888, to Mrs. Isabel McCullough, of Allegheny, Pa.

GERSTER, Arpad Geyza Charles, physician, was born at Kassa, Hungary, Dec. 22, 1843, son of Nicholas and Caroline (Koracs) Gerster. His early education was obtained in the public schools and gymnasium of his native town, where he studied eight years. At the age of eighteen he entered the University of Vienna, for a six-years' course in the study of medicine, and was graduated at that institution in 1872. He then became assistant to the Vienna General Hospital, and in October of the same year an assistant surgeon in the Austrian army, where he gained another year's general experience. After

traveling in England and on the Continent, he decided to come to America, and in March, 1874, he settled in Brooklyn as a general practitioner. In July, 1877, being appointed surgeon to the German Dispensary of New York City, he removed to that city, and has remained there ever since, building up a general practice of wide proportions, and making a speciality of surgery. In 1878 he was appointed surgeon to the German Hospital, and in the following year surgeon to the Mount Sinai Hospital, both of which positions he has retained to the present time (1900). He was tendered the chair of surgery at the New York Polyclinic in 1882, and after teaching there twelve years, resigned in 1894. Dr. Gerster has published a surgical work called "Rules of Aseptic and Antiseptic Surgery" (1888), which has passed through three editions. He is a member of the American Surgical Association; the German Association; the New York Surgical Society; the County Medical Society; the State Medical Society; the Academy of Medicine, and the Century and German clubs. He was married in Cincinnati, Dec. 14, 1875, to Anna Barnard, daughter of John and Sarah (Barnard) Wynne, of Cincinnati, and has one son.

PATTEN, Simon Nelson, educator and author, was born at Sandwich, De Kalb co., Ill., May 1, 1852, son of William and Elizabeth (Pratt) Patten. He was educated at Jennings Seminary, Aurora, Ill.; at the Northwestern University, Evanston, Ill. (1874-76), and at the University of Halle, Germany, where he was graduated Ph. D. in 1878. During the next ten years he was engaged in teaching in the public schools of Illinois and Iowa and in special studies along the lines of sociology and economics, and in 1888 was elected to the chair of political economy at the University of Pennsylvania. In this position, which he still holds, Prof. Patten has won an enviable reputation both as a practical educator and as a brilliant writer on topics connected with his speciality. In addition to numerous magazine articles and shorter monographs, he has written: "Premises of Political Economy" (1885); "The Consumption of Wealth" (1889); "The Economic Basis of Protection" (1890); "The Theory of Dynamic Economics" (1893); "The Theory of Social Forces" (1896), and "Development of English Thought." In religious faith he is a Presbyterian and an earnest supporter of the benevolent and missionary enterprises of that church.

ZOLLICOFFER, Felix Kirk, editor and soldier, was born in Maury county, Tenn., May 19, 1812, a grandson of George Zollicoffer, of Swiss descent. He received an academic education, and after serving for a few months in a printing office, at the age of seventeen, he took upon himself the man-

Arpad G. Gerster

agement of a newspaper at Paris, Tenn., conducting it for about a year. He worked as a printer in Knoxville, Tenn., and then at Huntsville, Ala., where he began to contribute to the public journals. He removed to Columbia, Tenn., in 1831, to become editor and publisher of the "Columbian Observer," and, though interrupted by the Seminole war, in which he was a commissioned officer, he resumed the publication of this paper in 1837. He was elected state printer in 1835, and again in 1837. In the campaign of 1840 his paper was conducted in the interest of the Whig candidate, and about this time he

also edited and published a weekly agricultural paper. In 1841 he was made associate editor of the Nashville "Banner," the Whig paper of Tennessee, and in 1843 was elected comptroller of the state treasury, to which office he was re-elected in 1845 and 1847, but resigned in 1849, and was elected to the state senate. In 1850 he built the Nashville suspension bridge, and in the following year again took editorial charge of the Nashville "Banner." He was elected to congress in 1853, and served continuously for three terms, showing ability as a debater, and serving during the 35th congress as

a member of the committee on territories. He was sent as a delegate to the peace congress of 1861, but in July of that year entered the Confederate army, with the rank of brigadier general. When the Federal troops were about to enter east Tennessee through Cumberland gap, Gen. Zollicoffer, with 2,000 men, went to the point of threatened attack and established his camp near Mill springs, on the Cumberland river, where Gen. George B. Crittenden assumed command. In the ensuing battle Gen. Zollicoffer rode forward with several of his staff officers to inspect the enemy's position, but by mistake passed beyond their lines. Endeavoring to retrace his route, he was riding past the 4th Kentucky regiment, commanded by Col. Speed S. Fry, whom he had frequently met at the bar, and the two men exchanged salutes; but one of his staff fired a pistol toward the Federal line, which action was at once answered by a volley, killing Gen. Zollicoffer and two other staff officers. In another account he is said to have been shot by Col. Fry in a hand-to-hand encounter. He was killed, however, near Mill springs, Ky., Jan. 19, 1862.

LYNCH, Charles, colonist, was born in Galway, Ireland, in 1699. He is said to have run away in consequence of a flogging he received at school, about 1718, and sailed for the colony of Virginia. Upon his arrival in Virginia, the captain of the vessel, in accordance with custom, put up young Lynch at auction, to raise the amount of his passage money, and Christopher Clark, a wealthy and influential planter, attracted by the bright appearance of the youth, became his purchaser. Lynch was treated as a member of his purchaser's family, and grew up to manhood under this kindly care, developing ability and unusual energy. He took as a homestead a large tract of land on the banks of the James river, within which now stands the city of Lynchburg. At that time this land was in Albemarle county, but was, in 1755, incorporated as part of Bedford county, and in 1782 became part of the county of Campbell. He was a justice of the first county court held for Albemarle county, the court convening on Jan. 24, 1744. At the June court, 1745, Mr. Lynch produced a "commission from the governor as captain, and took the usual oath." He

afterwards came to be known as Maj. Lynch, although there is no record of his promotion. In 1748 he represented his county in the house of burgesses, and in 1749 became high sheriff, then an office of considerable honor and emolument, which position he acceptably filled until 1751. His wife was Sarah, daughter of his benefactor, Christopher Clark, by whom he had two sons. In the division of his estate his lands on the James river, including the present site of Lynchburg, Va., passed to his son, John, who was a Quaker, and became known as the founder of Lynchburg, while his possessions on the Staunton became the property of his other son, Charles Lynch. He died in 1753.

LYNCH, Charles, patriot, was born at Lynchburg, Va., in 1736, son of Charles and Sarah (Clark) Lynch. During the early years of his life he was a consistent Quaker, serving as "clerk of the monthly meetings", but in 1767 he was "disowned for taking solemn oaths, contrary to the order and discipline of Friends." Though his Quaker brethren were of opinion that he had declined spiritually, it is evident that he had suffered no loss of the social and political prestige to which his ability entitled him. He was an ardent Whig, and in 1769, like his father before him, was a member of the Virginia house of burgesses, and again in 1771-75. He was a signer of the non importation agreement, which gave the British government so much concern. At the commencement of the revolutionary war his Quaker proclivities, imbibed in his youth, seemed to still influence his actions so far as to keep him out of active service in arms, but they did not deter him from making himself thoroughly useful. At that time the whole of the mountainous section of Virginia was infested by Tories and desperadoes of the worst character, who burned and plundered the unprotected homes of the Continentals without mercy. Horse stealing, too, owing to the high prices paid by both armies for this kind of property, gained marvelous popularity, and the unsettled condition of the time gave the thieves practical immunity from punishment. In addition to the aggravation of this state of affairs, it later became known that a conspiracy was hatching in his own community to overthrow the Continental government and to aid the British by every possible means. The trial court sat at Williamsburg, some 200 miles from Campbell coun-

ty, and the war rendered the transmission of prisoners thither next to impossible. Mr. Lynch, therefore, with some of his neighbors: Capt. William Preston, Capt. Robert Adams, Jr., and Col. James Calloway, decided to take active steps to punish lawlessness of every kind. Under his direction, suspected persons were arrested and brought to his house, where they were tried by a court composed of himself and the gentlemen above named, the latter sitting as associate justices. The accused was brought face to face with his accusers, heard the testimony against him, and was allowed to defend

J. H. Zollicoffer

himself, to call witnesses in his behalf, and to show mitigating and extenuating circumstances. If acquitted, he was allowed to go; if convicted, he was sentenced to receive thirty-nine lashes on the bare back, and if he did not then shout "Liberty forever" he was hanged up by the thumbs until he gave utterance to that patriotic sentiment. The offender was tied to a large walnut tree, which still stands on the lawn of the old Lynch house (see illustration), and the whipping administered without delay. This circumstance, which afterwards gave him the name of "Judge Lynch," was the origin of the terms "lynch law" and "lynching." The state legislature subsequently passed an act to the effect that "whereas the measures taken may not be strictly warranted by law, although justifiable from the imminence of the danger," Lynch and his three neighbors mentioned above, and any others, should "stand indemnified and exonerated of and from all pains, penalties, prosecutions, actions, suits and damages on account thereof." Toward the close of the revolution Lynch raised a regiment of riflemen, became its colonel, and joining Gen. Greene in the Carolinas, was present at the battle of Guilford Court House. He retained command of the county militia until peace with Great Britain was fully established, and did not assume his duties as a justice of the county court until Feb. 5, 1784, on which date he took the oath of office. He was married, in January, 1755, to Anna, daughter of Henry Terrell, and his son, Charles, became governor of Mississippi. He died Oct. 29, 1796.

RANTOUL, Robert, reformer, was born in Salem, Essex co., Mass., Nov. 23, 1778, son of Robert and Mary (Preston) Rantoul, and a descendant of an ancient family prominent in the ecclesiastical and literary annals of Scotland. His father, a native of Kinross-shire, Scotland, was seized by a "press gang" in 1769, at the age of sixteen, and forced into a British man-of-war. When the vessel arrived at Boston, Mass., young Rantoul escaped, and walked to Beverly on the promise of employment. He subsequently settled in Salem, where he was married to a daughter of Andrew Preston, Nov. 3, 1774. He became a sea captain, and while in command of the ship *Iris* he was lost at sea off the capes of Virginia, in March, 1783. The son established himself in Beverly, as a druggist, in 1796. In 1803 he began to interest himself in the cause of temperance, and upon the organization of the Massachusetts State Temperance Society, in 1812, he became a life member. Beginning in 1809, for twenty-five consecutive years he held a seat either in the house or the senate of the Massachusetts legislature. While in the legislature he raised a question as to the justice of capital punishment, prompted by the hanging, for arson, of a boy of seventeen years at Salem neck. The agitation of this question, which was continued by his son, Robert Rantoul, Jr., has done much to ameliorate the criminal legislation of the country. He was one of those ardent Federalists who left the party, as so many did, when John Quincy Adams began to show leanings to the protective theory, under the name of the American system. On that date he became a firm adherent of Andrew Jackson and the Democratic party. In 1810 Robert Rantoul took part in establishing a charity school at Beverly, Mass., which was said to be the first Sunday-school in America. His sister, Polly Rantoul, was married

to Andrew Peabody, and was the mother of Dr. Andrew P. Peabody. On June 4, 1801, he was married to Joanna, daughter of John and Elizabeth (Herrick) Lovett, of Beverly. They had two sons, the elder of whom is here noticed as Robert Rantoul, Jr., and the younger of whom died while at Harvard College. He died at Beverly, Mass., Oct. 24, 1848.

RANTOUL, Robert, Jr., statesman, was born at Beverly, Mass., Aug. 13, 1805, son of Robert and Joanna (Lovett) Rantoul. In early life he evinced superior mental endowments. His early education was obtained under Rev. Rufus Anderson, principal of the grammar school at Beverly; later at Phillips Academy, Andover, and at Harvard College, where he was graduated in 1826. He pursued the study of law in the office of Hon. John Pickering, and later in that of Hon. Leverett Saltonstall, in Salem, Mass., and he was admitted to the bar in 1829. During two years he practiced in the town of South Reading, and in 1832 he removed to Gloucester, winning at once a high reputation as an able practitioner and a shrewd expounder of local and common law. In 1834 he was elected to the state legislature, and served for four years. In education, in railroad and liquor legislation, as well as on the national questions of protection, banks, internal improvements and slavery, he ranged himself with the Democratic party, and clung to its Jeffersonian traditions. Although a leader of the minority, he was able, single-handed, to hold in check the overwhelming forces of the dominant party. Through the medium of a weekly journal established at Gloucester, he made himself known to the public as a reformer; his sympathies were invariably on the side of the weak against the strong. He was a member of the first commission to revise the laws of Massachusetts, and he was an active member of the judiciary committee. While in the legislature he formed a friendship with John G. Whittier, who wrote a poem in his memory. In 1837 he was appointed by Gov. Everett a member of the first Massachusetts board of education, an honor intended to be conferred only on such as were well qualified by their literary acquisitions to discharge its responsible duties. In 1838 he removed to Boston. Here he obtained the first decision vindicating the right of laborers to combine to advance wages, in the Commonwealth as the Journeymen Bootmakers' Organization, indicted for a conspiracy to raise wages. Their discharge was procured on the ground that a combination of individuals to effect, by lawful means, that which individuals might legally do was not a criminal conspiracy. In 1843 he was appointed collector of the port of Boston, and two years later he was appointed district attorney for the district of Massachusetts, resigning from the office in 1849. He was an organizer and a incorporator of the Illinois Central railroad, the first trans-continental line projected. He drafted the charter of the company in 1850, and procured its passage through the Illinois legislature in the face of local opposition, of which Abraham Lincoln was the spokesman. In 1852 he defended Thomas Sims, the first fugitive slave reclaimed from New England, and he took a prominent part in the agitation against the fugitive slave law. In 1851 he was elected U. S. senator, to fill the unexpired term of Daniel Webster, who resigned upon his appointment to the cabinet as secretary of state, but his important business in Illinois detained him there until near the close of the session. In the same year Rantoul was elected a representative in congress from the 2d district of Massachusetts by the united votes of the Democrats and the Free-soilers. When the sectional division of his party, due to the passage of the fugitive slave law, occurred, he took the ground which had at one time the sanction of Webster and the supreme court, that the rendition of apprentices, fugitives from justice and escaping slaves

R. Rantoul

was a matter of comity between sovereign states, with which the Federal government had nothing to do. For this Rantoul was voted out of the convention which nominated Franklin Pierce in 1852. He supported Pierce, but died suddenly before the election. He was frequently called upon to deliver orations expressive of his principles, and he became a favorite lecturer and political speaker throughout New England, New York, Pennsylvania and Ohio. He published an address to the working men of the United States and an elaborate report to the state legislature on capital punishment that was long quoted by the opponents of the death penalty. He also lent his voice and pen to the movement against the habitual use of stimulants; but he protested against prohibitory legislation as an invasion of private rights. He edited a "Workingmen's Library" that was issued by the lyceums, and also two series of a "Common School Library," published under the sanction of the Massachusetts board of education. On Aug. 3, 1831, he was married to Jane Elizabeth, daughter of Peter and Deborah (Gage) Woodbury. Her ancestor, John Woodbury, settled in the Cape Ann colony in 1624, and removing to Salem in 1626, became the first constable there, and was known in the records as "Father Woodbury." They had two sons. He died in Washington, D. C., Aug. 7, 1852.

RANTOUL, Robert Samuel, antiquary, was born at Beverly, Essex co., Mass., June 2, 1832, son of Robert and Jane E. (Woodbury) Rantoul. He was graduated at Harvard College in 1853, and at the Dane Law School in 1859. He was representative for Beverly in 1858, and was appointed by Lincoln collector of customs for the port of Beverly and Salem. Mr. Rantoul has since held a place on the staff of the Boston "Evening Transcript." For two years he was a representative from Salem in the general court. For four years he was mayor of Salem. He was largely interested in bringing the water of Wenham lake into the city, and afterwards, as mayor, in procuring the improvement of the approaches to the city from Beverly, Marblehead, Swampscott, Lynn and Nahant. For some years he has been president of the Essex Institute, for the publications of which he has written much. He is a man of much public spirit. Mr. Rantoul was married, in 1858, to Harriet C., daughter of David A. Neal, of Salem, Mass.

BROWNE, William Hand, author, was born in Baltimore, Md., Dec. 31, 1828, son of William and Patience (Hand) Browne. His ancestors settled in Maryland in the seventeenth century. His father was a merchant in Baltimore, and his grandfather, Nathan Browne, was an officer in the revolutionary war. He was educated at the University of Maryland, and was graduated there in 1850, but never practiced his profession. In 1860 he joined Prof. A. T. Bledsoe in founding "The Southern Review." Two years later he became editor of "The New Eclectic," which was afterwards called "The Southern Magazine" (1871-75). Mr. Brown wrote "Maryland: The History of a Palatinate" (1884); "George and Cecilius Calvert"; in association with Prof. Richard M. Johnston, "An Historical Sketch of English Literature" (1872) and the "Life of Alexander H. Stephens" (1878); with the assistance of Prof. S. S. Haldeman, compiled the "Clarendon Dictionary," and, together with Col. J. T. Scharf, published a "School History of Maryland." He translated Von Falke's work on Greece and Rome (1882), as well as numerous others from the French and German, and published a volume of selections from the "Early Scottish Poets," for the use of students. He is the editor of the "Archives of Maryland," published by the state. His literary work is charac-

terized by great refinement of style and delicate perception of beauty and harmony. He is now professor of English literature in the Johns Hopkins University. On June 1, 1863, he was married to Mary Catherine, daughter of Dr. Thomas Owings, of Baltimore; they have three sons and three daughters.

KIMMEL, William, congressman, was born in Baltimore, Md., about 1835. He received a collegiate education, and became a member of the Baltimore bar, was a member of the state Democratic committee from 1862 to 1866, and a delegate to the national Democratic convention in 1864. He served in the state senate from 1866 to 1871, and was elected as a Democrat to the 45th congress, where he served on the committees on naval affairs and on revolutionary pensions. He was re-elected to the 45th congress. He died in Baltimore, Dec. 28, 1886.

BOLLMAN, Wendell, bridge inventor, was born in Baltimore, Md., Jan. 21, 1811, son of Thomas and Ann B. (Robb) Bollman. He was left fatherless at the age of five, and, being early thrown upon his own resources, he was apprenticed to the carpenter trade, but in 1828 he obtained employment upon the construction of the Baltimore and Ohio railroad under its chief engineer, Lieut. Widstler. He subsequently became foreman of bridges on this road, and was finally entrusted with the entire management of the construction of track, bridges, buildings and other stationary structures. He invented an iron bridge, which was patented in 1832, the patent being renewed in 1856. During his connection with the railroad Mr. Bollman superintended the construction of nearly two hundred bridges on the main line. After his withdrawal from service

with the company he formed a partnership, under the name of W. Bollman & Co., which continued until 1863. He designed and constructed for Havana an iron truss work which was composed of hollow wrought-iron columns with cast-iron bases and caps, the first of the kind. He designed the pivot draw-bridge over the Mississippi river at Clinton, La., at that time the longest iron draw bridge ever built. He built the present Harper's Ferry iron bridge, and also the first iron bridge in Mexico. He was the first successful iron bridge builder in this country. In early life he was married to Ann C. Smith, by whom he had ten children. He died in Baltimore, Md.

DODGE, Nathaniel Shattswell, author, was born at Haverhill, Mass., Jan. 10, 1810, son of Joshua and Mary (Shattswell) Dodge, and a descendant of William Dodge, who came from England in 1629, and settled at Salem, Mass. He studied at Phillips Academy and at Dartmouth, though he did not take his degree; he also was at the Andover Theological School. He was for some time principal of the Maplewood Institute, Pittsfield, Mass. He was a U. S. commissioner to the first exhibition, London, 1851, and resided in that city until 1861, then served as a quartermaster in the Northern army during the civil war, and was afterwards a clerk in one of the departments at Washington. He contributed freely to the periodical press, under the pen-name of "John Carver Esop," and published "Stories of a Grandfather About American History" (1873). Mr. Dodge was president of the Papyrus Club, Boston. He was married to Emily Pomeroy, of Pittsfield, and was the father of Theodore Ayrault Dodge. Mr. Dodge died at Cambridge, Mass., Feb. 2, 1874.

CROLY, David Goodman, journalist, was born in New York city, Nov. 3, 1829. He received a college education, being graduated at the New York University in 1854, and at the age of twenty-five began a journalistic career as a reporter for the New York "Evening Post," and the "Herald." He was subsequently managing editor of the New York "World," and editor-in-chief of the "Graphic," until failing health obliged him to resign the position in 1878. He wrote much for the magazines, and also published "Seymour and Blair: Their Lives and Services" (1868); "Primer of Positivism," (1876), and "Glimpses of the Future" (1888). In 1857 he was married to Jane Cunningham, a well-known writer under the pseudonym of "Jenny June." He died in New York city, in 1889.

GATES, James Leslie, merchant, was born in Essex county, N. Y., Dec. 22, 1850, son of Daniel and Jane (Hewett) Gates. The father, a native of New York state, removed to Wisconsin in 1856. At sixteen the son was foreman of a logging camp on the Black river, a position usually given only to men of age and experience, and, to the surprise of many in the business, was for several years one of the most successful foremen in the region. He built the railroad between Merrillan and Neillsville, now operated as a branch of the Chicago and Northwestern system. In the face of the protest of many leading men that the scheme was impracticable, he started the Neillsville Bank in 1880, and became president, manager and owner, conducting it with marked success for over three years. Meantime, he continued in the lumber trade, and felled as many as 40,000,000 feet of logs in a year. He is a senior member of the wholesale grocery firm of Gates, Steward & Co., of Neillsville, and is interested in extensive building improvements in the city and its suburbs, as well as in the electric light and telephone plants. During 1885-

86, Mr. Gates played a prominent part in the development of the Gogebic iron range in northern Wisconsin. He removed to Milwaukee in 1887, established the first beet-sugar plant in Wisconsin in 1896, and, to insure the growth of this industry, the state legislature passed a bill exempting the factories from taxation for five years. Recently he has thrown open his cut-over pine lands in northern Wisconsin to settlers, and to facilitate the enterprise is building a railroad through to Superior and Duluth. Mr. Gates is the largest land owner in Wisconsin, and Gates county was named for him by the legislature. He is president of the First National Bank of Ladysmith, the county seat. He is also developing copper mines in Utah. He has been twice married: first, in 1873, to Lydia, daughter of Henry D. Everly, of Neillsville, Wis., who died in April, 1884, leaving a son, Robert L., and a daughter, Edith Temperance; second, in July, 1885, to Katherine, daughter of John G. Meade, of Northwood, N. H., by whom he had two children, Harry M. and Helen M. Gates. Mrs. Gates inherits the old family Bible which her ancestors brought from England in the Mayflower.

ALDIS, Owen Franklin, lawyer and financier, was born at St. Albans, Vt., June 6, 1853, son of Asa Owen and Mary (Taylor) Aldis. His father was for many years a judge of the supreme court of Vermont, and later judge on the Southern claims and French claims commissions. His earliest American ancestor

was John Aldis, who landed in Massachusetts about 1634, and settled at Dedham, in which neighborhood his family resided for six generations. His grandfather, Asa Aldis, was graduated at Brown University, and went to Vermont about 1798, of which state he became chief justice. Owen F. Aldis was educated abroad in his boyhood, and later was graduated at Yale College in 1874. He read law in Washington and Chicago, and in 1876 began practice in the latter city. From the start he was largely occupied in realty law, and thus laid the foundation for his present business of managing estates. He was the pioneer in building the first of the tall steel frame-work office buildings of Chicago, and he is trustee of many large estates. At the present time his business of this kind is the most extensive in Chicago. He is also agent for several Scottish and English insurance and investment companies. At the time of the Columbian exposition he was a director of the fair and member of its grounds and building committees, and he is now trustee of the Field Columbian Museum. He has been president of the University and other clubs, and is a member of the Chicago, University, Union, Literary and Caxton clubs of Chicago; the University and Century clubs of New York; and the Metropolitan Club, of Washington, D. C. He has been an extensive traveler both in the United States and foreign countries. In 1878 he was married to Lella, daughter of William D. Houghteling, of Chicago, Ill.

HORNER, Junius Moore, first P. E. (missionary) bishop of Asheville, N. C., was born at Oxford, N. C., July 7, 1859, son of James H. and Sophronia (Moore) Horner. His father (b. 1822; d. 1892) served for many years as junior warden of St. Stephen's Church, at Oxford, N. C., where he founded one of the most successful boys' schools of that state. Junius Horner was prepared for college at the Horner School, established by his father in 1851, spent two years in special study at the University of Virginia and was graduated at Johns Hopkins University in 1885 with the degree of B. A. In 1887 he entered the General Theological Seminary, where he was graduated in 1890, receiving the degree of B. D. three years later. He was ordered deacon in St. Stephen's Church, Oxford, on Trinity Sunday, 1890, and a year later was ordained to the priesthood in the Church of the Holy Innocents, Henderson, N. C., by Bishop Lyman. He had already assisted his father largely in educational matters, and in 1890 he became chaplain and junior principal of the Horner School, serving in these combined offices until 1898, and engaging in mission work among the neighboring churches. He was elected a deputy to the general convention of 1898, and while serving in that body was called to the episcopate, being consecrated as bishop of Asheville, N. C., Dec. 28, 1898. Bishop Horner is a member of the American Academy of Political and Social Science. He was married in Augusta, Ga., Dec. 13, 1892, to Eva, daughter of Edward Willard Harker, M. D., of that place. Four children have been born to him: Eva, Mary, Katherine and Junius M. Horner, Jr.

McBRIDE, George Wickliffe, senator, was born in Yamhill county, Ore., March 13, 1854, son of Dr. James McBride, a pioneer of the state. He received his first education in the common schools of the district, afterwards entering Willamette University at Salem, and proceeding thence to Christian College (now the state normal school), at Monmouth, Ore. Leaving school, he began the study of law in the office of Judge J. C. Moreland, of Salem, where he remained three years, but found himself so severely handicapped in his studies by ill-health, that he was forced to abandon the profession. His par-

ents had removed in 1867 to St. Helen's, in Columbia co., and Mr. McBride, having acquired considerable property interests in that county, he determined on engaging in mercantile pursuits there. In 1882 he was elected a member of the Oregon house of representatives, and was subsequently chosen speaker of that body. He was elected secretary of state in 1886, on the Republican ticket, though the nominees of the same party for governor and treasurer were defeated. He fulfilled the duties of his office so satisfactorily that in 1890 he was renominated by acclamation and re-elected by a handsome majority. In the spring of 1895 a deadlock occurred in the joint session of the Oregon legislature over the election for U. S. senator, and the rival factions finally united on the fifty-ninth ballot for Mr. McBride, who thus became the first native-born citizen of Oregon to attain that honor. His term of service expired March 3, 1901.

DAVENPORT, John, lawyer and congressman, was born at Stamford, Conn., Jan. 16, 1752, son of Abraham Davenport, and a descendant of Rev. John Davenport, a founder of New Haven in 1638. His father was graduated at Yale in 1732 and practiced law in his native town. During the revolution he was a staunch patriot and served on the state committee of safety. In 1777, during the New York campaign, he cared for the sick soldiers returning home, filling his houses with them and looking after them personally, besides providing for others elsewhere. For some time he was a member of the executive state council and he also was a judge of the court of common pleas. In 1766-84 he was a state senator and was for twenty-five years a member of the legislature. On the dark day in 1780, during a session of the council in Hartford, it was proposed by some that they adjourn, fearing that the day of judgment might be at hand. Judge Davenport dissented, saying: "That day is either at hand, or it is not; if it is not, there is no cause of adjournment; if it is, I choose to be found doing my duty." Accordingly, candles were brought and the session was finished. The son was graduated at Yale College in 1770, and was a tutor in that college in 1773. After acquiring a legal education he was admitted to the bar and began to practice at Stamford. He served for a time as commissary of state troops in the revolution, and in June, 1777, he was appointed by the assembly major of a six months' regiment, raised for state defense. In 1799 he was elected to congress as a Federalist and served for eighteen years, from Dec. 2, 1799, to March 3, 1817. Yale College conferred the degree of A.M. upon Mr. Davenport. He died at Stamford, Nov. 28, 1830.

BARTLETT, John, author and publisher, was born at Plymouth, Mass., June 14, 1820, son of William and Susan (Thacher) Bartlett, a descendant of Robert Bartlett (b. 1603), who came to this country in the Anne in 1623, and a grandson of James Thacher, surgeon and historian of the revolutionary war. He was educated at the Plymouth public schools, and was established as publisher in Cambridge, Mass., in 1849. He compiled and published a collection of "Familiar Quotations," which has passed through nine editions, aggregating a sale of more than 200,000 copies. In 1859 he withdrew from business, and in 1862-63 became a volunteer paymaster in the U. S. navy. In 1871 Mr. Bartlett received the degree of A.M. from Harvard College, Massachusetts. In 1863 he was associated with Little, Brown & Co., publishers, at Boston, Mass., retiring from the firm as senior partner in 1889. In 1882 he prepared and published "Shakespearean Phrase Book," and in 1894 he published a complete "Concordance to Shakespeare's Dramatic Works and Poems." For sixty years he has been a disciple of

Izaak Walton; he prepared the second American edition of "The Complete Angler," a reprint of Major's fourth edition. He printed in 1882 a catalogue of an "Angler's Library," which he presented to Harvard College. He was a fellow of the American Academy of Arts and Sciences.

SMITH, Angus, merchant, was born in Clay township, St. Clair co., Mich., Dec. 16, 1822, son of John K. and Katherine (McDonald) Smith. He was educated in the schools of his native county, and at the age of thirteen he left home and began life as a clerk in a country store. The panic of 1838 having wrecked the firm, he spent the next two years in various employments, such as boating lumber and working in a steam saw mill. In 1841 he became superintendent of a lumber yard owned by his former employer, at Sandusky, O. On the discontinuance of this business he obtained employment in one of the large mercantile establishments of Sandusky, and in 1846 became partner in a general mercantile and lumbering business. He also engaged in storage and forwarding, but in 1849 became a commission merchant, rapidly building up a large business and handling most of the grain that came to the city. In 1855 he went west, finally settling in Milwaukee, where he continued in the same line. Within a few years his operations extended over several states, and he introduced improved methods in the business, originating the inspection and grading of wheats and other grains. He erected the first elevator in Milwaukee, in 1858, and another in 1861 with a capacity of 800,000 bushels. In 1868 he had the management and handling of all grain coming to Milwaukee. In 1870, when president of the chamber of commerce, he procured the appointment of a committee of thirty citizens to obtain capital for building a railroad from Milwaukee through Cedarburg and Plymouth to Green Bay, which made tributary to Milwaukee a large and populous region. The enterprise was successfully carried through, despite numerous obstacles, and led to the building of two other roads; this established the importance of Milwaukee as a centre of trade and industry. In 1871 the firm of Angus Smith & Co. built the then largest elevator in the United States to furnish suitable accommodations for the vast quantities of grain coming into the city. Mr. Smith was interested in several important business and mining enterprises, and was a director in a number of other concerns. He was twice married. He had one son. Mr. Smith died April 22, 1898.

CHAMBERS, Henry, senator, was born in Lunenburg county, Va., about 1785. He was graduated at the college of William and Mary in 1808. Later he studied medicine, and practiced that profession in Alabama, where he remained until the outbreak of the war of 1812. He was appointed surgeon on the staff of Gen. Jackson. Returning to Alabama after the establishment of peace he settled at Huntsville, and in 1819 was chosen as a delegate to the constitutional convention of that state. In 1825 he was elected to represent Alabama in the U. S. senate, and remained a member of that body from Dec. 5, 1825, to his death, which occurred in Mecklenburg county, Va., Jan. 25, 1826. He was on his way to the national capital at the time, but stopped at the home of his brother, Edward Chambers, a judge of the Virginia superior court.

Angus Smith

DAVIS, Noah, jurist, was born at Haverhill, N. H., Sept. 10, 1818, son of Noah and Freelove (Walsh) Davis. He is of English descent, and his ancestors were among the earliest settlers in Massachusetts and Connecticut. In 1825 his parents removed to a village in Orleans county, N. Y., subsequently named Albion, where the son received his preliminary education. After studying law at Lewiston and Black Rock, N. Y., he entered upon practice as partner of a lawyer at Gaines, Orleans co., where he remained until his admission to the bar in 1841. He then opened an office in Buffalo, but soon

formed a partnership with Hon. Sanford E. Church to practice at Albion. He continued to practice law until March, 1857, when he was appointed by Gov. King, a justice of the supreme court of the state, to which he was twice re-elected. He resigned this office in 1868, having been elected as a Republican to the 41st congress (1869-71), where he was a member of the committees on the judiciary, coinage and weights and measures. Soon after his election to congress Judge Davis formed a partnership for the practice of law in New York city with Hon. Henry E. Davies, who had been chief justice of the court of appeals. Having been

appointed by Pres. Grant to the office of U. S. attorney for the southern district of New York, he resigned from the partnership, and his seat in congress. He took an active part in the warfare against the ring of public plunderers, and in 1872 was nominated by the committee of seventy and by the Republican convention for justice of the supreme court of New York, in the first judicial district, for the term ending 1887. The trials of the case of Edward S. Stokes for the murder of James Fisk, Jr., and that of William M. Tweed for malfeasance in office were held before him soon after he took his seat on the bench. He sentenced Tweed to a year's imprisonment for each of the counts of the indictment on which he was convicted, the counts being for misdemeanor and the sentences being at common law; but two years later the court of appeals decided that this cumulative sentence was contrary to law. In the following year in the celebrated Tichborne case, in England, the highest courts of that country granted a rehearing on the ground of the decision on the Tweed case. It was held unanimously that under the common law such cumulative sentences were legal and had been so pronounced (in English courts) three hundred years or more. On the retirement from the bench of Justice Ingraham, in 1874, Judge Davis was assigned by Gov. Dix to the position of presiding justice of the first judicial department, comprising the city of New York, and this office he retained until 1887, when he retired from the bench, resuming the practice of law.

HEADLEY, Phineas Camp, clergyman and author, was born at Walton, Delaware co., N. Y., June 24, 1819, son of Isaac and Irene (Benedict) Headley. His father was a clergyman of English descent. In his youth circumstances prevented the completion of his classical studies, although he received the honorary degree of A. M. from Amherst College. In 1847-48 he was an instructor in Canandaigua Academy and studied law with Walter Hubbard, of that place. He intended following the law as a profession, but this he abandoned for the Presbyterian ministry, after being admitted to the bar by the supreme court, convened at Auburn, N. Y., in 1847.

He was graduated at the Theological Seminary, Auburn, N. Y., in 1850. His first pastorate was at Adams, N. Y., and he subsequently was settled at Sandwich, Greenfield and Plymouth, Mass. His first book was: "Women of the Bible," published in 1850, which was followed by many others, the most prominent being *Lives of Napoleon*, *Mary Queen of Scots*, *Josephine*, *Lafayette* and *Kossuth*, published during the next five years, and a series of boys' books: "Heroes of the Rebellion," including *Lives of Grant*, *Ericsson*, *Mitchel* (the astronomer), *Farragut* and *Sherman*, complete in 1865. He also published "Massachusetts in the Rebellion" (1866), and a little later, "Secret Service in the Civil War"; "Life and Campaigns of Gen. Grant" (1868); "Half Hours in Bible Lands" (1867); "Court and Camp of David" (1868); "Island of Fire," *IceLand* (1874); "Evangelists in the Church" (1875); "Life and Bible Studies of Rev. George F. Pentecost, D. D." (1880); and "Public Men of Today" (1882). He was married, in 1851, in New Bedford, Mass., to Dora C. Bartlett, of that city, and had four children. His wife died in 1888. Hon. Joel T. Headley, who died in 1898, an older brother, is well known through his books. Mr. Headley is quietly spending his later years at Lexington, Mass.

CAMPBELL, Albert James, congressman, was born at Pontiac, Oakland co., Mich., Dec. 12, 1857, son of Milo R. and Ruth Ann (Perkins) Campbell. He acquired his early education in the common and high schools of his native city, and in the agricultural college at Lansing, Mich. For three winters he taught school, and during the summer months he worked on his father's farm. He studied law at Pontiac, and after being admitted to the bar, in May, 1881, commenced the practice of his profession at Oxford, Mich. In 1882 he removed to Chase, Lake county, where he was elected prosecuting attorney for the county for two terms; but allured to the West by its superior opportunities, in November, 1889, he resigned his office and removed to Livingston, Mont. There he soon became city attorney, and in 1896 he was elected to the state legislature. In 1897 Mr. Campbell removed to Butte, and in 1898 was elected to congress as a Democrat. In the legisla-

ture of Montana he was industrious and independent, declining to cast mere partisan votes, but rigorously subjecting every proposition to an examination on its merits, by which his action was governed. In the 56th congress he assisted the senate committee on privileges and elections in investigating the election of William A. Clark the result of which was a unanimous finding that his election was fraudulently and corruptly procured, and consequently void. Returning to Butte, he resumed his legal practice. He has charge of very large and responsible interests, and is in the midst of a successful professional career. He was married, in 1879, to Ella J., daughter of Ernest Mann, of Hadley, Mich., and has two children.

BIXBY, James Thompson, author, clergyman and educator, was born at Barre, Mass., July 30, 1843, son of Clark Smith and Elizabeth (Clark) Bixby. He descends from colonial stock on both sides, numbering among his paternal ancestors Rebecca Nourse, a victim of the Salem witchcraft delusion, and having as a maternal great-grandfather Capt. Hugh Clark, a soldier in the revolution. Mr.

Noah Davis

A. J. Campbell

Bixby was educated in the schools of Cambridge, Mass., and was graduated at Harvard College in 1864. After graduation he taught for three years in New York city, and then began the study of theology in the Harvard Divinity School, where he received the degree of B. D. in 1870. He was soon after ordained pastor of the Unitarian Society, in Watertown, Mass., where he remained until 1875, subsequently filling a pastorate in Belfast, Me., (1875-79). From 1879 to 1881 he was professor of religious philosophy in the Meadville Theological School, Pennsylvania. After resigning his professorship there he spent two years in study at the universities of Heidelberg, Jena and Leipzig, Germany. He was awarded the degree of Ph.D. at Leipzig in 1883. On his return to America he accepted a call from the First Unitarian Society of Yonkers, N. Y., where he still continues to labor (1901). In 1875 he delivered a course of lectures on "Physical Theories and Religious Truths" before the Lowell Institute, Boston, and in 1883 a second course upon the "Inductive Philosophy of Religion." These attracted wide interest, and were favorably mentioned by the public press. He also has appeared before other educational institutions, and has been a liberal contributor to periodical literature. Two books from his pen have attracted wide attention: "Religion and Science as Allies" (1876), and "The Crisis in Morals" (1891). His chief merits as a writer are lucidity and simplicity of expression, and great breadth and judiciousness of thought. Mr. Bixby was married, in 1870, to Amy, daughter of George Martin Gibson, of Boston, Mass. They have had two children, Irma, a daughter, and Esten Clark, a son. The latter died on Feb. 2, 1887, aged thirteen years.

PEIRCE, Ebenezer Weaver, soldier and author, was born at Freetown, Mass., April 5, 1822, only child of Ebenezer and Joanna (Weaver) Peirce, and lineal descendant in the sixth generation of Abraham Peirce, who emigrated to America from England, and settled at Plymouth in 1623. He was educated at the Peirce Academy, Middleborough, Mass.; Baron Academy, Colchester, Conn., and at Ditham Academy, New Hampshire. Mr. Peirce held various local offices in Freetown, and in 1866 was appointed U. S. revenue collector for the 1st district of Massachusetts. In the local militia of Massachusetts he has held the commissions of lieutenant, captain, major, lieutenant-colonel and brigadier-general. During the civil war he served with distinction. At the battle of White Oak swamp, June 30, 1862, he lost his right arm and was taken prisoner, but escaped, rejoining the Federal forces. He commanded the Massachusetts troops in Virginia, a brigade in Ken-

Ebenezer W. Peirce

tucky and Tennessee, and a division in the army of the Cumberland. In 1864 he resigned, receiving an honorable discharge, having held a military commission for nearly twenty years. Gen. Peirce is a well-known biographer and author, having written and published "Contributions: Biographical, Genealogical and Historical" (1874); "Indian History, Biography and Genealogy" (1878); "Civie, Military and Professional Lists" (1880), and "Genealogies of the Gardiner, Dean and Hinds Families" (1883). He is a member of the Old Colony Historical, Rhode Island Historical, the Pilgrim and

New England Historical societies, also a corresponding member of the New York Biographical and the State Historical Society of Wisconsin, a member of the Mayflower Lodge, F. and A. M., Post 8, G. A. R., department of Massachusetts, did him the honor to take his name, and he is enrolled as a member of Ebenezer W. Peirce Post, G. A. R., Gen. Peirce was married, April 5, 1892, to Ida Estelle, daughter of Jeremiah Gardiner.

HUTCHINSON, James, physician, was born in Wakefield township, Bucks co., Pa., Jan. 29, 1752, son of Randall Hutchinson, a member of the Society of Friends and a farmer in prosperous circumstances. He commenced his education in Philadelphia; attended a school in Virginia, took highest honors at Philadelphia College; then began medical studies under Dr. Evans, of Philadelphia. On his graduation at the medical college, in 1771, he went to England and studied for three years under Dr. Fothergill. The political situation of his country hastened his return, and in 1777 he arrived in Philadelphia by way of France, bearing important despatches from Dr. Franklin to the government. While off the coast his vessel was chased by a British ship, but he left her in an open boat, and landed safely despite the enemy's guns, thus securing the safety of the despatches. The vessel was captured after he left it, with his wardrobe and a medical library collected during his residence abroad. He joined the Continental army as surgeon and was promoted to be surgeon-general of Pennsylvania and continued to serve until peace was restored. The active course he took in behalf of his country wholly estranged him from his uncle and guardian, Israel Pemberton, a Quaker of great wealth and influence, and almost led to his expulsion from the Society of Friends. When Philadelphia was evacuated by the British he was chosen one of the committee of safety. He obtained a large practice, his ability as a surgeon being universally admitted; was at one time port physician for Philadelphia and was apparently on the high road to wealth and distinction when he fell a victim to yellow fever. On the establishment of the University of Pennsylvania he was appointed one of the trustees, though only twenty-seven years of age. He took an active interest in politics to the end of his life and was an influential member of the Whig party, though he several times refused election to office. He was twice married: first, to Lydia, a sister of Clement Biddle; and second, to Sydney Howell. He died in Philadelphia, Pa., Sept. 5, 1793.

James Hutchinson

WHYLAND, Calvin Arthur, merchant, was born at Akron, Peoria co., Ill., June 9, 1858, son of Barnard and Elsie Louise (Boone) Whyland. His family is one of the representative Dutch stocks of New York state, and on his mother's side he is related to the famous Daniel Boone, and also to the Hulls, Burdicks, Peckhams and other Rhode Island families. Leonard Whyland, his great-grandfather, was a soldier in the revolutionary war, and Barnard Whyland, his grandfather, a captain in the war of 1812. Mr. Whyland was educated in the schools of El Paso, Ill., and at the age of fourteen began active life as a clerk in a dry-goods store at that place. Three years later he went to Chicago, where he was employed as a messenger boy for Lyon, Lester & Co., and shortly after as settling clerk for Lamson

Bros., both firms being members of the Chicago board of trade. He was with the Lamsons for four and one-half years, for three years being occupied as the firm's bookkeeper. Since the termination of this period he has been in business for himself as a commission merchant and stock broker. In 1880 he formed the firm of Whyland & Sidwell; in 1882 the firm name was changed to Whyland & Wares, and in 1883 to Whyland & Ladagh; in 1886 the firm became C. A. Whyland & Co., and subsequently was incorporated with himself as president, his father vice-president, and his brother, Edgar D. Whyland, secretary. The firm is one of the largest and most prosperous in Chicago; is a member of the board of trade and stock exchange, and conducts a business in grain, provisions, stocks, bonds and cotton with all parts of the world. Mr. Whyland was the originator of the account system now used by the Chicago stock exchange. In politics he is a Republican, and is a member of the Union League Club of Chicago. He is also a Mason of the 32d degree. He has traveled extensively at home and abroad, and his home bears evidence of his elegant appreciation of art and literature. He was married, Jan. 12, 1892, to Susie Emeline, daughter of Edward C. Burr, of Chicago, and a descendant of an

C. A. Whyland.

old English family early settled in Ulster county, N. Y. Her mother, Sarah Emeline Hull, was also a descendant of Joseph Hull and Sir John Peckham, of Rhode Island, this connection making Mr. and Mrs. Whyland third cousins.

EASTMAN, Seth, soldier, was born at Brunswick, Me., Jan. 24, 1808. At the age of sixteen he was appointed a cadet in the U. S. Military Academy at West Point, N. Y. Upon graduation in June, 1829, he was made second lieutenant in the 1st U. S. infantry. He served at Fort Crawford and Fort Snelling, Minn., until November, 1831, and was then detailed for duty as topographical engineer, and soon after as assistant teacher of drawing at the Military Academy; this position he occupied in 1833-40. He was promoted first lieutenant, Nov. 14, 1836, and captain, Nov. 12, 1839, and served in the Florida war, 1840-41. Later he returned to Fort Snelling, where, with a short interval, he served until 1848. During 1850-55 he was employed in the bureau of the commissioner of Indian affairs to illustrate the national work on the "History, Condition and Future Prospects of the Indian Tribes of the United States," published by order of congress (1850-57). He then was again on frontier duty in several places, and during the civil war held for a time the position of military governor of Cincinnati, O. On Dec. 3, 1863, he was retired from active service for disability, but was afterwards kept on duty at Elmira, N. Y., and at Fort Millin, Pa., serving also as a member of a board for the examination of credentials for promotion in the army. On Aug. 9, 1869, he was brevetted a colonel and brigadier-general for meritorious services. Gen. Eastman early evinced artistic skill, and several of his landscapes which were exhibited at the annual exposition of the National Academy of Design, in New York, caused his being elected a member of that institution (1838). He was tendered the chair of topographical drawing and painting in Jefferson College, Minn., which he, however, declined, not desiring to abandon his military career. He was the

author of a "Treatise on Topographical Drawing" (1837), which was adopted and used as a text-book at the academy. Living for many years among the Indians of the upper Mississippi, he made a special study of their character, language and customs, painted a large number of pictures of the scenery surrounding their homes, of their exercises, and made an invaluable collection of the portraits of their most distinguished chiefs. Seth Eastman died in Washington, D. C., Aug. 31, 1875. His wife, Mary (Henderson) Eastman, to whom he was married in 1835, was born in Warrenton, Fauquier co., Va., in 1818, and was the daughter of the assistant surgeon of the U. S. army, Dr. Thomas Henderson. She accompanied her husband in his various services on the frontier, and employed the knowledge of Indian character and customs thus gained in several books on the subject. Besides sketches and stories in magazines, her works include: "Dacotah; or, Life and Legends of the Sioux" (1849); "Romance of Indian Life" (1852); "Aunt Phillis' Cabin," a reply to "Uncle Tom's Cabin" (1852); "American Aboriginal Portfolio" (1853), which was illustrated by Seth Eastman; "Chiefta and other Regions of the Conquerors and the Conquered" (1854), and "Tales of Fashionable Life" (1856). Their son, Robert Langdon (d. 1865), was a captain in the U. S. army, and for a time was assistant professor of drawing and ethics at West Point.

NOYES, John Humphrey, founder of the Oneida Community and author, was born in Brattleboro, Vt., Sept. 6, 1811, eldest son of John and Polly (Hayes) Noyes, the latter an aunt of ex-Pres. Hayes. His father, a graduate of Dartmouth, was a representative in congress in 1815-17. He was educated in the schools of his native place and at Dartmouth, where he was graduated in 1830. Young Noyes then studied law, which he soon abandoned, and took a theological course at Andover and Yale. He received a license to preach as a Congregationalist in 1833. While a student he attended revival meetings, and, susceptible to the influence of the preachers, experienced what he called a "second conversion," and thereafter announced himself a perfectionist. Because he assumed such a radical position his license was soon revoked, and he then began to preach and teach his new faith. His doctrine was that God possessed a dual body—male and female—and that Christ, on His second advent "in the spirit," A. D. 70, abolished the old law, and closed the reign of sin which began with Adam; that He thenceforth set up His kingdom in the hearts of those willing to accept His reign. For such persons there was no longer any law or rule of duty; neither the Mosaic code nor the ordinances of civil society, were binding with them; a law unto themselves, they were free to do as they pleased, and under the influence of the Divine spirit which dwelt in them they could do only that which was right; they were perfect, hence their name of Perfectionists. Mr. Noyes founded a community and established it at Putney, Vt., where his followers put their property into a common stock, gave up all religious observances, renounced allegiance to the United States and instituted a "complex marriage" system between the men and women of the "family." Dissension soon brought them before the courts, and upon their system becoming known

J. H. Noyes

they were forced to leave Putney in 1848 and moved to the vicinity of Oneida, N. Y. There they purchased about six hundred acres of forest land, which upon cultivation proved one of the most productive estates in the county. In 1874 a branch society of forty members was established in Wallingford, Conn. Some years later several of the citizens petitioned the legislature to remove the communists on the ground of their immorality, and it was due to the growing pressure of public sentiment that Noyes, with a few adherents, removed to Canada in 1886. In 1880 the Oneida Community voluntarily gave up its peculiar tenets and returned to the ordinary forms of society. In that year was organized a joint stock company, incorporated as the Oneida Community (Limited), which cultivates about six hundred acres, raises great quantities of fruit and vegetables, and manufactures sewing and embroidery silk and steel-traps; a branch at Niagara Falls, N. Y., manufacturing table ware, and one at Niagara Falls, Canada, manufacturing steel chains. Noyes edited the "Oneida Circular" (1834-40), and was the author of "The Second Coming of Christ" (1859); "Salvation from Sin the End of Christian Faith" (1869), and "History of American Socialism" (1870). He died at Niagara Falls, Canada, April 13, 1886.

BENSEL, John Anderson, civil engineer, was born in New York city, Aug. 16, 1863, elder son of Brownlee and Mary (Maclay) Bensel. He was educated in public and private schools, and was graduated at the Stevens Institute of Technology in 1881. His first field experience was on the Croton aqueduct, where he served as rodman in the surveys for the new aqueduct and new Quaker bridge dam. In 1884 he resigned the position to become rodman on the Pennsylvania railroad, and worked in that capacity and as assistant engineer from 1884 to 1887. He was then promoted to assistant supervisor of the New York division of the Pennsylvania railroad, having charge of the tracks and yard between Jersey City and Newark. In 1889 he entered the New York city department of docks as assistant engineer, and

worked in this capacity until the fall of 1895, during which period he had charge of construction work on the North river, involving the construction of bulkhead sea-wall docks, and the supervision of private work. He resigned from the dock department in 1895 to take up private practice, during which he acted as consulting engineer for the Jersey Central railroad in the valuation of their dock property, as consulting engineer for the city of Philadelphia; as engineer for the Girard estate in the construction of the river wall along Delaware avenue from Vine to South streets, designing the structure and superintending the construction, and as the designer of various other piers and water front structures for private parties on the Delaware river. He acted as consulting engineer for the city of Newburgh in the suit of valuation of water-front property occupied and owned by the Pennsylvania Coal Co. On Jan. 1, 1898, he was appointed engineer-in-chief of the department of docks and ferries in New York city, which position he still holds (1901).

McALLISTER, Hugh N., lawyer, was born in Juniata county, Pa., June 28, 1860, son of Hon. William McAllister. He was graduated at Jefferson Col-

lege, Canonsburg, Pa., in 1883, and at the Dickinson College law school, was a prominent citizen of Bellefonte, Pa., the principal founder of the State Agricultural College, and a member of the constitutional convention of 1873. He died in Philadelphia, May 5, 1874.

COOPER, Ezekiel, clergyman, was born in Caroline county, Md., Feb. 22, 1763. He was the stepson of a revolutionary officer, and at the age of fourteen was so impressed by a sermon delivered by Freeborn Garretson to the soldiers, that he determined to unite with the Methodist church. Entering the ministry in 1785 he was placed upon a circuit under Bishop Asbury, and in 1786 was sent to Long Island, having the entire territory for his field. He traveled later on the Jersey circuit, there being at that time but twelve Methodist preachers in the state of New Jersey. In 1788 he was appointed to Baltimore, then to Annapolis and afterward to Alexandria. In 1792-93 he was presiding elder of the Boston district, which then embraced a large part of New England, including the province of Maine. A year after the death of John Dickinson in 1798, he was appointed book agent of the Book Concern and in 1800 was elected by the general conference editor and general agent of that establishment. By his prudent management its business was greatly enlarged, and its capital stock was increased to nearly \$50,000 during his period of office. He continued in this capacity until 1808, when he resumed his itinerant labors, finally being appointed to St. George's Church in Philadelphia, but not long after was placed on the supernumerary list of that conference. He was distinguished for his eloquence, logical ability and extensive knowledge. At the time of his death he was supposed to be the oldest preacher in the ministry of the Methodist church in the world. He was never married. He died in Philadelphia, Pa., Feb. 21, 1847.

NEWEL, Stanford, U. S. minister, was born in Providence, R. I., June 7, 1839. When sixteen years of age his family removed to Minnesota and settled in St. Anthony, now an annexed part of Minneapolis. He was graduated at Yale College in 1861, and then went to Harvard to study law. After graduating there in 1864 he returned to Minnesota, and opened a law office in St. Paul, where he acquired the reputation of being one of the ablest Northwestern lawyers. Possessed of an ample private income he spent a large part of his talent in aiding those who were unfortunate or were for some reason unable to pay for legal advice. Mr. Newel had been active in the politics of the Northwest for a number of years, but prior to his appointment to his present position he never held public office, with the exception of an unpaid membership in the St. Paul park board, where he rendered such services as he could in establishing parks and pleasure grounds. He was chairman of the Minnesota state Republican committee for some years, and in 1888, and again in 1892, was a delegate to the Republican national convention. On many occasions he was employed by the Republicans of St. Paul and the state of Minnesota in the drafting of their party platform. He received the degree of A. M. from Yale in 1869. Pres. McKinley appointed him minister to the Netherlands in May, 1897; in 1899 he was one of the American delegates to the peace conference which met at The Hague. Mr. Newel was married, June 24, 1880, to Helen F., daughter of Ernest and Helen M. Fieller, of New York

PARDEE, Ario, philanthropist, was born at Chatham, Columbia, co., N. Y., Nov. 19, 1810, son of Arlovidus and Eliza (Platt) Pardee, and grandson of Dr. Calvin Pardee, a surgeon in the revolutionary army. Israel Platt, his maternal grandfather, was a captain in the revolution. His earliest ancestor in America, George Pardee, of French Huguenot descent, came to this country and settled at New Haven, Conn., in 1650. From him and his wife, Martha Miles, he is descended through their son, Joseph, and his wife, Elizabeth Yale; their son, John, and his wife, Betsy Home; their son, Thomas, and his wife, Wealthy White; and their son, Calvin, and his wife, Rachel Johnson, who were Mr. Pardee's grandparents. His father owned a farm in Stephentown, Rensselaer co., where the son's youth was passed; his education, obtained in the district school, being supplemented by study at home. In June, 1830, Edwin A. Douglas, who had known him from childhood, offered the young man the position of foreman in the engineer corps of the Delaware and Raritan canal, in New Jersey. In 1832 he was transferred to Pennsylvania to make the survey and location of the Beaver Meadow railroad from the mines of that company to the Lehigh canal at Mauch Chunk. In 1836 the road was finished, and the shipment of coal begun. Mr. Pardee resigned his position at the head of the surveying corps,

and after a trip to Michigan where his parents had removed, he settled at Hazleton, Pa., in February, 1837, having previously located a railroad from the Hazleton mines to the Beaver Meadow railroad at Weatherly. After this was finished, in 1838, he continued in the employ of the Hazleton Railroad and Coal Co. as superintendent until 1840, when he became a coal operator, opening mines which proved to be in the mammoth vein of the anthracite field, and which were exceedingly valuable. In 1848 he built a gravity railroad to Penn-

Haven, a distance of fourteen miles, as an outlet for the product of the mines; but the Lehigh Valley railroad, with its improved facilities, was built in 1854, and this had to be abandoned in 1860. Subsequently he engaged in iron manufacture, and was in 1888 the owner of blast furnaces in various localities in Pennsylvania, New York, New Jersey, Virginia and Tennessee. At the outbreak of the civil war he fitted out at his own expense a military company with which his son, Ario Pardee, Jr., served, attaining the brevet rank of brigadier-general. In 1865 Mr. Pardee became interested in Lafayette College, which was then at the most discouraging point in its history, with constantly increasing embarrassments. Through the influence of Dr. Cattell, who was president of Lafayette, he gave \$20,000 for its needs, at that time the largest sum ever given to an educational institution in Pennsylvania. This gift, without which the board of trustees would have been obliged to suspend operations, enabled the college to meet its obligations; and when Mr. Pardee increased the amount, as he did in 1869, to \$200,000, a new curriculum of scientific and classical studies was established. A new building was needed, and for this purpose he made a further gift of \$250,000, to which he added \$50,000 for equipment. When finished Pardee Hall (see illustration), as it was named in his honor, was regarded as the largest and most com-

plete scientific college building in the United States. It was formally dedicated in October, 1873, and after it was burned in 1879, it was rebuilt, with the same external appearance. Mr. Pardee was a director of several railroads, including the Lehigh Valley; was president of the state board that controlled the second geological survey of Pennsylvania, and in 1882 became president of the trustees of Lafayette College. In 1876 he was a presidential elector. He was married, first, to Eliza, daughter of John Jacobs, by whom he had two sons and two daughters; second, to Anna Maria, daughter of William Robison, and had by her five sons and three daughters. Mr. Pardee's death occurred while on a visit to Florida, March 26, 1892.

JUNKIN, George, first and third president of Lafayette College (1832-41; 1844-48). (See Vol. III., p. 165). In December, 1824, a committee was formed for the establishment of an institution of learning, to be located at Easton, Pa., and named Lafayette College as a testimony of respect to Gen. Lafayette, whose second visit to this country had just taken place. The charter was received in 1826, and the college was fully organized in 1832, with Rev. George Junkin as its first president. The trustees had leased for two years a farm containing about sixty acres of land and ordinary farm buildings, where the president would be able to conduct the operations of the new enterprise on the manual labor plan. In March Pres. Junkin came to Easton, bringing with him a number of young men from Germantown, Pa. (where he had been manager of the Manual Labor Academy), and began fitting up the premises. So rapidly was the work pushed that the regular exercises of the college began May 9, 1832. The session opened with forty three students, most of whom came with Pres. Junkin, the number being increased during the year to sixty-seven. The efforts of the trustees were next directed toward securing a permanent site, and they finally purchased nine acres of land (to which have been added twenty-seven), on which the college now stands. The corner stone was laid July 4, 1833, and the building was finished and ready for occupancy in May, 1834. The manual labor system was discontinued in 1839. In 1841 Dr. Junkin resigned the presidency to become president of Miami University, Ohio, but he was recalled in 1844, and remained at the head of the college until 1848, when he again resigned and assumed the presidency of Washington College, Virginia. His connection with the college had been a long continued struggle with financial difficulties, and few ever worked with more enthusiasm under discouragement to accomplish an object than did

Dr. Junkin for the establishment of Lafayette College. He spent \$10,000 of his private funds, and the value of his self-denying labor can hardly be estimated. His interest in the fortunes of the college he founded was never diminished, and during the last three years of his life, his name appeared in the Lafayette catalogue as emeritus professor of political economy.

JUNKIN, David Favier, brother, was born at Mercer, Pa., Jan. 8, 1808, educator of George Junkin, first president of Lafayette College. His father was an officer in the revolutionary war. The son was graduated at Jefferson College in 1831, and after a short time spent in teaching, began to study for the ministry at Princeton Theological Seminary. He was licensed to preach, Oct. 17, 1833. From

A. Pardee

Geo. Junkin

1835 until 1849 he was pastor of the Greenwich, N. J., Presbyterian Church, and during a part of that time (1837-42) was also professor of belles-lettres at Lafayette College. In 1851-53 he was pastor of the F Street Church in Washington, D. C., and from 1853 until 1860 held the pastorate of the Presbyterian Church at Hollidaysburg, Pa. In 1860 he accepted a commission in the U. S. navy and served as chaplain of the naval academy until 1862, when he went with the frigate *Colorado* to the Gulf of Mexico. Returning in 1864, he was installed as pastor of the North Church, Chicago, Ill., where he remained for two years, at the end of that time entering upon his last pastoral charge, which was at Newcastle, Pa. He labored there for thirteen years, his health constantly failing until he was compelled to resign, July 1, 1879. Dr. Junkin was a man of strong convictions, but though positive in manner had a warm heart. He published "The Good Steward"; "Life of Gen. Hancock" (with F. H. Norton); "The Oath a Divine Ordinance" (1845); "History of the Presbytery of Newton, N. J." (1868); and "Historical Biography of George Junkin" (1871). His death occurred at Martinsburg, Pa., April 22, 1880.

YEOMANS, John William, second president of Lafayette College (1841-44), was born at Hinsdale, Berkshire co., Mass., Jan. 7, 1800. He was graduated at Williams College, in 1824, with the second honor in his class, and for two years following was a tutor in that institution, after which he studied theology in the Andover Seminary. His first pastoral charge was at North Adams, Mass., where he remained from November, 1828, until the spring of 1832, when he became pastor of the First Congregational Church of Pittsfield, Mass. In 1834 he was called to the First Presbyterian Church of Trenton, N. J., as a successor to Dr. James Alexander. In 1840 he accepted the presidency of Lafayette College. His administration was not marked by any important events, but it was a period of transition for the college, which was gradually freeing itself from the experiments of its early history. He resigned in August, 1844, remaining until the early part of 1845, when he became pastor of the Mahoning Church in Danville, Pa., where he remained until his death. In 1860 he was elected moderator of the general assembly of the Presbyterian church. The degree of D. D. was conferred upon him, in 1844, by the College of New Jersey, Williams College and Miami University. Dr. Yeomans was a ripe scholar, a deep thinker, and a vigorous and able writer. As a metaphysician he had few equals among the theologians of his church. His publications include: "Election Sermon" (1834); "Dedication Sermon" (1840), and "Address on the Author's Inauguration as President of Lafayette College" (1841). He was a frequent contributor to the "Princeton Review," was author of articles in Sprague's "Annals of the American Pulpit," and was co-author of a "History of the County of Berkshire, Mass." He died at Danville, Pa., June 22, 1863.

NASSAU, Charles William, fourth president of Lafayette College (1848-50), was born in Philadelphia, Pa., April 12, 1804, son of William and Ann (Parkinson) Nassau. The family traces its descent from the counts of the Duchy of Nassau, through Charles Henry Von Nassau of the elder line, who was chief jäger-meister to Frederick August I., king of Saxony, from before 1720 until the king's death in 1733. His son, Charles John Von Nassau, founder of the American family, left Saxony for Holland, whence he emigrated to America in 1745, and settled in Pennsylvania. His son, Charles William, a prosperous merchant in Philadelphia, who was married to Hester Clymer, was Dr. Nassau's grandfather. His father was an importer and mer-

chant in the same city, an elder of the Third Presbyterian Church, and for more than thirty years a member of the Presbyterian Board of Domestic Missions, being for seven years its treasurer. The son was graduated with highest honors at the University of Pennsylvania in 1821, and entered Princeton Theological Seminary, but on account of ill health only remained for one year, though he continued his theological studies with Dr. E. S. Ely, his pastor. He was licensed to preach by the Philadelphia presbytery in 1824, and was pastor of the church at Norristown in 1825-33; also conducting a family school for boys at Montgomery square for several years. In 1836-38 he was professor of Latin and Greek in Marion College, Missouri. In 1842 he was called to the chair of Latin and Greek in Lafayette College, and served in this capacity until 1849, when he was elected president of the institution. The college was at that time greatly embarrassed in its condition and prospects, its final overthrow being threatened by some debtors who began to press their claims by law. In spite of Dr. Nassau's scholarly ability and executive talent its affairs were not improved, and he resigned the presidency in September, 1850. Going to Lawrenceville, N. J., he took charge of a young ladies' seminary, which prospered greatly under his management. In 1875 he withdrew from this position and lived in retirement in Trenton, N. J. The degree of D. D. was conferred upon him by Jefferson

son College. He was married, April 11, 1826, to Hannah, daughter of Robert Hamill, of Norristown, Pa., and had by her eleven children. His death occurred in Trenton, Aug. 6, 1878.

MCLEAN, Daniel Veech, fifth president of Lafayette College (1850-55), was born in Fayette county, Pa., Nov. 24, 1801. He was graduated at Ohio University in 1824; taught in Chambersburg in 1825-26, and in 1827 entered Princeton Seminary, where he remained for two years. On June 29, 1831, he was ordained as an evangelist, and was called to his first pastorate in Lebanon, Pa., two years later taking charge of the church at Tennent, Monmouth co., N. J., and going after four years to a church which he had organized at Freehold, N. J. In 1850 he was called to the presidency of Lafayette College. He was inaugurated in 1851, and at once undertook to raise a permanent endowment of \$100,000 by the sale of 1,000 scholarships at \$100 each. Through his untiring energy and toil the whole amount was pledged by Jan. 1, 1854. This success brought the college into favorable notice, and the number of students was much increased, but the financial relief was only temporary. The tuition fees from each student had previously been \$160, and the scholarship cut off nearly the entire revenue from this source, while the expenses were greatly augmented. Dr. McLean resigned the presidency in 1857. After spending four years in London, England, where he frequently preached,

he became pastor of a church at Plainfield, N. J., and subsequently at Red Bank, where he remained until his death. The honorary degree of D. D. was conferred upon him by Lafayette College in 1842. He died at Red Bank, N. J., Nov. 23, 1869.

McPHAIL, George Wilson, sixth president of Lafayette College (1857-63), was born at Norfolk, Va., in 1816. After spending two years in study at Hampden-Sidney College, Virginia, he entered Yale, where he was graduated in 1835. He then returned to Hampden-Sidney to study theology. His first pastorate was in Cumberland county, Va., and

Purdie Hall

his second at Fredericksburg, where he also conducted a seminary for girls. In 1854 he became pastor of the Brainard Church, Easton, Pa., where he remained until October, 1857, when he was elected president of Lafayette College. This institution was in a condition of pecuniary embarrassment, and though Dr. McPhail gave his whole time and strength to its needs, its prospects grew steadily worse. At the breaking out of the civil war new and greater difficulties were encountered. Beside the enlistment of students the depression of the times during the progress of the war tended to diminish the number and the public interest seemed to be completely diverted into other channels. In August, 1863, Dr. McPhail resigned to take a position in Prof. Saunders' Seminary in Philadelphia. At the close of the war he returned to Norfolk, Va., and soon after accepted the presidency of Davidson College, North Carolina, which position he held during the remainder of his life. Under his administration the college prospered beyond the expectations of its most sanguine friends. Dr. McPhail was a profound scholar, an able preacher and a warm-hearted Christian gentleman. He was greatly beloved by his pupils and his memory is still cherished at the college where he labored so earnestly. In 1857 the honorary degree of D. D. was conferred upon him by Jefferson College. His death occurred on commencement day, June 28, 1871.

CATTELL, William Cassidy, seventh president of Lafayette College (1863-83), was born at Salem, N. J., Aug. 30, 1827, son of Thomas W. and Keziah (Gilmore) Cattell, and brother of Alexander Gilmore Cattell, U. S. senator. The family is of Huguenot descent (the name being originally spelled Cattelle) and has been represented in America since about 1650. William Cassidy received his earlier education in local schools and then went to Virginia, where he studied under his brother, Thomas, for two years. On his return he entered the College of New Jersey (now Princeton) and was graduated in 1848. The following year he spent in private teaching in Virginia. With the ministry in view, he returned to Princeton, where he entered the Theological Seminary and finished the course in 1852, remaining another year to pursue special Oriental studies under Prof. J. Addison Alexander. In 1853-55 he was associate principal of the Edgehill preparatory school. In 1855 he was elected professor of Latin and Greek at Lafayette College, where his fine scholarship and ability as a teacher won the esteem of his associates. He resigned this chair in 1860 to become the first pastor

of the Pine Street Presbyterian Church, Harrisburg, Pa., having been ordained in 1856. His pastorate of three years was one of marked success and usefulness. In October, 1863, he was called to the presidency of Lafayette College, which position he occupied for twenty years. He entered upon his new sphere of labor with a full knowledge of the difficulties that surrounded it, but with a strong faith in the ultimate success of the enterprise. To this he added a knowledge of the ground and a keen insight as to the requirements of the age. A new vitality was infused into the work of the college. Through Dr. Cattell's exertions more than one million dollars were obtained for the institution; new and commodious buildings were erected, the equipments were the best to be procured, and the system of instruction was made thoroughly efficient.

During this period, beside contributing \$10,000 for the construction of McKean Hall, the president gave his services for a merely nominal salary, and devoted himself so unselfishly and unflinchingly to the interests of the college that his health began to fail. His physicians advised absolute rest and freedom from official responsibility, and in June, 1883, he was obliged to tender his resignation; but remained professor emeritus and a trustee. He spent a year in traveling through Europe and returned to the United States with improved health. During his absence he was elected corresponding secretary of the Presbyterian board of ministerial relief, and in December, 1884, he entered upon the duties of that position, removing to Philadelphia. After twelve years of unsparring labor he was again stricken with disability, and again sought health in change of scene. He spent some time in the Pyrenees and was so greatly benefited that on his return he took up his work with renewed energy. But in June, 1896, he was compelled to resign official responsibility though he continued his relations with the board as secretary emeritus. In 1880 Dr. Cattell was appointed by Gov. Hoyt superintendent of instruction for Pennsylvania, but declined the position, preferring to remain at Lafayette. In 1864 he received the honorary degree of D. D. from Hanover College and also from Princeton. Wooster conferred the degree of LL. D. upon him in 1878.

He was frequently a commissioner to the general assembly, and three times its delegate to the Reformed church in Moravia and Bohemia; once a delegate to Scotland and for many years chairman of the Alliance of the Reformed Churches. In 1871 he was moderator of the Presbyterian Synod. He was vice-president of the American Philological Society; a member of the council of the American Institute of Christian Philosophy; president of the Presbyterian Historical Society; vice-president of the board of directors of Princeton Theological Society, of which he had been a member since 1864. Dr. Cattell was a superior scholar and a man of great energy of character, possessing the confidence and love of all who knew him. His name is inseparably linked with the history of the college to whose growth and success he contributed so greatly. He was married, Aug. 4, 1859, to Elizabeth, daughter of James McKean, of Easton, Pa. They had two sons, James McKean Cattell, professor of psychology in Columbia University, and Henry Ware Cattell, demonstrator of morbid anatomy at the University of Pennsylvania. He died in Philadelphia, Pa., Feb. 11, 1898.

KNOX, James Hall Mason, eighth president of Lafayette College (1883-90), was born in New York city, June 10, 1824, son of John and Euphemia Provost (Mason) Knox, and a descendant of Cornelius Barseate Van Wyck, who settled at Flatbush, Long Island, in 1660. The maternal great-grandfather, John Mason, was born in Limplingworth, in Scotland, in 1734, and after being ordained to the ministry, in 1761, was sent to America, where he had charge of the Cedar Street Church, New York city (Scottish Presbyterian), for more than thirty years. He was the first moderator of the Reformed Presbyterian church, and in 1779-85 served as a trustee of Princeton College, from which he received the degree of D. D. in 1786. He was succeeded in the pastorate of the Cedar Street Church by his son, John Mitchell Mason, who was provost of Columbia College in 1811-16, and president of Dickinson College in 1821-24. John Knox was also a distinguished clergyman, and was for forty-two years (1816-58) pastor of the Collegiate Reformed Dutch Church, New York city. The son was graduated at Columbia College in 1841, after which he took the course of theological study in the seminary of the Reformed Dutch Church in New Brunswick, N. J. In July, 1845, he was licensed to preach by the classis of New York, and in September of the following year was ordained to the ministry by the presbytery of Newton, N. J. For five years he was pastor of the Presbyterian Church in German Valley, N. J., going from there to Easton, Pa., where he took charge of the newly organized Reformed Dutch Church, and remained for two years. For sixteen years following he was pastor of the First Presbyterian Church, Germantown, Pa., whence he was transferred to Bristol. His pastorate of ten years at that place was terminated by his call to the presidency of Lafayette College,

where he succeeded Dr. Cattell. Dr. Knox was inaugurated in 1883, and during the seven years of his administration won the confidence and esteem of all with whom he was associated. After leaving the college, in 1890, he removed to Baltimore, Md., where he now resides. In 1861 he received the degree of D. D., and in 1885 that of LL. D. He is a member of the Victoria Institute, London. Dr. Knox was married: first, in New York city, Sept. 17, 1846, to Louise Wakeman, by whom he had two children: Jane de Forest, who became the wife of William T. Barbour, New York city, and died in 1871, and

Louise Wakeman, wife of Louis C. Tiffany, of New York city; second, Dec. 16, 1869, to Helen R. Thompson, of Philadelphia. They have one son, James Hall Mason Knox, Jr.

GREEN, Traill, acting president of Lafayette College (1890-91), was born at Easton, Northampton co., Pa., May 25, 1813, son of Benjamin and Elizabeth (Traill) Green. From earliest childhood he was drawn by his love for nature to the study of natural history and phenomena, and the discovery of Buffon's works in the Easton library (an institution of which his father was a founder) had a determining influence upon his life. After receiving an academic education under the Rev. Dr. John Vanderveer, he began his medical studies in the office of Dr. Swift in Easton, at the same time turning his attention to mineralogy. Later he studied with Dr. J. K. Mitchell, of Phila-

delphia, lecturer on chemistry in Chipman's Institute. He was graduated in medicine at the University of Pennsylvania in 1835, and was immediately appointed physician to the Philadelphia Dispensary, but one year later he removed to Easton and engaged in practice there. In 1837 he was elected professor of chemistry in Lafayette College. In 1841 he was called to the chair of natural sciences in Marshall College, Mercersburg, where he remained until 1848, when he returned to Easton and in the following year resumed his connection with Lafayette College. At his own expense Dr. Green erected an observatory there, and upon the establishment of the Pardee scientific department at Lafayette he became its dean. In 1868 he was elected president of Princeton College, but preferring the duties of his professorship declined the honor. He was appointed by the state legislature, with two other gentlemen, to select a site for the erection of a hospital for the care of the insane, and Gov. Geary twice appointed him trustee of the state hospital at Harrisburg, to which position he was reappointed by Govs. Hertrant, Hoyt, Beaver and Pattison. In 1890 he was elected acting president of Lafayette College, where he had labored for so many years; but resigned the office in 1891. In recognition of his scientific services the degree of LL. D. was bestowed on him by Washington and Jefferson College in 1866. He was the first president of the American Academy of Medicine; was president of the Pennsylvania Medical Association in 1867; was a member and fellow of the American Association for the Advancement of Science, and a member of other scientific bodies. In 1880 he delivered the annual address before the medical department of the University of Pennsylvania. Dr. Green was married, in 1844, to Harriet, daughter of Loamm Moore, of Morristown, N. J. They had three children. He died April 29, 1897.

WARFIELD, Ethelbert Dudley, ninth president of Lafayette College (1891-), was born at Lexington, Ky., March 16, 1861, son of William and Mary Cabell (Breckinridge) Warfield, and a descendant of Richard Warfield, who settled near Annapolis, Md., about the middle of the seventeenth century. His great-grandfather, Elisha Warfield, took an active part in the Peggy Stewart (tea-ship) affair in 1771, and his grandfather, Benjamin Warfield, was a captain in Col. Johnston's regiment of mounted riflemen in 1813. Robert Breckinridge, another ancestor, was a colonel in the French and Indian war. His son, John, was U. S. attorney-general in 1805, and his son, Robert Jefferson, was president of Jefferson College, and eminent as a statesman, author and theologian. This was Pres. Warfield's maternal grandfather. His father was graduated at Transylvania University in 1846, and studied medicine, but resigned a professional career to become an extensive cattle breeder in Kentucky. He conducted his operations on scientific principles, and embodied his experience in two works: "Theory and Practice of Cattle Breeding," and "History of Short Horn Cattle in America." During the civil war he was a captain in the Federal army. Ethelbert Dudley Warfield received his early education in Kentucky, and afterward entered Princeton University, from which institution he received the degree of A. B. in 1882, that of A. M. in 1885, and LL. D. in 1891. The degree of LL. B. was conferred upon

James Hall Mason Knox, Jr.

aim in 1885 by Columbia College. In 1882 he went to England and spent a year in study at Wadham College, Oxford. After his return to America he was graduated at the law school of Columbia College, was admitted to the bar in 1884, and began to practice in his native city. During the four years following he made a brilliant record as a lawyer. He was called to the presidency of Miami University, Ohio, and the chair of constitutional history and political science in 1888. While occupying this position he lectured on history. In 1891 he was offered the presidency of Lafayette College, which he accepted,

and also took the chair of political science. Pres. Warfield not only brings to his educational work a mind replete with a deep and accurate knowledge, as the successive honors heaped upon him amply testify, but is also peculiarly well fitted to win the admiration and confidence of his students by the interest which he sincerely feels in all their undertakings. He is a skillful and enthusiastic sport-man, and takes part in all the various phases of college athletics. Outside of the institution he is known by his popular lectures on historical topics, his frequent and able contributions to periodical literature, and by the compar-

atively prominent part he has taken in public affairs, especially in connection with the arbitration question. In October, 1899, he was ordained to the ministry of the Presbyterian church, and in 1900 and 1901 he was elected chaplain general of the national society of the Sons of the American Revolution. Besides his fugitive writings, he is the author of "Kentucky Resolutions of 1798" (1887); "At the Evening Hour" (1899); "A Memoir of Joseph Cabell Breckinridge" (1899), and many pamphlets, such as "Christian Education," "Claims of Higher Education, Etc.," and "Place of Athletics in College Life." Pres. Warfield is a member of the American Philosophical Society, the American Historical Society, and several local historical associations. As a Presbyterian he has served the general assembly and various synodical gatherings, and is a trustee, and since 1891 an elder, of the church. He was married, Jan. 28, 1886, to Sarah Lucy Brookes, of St. Louis, Mo. She died in November of the same year, and he was married to Eleanor Frances Tilton, of Natick, Mass., Aug. 28, 1890.

MARCH, Francis Andrew, philologist and educator, was born at Millbury, Mass., Oct. 25, 1825, son of Andrew and Nancy (Parker) March. His earliest American ancestors were Hugh March and his wife, Judith, who lived at Newbury, Mass., in the seventeenth century, and who are recorded as being of "considerable estate." Their four sons served as officers during the French and Indian wars, and one of them, Col. John March, is historically mentioned as "the foremost military leader in New England, up to the time of the Port Royal expedition." When Francis Andrew was in his fourth year his father removed to Worcester, Mass., entering there upon the manufacture of fine cutlery, and the son received his early education in the schools of that city. He was a bright and happy-minded boy, who distinguished himself in his studies, and took part in sports, performed at the school literary societies, acted before the dramatic clubs, and even wrote plays for them himself; who read eagerly at the public libraries, and became ab-

sorbingly interested in the anti-slavery agitation. When he was fifteen years old he was ready to enter college, but his father had become poor by a succession of misfortunes. However, a friend, the Hon. Alfred D. Foster, of Worcester, provided for his expenses at Amherst, which he entered in 1841. At college he was prominent in club life, and a leader in athletics, as well as a recipient of academic honors. He was president of the Alexandrian Literary Association, and a member of the Alpha Delta Phi and the Phi Beta Kappa fraternities, and was appointed prize speaker in his junior year, and valedictorian at his graduation. Yet at the same time he took a greater interest in two subjects outside of his regular course. He was first drawn to the study of philosophy, and later to that of language, to the knowledge of which his researches have added so much. His first impulse to the study of Anglo-Saxon was received from the lectures by Noah Webster and Prof. William C. Fowler. After he was graduated, in 1845, he taught successively for short periods at Swansey, N. H., and at Leicester Academy, and in 1847 was tutor at Amherst, meanwhile pursuing a post-graduate course at the institution, and law studies in the office of F. H. Dewey. On taking his master's degree, in 1848, he delivered an oration upon the "Relation of the Study of Jurisprudence to the Baconian Philosophy," which was praised by Rufus Choate and afterward published in the "New Englander." In 1849 he continued his legal studies in New York city; was admitted to the bar in 1850, and began to practice, but two years' illness obliged him to seek a warmer climate and he taught for three years at Fredericksburg, Va. In 1855 he returned north to accept a position as tutor at Lafayette College, Easton, Pa. Since then his life has been spent at Lafayette, where he has successively filled the chairs of belles-lettres and English literature, and English language and comparative philology, and has lectured on law and mental philosophy. Dr. March has written a number of works on other subjects. In 1860 he contributed articles upon philosophical subjects to the "Princeton Review," which were reprinted in London in 1861 and led to a correspondence with Victor Cousin. He edited a series of text-books to be used in the study of Christian classics, entirely preparing a selection of "Latin Hymns"; and at the breaking out of the civil war he published in letters to the New York "Times" and "World" a scheme of amendments to the constitution of the United States, intended to bring about a peaceful settlement of the difficulties between the North and the South. They attracted much attention, and were introduced in congress, in the Virginia legislature and elsewhere. His philological works were the outcome of his practical work in the lecture room. In 1864 he was busy with the preparation of his well-known "Anglo-Saxon Grammar and Reader"; in 1872-79, with the Douglass "Series of Christian Greek and Latin Classics"; after 1871, with spelling reform documents; from 1879 to 1882 he worked on the historical dictionary of the London Philological Society for the University of Oxford, and from 1890 to 1895, on the "Standard Dictionary." He has also written many fugitive articles on linguistic subjects. Numerous recognitions of Prof. March's work have reached him from European as well as American sources. He holds degrees from Oxford and Cambridge universities, England; is an honorary LL. D. of

Princeton and Amherst, an L. H. D. of Columbia, president and member of many learned societies in America, England and France, and is acknowledged as an authority on Anglo-Saxon by such men as Max Müller. In 1891 he succeeded James Russell Lowell as president of the Modern Language Association. Prof. March was married, in 1860, to Margaret Mildred Stone, daughter of Hon. W. P. Conway, of Stafford county, Va.

SILLMAN, Justus Mitchell, educator, was born at New Canaan, Conn., Jan. 25, 1812, son of Joseph and Martha Ann (Mitchell) Silliman. He received his preparatory education in the New Canaan Academy, and in 1832 enlisted in the 17th regiment Connecticut volunteers, with which he served for three years in the civil war. He participated in the battles of Chancellorsville and Gettysburg, being wounded in the latter. Immediately after the war he settled in Troy, N. Y., where he taught in the Troy Academy until 1867. He was graduated at the Rensselaer Polytechnic Institute in 1870, and in September of that year took charge of the department of mining-engineering and graphics in Lafayette College, Easton, Pa., holding the George B. Markle professorship. He invented an instrument for orthographic, clinographic and crystal projection, also a water manometer and anemometer. He was a member of the American Institute of Mining Engineers; the Society for the Promotion of Engineering Education; a fellow of the American Association for the advancement of Science, and a member of the Grand Army of the Republic. His principal articles were published in the transactions of scientific societies, including papers on his examination of the Bessemer flame with colored glasses and the spectroscope. Prof. Silliman was married, in 1876, to a daughter of Ezra W. Boughton, of Troy, N. Y. He died at Easton, Pa., April 15, 1896. His wife and two sons survive him.

ECKARD, James Read, educator, was born in Philadelphia, Pa., Nov. 22, 1805, son of Joachim Frederick and Susan (Read) Eckard. His father was Danish consul for the middle states. The son was graduated at the University of Pennsylvania in 1823, and, after studying law with Hon. John M. Read, he practiced from 1826 until 1830, when he began the study of theology. During this period he was an active member of the board of directors of the Philadelphia public schools and a director of the Society for Promoting Public Schools in Pennsylvania. Entering Princeton Theological Seminary in 1831, he was ordained an evangelist by the Philadelphia Presbytery, July 21, 1833, and was sent to Ceylon as a missionary of the American board. He returned to New York city in 1843, going from there to Savannah, Ga., where he was principal of the Chatham Academy, agent for the American Board, and a missionary among the slaves for three years. From 1848 until 1858 he was pastor of the Second Presbyterian Church, Washington, D. C. In 1858 he was called to the chair of rhetoric (to which the professorship of history was added) at Lafayette College, and held this position until 1871. When in Ceylon Dr. Eckard published in the Tamil language an essay on "Faith and Justification" (1834), and in English and Tamil, "The Hindoo Traveler" (1836). On his return he issued a narrative of the missionary operations in India (1844), and an "Outline of English Law from Blackstone." In 1860 he contributed to the "Princeton Review" an article on the "Logical Relations of Religion and Science." Lafayette conferred the degree of D. D. upon him in 1858. He was married, in 1833, to Margaret Esther, daughter of Dr. N. S. Bayard. She died Feb. 29, 1872. Dr. Eckard died at Abington, Pa., March 12, 1887.

MCCARTNEY, Washington, educator, was born in Westmoreland county, Pa., Aug. 24, 1812.

He was graduated with the highest honors at Jefferson College, Pennsylvania, in 1831, and began his work as an instructor in Lafayette College, where he was professor of mathematics and moral philosophy in 1835, and again in 1837, 1843-44, and 1846. During this period he published his celebrated work on "Differential Calculus," which was for many years the text book upon that subject used in our best colleges. In 1836 he held the chair of modern languages in Jefferson College, and for several years subsequent to 1819 was also professor of mental and moral philosophy. Having previously studied law, he was admitted to the bar of Northampton county in 1838. In 1846-48 he was deputy attorney general, and in 1851 was elected president judge of the 3d judicial district of Pennsylvania, which office he filled during the remainder of his life. In 1846 he established a law school at Easton, Pa., which, in 1851, was incorporated as the Union Law School, and this he conducted successfully until his death, which occurred in Philadelphia, in July, 1856.

COFFIN, Selden Jennings, educator and author, was born at Ogdensburg, St. Lawrence co., N. Y., Aug. 3, 1838, son of James Henry and Aurelia Medlic (Jennings) Coffin. His middle name is that of his maternal grandfather, a well-known minister in Berkshire, Mass. His father, an eminent meteorologist, who was graduated at Amherst in 1828, was for years a leader in scientific thought and one of the principal educators in New England. He was the author of "The Winds of the Globe," "Solar and Lunar Eclipses" and many other scientific works of great merit. The son was graduated with honors at Lafayette College in 1858. He went through college expecting to take a position promised him in the U. S. coast survey, but under the influence of Dr. Cuttler he abandoned this idea in his senior year, and after teaching for three years in Bloomsbury, Easton and Towanda, pursued a full theological course at Princeton, where he was graduated in 1864. He was licensed to preach in the same year, and was ordained by the Presbytery of Lehigh in 1874. From 1864 he was successively tutor, adjunct professor and Hollenback professor of mathematics and astronomy at Lafayette until 1886, when, by reason of a severe throat ailment incapacitating him from using his voice in the classroom, he resigned, since which time he has served his alma mater in the office of registrar. In 1893 he was restored to a place in the college faculty as professor of astronomy, retaining the registrarship. Being familiar with the life work of his father, he drew the charts and completed his father's posthumous work, "The Winds of the Globe," and was invited by Prof. Henry of the Smithsonian Institution, to read before the National Academy of Sciences an epitome of the conclusions reached. On its publication, in 1876, he received the degree of Ph. D. from Hanover College. He is a frequent participant in teachers' institutes and other educational assemblies, and is often called upon to supply neighboring pupils. In 1881, at a memorial gathering of 460 descendants of Tri-Stram Coffin at the homestead at Nantuxet, Prof. Coffin delivered an historical address, which was published in the New York and Boston papers. During the civil war he served through three campaigns in the Christian commission, laboring in the field for the relief of the sick

and wounded, and in 1864 was specially appointed to establish "diet kitchens" in the command of Gen. B. F. Butler. He was one of the commissioners appointed by the state, in 1876, to arrange the exhibit from the colleges of Pennsylvania for the Centennial exhibition at Philadelphia, and he received complimentary mention for this work. At the request of the family of Prof. Denison Olmsted, of Yale, Prof. Coffin revised two editions of "Olmsted's College Astronomy." He has issued two editions of a graduate catalogue of nearly four hundred pages, of which the latest edition is entitled "The Men of Lafayette: Lafayette College: Its History, Its Men and Their Record" (1891). Prof. Owen contributed the historical matter and the remainder was compiled by Prof. Coffin. He is a fellow of the American Association for the Advancement of Science; a member of the Moravian, Trinity and Pennsylvania Historical societies, and also of the Philosophical Society of Great Britain; since 1859 he has been secretary of the Alumni Association of Lafayette College. He was married: first, in 1875, to Mary A., daughter of J. J. Angle, of Lewisburg, Pa; second, to her sister, Emma Frances Angle. By the former wife he had two sons, of whom one survives, Edward Welles Coffin.

MOORE, James W., educator, was born at Easton, Northampton co., Pa., June 14, 1844, son of Samuel and Elizabeth Barnes (Wamsley) Moore, and a descendant of Rev. John Moore, who emigrated from England early in the seventeenth century, and was the second minister of Hempstead, Long Island, and the first of Newtown. From John and his wife, Margaret Howell, the line of descent runs through their son, Samuel (deputy to the colonial assembly, New York), and his wife, Mary Reed; their son, Nathaniel, and his wife, Joanna Prudden; their son, John, and his wife, Keziah Phillips, and their son, Samuel, and his wife, Sarah Green, who were Mr. Moore's grandparents. His father was a sergeant in the 1st regiment of Pennsylvania volunteers in the war of 1812; a member of the Easton town council; clerk of the court of oyer and terminer; clerk of the court of general sessions under Gov. Ritner; justice and chief Burgess of Easton. He was also editor of the "Spirit of Pennsylvania," and the *Belvidere* (N. J.) "Apollo." The son was valedictorian of his class at the Easton High School in 1860, and was the Latin salutatorian when he was graduated at Lafayette in 1864. He was graduated at the medical school of the University of Pennsylvania in 1869, meantime being a tutor at Lafayette in 1866-68 and adjunct professor in 1868-72. In 1872 he became professor of mechanics and experimental philosophy, which chair he still occupies (1901). The departments of physics and electrical engineering at Lafayette were organized under his direction, and the laboratories were equipped by him. Prof. Moore is the author of "Electro-dynamic Phenomena" (1888); "Notes on a Course of Lectures on Light" (1889); "Elements of Natural Philosophy for Engineering Students" (1891); "Elements of Natural Philosophy for Junior Students in College" (1891); "Methods of Investigation and Record Book of Experiments in Physics" (1892); "Instruments and Methods of Physical Measurements" (1892); "Simple Harmonic Motion" (1894); "Syllabus of a Course of Lectures on Heat" (1894); "Syllabus of Lectures on Electricity" (1895); "An Attempt to Analyze the Statistics of Diphtheria in Easton" (1894); "Preliminary Training for the Medical Profession" (1893); "Address on Hygiene" (1896); "A Branch of the Family of Rev. John Moore," and various papers published in scientific and other periodicals. He is a member of the American Philosophical Society; fellow of the American

Association for the Advancement of Science; fellow of the American Academy of Medicine; member of the Pennsylvania Medical Society, and on its legislative committee for four years; ex-president of the Northampton County Medical Society; historian-general of the Founders and Patriots of America, and a member of the Sons of the Revolution and several Greek-letter fraternities. He was a conferee of the international congress of electricians held in Philadelphia in 1884. In 1867 he received the degree of A.M. from Lafayette College. Prof. Moore was married, July 30, 1874, to Rachel Phillips, daughter of Rev. John Flannery, of Philadelphia, Pa.

OWEN, William Baxter, educator, was born at Wysox, Bradford co., Pa., Sept. 13, 1844, son of Samuel and Mary Flower (Patrick) Owen. His grandfather, David Owen, of Welsh descent, removed early in life from Connecticut to northern Pennsylvania. After a preparatory course in the Susquehanna Collegiate Institute, Towanda, Pa., he entered the sophomore class at Lafayette College, where he was graduated in 1871; he received the Fowler prize, and was valedictorian of his class. In 1871-74 he was a tutor at Lafayette, in 1874-82 adjunct professor of Greek, and in 1882-86 professor of Christian Latin and Greek. Since 1886 he has been professor of Latin language and literature at the same institution. Prof. Owen has contributed notes to editions of Eusebius and Athenagoras in the Douglas series of "Christian Classics," and is the author of "Historical Sketches of Lafayette College," prepared at the request of the U. S. bureau of education (1876); "The Advancement of Science in Its Relation to Education" (1888), and various articles, addresses, and papers. He published "Cicero De Oratore, Book I," with introduction and notes in 1891. He is a member of the American Philological Association. Princeton gave him the degree of Ph.D. in 1887. He was married, June 30, 1898, to Eva F. C., daughter of William N. Peters, of Easton, Pa.

HART, Edward, educator and chemist, was born at Doylestown, Bucks co., Pa., Nov. 18, 1854, son of George and Martha Longstreth (Watson) Hart, and great-grandson of William Hart, also of revolutionary fame, who was of Scotch-Irish descent, a colonel in the revolution, and of Col. Joseph Hart. His father was a lawyer. After a preparatory course in the Doylestown Classical Seminary, the son entered the laboratory of T. M. Drown, Philadelphia, and went to Easton, Pa., as Dr. Drown's assistant on his election to the chair of chemistry in Lafayette College in 1874. In the same year he was made a Bachelor of Science by Lafayette and was tutor in chemistry in 1875-76. From 1876 until 1878, as the incumbent of a fellowship, he pursued post-graduate studies at Johns Hopkins University, and received the degree of Ph.D. In 1878 he became adjunct professor of chemistry at Lafayette College, and held this position until he was appointed William Adamson professor of chemistry there, which chair he still (1901) occupies. Prof. Hart is the inventor of the complete system for the production of nitric acid now used by the U. S. government at Indian Head, Md.; by the De Beers Syndicate, South Africa; the California Powder Co.; Boake, Roberts & Co., London, and other large producers. An apparatus for distilling and purifying acids, patented May 3, 1898, is his invention, as well as a hydrofluoric acid bottle, patented March 18, 1890, for which he received the John Scott medal and premium from the Franklin Institute, Philadelphia. From 1887 to 1893 he was editor of the "Journal of Analytical and Applied Chemistry," and since 1893 he has edited the "Journal of the American Chemi-

cal Society." He is the author of a "Handbook of Volumetric Analysis"; "Chemistry for Beginners," and numerous scientific papers. In 1892 he became manager and proprietor of the Chemical Publishing Co., Easton, which has a branch house in Allentown, and he is also president of the Baker & Adamson Chemical Co., engaged in the manufacture of pure high grade chemicals for analytical and technical laboratories. In 1893 he was vice-president of the American Association for the Advancement of Science; he is a member of the Council of the American Chemical Society; a member of the Pomfret Club of Easton; the Deutschen Chemischen Gesellschaft; American Institute of Mining Engineers, and numerous other scientific societies. In August, 1878, Prof. Hart was married to Jennie, daughter of Francis and Mary (Allen) Darlington, whose ancestors were members of the Society of Friends.

PORTER, Thomas Conrad, educator, was born at Alexandria, Huntington county, Pa., Jan. 22, 1822. He was graduated at Lafayette College in 1840, and at Princeton Theological Seminary in 1843, being licensed to preach in the following year. In 1846 he accepted the pastorate of a Presbyterian church in Monticello, Ga., where he remained until 1848, when he took charge of the newly organized Second German Reformed Church in Reading, Pa., and was ordained by the classis at Lebanon. In 1849 he resigned to become professor of natural sciences at Marshall College, Mercersburg, Pa., retaining the chair when the institution was removed to Lancaster, and consolidated with Franklin College in 1853. He served also as secretary of the board of trustees until 1866, when he resigned to take the professorship of general geology, botany and zoology at Lafayette. In 1890 he succeeded Dr. Traill Green as dean of the Pardee scientific department, and though, in 1897, he retired from active duties at the college, he continued his connection with it as emeritus professor and curator of the botanical collections. From 1877 until 1884 he was pastor of the Third Street Reformed Church, at Easton, Pa. He was an active member of the committee that framed, in 1867, the order of worship now used in the German Reformed church of the United States. In 1865 Rutgers College conferred upon him the degree of D. D., and in 1880 he received that of LL. D. from Marshall and Franklin. He was a founder and first president of the Linnaean Society of Lancaster, Pa.; was president of the Pennsylvania German Society at the time of his death, and for nearly a quarter of a century was a director of the Reformed Theological Seminary, Lancaster. Dr. Porter was at once a scientist, a scholar and a man of letters. As a botanist his standing was high, and he will perhaps be longest remembered for his contributions to the published flora of Pennsylvania. His extensive herbarium is in the possession of Lafayette College. His reports in connection with Dr. Ferdinand V. Hayden's collections in the Rocky Mountains in 1870-74 were published by the government, and one of these, "A Synopsis of the Flora of Colorado," prepared with Prof. John M. Coulter, has been issued in a separate volume (Washington, 1874). He also furnished descriptions of a number of the flora of the state to Gray's "Topographical Atlas of Pennsylvania" (1872), and to "Gray's Topographical Atlas of the United States." Beside contributions to the *Mercersburg Review*, he published a prose version of Goethe's "Herman and Dorothea" (1854); translated "The Life and Labors of St. Augustine" from the German of Dr. Philip Schaff, (1854-55), and "The Life and Times of Ulrich Zwingli" (1857), and several poems from the German and Latin for Dr. Schaff's "Christ in Song" (1868). Dr. Porter was the earliest American champion of Finnish literature,

and in 1854 drew attention to the similarity in form and finish between Longfellow's poem, "Hiawatha," and the Finnish national epic, "Kalevala," the controversy that followed arousing great interest in Europe as well as in America. Among his friends he was most companionable. His large attainments, his fine literary tastes, and his broad scholarship gave him command of a wide range of knowledge, while his genial personality made him a favorite with all who knew him. He was married, Dec. 21, 1850, to Susan, daughter of George Kunkel. He died suddenly at Easton, Pa., April 29, 1901.

COLEMAN, Lyman, educator, was born at Middlefield, Hampshire co., Mass., June 14, 1796, son of William and Achsah (Lyman) Coleman. Both his father and grandfather, Seth Coleman, were physicians. He received his early education in a district school, and, against the wishes of his father, who discouraged his choice of a professional life, determined to study for the ministry. In the intervals of out door work he prepared himself for college, and went to Yale, literally without means, his father being so grieved by his son's decision that he not only gave him no assistance, but never inquired as to his progress. By teaching, and the aid of friends, he completed his course, being graduated in 1817. For three years thereafter he was principal of the Hopkins Grammar School at Hartford, Conn., and subsequently for four years was a tutor at Yale, where he studied theology. In 1828 he became pastor of the Congregational church at Belchertown, Mass., and held the charge for seven years, resigning it to become principal of the Burr Seminary, Manchester, Vt. In 1837 he was called to Andover, Mass., as principal of the English department of Phillips Academy. After five years of service there he went to Europe, and spent the years 1842-43 in Germany, studying in Berlin with Dr. August Neander, with whom he formed an intimate friendship, and under whose inspiration he wrote "The Apostolic and Primitive Church," published in 1844. On his return to America he was appointed professor of German in the College of New Jersey (now Princeton). In 1845-46 he taught German at Amherst, and thence went to Philadelphia, where he took charge of the Presbyterian Academy, an institution with which he was connected for nine years. In 1855 he revisited Europe, and extended his travels to Egypt and Palestine. In 1861 he became professor of Latin and Greek in Lafayette College, in 1868 being transferred to the newly created chair of Latin language and literature, which he occupied until his death. Dr. Coleman published "Antiquities of the Christian Church" (translated from the German, 1841); "Historical Geography of the Bible" (1850); "Ancient Christianity" (1852); "Historical Text-Book and Atlas of Biblical Geography" (1854; revised ed., 1859); "Prelacy and Ritualism" (1869); and a genealogy of the Lyman family, besides various articles contributed to American quarterlies. In 1847 he received the degree of S. T. D. from Princeton College. He died at Easton, March 16, 1882, leaving no descendants.

STRUVE, Henry G., lawyer, was born in the Grand Duchy of Oldenburg, Germany, Nov. 17, 1836, son of Frederick W. and Marie Margaret (Clausen) Struve. He received a thorough academic education and at the age of sixteen came to America. After a short stay in New York he migrated to California, and in 1851 located in Amador county, where he pursued mining, studied law and wrote for newspapers. In 1859 he was admitted to the bar and in February, 1860, he removed to Vancouver, Wash. He purchased the Vancouver "Chronicle," which he conducted for one year. In the winter of 1861 Mr. Struve began the practice of law. He was elected district-attorney for the second judicial district, serv-

ing nearly four terms by re-election. In 1869 he resigned. In 1865 he was elected a member of the lower house of the legislature and served as chairman of the judiciary committee. In 1867 he was elected to the legislative council and served as its president for the first biennial session and also during the session of 1869 and 1870. He was chairman of the committee on ways and means, and in 1869 introduced the community property law, regarding the rights in property interests of married persons, and was largely instrumental in securing its passage. In 1871 he removed to Olympia and took charge of the Puget Sound "Daily Courier," the leading Republican daily of the territory. His editorials were characterized by vigor of thought, purity of diction and fearless expression of his views. In recognition of his ability he was appointed by Pres. Grant, secretary of Washington territory, serving until the close of Grant's administration. In 1872 he was a delegate to the national Republican convention which nominated Grant for the second term of the presidency. In 1877 he was appointed commissioner to codify the laws of Washington territory, but was obliged to resign, after one year's work, to devote his attention to his large and steadily increasing practice. In 1879 he

W. J. Struve

removed to Seattle, Wash., and entered into partnership with John Leary under the firm name of Struve & Leary. In 1880 Col. J. C. Haines was admitted as a partner. In 1884 Maurice McMicken took Mr. Leary's place, and in 1889 Col. Haines withdrew from the firm. In 1893 Sen. John B. Allen became a member of the firm, which was then organized as Struve, Allen, Hughes & McMicken. In 1882 Judge Struve was elected mayor of Seattle and served for two terms by re-election. During his wise administration the city prospered, many improvements were made and its population increased from 5,000 to 10,000. In 1879 he was appointed a regent of the Territorial University and served, by reappointment, for four terms, being president of the board. From 1884 to 1887 he was school director, and made many improvements in the school system; was appointed judge-advocate general in 1886, supreme court reporter in 1887, and under his supervision the third volume of Washington territory reports was prepared. He was a member of the board of freeholders which, in 1890, prepared the city charter under which the municipal affairs of Seattle are conducted and acted in that body as chairman of the committee on judiciary and tide-lands. Judge Struve was one of the principal projectors of the cable system of street railroads in Seattle; is a large stockholder and served as president of the Madison street line from its organization until 1899. He was one of the organizers of the Home Insurance Co.; was an incorporator of the Boston National Bank and has been its vice-president and on the board of directors. He was prominently identified with the Independent Order of Odd Fellows and other societies. In 1874 he was elected grand master of the Grand Lodge of Odd Fellows in Oregon, which embraced the states of Oregon, Washington and Idaho, and in 1876 he was elected a representative of said jurisdiction in the Sovereign Grand Lodge of the order. He was married, October, 1863, to Lascelle Knighton, at Vancouver. They have had four children.

ELIOT, Samuel Atkins, merchant and author, was born in Boston, Mass., March 5, 1798, son of Samuel and Catherine (Atkins) Eliot, and in the seventh generation of direct descendants of Andrew and Elizabeth (Langdon) Elliott, who came from Shropshire, England, in 1668, and settled in Beverly, Mass. His father was a highly esteemed merchant of Boston, president of the Massachusetts Bank, a benefactor of Harvard College, and founder, in 1814, of the Eliot professorship of Greek at that institution, giving (anonymously) \$20,000 for the purpose. The son was graduated at Harvard College in 1817, and was graduated at the Divinity School in 1820, but did not enter the ministry. He was elected mayor of Boston in 1836, and held the office for three years. During his administration of civic affairs occurred the Broad street riot, which Mayor Eliot took prompt measures to quell himself, marching down Broad street at the head of 100 militia. He reorganized the fire department, which was the first paid department in the United States, and the police department, and was active for the best interests of the city. He was president of the Academy of Music, and delivered an address at the opening of the Odeon, Aug. 5, 1835. He was treasurer of Harvard College 1842-53, and was elected to congress as a Whig, 1850-51. He was also a member of both houses of the state legislature. Mr. Eliot was married, in 1826, to a daughter of Theodore Lyman, and his only son was Charles W. Eliot, president of Harvard. He was the author of "A Sketch of the History of Harvard College and of its Present State" (1848); "Slavery and its Prospects in the United States"; "A Memoir of Ephraim Peabody." He translated "The Song of the Bell" from Schiller, which was sung at the Boston Academy of Music, the music being by Andreas Jakob Romberg; edited "The Life of Josiah Henson, Formerly a Slave," and a "Selection of Sermons," by Dr. Francis W. P. Greenwood, with a memoir (1844). He died at Cambridge, Mass., Jan. 29, 1862.

HERSEY, Samuel Freeman, philanthropist, was born at Sumner, Mass. (now Maine), April 12, 1812. His maternal grandfather was an officer in the revolution. His youth was spent on his father's farm; his education was received in the common schools and at Hebron Academy, where he was graduated in 1831. He then became clerk in a local bank and later engaged in mercantile pursuits at Bangor, whither he had removed shortly after attaining his majority. Being honest, prompt and energetic, he prospered in all his business enterprises. He acquired large tracts of timber land in Minnesota and Wisconsin, conducting an extensive lumbering trade in those states and in Maine. With others he erected mills for the manufacture of lumber at Stillwater, Minn., and at the time of his death owned more than 75,000 acres of timbered lands in that state and Wisconsin. He was elected a member of the Maine legislature in 1842, 1857, 1865, 1867, 1869; served as a member of the executive committee in 1851-52, and was appointed a delegate to the national Republican convention held in Chicago, Ill., in 1860, as well as to that held in Baltimore, Md., in 1864. Mr. Hersey also served as a member of the national Republican committee from 1864 to 1868, and in 1872 was elected a representative from Maine to the 43d congress by a majority of 6,108 votes over his opponent, M. Emery. He was re-elected to the 44th congress in 1874, serving on important committees until his death. He was thrice married, and was survived by a widow and four sons. His heart and his purse were open to all benevolent objects, and among his bequests were \$100,000 to the town of Bangor for the support of a public library; a large sum to the Westbrook Seminary at Deering, Me., and an amount to

maintain a summer retreat on the Penobscot for the Universalist Sunday school of Bangor. He died at Bangor, Me., Feb. 3 or 5, 1875.

SCHWARZ, Frederick August Otto, importer, was born in Herford, Westphalia, Germany, Oct. 18, 1836, son of Frederick and Frederica (Rothie) Schwarz. His father was a jeweler, and celebrated as a gold and silversmith expert. He received his early education at the gymnasium of his native city, and at the age of fourteen was apprenticed to a leading merchant, with whom he remained for four years receiving a thorough business training. In 1856 he came to America and settled in Baltimore, where his two elder brothers had already established a business as importers of toys and fancy goods. His voyage across the ocean was made in a sailing vessel, and consumed sixty-three days. For six years he worked as an employee of his brothers, and in 1862

was admitted to partnership. In 1870 he removed to New York city, and opened the Schwarz toy bazaar on his own account, at 765 Broadway, where he remained for nine years, afterwards removing to 42 East Fourteenth street, where he built up the largest house dealing in toys in the world. In 1897 he removed to 39 and 41 West Twenty-third street, where his business occupies an entire building of seven floors with basement, which runs from Twenty-third street to Twenty-fourth street. Every year Mr. Schwarz goes to Europe in the interest of his business. He was one of the founders of the Astor Place Bank and also of the Fourteenth Street Bank, and a director in both. He is now on the advisory board of the Astor Place Bank, which has become a branch of the Corn Exchange. He was married in New York city, March 13, 1862, to Caroline, daughter of Henry Claussen. They have six children, three sons and three daughters.

WALDSTEIN, Charles, archaeologist, was born in New York city, March 30, 1856, son of Henry and Sophie Waldstein. He received his early education in New York city and in European cities, and in 1871 entered Columbia University, which he left in his junior year. He then went abroad to study, and was graduated at Heidelberg University in 1875 with the degree of Ph.D. In the following year he studied at Leipzig, and in the British Museum of London, where he also delivered a course of lectures during the spring of 1878. The years 1878 and 1879 were spent by him principally in Italy and Greece, and he witnessed the German excavation at Olympia. Returning to England in 1880, he delivered a course of lectures in that country at various places, and was appointed lecturer at Cambridge University in the spring of that year on classical archaeology. Here his influence among the art students was so marked that in 1882 he was made reader in Greek art, a special form of professorship. In 1883 he became a director of the Fitzwilliam Museum, and founded a museum of art in connection with it, his aim being to establish a new school of archaeology. He resigned one of his posts (the directorship of the Fitzwilliam Museum) in order to serve his native country, and in 1888-96 was director of the American School of Archaeology at Athens. But the University of Cambridge, England, allowed him to retain his readership there during these

years, and when he resigned the Athens directorship in 1895 he was elected Slade professor of fine arts in addition to his archaeological chair. This chair he held until 1901. In 1895 he was also elected fellow of Kings College, Cambridge. His scientific work in excavation and in his writings has given him a world-wide reputation, and in recognition of his discoveries he was made a Knight Commander both of the Greek Order of the Redeemer and of the Saxon Ernestine Order. His studies have also revealed the fact that the so-called "Apollos" are simply figures of typical athletes. A course of lectures was given by him at the Royal Institute of Great Britain in April, 1883, and a similar course at Columbia University, New York city. He received the honorary degree of A.M. from both Columbia and Cambridge in 1882, and in 1887 the former gave him the degree of L.L.D., and the latter that of Litt.D. He is the author of "Observations at the Heracleion of Argos"; "The Balance of Emotion and Intellect" (1878); "Essays on the Art of Phidias" (1885); "The Work of John Ruskin," and "The Study of Art in Universities." He is unmarried.

HENRY, Horace Chapin, railroad contractor, was born at Bennington, Vt., Oct. 6, 1814, son of Paul M. and Aurelia (Squier) Henry. During the first year of the civil war he joined the army, but as he was only seventeen years of age his parents refused consent, and sent him to Norwich Military Academy. The following year (1862) he again enlisted in company A, 14th Vermont infantry, and was appointed first sergeant, serving for one year. His regiment was assigned to the 1st army corps, and reached the battlefield at Gettysburg on the first day of the fight, occupying the position on the Federal line against which Pickett desperately charged the last day of the battle. Returning to New England in 1864, he entered Williams College, but his parents removed to Geneva, N. Y., the following year, and he entered Hobart College. Here he remained but two terms, leaving on account of ill-health in 1866, and locating in Minneapolis, Minn. He found employment with Hon. R. B. Langdon, a large railroad contractor of that city, and remained with him for ten years. In 1876 he commenced contracting on his own account. He took large contracts on the Minneapolis and St. Louis railway, the "Soo," Duluth, South Shore and Atlantic, Wisconsin Central, and Milwaukee, Lake Shore and Western. He also constructed the large ore docks at Ashland and elsewhere on the Great lakes, and with his associates in business has built more than 2,000 miles of railroad. In 1890 contracts on the Northern Pacific and Great Northern railways took him to the Pacific coast, where, becoming attached to the mild and healthful climate of Puget sound, he has since remained. With Nelson Bennett, of Tacoma, he completed the Palmer cut-off for the Northern Pacific in 1900, and is now extending the Seattle and Northern railway up the Skagit Valley. He is a member of the Grand Army; president of the Seattle Gas and Electric Co.; president of the National Bank of Commerce, and has been elected six times president of the Rainier Club, of Seattle. He was married in Minneapolis, in 1876, to Susan Elizabeth Johnson, of St. John, New Brunswick, and has four children.

Frederick Schwarz

Horace C. Henry

HENDERSON, John, senator, was born in one of the northern states in 1795, but, removing to Mississippi in his youth, he established himself as a lawyer at Woodville, Wilkinson county, about 1820. In 1835 he was elected to the state legislature, where he served for several terms, and in 1839 he was elected to a seat in the U. S. senate as a Whig, serving until 1845. At the expiration of his senatorial term he associated himself with the extremists of the South, who favored the annexation of Texas and the conquest of Cuba and Mexico. In 1851 he was arrested, with Gen. John A. Quitman, on a charge of violating the neutrality laws of 1818 by inspiring and assisting the insurrection of Lopez in Cuba, and though acquitted, he did not again appear in public life. He died at Pass Christian, Miss., in 1857.

RIGGS, Samuel A., jurist, was born in Lawrence county, O., March 1, 1835, son of Joseph and Rebecca G. (Baldridge) Riggs, and a descendant of Edward Riggs, who emigrated from Wales, sailing either in the *Mayflower* or a vessel that sailed soon after. His son, Edward, removed to Connecticut and later to New Jersey, and from him the line runs through Miles, Edward, and Joseph, to Joseph (2), who located in Washington county, Pa., prior to 1790. His son, Stephen, was married to Annie Baird, in 1795, and in 1799 moved to Mercer county, Pa., thence to

Franklin county in 1806, and in 1809 settled near Steubenville, Jefferson co., O. Joseph Riggs, father of the jurist, served in the war of 1812; was auditor of Adams county, O., for four terms; was a state senator in 1831-33; became a manufacturer of iron at Hanging Rock, O., where he built the first rolling-mill, and later was interested in rolling-mills and in mercantile business at Portsmouth, O. His wife's father, Rev. William Baldridge, a native of Virginia, and a cavalryman during the revolutionary war, was one of the pioneer ministers and founders of the Associate-Reformed (now United Presbyterian) church; he was a graduate of Dickinson

College, and twice declined the presidency of Washington College. Judge Riggs was educated at Marietta College, at Jefferson College, Canonsburgh, Pa., where he was graduated in 1856, receiving the degree of A.M. in course, and at the Cincinnati Law School, and in 1858 was admitted to the bar of Hamilton county. In the spring of 1859 he removed to Lawrence, Kan., which is still his home, and the following year became county attorney, serving for two years. In 1862 he was elected district attorney of the 4th judicial district of Kansas, embracing eight counties. Four years later he was elected to the state senate, where he was chairman of the judiciary committee and one of three commissioners appointed by the governor to revise and codify the civil and criminal codes of procedure and all laws of a general character. The volume of "General Statutes of Kansas" of 1868 is the product of their labor. He resigned from the senate in 1867 to become U. S. district attorney for the district of Kansas, filling this office with eminent ability for two years. In 1870 he left the Republican party, and in 1872 was a member of the Liberal Republican national committee, and a delegate to the Cincinnati convention which nominated Horace Greeley for the presidency. He was himself a candidate for congress on this ticket to represent the state at large. In 1878 he was a member of the Kansas house of rep-

resentatives, serving as chairman of the judiciary and member of the railroad committee, and through the Riggs Railroad bill initiated the legislative effort to place railroads under the control of a board of commissioners. In 1885 he was the Democratic candidate for congress nominated to take the seat made vacant by the death of Dudley C. Haskell. At the national Democratic convention of 1896, which nominated William J. Bryan for president, he was a delegate and a member of the committee on organization. In the fall of 1896 he was elected judge of the fourth judicial district of Kansas, embracing Douglas, Franklin, and Anderson counties, usually strongly Republican; and this high office he still (1901) holds. Judge Riggs has, for the past decade, been connected with the University of Kansas as a lecturer in its law department. He was married in Pittsburgh, Pa., Dec. 31, 1861, to Kate Doune, daughter of Henry and Jane (Kirkpatrick) Earle, and granddaughter of William Earle, a Pittsburgh merchant, though a native of New Jersey. They have one child, Henry Earle Riggs, now a prominent sanitary engineer of Toledo, O.

HERSCHEL, Clemens, civil engineer, was born in Davenport, Ia., March, 23, 1812. He was graduated at the Lawrence Scientific School of Harvard University in 1840, and at the Karlsruhe Polytechnic School in 1863. Returning to Boston in 1864, he practiced his profession—mainly in the New England states—first as a bridge engineer, then as an hydraulic engineer, until 1879. He took a first prize offered for an essay on road-making by the commonwealth of Massachusetts in 1869. In 1872 he was superintendent of streets of West Roxbury, Mass., and from 1879 to 1889 was hydraulic engineer of the Holyoke Water Power Co., having in charge the distribution of water among the grantees of that company, and in 1885, while in this position, practically rebuilt the dam across the Connecticut river, on which the value of all the Holyoke investments depends, at the same time designing the present new stone dam. He removed to New York in 1889 on an offer to construct the works of the East Jersey Water Co., which were built under his supervision in two and one-half years. In 1881-83 he was one of the three railroad commissioners of the commonwealth of Massachusetts, and from its inception was the hydraulic engineer of the Cataract Construction Co., which built the existing large works at Niagara Falls for the utilization of some 100,000 horse-power. The hydraulic mechanism of these works has been described by him in several articles written for various engineering papers. A lecture was delivered by him before the students of Cornell University in 1894 on "Frontinus and his *H. Books* on the Water Supply of the City of Rome"; the forerunner of the same author's quarto book on this subject, which has been received with great favor. He wrote "Continuous Revolving Drawbridges" (1875) and numerous other professional papers. On April 17, 1888, he obtained a patent for the Venturi water meter, an instrument which is used to meter the quantity of water flowing through pipes of any diameter, up to the largest tunnels, and for a description of which he received the Rowland prize in 1888 from the American Society of Civil Engineers and the Eliot Cresson gold medal in 1898 from the Franklin Institute. He is past president of the Boston Society of Civil Engineers, and a member of the American Society of Civil Engineers, of the Institution of Civil Engineers of London, England; the Union Club, Boston; the Century Association, New York, and many other social and professional societies. He was married, May 12, 1869, to Grace Darling, daughter of Hon. Aaron Hobart, of Boston, and has three children.

Samuel A. Riggs

COWPERTHWAITTE, Allen Corson, physician, was born in Cape May county, N. J., May 3, 1818, son of Joseph C. and Deborah (Godfrey) Cowperthwaite. His father was a dentist by occupation, and also noted as a mathematician, having written a work on the calculus, which at one time was a popular text-book. His mother was a daughter of Thomas Godfrey, of New Jersey. He is descended from Thomas Cowperthwaite, who came from England early in the eighteenth century. He was educated at the seminary of Toulon, Ill., whither his parents had removed, and made his professional studies in the Hahnemann Medical College, Philadelphia, where he was graduated in 1869. He practiced at Galva, Henry co., Ill., four years, and then removed to Nebraska. He was one of the pioneers of homoeopathy in that state, and was instrumental in organizing the State Homoeopathic Medical Association, now a flourishing organization. Meantime he devoted considerable attention to original researches and literary work, issuing his first book, "Insanity in Its Medico-Legal Relations" (1876), which gave him a national reputation. In the same year he was invited to lecture before the faculty and students of the Central University of Iowa, which conferred on him the degree of Ph.D. In 1885 he received the degree of LL.D. from Shurtleff College. In 1877 he was invited to the chair of mental and nervous diseases in Hahnemann College, Philadelphia, but about the same time having been elected dean and professor of materia medica in the newly organized Homoeopathic Medical School of the University of Iowa, he remained in the West. This position he continued to hold for fifteen years, and for one year (1884-85) was also dean and professor of materia medica and therapeutics in the Homoeopathic Medical College of Michigan University. In 1892 he settled in Chicago, and was at once elected professor of materia medica and therapeutics in the Chicago Homoeopathic College. This chair he still holds, and he is also president of the college (elected in 1901). In addition to the work above mentioned, Dr. Cowperthwaite is author of "A Text-Book of Materia Medica and Therapeutics" (1880, 8th ed., 1890); "A Text-Book of Gynecology" (1888), and "A Text-Book of the Practice of Medicine" (1901). Since settling in Chicago he has been connected with many hospitals, and has also been an active member of several local and state medical societies. He has been president of the State Homoeopathic societies of Illinois, Iowa and Nebraska, and was vice-president of the American Institute of Homoeopathy in 1885, and its president in 1888. He is a member of the Republican and Illinois clubs; a fellow of the Society of Science, Literature and Art, London, and a member of the Independent Order of Odd Fellows. In religious faith he is an earnest Baptist, and has been closely identified with the religious and beneficent activities of his denomination since 1866. He was married, June 2, 1870, to Ida Estella, daughter of Dr. Joel F. Erving, of Oskaloosa, Ia. They have one son and one daughter.

Allen Corson Cowperthwaite

STILWELL, Silas Moore, lawyer, was born in New York, June 6, 1800, son of Stephen Stilwell, and a descendant of Nicholas Coke, who came to this country in the seventeenth century and adopted the name of Stilwell. His father, a soldier in the revolutionary war, went to Woodstock, N. Y., in 1804, where he established a glass factory. The son

was educated at the Kingston Academy and before the close of the war of 1812 became a clerk with Col. Richard Kingsland, who had a hardware store in Maiden lane, New York city. In 1811 he learned surveying and went to Tennessee, where, in 1822, he was elected to the legislature, afterward removing to Virginia. He studied law with Judge Samuels, Parkersburg, Va., and was admitted to the bar in 1821, being also clerk of Tazewell county and a member of the house of burgesses. In 1828 he returned to New York city and was elected to the legislature in 1829, serving until 1831. He was the author of the Stilwell act, a bill to abolish imprisonment for debt, which met with much opposition from certain classes, but which became a law in 1831. There were at that time 3,092 persons in prison for debt, more than 1,000 of whom were confined for sums less than one hundred dollars and many for less than twenty shillings. This act led to a correspondence with Lord Brougham which lasted for years, and through him Mr. Stilwell was made an honorary member of the Law Reform Association of Exeter Hall, London. He was elected alderman in New York city in 1835 and made chairman of the board; at the time of the great fire of 1835 he was acting mayor. Pres. Harrison offered him a place in the cabinet, which he declined, but after the president's death he accepted the appointment of U. S. marshal for the southern district of New York, which he held through Tyler's administration. During this period he was sent on a special mission to the Hague for the purpose of negotiating a loan for the U. S. government if possible. At the end of his term he resumed the practice of law. He was the author of the banking laws of the state of New York, of the general bankrupt act, and in 1863 of the national banking act and system of organizing credits. He wrote a great deal on financial questions and also contributed to the "Herald" many articles under the pen name of "Jonathan Oldbuck." He died in New York city, May 16, 1881.

Silas M. Stilwell

BAKER, Marcus, cartographer, was born near Kalamazoo, Mich., Sept. 23, 1819, son of John and Chastina (Fobes) Baker. His early life was spent on a farm. He was educated in the public schools, at the Baptist College at Kalamazoo, and at the University of Michigan, where he was graduated A. B. in June, 1870. During 1870-71 he was professor of mathematics in Albion College, Michigan, and in 1871-73 a tutor of mathematics in the University of Michigan. Since 1873 he has been in the service of the United States; from 1873 to 1886 in the coast and geodetic survey, and since 1886 in the geological survey. In 1896 he was graduated in the law school of Columbian University, Washington, D. C. Mr. Baker is a student of geography, especially that of Alaska, of mathematics, of terrestrial magnetism, and on some of these topics he has published articles. With William H. Dall, he prepared the "Alaska Coast Pilot," and in 1896-97 he was employed in work upon the disputed boundary between British Guiana and Venezuela. He is a member of various scientific societies; and of the U. S. board on geographic names, of which he is the secretary. He received the degree of LL. B. from Columbian University in 1896. He was married, in 1874, to Sarah Eldred, of Climax, Kan., and in 1893 to Marian Strong, of Kalamazoo, Mich.

ELDER, Susan (Blanchard), poet, was born at Fort Jessup, Sabine co., La., April 19, 1835, daughter of Lieut. Albert G. Blanchard, and of Susan Thompson, a native of Massachusetts. Her mother died when she was a child, and she was sent North to her maternal relatives, with whom she remained only a few years, when she was recalled to Louisiana, where she has since made her home. She was educated in St. Michael's Convent of the Sacred Heart, St. James Parish, La. Her father's brilliant record during the Mexican war, as well as through the fearful period of civil strife, filled her soul with patriotic impulses.

Although related to many of the leading families in the New England states, Mrs. Elder's early training made her a typical woman of the South. She was married, in 1855, to Charles D. Elder, of Baltimore, an polished scholar. With him she passed through all the vicissitudes of the civil war and reconstruction period, and learned, to her own cost, the trying lessons of disaster and defeat. After the capture of New Orleans by the Federal forces she went to Selma, Ala., where she turned her cottage into a hospital for the wounded. On her return to New Orleans at a later period, Mrs. Elder

became professor of natural science in the high school, and also joined the editorial staff of the "Morning Star" newspaper. At the early age of sixteen she began to write for the press, under the name of "Hermine," and won a local fame for graceful verse. During the civil war her Southern feelings found vent in stirring lyrics. She has written one serial story, "Ellen Fitzgerald," which was more than well received by the Southern public. As literary critic and writer of editorials in Roman Catholic publications, her name is dear to her co-religionists. Though of Protestant ancestry, she became a Roman Catholic when very young. Her brother-in-law, Rev. William H. Elder, is the venerable archbishop of Cincinnati, while her only brother, Rev. Henry Blanchard, is a Unitarian minister in Maine. Her most admired poem, "Cleopatra Dying," has been pronounced on a par with Lyttle's beautiful "I Am Dying, Egypt, Dying." Her writings comprise poems, histories and dramas intended for representation in Roman Catholic colleges. Among her principal writings, not already mentioned, are: "The Leos of the Pa-pae"; "James the Second," and "Savonarola." In 1890 Mr. Elder died, and Mrs. Elder has since resided in New Orleans, devoting her time and talents to her family and her church.

HOLLINS, George Nichols, naval officer, was born in Baltimore, Md., Sept. 20, 1799. At the age of fifteen he entered the navy as a midshipman, and served on the sloop-of-war Erie, being on board that vessel at the time of her attempt to break the British blockade in Chesapeake bay. Later he was assigned to the President, under Com. Decatur. Having grounded while going to sea, the President was surrounded by three British frigates, being compelled, after an obstinate resistance, to surrender. Twenty-five of her crew were killed, sixty were wounded, and the remainder taken prisoners. Hollins was held at Bermuda until the establishment of peace. In 1815 he again served under Decatur in the Algerian war, where for his bravery exhibited in the capture of a frigate he received from the commodore a magnificent Turkish sabre. He afterward served on the Guerriere, the Columbus, the Frank-

lin, the Washington, then took command of an East Indian merchantman; was promoted lieutenant in 1825 and commander in 1844. While he was serving off the coast of Nicaragua in 1855 the American residents of Greytown being harassed by the local authorities, appealed to Hollins for protection. He acted promptly in demanding reparation and proper treatment for the Americans, and his demands not being complied with, he as promptly shelled the town. Nicaragua being then under the protection of the British government, an international complication arose. The English residents resented what they deemed an interference, and claimed that their property and lives had been imperilled by the "encroachments" of the United States. Thus serious difficulties between Great Britain and the United States were for a time appreciated. In 1861 Com. Hollins resigned his commission with a view to joining the Confederate navy, but his resignation was refused and an order issued for his arrest. He skillfully eluded the authorities, however, and, making his way to the South, was commissioned commodore, in charge of the Confederate battering ram Manassas. On the night of Oct. 12, 1861, while the Federal fleet was lying at anchor inside the southwest pass of the Mississippi, Hollins drove his ram against the sides of the Richmond, striking her below the water line with such force as to knock a hole in her timbers and tear her from her fastenings. Thereupon an effective broadside was poured into the ram, but Hollins signaled for support, and five ships came down the river, threatening the complete destruction of the fleet. In this effort to break the Federal blockade of the Crescent City great reliance was placed upon the Manassas. This vessel had the appearance of a floating roof, with two smoke-stacks projecting from its ridge pole; and though carrying a single heavy gun, being iron-clad, was very effective as a ram. She was sunk in April, 1862, during a fight with the Federal fleet. For his services to the Confederate navy Hollins was appointed flag captain of the New Orleans station, but was superseded by Com. Wm. C. Whipple prior to Farragut's attack in 1862. After the war he retired to civil pursuits, and became a crier in the city court of Baltimore. He was a man of rare abilities, and experienced strange vicissitudes during his career. He died in Baltimore, Md., Jan. 18, 1878.

WILSON, William Edward, educator, was born near Zelenople, Butler co., Pa., March 26,

1847, son of Francis Thomas and Mary Ann (Morrison) Wilson. He is a descendant of Thomas Wilson, an officer in the army of William of Orange, who for bravery at the battle of the Boyne was rewarded with a grant of land in Cavan county. Thomas' son, Hugh Wilson, emigrated to America about 1736, and settling on land in Northampton county, Pa., built there a flour mill, which stood until 1857. Members of the family afterwards became prominent in politics and on the judicial bench. Mr. Wilson spent his early years on his father's farm, working on it, and attending school at intervals. At the age of eighteen he began to teach, and he was connected with several institutions, both as teacher and scholar, before he was finally graduated at Monmouth College in 1873. From 1873 to 1875 he was teacher of natural sciences and Greek in the Nebraska State Normal School, and for one term he was acting principal of the institution. In 1875-76 he traveled and studied in Europe; then returning to America, he was for three years principal of high schools at North Platte and Brown-

Susan B. Elder

W. E. Wilson

ville, Neb. In 1881 he became professor of natural science in the college at Cedar Rapids, Ia., but this chair he resigned in 1884 to accept a position as teacher of sciences in the State Normal School of Rhode Island. In addition to his duties as teacher of biology and pedagogy in this institution he was for three years superintendent of schools at Johnstown, R. I. In 1892 he was elected president of the Normal School, and served until 1898. Under his management a training department was established, a new building erected and training rendered compulsory for teachers in the public schools of Pawtucket and Providence. Mr. Wilson was married, in 1881, to Florence M., daughter of Z. D. Ransdell, of South Carolina.

EVANS, Elisha Nero, clergyman, was born near Birmingham, Ala., Jan. 19, 1857, son of James Kirkham and Phoebe (Waldrop) Evans. His father, a planter by occupation, settled on Red River, Arkansas, in 1859, and enlisting in the Confederate service in the civil war, died in camp, September, 1862. His mother was a daughter of A. D. Waldrop, of South Carolina. The Evans family came from England early in the eighteenth century, and settled in South Carolina. Mr. Evans was educated in the country schools and under private teachers. After a brief business experience he joined the Little Rock conference, Methodist Episcopal church, South; was a circuit preacher for three years, and then entering the senior class of Emory College, Oxford, Ga., took a special course in the literary and scientific departments in 1883. He then re-entered the ministry, and was stationed at Little Rock, Ark., where he founded the Winifred Memorial Church, now one of the leading Methodist churches of that city, at a cost of \$20,000. After serving there and at Dallas, Tex., he was for one year presiding elder of the Monticello district, the youngest presiding elder ever in the Little Rock conference; then served pastorates at Little Rock a second time, at Hot Springs, Ark., and at Monroe, La., four years, where he built an elegant church and parsonage at a cost of \$25,000. In December, 1898, he became pastor of the Carondelet Street Methodist Episcopal church, South, New Orleans, La. Mr. Evans is a wide reader and a forceful preacher. Dealing with the prevailing conditions

E. N. Evans

and problems of present-day life, his sermons are eminently practical and suited to the popular understanding. The high esteem in which he is held outside his own denomination was well expressed by Dr. L. P. Bowen, a Presbyterian minister of Monroe, La., who at the time Mr. Evans took his departure from that place said: "For four years Mr. Evans has stood before his people for a common Christianity, and his pulpit has been eloquent for brotherhood. . . . All other churches honor him as much as his own. We love him as an honest Methodist; we love him more widely as a brother in all the fundamentals of universal fellowship." Mr. Evans was married in October, 1884, to Mollie, daughter of Col. W. F. Trippe, of Desha county, Ark.; second, in October, 1894, to Porter Lucy, daughter of Dr. A. F. Sanders, a prominent physician and capitalist of Hot Springs, Ark.

RANDALL, Robert Richard, philanthropist, was born probably in New Jersey about 1750, son of Thomas Randall, a prominent New York merchant. He was the principal founder of the Marine Society, and was chosen a member of the committee of one hundred to control the affairs of the city in 1775.

He died in 1797. Robert is known to have followed the sea in early life, and in the records he is spoken of as a merchant and shipmaster, being uniformly styled "captain" by his contemporaries, both historically and in the recorded proceedings of the trustees appointed by him. In 1771 he became a member of the Marine Society of New York, an organization for the relief of indigent and distressed masters of vessels, their widows and orphans, and in 1778 he was elected to membership in the New York Chamber of Commerce. On June 5, 1790, Capt. Randall bought from Baron Pochnitz a large piece of property known as the Minto farm, now lying in the 15th ward of New York city, the southern boundary of which marked the northern termination of Broadway, about where Grace Church now stands. It contained over twenty-one acres, and its mansion, which had been erected by Lieut. Gov. Andrew Elliot, was Capt. Randall's home from 1790 until his death, which occurred June 5, 1801. In his will Capt. Randall gave \$10,000 worth of stock, four lots in the 1st ward of the city, and the Minto farm, to found the Sailors' Snug Harbor, a home for aged or infirm sailors, naming as trustees the chancellor of New York state, the mayor and recorder of New York city, the president of the Chamber of Commerce, the president and vice-president of the Marine Society, and the senior clergymen of the Episcopal and Presbyterian churches of New York. Though founded in 1801 and incorporated Feb. 6, 1806, owing to litigation absolute control of the property could not be obtained until 1831. In the meantime the growth of the city had made it more profitable to rent the property and locate the institution elsewhere. The necessary amendment of the charter to this effect was secured April 19, 1828; the present site near New Brighton, Staten Island, was selected in May, 1831; the cornerstone was laid Oct. 21st of that year, and the building dedicated Aug. 1, 1833. In 1831 the remains of Capt. Randall were re-interred on Staten Island, and in 1884 a large statue in bronze by St. Gaudens (see illustration) was erected to his memory on the grounds of the institution he had founded. The total number of persons admitted to the home up to June 1, 1901, was 4,832, of whom 900 were remaining at that time. Sailors' Snug Harbor now (1901) comprises nearly 200 acres of land, eight large dormitories with accommodations for 1,000, a sanitarium, hospital, church, and officers' residences, comprising about forty building-sites.

JOHNSON, Frederick Charles, journalist, was born at Marquette, Green Lake co., Wis., March 2, 1853, son of Wesley and Henrietta (Green) Johnson. He is descended from William Johnson, of New Haven, Conn., who emigrated from England, about 1660. Rev. Jacob Johnson, great-grandfather of Frederick, was one of the hardy adventurers from Connecticut, who in the eighteenth century settled the historic Wyoming valley, and for a score of years defended their homes against the continued opposition of hostile Indians and of the less savage, but no less hostile, white claimants under the Pennsylvania proprietary government. He was one of the earliest and most outspoken advocates of American liberty as shown by utterances made by him to Sir William Johnson in 1768, when present as an Indian missionary at a commission to treat with the Six Nation Indians at Fort Stanwix. Frederick C. Johnson attended the public schools of Wilkes-Barre, Pa., whither his parents removed in 1853, but returned

to Wisconsin, to enter Ripon College, where he took a partial course with the class of 1873. Beginning with 1871 he had a business training of about ten years in Wilkes-Barre, meanwhile contributing to local papers, and doing special correspondence from the coal regions for the Chicago "Tribune." He also spent a year in Chicago as a reporter on the staff of that newspaper, and is still on that journal's list of correspondents. He then took a three-years' course in the medical department of the University of Pennsylvania, and was graduated in 1883, but took up journalism, purchasing a half interest in the Wilkes-Barre "Record," the first daily newspaper established in that city, with which he is still (1901) connected. He is actively identified with the board of trade, the New England Society, the Westmoreland Club, the Wyoming Historical Society, of which he is treasurer, and other historical societies, the Young Men's Christian Association, of which he is a director, the Luzerne County Medical Society, the State Medical Society, the American Medical Association, the Society for Prevention of Tuberculosis, the Republican County Committee, the Wyoming Commemorative Association, of which he is secretary, the Pennsylvania Forestry Association, the State and National Editorial associations,

the Masonic fraternity, Brotherhood of St. Andrew, Sons of the Revolution, etc. For several years he was one of the committee appointed by the state board of public charities to inspect the public institutions of Luzerne county, and in 1901 was appointed by the county one of its jail commissioners. Dr. Johnson was married at Oshkosh, Wis., June 25, 1885, to Georgia, daughter of Joseph H. and Harriet (Green) Post. They have three children.

ADLER, Samuel, Rabbi and author, was born at Worms, Germany, Dec. 3, 1809, son of Isaac Adler, an associate rabbi in Worms. He received his first instruction in Hebrew and in Biblical and post-Biblical literature from his father, but upon the latter's death, which occurred in 1822, continued his studies in the Talmudical colleges of his native city, and afterwards at Frankfort-on-the-Main. Notwithstanding his being subjected to want and privation, he at the same time attended the high schools of those cities, pursuing there general and classical studies. Having graduated at the Frankfort Gymnasium, he entered the University of Bonn (1831), and later that of Giessen, from which in 1836 he received the degree of Ph.D. He then became a preacher and assistant rabbi in Worms. In 1842 he was elected rabbi of the Jewish congregation of Alzey, and filled this position until 1857. During this period he attended the three great rabbinical conferences held in Brunswick (1844), Frankfort-on-the-Main (1845), and Breslau (1846), respectively, taking each time a prominent part in the proceedings. In 1857 the congregation Ennau-El, in New York city, invited him to succeed Dr. L. Merzbacher, who had died some time previously, in the office of rabbi. In compliance with this proposition Samuel Adler arrived in New York city (March, 1857), and was the spiritual head of the congregation until 1874, in which year he was relieved from official duties, and was made rabbi emeritus, receiving a handsome life pension. Samuel Adler was a profound scholar of the Talmud and of Judaism. During his stay in Germany he energetically worked for

the removal of the civil disabilities of the Jews, for the introduction of the teaching of the Jewish religion in the lower and higher schools of Worms on equal terms with Protestantism and Catholicism, promoted religious instruction, and was the initiator of a number of charitable institutions. An untiring student throughout his life, he belonged to the so-called historico-critical school in the science of Judaism, and contributed many articles to learned periodicals. Of these the more important are: "Contributions to the History of Sadduceism," "Jewish Conference Papers" (New York, 1880), and "Benedictions" (New York, 1882). A collection of some of these articles he issued in 1886, under the general Hebrew title, "Rubez 'al Yad." He was married, in 1843, to Henrietta Frankforter. They had two sons and one daughter. His sons, Felix and Isaac, occupy prominent positions in the respective fields of their activity, the first as an educator and reformer, the second as a physician. Samuel Adler died in New York, June 9, 1891.

ADLER, Isaac, physician and educator, was born at Alzey, Germany, in 1849, son of Rabbi Samuel and Henrietta (Frankforter) Adler. He came to America, together with the family of his father, in 1857. Upon graduation at Columbia College in 1868 he returned to Europe and studied medicine in the universities of Heidelberg, Vienna, Prague and Berlin. He received his degree of M.D. at Heidelberg in 1871. In 1892 he was made professor of clinical pathology at the New York Polyclinic Medical School, and six years later (1898) was also elected consulting physician to the Montefiore Home, and visiting physician and pathologist to the German Hospital. Adler published a number of scientific medical monographs, one of which, "Observations on Cardiac Syphilis" (New York "Medical Journal," (lxviii., 577), has been translated into French in "Revue Générale de Clinique et de Thérapie" (xii., 818-824, Paris, 1898). He was married, in 1874, to Frida, daughter of Morris Grumbacher.

TRUXTON (or Truxtun), William Talbot, naval officer, was born in Philadelphia, Pa., March 11, 1824. His grandfather, Thomas Truxtun, was a distinguished naval commander. The grandson entered the navy as a midshipman in 1841, and was graduated at the Naval Academy, which he attended for one year, as a passed midshipman in 1847. In 1847-48 he cruised in the Brandywine on the Brazil station and returned in command of the prize slaver Independence. In 1849-52 he served on the Pacific station in the ship Supply; in 1853 in the brig Dolphin, assisting in laying the Atlantic cable, and in 1854 with the Strain expedition, which surveyed a route for a ship canal across the isthmus of Darien. On Sept. 15, 1855, he was promoted to master and lieutenant, and in 1859-60, during the Paraguayan war, he served in the brig Perry. In 1861 he became commander and lieutenant-commander in July, 1862, serving throughout the civil war in the Dale, Alabama, Chocoma and Tacony, of the north Atlantic squadron, and participating in the operations in the sounds of North Carolina; in various engagements with Confederate batteries; in the capture of Plymouth, N. C., and in both attacks on Fort Fisher. In 1866 he was promoted to commander and took charge of coal shipments for the navy in 1866-67; commanded the sloop Jamestown in the Pacific squadron in 1868-70, and was ordnance officer of the Boston navy yard in 1871-73. In 1873 he

was promoted to captain; commanded the Brooklyn in 1873-74, and the flag-ship of the South Atlantic station in 1874-75. He was a member of the board of inspectors in 1876-77, and during the next four years served at the Boston and Norfolk navy yards; became commodore in 1882 and in 1885 '86 was commandant of the Norfolk navy yard. He was retired, March 11, 1886, being entitled to the rank of rear-admiral three weeks before, but without having his promotion confirmed in the interval. Com. Truxton died at Norfolk, Va., Feb. 25, 1887.

PLYMPTON, Gilbert Motier, banker, was born at Fort Wood, Bedloe's Island, New York harbor, Jan. 15, 1835, son of Joseph and Eliza Matilda (Livingston) Plympton. His father (b. March 24, 1787; d. June 5, 1860), was a soldier, who served in the war of 1812 as lieutenant; in the Seminole war, Florida, as major, and in the Mexican war as lieutenant-colonel, receiving the brevet of colonel for gallant service at the battle of Cerro Gordo. His education was begun at Fort Snelling, Minneapolis, under the chaplain of the post, and continued in a private school at Sacket Harbor. During his father's absence in Mexico he was sent to the house of his uncle, Gerard W. Livingston, in New Jersey, and studied there, entering Saurtwell College, Illinois, upon his father's return and appointment to Jefferson barracks, Missouri. Subsequently he studied for a time at John Sedgwick's school, New York city, and after reading law was admitted to practice in November, 1860. He then entered the law department of the University of New York, and was graduated in 1863. Beginning with a general practice he was soon engaged in many of the important litigations of the time, principally in the Federal courts. In 1889, having earned an independent fortune, and finding his health impaired by overwork, he retired from active practice. In 1892 he organized, with his present partners, the well-known banking house of Redmond, Kerr & Co., which now has branch offices in several other cities. Mr. Plympton has declined many official positions, though he has been and is a director in a number of corporations. He was a founder and vice-president of the St. Nicholas Club, and is a member of the Union, Metropolitan, Riding, Westchester County and New York Yacht clubs; Sons of the Revolution; Society of Colonial Wars; Metropolitan Museum of Art, Museum of Natural History, Chamber of Commerce, St. Nicholas, New York Historical, Zoological, Botanical, American Historical and other prominent societies. He has been a frequent contributor to periodicals and is the author of several pamphlets, among them a monograph on the life of his father and a sketch of the Plympton family. Mr. Plympton

was married, in 1863, to Mary A., daughter of Linus W. Stevens, a well-known merchant of New York city, and the first colonel of the 7th regiment. They have one daughter, Mary Livingston Plympton.

GRIFFITH, Jefferson Davis, physician and surgeon, was born at Jackson, Mo., Feb. 12, 1850, son of Richard and Sarah E. (Whitfield) Griffith. His father was a life-long friend of Jefferson Davis and a brigadier-general of the Confederate army, who was killed at Savage station, Va., June 29, 1862. He was educated at Summerville, Miss., by Thomas

H. Gathright, then considered one of the best educators of the South. He attended the Bellevue Medical College of New York, and was graduated at the University of New York in 1871. He entered Bellevue Hospital as an interne on Oct. 1, 1871, and filled the position with credit and success for two years. In January, 1873, he went to Kansas City, Mo., and in October of the same year was appointed lecturer on physiology in the Kansas City Medical College, with which institution he has been connected ever since, having held the chair of principles and practice of surgery since 1888. In 1887 he gave up the general practice of medicine in order to confine himself exclusively to consultation, office and surgical work. He is visiting surgeon to St. Joseph's, All Saints' and German hospitals, and surgeon in charge of the Children's Free Hospital. In 1881 he was appointed a member of the board of health of the state of Missouri, and was its president from 1889. In 1889, upon the death of the surgeon-general of the state, he was appointed to that position by Gov. Francis. Dr. Griffith is a member of the American, Missouri State and Jackson County Medical associations and is also a member of the American Orthopedic Association, and has made many valuable contributions on the subject of surgery to various medical journals. He is a member of the Baptist church, and in politics is a Democrat. He was married, Jan. 28, 1880, to Sallie, daughter of Abraham Comingo, who was member of congress from Missouri in 1874.

EVANS, Frederick William, reformer and author, was born at Leominster, England, June 9, 1808, son of George and Sarah (White) Evans. His mother died when he was four years old, and at the age of twelve he accompanied his father and brother to America. He attended school at Ithaca, N. Y., and studied under the tuition of an Episcopal clergyman, who, as he says, taught him to think. He was apprenticed to a hatter, and spent all his leisure time in the study of works of a socialistic nature, and ultimately adopted views kindred to those of his brother, George Henry Evans (1805-55), who was one of the earliest advocates of land reform in the United States, laboring for the destruction of the U. S. bank; inalienable homesteads; transportation of the mails on Sunday; general bankrupt laws; laborer's liens; abolition of slavery and imprisonment for debt. So enthusiastic was Frederick in his ideas of social equality and reform that he actually walked 800 miles from New York to Massillon, O., to join a social community. In 1820 he joined the community of the United Society of Believers (Shakers) at Mount Lebanon, N. Y., became prominent among them, and was chosen elder of the north family. The force of the man would have made him a leader in any walk of life. His enthusiasm and influence were great; his teachings considerably modified the existing belief and added new dogmas to the tenets of this peculiar sect, and he became the recognized leader of the Shakers in the United States. He continually wrote and lectured on subjects pertaining to the Shakers, and published: "Tests of Divine Inspiration; or, The Rudimental Principles by which True and False Revelation Can be Discriminated" (New Lebanon, 1853); "A Short Treatise on the Second Appearing of Christ in and Through the Order of the Female."

G. Plympton

(Boston, 1853); "Brief and Moral Instructions for the Young" (Worcester, 1858); "Compendium of the Origin, History, Principles, Government and Doctrines of the United Society of Believers in Christ's Second Appearing" (New York, 1859, 4th ed., 1867); "Autobiography of a Shaker, and Revelation of the Apocalypse" (Mt. Lebanon, N. Y., 1869); "Shaker Communism; or, Tests of Divine Inspiration" (London, 1871); "Religious Communism: A Lecture, with Introductory Remarks by W. Hepworth Dixon" (London, 1871); "Ann Lee" (1871); "Second Appearing of Christ" (1873); "The Universal Church" (1873); "Celibacy from the Shaker Standpoint" (1866); "Death of a Prominent Shaker in the Community at Waterliet, N. Y." (1891). He died at Mt. Lebanon, N. Y., March 6, 1893.

DOGGETT, John Locke, jurist, was born in Jacksonville, Fla., March 14, 1868, son of Aristides and Ann Timothy (Cleveland) Doggett. His father (1830-90), a native of Jacksonville, a graduate of Jubilee College, Illinois, and a noted lawyer of Florida, served throughout the Mexican war under Gen. Scott, and through the civil war under Gen. Bragg, and was later judge of the county court of Duval county, chairman board of county commissioners, corporation counsel for the city of Jacksonville. His mother (1823-93), a daughter of John C. Cleveland, a sugar planter of Jamaica, W. I., was one of

the three founders of St. Luke's Hospital; founder of the Daniel Memorial Orphanage, Jacksonville; Library Association, Jacksonville, Fla., and altogether a woman of conspicuous mental force and energy. His earliest American ancestor, Thomas Doggett, emigrated to America in 1692. The line descends through his son, John; his son, Thomas; his son, Thomas; his son, Simeon; his son, Simeon, second, and his son, John Locke, Mr. Doggett's grandfather. This John Locke Doggett (1798-1844), settled in Florida in 1820, was one of the founders of Jacksonville, president of the legislative council of the territory of Florida (1825-30),

lawyer and circuit judge northern district Florida (1831-37). He died in 1844, a man of much prominence in the early history of Florida. His maternal great-great-grandfather was Andrew Turnbull, a noted lawyer in England, and the moving spirit in connection with Sir William Duncan in founding the Minorcan colony at New Smyrna, Fla. These emigrants were collected by Dr. Turnbull in the Grecian archipelago to the number of 2,000, and brought to New Smyrna, Fla., where the colony was established in 1767. The object of this colony was the growing of indigo. They became dissatisfied before their contract expired, and finally, after nine years the scheme was abandoned and the colonists moved to St. Augustine, 1776, where they permanently settled. Their descendants are to be found among the most prominent families of Florida. John L. Doggett was educated at private schools, and at the East Florida Seminary, and was graduated at the University of the South, Sewanee, Tenn., in 1887. Immediately after graduation he was appointed clerk of the criminal court of record at Jacksonville, and two years later was elected to the same position, entering upon the study of law at the time of his appointment, and being admitted to the bar in November, 1890. He began to practice three years later, and in 1895 was admitted to the supreme and Federal courts of Florida. On June 17, 1897, he was appointed judge of the criminal court of record

at Jacksonville, and although the youngest presiding judge of a court of record in Florida, he has nevertheless since discharged his duties with conspicuous energy and ability. Judge Doggett has been active in military affairs, and has been captain of the Metropolitan light infantry, and the Jacksonville light infantry, both organized in his native city. He is a member of the Seminole, Florida County and Florida Yacht clubs, and secretary of the Bar Association of Jacksonville. On June 10, 1890, he was married to Carrie May, daughter of Erskine Burton Van Deman, of Jacksonville. They have two children, Carita Ann Louisa and John Locke Doggett, Jr.

HAYS, Isaac, physician, was born in Philadelphia, Pa., July 5, 1796, son of Samuel and Richa (Gratz) Hays. His father was a wealthy merchant of that city. The son's education was begun under Rev. Samuel B. Wylie, D.D., and continued at the University of Pennsylvania, where he was graduated in 1816. On leaving college he entered his father's counting-house, and remained for about a year, when he commenced the study of medicine with Dr. Nathaniel Chapman. He was graduated at the Medical School of the University of Pennsylvania in 1820. Turning his attention to the physical departments of medicine, Dr. Hays became eminent as an ophthalmist. He was connected with the following medical institutions: Infirmary for Diseases of the Eye and Ear, 1822-27; surgeon to Wills' Ophthalmic Hospital, 1834-54; physician to the Philadelphia Orphans' Asylum; Philadelphia Dispensary; Southern Dispensary, and the Pennsylvania Institution for the Instruction of the Blind. In 1835 he became a fellow of the College of Physicians; he was chairman of its building committee, censor, and one of its delegates to the American Medical Association in 1849-53. He was one of the originators of the American Medical Association in 1847; its treasurer 1848-52, and chairman of its committee of publication 1847-53, also chairman of several special committees. In 1848 he was a delegate from the College of Physicians of Philadelphia to the convention held to organize the state medical society. In 1827 he assumed an editorial position on the staff of the "Philadelphia Journal of the Medical and Physical Sciences," and in the same year became editor-in-chief. He changed its title to "The American Journal of the Medical Sciences." Dr. Billings, in his "Centennial History of American Medical Literature," said: "The ninety-seven volumes of this journal need no eulogy. From this file alone, were all other productions of the press for the last fifty years destroyed, it would be possible to reproduce the great majority of the real contributions of the world to medical science during that period." In 1869 his son, Dr. I. Minis Hays, became associated with him as editor of the "Journal." In 1843 Dr. Hays established the "Medical News," a weekly publication, and in 1879 the "Monthly Abstract of Medical Science." His published papers include: "The Forces by which the Blood is Circulated"; "Observations on Inflammation of the Conjunctiva"; "Inflammation of the Sclerotic"; "The Pathology and Treatment of Iritis" (1826). In conjunction with Dr. Robert Eglesfield Griffith, he translated "Chronic Phlegmasia" and "Principles of Physiological Medicine," from the French of Bronsais. He also published a new edition of "Wilson's American Ophthalmology" (1828); "Select Medico-Chirurgical Transactions"; a collection of the most valuable memoirs read to various medico-chirurgical societies (1831); "A Description of the Inferior Maxillary Bones of Mastodons in the Cabinet of the American Philosophical Society, with Remarks on the Genus Tetracaulodon" (1831); Hoblyn's "Dictionary of Medical Terms" (1846; new ed., 1855);

John L. Doggett.

Lawrence's "Treatise on Diseases of the Eye" (1847; 3d ed., 1854), and Arnott's "Elements of Physics" (1848). He wrote the chapter on "Diseases of the Eye" for the "Practice of Medicine," by Dr. Dewees, and he edited, in 1843, an American edition of Sir William Lawrence's treatise on "Diseases of the Eye." In the third edition (1854) Dr. Hays placed on record the first case of astigmatism published in America; he was also the first to observe color-blindness as a pathological condition. He was a member, and, from 1825, for years secretary of the Franklin Institute, of Philadelphia; vice-president of the Alumni of the Medical Department of the University of Pennsylvania; first president of the Ophthalmological Society of Philadelphia; corresponding member of the Gynecological Society, Boston; honorary member of the American Ophthalmological Society; also corresponding member of The Medical Society of Hamburg; the Société Universelle d'Ophthalmologie; and the Congress Médicale Internationale de Paris, and a member of many other scientific bodies. Dr. Hays was married, in 1834, to Sarah Minis of Savannah, Ga. He died in Philadelphia, Pa., April 12, 1879.

KELLOGG, William, jurist, was born at Kelloggsville, Ashtabula co., O., July 8, 1814, son of Amos and Paulina (Dean) Kellogg. His father was distinguished both as a practicing lawyer and a jurist. His mother was the daughter of Walter and Abigail (Adams) Dean, and a descendant of Walter Dean, who was captain of the 13th Massachusetts Continental regiment, and served through the revolutionary war, finally witnessing the surrender of Cornwallis at Yorktown. He received a common school education, and studied law. In 1837 he went from Ohio to Canton, Ill., where he was admitted to the bar, soon acquiring an extensive reputation as a brilliant advocate and general practitioner. He served in the Illinois legislature during 1849 and 1850, and was for three years a judge of the circuit court of that state (1853-56), resigning that position in the latter year, when he was elected a representative from Illinois to the 35th congress, and by subsequent re-elections served until 1863, acting as a member of the committees on public expenditures, government expenditures, and the judiciary, as well as the special committee of thirty-three on the rebellious states. He was a close friend and associate of Pres. Lincoln, who, in 1864, appointed him U. S. minister to Guatemala; but he declined the honor. In 1866 Pres. Johnson made him chief justice of Nebraska territory. He also served as collector of internal revenue at Peoria, Ill., of the 5th collection district, the largest in the United States. Judge Kellogg was married at Canton, Ill., to Lucinda C., daughter of Ossian M. and Mary (Winans) Ross, of that place. His children were Judge William Kellogg, Jr., John, Pauline, Emily and Lou Kellogg. He died at Peoria, Ill., Dec. 20, 1872.

HASKELL, Ella Louise (Knowles), lawyer, was born at Northwood, Rockingham co., N. H., in 1862, daughter of David and Louisa (Bigelow) Knowles. As a girl she was studious, and being dissatisfied with the education obtainable at her country home, entered Bates College, Lewiston, Me., and was graduated in 1884 with the degree of B. A. She taught in Helena, Mont. (1887-88), and then entered a law office, intending to resume teaching, but before the vacation expired decided to resign as a teacher. Women were not permitted to practice law in Montana, and it was through her efforts that a bill was passed in the territorial legislature of 1889, giving them that privilege. She was the first woman ever admitted to the bar in the state (Dec. 28, 1889), and was the first to hold the office of notary public. Soon after she was admitted to practice before the U. S. district and circuit courts, and the department of

the interior. Mrs. Haskell is credited with receiving the largest fee ever paid a woman lawyer, having received a single fee of \$10,000 in an important mining case. In 1892 she was nominated for the office of attorney-general of the state, by the Populist party. She went into the campaign with great obstacles to overcome, as it was the first year the Populists put a ticket in the field in Montana. She took the stump, and it soon became apparent that she was an orator of ability. She spoke constantly for two months to crowded houses, and ran 5,000 votes ahead of her ticket, which in a state of only 50,000 votes was not an inconsiderable number. Her Republican opponent, Hon. H. J. Haskell, being elected, she was appointed assistant attorney-general, and was the first woman in the world to hold such an office. She filled the office for four years to the eminent satisfaction of the people of the state, during which time she was sent to Washington and was successful in handling litigation in the department of the interior, involving state lands of the value of more than \$200,000. In 1895 in San Francisco, Cal., she was married to Hon. H. J. Haskell. In 1896 Mrs. Haskell was a delegate to the Populist county convention of Lewis and Clark county, in which Helena is situated, to the Populist state convention and to the Populist national convention at St. Louis, and took a prominent part in their proceedings.

She was instrumental in securing a women's suffrage plank in the Populist state platform of that year, after a hard fight on the floor of the convention. At the national Populist convention in St. Louis she was elected a member of the national committee, a position which she held for four years. She is the only woman ever elected a delegate to a national convention from Montana. In 1898 she took the stump for the Populist-Democratic ticket, and jointly with the Silver Republicans made a campaign of Cascade county. Mrs. Haskell has been prominent in the women's suffrage movement, having been state president of the association, and having addressed two national women's suffrage conventions in Washington, D. C. In 1897 she addressed the legislature of Montana upon the subject. She is largely interested in mining and mining litigation, and is an associate member of the American Institute of Mining Engineers. In June, 1900, she attended the international mining congress at Milwaukee, Wis., as a delegate, and was elected a member of the executive board of the congress. Mrs. Haskell was elected a delegate to the Populist county convention held in Helena in 1900, and to the Populist state convention held in the same city, in which she served upon important committees, and nominated Hon. James Donovan for attorney-general of Montana. She spoke from the public platform for several weeks in the fall of 1900, in behalf of the Fusion ticket in Montana.

DAVENPORT, Homer Calvin, cartoonist, was born at Silverton, Marion co., Ore., March 8, 1867, son of Timothy Woodbridge and Flora (Geer) Davenport. His father was a farmer by occupation, but devoted considerable time to politics. His mother, who died when he was but three and a-half years old, was a daughter of the Hon. R. C. Geer, of Waldo hills,

Oregon. He spent the early years of his life on his father's farm, and although he made many attempts to get into a successful business for himself, he seemed to fail in everything he attempted to do. In 1892 he went to San Francisco, where he received employment on the "Examiner." During his next three years' work on this paper he became so skillful with his pen that he was brought to New York by Mr. W. R. Hearst in 1895. Since then his cartoons in the New York "Journal" have given him a world-wide reputation. In 1897 his work caused an attempt to pass an anti-cartoon bill in the New York legisla-

Homer Davenport

ture. He originated the Mark Hanna \$ mark suit of clothes, and the figure which represents the trusts. In writing of the latter Prof. Harry Thurston Peck, editor of the "Bookman," says: "There is something so outrageous about the conception which Mr. Davenport has thus worked out as to make it fully as hideous as the artist had intended it to be. It represents violence, lawlessness and oppression, unrelieved by intellect or mercy, or kindness of any sort whatever. It is a whole political plea in itself, appealing through the shudder which it excites to every one who sees it, by rousing in him

an intense antagonism, for it is the apotheosis of the repulsive. What interests us greatly is the undoubted fact that when it is drawn by any other pen than Mr. Davenport's it becomes purely commonplace, and has no power to affect one in the least." A collection of his cartoons was published in 1898, and he is the author of "The Bell of Silverton" (1899); "Other Stories of Oregon" (1900), and "The Dollar and the Man" (1900). Mr. Davenport was married, in Chicago, Sept. 7, 1893, to Daisy, daughter of Robert A. Moore, of San Francisco. They have two children: Homer Clyde and Mildred Davenport.

EATON, Cyrus, educator and author, was born at Frammingham, Mass., Feb. 11, 1784, son of Benjamin and Mary (Stacey) Eaton. His father fought in the revolutionary war; he was by trade a shoemaker, and dying when his son Cyrus was sixteen years of age, the latter was compelled to assist in the support of the family. This he did by assisting his brother in the shoemaking business, by working on a farm and in a brick-field. He had early been sent to a district school, was for three months at a grammar school and for the rest was self-taught. At the age of nineteen he taught the school at Southboro—whither his mother had removed with her family—for a year, and in 1804 went to Warren, Me., where he was a teacher for forty years. In 1806 he was married to Mary Lermond. While teaching he was an industrious student of the higher branches. "Master" Eaton, as he was always called, introduced grammar as a branch of study into the Warren schools. The last twelve years of his life as a teacher were spent at the Warren Academy. Having lost his eyesight, with the assistance of his daughter, Emily, a crippled invalid, he prepared "The Annals of Warren, Me.; A Narration of Events from 1605 to 1850" (1851). He contributed to the "Christian Register" and other periodicals and a few years later began his second book, a "History of Thomaston, Me." (1865). He was town clerk for thirteen years; justice of the peace for thirty-two; assessor for nine years; a representative to the legisla-

ture for five years, and in 1826 a member of the convention which framed the constitution of Maine as a separate state. In 1848 Bowdoin College conferred upon him the honorary degree of A.M. and in 1851 he was elected a corresponding member of the Massachusetts and Wisconsin Historical societies, and a resident member of the Maine Historical Society. A memoir of him, "A Remarkable Self-made Man," was published by John Langdon Sibley. He died at Warren, Me., Jan. 21, 1875.

BROWN, Thomas McKee, P. E. clergyman, was born in Philadelphia, Pa., Feb. 8, 1841, son of James and Margaret (O'Farrell) Brown. He was educated at the Episcopal Academy in his native city, and at Trinity College, Hartford, Conn., where he was graduated in 1864. Having pursued the usual course of study at the General Theological Seminary, New York city, he was ordered deacon July 2, 1865, and advanced to the priesthood Feb. 25, 1866, both by Bishop Horatio Potter. He was assistant minister of the Church of the Annunciation, New York city, and St. John's Church, Brooklyn, for one year each, and for another year was in charge of Trinity Church, East New York. He then became assistant to Rev. F. C. Ewer, D.D., rector of Christ Church, New York, and while here he determined to found a church, whose aim should be the revival, adaptation and practical execution of ritual ideas, embracing music, vestments, rites and usages, as they were in the early days of the church. The result of his efforts was the Church of St. Mary the Virgin, erected on West Forty-sixth street. On Dec. 8, 1870, occurred the first of those daily celebrations of the holy communion which, for some time, that parish alone, in the diocese of New York, maintained in the face of discouragement and much hostile criticism. This was a great gain for the cause of catholic principle and custom, and if nothing more had been accomplished, would entitle the parish to the highest honors in the annals of the church. That the example set in this respect has borne abundant fruit is shown by the fact that no less than fifteen altars in New York city is the daily sacrifice offered, and among them seven in parish churches. The membership and activities of the church so increased as to make necessary the erection of an edifice better suited to the needs of the parish, and the present St. Mary's on West Forty-sixth and Forty-seventh street was consecrated in 1896. Father Brown may be said to have been a pioneer in what is termed the catholic revival in this country. Strong in his conviction that ancient and catholic doctrines and principles were the natural heritage of the church, it was his life work to inculcate and exemplify them by means of teachings, services and ritual,

Thomas McKee Brown

which, whether ornate or plain, were always dignified and inspiring, and his work remains as an everlasting memorial to a life well spent. His personality was especially attractive, his very presence and aspect being indicative of the man. He was tall, very strong and masculine; his complexion was fresh and warm; his manners cordial, direct and simple; his bright blue eyes were lighted up not only with kindness but with frankness and Celtic humor. His bearing was singularly soldierly and military, and always suggested the knightliness of his nature. His sincerity in every direction was absolutely convincing and his piety,

while it was singularly free from affectations and pretensions, was very profound and true, and it never shone out more gloriously than at the end, when, as one of his friends remarked, "In the act of dying he seemed like a conqueror." Father Brown was married, Feb. 7, 1867, to Mary Elizabeth, daughter of William Scott, of New York city. Two sons, Thomas McKee and Harold McLeave Brown, survive him. He died Dec. 19, 1895.

STALLO, John Bernard, jurist and philosopher, was born at Seirhausen, Oldenburg, Germany, March 16, 1823. Such was his precocity that at the age of sixteen he was prepared to enter a university. Having been educated at Yechna, for the profession of teaching, he emigrated to the United States in 1849, settling in Cincinnati, where there was a large German colony. Here he published a spelling and reading book in the German language, to which he was accustomed to refer in later years as his "most brilliant literary success." After having charge of a private school for a few months he became a teacher in St. Xavier's College. In 1843 he was appointed professor of mathematics, physics and chemistry in St. John's College, Fordham, N.Y. Resigning in 1847, he returned to Cincinnati, studied law and was admitted to the bar in 1849. He soon acquired a large practice and in 1853 he was appointed judge of the court of common pleas of Cincinnati. He was the champion of freedom of thought and action in all its forms and his main juridic laurels were won in connection with cases where liberal issues were concerned. He had a grasp and appreciation of our political institutions that was and even still is rare, and he was a leader in tariff, civil service and political reform, his influence being exerted chiefly through contributions to the press. A true independent, he left one political party for another at the call of his conscience. In 1862 he presided, at the risk of his life, at a meeting where Wendell Phillips spoke in favor of emancipation, though he abhorred Phillips' disunion sentiments. He took part in the liberal Republican movement of 1872 and in the campaign for Grover

Cleveland in 1884, his services in the latter instance being recognized by his appointment in 1885, as U. S. minister to the court of Italy. When his official term expired in March, 1889, he took up his residence in Florence. His house in Cincinnati was one of the intellectual centres of that city, and artists, musicians, authors and scientists were particularly welcome within its walls. Though he published but few volumes, they have great importance. His "General Principles of the Philosophy of Nature" (1848) recorded "a digest of the views of many German philosophers, which were at that time a sealed book to most American readers." His "Concepts and Theories of Modern Physics" (1882; 2d ed., 1884) is called

"the profoundest and most original work in the philosophy of science that has appeared in this country—a work which ranks with anything that has been produced in Europe and which showed a firm and independent grasp of what are now acknowledged principles of scientific criticism at a time when these were not in the possession of the majority of scientists." His last work, "Reden, Abhandlungen und Briefe" (1893) contains essays on such subjects as the "Future of the English Language in America"; "Instruction in German in Public Schools"; "Materi-

alism" and "Fundamental Notions of Physical Science." Judge Stallo was married and had a son and a daughter. He died in Florence, Italy, Jan. 6, 1900.

PETERS, George Absalom, physician, was born at Bennington, Vt., May 12, 1821, son of Absalom and Harriet H. (Hatch) Peters, and grandson of Gen. Absalom Peters, a graduate of Dartmouth in 1789. His father, a graduate of Dartmouth College and Princeton Seminary, was for five years pastor of a church in Bennington, and subsequently for twelve years secretary of the American Home Missionary Society, and the first editor of its magazine. He was afterwards pastor of a Congregational church at Williamstown, Mass., and devoted the remainder of his life to editorial and philanthropic work. In 1825 he removed with his family to New York city. At the age of seventeen his son, George A., was sent to Yale. On account of pecuniary embarrassment of the family he did not complete his course there, and at the end of his freshman year obtained employment in a mercantile house at Keeseville, N.Y. Subsequently he assisted his father in his editorial work on the "Biblical Repository, Eclectic Magazine," etc. He then went to Liver-

pool, England, where he remained for about one year. Upon his return to New York city he entered the College of Physicians and Surgeons, the medical department of Columbia College, and was graduated with honor in 1840. He was then appointed resident surgeon in the New York Hospital, and received his graduating honors from that institution in 1848. Dr. Peters soon acquired a large and lucrative practice, and in 1857, when St. Luke's Hospital was organized, he was appointed assistant surgeon, which position he resigned to accept that of consulting surgeon. He was also president of the medical board and consulting surgeon in the Presbyterian Hospital and the Woman's Hospital, consulting surgeon in the New York Hospital; surgeon in the Episcopal Orphan Asylum, St. Luke's and St. Mary's, and was connected with several other hospitals and dispensaries. He was also trustee of the College of Physicians and Surgeons; an active member of the Yale Alumni Association, and president of the University Club, Williams and Yale colleges conferred on him the degree of M.A. He was a member of the New York Academy of Medicine, the New York County Medical Society; the Pathological Society; the Medical and Surgical Society; and the Century, Union League and University clubs, being president of the last from 1888 to 1891. On April 10, 1849, Dr. Peters was married to Julia, daughter of Geo. Corzill, of New York city. Mrs. Peters died in 1873. His only daughter became the wife of Horace Hatch Chittenden. He died in New York city, Dec. 6, 1894.

POTTER, Henry, jurist, was born in Granville county, N. C., in 1765. He received a liberal education and adopted the profession of the law. In 1801 he was appointed by Pres. Jefferson U. S. judge of the 5th circuit; in 1802 he was made judge of the U. S. district court for the state of North Carolina, which position he held for more than fifty years. He was a trustee of the University of North Carolina from 1799 until his death. Judge Potter was the author of "Duties of a Justice of the Peace" (1816), and was associated with John L. Taylor and Bartlett Yancey in the compilation of a revision of the "Law of the State of North Carolina" (2 vols., 1821). He died at Fayetteville, N. C., Dec. 30, 1857.

Geo. A. Peters

John B. Stallo

THACHER, Thomas Anthony, educator, was born in Hartford, Conn., Jan. 11, 1815, son of Peter and Anne (Parks) Thacher. His father was descended from Thomas Thacher, first pastor of the Old South Church in Boston, and his mother, from Thomas Buckingham, of Saybrook, Conn., one of the founders of Yale College. The son received his early education at the Hopkins Grammar School, Hartford, and was graduated at Yale University with high honors in 1835. During the following three years he taught school in Connecticut and Georgia, becoming, in 1838, tutor of Latin at Yale. After teaching for four years in this capacity he was advanced to the assistant professorship of Latin language and literature (1842), and in the following year was given a leave of absence for travel and study. He made a tour of Germany and Italy, and spent some time in the German capital, carefully observing the methods used in the Gymnasium and University of Berlin, for a while acting as tutor to the Crown Prince Charles of Prussia and his cousin, Prince Frederick Charles. Returning to Yale in 1845, he resumed his duties as assistant professor, and upon the retirement of Dr. James L. Kingsley, in 1851, he became full professor, retaining the office until his death, when he was the oldest member of the faculty in point of continuous service. He was not only a talented and distinguished instructor, but a remarkably successful disciplinarian, maintaining a firm control while

preserving in a wonderful degree the confidence, respect and friendship of the students. His strength of character and honesty of purpose were so widely recognized and appreciated that throughout the many college classes which passed under his influence his name is cherished with the warmest regard. Despite the tax made on his time by his station as professor, he still found opportunity for outside work. He was for a number of years an active member of the Connecticut state board of education, and for forty-eight years served as trustee of the

Hopkins Grammar School of Hartford. A fine scholar, he contributed numerous articles on classical subjects to the "New Englander" and other periodicals, and published the following works in book form: Cicero's "De Officiis" (1850); an adaptation of Mälvig's Latin grammar which was long used in Yale University (18—); and a "Life of Edward C. Herrick" (1862). He was also one of the compilers of "Webster's Dictionary." In a preface to his Latin grammar he very strongly advocated the use of the English pronunciation of the Latin tongue. Prof. Thacher received the degree of LL.D. from Western Reserve University in 1869. He was married at New Haven, Conn., in 1841, to Elizabeth, daughter of Jeremiah Day, president of Yale College. He died at New Haven, April 7, 1886, survived by eight sons and one daughter.

HARTT, Charles Frederick, geologist, was born at Frederickton, New Brunswick, Aug. 23, 1840, son of Jarvis William Hartt. He was educated under the tuition of his father at Horton Academy, Nova Scotia, and at Acadia College, where he was graduated in 1860. While a student he obtained his elemental knowledge of the Portuguese language from an old shoemaker, and in later life lectured in this language to audiences in Rio Janeiro. He also made extensive explorations in Nova Scotia, and while at Wolfville made meteorological observations for the Smithsonian Institution. In 1860 he went to

St. John, New Brunswick, and assisted his father, who had established a high school; but the geology of the region drew him from teaching, and, with G. F. Mathew, of St. John, with whom he had explored the Basin of Minas, he entered upon an examination of the rocks in the vicinity. "To these gentlemen," said Mr. Dawson, "belongs the honor of first rendering intelligible the complicated geology of this district, and of discovering and almost exhausting its rich Devonian flora and fauna. . . . The collection and determination of the fossils of what is now known as the Acadian group, and the excavation of the numerous fossil plants of the Devonians of the same district, constitute in my judgment, two of the most important advances ever made in the paleontology of Eastern America, and are even yet bearing fruit." Shortly after his arrival in St. John he was instrumental in forming the Steinhammer Club, which later became known as the New Brunswick Natural History Society. He contributed freely to its collections and literature, and when Prof. Agassiz invited him to enter the museum of comparative anatomy at Cambridge as a student, the society purchased Mr. Hartt's Devonian collection to aid him in doing so. He was at Cambridge in 1861-64, during vacations continuing his geological investigations; the Cambridge Museum is rich in the minerals of Nova Scotia and New Brunswick contributed by him. He also joined a geological survey of southern New Brunswick for the provincial government, the result of which was published in 1865. In the summer of 1862 Mr. Hartt discovered at the Fern ledges some remains of insects, five species in all, the very oldest known to geologists, which are described by Prof. Scudder in Dawson's "Acadian Geology." Prof. Scudder has since published a complete monograph upon these insects in the Memoirs of the Boston Society of Natural History. In 1865 Mr. Hartt was appointed geologist to the Thayer expedition by Prof. Louis Agassiz, who was himself its leader, for the study of the fresh water fishes of Brazil, much attention being incidentally given to the geology of the country. On his return, in 1866, Mr. Hartt was appointed professor of geology at Vassar College. In 1867 he made a second expedition to Brazil, and, returning in 1868, was professor of geology and physical geography at Cornell University until 1875, in his vacations making excursions to Brazil, exploring chiefly the Amazon river and the East coast provinces. In 1875 he was invited by the Brazilian government to institute the geological commission of Brazil, of which he was the chief until his death. While on the Thayer expedition Prof. Agassiz, after what was necessarily a cursory survey of the surface geology, hastily assumed that the ice sheet of the glacial epoch had extended over the valley of the Amazon, and it was not until after his third exploration and the most minute investigation that Prof. Hartt disproved this theory. He found that no trace of glacial action exists in the valley, and that it abounded in Huronian and carboniferous deposits containing almost the same flora and fauna he had discovered in St. John. His archaeological discoveries were also extensive. He embodied the results of his first and second expeditions in "The Geology and Physical Geography of Brazil." The immense collections made by the commission became a part of the National Museum of Rio Janeiro, Brazil, of which Mr. Hartt was from 1866 until his death the director; they form the most complete and comprehensive exhibit of South American geology yet existent. Prof. Hartt was secretary of the American Association for the Advancement of Science, and a member of other learned bodies. He contributed occasionally to scientific periodicals and memoirs, and published: "Geology and Physical

Geography of Brazil" (1870); "Notes on the Modern Tupi of the Ana" (1872); "Contributions to the Geology and Physical Geography of the Lower Amazon" (1874); "Amazonian Tortoise Myths" (1875); "Notes on the Manufacture of Pottery Among Savage Races" (1875); "Devonian Trilobites and Mollusks of Para, Brazil" (1875); "Descriçao dos Objectos de Pedra de Origem Indigena Con servados no Museu Nacional par Carlos Frederico Hartt" (1876); and "Crustacean Collected on the Coast of Brazil," (1866-75). He died of yellow fever in Rio Janeiro, Brazil, March 18, 1878.

SCHOENEFELD, Henry, composer, was born in Milwaukee, Wis., Oct. 4, 1857, son of Frederick and Theresa Schoenefeld, who came to America from Roda in Saxe-Altenburg (Duchy), Thuringia, in 1854. His musical training was begun by his father when he was seven years of age, and after his tenth year was continued by his brother Theodore, a graduate of the Royal High School of Music in Berlin. He early attained proficiency as a pianist, performing with great success in public, and he also played the violin in a local orchestra. At the age of fifteen he composed a trio for piano, violin and cello, which gave evidence of marked ability. In 1875 he went to Germany, and spent three years studying at the Leipzig Conservatory under Richter, Reinecke, Coccius, Papperitz and Leo Grill. In 1879 he returned to America, and for years served as director of the Germania Maennerchor of Chicago. His most important compositions for orchestra are: "Heroic Fantasy"; "Liberty"; "Gypsy Melodies"; "In the Sunny South"; "Serenade and Intermezzo"; overture, "American Flag"; "Air for G String," and the "Rural Symphony." The latter work was composed for competition, and obtained the \$500 prize offered by the National Conservatory of the United States. The composer conducted the work in person at its first public performance, in the Madison Square Garden of New York by Anton Seidl's orchestra. Other works by Mr. Schoenefeld include: for string orchestra, "Suite Characteristique," a "Reverie," and a "Serenade," for the piano; "Valse Elegante," "Valse Caprice," "Valse Brillante"; gavotte in E minor and G minor, a suite of small pieces called "The Children's Festival," a "Kleine Tanz Suite," a suite entitled "Mystics of the Woods," and a cantata, "Die Drei Indianer." Mr. Schoenefeld's style is thoroughly original, his melodies are full of beauty, and his works are marked throughout by great scholarship and true musical feeling. He was one of the first composers of this country to make use of the characteristic negro folk song, and to establish a real American school of composition. In 1899 he received by unanimous vote the Henri Marteau prize of \$100 for the best original sonata for piano and violin by an American born composer. The jury was composed of the most eminent musicians of Paris. Mr. Schoenefeld is a member of the Manuscript Society of Chicago and the New York Manuscript Society. He was married, in 1885, to Ida, daughter of Julius Bredt, a native of Germany.

BEDINGER, Henry, U. S. minister to Denmark, was born near Shepherdstown, Va., in what is now Jefferson county, W. Va., son of George Michael Bedinger, who was born in Virginia about 1750, and was an early emigrant to Kentucky. He served as an adjutant in the expedition of 1779 against Chillioteh; as major at the battle of Blue Licks in 1782, and rendered valuable services as an Indian spy throughout the revolutionary war. In 1791 he commanded the Winchester battalion of sharpshooters in St. Clair's expedition, and in 1792-93 was a major of U. S. infantry. He was a member of the Kentucky

legislature in 1792, and represented that state in congress from 1803 until 1807. Maj. Bedinger died at Lower Blue Licks, Ky., about 1830. The son received a classical education, and adopted the profession of the law, practicing first at Shepherdstown, and afterward at Charlestown. In 1845 he succeeded his partner and brother in law, Gen. George Rust, to represent Virginia in congress, where he was distinguished by his eloquence as a debater, and was re-elected for the following term. In 1853 he was appointed chargé d'affaires to Denmark, afterward became minister resident, and returned home in the autumn of 1858. During his residence in Denmark he was successful in bringing about the treaty abolishing the sound dues. He died at Shepherdstown, Va., Nov. 26, 1858.

WALES, Philip Skinner, surgeon, was born in Annapolis, Md., Feb. 27, 1837. He was instructed in the preparatory schools of his native city, entered the University of Maryland, and was graduated by the faculty of physics of that institution. He settled in Baltimore, but removed to Washington, where he entered the U. S. navy as assistant surgeon, Aug. 7, 1856, attached to the Naval Academy, steam-frigate Mississippi and steamer Water Witch. He was commissioned full surgeon Oct. 12, 1861, serving in the U. S. naval hospital, Norfolk, on the U. S. steamer Fort Jackson of the north Atlantic and west Gulf squadrons throughout the civil war. He was a member of the board of examiners, 1873-74, and received his commission as medical inspector, June 30, 1873, chief of the bureau of medicine and surgery, Jan. 26, 1880, and medical director of the U. S. navy, October, 1881, in which capacity he served until March 27, 1884. He was on special duty in Washington, 1884-87, and in attendance on Pres. Garfield for a time after he was shot by the assassin Guiteau. His official service as medical director was ended by his suspension from office for five years, by reason of the conduct of clerks in his office who defrauded the government, which led to his court-martial and conviction, but acquitted of real responsibility for the acts of his subordinates. Dr. Wales is a member of various medical societies, and is the author of several works of great value to medical science.

FISK, Harvey, financier, was born in New Haven, Addison co., Vt., April 26, 1831, son of Joel and Charinda (Chapman) Fisk. William Fisk, his first American ancestor, emigrated from England to Wenham, Mass., in 1637, and his son, William, was married to Sarah Kilham, their son, Ebenezer being for twenty years a deacon of the church at Wenham. The latter was married to Elizabeth Fuller, and had a son, Ebenezer (b. 1716; d. 1804), who settled at Shelburne, Mass., and in 1740 was married to Dorcas Tyler. Their son, Moses, who was married in 1789 to Hannah Batchelder, was elected, in 1801, a deacon of the Congregational Church of Waitsfield, Vt.; and his son, the father of Harvey, was for many years a pastor of Congregational and Presbyterian churches in Vermont and New York, serving for two years as a missionary in Canada. Harvey Fisk received his early education in the district schools and from his father, who was a graduate of Middlebury College; studied French in Canada (1844-46); taught that language in Bakersfield (Vt.) Academy (1846-48), and in the latter year became a clerk in a dry-goods store at Trenton, N. J., where he remained for four years. On May 2, 1852, he be-

came assistant receiving teller of the Mechanics' Bank, New York city, and in August, 1853, was made third teller in the Bank of the Commonwealth, in which position he remained for nearly nine years. On March 1, 1862, he formed the banking firm of Fisk & Hatch, which, during the civil war, floated many millions of dollars worth of government bonds, reviving the public credit and confidence beyond all anticipation, and aiding greatly in placing the national finances upon a firm foundation. Acting as special agents of Jay Cooke & Co., Mr. Fisk's firm obtained within one month's time nearly \$170,000,000 for the

U. S. government. It was at his suggestion that Sec. William Windom refunded the five and six per cent. bonds maturing in 1881, by giving the holders the privilege of presenting their bonds to be stamped as extended at three and one-half per cent. In 1865-68 Mr. Fisk's firm successfully negotiated \$27,855,000 worth of government subsidy bonds issued in aid of the Union Pacific and the Central Pacific railroads, and placed \$53,000,000 worth of bonds issued by the Central Pacific company itself, thus securing the success of this

great enterprise. In March, 1885, the partnership of Fisk & Hatch was dissolved, and the firm reorganized under the name of Harvey Fisk & Sons, the new organization entering upon its career with the high reputation given it by the name of its founder, who, in all his financial dealings, was known to protect the interests of his customers even to the extent of personal detriment. Mr. Fisk possessed a character of unremitting benevolence, contributing liberally to the mission boards of the Presbyterian church, assisting to sustain several mission churches, and generously adding to the endowment of Princeton Theological Seminary. He was married, Dec. 13, 1853, to Louisa, daughter of Alexander B. Green, of Trenton, N. J., and had six sons and five daughters. His death occurred at Wilburtha, N. J., Nov. 8, 1890.

DURKEE, Charles, senator, was born at Royalton, Windsor co., Vt., Dec. 5, 1807. He received his education in the local schools and at the Burlington Academy. He engaged in business as a merchant, and later removed to Wisconsin, where he was one of the founders of Southport, now Kenosha. He was a member of the first territorial legislature of Wisconsin in 1837, and again in 1847. As the Free-soil candidate he was a representative in congress in 1849-53 from Wisconsin, being the first distinctive anti-slavery man in that body from the Northwest. He was a U. S. senator for six years, commencing in March, 1855, and during his term of office served as a member of the committees on revolutionary claims and private land claims. In 1861 he was a delegate to the peace congress. In 1865 he was appointed by Pres. Johnson governor of Utah, and held this office until failing health compelled him to resign. He died in Omaha, Neb., Jan. 14, 1870.

EMOTT, James, jurist, was born at Poughkeepsie, N. Y., March 14, 1771. He did not receive a collegiate education, but in 1800 Union College conferred on him the degree of A. M. After studying law and being admitted to the bar he began to practice at Balston Centre. He removed from there to Albany in 1800. He was soon regarded as the peer of the brilliant lawyers of that time. In 1797 he was appointed a commissioner to settle the disputes as to lands in the military tract of Onondaga

county. In 1804 he represented Albany in the legislature. Under the old constitution of New York he was first judge of the court of common pleas for his county in 1817-27, and in that capacity gave the court a rank among the best of the state. He was a representative in congress from his native state from 1809 to 1813, being prominent among the Federalist leaders of that body. In 1814-17 he was a member of the New York assembly, and in 1814 was its speaker. In 1827 he was appointed judge for the 2d district, which station he filled until he resigned in 1831. In 1833 the degree of LL. D. was conferred on him by Columbia College. He died in Poughkeepsie, N. Y., April 7, 1850. His son, James, was an eminent jurist and lawyer, practicing for the last twenty years of his professional life in New York city.

SHIPMAN, William Davis, jurist, was born at Chester, Middlesex co., Conn., Dec. 29, 1818, son of Ansel D. and Elizabeth (Peters) Shipman. His grandfathers, Col. Edward Shipman, of Saybrook, and Maj. Nathan Peters, of Preston, Conn., were both officers in the revolutionary army, and of English descent. He was educated at the district school of Chester, and from his tenth to his seventeenth year worked upon a farm in that place, and then in a manufactory there until he was twenty-four. During the next six years he was engaged in teaching at Springfield, N. J., and during the last three years of that period devoted his leisure time to the study of law. In 1849 he removed to East Haddam, Conn., where he continued his legal studies under Moses Culver, afterwards a judge of the superior court of that state; in 1850 he was admitted to the bar of Middlesex county and began practice, retaining his residence at East Haddam. In 1852 he was elected judge of probate for the district of East Haddam, and at the session of the general assembly of the state, in the spring of 1853, represented that town in the lower house. In July of the same year he was appointed by Pres. Pierce U. S. attorney for the district of Connecticut, and was reappointed in 1856, meantime (1854) having removed to Hartford. He held that office continuously until the spring of 1860, when he was appointed U. S. district judge for the district of Connecticut, and held the office for thirteen years.

During a large part of this time he held the regular terms of the circuit court in the city of New York, and occasionally sat in the northern district of New York and in Vermont, in addition to performing the duties of his own district of Connecticut. His written opinions delivered in that tribunal are published in Blatchford's "Reports" (vols. 4-10), and were occasionally quoted in the London "Law Times." He resigned this office in May, 1873; then became senior member of the law firm of Barlow, Larocque & MacFarland, of New York city. In 1877 he removed to New York city, and continued to be a member of that firm and its successors until 1896, when he retired from practice. For several years, while U. S. district judge, he delivered a course of lectures on constitutional law at Trinity College, Hartford, which conferred upon him the honorary degrees of M. A. and LL. D. Judge Shipman was married, in 1847, to Sarah Elizabeth, daughter of John Richards, of Springfield, N. J. Of their seven children five survive. He died at Astoria, N. Y., Sept. 24, 1898.

John A. Shipman

COOLEY, Le Roy Clark, educator, was born at Point Peninsula, Jefferson co., N. Y., Oct. 7, 1833, son of James and Sally (Clark) Cooley. He was graduated at the State Normal College, Albany, N. Y., in 1855, and at Union College in 1858. He taught mathematics in Fairfield Seminary, Fairfield, N. Y., 1858-60, and natural science in Cooperstown Seminary, 1860-61. For thirteen years following he was professor of natural science in the New York State Normal College. In 1871 he was called to the chair of physics and chemistry in Vassar College. In 1893, when it became necessary to divide the department, he relinquished the chemistry and assumed the chair of physics, which he still (1901) holds. He received from Union University the degrees of A.M. in 1861 and Ph.D. in 1870. He has contributed educational and scientific papers to various journals and societies, and devised several forms of apparatus to facilitate laboratory work in both physics and chemistry. In 1868 he described his "electric register" by which piano wires and tuning forks write a record of their vibrations; this was the first successful application of electricity to the purpose of recording swift periodic impulses in permanent characters. He is the author of a series of text-books on physics and chemistry which, with their revisions, have been extensively used in secondary schools ever since their first publication in 1868-72. Early in life he became an ardent and persistent advocate of science as an agent in education. Dr. Cooley is a fellow of the American Association for the Advancement of Science, a member of the American Physical Society and of the New York State Science Teachers' Association. Of this last named society he was president in 1899. On March 30, 1859, he was married to Rosabella Maria Flaek, a granddaughter of Roger Campbell, who was a grandson of Archibald, the first duke of Argyll.

GORDON, Adoniram Judson, clergyman, was born at New Hampton, Bellnap co., N. H., April 19, 1836, son of John Calvin and Sally (Robinson) Gordon. At the age of sixteen he united with the church in his native town and soon after entered a preparatory school with the object of preparing for the ministry. He was graduated at Brown University in 1860, and then entered Newton Theological Seminary, where he was graduated in 1863. Before the completion of his studies he had preached in the Baptist church at Jamaica Plain, and in June, 1863, on his ordination, he became its settled pastor. Here he remained for six years, during which period the congregation increased steadily and many additions to the church were made. In 1869 he accepted a call to the Clarendon Street Baptist Church, which became one of the strong centers of spiritual and philanthropic work. Revival after revival occurred and it was in that building that the inquirers' meetings were held in connection with Dwight L.

Moody's labors at the Tabernacle. Dr. Gordon established a school for training missionaries for home and foreign work and for training pastors' assistants. Dr. Gordon was a deep thinker and a close student of prophecy. For some time he edited the "Watchword," a monthly devoted to biblical exposition. He wrote "In Christ" (1872); "Congregational Worship" (1872); "Grace and Glory" (1880); "Ministry of Healing" (1882); "The Twofold Life" (1884); "Ere Christ" (1890); "Ministry of the Spirit" (1894); "How 'Verist' Came to Church" (1895), and was one of the compilers of the hymn-

book "Service of Song" and "Coronation Hymnal." His preaching was free from dogmatism or offensive allusions to those whose opinions differed from his, and his writings were characterized by the same spirit. Dr. Gordon was married at Providence, in 1863, to Maria, daughter of Isaac and Harriet Hale, who bore him three sons and five daughters. He died in Boston, Mass., Feb. 2, 1895.

DAWSON, William C., U. S. senator, was born in Greene county, Ga., Jan. 1, 1798, a descendant of the early settlers of that county. He was graduated at Franklin Academy in 1816, and began the study of law, which was completed at Litchfield, Conn. He was admitted to the bar in 1818, and settled at Greensborough, Ga. In 1819 he became clerk of the Georgia house of representatives, and held the position for twelve years. He was twice a delegate to the convention to amend the constitution; was several times senator and representative in the state legislature; in 1837 was elected a representative to the U. S. congress, and was twice re-elected, serving until 1842, and acting as chairman of the military and the committee on claims. In 1841 the Whig party nominated him for governor of Georgia, but having voted in congress to tax tea and coffee he lost popularity, and was defeated, upon which he resigned his congressional seat. In 1845 he was appointed judge of the Ockmulgee circuit. In 1849 he became a U. S. senator, and served on important committees until 1855. During his senatorial term he commanded a wide influence and delivered many speeches on subjects of national interest. He published "The Laws of Georgia" (1831). His death occurred at Greensborough, Ga., May 5, 1856.

CONTEE, Benjamin, jurist and clergyman, was born in Prince George's county, Md., in 1755. In June, 1776, he was commissioned second lieutenant in the 3d battalion of the Continental army, and served through the revolutionary war. Subsequently he traveled in France, England and Spain. After his return he was a delegate to the Continental congress, in 1787, and a representative to the 1st constitutional congress from Maryland, from 1789 to 1791, where he was one of those who voted for locating the seat of government on the Potomac. After he retired from congress he was appointed judge of the orphans' court of Charles county. In 1803 he was ordained by Bishop Claggett as a clergyman of the Protestant Episcopal church and took charge of the parish of William and Mary in Charles county. In 1808 Trinity parish was placed under him, and in 1811 St. Paul's Church in Prince George's county was added. He was for many years a member of the standing committee, and in 1814 came within a few votes of being elected bishop of the diocese. At the time of his death he was chief judge of the orphans' court of Charles county. He died in Charles county, Nov. 3, 1815.

TILT, Albert, manufacturer, was born in Boston, Mass., April 29, 1841, son of Benjamin B. and Adelaide M. Tilt. His father emigrated from Coventry, England, in 1835, and settled in Boston, establishing the firm of Tilt & Donell, manufacturers of silk. In 1860 he removed to Paterson, N. J., where he established a similar business, and being a practical and skilled workman, became one of the pioneers in that industry. The son, after attending the public schools of Boston, entered the employ of Dexter & Lambert, manufacturers, but he soon removed to Paterson. He served a thorough apprenticeship

W. C. Dawson

A. J. Gordon

under his father, who had established the Phoenix Silk Manufacturing Co.; was admitted to the firm in 1862, and upon the death of his father, in 1879, succeeded him as president and general manager of the company. He thoroughly mastered every detail and soon acquired a reputation for such distinguishing traits of character as keen judgment, resolution in seizing opportunities for business advancement and great foresight. He was enterprising and courageous, and it was often said of him that his word once given was a guarantee of good faith in the execution. His relations with his employees were always pleasant, being characterized by perfect justice and the highest consideration for the rights of others. Upon the organization of the Silk Association of America, in 1872, Mr. Tilt became a director and remained as such until his death. He served as vice-president of the association in 1888, and was elected president in 1898. He was a member of the Metropolitan, Riding and Driving, Army and Navy, Republican, Suburban, Lotus and New York Athletic clubs in New York city, and a member of the Hamilton Club in Paterson, N. J. He was married, in 1874, to Adelaide V., daughter of William H. Raynor, of New

Charles Stewart

York city, who survives him with three sons and one daughter. Two sons, Benjamin B. and Albert, succeeded him in the management of his great silk industries, embracing mills at Paterson, N. J., and at Allentown and Pottsville, Pa. He died at his home in New York city, May 2, 1900.

McCAULEY, Charles Stewart, naval officer, was born in Philadelphia, Pa., Feb. 3, 1793, a nephew of Admiral Charles Stewart. He was appointed a midshipman Jan. 16, 1809, and served on the "Constellation" in 1813. He was promoted lieutenant Dec. 9, 1814; commander, March 3, 1831; captain, Dec. 9, 1839. He participated in the attack of the gunboats on the British ship *Narcissus* in Hampton Roads and served on Lake Ontario in 1814. He commanded a merchant vessel during leave of absence in 1823-25; served four years in the south Atlantic squadron, and in 1855 was placed in command of the home squadron. Being in charge of the Norfolk navy yard at the opening of the civil war, he destroyed the property there to prevent its falling into the hands of the Confederates. He was sent in command of a fleet by Pres. Pierce to the island of Cuba to protect the interests of Americans. He was placed on the retired list Dec. 21, 1861, and appointed commodore on the retired list, April 1, 1867. He died in Washington, May 21, 1869.

HOOPER, Johnson J., lawyer and journalist, was born at Wilmington, N. C., June 9, 1815, son of Archibald MacLaine and Marie (De Berniere) Hooper, and a grandson of George Hooper, of Wilmington, who was a nephew of William Hooper, the distinguished revolutionary patriot and signer of the Declaration of Independence. Johnson received a classical education, but did not attend college, and at the age of fifteen became a writer for the city press of Charleston, S. C. In 1840 he went to Lafayette, Chambers county, and studied law in the office of his brother, George D. Hooper, a well-known lawyer of the state. He then assumed the editorial control of the *Daleville "Banner,"* where his humorous articles attracted much attention. In 1849 he was elected solicitor of the ninth circuit and

held the office for four years, being defeated at the next election. In 1852 he established and edited the Montgomery "Mail," at that time the organ of the Whig party, of which he was a prominent member. In 1860 the "Mail" supported Mr. Breckinridge and took an extreme southern part in the questions at issue between the North and the South. In 1861 Mr. Hooper was elected secretary of the provisional congress of the southern states, which met at Montgomery, and accompanied that body to Richmond, Va., where he held office until the senate and congress were organized at Richmond after the Confederate government was established under the constitution. He was married to a daughter of the Hon. Greene D. Brantley, of Chambers county, and left several children. Mr. Hooper had a strong humorous bent, and acquired much reputation by his writings, especially by his book, "Simon Stugs" (1840), which was very popular. As a writer he was ready, lucid and captivating; forcible when grave, and irresistible when humorous. He was, too, a scholar and a man of thought. He also published "Widow Rugby's Husband, and Other Tales of Alabama" (1851). He died in Richmond, Va., June 6, 1862.

KILBOURNE, Edward Corliss, promoter, was born at St. Johnsbury, Vt., Jan. 13, 1856, son of Everett Horatio and Frances Arabella (Stone) Kilbourne. He removed with his parents to Aurora, Ill., in 1858, where he was educated in the public schools, and after studying dentistry with his father, completed his studies in Chicago and New York. He then entered into partnership with his father at Aurora, where he practiced his profession for several years. In 1883 he removed to Seattle, Wash., and eventually acquired a large practice. Learning that there was no law regulating the practice of dentistry in Washington, he helped organize the first dental society, and secured the passage of a bill by the legislature. This society developed into the state association of to-day. As a member of the Seattle rifles he took an active part in subduing the Chinese riots in that city in 1884. In 1888 he abandoned his dental practice to enter the real estate and electric railway

E. C. Kilbourne

business and organized many enterprises that helped to build up Seattle during its period of wonderful growth from 1887 to 1893. He hid out Fremont, Seattle's principal suburb, and was one of the builders of the Fremont mill and the bridge around Lake Union known as the Fremont boulevard, and also the Latona bridge. In 1888, with others, he organized the Seattle Electric Railway Co., which, with its trunk line on Second avenue and four branches, to Fremont, Lake Union, Queen Anne and Cedar street, about fourteen miles of single track, cost with equipment and power house, about \$450,000. This was the first successful electric railway on the Pacific coast. In 1889, with Judge William D. Wood, he built the Green Lake Electric railway from Fremont to and around Green lake. In 1890 he sold out his electric railway interests and entered the electric lighting and power business, organizing the Pacific Electric Co., which the same year absorbed the Commercial Light Co., forming the Home Electric Co. This in turn united in 1892 with the Seattle General Electric Co., to form the Union Electric Co., with a capital stock of \$1,000,000, Mr. Kilbourne being president and manager. For

eight years he retained the active management of this company, which soon controlled nearly all the electric lighting and motor business in the city, with plants that cost \$860,000. In 1900 the Union Electric consolidated with the Seattle Steam Heat and Power Co. and eight principal electric and cable street railway systems to form the Seattle Electric Co., with a capital of \$5,500,000. Dr. Kilbourne is now (1901) manager of the lighting and power department of the consolidated company. He was married, June 23, 1885, to Leilla A., daughter of Oliver C. and Mary E. Shorey, pioneer settlers of Washington.

RAND, Jasper Raymond, manufacturer, was born at Westfield, Hampden co., Mass., Oct. 18, 1837, son of Jasper Raymond and Lucy (Whipple) Rand, of distinguished English descent. His father, a prominent whip manufacturer, was a member of the state legislature, and a postmaster during Pres. Lincoln's administration. His grandfather, Jasper Rand, was a revolutionary soldier and fought in the battle of Bunker hill. Their earliest American ancestor was Robert Rand, who came from England in 1635 and settled at Cambridge, Mass. A maternal ancestor, Samuel Symonds, settled, in 1637, at Ipswich, Mass. where he was magistrate for thirty years, and for five years deputy governor of the Massachusetts bay colony under Gov. Leverett. Another ancestor was Maj. John Mason, who was the leader of the attack on Mystic fort in May, 1637, when the Pequots were nearly destroyed. In 1660 he was elected deputy-governor of Connecticut. He died in 1672, having been major-general of the colonial forces for over thirty years and a magistrate for twenty-four. Mr. Rand was educated at the Westfield Academy and at Middlebury, Mass., and Fairfax, Vt., schools, subsequently studying law for a time; but preferring a business career he finally joined his father in the manufacture of whips. Upon his father's retirement he and a younger brother, Addison C., carried on the industry, conducting the affairs of their New York city office at the same time. In 1872 Addison C. Rand began the

manufacture of rock drills, and the two brothers later organized the Rand Drill Co., with Addison C. as president, and Jasper Raymond as treasurer, this arrangement continuing until the death of the former, when the latter was elected president. He was also president of the Rendreck Powder Co. In 1873 Mr. Rand removed to Montclair, N. J., where he served for three years on the town council, and was a freeholder of Essex county for two years. He assisted in organizing the Bank of Montclair, of which he was continuously the president; for fifteen years he was

a trustee of the Congregational Church. He was also a member of the following clubs, the Montclair, of Montclair, N. J.; Hardware and Engineers' clubs, of New York city; Town and Gown Club, Ithaca, N. Y.; American Institute of Mining Engineers, and of the New England Society. For forty years, he was a member of the Mt. Moriah Masonic lodge, of Westfield, Mass. He was married, Oct. 11, 1860, to Annie M., daughter of Peter Valentine, of Hempstead, N. Y., also of colonial and revolutionary ancestry. They had five children, Florence Osgood, Albert Holland, Josephine Freeman, Annie Grace

and Jasper Raymond Rand. Mr. Rand died at Montclair, N. J., July 18, 1900.

RAND, Addison Crittenden, manufacturer, was born at Westfield, Hampden co., Mass., Sept. 17, 1841, son of Jasper Raymond and Lucy (Whipple) Rand. He was educated in Westfield, where his father, who was also prominent in Massachusetts public life, was a whip manufacturer, and in this industry he obtained his mechanical training. During the civil war he was acting Federal postmaster at Newbern, N. C. In 1871 he removed permanently to New York city, making rock drills and air com-

pressing machinery the objects of his especial attention, and with his brother, Jasper Raymond, organizing the Rand Drill Co., of which he became president. He quickly perceived the possibility of adapting compressed air to new uses and devoted himself to the perfecting of air compressing machinery. Civil engineering is greatly indebted to his efforts for the employment of rock drills in tunnels and aqueducts, and in mining it has made many otherwise unfeasible enterprises possible from an economic standpoint. The Rand drills were used in excavating the Haverstraw, Westhewken, West Point and other important railroad tunnels, and in constructing the Washington and New York city aqueducts, while they have been potential factors in many more modern mining operations. Their manufactures are shipped to every country on the globe. Mr. Rand was the manufacturer of the explosive, known as rock a rock, by means of which the obstructions to navigation at Hell Gate were removed in 1885. He was secretary and treasurer of the Rendreck Powder Co.; treasurer and director of the Davis Calyz Drill Co., director of the Ninth National Bank; the Latin and Rand Powder Co., and president of the Pneumatic Engineering Co. When the Engineers' Club of New York city was organized he was one of its incorporators and the treasurer from the first, laboring for its success at a time when success seemed doubtful. He was a member of the following associations, The Union League, Hardware and Colonial clubs of New York city; Montclair Club, Montclair, N. J.; American Institute of Mining Engineers; Chamber of Commerce; American Society of Civil Engineers, American Society of Mechanical Engineers, and a director of the New England society. Mr. Rand died unmarried in New York city, March 9, 1900.

CALDWELL, Charles Henry Bromedde, naval officer, was born at Hingham, Mass., June 11, 1823. He entered the navy as midshipman Feb. 24, 1838, and gained promotion according to the regular routine of the service, becoming lieutenant Sept. 4, 1852. In 1858, while on board the U. S. steamer *Vandalia*, cruising in the southern Pacific, he commanded a detachment of sailors and marines sent on shore at Wega, one of the Fiji islands, to punish a tribe of cannibals who had killed and eaten a missionary and a naturalist. This he did effectually, defeating them in battle and burning their villages. He was ordered to the United States on the outbreak of the civil war, and attached to the U. S. steamer *Keystone* State as executive officer. In 1862 he was in command of the gunboat *Itasca*, and attached to Farragut's fleet in its passage up the Mississippi river and past forts Jackson and St. Philip. This gunboat with the *Pinola* was directed to remove the obstructions from the channel in order to make a

Addison Crittenden Rand

Jasper Raymond Rand

passage for the fleet. The Confederates had stretched a chain across the river, supported at intervals by hulks. Lieut. Caldwell, in the face of a heavy fire from the forts, lashed the Itasca to a hulk and cut the chain. This accomplished the passage was free, but the current carried the Itasca to the shore, and she ran aground in full sight of the guns of the fort. She remained in this peril for half an hour before the crew succeeded in getting her afloat, when she joined the fleet. On the night of the 23d of April Lieut. Caldwell went up the river again in a boat furnished by the flagship Hartford to see if the passage was

W. D. Caldwell

still clear, so the fleet could pass up. He found this to be the case, and just before midnight hoisted the signal agreed upon to this effect. It was daylight when the Itasca reached the forts, and she was struck fourteen times and completely riddled, one shot penetrating her boiler, filling the hold with steam and forcing the men to the deck. Thus disabled Lieut. Caldwell reluctantly dropped with the current down the river, and the other vessels of the fleet passed the fort in safety. In the action at Grand Gulf, June 9, 1862, Lieut. Caldwell took an active part. He was promoted to commander July 16, 1862, and was in charge of the iron-clad Essex, of the Mississippi squadron. At Port

Hudson he commanded the entire mortar flotilla, making the Essex the flagship, and picked up and destroyed several torpedoes planted by the enemy. In 1863-64 he commanded the steamer Glaucus, of the north Atlantic squadron; in 1864-65 the R. R. Cuyler. On the Glaucus he conveyed Pres. Murillo to the United States of Colombia. He was made captain Dec. 12, 1867, and commodore June 14, 1874. During 1876 he was acting rear-admiral in command of the south Pacific fleet, and in 1877 acting rear-admiral in command of the south Atlantic fleet. He died Nov. 30, 1877, and was buried with military honors at Waltham, Mass.

KIRCHHOFF, Theodor, author, was born at Uetersen, Holstein, Germany, Jan. 8, 1828. His father was an attorney-at-law, and at various times held high official positions, such as that of mayor of Kiel, deputy of the Schleswig-Holstein diet, and a member of the Danish parliament. His mother died when he was very young. The family circle and his environment, however, favored the development of his abilities, and Theodor early discovered a taste for poetry and the fine arts. He attended the gymnasium of Lübeck, and upon passing the final examination entered, in 1847, the Polytechnical School of Hanover, which he soon left to join the volunteers at the outbreak of the Schleswig-Holstein war. As a lieutenant in the Schleswig-Holstein army he participated in all the principal engagements. When the war was ended, in 1848, he came to the United States, and after living for a time in St. Louis and Davenport, he traveled as a journeyman photographer through the Mississippi valley until 1854, when a fire in Holmesville destroyed all his property. Together with a friend he then established a place of amusement at Osyka, Miss., which he kept for five years. In 1859 he went to Clarksville, Tex., and as a merchant acquired a considerable fortune. Ruined by the civil war, he returned to Germany in 1862, visiting his brother at Altona, and his father at Kiel, also traveling through England, Scotland, Italy, and Switzerland. In the following year he returned to the United States, and after a journey from New York to San Francisco, by way of Panama, settled in The Dalles, Ore., where he established a

successful business. There he wrote his first sketches for the "Gartenlaube." At the close of the civil war he went to New Orleans, and remained in the South until 1867, when he began two years of travel, visiting the gold mines in Idaho and Oregon. In 1869 he permanently settled in San Francisco, where, with his former partner, he opened a wholesale jewelry store. About 1888 he retired from business, and afterward devoted himself exclusively to literature. During the years 1883 and 1889 he again visited Europe, traveling in Germany, England and Italy. The winter of 1888 he spent in the Sandwich islands. Theodor Kirchhoff was an extremely prolific writer; as a lyrical poet he stands perhaps pre-eminent among German-American authors. Dr. Gustav Brühl, another German-American writer calls him the "Poet of the Golden Gate," and characterizes his lyrical productions as "pearls plucked up on the Pacific coast, grains of gold collected in the sand of mountain brooks, and southern fruits plucked from the blooming trees of the tropics." His last epical poem, "Thermann" (1898). Prof. M. D. Learned rightly designates as his "swan song bequeathed to his old fatherland beyond the sea, and to his new adopted country." His published works are: "Lieder des Krieger und der Liebe" (1864); "Adelpha" (1869-71), poems composed in conjunction with his brother, Christian; "Reisebilder und Skizzen aus Amerika" (1875-76); "Balladen und neue Gedichte" (1883); "Californische Cultur-bilder" (1886); and "Eine Reise nach Hawaii" (1890). He also contributed a large number of articles, sketches, treatises and poems to various German-American periodicals. He died in San Francisco, March 2, 1899.

CALVERT, John Betts, clergyman and journalist, was born at Preble, Cortland co., N. Y., Aug. 29, 1852, only son of James Alexander and Olive Adaline (Betts) Calvert. His preliminary education was received at the Cortland Academy, Homer, N. Y., the "Old Academy" at Cortland, and at the Rochester Collegiate Institute, receiving from the last on graduation the gold medal for oratory. In 1871-72 he was principal of the High School at McLean, N. Y. He was graduated at the University of Rochester in 1876, and at the Union Theological Seminary, New York city, in 1879. He was for seven years corresponding secretary of the Baptist missionary convention, a society which was formed in 1807, and from 1881 to 1887 was assistant pastor of the Calvary Baptist Church, New York city. He was licensed to preach March 20, 1875, and was ordained Oct. 19, 1880. Upon resigning the secretaryship of the state missionary convention, in 1886,

John B. Calvert

he was unanimously chosen president of the convention, a position which he still holds (1901). Having contributed frequently to the "Examiner," "Zion's Advocate" and the "Standard," his tastes finally led him into journalism, and in February, 1888, he purchased the "Baptist Weekly," and changed the name to the "Christian Inquirer." He was editor of the paper and president of the publishing company for seven years. In March, 1895, the "Christian Inquirer" was consolidated with the "Examiner," and Dr. Calvert became a stockholder of the Examiner Co. and one of

the editors of the "Examiner." He is deeply interested in the cause of education, and is a trustee of the University of Rochester and of Cook Academy. Shortliff College gave him the degree of D.D. in 1891. In connection with Edwin X. Bedell he compiled the "Church Hymnary," for use in Baptist churches. He was married, Dec. 10, 1885, to Mary Dows, daughter of John Dows Mairs, of New York city.

ADE, George, author and journalist, was born at Kentland, Newton co., Ind., Feb. 9, 1836, son of John and Adaline (Bush) Ade. He was graduated at Purdue University, Lafayette, Ind., in 1857, with the degree of B.S., and subsequently became reporter and telegraph editor on the Lafayette "Evening Call." From there he went in 1891 to Chicago, where he was employed as a reporter on the morning issue of the Chicago "Daily News," now known as the Chicago "Record." He is still engaged in general and special work on the staff of the "Record." Mr. Ade is widely known as the author of many humorous sketches, which have appeared in newspapers, and which have been afterward written and published in book form. The common sense as well as the fun contained in these volumes appeals to a very large public, and quickly brought their author into favorable notice. In a picturesque dialect he writes of every-day life, which he sees from an individual point of view, and renders with a delightful freshness of observation. His published works are: "Artie" (1896); "Pink Marsh" (1897); "Doc Horne" (1898); "Fables in Slang" (1899), and "More Fables" (1900).

CHURCH, Sanford Elias, jurist, was born at Milford, Otsego co., N. Y., April 18, 1815, son of Ozias and Pernelia (Sanford) Church. His father removed to Munroe county in 1817, where the son grew to manhood. His early education was received at the Henrietta Academy, and during the winter months he taught school, pursuing the study of law in the office of Josiah A. Eastman, at Scottsville, N. Y. In 1834, removing to South Barre, he entered the employ of the county clerk, under whom he studied medicine for a time, but turned again to the profession of law. About a year later he was

Sanford E. Church

admitted to practice in the court of common pleas, and, entering the office of Judge Bessac, he still further enlarged his legal horizon, and was admitted to the bar of the supreme court in 1841. He then became the partner of his former instructor. In 1844 he allied himself with Noah Davis, and when Mr. Davis was appointed judge of the supreme court in 1858 a partnership was formed with John G. Sawyer. In 1865 he formed the firm of Church, Munzer & Cook, of Rochester, N. Y. He was active in politics during the early part of his career, being elected to the assembly in 1841, and receiving the appointment of district-attorney in 1846, to which office he was elected under the new constitution, for a term of three years, in the fall of the same year. He was elected lieutenant governor in 1850, and served until 1855. Two years later he was elected comptroller of the state, and in 1867 was sent as a member at large to the constitutional convention of that year. Upon the organization of the new court of appeals, in 1870, he became the Democratic candidate for chief-justice, and in the following election received a majority of 87,000 votes over his opponent, Judge Selden, thus eclipsing all previous records

in New York state. Politically he was of the same school as William L. Marcy and Silas Wright, and judicially his opinions, though not brilliant, were distinguished for their solidity. His manner to attorneys was alike courteous to humble and eminent. He was married at Barre Center, N. Y., 1840, to Ann, daughter of David and Abigail Wild, and had two children. He died at Abion, N. Y., May 14, 1889, four years from the end of his term as chief justice.

FINLEY, Martha, author, was born at Chillisno, O., April 26, 1828, daughter of Dr. James Brown and Maria Theresa Brown Finley. The first Finleys in America, staunch Presbyterians, went from county Armagh, Ireland, to Pennsylvania in 1731, and arrived in Philadelphia Sept. 28th. There were seven sons, John, Miss Finley's direct ancestor, being the eldest. John's son, Maj. Samuel, served with distinction in the revolutionary war, was taken prisoner at the surrender of Fort Mifflin in 1777, but was exchanged and fought at Coupens, Washington made him collector of public monies for the northern territory, and in consequence he became one of the early settlers of Ohio, again he served in the army in 1812, in command of the artillery at Detroit, and had as lieutenant his

Martha Finley

eldest son, James Brown Finley. Miss Finley's father and mother were cousins, the latter being the daughter of James Brown, a descendant of John Brown, the covenanter, shot by Claverhouse, Eleanor Butler, who was married to James Brown, was the daughter of Thomas Butler, a descendant of the duke of Ormond. He came to America in 1748, and his five sons fought in the revolution, two of them on Washington's staff. When Martha Finley was eight years of age her father removed to South Bend, Ind., which was her home, one year excepted, until she was in her twenty-fifth year. She then—her father having died—removed to New York state, and subsequently to Pennsylvania. For several years, beginning in 1854, she wrote short stories for the serials of the Presbyterian Publication Board. In 1861, while teaching at Phoenixville, Pa., Miss Finley wrote "Elsie Dinsmore," a book for children, under the pseudonym of Martha Farquharson, and this gave her fame. The book is, perhaps, the most popular work for children ever published, and is in greater demand now than when it first appeared. There is a constant call for a new "Elsie book," and there are now twenty-five in the series. These, with the "Mildred Series" and the "Finley Series" (for adults) of seven volumes each, and many Sunday-school books, including the "Dog-Good Library" (9 vols.), and the "Pewitt's Nest Series" (12 vols.), make more than 100 volumes from her pen. Since 1876 she has resided at Elkton, Md.

CARTER, David Kellogg, jurist, was born in Rochester, N. Y., June 22, 1812. Choosing the profession of law, he was admitted to the bar, and began to practice at Massillon, O. In 1849 he was elected by the Democratic party as a representative in congress, from Ohio, and served until 1853. In 1861 he was appointed, by Pres. Lincoln, minister to Bolivia, and remained there for about a year. In 1863 he was appointed chief-justice of the supreme court of the District of Columbia. He died in Washington, D. C., April 16, 1887.

MARSH, Charles Wesley, inventor, was born near Coburg, Canada, March 22, 1834, son of Samuel and Tamar (Richardson) Marsh. He is descended from William Marsh, who emigrated from England to Connecticut about 1650, and whose grandson, William, removed to Canada. Charles received his early education at St. Andrew's School and Victoria College, then located at Coburg. In 1849 the family removed to Illinois, settling on a farm, and there Charles and his brother, William W., together invented a harvesting machine, which was originally patented Aug. 17, 1858, and subsequently improved,

being sufficiently perfected for the market in 1863. The Marsh harvester, which was revolutionary in its nature, was the original of that class of machines which carry automatic binders. As the grain was cut it fell upon a revolving apron-carrier, which bore it in a continuous stream to the side, and delivered it to an elevating apron, which in turn delivered it into a receiver, whence it was taken alternately by two manual binders standing and riding on the machine. In this way

two men could bind more grain than four men upon the ground. In 1863 a firm was organized at Plano, Ill., consisting of the Marsh brothers and Lewis and George Steward, for the manufacture and sale of the new machines, and some years later the firm was succeeded by that of Gammon & Deering. Improvements were patented Jan. 5, 1864; Feb. 14, 1865, and Nov. 12, 1867, and its perfection may be said to have been reached when William Deering applied the Appleby twine binder in 1878. In 1885 the "Farm Implement News," a Chicago trade paper, representing the implement and vehicle industries, was founded with Mr. Marsh as its editor, and this position he has held with eminent success up to the present time (1901). Mr. Marsh was elected to the Illinois house of representatives in 1868 and to the state senate in 1870. In 1873 he was appointed a trustee of the Illinois Northern Hospital for the Insane, at Elgin, Ill., held the position without interruption until 1893, and on May 1, 1901, was reappointed to the position by Gov. Yates. On Jan. 1, 1869, he was married to Frances, daughter of William W. Wait. She died May 12, 1869, leaving three children, and he was married the second time, Jan. 10, 1881, to Sue, daughter of Joel and Mary Rogers.

APPLEBY, John Francis, inventor, was born at Westmoreland, Oneida co., N. Y., May 23, 1840, son of James and Jane Appleby, natives of England. In 1845 his parents removed to Walworth county, Wis., where the son was brought up on a farm, receiving his education at the district schools. His tastes were more mechanical than agricultural, and in 1857, while engaged on a farm in Iowa county, he conceived the invention of an automatic grain binder, on which he began his experiments during the following winter. He soon devised a mechanism for knotting the twine, and this original device, which was shown at the Paris exposition of 1900, became the prototype of the Appleby knoter that now ties nine-tenths of the machine-bound grain of the world. Being without resources, he was obliged to discontinue his experiments, but still kept his invention in mind for several years, while working as a farm hand. He en-

listed as a private in the 23d Wisconsin infantry, and while in the ditches before Vicksburg, in 1863, made a wooden model of a magazine for a repeating firearm, on which he received a patent, Dec. 20, 1864. This he sold at the close of the war, for \$500, which enabled him to renew work on his binder. Turning his attention to a binding mechanism using wire instead of twine, he built so successful a machine that William Thompson, of Mazomanie, Wis., advanced the necessary funds, and a patent was secured June 1, 1869. In 1872 he interested the firm of Parker & Stone, of Beloit, Wis., and built in their factory a wire-binding machine which met every requirement; but farmers feared the wire would kill their stock, and the enterprise was ruined. Purchasing an interest in the Webber Reaper Works of Rockton, Ill., in 1873, he retained the connection for nearly a year, but in 1874 built a self-rake reaper, organized the Appleby Reaper Works, and manufactured these machines at Mazomanie, Wis. During the winter of 1874-75 he renewed experiments with the twine-binding mechanism at the factory of Parker & Stone, applying it to the Marsh harvester; and in the following winter rebuilt the entire machine, which bound its bundles with entire satisfaction. He applied for a patent on this perfected machine Feb. 27, 1877, the papers being issued two years later, on Feb. 18th; while on the knotting device a patent was granted July 8, 1878. In the winter of the latter year the firm of Gammon & Deering, which had been using a wire-binder on the Marsh harvester, began the manufacture of Mr. Appleby's twine-binders on a large scale. "To William Deering," Mr. Appleby has said, "belongs the credit of forcing my binder upon the market with sufficient energy to convince the farmer of its practicability. His demonstration of the practicability of the invention soon led other manufacturers to adopt it." Mr. Appleby has taken out patents on almost every feature of the harvester, though none of them possesses the revolutionary character of the twine-binder. He was married at Mazomanie, Wis., in 1867, and has two sons and a daughter.

DEERING, William, manufacturer, was born at South Paris, Oxford co., Me., April 25, 1826, son of James and Eliza (Moore) Deering. His ancestors emigrated from England to Massachusetts in 1634, from which time the name is frequently and honorably mentioned in the histories of New England. He was educated in the common schools, and at the Maine Wesleyan Seminary, Readfield. Returning to his native town, he was employed by the South Paris Wooden Manufacturing Co., and in 1849 was made manager of the mill. He then opened a country store in South Paris; but in 1861 removed to Portland, where he made clothing for the Federal army, and in 1865 founded the firm of Deering, Milliken & Co, whose business quickly extended to Boston and New York city. In 1870 he disposed of his interest; and, on going to Illinois, formed the firm of Gammon & Deering, for the manufacture of reapers at Plano. The Rev. E. H. Gammon was a friend of Mr. Deering, who had removed to Illinois for his health, and had already taken up the manufacture of reapers, and had an interest in the patents of the Marsh harvester, which was working a revolution in the gathering of grain. He, how-

Charles Wesley Marsh

William Deering

ever, retired in 1878, Mr. Deering becoming the sole proprietor of the Marsh patents and of the factory at Plano. Wire-binding reapers had been placed on the market in 1871, and in 1875 large numbers were sold; but Mr. Deering, not being satisfied with this method, examined the Appleby twine-binder, and engaged the inventor to perfect the mechanism and adapt it to the Marsh harvester. Many machines thus fitted were sold for the harvest of 1879, and in 1880 3,000 were made. After many futile experiments, a perfect binding twine was produced in 1880, and his attention was then directed to a steel machine fitted with anti friction bearings, which was perfected in 1892. An automobile mowing machine was first practically operated in 1891, and was exhibited by him at Paris in 1900. He was made an officer of the Legion of Honor, and received an official certificate of honor, the grand prize, six gold medals, six silver medals and eleven bronze medals, including the Deering collaborator medals. The Deering Harvester Co. was organized under copartnership article in 1880, with Mr. Deering as president; and his two sons were admitted to the firm. Though never seeking political office, Mr. Deering served in the council of Govs. Perham and Chamberlain of Maine. He is a liberal subscriber to public and private charities, and to many of Chicago's institutions, besides serving as president of the board of trustees of the Northwestern University, and of the Garrett Biblical Institute. He was married at South Paris, Oct. 31, 1849, to Abby, daughter of Charles and Joanna Cobb Barbour. She died in 1856, leaving one child, Charles b. 1852, who is treasurer of the company. He was married again, Dec. 15, 1857, to Clara, daughter of Charles and Mary (Barbour) Hamilton, of Maine. Of the second union were born James (1859), and Abby Mariou (1867), the wife of Richard House, of Chicago.

STEVENS, Isaac N., lawyer and editor, was born at Newark, Licking co., O., Nov. 1, 1858, son of Dr. Lewis A. and Sarah A. (Sperry) Stevens. He was educated at the high school at Newark, O., and his father dying in 1871, he taught school in Licking county, O., the following winter, and in Olena, Henderson co., Ill., for two terms. He then entered the law office of Hedge & Blythe, at Burlington, Ia., where he read law for three years, and upon his admission to the bar, in 1880, engaged in the practice of law in Denver, Col. In 1883 the position of assistant U. S. attorney for Colorado was created, and he was appointed to that place by Pres. Arthur. In 1888 he was elected district-attorney for the Denver judicial district, and during his term of office prosecuted more criminals and with

better results than any district-attorney in the state has ever done. One grand jury alone returned 800 indictments. Twenty-eight homicide cases were prosecuted with a record of twenty-three convictions, among them the famous case of Dr. T. Thatcher Graves, of Providence, R. I. for the murder of Mrs. Josephine Barnaby, a wealthy widow of that city. At the close of his term as district-attorney Mr. Stevens resumed the private practice of law. He has always taken a very active interest in politics, and was secretary of the Republican state committee in 1886 and 1888, and chairman of the Republican city committee in Denver from 1885 to 1894, except

for a period of two years. On March 1, 1900, he purchased a controlling interest in the Colorado Springs "Gazette," and became its managing editor. He still (1901) maintains a law office in Denver, and has a large ranch under cultivation in the northern part of the state, several houses in Denver, and much other real estate and mining property, to all of which interests he gives some share of his personal attention. He was married, in 1884, to Helen M. Tonge, of Boston, Mass. Colorado Springs is his permanent home.

JOHNSON, Benjamin Franklin, author and publisher, was born in Fauquier county, Va., April 3, 1856, son of Richard Nutt and Ann Miller (Whiteley) Johnson. His early home was on the Manassas battlefield, and was burned during the night of the battle. He attended country schools, and at the age of fifteen began his business career as a book agent, canvassing with marked success the states of Virginia and North Carolina and portions of West Virginia and Maryland. In 1876 he rented a small room in Richmond and began publishing books on his own account. A box of books in his office served as both bed and desk, and here, after the day's labors, he conducted his correspondence and packed books until the small hours of the night. Although intent upon money making he steadfastly refused to sanction with his imprint the issue of any volume that was not of a high order, indicating the best moral teaching. In due course the firm became known as B. F. Johnson & Co., and the business rapidly grew to large proportions. One of his first enterprises was the publication, commenced in 1894, of an entirely new series of school books, which are now (1901) standard text books throughout the entire South, largely in the North and even in our new possessions. In fact, they are shipped to every quarter of the globe. In 1900 was incorporated the B. F. Johnson Publishing Co., with a capital of \$4,000,000, of which Mr. Johnson is president. He is vice-president of the Highland Park Railway Co., Richmond, and of the Southern Industrial Association, having his headquarters at New Orleans. Mr. Johnson is the author of "Physical Culture" (1898), designed with special reference to young people. He is a member of the Westmoreland and Virginia clubs, Richmond, and the American Academy of Political and Social Science of Philadelphia. Personally he is a man of decision, promptitude and strong moral character. He was married, first, on Oct. 2, 1877, to Lucie, daughter of Alexander Davis, of Culpeper county, Va., who died in 1891, and second, on July 19, 1892, to Blanche T., daughter of Capt. Thomas Wynne, of Richmond. He has six children, Lucile, Benjamin, Maude, Wynne, Gladys and Alan Douglas Johnson.

COCHRAN, John Webster, inventor, was born at Enfield, N. H., May 16, 1814. He received a limited education, but at an early age became an expert mechanic. In 1832 he located in Boston, walking the entire distance from his native place with only \$1.25 in his possession. In 1833 he secured a patent on a steam-heating apparatus, and in 1834 perfected a revolving breech-loading rifled cannon, constructed upon the principle that after firing made the Colt revolver successful, the cylinder being automatically rotated by the cocking of the hammer. Failing to secure in the United States the capital necessary for its manufacture he visited

Paris, France, in 1835. There he made the acquaintance of the Turkish ambassador, who became interested in his models and caused Sultan Mahmoud to invite the inventor to Constantinople. Mr. Cochran remained in Turkey for several years and was munificently rewarded by the sultan for his labors. From 1839 until 1847 he resided in France and subsequently spent a considerable period in England, where he invented a machine for the curvilinear sawing of wood, a device that was adopted by the British government and soon came into general use. Upon his return to the United States he engaged in the manufacture of firearms and projectiles, perfecting and patenting many improved devices of much value. He acquired both wealth and fame by his inventions.

AUSTILL, Jeremiah, soldier, was born in Pendleton District, S. C., in 1795, son of Evan and Lethee (Files) Austill. His great-grandfather, Isaac Austill, came to America from England before the revolutionary war. His mother was the daughter of John and Sarah (McKinney) Files. When but nineteen years of age he was one of a party of three men headed by Capt. Samuel Dale, known as the Daniel Boone of Alabama, in the famous "canoe fight" upon the Alabama river near Chabohere, Nov. 12, 1813. In this struggle three white men rowed by a negro, named Caesar, boldly assailed a war canoe of the Creeks, manned by seven warriors in full trappings in mid-stream, and killed all of them without loss or injury to themselves, except Austill, who was struck on the head with a war club and received a scalp wound. At this time also he was the bearer of night despatches of warning between the forts and stockades along the hostile Creek country, often making forty miles through the trackless forests by night. He once rode from Fort Madison to Fort Carney and thence to Mount Vernon in a single night, through impenetrable darkness and blinding storm. He was married, in 1838, to Margaret, daughter of Capt. John Eades, who came to Alabama with his family from Georgia in 1812. They had four children. Their son, Huriesso, born in Mobile, Feb. 16, 1841, was graduated at the University of Alabama in 1861; was appointed lieutenant of the 1st Alabama artillery, and served in the Confederate army during the civil war. He was admitted to the bar in 1868, and served in the house of representatives and senate of the state legislature. In 1874 he was elected chancellor of the southern division of Alabama. He was married, Dec. 24, 1874, to Aurora R., daughter of Dr. Robert Ervin, of Wilcox co., Ala. They have six children. Maj. Jeremiah Austill enjoyed the respect and high confidence of all classes in his state. He died Dec. 8, 1879.

DICKINSON, Edward, lawyer and congressman, was born in Amherst, Mass., Jan. 1, 1803, son of Samuel Fowler Dickinson, a prominent lawyer and one of the founders of Amherst College. The son was graduated at Yale in 1823 with the highest honors; continued his studies at the Law School of Northampton, Mass., and in 1826 was admitted to the bar, practicing at Amherst, Mass., throughout his career. In 1835 he was elected treasurer of Amherst College, and performed the duties of this office with great advantage to the institution for nearly forty years, resigning in favor of his son a few months before death. In 1838 he was elected to the state legislature, was re-elected in the following year, and served in the state senate during 1842 and 1843. As a

member of the governor's council, he served two years (1846-48), and in 1852 he was elected as representative to the 33d congress (1853-55), as a Whig. Though declining several more important public trusts, he accepted the election to the state legislature in 1873, endeavoring to secure for his native town the advantages of the Massachusetts Central railroad, and after delivering an able speech in connection with the Hoosac tunnel, died of apoplexy during the same day. His life was distinguished for integrity, public spirit and professional success. He was married on May 6, 1828, to Emily, daughter of Joel Norcross, of Munson, Mass. Mr. Dickinson died in Boston, Mass., June 16, 1874, survived by a daughter, Emily, who obtained reputation as a poet.

DICKINSON, Emily Elizabeth, poet, was born at Amherst, Mass., Dec. 10, 1830, daughter of Edward and Emily (Norcross) Dickinson. She was educated at Amherst Academy and at Mount Holyoke Seminary, South Hadley, Mass. She was noted as a wit at the academy, and was a constant contributor to the school paper, "Forest Leaves." Bright and gay with her classmates, though she was even then shy, silent and self-deprecating when in the company of strangers, she gave little sign of the future recluse. But as she approached middle life it became impossible for her to mix freely with other people, her shyness preventing her from meeting the well-known friends who came to her own home, though she presided at the annual receptions her father gave to the college faculty and the prominent people of the neighborhood. Her love of flowers amounted to a passion, and from childhood she evinced a great love of nature and a sensitiveness to its every mood. During the last fifteen years of her life, though in good health, she never left the house, and saw no one but those of her own immediate family. After her death 1,000 manuscript poems were found, most of them without title, neatly copied and filed away. They were published by Mrs. Mabel Loomis Todd; the first volume in 1890, with an introduction by Col. Thomas W. Higginson; the second, in 1891; the third, in 1896, and they had in 1899 reached a sale of 20,000. Many of them are fragmentary; all are brief and are valued rather for their thought than for the rhythm or style; many of them were written to friends. In his introduction to the first volume Col. Higginson said: "In many cases these verses will seem to the reader like poetry torn up by the roots, with rain and dew still clinging to them, giving a freshness and a fragrance not otherwise to be conveyed." With like appreciation a reviewer for the Philadelphia "Bulletin" wrote: "Her verse was inspired, not made; and although careless of form, her poetry is never conventional and commonplace. She interpreted the spirit as few have been able to do—flashing upon us the deepest and most enduring truths." Miss Dickinson was faithful and affectionate to those she loved, and corresponded with her friends, though she would not meet them. So strong, however, did her liking for seclusion grow that in her later years she would not even address her envelopes, as though the mere writing were an act too intimate for public uses. Her letters were always remarkable and the scraps of verse they frequently contained were even more unusual. In 1862 she sent Col. Higginson a few poems for his criticism, and the literary correspondence resulting from this continued for over twenty years. Her letters were published by Mrs. Todd in two volumes (1894). She died at Amherst, Mass., May 15, 1886.

COFFIN, John, loyalist, was born in Boston, Mass., in 1756. He came from the Nantucket family of Coffins, and was descended through James and William (who settled in Boston about 1730), from Tristram Coffin. The latter (who was born in Brix-

Samuel Austill

ton, Devonshire, England, in 1605, and died at Nantucket, Mass., in 1681) is considered the ancestor of all the American Collins. He emigrated with his wife and a number of relatives in 1642, and became a citizen of Haverhill, Mass., but in 1659 made his home in Nantucket, of which he was the founder and first chief magistrate. He possessed a high character, and exercised great wisdom in civilizing the Indians. His son, Stephen, was the father of Judith, the grandmother of Benjamin Franklin. The subject of this sketch received his early education in the Boston Latin School. At the outbreak of the revolution he offered his services to the crown, and so distinguished himself in the British attack on Bunker hill that Gen. Gage appointed him an ensign on the field. He organized and commanded the Orange Grangers, engaging in the battles of Long Island and Germantown. In 1778 he was connected with the New York volunteers, and fought at San Lucie and Bryar's creek (1779), Camden (1780), and Hampton, Hobkirk's hill and Eutaw springs (1781). As a cavalry officer he was highly esteemed by Lord Cornwallis, who commissioned him major, at the same time presenting him with a handsome sword and commending his valor, especially at Eutaw. After the war Coffin settled in New Brunswick, and was eventually appointed major general, being senior general in the British army at the time of his death, which occurred in Kings county, New Brunswick, in 1838.

COFFIN, Sir Isaac, baronet, naval officer, was born in Boston, Mass., May 16, 1750, brother of John Coffin. His father was a Tory and collector of the port of Boston. At the age of fourteen the son entered the British naval service and was appointed midshipman on board the *Gaspé*. At the age of eighteen he was appointed lieutenant, and four years later captain of the *Shrewsbury*. He served under Lord Rodney in the latter's celebrated victory over Count de Grasse, April 12, 1782, a combat which was fought off Dominica, between two fleets of thirty ships each, and which lasted nearly twelve hours. This victory saved the Island of Jamaica, ruined the naval power of France and Spain, and gave the finishing blow to the war. Coffin acquitted himself with such courage in this engagement and in others with France, that in 1802 he was appointed admiral, and two years later was created a baronet. In 1818 he was returned to parliament for Helchester, Devonshire, taking active part in naval and kindred affairs. He always manifested a deep interest in the development of America, importing race horses to improve the American breed, introducing British fish into American waters, and sending new plants and trees, as well as maps and new inventions for use in the naval and merchant marine. He also established the Coffin Academy at Nantucket. In 1832 his name as Earl of Magdalen was placed by the king at the head of his list of new peers, in order to carry the reform bill through the house of lords. Subsequent to his retirement from the navy he was married to Elizabeth, daughter of William Greenly, of Tisbury Court, Gloucestershire, England. His life was written by Thomas Coffin Amory (1886). He died at Cheltenham, England, Aug. 4, 1839.

WHITE, Greenough, clergyman, author and educator, was born at Cambridge, Mass., July 26, 1863, son of John Gardner and Mary (Beach) White. His earliest ancestor, Edward White, came to America from Kent, England in 1635, and settled in Dorchester, Mass. He was graduated at Harvard in 1884, and received the degree of A.M. the following year, and that of B.D. at the Episcopal Theological School, Cambridge, in 1892. In 1885-87 Mr. White was professor of English language and literature at the University of the

South, Sewanee, Tenn., and occupied a similar chair in Kenyon College in 1888-89. He was ordained deacon of the Protestant Episcopal church in 1893, and priest in 1896. During 1893-94 he was minister at St. James' Church, West Hartford, Conn., and acting professor of history and political economy at Trinity College, Hartford. In 1899-90 and 1891 he made extensive tours in Europe, pursuing his studies in history, literature and art. His specialty is literary and ecclesiastical history. In 1890 he published his "Sketch of the Philosophy of American Literature," an essay which points out the connection between America's literature and history, and shows how new forms in letters and arts have arisen as advancing thought required. Mr. Edward C. Stehman wrote of it: "The précis seems to me to be successful and go to the root of the matter, *viz.*, to show the philosophy of the development of the successive phases of our national literature." He published the first part of his "Outline of the Philosophy of English Literature" in 1895. The motive of this treatise is to determine the bounds of the great historical divisions of English literature, to discover the salient features, the peculiar characteristics of each epoch, and trace the connection in thought between each, and to view the whole against a background of European history, literature and art. The book was well received in literary circles and was warmly commended by Prof. Edward Dowden, Leslie Stephen and Edmund Gosse. His latest publications are entitled: "A Saint of the Southern Church" (1897); "An Apostle of the Western Church" (1900), which have been praised by eminent divines in both England and America. In 1898 he contributed the introduction and essays on Clough's and Arnold's poetry to the volume of papers of the English Club of Sewanee, entitled "Matthew Arnold and the Spirit of the Age." He has been a constant contributor to "The Sewanee Review." At the end of the year 1891 he returned to the University of the South, to occupy its chair

of ecclesiastical history and polity and has since lived at Sewanee, with the exception of long vacation tours in different parts of the United States and Mexico. In 1895 he was appointed acting professor of the history of art in the same university. He is now engaged in the completion of his "Outline of the Philosophy of English Literature." He is a member of the International Congress of Diplomatic History and of the Alabama Historical Society.

DURRIE, Daniel Steele, librarian and author, was born in Albany, N. Y., Jan. 2, 1819, son of Horace and Johannah (Steele) Durrie, grandson of John Durrie, of Stony Stratford, Buckinghamshire, England, 1781, and descendant of John Steele, the first secretary of the colony of Connecticut, and of William Bradford, governor of Plymouth colony. He was educated at an academy at South Hadley, Mass., and was then employed in a book store in Albany. He went into business as a bookseller in Albany (1841-50), but removed to Madison, Wis., where he followed the same occupation during 1851-57. In 1856 he retired from business and was appointed librarian of the State Historical Society of Wisconsin, a position which he held until his death. He was superintendent of public schools at Roxbury, Wis., and secretary of the Madison board of education. He published: "Genealogy of the Steele Family" (1859); "Genealogy of the Holt Family" (1864);

Greenough White

"Bibliographia Genealogica Americana: An Index to American Genealogies (1868; 3d ed. 1886); "History of Madison, Wis., including the Four Lake Country; with Notes on Dane County and its Towns" (1874); "History of Missouri" (in collaboration with W. B. Davis (1876); "History of Iowa" (with C. R. Tuttle, 1876); and historical works in pamphlet form; the "Wisconsin Biographical Dictionary," and with Isabel Durrie he compiled a catalogue of the library of the Wisconsin State Historical Society. He died at Madison, Wis., Aug. 31, 1892.

CUNNINGHAM, Milton Joseph, lawyer, was born in De Soto (then Caddo) parish, La.,

March 10, 1842, son of John Hamilton and Anne (Bule) Cunningham. His father, of Scotch descent, born in the Edgefield district of South Carolina in 1810, was a man of great versatility; his mother belonged to a well-known Mississippi family. He was educated at Homer, La., and leaving college in 1858, taught school until the close of 1860. On the outbreak of the civil war he was studying law. He joined the first company organized in Natchitoches, under command of Capt. William M. Levy, which became a part of the 2d Louisiana Infantry, and served in the army of northern Virginia, being wounded at Spottsylvania Court House in Grant's advance on Richmond. The

war over, he resumed his legal studies, and on his admission to the bar in 1866 began practice at once at Natchitoches. He has always pursued his profession, but at the same time has taken an active part in Democratic politics since 1868. He was elected district-attorney in 1872 and again in 1874, and was elected a member of the house of representatives in 1878. In 1879 he was a member of the constitutional convention; in 1880-84 he was a member of the state senate under the new constitution; in 1884 he was elected attorney-general of Louisiana for a term of four years, serving until 1888. He was again elected attorney-general in 1892, and again for his third term in 1896. Mr. Cunningham has been quite prominent in state politics, always independent and vigorous in the discharge of his duties as an officer and a citizen. He opposed the Louisiana lottery, and has always advocated whatever he thought to be for the interest of his state. While a very busy man, with his official and professional duties, he takes some interest in planting and stock raising. He has a large family, and has been married four times. His present wife is Emma Mai Blouin, to whom he was married in New Orleans in 1895.

GROVER, Martin, jurist, was born at Hartwick, Otsego co., N. Y., in 1811. The son of a farmer, he received a common school training, after which he entered the Hartwick Academy. He taught school while studying law, and after being admitted to the bar, in 1833, he removed to Angelica and entered upon the practice of his profession. In 1835 he formed a partnership with his old preceptor, Judge Angell. In his earlier life Mr. Grover was totally regardless of his personal appearance and for years went by the name of the "ragged lawyer," on account of his carelessness of dress and his frequent appearance in court in dilapidated garments. This peculiarity, however, did not interfere with his success, but in fact increased it, being set down as an eccentricity of genius. After his marriage his habit

in this regard became completely changed. In 1844 he was elected to congress by the Know-nothing party, and took an active part in the heated discussions on the slavery question, setting himself against the repeal of the Missouri compromise during the famous campaign of 1856. His local power as a party manager and his opposition to a candidate for a legislative or county office was considered sufficient to defeat him. From 1850 to 1863 he was a Republican, but in the latter year he quitted the ranks of that party and voted and worked for the Democrats until his death. In 1857 he was appointed judge of the superior court to fill a vacancy and served through the unexpired portion of a term, two years, when he was elected for a full term and served until the fall of 1865. He was now nominated and confirmed judge of the court of appeals to fill the unexpired term of Judge Henry R. Sheldon. In 1867 he was elected to that office, and in 1870, on the reorganization of that branch of the state judiciary, he was named as associate justice for the term of fourteen years. Judge Grover was married, in 1845, to Emily Whitmore, a niece of Judge Angell, but left no children. He is remembered as one of the most formidable opponents that ever stood at the bar of the state of New York. He possessed wonderful powers of logic, quickness of the perceptive faculties, a remarkably retentive memory and untiring energy. He died at Angelica, Aug. 23, 1875.

KEATON, James Robert, jurist, was born in Carter county, Ky., Dec. 10, 1861, son of Nelson T. and Mary A. (Huff) Keaton. His father served in the 23d Kentucky regiment during the civil war, and distinguished himself for bravery. Young Keaton while attending a public school in his native county assisted his father on the farm until eighteen years of age, when for the three following years he alternated by teaching school and attending a high school. When twenty-two he entered the National Normal University, Lebanon, O., and was graduated B.S. in 1884. He then migrated to Hico, Hamilton co., Tex., where he served as principal of high schools during 1884-86, and in the fall of the latter year purchased the Hico "Courier," which he edited for two years. Meantime Mr. Keaton studied law, in 1888 he was admitted to the bar, and in the latter part of the same year entered the Georgetown College of Law, Washington, D. C., where he was graduated LL.B. in June, 1890. He then removed to Guthrie, O. T., practicing his profession until September, 1896. He has, from early manhood, been identified politically with the Democratic party, and has taken an active part in political affairs. In 1896 Pres. Cleveland appointed him associate justice of the supreme court of Oklahoma territory, and he was assigned to the 3d judicial district. In 1898 he retired from the bench, and resumed private practice in Oklahoma City, where he has since resided. He was nominated for delegate to congress in 1898, but was defeated. He was married, July 17, 1890, to Mrs. Lucile (Davenport) Johnston, of Denton, Tex., a daughter of William Davenport, for many years one of the leading citizens and land owners of that state.

KINGSLEY, Florence (Morse), author, was born at Poe, Medina co., O., July 14, 1859, daughter of Jonathan Bradley and Eleanor (Ecob) Morse. Her earliest ancestor in America was Anthony Morse,

M. Cunningham

J. R. Keaton

who came to this country from England in 1632, and settled at Newbury, Mass. Her father (1831-98), a graduate of Oberlin College and Auburn Theological Seminary, was the pastor of Presbyterian churches in various towns in New York and Iowa, also being president of Lyons College for Women, Iowa, for one year. Both her parents had literary and artistic tastes, and up to the age of twelve her education was carried on by her mother. She entered Wellesley, where she was a member of the class of 1881, but on account of ill health remained but three years. After leaving college she studied art for a time, and was married, July 12, 1882, to Charles Rawson Kingsley, Ph.D., a graduate of Hamilton College. For four years after their marriage Dr. Kingsley was principal of the high school in Leavenworth, Kan., removing thence to Rochester, N. Y., where they conducted a collegiate institution for girls, known as the Kingsley School. In 1889 Dr. Kingsley was called to the presidency of the Milwaukee College for Women, and Mrs. Kingsley was vice-principal, also taking charge of the art department and teaching Latin, mathematics and literature, beside superintending the household. It was not until another change of residence that she found time for literary work, except in connection with the college. In 1892 Dr. Kingsley was ordained by the Milwaukee Presbytery, and subsequently became pastor of Immanuel Church, West New Brighton, Staten Island. In 1894 she wrote "Titus, a Comrade of the Cross," which was awarded a prize of \$1,000 over 377 competitors, and within three years over one million copies of the book were sold in the United States. It has also been translated into German, French, Spanish, Japanese, Hindi, Portuguese, Italian and Swedish. She has since published: "Stephen, a Soldier of the Cross" (1896); "Paul, a Herald of the Cross" (1897); "The Cross Triumphant" (1898); "Prisoners of the Sea" (1899), and "The Transfiguration of Miss Philina," beside a number of short stories. She is the mother of five children: Charles Rawson, Donald, Grace, James and John Bradley Kingsley.

COAN, Titus Munson, physician and author, was born in Hilo, Hawaiian Islands, Sept. 27, 1836, son of Titus and Fidelia (Church) Coan, the missionaries, and both of New England ancestry for several generations. His maternal grandfather, Samuel Church, founded and named the town of Churchville, in western New York. Titus Munson Coan was educated at Punahou school, the royal school, and the Oahu college in Honolulu. In 1856 he came to the United States, going round Cape Horn on a New Bedford whaler, and entered Yale College; in 1859 he completed his course at Williams College and entered the New York College of Physicians and Surgeons, where he was graduated two years later. Two years were then spent in Bellevue Hospital and the army hospitals of New York, and in 1863 he entered the naval service as assistant surgeon in the West Gulf squadron, commanded by Adm. Farragut. He took part in the battle of Mobile Bay, and in other naval combats in the civil war, and in 1865 he was attached to the flagship Brooklyn, but resigned his position in the navy at the close of that year, and began the practice of medicine in the city of New York, where he has since resided. His first literary work to attract notice appeared in the "Galaxy," to which he contributed many essays on social and literary topics. He has written prose and verse for all the leading American magazines. Dr. Coan has devoted considerable time to visiting Europe and the health resorts of America, studying and describing their advantages and their mineral waters. He directs a bureau of revision, having as its object the reading of authors' manuscripts and the unbiased criticism and skilled re-

vision of their work. His efforts in this direction have won success and the approval of the most eminent literary men of the day. He is the author of "Owners of Prevention," essays on hygiene (1885); "The Hawaiian Islands" (1889, an address); "A Geographical Dictionary," in Webster's International Dictionary (1892); "A Dictionary of Proper Names," in the Standard Dictionary (1895); "Hawaiian Ethnography," an address (1899); "The Climate of Hawaii" (1901); "A Study of Polynesian Chiasm," an address (1901); editor of "Topics of the Time" (6 vols., 1885), and of "Personal Recollections of the War of the Rebellion" (1891).

JUDD, Norman Buel, lawyer and U. S. minister, was born at Rome, Oneida co., N. Y., Jan. 10, 1815, son of Norman and Catherine (Vanderheyden) Judd, and a descendant of Thomas Judd, who came to this country from England in 1633, and settled in Cambridge, Mass. He was educated in the common schools of his native place and at a high school at Rome, N. Y., after which he studied law and was admitted to the bar of Oneida county in 1836. The same year he removed to Chicago, and upon its incorporation as a city, in 1837, drew its first charter. He was associated in practice successively with Judge Eaton, John Y. Scammon and Hon. John M. Wilson. He was elected the first city attorney in 1837 and attorney for Cook county in 1839. Mr. Judd acted as counsel for the Chicago, Rock Island and Pacific; Chicago and Northern Indiana, Chicago and Milwaukee, and the Pittsburgh, Ft. Wayne and Chicago railroads for several years. He served during 1844-60 as state senator, representing the Democrats. In 1856 he was a member of the Bloomington convention that organized the Republican party, and was chairman of the state central committee for nearly five years. He was prominent in the Philadelphia convention which nominated John C. Fremont, and in the national convention which nominated Lincoln for president. He was one of the party accompanying Lincoln to Washington, and by his sagacity aided in foiling an attempt to assassinate the president. In 1861 he was appointed minister to Prussia, and during his incumbency of that office was the means of defeating the recognition of the Southern Confederacy by European powers. He was recalled by Andrew Johnson in 1865. In 1868 he was elected to congress, defeating Hon. John Wentworth, Democratic candidate, and served for two terms, during which he was a member of the committee which brought the bill of impeachment against the president. Mr. Judd was the first to introduce a bill establishing inland ports of entry to which imported goods could be directly shipped from the seaboard in bond, which measure has probably done more to increase the commerce of the country than any other ever passed by congress. In 1873 he was appointed collector of customs for the port of Chicago, in which capacity he served for three years. In 1844 he was married to Adeline, daughter of Newton Rossiter, of Chicago. They had several children, two of whom are living. Mr. Judd died in Chicago, Ill., Nov. 11, 1878.

HUMPHREY, Herman Loin, jurist, was born at Caudor, Tioga co., N. Y., March 14, 1830, son of Lucius and Lydia (Chidsey) Humphrey. His earliest American ancestor was Michael Humphrey,

N. B. Judd

from Lyme Regis, England, who settled at Windsor, Conn., about 1638. He was educated in the public schools and at the Cortland Academy, Cortland, N. Y. At the age of sixteen he entered commercial life as a clerk in a merchant's store at Ithaca, N. Y. Later he studied law in the office of Judge Francis M. Finch, and was admitted to the New York bar in 1854. In the following year he removed to Hudson, Wis., where he established himself in the practice of his profession. He rapidly attained success. He was district attorney (1855) and was appointed judge of St. Croix county in 1860 to fill an unexpired term, being elected for the ensuing term of four years, of which he served only the first, having resigned on being elected state senator in the fall of 1861. He was for two years a member of the state senate (1862-64), and was mayor of the city of Hudson in 1865. In 1866 he was appointed judge of the 8th judicial district of Wisconsin and was re-elected in 1872, serving until 1877. He was elected to the 45th, 46th and 47th congresses on the Republican ticket. In 1886 he was elected to the state legislature for two years and afterwards resumed law practice in Hudson. Mr. Humphrey was twice married: first, in 1855, to Jane A., daughter of John and Sopronia (Hewitt) Cross, of Binghamton, N. Y.; and, second, in 1881, to Elvira (Doty) Dorr, of Oswego, N. Y., daughter of Elvira and Permilla (Lombard) Doty, of Portage, Livingston co., N. Y.

METCALF, Wilder Stevens, soldier, was born at Milo, Me., Sept. 10, 1855, son of Isaac Stevens and Antoinette (Putnam) Metcalf. He was educated in the public schools of Elyria, O., to which his parents removed in 1856, and was graduated at Oberlin College in 1878. He engaged in the cheese and butter business for nine years, removing to Lawrence, Kan., in 1887, where he formed a partnership with Edward Russell in the farm mortgage business. He studied law for several years, taking the degree of LL.B. at the University of Kansas in 1897, and being admitted to the bar. On the death of his partner, in 1898, he assumed entire control of the business, and is now (1901) still conducting it with great profit. He was connected with

the Ohio national guard from 1879 to 1884, and on taking up his residence in Kansas, enlisted as a private in the national guard of that state, holding the rank of colonel of the 1st Kansas regiment when the Spanish-American war broke out. He was then commissioned major of the 20th Kansas infantry, U. S. volunteers. During the service of his regiment, he was twice wounded, being shot through the ear at Calocean, P. I., and through the foot while on the advance near Boeane, P. I., March 29, 1899. In this latter instance, though the wound was a painful one, he continued to exercise command of his battalion during the dressing of the wound; was lifted to his horse and continued the advance for some five or six miles. At this point, Gen. MacArthur seeing that he was wounded, ordered him to the rear, and that officer afterward recommended him for brevet brigadier-general of volunteers, which appointment was promptly made by Pres. McKinley. Upon the promotion of Gen. Funston, Maj. Metcalf was made colonel, and rejoined his regiment in the field May 23, 1899, though still unable to place his foot to the ground, or bear it in the stirrup. In this condition he took part in several engagements, riding to the

front in a buggy. In October, 1899, he returned with his regiment to the United States, and on being mustered out Oct. 28, 1899, he at once resumed his business in Lawrence. He was a delegate-at-large to the national Republican convention in Philadelphia in 1900. He is a member of the public school board of Lawrence, Kan., and in the Masonic order is a member of Knights Templar and of the Shrine. He was married at Wellington, O., July 30, 1878, to Mary E., daughter of George W. and Sarah (Campbell) Crosier.

BRUCE, George, type-founder, was born in Edinburgh, Scotland, June 26, 1781. At about fourteen years of age he joined his brother, David, who had preceded him to Philadelphia, and there he learned the printer's trade. In 1798 the brothers, being forced to leave the city on account of the yellow fever epidemic, went to work in a printing office at Albany, but soon left for New York, making the entire journey on foot. In 1803 George became a foreman on the "Daily Advertiser," to which he contributed articles, and in November of the same year undertook the printing and publishing of the paper for its proprietor. In 1806, after eight years of careful attention to their trade, the two brothers undertook to print Lavoisier's "Chemistry" on their own account, although they were at the time destitute of type, press and money. With the aid of a borrowed font and press, however, they succeeded in this their first venture, and in three years were running nine presses of their own. On a trip to England, in 1812, David secured the secret of stereotyping, and the brothers attempted, against many difficulties, to introduce the process in America. The type then made being cast with so low a shoulder as to be unsuitable for stereotyping, they were compelled to cast their own type; and they invented a planing machine for smoothing the backs of the plates, reducing them to a uniform thickness. Another invention was the mahogany shiffting-blocks, used to bring the plates to the height of type. School editions of the New Testament in bourgeois, and the Bible in nonpareil (1814-15), were their first stereotype works; and subsequently the earlier issues of the American Bible Society, as well as a series of Latin classics, were also produced. In 1816 they disposed of their printing business and purchased a foundry for type-making and stereotyping, George devoting his time to the former and David to the latter; but in 1822 David retired on account of failing health, and his branch of the work was entirely dropped. George cut his own steel punches for making type, with exquisite taste, and in the seventy-eighth year of his age produced type which has rarely been excelled for beauty of design or neatness of finish. He did much both toward facilitating American printing and toward making it a fine art, inventing, with the assistance of his nephew, David Bruce, Jr., a successful typesetting machine which came into general use, proving to be the only one to stand the test of time. He was the first to take advantage of the act of congress of 1842, protecting designs. Among printers his scripts were famous as early as 1832, and for a generation they continued to maintain their pre-eminence. Decisive action, unflinching integrity, and large benevolence, were the traits of his character. He was president for a long term of years of the Mechanics' Institute and of the Typefounders' Association; an officer of the General Society of Mechanics and Tradesmen and of the Apprentices' Library; a supporter of the Typographical Society and of the Printers' Library, and a member of the New York Historical Society and of St. Andrew's Society. His only son, David W., continued the business for many years. He died in New York city, July 5, 1866.

BALL, Ephraim, inventor, was born at Greentown, Stark co., O., Aug. 12, 1812. He enjoyed few educational advantages, his mental training being of the most rudimentary character. Becoming a carpenter's apprentice at an early age, he was compelled from his fifteenth year to support himself by

that trade. He invented a turn-top stove, however, which he made and marketed for several years at Greentown. Later he devised an improved plow, and in 1840 directed his energies toward the establishment of a foundry for the casting of plow-shares. This he completed, together with a shop for stocking plows, and his invention, which was known as Ball's Blue plow, had an extensive sale. Associating himself with Cornelius Aultman and Lewis Miller, he gave up his little shop in 1851 to form the firm of Ball, Ault-

man & Co., subsequently erecting and equipping extensive factories at Canton, O. In 1854 he devised the Ohio mower, later the World mower and reaper, and in 1858 the Buckeye machine. These all sold extensively, and were widely introduced; the firm, however, was subsequently dissolved. After 1858 the inventor devoted his attention mainly to the manufacture of his new American harvester, a machine which attained such a degree of popularity that in 1865 the annual production was estimated at 10,000. In spite of the fact that his inventions were so successful, during the later years of his life the inventor encountered financial embarrassment, while the purchasers of his patent rights were accumulating great wealth. Mr. Ball died at Canton, O., Jan. 1, 1872.

SMITH, William, jurist and historian, was born in New York city, June 25, 1728, son of Judge William Smith. He received his early education in his native city, and was graduated at Yale in 1745. Though he had studied Hebrew and medicine while at school, he entered his father's law office and studied there with William Livingston, the future war governor of New Jersey. He was admitted to the bar, Oct. 22, 1750, and formed a partnership with Livingston. They soon acquired a reputation for ability, and were appointed by the New York assembly to revise the laws, a task begun by Chief-Justice Horsmanden, but left unfinished. This important work was successfully performed, the first volume being issued in 1752 and the second in 1762. In 1767 Gov. Moore, writing to England that Smith was at the head of his profession, asked that he be appointed to the seat in the king's council made vacant by his father's retirement. The proposal was immediately complied with, and he held this office nominally until 1782. In the beginning of the revolution he stood between the two parties. He was on intimate terms with the leaders on both sides and owing to his endeavor to soothe the violence of party feeling he won the ill-will of the extremists, both among the Tories and the Patriots. Although he admitted that the important principles for which the Americans took arms were right, he was opposed to the rebellion as a means of redress. Early in 1776, when Washington entered New York city in April, Mr. Smith offered him his city residence, retired to his country seat at Haverstraw, and did not revisit the city during the summer. On June 15, 1776, his name was entered among the first upon the list of suspected persons prepared by the committee to detect conspiracies, and he was summoned "as a person of equivocal character." Upon his statement that he considered himself bound by his oath of fidelity to the

crowns of Great Britain, his liberty was confined to the bounds of Livingston manor. Again, on March 7, 1777, not having taken the prescribed oath of allegiance, he was summoned before the committee, and was placed on parole again at Livingston manor. In 1778 he was relieved from his parole, but shortly afterward was put under sentence of banishment from New York. When New York was occupied by the British he returned, however, and accepted a commission from the king as chief justice of the province of New York, being sworn in on May 1, 1780. This proved conclusively his final adherence to the Tory side. He held this office until New York was evacuated by the British, when, on Dec. 5, 1783, with his son William, he sailed for England with the commander in chief of the British troops. On Sept. 1, 1785, he was appointed chief justice of Canada, but remained in England until the following summer. He arrived in Quebec on Oct. 25, 1786, and was there joined by his wife and children, who had meantime lived in New York city. He published in 1757 "History of the Province of New York." Although this history has been called dull and circumstantial, it has been "an inexhaustible resource for historians." His son, William, also a historian, issued a new edition of it with additions in 1814, and with a second volume, by the author's wish hitherto unpublished, it was brought out again by the New York Historical Society in 1826-29. Judge Smith died in Quebec, Canada, Dec. 3, 1793.

LUCAS, John Baptiste Charles, jurist, was born in Normandy, France, in 1762. He was educated at the University of Caen, where he was graduated D.C.L. in 1782. After practicing his profession for two years he emigrated to the United States and settled on a farm near Pittsburgh, Pa. He soon gained the confidence of the people, and in 1792 was elected to the state legislature, serving for six years. In 1794 he became judge of the court of common pleas, and in 1802 was elected a representative in congress as a Democrat. He was re-elected in 1804, but, having been appointed judge of the U. S. court for the northern district of Louisiana, he resigned before taking his seat, and removed to St. Louis, Mo. He was commissioner of land titles for that territory from 1805 until 1812. He retired from the bench in 1820, and spent his last days on a farm near St. Louis, where he died Aug. 17, 1842.

DE SPITZER, Ernestus, surgeon-general, was born in Heilbronn, in the kingdom of Wurtemberg, Germany, April 6, 1709. He descended from the ancient Von Spitzers, a family of noble knights who flourished in a town of the same name in lower Steiermarke, a German province, where they were enrolled among the nobility in the early part of the fourteenth century, having been allied to royalty itself. The family controlled the city government of Heilbronn from 1602 until 1682. His grandfather, Dr. John Von Spitzer, who was also an LL.D., was burgo-master of the city of Heilbronn for over forty years. Ernestus De Spitzer, the first of the family to come to America, sailed from Rotterdam, Holland, on the ship Two Brothers, Thomas Arnott, captain; and on the ship's list wrote his name with a "De," the Latin for "Von." He landed in Philadelphia, Oct. 13, 1747, and later settled in Schenectady, N. Y., where he practiced medicine and surgery for many years

Ernestus De Spitzer

with success. Dr. Spitzer was a very important personage in that town, being one of the first practicing physicians, and is mentioned in both Pearson's and Sauter's early history of that part of New York state. He served with distinction in the French and

Indian war as surgeon, at the garrison at Oswego, N. Y., from Oct. 28, 1753, to May 22, 1755, and later received an appointment as surgeon-general of the provincial forces. Dr. De Spitzer was married to Barbara Wilfelin, of Dutch ancestry, by whom he had three sons and one daughter. Garrett, Aaron, Ernestus, Jr., and Elizabeth. Garrett and Aaron served in the revolutionary war. Their descendants married into the Schermerhorn and Astor families. After the French and Indian war he returned to Schenectady, and practiced his profession until his death, which occurred Oct. 8, 1789. His remains were buried in the old Dutch cemetery in Schenectady. In 1901 his monument was restored by his descendants, and the names of his sons, Garrett and Aaron, who served in the war of the revolution, were placed upon it.

DE SPITZER, Garrett, physician and soldier,

was born in Schenectady, N. Y., June 20, 1758, oldest son of Dr. Ernestus and Barbara (Wilfelin) De Spitzer. He served in the war of the revolution, after which he returned to Schenectady. A few years later with his family he removed to Wastina, now Amsterdam, N. Y., where he was one of the first practicing physicians. He was married to Annatje, daughter of Nicholas and Susannah Sixbury, and had eight children, six sons and two daughters, Aaron, Nicholas, Jeremiah, Peter, John, Joseph, Susannah and Barbara. Dr. Spitzer died in Amsterdam, N. Y., June 2, 1804, and was buried in the Old Dutch cemetery, Schenectady, N. Y.

SPITZER, Nicholas, physician and stock

farmer, was born in Schenectady, N. Y., Nov. 26, 1783, second son of Dr. Garrett and Annatje (Sixbury) De Spitzer. He practiced medicine in Schenectady, until he was fifty-two years of age, when on account of poor health he gave up his profession, and with his family removed to Medina, O., where he engaged in agricultural pursuits and stock farming. His health was not improved by the change, and in a few years he retired from business. His oldest son, Garrett, taking charge of his affairs until the close of his life. When he went to Ohio he left off the prefix "De" to his

name, which was frequently done in the early years of the republic. His health was greatly improved without business cares, and he lived to be an old

man. He was married to Nancy, daughter of Jacob and Maria (Schermerhorn) Bovee, and had four sons and five daughters, Garrett, Aaron, Matthew, Jacob, Maria, Susan, Sallie, Sarah and Mary. Dr. Spitzer died at Medina, O., Dec. 6, 1868.

SPITZER, Aaron Bovee, banker and business man, was born in Schenectady, N. Y., Oct. 8, 1823, second son of Nicholas and Nancy (Bovee) Spitzer. He was a general business man, and considered a good judge of credit and values, and was engaged in the banking business for several years with his oldest son, Ceilan Milo Spitzer, and Ludwig Wideman. He was a lover of horses, owned a stock farm near Medina, and bred some very fine specimens. Mr. Spitzer retired from active business in 1886. He was married to Laura Maria, daughter of Joseph and Harriet (Draper) Perkins, and had one son, Ceilan M. Spitzer. He was married the second time to Anna Frank Collins, and by this marriage had three sons, Frank P., Garrett E., and Sidney Spitzer. He was a life-long Republican, and at the time of his death a member and deacon of the Congregational church. He died in Medina, O., May 13, 1892.

SPITZER, Ceilan Milo, banker, was born at Batavia, N. Y., Nov. 2, 1849, eldest son of Aaron Bovee and Laura Maria (Perkins) Spitzer, and a great-grandson of Dr. Ernestus De Spitzer. Through his mother he is descended from James Draper, of Roxbury, Mass., and Quartermaster John Perkins of Ipswich, Mass., the first of their families in America. His great-grandfather, Nathaniel Perkins, before he was of age was aid-camp to Gen. George Washington. Mr. Spitzer's great-great-great-grandfather, Hendricks Cornelius Van Buren, was a soldier in the Indian war of 1663, being stationed at Fort Cralo in Papshire, and was an ancestor of Pres. Martin Van Buren. He is also a descendant on the maternal side (being the great-great-grandson), of Jacob Jansse Schermerhorn, founder of the family bearing his name in America, who came from Waterland, Holland, in 1636, and settled in Beverswyck, in the New Netherlands, where he became a man of wealth and prominence until his death in Schenectady in 1688. Ceilan Milo Spitzer was educated in the schools of Medina, O., whither his family had removed in 1851, and at Oberlin College. He entered upon his active business career in 1869 by purchasing a half interest in a drug store at Seville, O., which he sold out two years later, and with his father opened the Seville Exchange Bank under the style of C. M. Spitzer & Co., a banking house which obtained immediate standing and reputation in the financial world. In 1877 a branch bank was opened at Medina, O., and in 1878 the German-American Bank of Cleveland, O., was organized, the last

enterprise growing in such immediate favor that Mr. Spitzer purchased the interest of Ludwig Wideman, who had become a partner in 1873, and during the next two years conducted a general banking and investment business. In January, 1880, owing to financial depression the bank failed and soon after settled with its creditors on a forty per cent. basis. Ten years later, however, quite without legal or moral necessity, Mr. Spitzer paid all the bank's debts in full, an act which has deservedly given him a high reputation in the business world. With Ludwig and Jerome P. Wideman he opened the Bank of Fremont, at Fremont, O., in 1880, but he sold it the following year, and formed the firm of Spitzer, Wideman & Co.,

Spitzer-Owng

bankers, at Toledo, O. In the following year Mr. Spitzer purchased the interest of the Widemans, and formed a co-partnership with his cousin, Adalbert L. Spitzer, under the firm name of Spitzer & Co., bankers. In 1887 a branch office was opened in Boston, Mass. In May, 1899, the Boston office was removed to 20 Nassau street, New York city. The firm has enjoyed a continuous and permanent increase in prosperity, and is now the oldest and one of the most successful investment bank-

ing houses in the central West, buying and selling municipal bonds and other high grade investment securities. Mr. Spitzer is also a stockholder and director in six other banks, including the Ohio Savings Bank and Trust Co., and the Security Trust Co., Toledo; a director of the Wheeling and Lake Erie Railroad Co., and president of the Spitzer Building Co., which erected in 1893 the modern ten-story fire-proof building in Toledo. In January, 1900, Gov. George K. Nash appointed him quartermaster-general of Ohio, with rank of brigadier-general. Mr. Spitzer is one of the leading citizens of Ohio, and is ever ready to foster or contribute to any worthy artistic, business or benevolent enterprise in his adopted city. He has always refused to permit his

Innisfail
Residence C. M. Spitzer

name to be used for any elective office, preferring to exert his influence and benefit his fellow men in the capacity of a private citizen and a general of financial affairs. He is a member of the Toledo and Country clubs, of Toledo, and the Middle Bass Club, of Put-in-Bay, also a member of the Ohio Society of New York. He has traveled widely, both in this country and abroad, and his colonial home, "Innisfail," on Collingwood avenue, is filled with choice specimens of the artistic and curious from all parts of the world, and includes a fine art gallery. He was married, in 1884, to Lillian Cortez, daughter of Alexander McDowell, a lineal descendant of Elizabeth, sister of William Penn, and a cousin of Gen. Irvine McDowell. They have no children.

SPITZER, Garrett, financier, was born in Schenectady, N. Y., Nov. 7, 1817, oldest son of Nicholas and Nancy (Bovee) Spitzer, of Medina, O. He was an excellent business man, and his opinion was often sought on financial and business propositions. He was for over twenty years one of the advising directors of the Ohio Farmers' Insurance Co., and for several years was associated with his two sons, Adalbert L. and Amherst T. Spitzer, in the banking and investment business. During the civil war he was an extensive shipper of grain, flour and wool, and owned a large stock farm south of Medina. He always voted the Republican ticket, and was a member of the Congregational church. He was married to Mary Jane, daughter of Elisha and Sarah (Thompson) Branch, by whom he had three sons and five daughters: Amherst T., Aaron E., Adalbert L., Alice, Evelyn, Franklin, Luette and Bessie Spitzer. Mr. Spitzer died in Medina, O., Jan. 3, 1891.

Garrett Spitzer

SPITZER, Adalbert Lorenzo, banker, was born in Medina, O., in 1852, youngest son of Garrett and Mary Jane (Branch) Spitzer, and great-grandson of Dr. Ernestus De Spitzer. On his mother's side he descends from James Thompson, who came from England with a large colony under the lead of Governor Winthrop, landing on New England shores in June, 1630; he was one of the first settlers of Charlestown, Mass. He died in 1682, at the age of eighty-nine years. The Thompsons in England were eminent in the intellectual, social and religious world; a number of them were knighted. James Thompson, a descendant of James, the colonist, with four of his five sons of twenty-one years and upwards, signed, with others, a covenant, adopted July 1, 1774, to join in the defense of the colonies against the aggressions of the mother country. Two of his sons, John and Joseph, had already served in the French and Indian wars; four sons, James, Jonathan, John and Joseph, and eight of his grandsons were in the war of the revolution. Mary Hancock, the wife of James Thompson, was a cousin of John Hancock, governor of Massachusetts. Another ancestor, John Thompson, was one of the framers of the National Banking Act and established the First National Bank of New York, the first bank that was organized in the United States under this act. He later established the Chase National Bank of New York city, the name being given in honor of Salmon P. Chase, who was Mr. Thompson's warm and personal friend. Mr. Spitzer, through his mother, is a cousin of George K. Nash, governor of Ohio. Mr. Spitzer was educated in the local schools and the Lodi (O.) Academy. At the age of twenty he entered the Exchange Bank of Seville, O., and became cashier, and in 1873, in partnership with his brother, Amherst T. Spitzer, he established the banking house of Spitzer

Adalbert Spitzer

Brothers at North Amherst, O. In 1878 he purchased his brother's interest. The following year he was elected a director of the First National Bank of Oberlin, O. In 1882 he sold out the North Amherst Bank and removed to Toledo, associating himself with his cousin, Celim M. Spitzer, in the banking and investment business, under the firm name of Spitzer & Co. Mr. Spitzer is a stockholder and director in five other banks, including the Merchants' National Bank and Home Savings Bank in Toledo, and is secretary and treasurer of the Spitzer Building Co. He is a member of the Toledo Country and Polo clubs, of Toledo, being president of the last named; of the Middlebass Club, of Put-in-Bay, and the Triton Fish and Game Club of Canada. He is a well known horseman and an excellent whip; he has a large stable of horses, and with his four-hand coach has won several blue ribbons at different horse shows and driving associations. In 1875 he was married to Sarah Elizabeth, daughter of Lyman L. Strong, a descendant of Caleb Strong, governor of Massachusetts, and cousin of William Strong, judge of the U. S. supreme court. They have three sons and one daughter, Carl B., Lyman S., Roland A., and Luette Ruth Spitzer.

WILCOX, Ella (Wheeler), author, was born at Johnstown Centre, Wis., Nov. 5, 1853. Her parents removed from Vermont about 1850, her father being a music teacher. She was educated in the public schools of Windsor, Wis., and attended the Woman's College of the University of Wisconsin for one year (1868). Inheriting a studious and artistic temperament, she early evinced literary talent. She says, "I do not remember when I did not expect to be a writer, and I was a neighborhood celebrity at the age of eight." Several of her earliest articles appeared in the New York "Mercury," and she soon won the recognition of editors and publishers, both local and metropolitan, and contributed to the periodical press. She wrote largely for syndicates, and her verse contributed particularly to her fame and popularity. She was married, in 1884, to Robert M. Wilcox, of Meriden, Conn., and since 1887 she has resided in New York city, where she is engaged in literary work. She has published "Drops of Water: Temperance Poems" (1872); "Shells" (1873); "Maurine, and Other Poems" (1876; new ed., 1882); "Poems of Passion" (1883); "Mal Moulée," a novel (1885); "Perdita and Other Stories" (1886); "An Ambitious Man" (1887); "Poems of Pleasure" (1888); "Adventures of Miss Volney" (1888); "A Double Life" (1890); "How Salvator Won" (1891); "Was It Suicide?" (1891); "Sweet Danger" (1892); "The Beautiful Land of Nod" (1892); "An Erring Woman's Love" (1892); "Men, Women and Emotions" (1893); "Custer, and Other Poems" (1895); "Three Women" (1898); "Poems of Power" (1901). The "Nation" wrote: "When Miss Wheeler writes simply and calmly, keeping on her own ground of life and experience, she is strong."

CAMPBELL, William Wallace, astronomer, was born in Hancock county, O., April 11, 1862, son of Robert Wilson Campbell and Harriet (Welsb) Campbell. He lived at home on his father's farm until his fifteenth year, attending country schools, and then began to study preparatory to pursuing a scientific course at college. He entered the University of Michigan in 1882, and was graduated in

1886 with the degree of B.S. In the year of his graduation he was appointed to the chair of mathematics in the State University of Colorado, and fulfilled the duties of that position until 1888, when he became instructor in astronomy in the University of Michigan. There, as in his first position, he was chiefly engaged in giving instruction, but he found time to observe numerous comets and computed ephemerides, giving the result of his labors to the public in articles published in scientific reviews. Since 1891 he has been in charge of the department of spectroscopy at Lick Observatory. There he has made observations on nova auriga, nebulae, Wolf-Rayet stars, comets, various bright line stars, Mars, etc. His observations, made in 1895, on the atmosphere of Mars, showed that that planet has not more than one-fourth as much atmosphere as the earth. He has contributed upward of 100 papers on astronomical subjects to the "Astronomical Journal," the "Astronomische Nachrichten" and other scientific publications, and in 1891 published a "Handbook on Practical Astronomy." In the winter of 1897-98 he was sent to the interior of India, in charge of the Lick Observatory expedition, to observe the total eclipse of the sun on Jan. 22, 1898. The observations were very successful. He was married, Dec. 28, 1892, at Grand Rapids, Mich., to Elizabeth Ballard Thompson, a descendant of Gov. William Bradford.

SIBLEY, John Langdon, librarian, was born at Union, Knox co., Me., Dec. 29, 1804, son of Dr. Jonathan and Persis (Morse) Sibley. After a preparatory course at Phillips Exeter Academy he entered Harvard University, where he was graduated in 1825. He at once began to study theology at the divinity school, at the same time becoming assistant librarian in the Harvard library, in which position he served until 1829, when he was ordained and settled as pastor of the Unitarian Church at Stow, Mass. In 1833 he left Stow and became engaged in library work in Cambridge, editing also the "American Magazine of Useful and Entertaining Knowledge." In 1841 he was again appointed assistant at the Harvard library, under Dr. Thaddeus William Harris, and upon the latter's death, in 1856, succeeded him. In 1877 he became librarian emeritus, as old age and failing sight rendered him incapable of active work. During his incumbency the number of volumes increased from 41,000, in 1841, to 164,000 in 1877, and its permanent fund from \$5,000 to \$170,000. Mr. Sibley edited the triennial and quinquennial catalogues from 1840 to 1877, and the annual catalogue from 1850 to 1870. In 1856 he received the honorary degree of A.M., from Bowdoin. He was an active member of the Massachusetts Historical Society from 1846, and a fellow of the American Academy of Arts and Sciences. Having received, during his studentship, aid from the charity fund of Phillips Exeter Academy, he began in 1862 a series of gifts to that institution, which amounted at the time of his death to about \$40,000, the income to be used for the support of needy students. He published a number of works, of which the most important is "Biographical Sketches of Graduates of Harvard University," (3 vols.; 1873-85). His other writings include: "Index to the Writings of George Washington" (1887); "History of the Town of Union, Me." (1851); "Index to the Works of John Adams" (1853); "Notices of the Triennial and Annual Catalogue of Harvard University, with a Reprint of the Catalogues of 1674, 1682, and 1700" (1865), and a mass of materials and notes, accumulated during half a century, chronologically arranged and bound, as well as a large collection of newspaper cuttings, containing biographical information relating to Harvard graduates. He died at Cambridge, Mass., Dec. 9, 1885.

Ella Wheeler Wilcox

A. L. Spitzer

CLARK, George Whitfield, clergyman and author, was born at South Orange, N. J., Feb. 15, 1831, son of John B. Clark, who was descended from Richard Clark, one of the early settlers of Elizabeth, N. J. A tradition says that the family was partly of Swiss origin. As a child he received strict religious training, and was admitted to membership in the Northfield Baptist Church at the early age of twelve. He showed special ability in mathematics as well as in other lines, and at thirteen purchased a Latin grammar with the intention of preparing himself for college. This, however, was supplemented by school training. When seventeen years old he taught school, and when eighteen entered Amherst College, where he was graduated in 1853, two years later completing his theological course at Rochester Theological Seminary. Dr. Clark's first pastorate was at New Market, N. J., where he was ordained Oct. 3, 1855. Four years later he went to Elizabeth, N. J., and in the spring of 1868 to Ballston, N. Y. In the autumn of 1873 he returned to New Jersey, and became pastor at Somerville, but in 1877 retired from the pastorate in broken health. Having recovered in 1880, he became connected with the American Baptist Publication Society, with which he has since labored in missionary, collecting and literary work. As an author Dr. Clark is widely known. During his college course, he showed some talent for writing verse, as well as for criticism on Biblical topics, and at graduation was the class poet. In the theological seminary he became an enthusiastic student of the Hebrew and Greek originals of scripture, under the celebrated Oriental scholar, Prof. T. J. Conant, D. D., and after entering upon pastoral work continued his exegetical studies for several years, contributing many articles to the periodical press, among them "The Evangelical Armenians of Turkey" and "The Righteous Dead Between Death and the Resurrection." In 1863 he published a "History of the First Baptist Church, Elizabeth, N. J." As a result of several years' study, Dr. Clark brought out early in 1870 "A New Harmony of the Four Gospels in English," which was generously received, and "Notes on the Gospel of Matthew." After these works came "Notes on Mark" (1873); "Notes on Luke" (1876); "Notes on John" (1879); "Brief Notes on the Gospels" (1884); "Harmonic Arrangement of the Acts" (1884); "Notes on the Acts of the Apostles" (1892) and "Commentary on Romans and I. and II. Corinthians" (1897). He has also published brief monographs on the Gospels of Luke and John, and is now engaged in concluding three additional volumes. His accurate scholarship, combined with his experience as a pastor, eminently fit him for the work he has proposed, namely, the preparation of "A Popular Commentary on a Critical Basis." His "Harmonic Acts" fills a field heretofore unoccupied in New Testament interpretation. Since 1881 Dr. Clark has resided at Hightstown, N. J., where he has done much toward promoting the prosperity of Peddie Institute, of which he is a trustee, also serving as chairman of its education committee. The degree of D. D. was conferred upon him by Rochester University in 1872. He was married, Sept. 6, 1855, to Susan C., daughter of Rev. Samuel Fish, of Halifax, Vt., and has one son and three daughters.

HASSAUREK, Friedrich, author, was born in Vienna, Austria, Oct. 9, 1832. He was educated at the classical gymnasium at which he was graduated in 1848, just when the revolution broke out. He took part in it, and was wounded in a street encounter. Emigrating to America in 1849, he settled in Cincinnati, O., where he engaged in journalism, and founded the "Hochwachter." In 1857 he sold this paper, and devoted himself to jurisprudence, engaging also in politics. Mr. Hassaurek was appointed

U. S. minister to Ecuador by Pres. Lincoln, and his stay in that country extended to 1865, during which time he gathered the material for his best work: "Four Years Among Spanish-Americans." This book had a wide circulation, passed through three editions, and was favorably received by the critics, one of whom wrote of it: "A journey from the sea coast to the interior, a sojourn at Quito, and a principal excursion into northern Ecuador, such is the frame upon which this agreeable, almost charming, and altogether instructive book is built. There is scarcely any point as to which the average or the cultivated reader might desire to be informed that the author has omitted in these graphic pages. . . . The author is not only cognizant of his subject, but has it well in hand, knows especially what to select and what to reject, and withal is a capable observer and a trustworthy narrator." "Nation," vol. 477. On his return from Ecuador he became editor of the Cincinnati "Volksblatt," and contributed largely to other periodicals. He published: "Hierarchie und Aristokratie," a romance (1855); "Four Years Among Spanish-Americans" (1867, 3d ed., 1881); "The Secret of the Andes; a South American Romance" (1870); and a collection of poems entitled, "Welke Blätter und Blüthen" (1877). He died in Paris, France, Oct. 3, 1885.

PULLMAN, George Mortimer, manufacturer, was born at Brocton, N. Y., March 3, 1831, son of James Lewis and Emily Caroline (Minton) Pullman, and the third in a family of ten children. His father, a man of keen intelligence and sterling integrity, was born in Rhode Island; his mother's native place was Auburn, N. Y. After attending the public schools of Brocton, the son, at the age of fourteen, became clerk in a general store, where he remained one year. At seventeen he assumed a share in the cabinet-making business of his eldest brother Albert, N. Y., but in 1852 the death of his father brought the added care of the widowed mother and four young children. His needs thus exceeding the income from the shop, he braved the perils of youth and inexperience, undertaking a contract for elevating the buildings along the line of the Erie canal, and he successfully raised them to the new level required by the canal enlargement then in progress. This occupied about four years, at the end of which time he went to Chicago with a capital of some six thousand dollars. The entire business section of that city was then being raised from the original grade, and Mr. Pullman's experience was put to the test. Fortified by a natural inventive faculty and a grasp of mechanical expedients, however, he was enabled to take advantage of this profitable field, and many large buildings of brick and stone were raised by him to the new level. In 1858 Mr. Pullman's attention was drawn to the sleeping-cars just introduced on the Lake Shore railroad; and as the first of these carried only fixed berths, he soon conceived the idea of a palace car designed for continuous and comfortable travel over long distances during both day and night. In 1859 he remodelled into sleeping-cars two passenger coaches belonging to the Chicago and Alton railroad; and, though these were far below their inventor's ideal standard of comfort and elegance, when placed in service they proved a long step in advance and created the demand for what followed. Having engaged in mining and other enterprises in the West, he was called to Colorado, where he remained

until 1863; but in that year he returned to Chicago and resumed the study and construction of a palace sleeping-car. He obtained from the Alton railway company the use of a repair shed, hired the most skilled workmen and began the erection of the "Pioneer," the first Pullman palace-car, which was completed a year later at a cost of \$18,000. It was first used in the funeral train which bore the body of Lincoln to its burial, and for this association is still preserved at Pullman, Ill. In 1867 he organized the Pullman Palace Car Co., of which he was president until his death. It is one of the largest and most successful manufacturing corporations in this country, employing a capital of \$40,000,000, giving work to 14,000 persons, furnishing a railway service of 120,000 miles, and operating an equipment of over 2,000 cars. He adopted the vestibule system in 1887. Thus, from the "Pioneer," which was first condemned as excessive in both weight and cost, have gradually evolved the solid vestibule trains, costing more than \$100,000 each, and averaging nearly a tenth of a mile in length. The town of Pullman was founded by him in 1880, some twelve miles south of Chicago, but was later embraced within the corporate limits of that city. Pullman is furnished with books, fountains, for the philanthropy based on the city, combined with culture, self-respect saloons are allowed and restrictions as inhabitant are care Pullman made his other important bus notable being the

GEORGE M. PULLMAN MEMORIAL.

politan Elevated railway of New York, where he served as president of the construction company. In 1867 he was married to Harriet Sanger, and had two daughters and two sons: Florence, Harriet, George M., Jr., and Walter Sanger. He died in Chicago, Ill., Oct. 19, 1897.

RUFNER, David, manufacturer, was born in Page county, Va., in 1767, son of Joseph and Anna (Heistand) Ruffner, and grandson of Peter Ruffner, who emigrated from the German-Swiss border to Pennsylvania in 1739, and later settled in Page county, Va., where he became owner of an immense tract of land. Joseph Ruffner, in 1795, sold his Shenandoah estate, purchased 502 acres in the Kanawha valley (now in West Virginia), and removed there with his family. This property included the salt spring on the Kanawha river, at which a band of Indians had camped in 1753, while returning from a raid with their white prisoners. One of these, Mrs. Mary Inglis, made her escape afterward and described the spring where the Indians had supplied themselves with salt by boiling down the water. Although Ruffner realized the potential value of this spring, he died in 1803 without developing it, willing it to his sons, David and

Joseph. Before 1803 the spring was producing 150 lbs. per day, by simple methods, and the salt was noted for its superior quality, but desiring to obtain a larger supply, the brothers began to look for the source. They traced it to the "Great Buffalo lick," just at the river's edge, six miles above Charleston; this was twelve or fifteen rods in extent. In order to reach the bottom of the quicksand through which the brine flowed, they set a platform on the top of a hollow sycamore tree about four feet in diameter, and by means of a pole with its fulcrum on a forked stick, a bucket made of half a whiskey barrel could be filled by one man armed with pick and shovel, and emptied by two men standing on the platform. Rigging up a long iron drill with a two-and-a-half inch chisel, they attached the upper end to a spring-pole by a rope, and with this primitive instrument finally bored forty feet through solid rock, reaching several cavities filled with strong salt water. This was brought to the surface undiluted, through wooden tubes, joined together and wound with twine. Thus was bored, tubed, rigged and worked the first drilled salt well west of the Alleghenies, if not in the United States. Considering the Ruffners' lack of preliminary study or experience, working in a newly settled country, without steam power, machine shops, materials or skilled mechanics, this is a wonderful engineering feat. In a crude way they invented nearly every appliance that has since made artesian boring possible. In February, 1808, the first salt was taken from the furnace, and the price reduced to four cents a pound. Ruffner Bros. were the pioneers of salt manufacture in the Kanawha valley, an industry that as early as 1817 comprised thirty furnaces and twenty wells, producing 700,000 bushels yearly. David Ruffner, the leader, was educated in the Page county, Va., schools, and engaged in farming until he began the manufacture of salt. Subsequently he made many improvements in drilling appliances, some of which are still in use. He became the leading man in Kanawha county, which he repeatedly represented in the Virginia legislature and he was for many years presiding judge of the county court. He was married, in 1789, to Ann, daughter of Henry Brumbaugh, of Rockingham county, Va., and had by her four children: Henry, who became a Presbyterian minister and was president of Washington college, Lexington, Va.; Anne E., Susan B., and Lewis Ruffner. His brother, Joseph (b. Feb. 14, 1769; d. 1837), sold his interest in the salt works and went to Ohio, where he bought land which eventually became a part of Cincinnati. Judge Ruffner died in Cincinnati, O., in 1837.

ORTON, James, naturalist, was born at Seneca Falls, N. Y., April 21, 1830, son of Dr. Azariah Giles Orton, the theologian. He was graduated at Williams College in 1855, and at Andover Theological Seminary in 1858, and then traveled for some time in Europe and the East, contributing letters of interest to the New York "Tribune." On July 11, 1860, he was ordained pastor of the Congregational church in Greene, N. Y., and in the following year accepted a call to Thomaston, Me., where he remained for three years. In 1864 he became pastor in Brighton, N. Y. He was appointed instructor in natural sciences in Rochester University in 1866, and in 1867 led an expedition of students from Williams College across South America by way of Quito, the Napo and the Amazon. They discovered the first fossils found in the Amazon valley. In 1869 he accepted the chair of natural history at Vassar College, filling it until his death. In 1873 he made a second journey across South America, from Para, up the Amazon to Lima and Lake Titicaca, collecting rare Inca relics. A third journey was undertaken by him in 1876 with the object of exploring

the Great Beni river, a branch of the Madeira; on reaching the mouth of the river the escort of Bolivian soldiers deserted, carrying away a large part of the equipment, and the expedition had to be abandoned. The return was made directly through the forest for 600 miles toward La Paz, and was accompanied by much hardship. Prof. Orton was one of the highest authorities on the subject of the geology and physical geography of the Amazon valley and the west coast of South America, having contributed largely to the exact knowledge of these regions. Besides many papers on the natural history of South America, that appeared in the transactions of European and American scientific societies of which he was a member, he published the following works: "Miners' Guide and Metallurgists' Directory" (1849); "The Proverbalist and the Poet" (1852); "The Andes and the Amazon" (1850); "Underground Treasures: How and Where to Find Them" (1872); "The Liberal Education of Women" (1873), and "Comparative Zoology" (1875). He died while crossing Lake Titicaca, Peru, on his way to Puno, during his third South American expedition, Sept. 25, 1877, and was buried on an island in the lake.

SUMNER, William Graham, educator, was born in Paterson, N. J., Oct. 30, 1840, son of Thomas and Sarah (Graham) Sumner, of English descent. He received his preliminary education in the public schools of Hartford, Conn., and was graduated at Yale in 1863. Going abroad he studied at the Universities of Göttingen, Germany, and Oxford, England. In 1866-69 he was engaged as tutor in Yale College. In 1867 he took orders in the Protestant Episcopal church, and for a short time was assistant at Calvary Church, in New York city. In 1870 he was called to the rectorship of the Church of the Redeemer, Morristown, N. J., and remained there for two years. In 1872 he was summoned to Yale as professor of political and social science, and has occupied that chair continuously up to the present time. The University of East Tennessee conferred upon him the degree of LL.D. in 1887. At one time Prof. Sumner was quite active in public affairs, and in 1873-76 served as a member of the New Haven board of aldermen. He is especially prominent as an advocate of free trade and an upholder of the gold standard. Beside contributions to the transactions of the American Social Science Association, he is the translator of Lange's "Commentary on the Second Book of Kings" (1872), and the author of "A History of American Currency" (1874); "Lectures on the History of Protection in the United States" (1875); "Life of Andrew Jackson" (1882); "What Social Classes Owe to Each Other" (1883); "Protectionism" (1885); "Collected Essays on Social and Political Science" (1885); "Life of Alexander Hamilton" (1891); "Life of Robert Morris," "The Financier and Finances of the Revolution" (1892); "A History of Banking in the United States," and various reviews and magazine articles on political and social science. He was married, April 17, 1871, to Jeannie Whittemore, daughter of Henry Hill Elliott, and has two sons, Eliot and Graham Sumner.

BUTLER, John Jay, clergyman and educator, was born at Berwick, Me., April 9, 1814. He took his preparatory course at Berwick Academy and Parsonsfield Seminary, and was graduated at Bowdoin College in 1837. During 1838-39 he taught school at Parsonsfield and Farmington, Me., later becoming principal of the Clinton (N. Y.) Seminary (1841-42). He pursued a course at the Andover Theological Seminary, where he was graduated in 1844, and became professor of systematic theology in Whites-town (N. Y.) Seminary, where he remained until 1854, when he accepted the same chair in the New

Hampton (N. H.) Theological Institute. On Jan. 28, 1846, he was ordained to the ministry of the Free Baptist church, of which denomination he had been a member since he was fifteen. In 1870 he became professor of the theological department in Bates College, Maine, where he taught until 1873, being then placed over the same department in Hillsdale College, Michigan, where he served until 1883. He was engaged in theological instruction for about forty years, and had under his tuition over five hundred students, most of whom subsequently entered the ministry. He became assistant editor of the "Morning Star," the organ of the Free Baptist church, in 1831, and continued to assist in the publication of that paper for many years, first in Dover, N. H., and later in Boston, Mass. Besides lesser works he has published, "Natural and Revealed Theology" (1861), "Commentary on the Gospels" (1870), and "Commentary on the Acts, Romans, and First and Second Corinthians" (1871). He received the degree of A.M. from Hamilton College in 1849, and that of D.D. from Bowdoin College in 1860.

TOWNSEND, Edward Davis, soldier and author, was born in Boston, Mass., on Aug. 22, 1817, son of David S. and (Gerry) Townsend, and grandson of David Townsend, who served as a surgeon during the revolutionary war, and of Elbridge Gerry. His father was an officer in the war of 1812. The son received his early education in the Latin School, Boston, and after a course at Harvard was graduated at the Military Academy July 1, 1837, as second lieutenant of the 2d artillery; he served in the Florida war of 1837-38. In 1838 he was in the Cherokee country while transferring the tribe to the Indian territory. He was made first lieutenant on Sept. 16, 1838. From July 7, 1838, to Aug. 8, 1846, he was adjutant at the regimental headquarters with the brevet rank of captain. On the latter date he was made assistant adjutant general, and was assigned to the command of the depot of recruits, Fort Columbus, N. Y. From Aug. 23, 1846, to Nov. 21, 1851, he served in the adjutant-general's office in Washington, D. C. He was made captain on April 21, 1848. On Nov. 21, 1851, he became assistant adjutant general of the Pacific division, returning Jan. 31, 1856, to the adjutant-general's office, Washington. In 1861 he was appointed chief of staff to Lieut. Gen. Scott, in which capacity he served throughout the war. He was made brevet-major in 1852, lieutenant colonel on March 7, 1861, and colonel Aug. 3, 1861. He was brevetted brigadier-general, U. S. army, on Sept. 24, 1864, for "meritorious and faithful service during the rebellion," and was brevetted major-general on March 13, 1865, "for faithful, meritorious and distinguished services in the adjutant-general's department during the rebellion." He was adjutant general of the U. S. army from Feb. 22, 1869, until June 15, 1880, when he was retired from active service. Throughout the civil war Gen. Townsend was, through his position in the war department, in close touch with Pres. Lincoln and Sec. Stanton. As adjutant-general he inaugurated the system of military prisons. As an author Gen. Townsend is known by his books, "Anecdotes of the Civil War" and "Catechism of the Bible." He died at his residence in Washington, D. C., May 12, 1863.

ELLIOTT, Jonathan, publisher and author, was born near Carlisle, England in 1784. He emigrated to New York about 1802, and engaged in the

Edward Townsend

printing business until 1810, when he volunteered to serve in the war for independence in Granada. He served under Bolivar, was severely wounded and suffered many hardships as a prisoner of war after the surrender of Gen. Miranda in 1812. The following year he returned to the United States, and participated in the war of 1812-15. In 1814 he established himself in Washington, where he edited with great ability, for some thirteen years the "Washington Gazette" (1814-27). He was the author of the "American Diplomatic Code" (1834); "Debates in the Several State Conventions on the Adoption of the Federal Constitution" (1827); "Funding System of the United States"; "Statistics of the United States"; "The Comparative Tariffs"; "Sketches of the District of Columbia" (1830), and edited the "Madison Papers" (1845). He died in Washington, March 12, 1846.

BURRINGTON, George, colonial governor of North Carolina (1724-25 and 1731-34), was born in England, in Devon, Devonshire, probably about 1685, son of Gilbert Burrington. It is said that he was appointed governor of North Carolina in recognition of services rendered by his father to George I., who confirmed the appointment Feb. 26, 1723. Before leaving England he joined Chief-Justice Gale and Sec. Lovitt in securing a lease of the fisheries of the colony on May 29, 1723. From the very start of his administration he encountered opposition as well as arbitrary demands, while his own violent disposition brought him into conflict with Chief-Justice Gale, which resulted in the governor's removal in 1725. He was succeeded by Sir

Richard Everard. Although Gale's charges were substantiated by seven members of the provincial council, when the colonial assembly met soon after the change the members of that body forwarded an address to the lords proprietors, in which they referred to the "great happiness which the province lately enjoyed" under Burrington, and the inconveniences caused by the "unexpected change which had been made thro' the many

faise and malicious calumnies raised against that gentleman." "His carriage and behaviour" are described therein as "very affable & courteous, and his justice very exemplary." Edmund Porter and John Baptista Ashe assisted in drafting the address, but this service did not prevent their incurring Burrington's enmity after his restoration in 1731, when they were denounced by him as "ungrateful villains." The exasperated ex-governor made himself disagreeable to Everard in various ways, and was several times indicted for disorderly conduct, once for knocking on the governor's door and challenging him in the profane terms; among other things characterizing him as a "calf's head, uoodle and an ape, who was no more fit to be governor than Sanchio Panza." Failing to appear in answer to these charges, the cases were finally closed by entry of *nolle prosequi*, as Burrington left Edenton shortly after. Later, when the proprietary rights were surrendered to the crown, Burrington, through influential friends at court, again obtained control of the provincial government. He was appointed June 15, 1730, and arrived in Edenton Feb. 25, 1731. Notwithstanding his former record, the governor's second appointment was received with approval throughout the colony, and the grand jury framed an address of thanks to the king. But these amicable relations were of short duration. A difference soon arose between the house of burgesses and the governor on the question of exorbitant fees charged by public officials, with the outcome that on May 17, 1731, Burrington prorogued the assembly. This was followed by a series of other conflicts, during which he exhibited such want of prudence as to make himself

intolerable to the colonists. Finally Chief-Justice Smith was sent by the council to England to complain of him, and Burrington was displaced by Gabriel Johnston in November, 1734. This terminated his political career in North Carolina. In spite of all the defects of his administration, the colony was greatly indebted to him for the improvement and development of its resources, as well as for the incessant toil and personal sacrifices he underwent in its service. To him more than to any other person was due the upbuilding of the Cape Fear region. At his instance a highway was constructed running from the Virginia boundary to Cape Fear. He also discovered and worked out the channel of the Cape Fear river and of Topsail inlet, and sounded and explored many other rivers and harbors previously almost unknown. In these and other undertakings he expended large sums from his private means. Not only were these expenditures never refunded, but even the stipulated salary, amounting to two or three thousand pounds, was withheld by the crown, so that Burrington returned to England greatly impoverished. His body was found in the canal in St. James' Park, London, about Feb. 22, 1750, and it was supposed that he was murdered.

ASPINWALL, William, surgeon and legislator, was born in Brookline, Mass., May 23, 1743. His ancestor, Peter Aspinwall, was the first settler in Brookline, in 1650. William Aspinwall studied at Harvard University, where he was graduated in 1764. He then went to Philadelphia (having already studied medicine with Dr. D. Gale, of Connecticut), and obtained the degree of M. D. in 1768. He volunteered at the battle of Lexington, and bore from the field the body of his townsman, Isaac Gardner, whose daughter he afterwards married. He received an appointment as a surgeon in the Continental army, and for a time was in command of a military hospital at Jamaica Plain. He followed Dr. Boylston in his efforts to introduce the practice of inoculation for small-pox, and established a small-pox hospital at Brookline, besides other institutions of the same character in various localities. It is said of Dr. Aspinwall that he probably inoculated more persons for small-pox than any other physician up to his time, while he also possessed great skill in the treatment of that disease. In his youth he had the misfortune to lose the sight of one eye, and in his old age a cataract destroyed the other. He practiced extensively for forty-five years, frequently riding on horseback as many as forty miles a day. Dr. Aspinwall was prominent in politics as a Republican of the Jeffersonian stamp, and served as a member of the Massachusetts legislature and executive council. He died, April 16, 1823, leaving a son of the same name, who succeeded him in his profession.

DRAYTON, William, jurist, was born in South Carolina in 1733. When about fourteen years of age he was placed under Thomas Corbett, an eminent lawyer, with whom he went to London in 1750. He studied law in the Middle Temple until 1754, when he returned to America. Though his legal ability was considerable, he had an aversion to the general practice of law, and soon quitted the bar; but in 1768 he was appointed chief-justice in the province of East Florida. At the beginning of the revolution he was suspected by the governor of sympathizing with the patriots of his native state and was removed from office. Upon going to England, he was reinstated, but on his return to St. Augustine, Gov. Tonyon again suspended him. In consequence, he took his family to England in 1778 or 1779, hoping to obtain redress, but the confused condition of affairs in America prevented his doing so. Returning again to this country, he was soon after appointed judge of the admiralty court of South Carolina. In March, 1789, he was appointed associ-

ate justice of the state, and held this office until October, when he resigned to become the first U. S. judge for the district of South Carolina. He died May 18, 1790.

DRAYTON, William, soldier, was born at St. Augustine, Fla., Dec. 30, 1776, youngest of ten sons of William Drayton, jurist. He was educated in England, and on returning to South Carolina, at his father's death, was for a time assistant clerk in the court of general sessions, where his brother, Jacob Drayton, was clerk. He studied law, was admitted to the bar in 1797, and had a large practice before 1812. In 1801 he became a lieutenant in the South Carolina militia, and in 1812 was commissioned a lieutenant-colonel in the U. S. army. He was promoted colonel of the 18th infantry, on July 25, 1812, and in 1814, and assisted Gens. Scott and Macomb in preparing a system of infantry tactics for the army. He was elected recorder of Charleston in 1819; was a representative in congress from South Carolina in 1825-33, filling the place of Joel R. Poinsett, who had been appointed minister to Mexico. He was a warm friend of Gen. Jackson, and was offered by him the portfolio of war, which, however, he declined. After the close of his congressional career he removed to Philadelphia, partly because he had made himself unpopular by opposing nullification. In 1839-40 he succeeded Nicholas Biddle as president of the U. S. Bank, and after trying to revive it, retired in 1840, having placed the assets of the bank in the hands of assignees, which he thought was the only honorable thing to do. He died in Philadelphia, Pa., May 21, 1846.

BUCHANAN, McKean, actor, was born in Philadelphia, Pa., Feb. 28, 1823, son of McKean Buchanan. His father was a paymaster and his grandfather an admiral in the U. S. navy. The son also was educated for the navy, and served for three years as a mid-shipman on the sloop of war *St. Louis*, but he elected to become an actor, making his first appearance on the stage as Hamlet at the St. Charles Theatre, New Orleans. He appeared in New York also as Hamlet, at the Broadway Theatre, on June 10, 1850, and in the following week was seen as Othello at the Walnut Street Theatre in Philadelphia. After a brief tour of the country he sailed for England, where he played for over 600 nights. Later he made a tour of California and Australia, playing with great success in the mining towns and camps. His reappearance on the New York stage was made as King Lear at the Broadway Theatre on Nov. 9, 1857. Subsequent to another season spent in America he visited England a second time; and, after fulfilling numerous engagements there, sailed for California and Australia, where he spent several years. He returned to the United States on April 9, 1864, and traveled almost continuously as a star until his death, which occurred at Denver, Col., April 16, 1872. Though possessing only moderate ability, he was a painstaking and laborious actor; and, though poorly appreciated in New York, where his style was termed sombre and antiquated, in the West he was very popular, making many warm friends. His daughter, Virginia Ellen (b. 1866), is well known on the contemporary stage.

BRYAN, Edward Payson, engineer, was born at Windsor, Ashtabula Co., O., July 2, 1847, son of John Love and Calista (Griswold) Bryan. His earliest American ancestor was William Bryan, of Ireland, who settled in Virginia in 1717 and died in 1776. His grandson, William Bryan, was an officer in the revolutionary war, holding a commission from Gov. Patrick Henry. He was in active service during the war and took part in the battles of Guilford Court house, Eutaw springs and Cowpens. He accompanied Daniel Boone on his second trip to Kentucky, and helped him to plant the first field

of corn in that state, near what is now Boonesborough. Edward Payson Bryan received his education in the public schools of Granville, O., and at the preparatory school of Denison University. In 1865 he left school and entered the service of the Louisville and Nashville railroad at Brumfield Station, Kentucky, and as a result of close application to his duties he has regularly advanced through the various grades of telegraph operator, station agent and superintendent to vice-president and general manager of the Terminal Railroad Association of St. Louis, which latter position he held until 1900, when the operating company of the underground rapid transit road of New York city secured his services as general manager. He was director of the Merchants' Exchange and a member of the Merchants', Noon-day and Jockey clubs of St. Louis. Becoming connected with the underground rapid transit road, Mr. Bryan removed to New York city, where he has taken up his residence. He was married, June 6, 1871, to Arabella, daughter of Sylvester and Arabella (Scott) Welch, of Frankfort, Ky., and had five sons. Mr. Welch was the first chief engineer of the Pennsylvania railroad, and at the time of his death chief engineer of the state of Kentucky, in charge of the locking and damming of the Kentucky river.

GAY, Francis, planter and stock raiser, was born in Canterbury, New Zealand, Sept. 19, 1852,

second son of Thomas and Jane (Sinclair) Gay, and grandson of Mrs. Elizabeth Sinclair, who purchased the island of Niuhau, the westernmost of the Hawaiian islands, and the great Makawili estate of 65,000 acres on the island of Kauai, in 1863, from King Kamehameha Fifth. The story of the Sinclairs tends like an anachronism of the sixth decade of the nineteenth century, it might almost be written as having occurred in any one of the prior centuries. Mrs. Sinclair and her husband left Scotland early in the century, and settled in New Zealand, where he acquired much land. Just in the prime of life Mr. Sinclair was lost at sea,

Francis Gay

leaving his widow to bring up a large family and manage a large property. She was successful with both, but her great ambition was to keep her family together on the old patriarchal system. When her children grew up and married it seemed her New Zealand property was not large enough, so she sold it, embarking her family, live stock and movable possessions on board a clipper ship, owned by her and commanded by one of her sons-in-law, and sailed out on the Pacific in search of a home. After visiting several places she decided on Hawaii, where she established herself, and there her family grew up, and there she died early in 1890, respected and regretted by all who knew her. Francis Gay and Aubrey Robinson, her grandsons, and their mothers, Mrs. Jane (Sinclair) Gay and Mrs. Helen (Sinclair) Robinson, under the firm name of Gay & Robinson, today (1901), control the vast possessions which their ancestress purchased from the last of the Kamehamehas. Mr. Gay was educated by a private tutor on the estate, and at the Boston Institute of Technology, and afterwards took a course in a business college. Since that time he has devoted himself, with his partners, to the management of the firm's extensive affairs. The island of Niuhau is used for grazing cattle and sheep entirely. It has a population of about 300, all of whom are engaged in taking care of the owners' flocks and

beris, and in kindred occupations. Part of their Makawell estate, some 5,750 acres, was leased about 1880 to the Hawaiian Sugar Co. on a fifty-year lease, and on it is established the Makawell sugar plantation. The firm, beside having an interest in this plantation, has more than 1,000 acres of sugar land which they plant themselves, using the other portion of the land for grazing. He has two brothers—George S. Gay, of Crofton, Cal., and Charles Gay; and two sisters, Eliza Gay and Alice Gay Robinson, wife of Aubrey Robinson, his cousin and partner. Mr. Gay was elected to and served in the Hawaiian legislature of 1888, called the "reform legislature." He was married at Honolulu, April 17, 1896, to Alice Ida, daughter of Judge Charles P. Hart, of Kohala, Hawaii, and has one son, Francis Ernest.

ROBINSON, Aubrey, planter and landed proprietor, was born in Canterbury, New Zealand, in 1853, son of Charles B. and Helen (Sinclair) Robinson. His grandmother, Mrs. Elizabeth Sinclair, of Scotland, with her family and grandchildren, removed to the Hawaiian Islands from New Zealand in 1863, and settled there, purchasing from King Kamehameha V. the island of Niihau and also purchasing the Makawell estate on the island of Kauai. Aubrey Robinson was educated at home and afterwards took a course at the Boston (Mass.) Law School and was admitted to the bar in the eastern law courts. He afterwards spent a number of years traveling in Europe and Asia, and, on his return to Hawaii, commenced the active management of the family estates in connection with his cousin, Francis Gay, under the firm name of Gay & Robinson, the other partners being Mrs. Elizabeth Sinclair, Mrs. Jane Sinclair Gay and Mrs. Helen Sinclair Robinson. Their island of Niihau is used exclusively by Gay & Robinson for grazing purposes, as is also the major portion of their Makawell estate. Mr. Robinson was instrumental in the successful inauguration of

Aubrey Robinson.

the Makawell sugar plantation, which, under the corporate name of the Hawaiian Sugar Co., leases from Gay & Robinson about 6,000 acres of their estate. Besides this land on Kauai, the firm of Gay & Robinson has a sugar plantation of more than 1,000 acres in extent situated on the same estate. Mr. Robinson was married, in 1885, to Alice, daughter of Capt. Thomas and Jane (Sinclair) Gay, and has four sons and one daughter.

JEWETT, Sara, actress, was born in Buffalo, N. Y., May 26, 1847. She was taken in infancy to Cincinnati, O., where her parents resided for a time, and later was placed in the school conducted by her aunt, Mrs. Sedgwick, at Lenox, Mass. When she was fourteen years of age, she went to Cambridge, whither her parents had removed, and there studied at home, under a private tutor, showing an especial taste for language and literature. She also devoted much time to the study of music, under a Boston professor. At Cambridge she was the star in a series of amateur theatrical performances, but did not think of entering professional life until financial reverses made it necessary. She began to study for the stage with Fanny Morant, who became deeply interested in her young pupil, and eventually introduced her to Mr. Daly. He engaged Miss Jewett, and in 1872 she made her debut at his theatre in the

leading rôle of "Diamonds." She continued with Mr. Daly for several years, on one tour traveling 9,000 miles. Afterwards she became leading lady at the Union Square Theatre, and with its company played in all the principal cities of the United States. She also appeared in many rôles at the Fifth Avenue Theatre. Among her best remembered characters are Adrienne in "A Celebrated Case"; Mabel Wyckoff in Bronson Howard's "Diamonds"; Anne Page in "The Merry Wives of Windsor"; Mrs. Lynx in "Married Life" and Maria in "The School for Scandal." She was considered one of the most beautiful women of her time, and developed into an intelligent and sympathetic actress. Becoming an invalid, she retired from the stage, her last appearance being made at the Union Square Theatre in the spring of 1883. Died at Cambridge, Mass., March 27, 1899.

FOX, George Henry, physician, was born at Ballston Spa, Saratoga co., N. Y., Oct. 8, 1846, son of Rev. Norman and Jane (Freeman) Fox, and grandson of Rev. Jehiel Fox, a pioneer Baptist minister who organized most of the churches of the Lake George Association. His father (b. 1793; d. 1863), was admitted to the bar; eventually became judge of Warren county, and served for several years in the legislature. Having been converted, he devoted himself to the ministry, and for twelve years was pastor of the church at Ballston Spa. The son received his preparatory education in the Satterlee Collegiate Institute, and entered the University of Rochester in 1863. In 1864 he enlisted in the 77th New York volunteers, and after an eight month's service returned to college, where he was graduated with his class in 1867. In 1869 he obtained his medical degree from the University of Pennsylvania, and was appointed surgeon to the Philadelphia Hospital. Going abroad in 1870, he studied medicine for three years in the universities of Berlin, Vienna, Paris and London. He began practice in New York city in 1874, and in 1875 became surgeon to the New York Dispensary. In 1877 he was appointed clinical professor of diseases of the skin in the Woman's Medical College of the New York infirmary, and in 1879 clinical professor of dermatology at Starling Medical College, Columbus, O. In 1880 he became clinical professor of skin diseases in the New York College of Physicians and Surgeons, which position he still (1901) occupies, and in 1885 professor in the Post-Graduate Medical School in the same city. Dr. Fox is an active member of the New York Camera Club, and has utilized his skill as a photographer in illustrating his scientific publications. He is the author of "Photographic Illustrations of Skin Diseases" (1880; 2d. ed., 1886); "Photographic Illustrations of Cutaneous Syphilis" (1881); "Illustrated Medicine and Surgery" (1882-83); "Electrolysis in the removal of Superfluous Hair" (1886); "Skin Diseases of Children" (1897), and "Photographic Atlas of Skin Diseases" (1900). He was president of the Medical Society of the County of New York; of the State Medical Society, and vice-president of the Post-Graduate Medical School and Hospital; president of Psi Upsilon Club. He is a member of the New York Academy of Medicine and the University Club. Outside of his professional life Dr. Fox finds his favorite occupation in the study of entomology and ornithology. He was married, Aug. 30, 1872, to Harriet, daughter of Francis Henry Gibbs, of Titusville, Pa. They have two sons and two daughters.
